One of the most vexed questions in Indian industry since the advent of the second World War has been the maintenance of the workers' pre-war standard of life. During the earlier stages of price control, prices varied within narrow margins. The official cost of living index for Bombay City with prices in 1933-34 as the base stood at 105 for August, 106 for September, 108 for October, 109 for November and rose to 113 for December in the year 1939. The limit of variation in the monthly index numbers in this series during the whole of the year 1940 was within six points only : 110 for March and April and 115 for December. Organised demands for dearness allowances in Indian industry were first made in Bombay in December 1939 and these thereafter spread to other centres. The demand made by cotton mill workers in the City of Bombay was referred by the Government of Bombay to a Board of Conciliation appointed under the Bombay Industrial Disputes Act, 1938 presided over by Sir Sajba Rangnekar. Conciliation failed but the Millowners' Association, Bombay, accepted the recommendations made by the Board and sanctioned the payment of a dearness allowance at a flat rate of two annas per day of attendance, with retrospective effect from 1st December 1939, to every worker whose earnings did not amount to more than Rs. 150 per month. Dearness allowance at this rate was to be paid so long as the official cost of living index for Bombay City remained between the limits of 105 and 123. It was reckoned that an allowance at this rate would compensate the workers to the extent of an average of 76.9 per cent of the actual rise in the cost of living so long as the official index remained between these limits. The demand for dearness allowance made by cotton mill workers in Ahmedabad was also referred to conciliation. As in Bombay, conciliation failed also in Ahmedabad but in the latter centre an agreement was reached between the Ahmedabad Millowners' Association and the Textile Labour Association, Ahmedabad, to refer the dispute to the arbitration of the Industrial Court, Bombay. The Industrial Court in its award on this dispute laid down a sliding scale of allowances varying with the fluctuations in the official cost of living index for Ahmedabad on the basis of a grant of an allowance equivalent to one-elevenths of Rs. 3-8-0 per month for every rise of one point in the index, as compared with the figure for August 1939, in the month two months prior to the one for which the allowance is to be paid. It was calculated that this would compensate the workers to the extent of 66.67 per cent of the actual rise in the cost of living at any particular date. A part of the balance was to be made up by opening cost price grain shops. This was the first beginning in India of the payment of dearness allowances on a sliding scale linked up with fluctuations in the cost of living index.

The position in the principal industries in India is somewhat as follows :—

In the main centres of the industry in the Bombay Province the dearness allowance is based on the cost of living index figures. The allowances are paid at a flat rate irrespective of the income, subject to a maximum. As a result of this, employees earning lower scales of pay stand to benefit more than others and the least skilled worker is often remunerated to the full extent of the rise in the cost of living.

According to the latest information available, the monthly rate of dearness allowance in Bombay, Ahmedabad and Sholapur was in the neighbourhood of Rs. 31, Rs. 60 and Rs. 22 respectively. In Nagpur the rate of dearness allowance was about Rs. 27 while in Southern India it varied from Rs. 15 to Rs. 24. In the Jute Mill Industry in Bengal, immediately on the outbreak of hostilities in order to keep labour contented, the Jute Mills Association sanctioned an increase of 10 per cent in the wages. The industry pays no dearness allowance as such but an allowance known as the "amenity allowance" is paid instead. The rate of this allowance was Re. 0-4-0 per month in July 1941. This has been increased from time to time and since December 1944 stands at Rs. 2 per week. The payment of the allowance is linked to attendance. In addition to the cash allowance the mills issue foodstuffs from the mill ration shops at concession rates. The quantities allowed and the amounts charged vary from mill to mill but it is estimated that the loss to the mills per worker amounts to about a rupee per week.

The rates of dearness allowance in the Woollen industry vary considerably from centre to centre and the extreme limits are Rs. 30 per month in Bombay and only Rs. 10 at Kashmir. On the other hand, it must be stated here that basic wages have been increased by more than 25 per cent since the War in many units of the Woollen Industry.

In centres other than Bombay City, the dearness allowance paid in the silk industry has not been commensurate with the rise in prices. The establishments in Mysore pay Rs. 8 per month to adults and only Rs. 5 to half-time workers. In Government factories in Kashmir 50 per cent of the earned wages are paid by way of dearness allowance. In Bengal the rate varies from Re. 0-1-6 to Re. 0-5-0 a rupee of the total earnings while in Bombay the scale of dearness allowance is linked to the official cost of living index numbers which amounts to about Re. 0-14-0 per day.

So far as municipal labour is concerned, the scales of dearness allowance are generally lower than those obtaining in private industries but they are in accordance with the scales prescribed by the Provincial Governments. These vary from Rs. 22 in Bombay to Rs. 10 only in Madras. It is understood that in Karachi, in addition to a dearness allowance of Rs. 18 per month, compensatory allowance varying from Rs. 4 to Rs. 7-8-0 per month is also paid. So far as workers in Ports are concerned, they also get dearness allowance at rates lower than those prevailing in private industries. In the Port of Bombay, for instance, the scale of dearness allowance is 10 per cent of the monthly earnings, subject to a minimum of Rs. 16 per month. Many of the port authorities, however, although they pay a smaller dearness allowance, have made arrangements for supplying grain and other necessary supplies at concessional rates and it is understood that the value of the concession varies from Rs. 6 to Rs. 10 per month.

Many employers in Bombay and elsewhere in India waited to see as to what action the Millowners' Association, Bombay, would adopt in

and Boyce Manufacturing Co., Ltd., and a host of others are paying dearness allowances to their workers on the basis of the sliding scale of the Millowners' Association, Bombay. As the result of adjudication proceedings in a recent dispute between the Bombay Electric Supply & Tramways Co., Ltd., and its employees, the adjudicator (Mr. E. M. Nanavatty) awarded the Bombay Millowners' scale of dearness allowances to the employees of this company as well. A group of large engineering firms in Bombay such as Messrs. Richardson and Cruddas, the Mazgaon Dock of Messrs. Mackinnon Mackenzie & Co., Messrs. Alcock Ashdown & Co., Ltd., and a few others have laid down a sliding scale of dearness allowances based on an increase of one per cent., over earnings from existing basic rates of pay for every rise of two points in the cost of living index for Bombay. The Silk and Art-Silk Mills Association, the Bombay Gas Co., Ltd., has also adopted sliding scales of dearness allowances but the actual amounts paid are somewhat less than those adopted by the Millowners' Association, Bombay.

The highest rates of dearness allowances paid in India are those that obtained in cotton textile mills in Ahmedabad. In an earlier paragraph we have stated that in awarding an addition of one elevenths of Rs. 3-8-0 for every rise of one point over the figure of the official cost of living index for Ahmedabad for the month of August 1939, the Industrial Court intended that cotton mill workers in that centre should be compensated to the extent of 66·67 per cent of the actual rise in the cost of living at any particular date. Part of the balance was to be made up by opening a number of cost price grain shops. These were started but great difficulties were experienced in connexion with their running and the Scheme was abandoned with the consent of the Industrial Court. In view, however, of the continued improvement in the condition of the cotton textile industry in India, the Ahmedabad Textile Labour Association, successfully pressed a demand on the Ahmedabad Millowners' Association in the middle of the year 1941 for the uncompensated balance of 33·33 per cent in the rise of the cost of living at Ahmedabad to be made good to the workers and the two Associations reached a further agreement on the 12th August 1941 by virtue of which the dearness allowance for any particular month would be increased by 45 per cent with retrospective effect from July 1941. This agreement was ratified by the Industrial Court in an award dated 15th September 1941. It is of interest to observe that on the basis of this agreement the dearness allowance for cotton mill workers in Ahmedabad for the month of October 1943, amounted to as much as Rs. 77-0-9 for each individual worker. A petition filed by the Ahmedabad Millowners' Association in the Industrial Court in August 1943 for a substantial reduction in the quantum of dearness allowance payable to cotton mill workers in Ahmedabad on the ground that the profit making capacity of the industry had been considerably worsened during the year 1943 was rejected by the Court. The original award of the Industrial Court was based on a submission entered into between the Ahmedabad Millowners' Association and the Textile Labour

Association, Ahmedabad. By virtue of one of the articles of that submission, the dearness allowances awarded by the Industrial Court were to be paid up to the end of the European war involving England and for a period of three months thereafter if prices continued to be affected by war conditions. With the unconditional surrender of Germany on the 8th May 1945 the Ahmedabad Millowners' Association suspended the payment of dearness allowances in all member mills. The Textile Labour Association, Ahmedabad, thereupon filed a petition in the Industrial Court, Bombay, praying for a continuation of the payment of the dearness allowances on the existing scales for a period of three months up to 8th August 1945. The Industrial Court made an order accordingly. The Association further served another notice on the Ahmedabad Millowners' Association demanding a continuation of the payment of the existing scales of dearness allowances until such time as the Cost of Living Index for Ahmedabad reached the pre-war figure of 73. No decision had been reached in this matter by the time we went to Press.

Industrial workers in no centre in India outside Bombay and Ahmedabad are paid dearness allowances as high as those earned by cotton mill workers and others in these two centres. In the cotton mills in the Central Provinces and Berar, dearness allowances are paid on the basis of the recommendations made in the matter by the Mahalanobis and the Jayaratnam Committees according to which a uniform allowance of one pie per day of attendance for every rise of one point in the three-monthly moving average of the cost of living index for the centre concerned is paid to each worker. The Indian Jute Mills Association, in addition to the allowance of ten per cent of earnings which it had sanctioned for jute mills workers in Calcutta and Howrah with effect from November 1939 gave an additional flat rate of Rs. 1-4-0 per week per head with effect from 1st August 1942. This amenity allowance as it is called was later increased to Rs. 2 per head per week. In May, 1945, the dearness allowances paid by other large employers in Calcutta were as follows: Indian Engineering Association—flat rate of Rs. 9-8-0 per month; Calcutta Corporation Rs. 18 per month up to pay of Rs. 35 and Rs. 22 per month up to pay of Rs. 300; Calcutta Electric Supply Corporation Ltd.—Rs. 14-8-0 per month with food concession of Rs. 7-8-0; Calcutta Tramways Co., Ltd.—Rs. 18 per month with food concession of Rs. 10; Bengal Telephones—Rs. 20 up to Rs. 35 with food concession of Rs. 20 according to Government rules; and the Oriental Gas Company Ltd.—Rs. 16 per month and food concession of Rs. 9-8-0. Profiting by the experience gained by employers in Bombay and Ahmedabad and with a view to check inflationary tendencies, the general practice adopted in Bengal for neutralising the effects of increasing dearness in prices has been to 'freeze' the dearness allowances granted in cash at the figures obtaining about August-September 1942 and to permit workers to obtain generous supplies of essential foodstuffs and necessities of life at the prices obtaining for these articles at the dates when the dearness allowances in cash were frozen. Industrial employers in Bengal do not follow any fixed formula coupled up with

fluctuations in the cost of living in determining the dearness allowances which they have decided to pay.

A system of freezing has also been adopted in the Tata Iron and Steel Works at Jamshedpur. The allowances granted with effect from 1st August 1940 through the mediation of a Board of Conciliation were increased from 1st October, 1941. A further increase was effected from 1st October, 1942. Increase in the cost of living after that date was offset by providing food grains to workers at rates current in the month of October, 1942. The last revision in the scale of allowances was introduced from 1st May 1943, the rates being fixed as follows: Rs. 10 per month for those drawing less than Rs. 100 per month; Rs. 13 for those drawing between Rs. 100 and Rs. 200 and Rs. 16 for those getting between Rs. 200 and Rs. 300 per month. Rationing was introduced in Jamshedpur with effect from 26th July, 1944. Even with rationing the Company continues to bear the difference between the controlled prices of grains and those ruling in October 1912 under its compensatory food grains supply scheme.

As far as railway servants and employees in the industrial undertakings of the Central Government are concerned, the Government of India had fixed the following rates of dearness allowances with effect from 1st March 1914: (1) persons employed in the Cities of Bombay, Calcutta and Cawnpore on pay up to Rs. 250 per month to get Rs. 10 per month; (2) persons employed in other towns containing over 250,000 inhabitants on pay up to Rs. 200 per month to get Rs. 14 per month; (3) persons employed in towns of over 50,000 inhabitants but not more than 250,000 inhabitants whose pay was not more than Rs. 175 per month to get Rs. 11 per month; and (4) persons in all other places whose pay was not more than Rs. 150 per month to get Rs. 9 per month. All workers getting more than the maximum limits specified for the different areas but less than Rs. 200, Rs. 214, Rs. 186 and Rs. 150 per month respectively would be paid dearness allowances which would bring their total emoluments up to these amounts. These rates were revised on two occasions since then: (1) 1st July, 1944; and (2) in April 1945. The last revision was to take retrospective effect from 1st January, 1945. All Government servants have been broadly divided into two main groups: (a) 'Railway employees': and (b) 'Others'. 'Railway employees' have been grouped into four Zones, "X", "A", "B" and "C". These Zones correspond to the cities and towns described above. There is a further distinction between those having a pay of Rs. 40 per month and above and those getting below Rs. 40 per month. The rates in force in June 1945 were as follows: "X" Areas—Rs. 20 and Rs. 19 per month respectively for those drawing Rs. 40 per month and over and for those drawing under Rs. 40 per month or 17½ per cent. whichever is greater; "A" Areas—Rs. 19 and Rs. 17 per month respectively or the percentage as for "X" Areas; "B" Areas—Rs. 16 and Rs. 14 per month respectively or the percentage; and "C" Areas—Rs. 14 and Rs. 12 per month respectively or the percentage. 'Others' have been grouped into three Zones "A", "B" and "C" according to expensiveness in the

cities, towns and areas concerned. The pay limits for those earning Rs. 40 and over also vary. The rates in force in June 1945 for 'Others' who include employees in Government industrial undertakings are as follows: "A" Areas—Rs. 20 per month for those whose pay is under Rs. 40 per month and Rs. 22 per month or 17½ per cent. of pay whichever may be greater for those drawing over Rs. 40 up to Rs. 250 per month; "B" Areas—Rs. 16 and Rs. 18 per month respectively as for "A" Areas but with an upper pay limit of Rs. 200; and "C" Areas—Rs. 14 and Rs. 16 per month respectively as for "A" Areas but with an upper pay limit of Rs. 150.

For the first time, the higher paid employees of Government were given a war allowance from 1st July 1944. Persons drawing up to Rs. 1,000 per month, if married, got 10 per cent. of their pay subject to a minimum of Rs. 50. Unmarried persons drawing up to Rs. 750 got 5 per cent. of pay subject to a minimum of Rs. 20. With effect from 1st January, 1945, these allowances were increased to 17½ per cent. in the case of married persons drawing up to Rs. 1,500 per month and to 7½ per cent. in the case of single persons drawing up to Rs. 1,000, the minima in both cases remaining the same. In the case of married persons drawing above Rs. 1,500 and up to Rs. 2,000 per month a flat allowance of Rs. 263 has been allowed with marginal adjustment up to Rs. 2,263, e.g., an officer drawing Rs. 2,150 per month would get a war allowance of Rs. 113 per month.

The Employers' Association of Northern India which covers jute mills, textile, woollen and leather factories and other employers in Northern India has recently adopted scales of dearness allowance which fluctuate with changes in the cost of living but whereas the Ahmedabad, Bombay and the Central Provinces and Berar schemes vary the allowances for every change of one point in the cost of living indexes for these centres, the scheme adopted by this Association keeps the allowances granted stationary for fluctuations within groups of 20 points. There is also another important difference. The sliding scales which apply to cotton mill workers in Ahmedabad, Bombay and in the C. P. and Berar give a uniform rate of dearness allowances to all workers irrespective of their pay. The Northern India scheme varies the rates of allowances according to income groups in different types of concerns. Thus, for fluctuations in the cost of living index between 161 and 180, jute mill workers getting under Rs. 14 per month, get an allowance of seven annas in the rupee of earnings; the group Rs. 14 but under Rs. 18 gets six annas in the rupee; Rs. 18 but under Rs. 24, five annas; Rs. 24 but under Rs. 30, 4½ annas; Rs. 30 but under Rs. 75, four annas; and Rs. 75 and up to Rs. 150 gets three annas in the rupee of earnings. Workers in textile, woollen and leather factories are divided into seven categories as against six categories for jute mill workers.

Payment of dearness allowances in industrial concerns in Indian States is based mainly on the principles followed in the most adjacent large industrial towns in British India. Certain States, however,—notably Gwalior—entrusted the examination of the question of the quantum of the allowance which should be paid to Com-

mittees specially appointed for the purpose. In the year 1942, H.H. The Maharaja Scindia of Gwalior appointed a Textile Labour Inquiry Commission comprising of officials and representatives of labour and Millowners in Gwalior State to find a suitable reply for labour complaints and Millowners' difficulties. According to the recommendations of the Commission, which have been given retrospective effect from 1st October 1943, an equal amount of dearness allowances is to be paid to all workers irrespective of their wages. The amount of dearness allowance payable will be reckoned every three months by relating it to the average of the cost of living index numbers for Bombay, Ahmedabad and Sholapur for the previous three months and by taking average index numbers as the index number for that month and the subsequent two months. The amount of the allowance would be arrived at by calculating it at the rate of annas three per unit of rise of the average number. Employees who, under existing arrangements, were getting an allowance in excess of the amount calculated at the flat rate would continue to draw the same higher rate of allowance and would be entitled to higher allowance only when the amount calculated at the flat rate exceeds their existing allowance.

**Dearness Allowance Committee:**—In pursuance of a decision reached at the Plenary Session of the Tripartite Labour Conference held on the 7th February 1943, the Hon'ble Dr. B. R. Ambedkar, Member for Labour, as Chairman of the Conference, appointed a Committee to make recommendations on the general principles of fixing dearness allowance to employees in industrial concerns. The Committee consisted of Dr. Sir Theodore Gregory, D.Sc., Economic Adviser to the Government of India as Chairman, Mr. J. E. Pedley, C.I.E., M.C., I.O.S., Labour Commissioner, United Provinces, as Vice-Chairman and six members, namely: Mr. F. R. Brislee, I.O.S., and Mr. D. V. Rege, I.O.S., Labour Commissioners, Madras and the C.P. and Berar respectively; Sir Shri Ram, New Delhi and Sir George Morton, Calcutta, representing employers and Messrs. Jannadas Mehta, Bombay and Mr. B. Mookerjee, Calcutta, representing workers. This Committee submitted its report, which is being treated as a confidential document, to the Hon'ble the Labour Member early in the year 1944. The Report has been circulated to Provincial Governments and to important Federations of Employers' Associations and Trade Unions for an expression of their views.

We have endeavoured to give a brief outline of all the more important schemes of dearness allowances which were in operation for industrial workers in India as in May 1945. As will have been seen, there is little uniformity either in the method adopted or in the amounts of allowances actually given in any two centres of industry.

There appear to be two main schools of thought in this matter even outside industrialists. One school favours the cheap food policy: the other automatic increases based on cost of living indices however unreliable they may be for the purpose. The latter category, as a rule, also favours paying the men substantial bonuses. In the circumstances set out we regret our inability to give any more information on this subject.

## DEMAND FOR PARTICIPATION IN WAR PROFITS.

During the period of the General Strike in cotton textile mills in the City of Bombay in 1940, the Government of Bombay had enquired of the Millowners' Association, Bombay, whether it was willing to give an undertaking to Government that the Millowners would be prepared to give a war bonus to their workers if increased profits were made by the industry as a result of war conditions, as soon as the extent of these profits had been determined. The Government of Bombay were aware of the increasing desire of textile workers to be given an adequate share in the improved trading conditions of the industry resulting from the war and they, therefore, took up the matter again with the Millowners' Association, Bombay, towards the end of the year 1941. As a result of these discussions, the Association decided that its Cotton Mill Members in the City and Island of Bombay should grant to their workers a cash bonus equivalent to 12½ per cent of, or two annas in the rupee on, their actual earnings (exclusive of dearness allowances) for the period 1st January to 31st December 1941. The Government of Bombay issued a Press Note on the subject on 3rd December 1941. In accordance with the decision reached a large majority of cotton mill-workers in Bombay received a bonus equivalent to about six weeks' pay in January 1942. For the year 1942, the Millowners' Association, Bombay, in consultation with the Government of Bombay, decided to pay to each permanent worker a bonus equivalent to one-sixth of the total earnings accruing to him from his basic rates of pay during the year in two equal instalments on the 23rd January and on the 21st March 1943 subject to the proviso that the name of the worker was on the muster roll of the Mill concerned on the 31st December 1942 and on each of the dates when each instalment of the bonus was paid. Substitute or *baddi* workers, in addition to satisfying these conditions, were required to have put in 75 days' work during the year 1942 in order to earn the bonus. The Millowners' Association, Bombay, sanctioned similar bonuses for cotton mill-workers in Bombay for the years 1943 and 1944 and decided that all workers who had been retrenched during each year should also get the bonus provided that they entered into agreements with their employers regarding the terms of retrenchment. The Bombay Girni Kamgar Union (Red Flag), early in the year 1944, sponsored a demand for a bonus equivalent to three months' wages to be payable in one lump sum without any conditions. It secured support from the workers of nearly 60 mills in Bombay for this demand and a number of intimations in the matter were sent to the Labour Officer, Bombay. Meetings were held in a large number of mills and a number of cases were taken into conciliation but the Millowners' Association refused to make any further concessions in the matter.

In August 1941 the Textile Labour Association, Ahmedabad, put up a demand to the Ahmedabad Millowners' Association for an increase of 25 per cent. in wages. After prolonged and protracted negotiations and discussions, the two parties agreed to refer the matter to the Industrial Court on the basis of

or to the Central Government for technical personnel. An important function of a Tribunal is, therefore, to find the necessary personnel for such notified factory. With this object in view, National Service Labour Tribunals have been given power to ascertain particulars of the technical personnel employed in all industrial undertakings, the suitability of such personnel for employment in national service and the capacity of the undertaking to release such personnel or any part thereof for such employment. In order to enable the Tribunals to discharge these functions they have been given all the powers of Civil Courts for enforcing the attendance of witnesses, production of documents, recording of evidence and the carrying out of trade tests. The Tribunals can call upon the management of any industrial undertaking to release such technical personnel as it may specify, direct any person listed as 'technical personnel' to undertake employment in the national service within its jurisdiction or in any factory or technical posts under the Crown in any part of British India, direct such persons to submit themselves to tests of their technical skill and they can lay down the terms of service of such persons subject to such conditions as may be prescribed. Such persons cannot leave or be discharged from their employment without the previous permission in writing of the Tribunal in whose jurisdiction they are working. Correspondingly, no employer in any industrial undertaking can discharge or dismiss any person so classified without previously obtaining the permission in writing of the Tribunal except in cases of medical unfitness, gross insubordination, habitual absence from work, serious misconduct or adverse police report. In such cases however, the employer has to give notice to the Tribunal within 24 hours of the discharge or dismissal. This amendment, enacted in July 1943, makes an important departure from the previous provisions of the Ordinance and places both the employers and technical personnel on an equal footing. Before the amendment, technical personnel had to obtain the previous permission in writing of the Tribunal for leaving his employment, an industrial undertaking could discharge or dismiss any technical personnel by giving 15 days' notice of such intention to the Tribunal.

Once a notified factory applies to a Tribunal or to the Central Government for technical personnel it is obligatory for such concern to take into employment such personnel as may be sent to it and on such terms and conditions as the Tribunal or the Central Government may direct. Appeals against the decisions of a Tribunal lie with the Central Government.

No person employed in any industrial establishment which is either a notified factory or a factory which has sought the protection of the National Service Labour Tribunal under Section 13 of the Ordinance who is classified under one of the capacities included in the Schedule annexed to the Ordinance can leave his employment unless he has previously obtained the permission in writing of the Tribunal. Correspondingly, no employer in any industrial undertaking can discharge, dismiss or release any person so classified unless he has given 15 days' notice of such intention to the Tribunal.

Whereas a Tribunal can control the engagement of technical personnel by industrial undertakings in such manner as it thinks fit, the Government of India alone has the power to transfer technical personnel from one notified factory to another. Similarly, no technical personnel employed in a training establishment or in a technical post under the Crown can be discharged from or leave his employment unless the head of the establishment concerned has previously obtained the permission in writing of the Central Government. All employers in non-notified factories are compelled to reinstate men who may be returned to their original posts on the same terms as obtained when their services were first requisitioned but these may be modified or compensation given on and after appeal to a Tribunal.

Penalties of imprisonment up to six months and a fine up to Rs. 1,000 are provided for infringements of the Ordinance.

Each Tribunal has attached to it a local Advisory Committee consisting of representatives of employers and labour. The Chairman of the Tribunal is the Chairman of the Advisory Committee. The Committee is purely advisory and advises the Tribunal on matters of general policy affecting employers and labour and arising out of the administration of the Ordinance.

The names of the Chairmen of and the addresses of the offices of the ten National Service Labour Tribunals which have been so far constituted in the various Provinces in India are as follows:—

1. Bengal: A. Hughes, O.B.E., I.C.S., Dewar House, 13, Hare Street, Calcutta.
2. Bombay: D. R. Pradhan, I.C.S., Hasan Chambers, Parsee Bazar Street, Bombay.
3. Madras: V. Ramakrishna, I.C.S., Office of the Labour Commissioner, Madras.
4. United Provinces (also for Delhi and Ajmer-Merwara): E. Ahmed Shah, M.A., B.Litt. (Oxon.), M.L.O., Office of the Labour Commissioner, Cawnpore.
5. Punjab (also for the North-West Frontier Province): Khan Bahadur Malik Noor Mohammad Khan, M.A., LL.B., Office of the Punjab and N.-W. F. Province Joint Public Service Commission, Office for Baluchistan: A. P. Le Mesurier, I.C.S., Office of the Commissioner of Labour, Sind Secretariat, Karachi.
7. Central Provinces and Berar: Sardar Bahadur Ishar Singh, Labour Commissioner, C. P. and Berar, Civil Secretariat Building, Nagpur.
8. Bihar and Orissa: S. R. Bose, I.C.S., Office of the Labour Commissioner, Bihar, Patna.
9. Assam: A. S. Ramchandran Pillai, B.A., Office of the Controller of Emigrant Labour, Shillong.
10. Delhi and Ajmer-Merwara: Lt.-Col. Rev. J. E. Chatterjee, M.A., D.Litt., Vice-Chancellor, Agra University, Delhi.

from the centres to places of employment. Placement is not guaranteed. A candidate has to enter into an agreement to accept any employment that may be offered to him under the Crown Service Overseas, and the parent or guardian of a person has to enter into an agreement with the Government to refund all expenses incurred by him in his training in the event of his not completing the undertaking.

Not only is training in all of charge, but during their training receive generous stipends which as to whether they are matriculated or not, which are varied from time to time. Matriculated students receive dearness plus free medical treatment. Trainees are entitled to the same under the Workmen's Compensation Act. After successful selection, a trainee is posted to the Civil-Military Centre, where he remains until he passes his examination. During the two months trainees in a Civil-Military Centre are willing to enrol in the Defence Forces, enrolled and transferred to the regular army where he remains until he passes his tests. He is then drafted into the regular army on a minimum salary which varies according to rank. Women are entitled to free clothing and medical attendance. Overseas are entitled to an expense allowance and *batta* if authorised. Promotion is based on efficiency. A scheme has been recommended to enable technical personnel to obtain employment in the national service without places to visit their homes once a month at government cost. Persons who have completed six months' national service will be allowed to place of residence within five miles or more from their home. Receipt of pay not exceeding Rs. 100 per month are allowed actual rail fare for a round journey from place of origin to place of destination and back.

At the earlier stages of

ency was, to some extent, speed. Recent policy has been concentration on the improvement of the production of a better and smaller numbers. Regular training have now been formed at all centres. With a view to improving standards of instructors, instructors have also been started at centres. Hindustani is being taught as subject to universalise training throughout the country. Recruitment type of trainee is being effected by candidates seeking admission to pass intelligence tests on psychology tests given in old measure adopted to improve standard of the trainees is to the rate of two teaspoonfuls developed men. A total quantity of this oil was bought from Madras for this purpose. I am glad to hear that many of the trainees who have not passed

so, they must conform to certain standards of height and physical fitness and, as a general rule, they must be literate. The extent of the knowledge of English required varies according to the trades for which they desire to be trained. The maximum duration of training is one year but trainees are passed out as soon as they are able to pass the tests laid down by Government.

Trainees will continue to receive free instruction and the usual stipends and concessions. A New Instrument Mechanics Training Centre was started at Hindupur near Bangalore with 275 seats in the year 1944 for training boys in the manufacture of precision tools which at one time was considered unsuitable for India. The trade is open to young men who have reached Matriculation Standard and are between the ages of 17½ and 30. They are trained under the guidance of a British expert. Trainees get a scholarship of Rs. 59-4-0 per month with free food, lodging and clothes.

The Technical Training Scheme has demonstrated that, with intensive training semi-skilled men can be trained for all industries and that the standard of such men, after from six to eight months' training, is at least up to, if not above, the standard reached under ordinary peace-time apprenticeship schemes of two to three years' duration. The Government of India felt that if the training imparted under the Technical Training Scheme is supplemented by further 'biased' training, the final product would be more acceptable to employers. With a view to adjust the scheme to the wartime needs of civil industry they decided to set up an Advisory Committee whose functions are (1) to review the existing methods and syllabuses of training under the Scheme and to advise how it should be adjusted to meet the present day-needs of industry; and (2) to advise Government as to how Govt. trainees may be utilised for dilution and upgrading so that skilled and highly skilled men can be released for more important jobs which the less skilled men are unable to perform. Two new junctions were allotted to this Advisory Committee early in the year 1945: (1) to find employment for trainees who will be discharged from the army when the war is over and for those who will be completing the prescribed courses of training; and (2) to revise the scheme of technical training as a part of the post-war plan of industrial reconstruction with a view to make it serve fully and completely the present-day needs of civil industry. This Committee consists of six representatives of private engineering employers, two of Labour, one representative each of the Railway Board, the Ordnance factories and the ship-building industry and two senior Chairmen of the National Services Labour Tribunal. The Addl. Secretary in the Labour Department is the Chairman and the Director of Training, Department of Labour, is the Vice-Chairman of the Committee. At a recent meeting of this Committee held in Bombay in February, 1945, it was decided to start a training scheme designed to train craftsmen for the post-war needs of civil industry in India and to aim at a national system of training including a National Certificate of Craftsmanship on the completion of training.

The immense possibilities which the Technical Training Scheme holds for Indian youth and the industrialisation of the country after the War have not yet been realised in India. Skilled workers are at any time an asset of great value to a nation and it is generally admitted that one of the most serious setbacks to the development of Indian industries in the past has been the absence of trained workers. With the outbreak of War and the vital importance which mechanisation quickly assumed, the number of

skilled workers which a nation or a group of nations can produce has become the key to victory or defeat. Skilled workers are required not only for the production of tanks, guns and munitions but also for their maintenance and repair in the field. It is to meet this need and also to build up an army of skilled workers which after the war will enable India to compete on equal terms with other highly industrialised countries that the Technical Training Scheme of the Government of India has been devised.

It would be of interest to observe that with a view to secure an adequate supply of technical personnel to meet the demands of the administrative services and industrial development in the country in the post-war period, the Government of India have appointed a Special Committee with N. R. Sarkar as Chairman to consider the question of the establishment of a high grade technological institute in India possibly on the lines of the M.T.T. to provide advanced instruction and training in technology.

The number of technicians trained under the scheme and supplied to the Defence Services up to 31st October 1945 was 83,867. More than 100,000 trained men have passed through the Training Centres during the five years of the operation of the scheme. With the termination of the war, however, the recruitment of trainees under the Scheme has ceased.

### THE BEVIN TRAINING SCHEME.

In November, 1940, Mr. Ernest Bevin, the British Minister of Labour, made a statement in the House of Commons regarding a scheme which he proposed to put into effect for training Indian workers in factories and workshops in England. The object of the scheme was to accelerate munitions production in India and, at the same time, to inculcate in the men an appreciation of British methods of industrial co-operation between employers and workers and the value of sound trade union principles. Details of the proposed scheme were published by the Government of India in December 1940.

Candidates for the scheme are chosen from the working classes, preferably from among men of the Engineering trades, e.g., fitters, turners, millers and grinders drawing wages of Rs. 40 to Rs. 60 per month. Candidates must have had three years' experience of factory work and have given promise of intelligence and adaptability. They might be married or single but they should be young and not below the age of 18, healthy, intelligent, able to read, write and do simple calculations and possess manual dexterity and some knowledge of English. Preference is to be given to persons who are likely to be adaptable to conditions in England and especially to those who are prepared to mix and are least likely to raise difficulties over food which is on the English style and not on a caste or communal basis. In August, 1944, the Government of India relaxed the condition of three years' workshop experience and gave eligibility for inclusion in the Scheme also to men trained under the Technical Training Scheme. Every batch to be sent to England would include 15 ex-trainees provided they had passed the prescribed trade test and had acquired at least one year's practical workshop experience in a factory engaged on work connected

with the war. Of these 15 ex-trainees, 10 would be from Ordnance Factories and 5 from civil industry. The selection of candidates is made by the National Service Labour Tribunals. All selected candidates have to produce certificates of recent vaccination and pass strict medical tests particularly to show that they are free from any kind of tubercular trouble.

The courses of training cover engineering occupations mainly, e.g., fitting and machine operating and ordinarily last for nine months for aircraft trainees and eight months for others. For the first two months the trainees work at a special training centre at Letchworth where they receive elementary training and instruction in English and get time to become acclimatized. They are then placed in groups with selected employers in factories where they receive training side by side with British workmen. For the first month after the arrival of a batch of candidates in England, they are accommodated in a hostel run on English lines under a carefully selected manager after which they are lodged with selected families.

selected candidates receive travelling fares (inter class fares plus Re. 1 per day for subsistence allowance) to port of embarkation and from port of disembarkation on return, free return passage and food on the journey to and from the United Kingdom, a subsistence allowance of Rs. 30 per month for the whole period of journey from home to England and back to home, the necessary warm outfit in India plus an allowance in the United Kingdom for the purchase of suitable clothing. The allowances in England are: (a) during preliminary training—free boarding and lodging in a special hostel plus pocket money at the rate of 11 shillings per week; (b) during subsequent training wages at 64 shillings a week out of which he is required to pay 31 shillings per week for his board and lodging. In addition to the above, a separation allowance of Rs. 44 per month is paid in India to the family of a married man.

On their return to India, the services of the trainees are at the disposal of the National Service Labour Tribunals originally concerned with their selection and these Tribunals decide how best their services can be utilised, but no guarantee of employment is given. A settling allowance of Rs. 40 is paid to each trainee on his return to India after training to enable him to settle down.

By the end of May 1945, thirteen batches had been selected and sent to the United Kingdom. Of these, six batches were of 50 men each, one of 54, one of 55, one of 73, one of 74, one of 75, one of 78, and one of 79 men. Among the 788 candidates so far selected, 120 were from Madras, 161 from Bombay, 192 from Bengal, 95 from the United Provinces, 89 from Bihar and Orissa, 19 from Delhi, 43 from the Central Provinces and Berar, 29 from Sind and 14 from Assam. Commencing from 1943 the scheme has been extended to Indian States as well. It is of interest to mention that Their Majesties the King and the Queen paid two visits to Letchworth, the British Government Training Centre at which the Bevin Boys are trained and that Their Majesties spoke to all the Indian trainees who were there

at the time. By the time we went to Press eleven batches comprising 643 trainees in all had returned to India. It is a remarkable fact that there has not been a single mishap in sending and bringing these boys to and from England by sea and that all the boys have gone and come back safely. On return, the trainees are trade tested by a special Board of Examiners appointed by the Government of India and if found suitable are posted as Supervisors in Ordnance factories or as Instructors at the Technical Training Centres on salaries which are about double or more than what they were getting before they left India.

It is computed that there has been an average increase of 227 per cent. in the earnings of Bevin Boys who have returned to India after completing their training in the United Kingdom. Four whose previous salaries were between Rs. 40 and Rs. 70 per month are now Commissioned Officers in the Corps of Indian Engineers at a starting salary of Rs. 445 per month. A fitter from Punjab who used to earn Rs. 70 per month is now an Asst. Inspecting Officer in the Indian Stores Department on Rs. 350 per month. More than 160 men are holding supervisory jobs on salaries ranging from Rs. 75 to Rs. 385 per month. One Bevin trainee has secured an appointment as a general foreman with a Bombay firm on a salary of Rs. 1,000 per month. The returned Bevin Boys are not only providing a nucleus of skilled workers who are furthering the war effort but who are also helping the industrial progress of India.

## MAINTENANCE OF ESSENTIAL SERVICES.

As a consequence of the entry of Japan into the War, the danger had arisen of persons in India abandoning their employment or leaving certain areas. If this fear were to materialise it would be impossible to maintain certain services essential for the public safety, the maintenance of public order, the efficient prosecution of the war or the maintenance of supplies or services necessary for the life of the community. In order to avoid such a danger, the Governor General, in exercise of the powers conferred on him by Section 72 of the Government of India Act, 1935, promulgated an Ordinance called the Essential Services (Maintenance) Ordinance, 1941. This Ordinance applies to all employment under the Crown and to any employment or class of employment which the Central or a Provincial Government declares to be an employment for the purposes of the Ordinance. When once any employment in any particular area has been "declared", no person engaged in that employment is permitted to depart outside of that area. Any person in an employment which has been "declared" who disobeys any lawful order given to him in the course of such employment, or without reasonable excuse abandons such employment or absents himself from work, or departs from any area specified in the declaration without the consent of the authority making that order, and any employer of a person engaged in an employment which has been "declared" who, without

reasonable cause, discontinues the employment of such person or by closing an establishment in which such person is engaged, causes the discontinuance of his employment is guilty of an offence under the Ordinance. Penalties for infringement are imprisonment up to one year with additional liability to a fine. Courts can only take cognizance of offences under this Ordinance upon receipt of complaints made in writing by a person authorised in this behalf by the Central or a Provincial Government. Both the Central Government and the Provincial Governments with the previous sanction of the Central Government have the power to make rules regulating or empowering a specified authority to regulate the wages and other conditions of employment of persons in an employment which has been "declared" by this Ordinance. When any direction regulating wages or conditions of service have been given by an authority empowered by such rules to give them, any person failing to comply therewith is guilty of an offence under the Ordinance. The Governments of Bengal, Orissa and U.P. have framed rules under Section 6(1) of the Ordinance. The Labour Commissioners in Bengal and U. P. and the District Magistrates in Orissa have been empowered under the rules to regulate wages and conditions of service generally. In Assam, the Controller of Emigrant Labour and Labour Commissioner has been authorised for the purpose.

Both the Central Government and many of the Provincial Governments in India have issued notifications under the above Ordinance "declaring" many essential services such as railways, oil and fuel installations, port trusts and dockyards, municipalities, gas and electricity producing plants, telephone systems, certain banks, *et cetera*, as employments to which this Ordinance has been made applicable. No such declarations have, however, been made by the Governments of the Central Provinces and Berar, the Punjab, the N. W. Frontier Province and Orissa or by the centrally administered areas other than Delhi and Baluchistan. The number of prosecutions launched under the Ordinance up to about the end of February 1945 amounted to over 3,000. The very large majority of these cases were of Government servants.

## CREATION OF EMPLOYMENT EXCHANGES IN INDIA.

When the National Service Labour Tribunals were established under the National Service (Technical Personnel) Ordinance, it was the intention that they should gradually assume the role of employment exchanges for technical personnel. This they had been doing but the statutory powers given to Tribunals to fix wages and terms of service and to compel an employer to give up an employee and an employee to take up employment in the national service have distinguished them from the voluntary employment exchanges commonly met with in other countries. The exacting needs of war made it necessary for the Tribunals to have these statutory powers and they served their purpose. As the war progressed it was felt necessary to look ahead and to build

up an employment organisation which would be in a position to deal with the registration and voluntary placement of the many skilled and semi-skilled workmen who would be thrown out of employment on the termination of hostilities. The Tribunals had gained much experience of the requirements of employers and the placement of labour and it was therefore decided to use these organisations in the first instance for the setting up of voluntary employment exchanges for skilled and semi-skilled personnel. Employment exchanges for technical personnel were accordingly established at Calcutta, Bombay, Ahmedabad, Madras, Cawnpore, Lahore, Nagpur and Delhi with effect from the beginning of the year 1944 and at Dhanbad and Karachi later on in the year. These Exchanges were, for the time being, placed under the control of the local National Service Labour Tribunals. It is the intention of the Government of India to open up 71 employment Exchanges in all in India by the end of February, 1946. For example, there will be five more Exchanges in the Province of Bombay in addition to those at Bombay and Ahmedabad. These will be located in the Parel and in the Docks' areas in the City of Bombay and in Poona, Sholapur and Hubli. In addition to the one at Cawnpore, there will be seven more Exchanges in the United Provinces at Agra, Bareilly, Meerut, Lucknow, Gorakhpur, Allahabad and Benares.

It is proposed that the new net-work of Employment Exchanges should be as follows:—

Central Exchange .. .. .	1
Regional Exchanges .. .. .	9
Special Exchanges for Naval and Aircraft respectively .. .. .	2
Sub-regional Exchanges .. .. .	59

71

There will also be one Employment Information Bureau in each area covering 1,000 demobilised persons.

**Objects and Methods of Work.**—(i) Each exchange provides a place where information is collected and furnished to the public in respect of employers who desire to engage technical personnel and personnel who seek employment; (ii) information obtained from employers regarding vacancies is recorded on "order cards" for vacancies which are maintained on the card index system; (iii) information obtained from persons seeking employment is recorded on individual card index envelopes which are filed on the card index system. Each such envelope forms the file for the correspondence relating to the individual concerned; (iv) employers are encouraged to apply to the employment exchanges for any technical personnel they require and the exchanges place suitable applicants in touch with employers. Employers are not required to accept candidates sent to them by the exchanges if they do not wish to do so but in such cases they are required to give their reasons for not accepting the candidates. For this purpose each recommended candidate is supplied with an identification card addressed to the employer to which a pre-paid reply card is attached. On the pre-paid card there are entries to enable the employer to state if the candidate has been employed and if he has not

been employed the reasons therefor; and (r) the exchanges have no concern with the wages and terms of service of the men they supply. These are to be settled between the applicant for employment and the employer and once a man has been engaged the exchange has no further concern with him.

**Classes of Workers Covered.**—For the present, employment exchanges have been asked to deal with all classes of technical personnel as defined in section 2 of the National Service (Technical Personnel) Ordinance but in the first instance the benefit of the exchanges were to be extended only to unemployed technical personnel who were drawing a wage of Rs. 1 per day or more when last employed. It is hoped, in the near future to grade persons belonging to each occupation on the basis of their skill and duties and responsibilities which they are capable of discharging, but for the present the following gradation on a wage basis has been laid down: *Grade I*: person in receipt of Rs. 2 per day and over in the cities of Bombay and Calcutta and their suburbs and Rs. 1-8-0 per day and over in other areas. These are further classified as 'supervisory staff', 'mistries or master tradesmen' or 'operatives' according to the nature of their duties; *Grade II*: persons in receipt of Rs. 1-8-0 and over but less than Rs. 2 per day in the cities of Bombay and Calcutta and their suburbs and Rs. 1 and over but less than Rs. 1-8-0 per day in other areas; and *Grade III*: persons in receipt of wages below Rs. 1-8-0 per day in the cities of Bombay and Calcutta and their suburbs, and below Rs. 1 per day in other areas. Exchanges will not at present register tradesmen belonging to grade III and managerial grades. Clear definitions have been framed giving the classifications of the different classes of technical personnel covered. Unemployed technical personnel are being encouraged to register with the employment exchanges but registration is not compulsory. Employment exchanges also deal with ex-Servicemen. In order to look after their interests an Army Officer has been appointed in each exchange with the status of Joint Manager of the Exchange.

**Statutory Obligations of Employers.**—Though employers are *not required* to fill vacancies only by the acceptance of candidates sent by the exchanges, they are required to notify the exchanges of all vacancies for technical personnel in their establishments (other than those reserved for their own apprentices) as they occur and to furnish monthly reports to the exchanges as to how the vacancies have been filled. Every industrial undertaking is also required to issue to any technical personnel discharged, dismissed or released by it or permitted by the Tribunal to leave their employment a service certificate in Form O of the forms prescribed by the National Service (Technical Personnel) Rules, or if the employee is already in possession of such a certificate to make such additions to the certificate as will bring it up to date.

**Management.**—A Manager who is Inspector. The Manager has sufficient technical qualifications and experience to enable him to appreciate the requirements of industry generally and the special requirements of his parti-

cular locality and it is his duty to maintain close contact with employers and local bodies and assist them to secure the personnel they require. It is also the duty of the Manager to deal sympathetically and tactfully with technical personnel who visit the exchange in order to register themselves. Each Manager is assisted by a representative of the Army, a clerical staff, the strength of which depends on the volume of work to be dealt with from time to time and where the activities of the exchange justify it by a Tradesman Supervisor for carrying out trade tests in the main engineering trade. Where difficulties arise over the administration of an exchange they are to be placed before a committee consisting of the Chairman of the National Service Labour Tribunal (*Pro Tempore*), the Manager and the Army representative (if any) for solution.

**Employment Committees.**—Each employment exchange has attached to it a local Employment Committee consisting of representatives of employers, and labour, 1 representative of the Provincial Government and 1 Army representative. The Chairman of each Employment Committee is elected by the members themselves. The Employment Committee advises on all matters affecting the working of the exchange, including the general aspects of the problem of placement of personnel. The Committee does not however concern itself with individual cases.

**Central Exchange.**—A Central Employment Exchange has been opened in the Labour Department of the Central Government at Simla. The functions of this exchange are to issue general directions when required and to co-ordinate the needs of the different provinces and ensure that no province goes short of skilled or semi-skilled labour while there is a surplus in any other province. For this purpose each employment exchange has to send a weekly report to the central exchange giving a brief outline of the needs and surpluses of the area in its charge. The Central Exchange will not register unemployed personnel nor will it accept orders from private employers but it will accept orders from employing Department of the Government of India or their attached and subordinate offices which find it impracticable to place orders on any particular Exchange or Exchanges.

**Manner in which the Exchanges are operating.**—Workmen wishing to register themselves at an employment exchange are asked by the exchange staff to supply such particulars about themselves as age, technical education and experience, willingness to serve away from their homes, etc. This information is recorded on specially designed envelopes, within which is placed any other correspondence which may later develop in regard to the individual's placement. On registration, each workman is given an identity card containing his registered number, address, identification marks, signature or thumb impression and trade. To make identification easier, the identity card may also bear a photograph. Employers may notify vacancies to the exchange in person, by telephone, or on a specially prepared form which may be obtained from the exchange manager. It is not incumbent on employers to supply all the information as in the application form, but evidently, the more detailed are the particulars supplied, the easier it

will be for the exchange staff to submit the right type of personnel. Particulars about vacancies are also recorded on envelopes, and these as well as the envelopes containing information about workmen in need of employment are maintained on the card index system. Each envelope forms a complete record in itself. When a vacancy is notified, the exchange staff goes through its records and selects the most suitable person or persons and directs them to interview the employer. Persons so directed are supplied with introduction cards to be presented to the employer at the time of interview. A duplicate of this card is sent simultaneously to the employer. The form sent to the employer has space in which the employer is requested to state whether the candidates appeared for interview, whether they were taken into employment and if so on what wages, and if rejected, the reason therefor.

When an exchange finds that it cannot fill a vacancy locally or place a certain workman, it will notify the fact with full particulars of the vacancy or workman to the Central Exchange, Simla, for circulation to other exchanges. Detailed information is not available regarding the members of registrations at and placements from all the Employment Exchanges which have so far been opened in India but it is of interest to note that these figures for the Exchange in Bombay amounted to 6,337 and 3,521 respectively since the Exchange was opened early in 1944 up to the 31st May, 1945.

The following table contains the latest available information regarding registrations and placements by Employment Exchanges. These figures are, however, somewhat incomplete because they do not contain information relating to Bengal, Bombay, Madras and Orissa :

Month.	No. of Employment Exchanges submitting returns.	Total Registration.	Placing during the month.	Total Vacancies.	Vacancies cancelled.	Vacancies outstanding at the end of the month.
July .. ..	10	8,713	1,420	11,205	1,621	8,697
August .. ..	10	9,688	1,175	13,485	2,650	10,245

October .. ..	13	16,150	1,132	13,562	2,358	10,396
November .. ..	14	19,293	1,057	16,755	2,903	12,850
December .. ..	18	23,954	1,476	20,428	2,914	16,366

## CREATION OF A STATUTORY COAL MINES LABOUR WELFARE FUND.

With a view to meet expenditure incurred in connection with measures which in the opinion of the Government of India are necessary or expedient to promote the welfare of labour employed in the coal mining industry, the Government of India, under the powers conferred by Section 72 of the Government of India Act, promulgated the Coal Mines Labour Welfare Fund Ordinance, 1944, on the 31st January 1944. By virtue of Section 4 of this Ordinance, a Coal Mines Labour Welfare Fund has been created which will derive its revenue from a cess or a duty of excise at such rate, not less than one anna nor more than four annas per ton, as may from time to time be fixed by the Central Government by notification in the Official Gazette. Specified classes of coal or soft coke may be exempted from this duty. The principal objects for which this fund will be utilised are defined in the Ordinance. These are : (1) the improvement of standards of living, including housing and nutrition, the amelioration of social conditions and the provision of recreational facilities for the benefit of the labour employed in the coal mining industry ; (2) the provision of transport to and from work ; (3) the provision of improvement of educational facilities ; (4) the provision of improvement of supplies of water ; and (5) the improvement of public health and sanitation, the prevention of disease, the provision of medical facilities and the improvement of existing medical facilities. The Ordinance makes provision for the appointment of an Advisory Committee consisting of Government and equal numbers of members representing colliery owners and workers employed in coal mining industry of whom one has

woman and it contemplates the appointment of Welfare Administrators, Inspectors and other officers to supervise or carry out the activities financed from the fund. The functions of the Advisory Committee are to advise the Central Govt. on all matters which the Ordinance requires Government to consult it and on any other matters arising out of the administration of the Ordinance and the fund. Both the cost of administration of the fund and the salaries and allowances of the Officers appointed in connection therewith are to be defrayed from the fund itself.

The Rules framed under the Coal Mines Labour Welfare Fund Ordinance were published in the Gazette of India dated the 15th October, 1944. These make provision for the composition of the Advisory Committee, the collection of the excise duty or cess levied under the Ordinance and its administration. The members of the Advisory Committee are as follows : Mr. H. C. Prior, Secretary to the Government of India in the Department of Labour, Chairman ; Mr. V. K. B. Pillai, Coal Mines Labour Welfare Commissioner, Vice-Chairman ; Mr. P. C. Young, Coal Commissioner ; Mr. W. H. Kirby, Chief Inspector of Mines ; Mr. R. S. Nimbkar, Labour Welfare Adviser to the Government of India ; Mr. A. Hughes, Labour Commissioner with the Government of Bengal ; Mr. A. G. Bunn, Additional Deputy Commissioner, Dhanbad ; Sardar Bahadur Ishar Singh, Labour Commissioner with the Government of the Central Provinces and Berar ; Messrs. J. Latimer and Sons, the Indian Mining Engineer.

Mr. Mono Gopal Sen Gupta, Colliery Owners; Mr. S. N. the Indian Mine Managers M. Burch, nominee of the National Association of Colliery Managers; Messrs. H. Ghosal and P. Bhattachall of the Indian Federation of Labour; Messrs. Nirpada Mukherjee and Chopal Bhattacharya of the Trade Union Congress; Kulada Bibi, a woman worker of 45 years of age who has been employed for the last 30 years as a coal cutter and Mr. Ram Dhar Singh, a 25-year old miner from the Barai Jalgera Colliery in the Central Provinces who can read and write Hindi. The Rules provide for the appointment of a number of Sub-Committees which include (1) a finance Sub-Committee to frame schemes of expenditure and to advise generally on the budget and all expenditure debitable to the Fund; (2) a Works Sub-Committee to consider all major projects and (3) separate Coalfields Sub-Committees for each of the main Coalfields in Bengal, Bihar, the Central Provinces and Berar and Assam to consider and advise on all matters relating to expenditure from the Fund in their respective Coalfields.

The Rules further empower the Central Government to impose certain conditions on Provincial Governments, local authorities or Owners, Agents or Managers of Collieries to whom grants are made from the Fund in aid of any schemes approved by the Central Government. These conditions may be imposed to ensure that the work for which the grant is made is duly and promptly executed, that all the necessary facilities are given for any inspection that may be made for checking and that proper accounts are maintained for the money granted.

At the Second Meeting of the Advisory Committee held at Dhanbad on the 12th October 1944, the Committee decided to recommend to the Government of India that a cess of four annas per ton should be levied on all coal and coke despatched from collieries in British India with effect from 1st November, 1944. In deciding on the maximum amount of cess permissible under the Ordinance, the Committee felt that it might not be possible to maintain this figure in periods of slump and they recommended that Government should accept, as a general principle, the building up of a reserve fund in those periods in which the maximum was levied so as to ensure that welfare measures could be maintained in periods of slump. Some of the welfare schemes so far recommended by the Board are as follows: (1) Anti-Malaria Campaign with a recurring annual expenditure of Rs. 7 lakhs and a non-recurring expenditure of 3 lakhs; (2) the provision of two regional hospitals in the Jharia Coalfields at an estimated capital cost of Rs. 3,00,000 and two hospitals for Ranigunj Coalfields at an estimated cost of Rs. 1,34,000; (3) part provision of grants of Rs. 3,00,000 each towards the capital costs of Central hospitals in Jharia and Ranigunj; (4) a token grant of Rs. 5 lakhs for a water supply scheme; (5) a token grant of Rs. 10 lakhs for a housing scheme; (6) grants for propaganda measures and for growing vegetables; and (7) a sum of Rs. 27 lakhs to be spent immediately to build for coal miners a township of two roomed tenements on the outskirts of coal areas in the Ranigunj Coalfields.

## SOCIAL SECURITY : INVESTIGATION AND PLANNING.

The Tripartite Labour Conference at its meeting in September 1943 unanimously passed the following resolution:

'This Tripartite Labour Conference recommends that with a view to provide adequate materials on which to plan a policy of social security for labour the Central Government in co-operation with the Governments of Provinces of British India, Indian States and the Chamber of Princes should immediately set up machinery to investigate questions of wages and earnings, employment and housing and social conditions generally, and that as soon as possible after receipt of the required statistics and other data the Central Government should appoint a mixed committee to formulate plans of social security.'

In pursuance of this resolution and in order that information may be collected bearing upon various aspects of social security, so as to enable the Planning Committee subsequently to be set up to draw up a programme of social security for labour in India, the Governor-General-in-Council appointed, early in the year 1944, a Committee of Enquiry to be known as the Labour Investigation Committee. The Committee is composed of Mr. D. V. Iyengar, I.C.S., as Chairman and Mr. S. R. Deshpande, M.B.E., Dr. Ahmad Mukhtar and Mr. B. P. Adarkar as Members.

The terms of reference of the Committee are as follows: (a) to collect data relating *inter alia* to wages and earnings, employment, housing and social conditions of labour and in particular of industrial labour in India; and (b) to investigate and report *inter alia* on: (i) the risks which bring about insecurity; (ii) the needs of labour, by various classes, to meet such risks; (iii) the methods most suitable for meeting such risks; and (iv) housing and factory conditions. The Headquarters of the Committee are at Simla.

The Committee first proceeded on a preliminary all-India tour with a view to discussions with representatives of workers and employers and visits to important industrial centres. After their return from tour, they issued general and special questionnaires, and also launched sample and *ad hoc* surveys in all major and certain minor industries. As we go to Press, we understand that the Committee has completed its surveys into wages and is now engaged in writing its Report at Simla.

A special branch entitled the Social Security Branch of the Labour Department of the Government of India was opened towards the beginning of 1945 with Mr. B. P. Adarkar as Officer on Special Duty and ex-officio Deputy Secretary in charge to deal with the special problems of Social Security Planning. The following three distinct schemes are under preparation in this Branch:

(1) A Unified Scheme of insurance against sickness, accident and maternity for factory workers, to replace the original health insurance scheme drafted by Mr. Adarkar (an outline of this scheme has been circulated amongst Provincial Governments and Associations of Employers and workers for eliciting opinion).

(2) A unified scheme of insurance against sickness, accident and maternity for coal miners. And,

(3) A scheme of sickness insurance and old age pensions for Indian seamen serving on Indian and foreign ships.

### WAR INJURIES (COMPENSATION INSURANCE) SCHEME.

A War Injuries (Compensation Insurance) Scheme was enacted by the Central Government under the War Industries (Compensation Insurance) Act, 1943, which was brought into force on the 16th November 1943. The objects of this Act is to impose an obligation on the employer to pay compensation in respect of war injuries to workmen covered by the Essential Services (Maintenance) Ordinance, 1941, factory workers, mine workers, workmen employed in the major ports, and to workers employed on any estate where cinchona, coffee, rubber or tea is grown. The amount of compensation is roughly the difference between the amount paid by Government under the War Injuries Scheme and the amount which would have been payable under the Workmen's Compensation Act if the war injury had given a right to compensation thereunder. There is no limit as regards the monthly salary of the workman as in the Workmen's Compensation Act. Insurance has been made compulsory for every employer covered by the Act who has to take out a policy of insurance from the Central Government on payment of an advance premium at the rate of annas four per Rs. 100, subject to a minimum of Rs. 8, on the wage bill for the quarter ended 31st December, 1943, if the employer was an employer for one quarter before the 1st January 1944, otherwise for any subsequent quarter during which he became an employer for the first time; provided the quarterly wage bill has exceeded Rs. 1,500. All the premia received from the employer go to make the War Injuries Compensation Insurance Fund from which all payments of compensation, etc., will be met. The fund cannot be utilized to pay compensation to Crown employees as the Crown is not required to pay insurance premia in respect of its employees. The same machinery as administers the War Injuries Scheme is to be utilized for the purpose of the War Injuries Compensation Insurance Scheme.

### UNSKILLED LABOUR SUPPLY COMMITTEES.

During the earlier stages of the War the supply of unskilled labour had been satisfactory requiring no measures for its control or allotment. By the end of the year 1942, however, there were indications that the problem of supply of such labour was assuming importance in a few areas. The Government of India therefore decided to set up both Provincial and Regional Labour Supply Committees for areas where serious shortages were being experienced or were likely to be anticipated and a beginning was made by the setting up of such a Committee at Jubbulpore where the needs of the Central Government establishments predominate. The Committees have no statutory powers. They are ordinarily, under the chairmanship of the

Chairmen of the National Service Labour Tribunals of the Provinces in which they are established. Their recommendations are to be followed by the local undertakings of the Central Government—any differences to be decided by that Government at headquarters. The functions of Unskilled Labour Supply Committees are as follows: (1) to co-ordinate the recruitment of unskilled labour for all Government undertakings in the area; (2) to arrange a priority of utilization of any other recruited labour and of existing labour forces in accordance with any priority orders that may be received from competent authorities; (3) to advise on any measures necessary to secure adequate unskilled labour force, including all amenities and conditions of service, grain shops, housing, medical relief, etc.; and (4) where necessary to advise on scales of wages and dearness allowance. The Committee appointed for the Province of Bombay is under the chairmanship of Sir Charles Bristow, Kt., C.I.E., I.C.E., Adviser to His Excellency the Governor of Bombay and the Regional Committee for Bombay City is under the Chairmanship of Mr. H. E. Butler, Commissioner of Police, Bombay.

### PAYMENT OF FAMILY ALLOTMENTS.

A scheme was sanctioned early in 1942 enabling Government servants in "threatened" areas to arrange for a regular monthly remittance of a portion of their salaries (not exceeding 50 per cent.) to their families living away from them. The scheme has now been extended to all daily-rated labourers in Central Government undertakings whose employment is expected to last for at least 12 months from the date of first appointment.

### PREVENTION OF HARTALS.

We refer elsewhere in this publication to the widespread disturbances which occurred in India in August 1942 following the arrest of Mr. M. K. Gandhi and the leaders of the Indian National Congress as a result of the All-India Congress Committee deciding, at its historic Session of 6th/8th August in Bombay, to empower Mr. Gandhi to launch a Civil Disobedience Movement in this country. These disturbances included hartals or stoppages of work for prolonged periods in many industrial units in several centres in India. All the cotton textile mills in Ahmedabad remained totally closed for nearly four months. A number of other factories and large engineering workshops in Bombay, Cawnpore, Nagpur and in many other places were also affected and essential War production was considerably interfered with. In order to prevent a repetition of similar trouble in the future, the Government of India, by a notification dated the 17th April 1943, have amended the Defence of India Rules by adding a new rule—Rule 56A—for the Prevention of Hartals in Places of Employment.

'Hartal' has been defined as any concerted cessation of work or refusal to work by a body of persons employed in any place of employment, except a cessation or refusal in furtherance of a trade dispute with which such body of persons is directly concerned. If in the opinion of a Provincial Government a body of persons employed in any place of employment is likely to take part

in, or is taking a part in, a *hartal*, then, without prejudice to any other proceedings which may be taken in respect of such *hartal*, the Provincial Government may by order in writing require the person owning or having the management of such place of employment to take, within such time as may be specified to secure that the *hartal* shall not take place, or, as the case may be, shall cease. Further, if in the opinion of a Provincial Government a place of employment has been closed for reasons other than the furtherance of a trade dispute, the Provincial Government may by order in writing require the owner or persons having the management of such place of employment to take, within such time as may be specified in the order, such measures as may be so specified to secure that the place of employment shall be opened, and shall remain open, for the unimpeded employment of persons employed therein. Contraventions of the provisions of any order made under Rule 56A of the Defence of India Rules are liable to be punished with imprisonment for a term which may extend to five years or with fine which may extend to five lakhs of rupees or with both.

### COMPULSION OF PERSONS TO WORK.

The Government of India, early in the year 1943, promulgated Rule 78A of the Defence of India Rules conferring powers on both the Central and the Provincial Governments to compel certain persons to do work. This Rule empowers any Officer of Government authorised in this behalf by a general or special order to require any male person within such area as may be specified in the order to assist in the doing of work on land for such period and in such manner as the officer may direct, being work the doing of which is in the opinion of the officer necessary to meet an actual or apprehended attack, or to repair or to reduce the damage resulting therefrom or to facilitate offensive or defensive operations in the area. Refusal by any person to comply with any lawful direction given to him under this order renders him liable to imprisonment which may extend to six months or with fine or both. The Officer giving a direction under this order has the right to determine the remuneration to be paid for the work.

### WORK FOR RETURNING SERVICEMEN.

The Government of India, in a Press note dated the 10th May, 1945 have announced their plans for the Setting up of a co-ordinated organisation to deal with the re-settlement and re-employment in civil life of demobilised members of the defence services and discharged war workers. We have already dealt with the subject of the network of employment exchanges which have been or will be set up under the Labour Department to facilitate registration for the placement in civil employment of demobilised persons. This set-up will be the beginning of a well-organised and co-ordinated employment service to help workers to find the most suitable employment, to assist employers to secure the most suitable workers and to ensure that the available workers and available jobs are brought together as promptly and satisfactorily as possible. It will also

ensure that the necessary skills are available and are distributed satisfactorily among the various branches of production.

Effective Machinery will be required in connexion with military and industrial demobilisation after the war for facilitating the transfer of a large number of workers from one job, occupation, industry and area to another. Information will have to be collected in advance regarding persons likely to be seeking work, employment opportunities likely to be available for various categories of workers, and the probable area-by-area balance of labour supply and demand. Special problems will also arise with regard to employment re-adjustment during the transition from war to peace and positive steps will have to be taken to facilitate the mobility of labour, both occupational and geographical. Programmes of technical training and vocational guidance for demobilised persons have to be organised to equip them for the type of employment for which they are most suited and for meeting the man-power requirements of post-war development schemes. After their placement in civil employment, the interests of ex-servicemen and women will also need watching for some time, with a view to assisting them to adapt themselves to their new surroundings and bringing about mutual understanding and cordial relations between them and their new employers. It is the intention of the Government of India to establish the following six Directorates at Headquarters under a Director General of Re-settlement and Re-employment to deal with these various problems:

- (1) The Directorate of Employment Exchanges and Statistics will supervise, integrate, and direct the work of the central, regional and sub-regional exchanges. It will collect data regarding the numbers of persons likely to be demobilised and the employment opportunities likely to be available, and all other relevant information pertaining to Employment.

- (2) The Directorate of Employment will function as an employment finding body. It will tap all available sources and will explore new avenues of employment and keep abreast of post-war development schemes.

- (3) The Directorate of Technical Training will, in collaboration with Government factories, railways, the Provincial Governments and Civil industry, organise facilities for further technical training and apprenticeship training for such demobilised technicians as may need them for civil employment

- (4) The Directorate of Vocational Training will organise training facilities in non-engineering trades and vocations in collaboration with the Provincial Governments, universities and private institutions.

- (5) The Directorate of Publicity will popularise the employment of demobilised persons in Civil employment and canvass private employers. And,

- (6) The Directorate of Welfare will maintain a close liaison with labour welfare organisations of the Central and Provincial Governments with a view to ensuring that the interests of demobilised persons in civil employment are being properly watched and safeguarded.

For the purposes of the above organisation the country has been divided into nine regions—the Punjab and the North West Frontier Province; Sind; the United Provinces; Bengal and Assam; Central Provinces and Berar; Bombay; Bihar and Orissa; Madras and Coorg; and Delhi. The regional organisation will be under a Director of Re-settlement and Employment and attached to him will be an employment advisory committee consisting of representatives of Government departments, employers and workers' organisations and the Soldiers, Sailors' and Airmen's Board. The Government of India have arrangements well in hand for training the necessary personnel which will be required in connexion with all these schemes both in England and in India.

### CONTROL OF LABOUR RECRUITMENT.

By a notification published in the Gazette of India dated the 9th June 1944, the Government of India have directed that Rule 81 of the Defence of India Rules is applicable "for

controlling the recruitment and employment of labour in such areas as may be specified in the order, with a view to securing that sufficient workers are available for essential undertakings.

The Labour Recruitment Control Order which was brought into force with effect from the 18th December, 1944 is designed to regulate the recruitment of labour from certain controlled Districts in Bengal, Bihar and the Central Provinces and Berar. The order requires contractors and employers of labour to obtain licenses for recruiting labour from controlled districts for work outside the controlled districts. All works or employments within the controlled districts are exempted from taking out licenses. This order is expected to improve the labour supply position in the collieries.

### PROMULGATION OF RULE 81A OF DEFENCE OF INDIA RULES.

We deal with this below under the heading of Industrial Disputes Legislation in the following Chapter.

## LABOUR LEGISLATION—ITS ADMINISTRATION AND STATISTICS.

The Central co-ordinating authority in India for questions connected with labour legislation is the Department of Labour of the Government of India with a member of the Viceroy's Executive Council holding the portfolio. The administration of matters connected with the English and Indian Merchant Shipping Acts, the Mercantile Marine Department and Indian Seamen is with the Department of Commerce. In respect of all the Federal Railways, the Labour Member is responsible for the administration of the Payment of Wages Act, 1936, Trade Disputes, Hours of Work for employees not covered by the Factories Act and regulation of employment of children. He is also responsible for Regulation of Labour and Safety in respect of mines and oilfields; trade disputes in industries, businesses or undertakings carried on by the Central Government; and Inter-Provincial Migration. In the field of Concurrent Legislation, the Labour Member is responsible for (1) Factories; (2) Welfare of Labour, conditions of labour, provident funds and workmen's compensation, health insurance including invalidity pensions and old age pensions; (3) unemployment insurance; (4) trade unions and industrial and labour disputes; (5) electricity; and (6) boilers. As the permanent ex-officio Chairman of the Tripartite Labour Conference, all matters connected with the Conference and its Standing Labour Committee are dealt with by the Labour Member. He is also responsible for the administration of the National Service (Technical Personnel) Ordinance; recruitment of unskilled labour throughout British India for employment on defence works the administration of the Technical and the Bevin Training Schemes, the Cost of Living Index Scheme, the Essential Services (Maintenance) Ordinance, and Air Raid Precautions in Factories. Among the many matters and subjects not directly connected

with Labour, the Member for Labour is responsible for the administration of the Central Public Works Department and the Indian Service of Engineers; the Civil Pioneer Force Ordinance, 1942; Government Printing and Stationery; the Central Boilers' and Electricity Boards and the Coal Grading Board; the Central Board of Irrigation and the Geological Survey of India. Under the Devolution Rules made under the Government of India Act, 1919, 'Regulation of Mines' and 'Inter-Provincial Migration' were central subjects whereas industrial matters included under the head 'factories' and 'welfare of labour' fell within the scope of the provincial legislatures. Although the Government of India has passed central legislation in connection with most questions affecting the welfare of labour—in order to secure uniformity of treatment in all provinces—the administration of the various Acts connected with factories, workmen's compensation, trade unions, payment of wages, the pledging of child labour, etc., falls on the Provincial Governments who have to bear the entire cost of administration as it is not permissible under the constitution for the Central Government to incur any expenditure from Central revenues on the administration of provincial subjects. This constitutional position was perhaps, to some extent, responsible for the opposition shown by some of the Provincial Governments to labour measures on which their views were invited by the Government of India during recent years.

The Governor-General in Council exercises control over the administration of the Acts passed by the Central Legislature in two ways: in the first place he is vested by Statute with the general power of superintendence, direction and control; and, secondly these Acts in most cases reserve certain power to him to make the powers conferred on Provincial Governments subject to his control. The general principle observed by

found that in over 300 factories employing 4,000 workers labour was sweated, there were no fixed hours of work and health and sanitary conditions were deplorable. The Government of the United Provinces thereupon took immediate action by declaring all such factories as employed 10 or more persons as factories for the purposes of the Act. The Second Conference of Labour Ministers held in January 1941 decided that the Factories Act should be so amended as to make registration of all factories employing 10 or more persons compulsory but this recommendation has not yet been given effect to.

(b) *Age and Sex Groups.*—Factory operatives are divided into four age and sex groups. (1) adult males, (2) adult females, (3) children of both sexes, i.e., persons over 12 and under 15 years of age, and (4) 'adolescents' defined as persons of both sexes who are over the age of 15 years and under the age of 17 years but who have not been certified as fit for employment as adults. Such adolescents as have not been so certified are to be deemed to be children.

(c) *Hours of Work.*—The maximum limits of eleven hours per day and sixty hours per week laid down by the 1922 Act for both adult males and females are permitted only in the case of seasonal factories. The maximum hours permitted for perennial factories have been reduced to ten per day and 54 per week subject to the proviso that persons employed on work necessitating continuous production for technical reasons and persons whose work is required for the manufacture or supply of articles of prime necessity which must be made or supplied every day may be employed for not more than 56 hours in any one week. The maximum hours of work permitted for both uncertified adolescents and children have been limited to five per day both in seasonal and in perennial factories.

(d) *Spreadover.*—By "spreadover" is meant the limitation of the period of consecutive hours during which the daily limits of hours of work may be availed of by the owner or occupier of a factory. This principle was introduced in factory legislation for the first time in 1934. The spreadover in the case of adults is limited to thirteen consecutive hours and in the case of children to seven and a half continuous hours; but the continuous period of eleven free hours in every twenty-four hours in the case of adults and of sixteen and a half free hours in the case of children must include the hours between 7 p.m. and 6 a.m. for both women and children. The effect of the Amending Act of 1944 on this question has been dealt with below. The power to grant exemptions in the case of women where technical reasons require that work should be done at night, e.g., in the fish curing industry, continues to be allowed.

(e) *Artificial Cooling and Humidification.*—Power has been given to Provincial Governments to authorise Factory Inspectors to call upon managers of factories to carry out specific measures for increasing the cooling power of the air if they are of opinion that it is at times insufficient to secure operatives against danger to health or serious discomfort; provided, however, that the cooling power can be appreciably increased without involving an amount of expense which would be unreasonable under the circumstances.

(f) *Welfare.*—Provision is made for four matters in connection with workers' welfare: (1) for the maintenance of a suitable and sufficient supply of water for washing for the use of persons employed in processes involving contact with obnoxious or poisonous substances; (2) for adequate shelter for rest in factories employing more than 150 persons; (3) for the reservation of suitable rooms for the use of children of women employed in factories employing more than fifty women; and (4) for the maintenance of adequate first aid appliances.

(g) *Rest Intervals and Holidays.*—The provisions of the 1911 and the 1922 Acts with regard to rest intervals and the weekly holiday were maintained subject only to verbal modifications of a minor character.

(h) *Holidays with Pay.*—The Factories (Amendment) Act, 1945 which comes into force with effect from the 1st January 1946 provides for compensatory holidays and holidays with pay. In cases where, as a result of the passing of an order or the making of a rule exempting a factory or the workers therein from the provisions of the Act relating to a compulsory weekly holiday, a worker is deprived of any of such holidays, he must be allowed, as soon as circumstances permit, compensatory holidays of equal number to the holidays so lost. The provisions with regard to holidays with pay will enforce, in all perennial factories, an annual paid holiday of 10 days for adults and 14 days for children. These holidays can be accumulated over a period of two years. Half of the wages payable for these holidays are to be paid before the worker proceeds on leave and the balance on his return. A more liberal provision will not be affected by this law and factories providing benefits substantially similar to those laid down in the amending Act can be exempted from its provisions.

(i) *Overtime.*—The old Acts contained no limitations with regard to the overtime hours which could be worked by 'exempted' workers. The new Act places a limitation of hours on the amount of overtime that can be worked by virtue of any exemptions granted under the Act. With regard to overtime rates of pay, the Act lays down that a time and a half should be paid in all cases where a worker in a seasonal factory is required to work for more than 60 hours in any one week or where a worker in a factory other than a seasonal factory is required to work for more than ten hours in any one day. But where a worker in a factory other than a seasonal factory is required to work for more than fifty-four hours in any one week, he is to be entitled, in respect of the overtime worked less any overtime in respect of which he is entitled to extra pay under the preceding sentence, to pay at the rate of one and a quarter times his ordinary rate of pay.

(j) *Certificate of Fitness for Children.*—Provincial Governments have been given powers to make rules prescribing the degree of fitness to be attained by children and it has been prescribed that whenever such a standard has been laid down, no child failing to attain it can be certified for employment in a factory. Similarly, adolescents cannot work as adults.

unless certified 'fit to work as an adult'. If they are not so certified they are considered children.

(l) *Security of Factory Structures.*—Factory inspectors have been given powers to call upon managers to carry out such tests as may be necessary to determine the strength or quality of any specified parts of the structure of factories. If they are of opinion that, on account of any defect or inadequacy in the construction of any factory, the factory or any part thereof is dangerous to human life or safety. Provincial Governments are further empowered to make rules for the furnishing, by factories, of certificates of stability.

(l) *Exemptions.*—A frequent cause of complaint against the older Factory Acts was that they gave local Governments very wide powers to exempt certain classes of workmen from all or any of the restrictive provisions of the Act. The new Act limits these powers and prescribes further that no exemptions are to be granted in respect of the provisions for spreadover, prohibition of night-work and the limitations of weekly hours for women and persons under the age of sixteen years.

The Factories (Amendment) Act, 1944 was passed to remedy certain defects and meet some difficulties in the administration of the main Act. Washing facilities were required to be provided only in places where workers come in contact with injurious or obnoxious substances. By removing the restrictive clause, all factory owners are required to provide washing facilities for their workers. By the time we went to Press for the last edition, Bombay was the only Province in India, which had framed draft Rules in connexion with this matter. A recent judgment of the Bombay High Court held that orders passed by an Inspector of Factories regarding "means of escape" were *ultra vires*. In order to validate the rules made by Provincial Govts. in the matter of 'Precautions against fire,' Section 23 of the Act has been suitably amended. Under the provisions of Sections 45 and 54 no woman or child was allowed to work in a factory except between the hours of 6 a.m. and 7 p.m., but the limiting hours could be varied by a Provincial Government to cover a span of 13 hours between 5 a.m. and 7-30 p.m. Owing to the change in Indian Standard Time practical difficulties were felt in this respect in Western Provinces. The evening limit has therefore been extended from 7-30 p.m. to 8-30 p.m. This amendment, however, is to have effect only for the duration of the War.

A new rule has been promulgated under the Defence of India Act which enables the Central Government to require that the lighting of any factory or class of factories shall reach a certain standard. This has been done to remedy defective lighting arising from one or the other of the

be necessary; (2) compliance with black-out or other A.R.P. regulations requiring the prevention of the emergence of beams of light from a building has actually reduced lighting of the interior below the standard required for efficient work.

The latest position in regard to the regulation of conditions of work by the Factories Act of 1934 is that it was amended in 1946 and became law with effect from 1st August 1946. Briefly, the provisions of the Amended Act are :—

(a) The daily hours of work are reduced from 9 to 8 and the weekly hours from 54 to 48 in the case of perennial factories and from 10 to 9 and from 60 to 54 in the case of seasonal factories.

The rate of overtime pay has also been appreciably increased.

## C. P. Unregulated Factories Act, 1937.

The Legislative Council of the Central Provinces and Berar passed an Unregulated Factories Act early in 1937. This Act is intended to regulate the labour of women and children and to make provision for the welfare of labour in factories to which the Factories Act, 1934, does not apply. "Unregulated Factory" has been defined as "any place where in fifty or more workers are employed or were employed on any one day of the preceding twelve months and to which the Factories Act, 1934, does not apply and wherein the following industries are carried on :— (i) *bidi* making, (ii) shellac manufacture, and (iii) leather tanning." A "child" has been defined as a person who has not completed his fourteenth year. The provisions with regard to health and safety, notices and registers, penalties and procedure closely follow the similar provisions in the Factories Act. Children's hours are restricted to seven in any one day and no child can be employed in any unregulated factory except between 8 a.m. and noon, and 1 p.m. and 5 p.m. The double employment of children is prohibited and a child who has worked in any unregulated factory on any one day is prevented from working overtime or taking work home. The hours of work of adult males are limited to ten per day and provision has been made for the grant of a holiday after every period of six consecutive days. Women's hours are restricted to nine per day and they are prohibited from working in any unregulated factory before sunrise or after sunset.

## Factory Statistics.

Upto and including the Report for the year 1939, statistics regarding the numbers of factories and of factory workers used to be given in the annual reports on the administration of the Factories Act published by all the Provincial Governments. The Government of India published a Summary of the Provincial reports every year. These summaries contained statistics in eight different statements in regard to the following matters : (1) totals of the number of working factories, classified by Provinces according to types of factories; (2) average daily numbers of workers employed classified in the same way and by age and sex groups; (3) intervals, holidays and of work separately for perennial and factories; (4) accidents; and (5) offences in respect of offences under the Act.

A table containing the figures for numbers of working factories and the average daily number of workers employed therein classified by age and sex groups, between the years 1894 and 1939 was published at page 479 of the 1942-43 Edition of this publication. Owing to the shortage

of paper, both the Provincial Governments and the Government of India discontinued the publication of the Annual Reports on the administration of the Factories Act and the Annual "Statistics of Factories" with effect from the publication of the Reports for the year 1940. In view, however, of the fact that information relating particularly to employment figures would be widely used, the figures for the years 1938 to 1942 were published in the August, 1943 and in the January, 1944 issues of the *Indian Labour Gazette*. (The figures for 1942 were, however, provisional. The corrected figures are now reproduced in the table below together with

those for the year 1943.) No corresponding information was given in the published tables for numbers of factories but from figures recently published by the Government of India it would appear that the total number of factories registered in British India under the Factories Act, 1934 was 13,209 in the year 1943 as against 11,868 in the year 1941 and 12,527 in the year 1942. The following table sets out the statistics of the average daily numbers of persons employed in all factories in British India for the years 1939 to 1944 classified according to main industry groups and according to their employment in perennial and seasonal factories.

Statistics of Numbers of Workers employed in Factories in British India.

Classes of Factories.	Average Daily Number of Persons employed in the years.				
	1940	1941	1942	1943	1944
<i>Government and Local Fund</i>					
Perennial Factories .. .. .	168,125	219,233	299,273	355,878	420,435

Skins and Hides .. .. .	18,097	23,516	29,608	33,669	34,624
Miscellaneous .. .. .	21,679	35,346	38,465	37,091	35,477
Total ..	1,379,896	1,630,848	1,681,646	1,782,551	1,804,820
All Other Seasonal Factories .. .. .	295,369	305,443	300,698	297,883	294,996
Grand Total: All Factories .. .. .	1,844,428	2,156,377	2,282,237	2,436,819	2,520,251

A table published at pages 160-1 of the November 1944 issue of the *Indian Labour Gazette* gives the composition of the average daily number of workers employed in registered factories in the different Provinces by age and sex and by industries. The figures for the year 1942 show that of the total number of workers in all factories in British India, 2,133,027 were men, 262,744 were women, 38,069 were children and 13,464 were adolescents.

**THE INDIAN MINES ACT, 1923.**  
The condition of employment of labour in the Indian mines, as regulated by the Indian Mines Act, 1923, and the Indian Mines (Amendment) Act, 1923 which came into force on the 1st of 1901 con-  
lms

first remedied by the 1923 Act, section 23 of which prescribed maximum limits of 54 hours per week for underground and 60 hours per week for above-ground workers. No limits were prescribed for daily hours. A daily limit of 12 hours was imposed for the first time by the Amending Act of 1928 which was brought into effect from 1st April 1930. As a result of the recommendations made in the matter by the Royal Commission on Indian Labour and the adoption of the Draft Convention on Hours of Work in Coal Mines by the Fifteenth Session of the International Labour Conference in 1931, the Government of India passed The Indian Mines (Amendment) Act, 1935, which was brought into effect from 1st October 1935. The main provisions of the law regarding hours and conditions of work in Indian Mines as it now stands, are as follows:—

(a) No person is to be employed in a mine for more than six days in any one week.

(b) No person employed above-ground in a mine is to be permitted to work for more than 54 hours in any one week or for more than ten hours in any one day; and the periods of work of any such person are to be so arranged that along with any intervals of rest they shall not on any one day spread over more than twelve hours.

(c) The periods of work of a person employed below ground in a mine are to be reckoned from the time he leaves the surface to the time he returns to the surface and are not in any one day to spread over more than nine hours. No persons is to be allowed to remain below ground except during his periods of work and where work below ground is carried on by a system of relays, the periods of work of all persons employed in the same relay are to be the same and are to be reckoned from the time the first person of the relay leaves the surface to the time the last person of the relay returns to the surface.

(d) The employment in any mine of children under fifteen years of age is prohibited and those below the age of 17 are not permitted to work in mines unless certified medically fit.

(e) Accidents which cause bodily injury resulting in the enforced absence from work for more than seven days are to be recorded in the prescribed manner.

The Government of India promulgated regulations under section 20(j) of the Indian Mines Act, 1923, on the 7th March 1929 prohibiting the employment of any woman underground in the coal mines in Bengal, Bihar and Orissa and the Central Provinces and the salt mines in the Punjab with effect from the 1st July 1929 and in all other mines with effect from the 1st July 1929. In order to prevent undue hardship a principle of gradualness in the number of women to be reduced every year was laid down. Women are not prohibited from accepting employment in open workings and on the surface of mines. In view, however, of an acute shortage of labour in coal mining areas this policy has now been reversed. By two notifications dated the 24th November and the 4th December, 1943 respectively, the Government of India have exempted, until further orders, all coal mines in the provinces of Bengal, Bihar, Central Provinces and Berar and Orissa from the provisions of clause (j) of Section 29 of the Indian Mines Act, 1923 to the extent to which regulations made thereunder prohibit the entry of women into underground working, for the purpose of employment subject to the following two conditions: (1) no woman shall be employed underground in galleries which are less than six feet in height; and (2) every woman employed underground shall be paid wages at the same rate as a man employed underground on similar work. Milk is now to be supplied to women working underground.

### Mining Statistics.

The collection of full statistics with regard to the numbers of mines and of the persons employed therein dates from 1924. These statistics used to be published in the Annual Reports of The Chief Inspector of Mines in India. Commencing from the year 1940, the Government of India have been publishing abridged reports which contain no figures for numbers employed. Statistics for the 16 years from 1923 to 1939 were given in a table at page 480 of the 1942-43 edition of this publication. The Government of India have, however, published figures showing the average daily number of persons employed in all mines in the various Provinces in India in the issues of the *Indian Labour Gazette*. We set out the available figures in the following table:—

*Average Daily Number of Persons employed in Indian Mines.*

Province	1938	1939	1940	1941	1942	1943
Assam .. .. .	2,361	2,463	2,704	2,732	2,325	2,539

## THE PAYMENT OF WAGES ACT.

Perhaps the most advanced and difficult piece of social legislation attempted in India is the Payment of Wages Act which was passed by the Central Legislature early in 1936 and amended in a minor particular by an Amending Act in 1937. A detailed note on the history of this piece of legislation will be found at pages 503 and 504 of the 1938-39 Edition of this publication. The more important provisions of this Act which were brought into operation with effect from the 20th May 1937 are as follows :—

(a) *Scope of Application.*—The Act in the first instance applies to factories and railways but Provincial Governments are empowered to extend it to tramway or motor omnibus services; docks, wharves or jetties; inland steamer vessels; mines, quarries or oil-fields; plantations; and any other class of workshops or establishments in which articles are produced, adapted or manufactured with a view to their use, transport or sale.

(b) *Wages.*—‘Wages’ for purposes of the Act means all remuneration, capable of being expressed in terms of money, which would, if the terms of the contract of employment, express or implied, were fulfilled, be payable, whether conditionally upon the regular attendance, good work or conduct or other behaviour of the person employed, or otherwise, to a person employed in respect of his employment or of work done in such employment, and includes any bonus or other additional remuneration of the nature aforesaid which would be so payable and any sum payable to such person by reason of the termination of his employment but does not include travelling allowances, employees’ contributions to provident funds, gratuities payable on discharge, or the value of any housing accommodation or services rendered to the worker by his employer.

Many industrial establishments, especially cotton textile mills in India, grant good attendance and efficiency bonuses in addition to wages. These bonuses operate as fines in cases where the standards for earning them are not attained. The Government of India, while framing the Act, included such bonuses within the ambit of “wages” but the definition of this term as far as bonuses are concerned has been widely interpreted. The Government of Bombay held that existing good attendance and efficiency bonuses wherever they obtained must be paid without conditions and notified all factories accordingly. As a test case, the Arvind Mills in Ahmedabad were prosecuted in the City Magistrate’s Court for non-payment of these bonuses in cases where the conditions for earning them were not fulfilled. The Magistrate held that bonuses were wages and directed that the deductions made should be refunded to the workers. The matter was taken into appeal in the Court of the Assistant Judge, Ahmedabad, where the decision of the Magistrate was upheld. The Mills thereupon filed a further appeal in the High Court, Bombay, which reversed the Ahmedabad judgments and held that all bonuses must be earned. The Government of India intend introducing a Bill in the Central Legislative Assembly to amend this Act with a view to clarifying the position of ‘bonuses.’

(c) *Wage Periods.*—No wage period is to exceed one month and all wages are to be paid in coin and/or currency notes.

(d) *Time of Payment.*—The wages of all persons employed in concerns employing less than one thousand persons are to be paid before the expiry of the seventh day after the last day of the wage period in respect of which the wages are payable and in establishments employing more than one thousand persons before the expiry of the tenth day. Where employment is terminated by the employer, all due wages are required to be paid before the expiry of the second working day following that on which the employment is terminated.

(e) *Permissible Deductions.*—Deductions from wages are permitted only in respect of fines, absence from duty, damage to or loss of goods expressly entrusted to an employed person for custody, housing accommodation supplied by an employer, for recovery of advances or for adjustment of over-payments of wages, for income-tax, for contributions to or repayment of advances from provident funds, for schemes of postal insurance, for dues to co-operative societies and on orders made by courts of law. Deductions are also permitted in respect of such amenities and services supplied by the employer as the Governor-General in Council or a Provincial Government may, by general or special order, authorise. The Central Government promulgated a Payment of Wages Amendment Ordinance in 1940 amending the Act to enable deductions being made from wages with written authorisation of the employed person for investment in any War Savings Scheme approved by a Provincial Government. The Act does not permit an employer to make deductions from wages in respect of the value of material damaged in the process of manufacture and to hand over the same to the employee concerned. Such a system was widely prevalent in certain centres of the textile industry in India and particularly in Ahmedabad where it was estimated that a total sum of nearly fifteen lakhs of rupees was deducted annually from the wages of about 25,000 weavers in respect of weaving fines and the value of damaged cloth handed over to them.

(f) *Fines.*—No fines are to be imposed on children, i.e., persons below the age of fifteen years. No fines can be imposed save in respect of such acts or omissions as have been exhibited in notices which have received the approval of the Provincial Government or of an authority which a Provincial Government may prescribe in the matter and unless the person who is fined has been given an opportunity of showing cause against the fine. The total amount of fines which may be imposed on any person during any wage period is not to exceed half an anna in the rupee of wages for that wage period and no fine can be recovered in instalments or after the expiry of 60 days from the day on which it was imposed. All fines are to be recorded in prescribed registers and all realisations from fines are to be expended on objects beneficial to the workers. Provincial Governments have been empowered to make rules in connection with most of these matters.

In December 1937, the North-Western Railway reduced the monthly rate of pay of an engine driver by Rs. 7 for unsatisfactory work. The employee filed an application against the

extended to Rs. 400 per month. Speaking broadly, the Act covers railways; factories; mines; seamen; docks; persons employed in the construction, repair or demolition of buildings designed to be or which are of more than one storey or of twenty feet in height or of dams and embankments, roads, bridges or tunnels; or wharves, quays, sea walls or other marine work; the setting up, repairing, maintaining or taking down any telegraph or telephone line or overhead electric lines or cables; aerial ropeways, canals, pipe lines or sewers; the fire-brigade; railway mail service; persons employed in outdoor work in the postal and telegraphic services; operations for winning natural petroleum or natural gas; blasting operations and excavations; ferry boat services; cinchona, coffee, rubber or tea plantations; electricity or gas generating stations; light-houses; cinematograph picture producing and exhibiting; divers; elephant and wild animal trainers and keepers and salaried motor drivers and cleaners. Recently persons employed in warehouses in markets employing ten or more persons have also been brought within the scope of the Act. Persons employed through sub-contractors by a person fulfilling a contract with a railway are also covered. The Government of Madras have recently brought persons employed in plucking cocoanuts within the scope of the Act. As far as seamen are concerned, those employed on ships registered in India are covered. But if accidents take place within the three mile limit of the territorial waters the Act applies even to those employed on ships not registered in India. But with a view to facilitate the settlement of claims in respect of seamen on ships not registered in India and to avoid litigation, provision has been made in the Lascar's Agreement for the settlement of claims for compensation on the lines of the Indian Act and in default of agreement the Commissioner of the Port where the agreements are signed has been accepted as the final authority to whom these matters should be referred for decision. Not only workmen employed within the precincts of a factory or a mine but also men engaged in any kind of work incidental to or connected with a factory or any mining operation are entitled to the benefits of the Act. As far as factories are concerned, those using mechanical power and employing more than ten persons or those not using mechanical power and employing more than fifty persons are covered. The Provincial Governments are empowered to bring within the scope of the Act other classes of workmen whose occupations are considered to be of a hazardous nature. In pursuance of that power the Government of Bombay have extended the scope of the Act to persons employed on motors or other mechanically propelled vehicles engaged in loading, unloading, handling or transport of goods and to all employees of Municipalities and District Local Boards engaged in occupations ordinarily requiring outdoor work.

**Amounts of Compensation Payable.**—The amount of compensation payable depends, in the case of death, on the average monthly wages of the deceased workman and in the case of an injured workman both on the average monthly wages and the extent of disablement. The term 'wages' includes overtime pay and

the value of any concessions or benefits in the form of food, clothing, free quarters, etc. After the monthly wages of a worker are calculated the amount of compensation due is decided by a reference to Schedule IV which gives in a tabular form the amounts of compensation for death, permanent total and temporary disablement in respect of each of seventeen wage classes. The amounts of compensation payable in the case of an injured workman whose monthly wages are not more than Rs. 10 are Rs. 500 for death, Rs. 700 for permanent total and half the monthly wages for temporary disablement. For a workman whose monthly wages are between Rs. 50 and Rs. 60, the corresponding figures are Rs. 1,800, Rs. 2,520 and Rs. 15 respectively. The maxima for persons earning over Rs. 200 per month are Rs. 4,000, Rs. 5,600 and Rs. 30 per month respectively. In the case of minors the amounts of compensation for death and for permanent total disablement are at a uniform rate of Rs. 200 and Rs. 1,200 respectively, and half the monthly wage for temporary disablement. No compensation is payable in respect of a 'waiting period' of seven days following that on which the injury was caused; but many large firms such as General Motors (India), Ltd., Messrs. Lever Brothers (India), Ltd., and others pay compensation in lieu of wages with effect from the date of injury.

(NOTE: *Permanent total disablement* means such disablement which permanently incapacitates a workman for all work which he was capable of performing at the time of his accident. Any combination of injuries totalling 100 per cent. loss in earning capacity is regarded as permanent total disablement even if the combination of injuries does not arise in one accident.)

**Who are Dependants.**—These are defined in two categories: firstly, those who are in practically all cases actually dependants; and secondly, those who may or may not be in that position. The first includes a widow, a minor legitimate son, unmarried legitimate daughter and a widowed mother. The second includes a widower, a parent other than a widowed mother, a minor illegitimate son, an unmarried illegitimate daughter, a minor legitimate or illegitimate daughter if married or widowed, a minor brother, an unmarried or widowed sister, a widowed daughter-in-law, a minor child of a deceased son and a paternal grandparent.

**General.**—The interests of dependants in cases of fatal accidents have been safeguarded by ensuring that (1) all cases of fatal accidents should be brought to the notice of the Commissioner; (2) in all cases where an employer admits liability the amount of compensation payable is to be promptly deposited with the Commissioner; and (3) in cases where the employer disclaims liability and there are good grounds for believing compensation to be payable, the dependants get the information necessary to enable them to judge if they should make a claim or not.

A contractor has been given the right to be indemnified by his sub-contractor if he has had to pay compensation either to a principal or to a workman.

An employer is permitted to make to any dependant advances on account of compensation not exceeding an aggregate of one hundred

been given. We are, therefore, reproducing the available figures in the following table:  
Statistics of Workmen's Compensation: 1924 to 1944.

Year	Total number of cases	Total compensation paid	Year	Total number of cases	Total compensation paid
		Rs.			Rs.

### Effects on Industry.

A compulsory system of workmen's compensation enhances the cost of production but not to any appreciable extent. In the case of coal mines, the increase in cost has been estimated to be not more than annas four per ton of coal. Vide para. 39 of the Report of the Indian Coal Committee, 1925). However, the owners of many of the smaller coal mines were compelled to close down their mines but this was due mainly to the severe depression with which the industry was then faced. In the Punjab, the proprietors of the coal mines in the Jhelum District were reported to be not satisfied with the privileges enjoyed by the miners under the Act as some of them had to pay as compensation on a single accident more than they could earn during a month. An unexpected increase in the number of serious and fatal accidents may undoubtedly make a big hole in the profits of a concern but the remedy for this lies in accident insurance. There can, however, be no denying the fact that the introduction of workmen's compensation has helped considerably to improve the standard of safety in the country. Facilities for accident insurance are now being provided by a number of leading insurance companies in the country and the most important of these are the Claims Bureaux in Calcutta and Madras. The Calcutta Claims Bureau which represents many of the leading insurance companies operating in India deals with a large number of claims and offers valuable co-operation to the authorities in settling compensation claims. This Bureau continued to render its valuable co-operation in the prompt settlement of claims. In Bombay, insurance companies are now concerned with half the number of cases that come up before the Commissioner. Insurance companies as a rule contest only cases involving questions of law or principle and are of benefit to all concerned. In these provinces insurance is widely resorted

to by the employers especially in the textile industry. The Millowners' Mutual Insurance Association, Ltd., Bombay, is an organisation of employers one of whose objects is the mutual insurance of members against liability to pay compensation or damages to workmen employed by them or their dependants for injuries or accidents, fatal or otherwise, arising out of or in the course of employment.

The Government of India has now announced that it is their intention to provide for Workmen's Compensation in one comprehensive scheme which will cover sickness insurance, maternity benefits and compensation for accidents.

### MATERNITY BENEFITS LEGISLATION.

A Bill introduced by Mr. N. M. Joshi in the Central Legislative Assembly in 1924 to provide for the payment of maternity benefits to women employed in certain industries was thrown out. The Government of Bombay, however, took up the question a few years later and the Bombay Maternity Benefits Act was passed in 1929. This was substantially amended by an Amending Act passed in 1935. A similar Act was passed in the Central Provinces in 1931. These were the first Acts of their kind in India. Since then, Maternity Benefit Acts have also been passed in the Provinces of Madras, Bengal, Sind, Assam, Punjab, and the United Provinces and in Ajmer-Merwara and Delhi. In the year 1941, the Bengal Legislature passed a second Maternity Benefit Act for women employed in tea plantations under the title of The Bengal Maternity Benefit (Tea Estates) Act, 1941. Except for the Assam Maternity Benefits Act which covers women employed in both factories and on plantations and the last Act, all the other Maternity Benefit Acts are applicable to women employed in factories. The subject of extending the benefits of such

The Government of Sind enacted legislation in the year 1944 to amend the Indian Trade Unions Act in such a way as to require that two-thirds of the members of the executive of a Union must be workers and also to prevent one individual person from being an Officer of more than one Union.

The registration of a union may be cancelled or withdrawn at any time by the Registrar on the application of the union itself, or if the Registrar is satisfied that the certificate has been obtained by fraud or mistake, or that the union has ceased to exist or has wilfully and after notice contravened any provision of the Act, or if it has allowed any rule which is inconsistent with the Act to continue in force or has rescinded any rule which is required by the Act. Any union aggrieved by the refusal of a Registrar to register it or by the cancellation of its registration may prefer an appeal to a judge appointed by the Provincial Government for the purpose; and, in the event of the dismissal of such an appeal, the aggrieved party has the right of a further appeal to the High Court.

**Obligations Imposed on Registered Trade Unions.**—The general funds of registered trade unions cannot be spent on objects other than those specified in Section 15 of the Act nor on political objects; but the Act makes provision for the creation of a separate political fund, subscription to which may be collected from such members as voluntarily desire to contribute to it. All registered unions are required to submit annually to the Registrar duly audited statements of accounts in prescribed forms together with changes in officers and the executive and a copy of the rules corrected up to date. Notices of all changes in the rules or of the registered name or the registered address of the office of the union, of amalgamations with other unions or of dissolution must be submitted to the Registrar in prescribed forms within prescribed periods of their occurrence. Failure to carry out these obligations may result either in the cancellation of a union's registration or by the imposition of a fine. The Act further requires that the rules of every registered union should make adequate provision for the inspection of books of accounts and lists of members by the officers and members of the union. The Govt. of Madras have recently tightened up their regulations in connexion with the maintenance, by registered unions of their registers. Among other things, all unions will now be required to maintain files of vouchers and machine-numbered subscription receipt books.

**Rights and Privileges of Registered Trade Unions.**—The Act confers on registered unions the right to corporate existence and of perpetual succession with power to acquire and hold both movable and immovable property and to enter into contracts. A registered trade union is immune from prosecution for criminal conspiracy in respect of an agreement, unless it is one to commit an offence, made between its members for the furtherance of a trade dispute or for restraint of trade and from any legal difficulties arising therefrom. It also enjoys immunity from civil suits in certain cases.

The administration of the Indian Trade Unions Act is entirely on a provincial basis and each Provincial Government is required to appoint a Registrar of Trade Unions. A

union is to be registered in the province in which its head office is situated and if this is transferred to another province, the registration has to be transferred to that province.

Registered unions are empowered under the Indian Trade Unions Act to carry on any form of insurance activity without being under any obligation to secure professional advice as to the actuarial soundness of such business. By virtue of Section 118 of The Insurance Act, 1938, insurance business carried on by a trade union is not subject to the provisions of that Act. The result therefore has been that certain unions are undertaking unsound schemes of insurance now banned by the Act especially that form of it which is carried on on the basis of the dividing principle. With a view to protect the interests of members of trade unions who are and might be the victims of impostures, the Government of India, in September 1940, issued a circular letter to all Provincial Governments inviting opinions as to the application of the Insurance Act, with such modifications as might be necessary, to insurance business carried on by Trade Unions.

One of the most vexed questions in connexion with trade unions in India is that of their recognition by the employers. We are dealing with this question more fully in the Chapter on Trade Unionism in India. Many Bills aimed at compelling employers to recognise unions of their workers have been introduced by private members in Provincial Legislatures but these failed to carry the support of the Governments concerned. The subject was discussed at the Second Session of the Labour Ministers Conference and, as a result of the decisions then reached, the Government of India drafted a Bill intended to add a New Chapter dealing with the Recognition of Trade Unions and Rights and Liabilities of Recognised Trade Unions to the Indian Trade Unions Act. This was circulated to all Provincial Governments for opinion after consultation with the interests concerned. In the light of the criticisms received, the Government of India drafted a new Bill on the subject and this was introduced in the Central Legislative Assembly by the Hon'ble the Labour Member on the 13th November 1943 on a motion for circulation of the Bill for eliciting public opinion. This Bill seeks to compel an employer to recognise a trade union which fulfils certain prescribed conditions and is approved by a Board of Recognition (where one has been set up), non-recognition under those circumstances being made an offence punishable by law. On critical examination, the Bill has been found to be so full of insurmountable difficulties that it is very doubtful if the Government of India will proceed with it in the form in which it was introduced in the Legislative Assembly.

As far as statistics of registrations are concerned, tables showing the numbers of registered unions on all the provincial registers in British India at the end of each financial year together with the membership and income of those which furnished returns have been incorporated in this section in some previous issues of this publication. A table giving this information for the years 1927-28 up to 1939-40 was published at page 487 of the Edition for 1942-43. As we have pointed out in the opening paragraphs of this

to the representatives of their employees are listed under Schedule II. Government have power to modify these schedules (Section 72).

**Standing Orders:**—Every employer in an industry to which the Act is made applicable is required to submit, within a period of two months from the date of the application of the Act to that industry, a draft of the Standing Orders which he proposes to adopt for governing the relations between him and his employees. The Commissioner of Labour is to "settle" these Standing Orders after consulting all the interests concerned in the industry. Any person aggrieved by any of the Standing Orders so "settled" has the right of appeal to the Industrial Court (Sections 26 & 27).

**Changes:**—No employer is to be permitted to make any change in any of the Standing Orders settled by the Commissioner of Labour or by the Industrial Court on appeal or in respect of any industrial matter included under Schedule I unless notice of such intended change is given to the representative of employees. Any employee who desires a change in any industrial matter is also required to give notice of such intended change to his employer. Copies of all such notices are required to be forwarded to the Commissioner of Labour, the Chief Conciliator, the Registrar, the Labour Officer and to any other person as may be prescribed (Section 28).

**Representatives of Employees:**—The Act contemplates the creation of three distinct types of unions. In the first place no union which has not been registered under the Indian Trade Unions Act, 1926, has any place in the scheme of things under this Act. Unions may be either *occupational unions* or *industrial unions*. Any union which has a membership of five per cent. of the total number employed in any occupation or industry in any local area and which has been recognised by the employers concerned or any union which has not been so recognised but which has a membership of twenty-five per cent. of the total number employed may apply for registration for the purposes of the Act (Sections 7 & 8). Any registered union which has a membership of twenty-five per cent. of the total number employed in the occupation or industry concerned may apply to the Registrar for declaration as a *representative union* (Section 12). Unions which have a membership of five per cent. or more but less than twenty-five per cent. and which have not been recognised by the employers concerned may apply to the Registrar for being declared as *qualified unions* (Section 11). The three types of unions, therefore, are: (1) Registered Unions; (2) Representative Unions; and (3) Qualified Unions. "Representative of Employees" means (i) where the majority of employees directly affected by a change are members of a registered union, such registered union; or (ii) where some of the employees directly affected by the change belong to a representative union, that representative union; or (iii) in other cases such representatives not being more than five as may be elected in the manner prescribed by employees directly affected by the change from among themselves; or (iv) in cases where representatives are not elected under (iii) and in all other cases not falling under any of these clauses, the Labour Officer [Section 3 (29)]. The Rules made under

the Act make provision for the determination of the union which is a representative of employees; and, failing unions, for the election of the workers' own representatives.

**Preliminary Procedure:**—On the receipt of a notice of change, the employer and the representative of the employees concerned are to discuss the proposed change. A period of fifteen days has been allowed for these discussions. If an agreement is reached between the parties, the memorandum of such agreement is to be sent to the Registrar for registration (Section 30). In cases where the Labour Officer is one of the parties, the Labour Officer is required to put the terms of the proposed agreement before a meeting of the employees concerned and he is empowered to enter into an agreement only if the majority of such employees concur (Section 32).

**When Dispute deemed to commence:**—If the preliminary proceedings fail to produce an agreement, the party giving the notice is required, if he still desires that the proposed change should be effected, to send a full statement of the case to the Conciliator, the Chief Conciliator and the Registrar (Section 34). On receipt of the statement of the case, the Conciliator is required to enter the industrial dispute in a register (Section 35).

**Conciliation:**—The Act makes provision for the appointment of Conciliators and Special Conciliators. The Commissioner of Labour is to be the *ex-officio* Chief Conciliator for the purposes of the Act (Section 21). Provision has also been made for the appointment of Boards of Conciliation consisting of independent chairmen and members representing employers and employees to be selected by Government from panels formed for the purpose (Section 23). On making an entry of an industrial dispute, the Conciliator concerned has to try and bring about a settlement of the dispute (Section 36) but power is reserved to the Chief Conciliator to intervene at any stage in any conciliation proceedings held by another Conciliator (Section 37). The Chief Conciliator or the Conciliator has to send a report of the whole case to Government on the conclusion of the conciliation proceedings, and in all cases where settlements are reached copies of such settlements are to be forwarded to the Registrar (Section 38). During the pendency of any proceedings before the Conciliator the Government may and if both the parties agree either prior to the commencement of such proceedings or after the failure of the Conciliator to bring about a settlement shall, refer the dispute to a Board of Conciliation (Section 39). Government is empowered to lay down time limits for different stages of conciliation proceedings (Section 41) and the Act gives various powers to Conciliators and to Boards for summoning of witnesses, production of documents, etc. (Section 40).

**Industrial Court:**—The Act makes provision for the appointment of an Industrial Court for determining industrial disputes and for dealing with other matters under the provisions of the Act. The Court is to consist of two or more members to be selected from persons who are, have been or are eligible, for being appointed as Judges of a High Court (Section 24). The Industrial Court, *inter alia*, is to decide all matters referred to it under Chapter II

ment should have power to reintroduce in any area the prohibition of recruitment otherwise than by means of licensed *garden-sirdars* and licensed recruiters. The Government of India implemented these recommendations in the Tea Districts Emigrant Labour Act, 1932, which was brought into effect from the 1st October 1933.

The first object of this Act is to make it possible, on the one hand, to exercise all the control over the recruitment and forwarding of assisted emigrants to the Assam tea gardens as may be justified and required by the interests of actual and potential emigrants; and, on the other hand, to ensure that no restrictions are imposed which are not justified. Provincial Governments are empowered, subject to the control of the Government of India, to impose control over the forwarding of assisted emigrants (chapter III) or over both their recruitment and their forwarding as occasion may dictate (chapters III and IV). No license is required for recruiters but the forwarding of recruits to Assam must be made through the prescribed routes where arrangements for feeding, rest and medical treatment have been made and by authorised forwarding agents. It is made unlawful to assist persons under 16 to migrate unless they are accompanied by their parents or guardians. A married woman who is living with her husband may only be assisted to emigrate with the consent of the husband. Full effect was given to the Royal Commission's recommendations regarding repatriation (sections 7 to 11) and it is further provided that where an employer fails to make all the necessary arrangements for the repatriation of a worker within fifteen days from the date on which a right of repatriation arises to an emigrant labourer, the Controller may direct the employer to despatch such labourer and his family or to pay him such compensation as may be prescribed within such period as the Controller may fix (sections 13 and 15). Section 3 of the Act makes provision for the appointment of a Controller of Emigrant Labour with some staff and possibly one or more Deputy Controllers for supervising the general administration of the system which the Act seeks to establish. The charges for this establishment are to be met from an annual cess called the Emigrants Labour Cess which is to be levied at such rate not exceeding Rs. 9 per emigrant as the Central Government may determine for each year of levy. The cess is collected by the Controller by the sale of certificates of emigration. Every assisted emigrant has to be provided by the employing interest on whose behalf he was recruited with such a certificate. All particulars about the emigrant together with a running record of the details of his employment in Assam are given on it. Failure to provide a certificate is punishable with a fine which may extend to Rs. 500. The rate of cess was reduced by the Government of India from Rs. 5 to Rs. 3 from 1st October 1938. It was subsequently raised to Rs. 4 for the year commencing 1st October 1939 which rate continues for the current year. The provisions of this Act were intended, in the first instance, to apply only to emigration for work on tea plantations in eight specified districts in Assam, but power is retained to extend its application to other industries and to other districts in Assam if necessary.

## SHOPS LEGISLATION IN INDIA.

The first Province in India to enact legislation for the regulation of hours of work and conditions of employment in shops and commercial establishments was Bombay where the Legislative Assembly passed the Bombay Shops and Establishments Act on the 30th October 1939. Three other Provinces in India—Bengal, the Punjab and Sind—enacted similar laws during the year 1940. The Punjab Act was extensively amended by virtue of the Punjab Trade Employees (Amendment) Act, 1943. The Sind Act was amended in 1944. The Bombay Act was brought into effect from 15th November 1940. The Punjab Trade Employees' Act came into force with effect from 1st March 1941, the Bengal Shops and Establishment Act from 1st April 1941 and the Sind Act from 20th November 1941. The question of framing Central legislation for the grant of a weekly holiday to shop workers in those Provinces which have no legislation on this subject was discussed at the Second Session of the Labour Ministers' Conference and the Conference decided that such legislation was necessary. The Government of India drew up a Bill on the subject and this was passed by the Central Legislature with the title of the Weekly Holidays Act, 1942, early in that year. The option for the application of this Act in any Province which has no Shops' Legislation rests with the Government of that Province.

We shall first proceed to describe The Bombay Shops and Establishments Act in some detail and we shall then give a brief outline of the manner in which the Bengal, the Punjab and the Sind Acts differ from the Bombay prototype. The Bombay Act deals with three main types of establishments: shops; commercial establishments; and restaurants, eating houses, theatres and other places of amusement or entertainment.

*Application of the Bombay Act.*—This Act covers commercial establishments, shops, theatres or any other places of public amusement or entertainment, restaurants or eating houses. Government Offices and Offices of Local Authorities; clubs and residential hotels; bazaars or fairs for the sale of work for charitable or other purposes from which no profit is derived; hospitals, nursing homes and dispensaries; stalls and refreshment rooms at wharves and docks; chemists' and druggists' shops as are approved by the Provincial Government by a general or special order; and persons exclusively employed in the collection, delivery or conveyance of goods are *excluded* from the operation of the Act. The Act does not apply to persons occupying positions of management or employed in a confidential capacity; persons whose work is inherently intermittent such as that of travellers, canvassers, watchmen and caretakers; and persons exclusively engaged in preparatory or complementary work, such as clearing or forwarding clerks or messengers.

*Shops.*—Section 7 of the Act prescribes the maximum hours of work of persons employed in shops at 9½ per day. This is half an hour longer than the ordinary factory day. Every person employed in a shop is to be given at least one day in a week as a holiday with pay and no person can be employed for more than five continuous hours unless he has had an interval of rest for at least half an hour. The Act makes

winter months of November to February the closing hour is altered to 9 p.m. by Government notification. The Punjab is the only Province which provides for opening hours—6 a.m. in summer and 9-30 a.m. in winter and the Punjab Act, therefore makes no provision for limiting the spread-over as the other Acts do. As far as hours of work are concerned, the Bombay Act places a daily limit in respect of shops and places of amusement and a monthly limit in respect of commercial establishments. In contradistinction to this, the Sind Act prescribes a maximum of 54 hours per week for persons employed in commercial establishments, the Bengal Act 56 hours a week for shops and the Punjab Act 54 hours a week for shops and commercial establishments. The Bengal Act does not place any limitations on hours of work—daily, weekly or monthly—in commercial establishments but places a maximum limit of ten hours per day for work in shops and in places of amusement. The Punjab Act prescribes a uniform ten hour day as the maximum that may be worked in any establishment covered by it.

The Punjab Act endeavours to restrict dual employment by providing that the hours worked by an individual employee with two or more employers should all be taken into account for purposes of recording. Whereas payment for overtime beyond the permissible daily hours is to be made at a time and a quarter in Bombay, Bengal and Sind, the Punjab Act requires overtime in excess of daily hours to be paid for at double rates.

While the Bombay, Punjab and Sind Acts provide that all the employees covered by these Acts should get one holiday every week; the Bengal Act goes much further and prescribes that all employees should get one and a half holidays in each week. The Bengal and the Punjab Acts, moreover, prescribe that every shop shall also be closed for at least one and a half days and one day respectively in each week.

As far as employment of children is concerned the Bombay and the Sind Acts provide that no child below the age of twelve years shall be employed in any establishment covered by the Act. The Bengal Act has no provisions with regard to the non-employment of children whereas the Punjab Act prescribes a minimum age limit of fourteen years. The Punjab Act also prohibits the employment of any young person in any shop or commercial establishment to which the Act applies before 8 a.m. or after 7 p.m. Hours of work are not to exceed seven per day or 42 per week and no young person is to be asked to work for more than 3½ hours at one stretch without an interval for rest.

Whereas the Bombay and the Sind Acts make no provision for the prompt payment of wages, the Bengal Act prescribes that all wages must be paid within ten days of the end of the period for which they are due and the Punjab Act prescribes a fortnight for this purpose.

The Bombay Act makes no provision for leave with pay; all the three other Acts do: Sind—15 days' leave with pay during every year of service to lapse if not availed of within two months at the end of the year; Bengal—

14 days' privilege leave with full pay after every twelve months continuous employment with right to accumulate up to 28 days and, in addition, casual leave on half pay for ten days in every year; and Punjab—14 days for a year's or 7 days for six months' continuous employment.

Two provisions which are to be found in the Punjab Act but not in the Bombay, Bengal and Sind Acts deserve special mention: (1) no employer may fine any employee to an extent greater than three pies in the rupee of his monthly wages; and (2) One month's notice or one month's pay in lieu of notice to be given by the employer for termination of service.

The Central Weekly Holidays Act is a very simple measure as compared with the four Provincial prototypes which we have dealt with above. As its title implies it is merely confined to making provision for the grant of a weekly holiday in certain classes of establishments. Every shop must remain entirely closed on one day of the week. All persons employed otherwise than in a confidential capacity or in a position of management in any shop, restaurant or theatre must be allowed a holiday of one whole day in each week. Provincial Governments are empowered, if they so desire, to close shops for an additional half-day in the week or to permit employees in theatres and restaurants to enjoy an additional half-day holiday in every week. No deduction or abatement is to be made from wages in respect of any holiday that may be granted under this Act. No provision is made in the Central Act for employees in banks and offices. The Act contains the usual provisions for inspection, penalties, rule-making power and enforcement. The Weekly Holidays Act was brought into operation in the N. W. F. Province, in the Province of Bihar, in British Baluchistan and in Ajmer-Merwara during the year 1943.

The Sind and the Bombay Act have placed the duty of enforcement of these acts on the Local Authorities, whereas the Bengal and the Punjab Acts leave enforcement with the Provincial Governments. It has been estimated that the Bombay Act applies to sixty to seventy thousand concerns in Bombay City alone. The Bombay Municipality has appointed one Chief Inspector (G. R. PRADHAN, Ph.D.) and five senior and eleven junior Inspectors for the inspection work in the Municipal limits of the City. The Government of India have published an excellent review on the working of Shops Legislation in India at pages 293 to 301 of the March 1945 issue of the *Indian Labour Gazette*.

## THE INDUSTRIAL STATISTICS ACT, 1942.

The collection of statistics regarding wages, conditions of employment and other matters relating to industry in India had hitherto been effected through the goodwill and voluntary effort of the industrial units concerned. This method was not considered satisfactory. As a matter of fact, the Government of Bombay had introduced a Bill for the Collection of Statistics in the local Legislative Council as early as in 1924 but that Bill was dropped owing to the strong opposition put up by employers' interests against the adoption of such a measure. Practi-

cally every Commission and Committee appointed in connexion with matters relating directly or indirectly to industry in India has stressed the necessity for the passing of a Statistics Act. The subject was discussed at the Eleventh Session of the Industries Conference held in 1939 and again at the Second Conference of Labour Ministers held in 1941 and it was decided that such a measure should be adopted. The Government of India introduced a Bill on the subject in the Central Legislative Assembly on the 27th February 1942 and this was passed into law at the same Session with the title of The Industrial Statistics Act, 1942.

This Act is permissive, that is to say, the decision to apply it to any particular Province rests with the Government of that Province. The Act permits the collection of statistics with regard to any of the following matters: (1) prices of commodities; (2) attendance; (3) living conditions including housing, water supply and sanitation; (4) indebtedness; (5) rents; (6) wages and earnings; (7) provident and other funds provided for labour; (8) benefits and amenities provided for labour; (9) hours of work; (10) employment and unemployment; and (11) industrial and labour disputes. Penalties are provided for persons refusing to supply information or failing to furnish the required returns. Provincial Governments are empowered to appoint an officer to be the Statistics Authority for the purposes of the collection of any statistics under the Act and that Authority, when once appointed, has the power to call upon employers to furnish the information required. Penalties are also provided for in the Act for improper disclosure of information or returns by persons engaged in the collection of the information or the tabulation of the data.

The Industrial Statistics Act was brought into force in Bombay with effect from the 1st March 1943 and in Bengal with effect from the 15th March 1943. The Labour Commissioner, Bengal, has been appointed the Statistics Authority for the purpose of collection of statistics relating to prices of commodities; living conditions, including housing, water supply and sanitation; indebtedness; rents of dwelling houses; and wages and other earnings in so far as they relate to welfare and conditions of labour. The Government of the Central Provinces and Berar have published Rules in connexion with the introduction of this Act in the Province.

## DEMAND FOR UNIFORM LABOUR LAWS IN INDIA.

In the first Chapter of this Section we referred to the widespread schemes for new labour legislation initiated by many Provincial Governments in India. It might have been expected that a certain measure of uniformity both with regard to the scope of the contemplated labour laws and the pace at which they were to be enacted would be observed at least in those Provinces where Congress Governments were in power. But, whereas the Congress Government in Bombay had placed two important enactments such as the Bombay Industrial Disputes Act, 1933, and the Bombay Shops and Establishments Act, 1939, on the Statute Book, no similar legislation had been passed in such other important industrial Provinces where Congress Ministries had been functioning as Madras,

the United Provinces, Bihar, and Central Provinces and Berar. The impetus towards enacting measures to improve the lot of the working classes, as a result, differed in intensity from one Province to another and there were wide gaps between labour amenities in different parts of India. These disparities, it was recognised, must inevitably tend to weaken the competing power of those Provinces where labour laws placed greater restrictions and imposed heavier financial burdens on the employers. Responsible spokesmen of industrial interests in the country, therefore, gave frequent expression to their sense of perturbation at the lack of uniformity and consistency in the labour policies which were being pursued by the different Provincial Governments and all Associations of Employers in the country suggested to the Government of India the desirability of some action to ensure co-ordinated action in respect of labour laws.

In the words of the Hon'ble Dr. B. R. Ambedkar, Labour Member of the Government of India: "So long as the Government of India was a unitary Government, uniformity in labour legislation was not difficult to obtain. But the federal constitution created by the Government of India Act of 1935 by including Labour Legislation in the concurrent legislative list had created a very serious situation. It was feared that if there was no Central legislation each Province might make a particular law specially suited to itself, but different from that of its neighbour by allowing Provincial considerations to dominate over considerations of general and national importance." With a view to supplying 'a most necessary corrective to this tendency and to foster among Provincial Governments a regard for the wholesome principle of uniformity in Labour Legislation,' the Government of India convened a Conference of Labour Ministers from the Provincial and the State Administrations at New Delhi in January 1940. The agenda consisted of an examination of both the defects and the shortcomings of the existing labour laws and also of proposals for new legislation. Following this Conference, employers felt that it would be highly desirable that there should be a measure of unanimity in the opinions expressed at similar Conferences by the various employers' associations in the country. With this object in view a joint Conference of Industrialists was convened at Bombay in September 1940 under the auspices of The Employers' Federation of India and the All-India Organisation of Industrial Employers. The Second Labour Ministers' Conference which was held at New Delhi in January 1941 was preceded by separate Conferences between the Labour Member of the Government of India and the representatives of the two Federations of Employers' Associations and the All-India Trade Union Congress at Calcutta at the beginning of the year. A similar procedure of separate conversations with the representatives of Capital and Labour was followed prior to the third session of the Conference of Labour Ministers which was held at New Delhi on the 30th and 31st January, 1942. The Hon'ble Sir Firoz Khan Noon who presided at the Third Conference emphasized that there was no time in the history of India when a speedy settlement of labour problems was more urgent than at present. If war production was to go forward unhampered

we must, he said, avoid strikes and lockouts at all costs and we must handle all problems of labour and industrial development with sympathy and foresight.

One of the most important recommendations made by the Royal Commission on Labour in India in its report which was published in 1931 was for the setting up of an Industrial Council for India on the lines of tripartite representation of Governments, Employers and Employees. It was not possible for the Government of India to give effect to this recommendation for many reasons but at the Third Conference of Labour Ministers, Sir Firoz Khan Noon said that it was for the consideration of the Conference whether for the future it would not be healthier to develop the practice of having joint meetings of employers, workmen and representatives of Governments. The Reports of the Proceedings of the three Conferences of Labour Ministers have been published as Bulletins of Indian Industries and Labour and copies are obtainable from The Manager, Government Publications, New Delhi.

### **Establishment of a Tripartite Conference.**

The Government of India gave quick effect to the proposal made by the Hon'ble Sir Firoz Khan Noon at the Third Conference of Labour Ministers for greater collaboration between employers, workers and Governments and they convened a Plenary Conference of all these interests to meet in New Delhi on 7th August 1942 to decide upon the following matters:—

(1) The desirability of establishing a Labour Conference as a permanent organization to meet at least once a year;

(2) The desirability of instituting a Standing Advisory Committee of this Conference which would meet whenever Government thought it necessary to invite them to meet and to advise Government on matters placed before it; and

(3) Defining in general terms the procedure for the constitution of these bodies.

The Conference decided that a collaborative machinery composed of the representatives of Governments, employers and workers in India should be established forthwith for the consideration of all questions relating to the conditions of labour and resolved that the constitution of the Plenary Conference should be as follows: Chairman—The Hon'ble the Labour Member of the Government of India; Members—(1) Three representatives of the Government of India including one representative to represent Minor Administrations; (2) Eleven representatives of Provinces; (3) Six representatives of industrially important States; (4) Two representatives of the Chamber of Princes to represent other States; (5) Eleven representatives of employers to be nominated by Government, four each in agreement with the Employers Federation of India and the All-India Organization of Industrial Employers respectively and the remaining three to represent other classes of employers; and (6) Eleven representatives of employees to be nominated by Government, four each in agreement with the All-India Trade Union Congress and the Indian Federation of Labour respectively and the remaining three to represent other employees' interests. It also decided that a

Standing Labour Committee composed of the following members should be constituted: (1) Two representatives of the Government of India of whom one—the Hon'ble the Labour Member—would be the Chairman; (2) One representative each of the Governments of Bengal, Bombay and the United Provinces to be selected by the Governments of these Provinces; (3) Three representatives of the remaining Provinces, one each to represent (a) Madras and the Central Provinces and Berar, (b) Assam, Bihar and Orissa, and (c) Punjab, Sind and the North-West Frontier Provinces to be selected by agreement between the Governments of these Provinces preferably by a system of rotation; (4) Three representatives of Indian States including one representing the Chamber of Princes; and (5) Five representatives each of Employers and Employees, four from each group being nominated by the Government of India in agreement with the two leading All-India Associations of Employers and the two main Associations of Employees, the fifth Member in each group being nominated by the Hon'ble The Labour Member. The second and the third sessions of the Tripartite Labour Conference were held at New Delhi on the 6th and 7th September, 1943 and on the 27th and 28th October, 1944, respectively.

The main function of the Standing Labour Committee is to consider and examine such questions as might be referred to it by the Plenary Conference or by the Central Government taking also into account suggestions made by Provincial Governments, States, the Chamber of Princes and representative organizations of Employers and Workers. The Committee is competent to report to the Plenary Conference on matters referred to it by that body and to advise the Central Government on matters referred to it by the Government of India. The Plenary Conference also acts in an advisory capacity. Whereas the Plenary Conference is to meet at least once in every year, the Standing Labour Committee is to meet as often as it might be convened by the Central Government for the consideration of questions that may be before it. By the time we went to Press for this issue (July 1945) six meetings of the Standing Labour Committee were held—four at New Delhi on the 30th November and 1st December 1942, on the 25th January, 1943, on the 27th June, 1944 and on the 17th March, 1945, respectively; one at Bombay, on the 7th and 8th May, 1943 and another at Lucknow on the 25th and 26th January, 1944. The agenda and proceedings of the Standing Labour Committee have covered a wide range of subjects which want of space prevents us from dealing with here. Mention may, however, be made that the only item discussed at the 6th meeting of the Standing Labour Committee was the note prepared by Messrs. M. Stack and R. Rao of the International Labour Office on Professor Adarkar's Report on Health Insurance for Industrial Workers in India. This note has been published at pages 329 to 339 of the April 1945 issue of the *Indian Labour Gazette*. The note recommends the adoption of one comprehensive scheme of sickness and workmen's compensation insurance and maternity benefits for workers in all perennial factories in India. Want of space prevents us from giving full details of the scheme here.

## WAGES, HOURS OF WORK AND CONDITIONS OF EMPLOYMENT.

Although some associations of employers such as the Indian Jute Mills Association and the Millowner's Association, Bombay, have made efforts during the last few years to secure a certain measure of standardization in wage rates and conditions in the concerns controlled by their members, conditions of work and employment in Indian industry vary widely not only between industry and industry and centre and centre but also between unit and unit in the same industry and in the same centre. These variations have been considerably accentuated since the advent of the second world war. At the best, therefore, it can only be possible to give broad generalisations for the more important industries and indications as to where further information can be found. As far as conditions in factories are concerned, the various provincial annual factory administration reports and the summaries compiled by the Government of India on the basis of these reports, when published, used to give valuable information on hours of work, etc. Information on conditions in Indian mines used to be similarly contained in the annual all-India mines administration reports. The four Reports on a Wage Census in the perennial factories in the Bombay Presidency issued by the Bombay Labour Office and some of the Reports issued by the Labour Investigation Committee, however, contain detailed and comprehensive information relating to wages and earnings in principal industries in India.

### WAGE RATES AND EARNINGS.

Certain important facts govern all discussions on wages and wage rates in India. There is as yet no wage fixing machinery in the country although the question of setting up such machinery has recently been under the consideration of the Government of India; and with a few exceptions, there are no trade agreements or union rates. One important exception is the cotton textile industry in Ahmedabad where the Textile Labour Association and the Ahmedabad Millowners' Association have been able to reach agreements with regard to the rates to be paid to spinners, doffers and weavers. This and a list of the minimum rates of wages to be paid in time rated unratinalised occupations in cotton mills in Bombay City drawn up by the Millowner's Association, Bombay, in 1934 are the only attempts which have been made so far at standardization of wages in the country. Except in the case of a very few firms like General Motors (India), Ltd., time rates of wages are not hourly rates, as in the West, but are daily or monthly rates or, where wages are paid weekly or fortnightly, daily and weekly or fortnightly rates. The skilled engineering trades like fitting, machining, etc., are often divided into several grades and sub-grades. Each individual Administration or unit has its own arbitrary method of grading but railway workshops and Government Ordnance factories lay down standards for each grade and for the trade tests the passing of which alone entitles an individual workman to promotion. The Govern-

ment of India have been recently engaged in standardizing sub-occupations in the principal Engineering trades and Committees with the Chairmen of the National Service Labour Tribunals as Chairmen have been appointed for this purpose.

Personal competence and efficiency supply and demand and bargaining power are the main factors which determine the wage an individual should get in the vast majority of concerns where no grades have been fixed. Where monthly rates of wages are paid the "month" has a widely varying meaning. It may be the calendar month or the number of working days in the month, or a month of 26 or 27 working days, or the Hindu month or a "book" month—a month of so many complete weeks, or a month of so many hours, as in the case of the G. I. P. Railway where monthly rates are for a month of 29½ hours. Before the Payment of Wages Act was passed employers resorted to various devices to deprive a worker of his dues by attaching various conditions which would entitle him to secure the hypothetical pay for a Sunday or closed day, e.g., presence on the Saturday or Monday or both. Section 9 of that Act prescribes that the amount of deduction made from a monthly rate for absence from duty shall in no case bear to the wages payable a larger proportion than that which the period of absence bears to the number of working days in the wage period.

Practically no industrial unit in India today pays a consolidated rate. During the World War of 1914-18 and for a few years later, dearness or war or grain allowances were given in addition to a "basic" wage. "Basic" did not mean some fixed or prearranged amount universally paid at any particular moment; it applied to the amount of wage an individual received at the time when the allowance was given to him. A new comer to industry would not necessarily get the same "basic" wage and allowance given to his predecessor; he might get the same but he would generally get a lower "basic" wage and the allowance or a consolidated rate. The dearness allowances granted to industrial workers in India during the last war were never completely taken away. The few years preceding the commencement of the present war were characterised by insistent demands by Labour for the consolidation of these allowances with "basic" rates of pay. With the advent of the Second World War, however, dearness allowances were again reintroduced in almost all industries in India as a separate item except in the Jute Mill industry where an increase in the basic wage was granted and subsequently an allowance called "amenity allowance" given.

It would be of interest to observe that certain industrial concerns in India have adopted the Halsey Weir or Bedaux point systems of wage payment. The International Bedaux Company

of New York and Amsterdam which is the largest organization of industrial consultants in the world extended its activities to India in 1936. The Indian branch of the Company is known as The Eastern Bedaux Company and its address is Construction House, Ballard Estate, Bombay.

## Rates of Wages.

In view of what has been stated above it must be obvious that the rates of wages paid in Indian industries must vary widely. They do not only as between industry and industry but also as between centre and centre, and unit and unit in the same centre in any one industry. As pointed out already, the only reliable and satisfactory data in connection with wage rates and earnings of industrial workers in India are those contained in the reports of enquiries conducted by the Labour Office of the Government of Bombay and in the *ad hoc* reports issued by the Labour Investigation Committee in the year 1946, for the Province of Bombay. Wage data relating to agricultural labour is contained in a series of reports of quinquennial censuses conducted in certain provinces into agricultural wages. The reports of Courts of Inquiry appointed under the Indian Trade Disputes Act and the reports of Provincial Committees appointed by certain Provincial Governments to enquire into wages and conditions of employment of workers in certain industries also contain information relating to wages. Some of the annual factory administration reports published by the Provincial Governments in India used to contain remarks about prevalent wage rates. The annual Mines' administration reports also contained figures for daily earnings for certain main occupations in representative mines. The lack of accurate and reliable statistics of wages in India has been adversely commented upon and regretted by almost every Commission and Committee appointed in the country since the beginning of the century and notably by the Royal Commission on Indian Labour.

The blame for the lack of information about wages in India cannot lie entirely at the doors of the Central and Provincial Governments. The collection of satisfactory wage statistics is always an exceedingly difficult matter and more particularly so in India where conditions vary so markedly and widely. Moreover, as will be seen from the observations which follow under the heading of "Pay Periods" there are wide variations in the periods and methods of wage payment. The situation is further complicated by the fact that the nomenclature adopted for designating occupations also varies widely between district and district and concern in the same district owing to the use of a host of vernacular and arbitrary terms and of nicknames. Even in concerns which use standard English occupational terms, the position is rendered more difficult owing to the existence of the gradings which have been referred to above. The necessary preliminaries to the conduct of any satisfactory enquiry into wages in India, therefore, must be (1) the establishment of a uniformity of method, (2) the standardisation of occupational terms (as pointed out above,

this is now being attempted) and (3) the thorough education and instruction of the clerical staffs of the units to be covered in the proper use of the standardised designations and in the accurate filling up of the required returns. In view of what has been stated it is obvious that no Government in India can undertake a comprehensive enquiry into industrial wages unless it has at its disposal an adequate and thoroughly trained and experienced staff for the purpose.

Since its establishment in 1921, the Labour Office of the Government of Bombay has conducted five enquiries in the years 1921, 1923, 1926, 1933 and 1937 into the wages of cotton textile mill workers in the Province of Bombay, an enquiry into agricultural wages covering a period of twenty-three years from 1900 to 1922; an enquiry into the wages of peons in Government and commercial offices in 1922; enquiries into the wages of all municipal employees in the Province in 1924, of clerical employees in Railway and Commercial offices in Bombay City in 1925, of printing press workers in Bombay City in 1929, of workers employed in the building trade in Bombay City in 1935, and of all employees in the retail trade in various important towns in the Province in the same year. In 1934 the Labour Office conducted a general wage census covering all workers in all working perennial factories in the Province including cotton mill operatives. The second part of this census covering seasonal factories was conducted in the winter of 1935-36. The results of the special enquiry which that Office conducted into wages in cotton textile Mills in 1937 expressly for the Bombay Textile Labour Inquiry Committee have been published in the Committee's Report. The results of all the other enquiries have been published either in special reports or in articles in the *Labour Gazette*.

Information regarding wage rates can only be of value if accurate data are available to show the frequency distribution of the numbers of workers getting the same rate in different occupations in different industries in different centres. Furthermore it is impossible to give any rates of wages which will be found to be generally applicable to any particular industry in any particular centre.

## Earnings.

Whilst full and accurate information with regard to wage rates may be of great value for purposes of wage fixation, statistics of earnings alone are of value for the proper assessment and appreciation of the well-being of the workers, provided however that the term "earnings" has one uniform meaning in its computation and application. In practice, the connotation of the term varies widely for it is commonly applied to one of three different values: (1) gross earnings; (2) net earnings; or (3) the amount which a workman receives in his pay envelope.

When all the Reports of the Labour Investigation Committee are published it would be possible to arrive at a correct idea of the gross and net earnings of the workers employed in several industries in the country. In the meanwhile however, the only data which are available are those published in the *Indian Labour Gazette*. These are reproduced overleaf.

## AVERAGE EARNINGS OF FACTORY WORKERS IN BRITISH INDIA:

	Average annual earnings in rupees during			Increase in 1944 over (in rupees)		Percentage increase in 1944 over	
	1941	1943	1939	1943	1939	1943	1939

## PAY PERIODS.

There is a complete absence of uniformity as regards the periods for which payments of wages are made in the various branches of industry in India. In scarcely any industry is there a single period of payment. Different systems are found in establishments belonging to the same industry and in the same district; and within the same establishment different classes of workers are often paid for different pay periods. If generalisations may be attempted, the jute industry in Bengal, coal mines, tea plantations, seasonal factories, oil mills, rice and flour mills and certain classes and groups of workers in Government establishments such as the Security Printing Press at Nasik pay wages for periods of a week. Payments on a fortnightly basis range between payments for *haptas* or wage periods of fourteen and sixteen days for weavers and spinners respectively in the cotton mills in Ahmedabad to bimonthly payments for periods from the 1st to the 15th and from the 16th to the end of the month in textile mills in Bombay and various other centres in India. The month is the accepted wage period for the railways (including railway workshops), cotton textile mills in Bombay, Sholapur and several other centres, engineering workshops, dockyards, printing presses and for the persons employed in the mechanical and maintenance departments of almost all concerns which pay wages to process operatives weekly or fortnightly. Wages are calculated on both the monthly and the fortnightly bases in sugar mills and tanneries. In the Tata Iron and Steel Works at Tatanagar where over 50,000 workers are employed wages are paid weekly to men on daily rates and monthly to those on monthly rates. The most general system of payment in the case of casual labour is that of daily payment. Supervisory and clerical staffs in all industrial establishments are paid on a monthly basis.

three different occasions within the last twenty years. Attempts were also made to amend the Payment of Wages Act in such a way as to achieve this object. The position, however, has still remained unchanged.

## HOURS OF WORK.

The existing restrictions on hours of work in factories and mines subject to the Indian Factories and Mines Acts have been described in the sections dealing with those Acts. The most important happening during the current year in regard to hours of work in factories is the reduction of the weekly hours of work from 54 to 48 in perennial factories and from 60 to 54 in seasonal factories. This reduction was effected from the point of view of two considerations: (1) it was felt that 9 hours of work in a factory per day was somewhat too long; and (2) the reduction of hours of work might lead to employment of more persons. Actually, in many industries in this country during the war when three shifts were being worked, the hours of work were not in excess of 8 per day. In the coal-mines in Bihar and Bengal the workers seldom work for more than five to six hours in the day or for more than four to five days in the week. The weekly hours of work in Indian mines vary widely and range from 38 to 51 hours per week. The cotton textile industry in almost all centres normally works a uniform 9 hour day except in a few concerns which work a 9½ or 10 hour day from Mondays to Fridays and a 5½ hour or 4 hour day on Saturdays. A recent development in the cotton textile industry is to work shifts on the basis of what is known as *The Relau System*. By this system a unit does not stop work during the noon recess and continues working throughout a whole shift, different batches of workers being given rest intervals by turns and the remainder being asked to do double substitute work for the time being. Messrs. E. D. Sassoon & Co., Ltd., in certain of their cotton mills in Bombay City, have been working three shifts of seven hours each for the last seven or eight years; but conditions in these mills are highly rationalised: that is to say

The question of shortening the wage period universally in India by law to a week or a fortnight has been considered by the Government of India, in consultation with the Provincial Governments and interested persons and bodies, on

more machines are allotted to each worker, siders being asked to mind two sides and weavers six looms as against the normal of one side and two looms. Most of the Jute mills in India are members of the Indian Jute Mills Association. The hours of work in member mills are regulated according to the recommendation of the Association. The weekly hours of work in jute mills in Bengal vary considerably from year to year and recent investigations show that mills with more than 220 looms were permitted to work 66 hours a week. Those with a smaller number of looms than 220 could work 72 hours per week. Some mills work 60 hours in some departments and 66 in others in order to build up a sufficient store of yarn. During, however, periods of coal shortage, many of the mills were found to be working for only 54 hours per week. Unlike the Cotton Mill Industry, work in jute mills start fairly early in the morning generally at 5.30 and goes on till 10.30 or 11. Thereafter, there is a recess period of about 2½ hours. Work recommences at 1 or 1.30 p.m. and continues till 6.30 or 7.30 p.m. Some of the mills also allow short interval of 10 to 15 minutes during working hours which the workers take in rotation.

All the dockyards, many of the larger engineering and almost all the railway workshops work a 48 hour week but the daily hours vary according to the number of hours worked on a short Saturday. The hours in many of the mechanic shops of textile mills and in the larger non-engineering factories are usually half an hour to an hour less than those for process workers and approximate more closely to those in large engineering plants. Factories engaged in the production of metalware, however, work the full number of hours permissible under the Factories Act as also do oil and sugar mills. Almost all seasonal factories work a uniform 10 hour day for all the days in the week except on the compulsory rest day which is not always on a Sunday especially in the districts where factory owners endeavour, as far as possible to close on the local bazaar day. Most factories engaged in the production of munitions of war now work the maximum weekly hours permitted by the Factories Act and exemptions absolving factories from observing the Statutory regulations have been granted by all Provincial Governments to many factories. Early in November 1941, the Government of India issued a Press Note stating that owing to a curtailment of imports of cotton textiles into India owing to difficulties of securing adequate transport there had been a large increase in the demand for the output of cloth from Indian cotton mills and that unless the production of Indian Mills was increased, the poorer classes of India might find it difficult to obtain their necessary supplies of cloth at reasonable prices. The Government of India after having given careful consideration to the question in consultation with the Provincial Governments, decided that all Provincial Governments should permit cotton spinning and weaving mills throughout India to work a 60-hour week provided that the six additional hours over the 54 hours per week permitted by Statute were paid for at overtime rates. All Provincial Governments which had cotton textile mills within their territories issued the necessary notifications in the matter but not many mills were able to take advantage

of this relaxation owing to Labour opposition. The period of six months lapsed at the beginning of May 1942 but many Provincial Governments have extended the relaxation for further periods of six months at a time.

In all cases where continuous production is necessary such as in electricity generating plants and certain water pumping stations, cement factories, etc., work is arranged on a system of three shifts—the different shifts changing over every week or fortnight. The change-over is so arranged that every workman gets a rest period of at least twenty-four continuous hours once in one week. A system of change-over of shifts has been widely adopted in cotton textile mills in the City of Bombay but very little progress in this matter has been made in other centres of the industry owing mainly to the opposition of the day shift workers whose services had been engaged prior to the introduction of night work.

As far as railways are concerned, hours of work in railway workshops are controlled by the Indian Factories Act. Most of the larger running sheds have also recently been classified as factories and work in these large sheds is arranged on the basis of three shifts of eight hours each. In the smaller sheds where work is of a fairly intermittent character, systems of two shifts of twelve hours each obtain but the work of the individual is so arranged as not to work each operative for more than 8 hours. As far as the hours of work of other classes of Railway servants are concerned, the Indian Railways Act, 1890, was so amended in 1929 as to empower the Governor-General in Council to make rules for the limitation of hours of work and of grants of a periodical rest to certain classes of railway servants. Under the new powers, the Railway Servants Hours of Employment Rules, 1931, were promulgated and put into effect. These provide a 60-hour week for persons engaged in continuous work and an 84-hour week for employees whose work is of an essentially intermittent character. Persons in positions of supervision and management or who are already subject to the limitations imposed by other Acts such as in railway workshops, running staffs and watchmen, watermen, sweepers and gatekeepers whose work is both intermittent and of a specially light character are excluded from the operation of the Rules. The Supervisor of Railway Labour takes prompt measures to rectify any irregularities that are brought to his notice. The most important matter in which there are frequent differences of opinion between the Supervisor of Railway Labour and the Railway administrations is the classification of staff.

There is at present no legal restriction on the hours of work of dock labourers in India and the Royal Commission who examined the question recommended that the normal daily hours prescribed by law should be fixed at nine and that overtime should be allowed up to a maximum of three additional hours on any one day, overtime being paid for at 33½ per cent. over ordinary rates. On circulation of these proposals by the Government of India, most of the provincial Governments affected were of opinion that under the existing organisation of dock labour in India, legislation for the control of

hours was not practicable owing to the insurmountable difficulties which would be experienced in enforcement. The authority of the Karachi Port were thereupon advised to try out an improvised method of decasualisation which would involve registration of all dock workers. Stevedore labourers have however, as a result of considerable agitation by their unions, succeeded in securing a reduction in their hours of work from 12 to 14 hours per day to nine to eleven hours per day.

Speaking generally, in the dry docks and workshops attached to Ports two to three shifts of 8 hours each are worked. Only in the Madras Port is there a system of weekly change-over of shifts among dock workers. During the War, overtime was a regular feature in the major ports due to increased activities created by war conditions.

In the major municipalities in India the hours of work vary from department to department but are generally 8 to 10 per day. In the Water Works Department, the Pumping Station and Distribution Department in Madras, there is a regular system of change-over of shifts but such a system is not to be found in other municipalities. Speaking generally, municipal workers get a weekly holiday. Although those in the conservancy department get only half a day off per week, there is a certain amount of discontent among the conservancy staff for not getting a weekly holiday but since they are engaged on essential work most of the municipalities find it difficult to grant such a holiday.

As far as the industries not specifically dealt with here are concerned, the hours of work in the case of certain individual units may, by the standards of to-day, be considered excessive but the existing regulation of the hours of a large percentage of industrial labour in India had a very salutary effect in bringing about a general reduction to more normal standards in the case of the non-regulated industries and concerns. Conditions regarding hours of work have, however, worsened somewhat in view of the regular overtime which has to be worked in almost all industrial concerns in India in order to maintain war production.

## RECRUITMENT.

Up to about ten years ago, recruitment of labour in almost all industrial undertakings in India, with the possible exception of Railway workshops, was effected through the medium of a recruiting agent, a *Sardar*, a *Mukadam* or a jobber. As a result, however, of the recommendations made on the subject by various Committees—notably the Royal Commission on Indian Labour and the Bombay Textile Labour Inquiry Committee which have condemned this method of recruitment owing to the abuses which have come to be associated with it—many of the larger and more progressive concerns have appointed Labour Officers who are directly responsible for all new recruitment. The old method is, however, still largely prevalent in the majority of the industrial concerns in the country.

There are various forms in which a recruiting agent is remunerated. He may be a salaried employee with a commission for every recruit he brings in, or he may receive a lump sum payment for each recruit or a gang of recruits, or he may be paid a recurring sum for each man he places in employment as long as that man continues in employment. Whatever be the method by which an employer remunerates the recruiting agent, it is fairly well known that the agent keeps a continuous hold and grip on the recruit he places in employment and extracts from him recurring sums of money whilst he continues in that employment under pain of his losing his job.

The evils in connection with recruitment were most marked in the case of casual or substitute labour. The Millowners' Association, Bombay, have dealt with the problem by establishing what is known as the "Badli Control System." The daily number of absentees in a cotton mill in Bombay are averaged and an additional percentage is added. Each mill issues *badli* or substitute cards to this number of workers. Daily casual vacancies are filled only from such card holders and whenever there is a permanent vacancy it is filled from these card holders. The evil influence of the jobber is thus eliminated. The system has been highly commended by the Textile Labour Inquiry Committee and the Government of Bombay have recommended its adoption by all mills in the other centres of the cotton textile industry of the Province.

No reference to the appointment of Labour Officers in industrial concerns in India would be complete without mentioning the lead given in this matter by the Millowners' Association, Bombay, and the excellent work done by its own Labour Officer, Mr. R. G. Gokhale. The Association, through Mr. Gokhale, conducts special classes for the training of Mill Labour Officers and actively supervises and controls the work done by all such Officers where they have been appointed through the Association. Following the example of the Millowners' Association, Bombay, the University of Calcutta, in co-operation with the Indian Jute Mills Association, has recently inaugurated a special course of social work for giving suitable training to labour welfare officers engaged in jute mills. The course covers both theoretical training and intensive practical work in the field, i.e., the jute mills themselves. The Indore Christian College has also recently started a course for the training of Labour Officers.

The Indian Jute Mills Association which has appointed a large number of Labour Officers, created a special post of a Senior Labour Officer in 1944 and they have been successful in procuring the services of Mr. John Lee, M.A. (Oxon.), who has had a large experience of Personnel management in the United Kingdom to fill it.

In this connection mention might also be made of the Employment Exchange started by the Northern India Employers' Association in Cawnpore. Some of the progressive cotton mills in the South have opened special Labour offices through which only recruitment is made. Some of the worst evils in regard to the recruitment of labour are to be found in Indian Coal Mines.

## MEASURES FOR ENFORCING DISCIPLINE.

The measures adopted by industrial employers in India for enforcing discipline have engaged the earnest attention of both the Central and the Provincial Governments in this country for the last fifteen years. Early in 1926, the Government of India instituted a country-wide inquiry into the extent of the deductions made by employers from the wages of their workpeople in respect of fines and other matters. The subject was partly examined by the Bombay Strike Enquiry Committee (Fawcett Committee) in 1928-29 and again more fully by the Royal Commission on Indian Labour in 1929-30 and both these bodies made a series of most important recommendations in the matter. The Payment of Wages Act was passed in 1936 in order to implement these recommendations.

The two matters with regard to the discipline of their workmen which Indian industrial employers complain of most are the large extent of labour turnover and the high degree of absenteeism. That both high labour turnover and high absenteeism are to be found in several Indian industries cannot be denied; but, few, if any, employers have taken the trouble to examine the root causes for them. The investigations conducted by the Labour Office of the Government of Bombay go to show that both labour turnover and absenteeism are highest in concerns and industries in which wages are lowest and where conditions of employment are least attractive and that they are lowest in concerns and industries in which wages are comparatively high and where other conditions of employment are attractive. For example, the Bombay Labour Office compiles monthly figures of percentage absenteeism in cotton textile mills in Bombay, Ahmedabad and Sholapur. Textile wages are highest in Ahmedabad and lowest in Sholapur. The annual averages of percentage absenteeism in these three centres for the year 1944 were: Ahmedabad 5.70, Bombay 11.35, and Sholapur 15.34—figures which tell their own story.

Under the Payment of Wages Act, every employer is required to draw up lists specifying the acts or omissions for which fines will be inflicted. These lists have to be approved by such authority as a Provincial Government may prescribe and are required to be prominently displayed in all places where the employees concerned are working. Apart from this employers were not required to draw up any Standing Orders or rules of conduct governing the conditions of employment between them and their employees. The Bombay Industrial Disputes Act, 1938, however, requires every employer in an industry to which the Act has been made applicable to submit a draft for the Standing Orders which he proposes to adopt for regulating the relations between him and his employees to the Commissioner of Labour within two months of the date of the application of the Act to any industry; and the Commissioner of Labour is empowered to "settle" such standing orders after he has consulted all the interests concerned in the industry. Appeal against the orders of the Commissioner of Labour lies with the Industrial Court constituted under the Act.

In accordance with these provisions, the Commissioner of Labour, Bombay, settled the Standing Orders for Cotton mill operatives in Bombay, Ahmedabad, Sholapur and other centres in the Province of Bombay in September and October 1939. Appeals against most of these Orders were filed with the Industrial Court both by individual employers and associations of employers and by Trade Unions and individual workers. These appeals were heard by the Industrial Court in November 1939 and the Court, after hearing the parties, settled a new set of Standing Orders which it directed should come into force on and from 12th December 1939. Copies of these Standing Orders can be obtained from the Secretary, The Industrial Court, High Court, Bombay. Since the beginning of 1940 many employers all over India have drawn up Standing Orders for their operatives on the lines laid down by the Industrial Court, Bombay.

In pursuance of a resolution adopted on the subject at the Second Session of the Tripartite Conference held at New Delhi on the 6th and 7th September, 1943, the Government of India have addressed all Provincial Governments on the desirability of all industrial concerns in India employing 250 persons or more to draw up standing orders for their operatives on the lines laid down in Section 26 of the Bombay Industrial Disputes Act, 1938. In accordance with these instructions, the Indian Jute Mills' Association and the Employers' Association of Northern India have drawn up Draft Standing Orders for adoption in their member Mills.

## SUPERANNUATION BENEFITS AND FINANCIAL AID.

The subjects which we deal with under this section are pensions, gratuities, profit sharing, provident funds, co-operative societies, grain and cloth shops, advances and loans.

**Pensions.**—All monthly and time-rated workmen in the industrial establishments of Government are entitled to pensions on retirement provided that a minimum of nine years' service has been put in. The amount of the pension due is arrived at by multiplying the average monthly pay for the three years preceding retirement by the actual period of active service less one year and dividing the product by 48. Where permanent monthly paid workers on piece rates are admitted, the average monthly pay is arrived at on the basis of the earnings for 72 months and the divisor in the above formula is 72. Commutation up to 50 per cent. of the amount of the monthly pension is permitted in certain cases. Outside Government concerns, pensions on retirement are almost non-existent although many concerns give small pensions to old employees who have put in long periods of trusted and faithful service but these are mostly *ex gratia* and cannot be claimed as of right. The Government of Bengal have under contemplation the introduction of a system of pensions for jute mill workers.

**Gratuities.**—All railway employees and the employees of local and public bodies and a few of the larger public companies receive gratuities on retirement. Gratuities are also paid to non-pensionable workers who have put in not less

than thirty years' service in Government concerns. In all cases specified periods of qualifying service have to be put in before gratuities can be earned. The rules of individual administrations vary widely but the most generally accepted principle is half a month's pay for each year of service limited to fifteen months' pay in all. Permanent Government servants who have put in less than nine years' active service are entitled to gratuity if they are compelled to retire on medical certificate. A few large industrial establishments in India such as Messrs. Lever Bros. (India), Ltd. and others have started Retirement Benefit schemes where an account is opened for every individual worker to which a fortnight's or 13 days' pay is credited every year: interest is allowed and the amount standing at a worker's credit is paid to him on retirement. The Tata Iron and Steel Company has instituted a gratuity scheme under which every permanent employee who has put in 20 years' service and whose salary does not exceed Rs. 500 per month is eligible for gratuity equal to half a month's pay for every completed year of service subject to a maximum of 12 months' pay. In certain specified cases, employees with less than 20 years' service also become eligible for gratuity.

*Provident Funds.*—These are of two kinds: (1) contributory, where both the employer and the employee subscribe to them; and (2) non-contributory, where the employee alone subscribes to them. The Provident Fund Rules of different Provincial Governments in India are by no means uniform. The Government of Bombay, by a notification dated 20th March 1941, made it compulsory for all Government Servants in receipt of a monthly income of Rs. 50 per month who joined Government service before that date or of Rs. 25 per month who joined after that date to subscribe to the Government Provident Fund. Pensionable Government servants can only join the non-contributory section of the Fund. State Railways and Ordnance factories have their own rules. Whereas it is obligatory for most categories of permanent non-workshop railway staffs with monthly pay over specified limits to join the provident fund, workshop employees with monthly and daily rates over specified limits are permitted to exercise an option. Once the option to join has been exercised, no withdrawal is permitted.

Compulsory contributory schemes are provided for all permanent workmen in the factories owned by certain public bodies such as the Bombay Port Trust; whilst both compulsory and optional non-contributory and contributory schemes obtain for permanent workmen in the factories owned by most municipalities. Most of the larger public utility companies and corporations such as the Tata electricity generating and distributing plants, the Bombay Electric Supply and Tramways Company, Ltd., and the Burma-Shell Corporation, to mention only a few of many, provide contributory schemes for the benefit of the majority of their workmen. Several others have schemes for their supervisory and clerical establishments but not for their workmen. The most usual amount of deduction from pay is one-twelfth of the monthly pay but the amount contributed by employers varies from 50 per cent. to 100 per cent. of the amount put in by the employee. The rate of interest may be fixed

or it may fluctuate with the rate at which Government or the employer borrows money. All provident fund rules make provision for loans to subscribers from the balances standing at the credit of their accounts in respect of their own subscriptions, and for the compulsory repayment of these loans. Subscribers are entitled to withdraw their own subscriptions at any time on retirement or on relinquishing their posts but the payment of that share of a contributory provident fund account which represents the employer's subscriptions depends on the putting in of specified periods of qualifying service—periods which show considerable variation.

The Government of India have drawn up a set of Model Rules for Provident Funds for industrial employees in India. These Rules were considered at the Fourth Meeting of the Standing Labour Committee of the Tripartite Conference held at Lucknow in January, 1944. The Central Government hope to release these Model Rules for publication in the near future.

*Profit Sharing.*—Profit sharing had so far been unknown in India but some go ahead concerns are adopting this in their plants. The Tata Iron and Steel Company has adopted a scheme which provides that when the amount paid to the shareholders as dividend exceeds Rs. 1 crore during a financial year, every employee who had been in the continuous employ of the Company throughout the year is to receive a half month's pay, plus an additional half a month's pay for every 25 lakhs in excess of Rs. 1 crore paid as dividend.

*Co-operative Societies.*—The co-operative movement has made very rapid progress in industrial establishments all over India during recent years, and a very fair percentage of concerns employing 500 or more workers have co-operative credit societies for their employees. Almost all railway systems in India have co-operative banks and savings banks in addition to credit societies and full information on the whole subject is available in the different annual administration reports of Registrars of Co-operative Societies in the various provinces.

*Cheap Grain and Cloth Shops.*—Employers' grain and cloth shops were very common in India during the period of the first world war, but with the subsequent fall in prices, the majority of these shops disappeared. Truck legislation in England was primarily aimed at Employers' shops (known as "Tommy Shops") purchase at which was compulsory and where fantastically high prices were charged. The Payment of Wages Act, 1936, prohibits employers from making deductions from wages or from receiving payments from their employees for purchases from employers' shops. Most Provincial Governments in India had, however, notified cheap grain and cloth shops as "amenities" in respect of purchases from which employers may make deductions from wages. In all such cases both the qualities of the articles sold in such shops and the prices charged for them are controlled by a "prescribed authority" who is generally the Chief Inspector of Factories. As a result of the outbreak of the Second World War, all Provincial Governments in India have not only notified cheap grain and cloth shops as "amenities" for the purposes of the Payment of Wages Act but have opened

such shops of their own and have also encouraged employers to do likewise. The articles sold at these shops are bought at wholesale prices and are sold without any profit except for a small addition to cover working expenses of the shops. The only statistics available with regard to grain shops established by employers in India for the benefit of their employees are those contained in the excellent Annual Reviews published by The Millowners' Association, Bombay, of the Labour Situation in the Bombay Cotton Mill Industry. With the introduction of Rationing of certain food grains in Bombay in May, 1943 and with the extension of rationing to other cities and areas in India, arrangements have been made between Government Rationing Departments and large employers of labour for the establishment of Government controlled grain shops in hundreds of industrial plants in the country. Sales from these shops are largely on credit, recoveries being effected from pay. Today (July, 1945) it may be safely asserted that almost every large employer and labour employing organization in India has provided a cheap grain shop for its workers.

**Loans and Advances.**—Speaking generally most industrial concerns in India do not grant loans to their workers except during periods of an acute shortage of labour when recruiting agents are empowered to liquidate debts in order to attract the required workers to join industry. But, all workers who subscribe to provident fund schemes in such concerns as have them or who are members of co-operative credit societies can secure loans on easy terms both as to interest and to repayment. A few concerns, however, have set apart special funds for the purpose. 'Advances'—applying the term to the small sums of money advanced against earned wages—on the other hand, are more widely prevalent. The Payment of Wages Act empowers Provincial Governments to frame rules for the regulation of these advances but no interest on such advances is now permitted.

## INDUSTRIAL SAFETY.

As in other countries, the industrial progress of India has been accompanied by an alarming increase in the number of industrial accidents. The explanation generally offered for the increase is that the Workmen's Compensation Act is operating as an inducement both for workpeople and for employers to report accidents more frequently than in the past. But, the increase in the number of serious accidents suggests that the problem is a more serious one; and, that in spite of the statutory requirements which factory and mine owners and firms engaged in the loading and unloading of ships have to comply with in the matter of the fencing of dangerous machinery, an organised "safety-first" campaign for the better education of the workers in the matter of accident prevention is both necessary and desirable. All railways in India have undertaken extensive schemes of safety-first propaganda including the putting up of safety posters and safeguards both in English and in the vernaculars at all prominent points and places; the free issue of illustrated booklets on accident prevention; publication of special articles with photographs in railway magazines; addresses and magic-lantern lectures; and the organisation of special

safety-first committees in the larger workshops. The Millowners' Association, Bombay, has done a considerable amount of good work of a pioneering character in connection with Safety-First measures. In conjunction with the Factory Department and the Bombay Millowners' Mutual Insurance Association it has posted attractive safety-first posters in all cotton mills in Bombay City. In conjunction with the St. John's Ambulance Association it started classes in 1931 for first aid training. These are attended by large numbers of workers from many cotton mills in the city. Working in conjunction with the Safety-first Association of India, the Association drew up a Safety Code for the Cotton Textile Industry and this Code was published and put into operation from August 1940. In co-operation with the Labour Welfare Department of the Government of Bombay and the officials of the Khatau Makanji Mills, a safety film for the textile industry was prepared and this has been exhibited in the various Government welfare centres and in some mills in Bombay. The Safety-first Association is conducting special courses to train persons in Air Raid Precaution. In the Central Provinces and Berar fire drills are being systematically carried out in many large concerns. Many large labour employing organisations such as His Majesty's Indian Naval Dockyard, the Calcutta and the Bombay Port Trusts and The Tata Iron and Steel Works at Jamshedpur, to mention only a few, are with railways, pioneers in the field of organisation of 'safety-first' measures. It is of interest to note that most cotton mills in Ahmedabad had also established safety-first committees by the end of the year 1939. Factory Departments in all Provinces in India do all they possibly can in improving safety measures in factories. Since the beginning of the present war special attention has been paid to ordnance works consequent on the employment of workers not ordinarily used to machine shop hazards.

The provisions contained in the Indian Factories and Mines Acts and in the Indian Dock Labourers Act, 1934, and the rules made under these Acts in connection with the guarding and fencing of machinery are of a too technical character to be dealt with here. It may, however, be of interest if a brief summary were given in connection with the reporting of accidents. The Indian Factories Act requires the manager to report all accidents which cause death or bodily injury whereby the person injured is prevented from returning to his work in the factory during the 48 hours next after the occurrence of the accident. All classes of accidents namely, fatal, serious (i.e., accidents which prevent a person returning to work for 21 days or more) and minor are to be reported to the Inspector of Factories and to the District Magistrate and in cases of any accident resulting in death to the officer in charge of the police station in addition. It is the duty of the Inspector of Factories to make an investigation as soon as possible into the causes of and the responsibility for a fatal or serious accident, and to take steps for the prosecution of the person concerned if it is found that the death or serious injury resulted from any infringement of the provisions of the Act or of the rules framed under the Act. The Act also requires notice to be given of an accident which is due to any cause that has

been notified in this behalf by a Provincial Government, even though no injury may have resulted therefrom to any person. The provisions contained in the Indian Mines Act with regard to the reporting of accidents are somewhat similar to those contained in the Factories Act but with the difference that every accident which occurs in a mine has to be recorded in a special register to be kept for the purpose. Section 32 (b) of the Factories Act, 1934 makes it obligatory on all factory owners to maintain stores of first aid appliances and to provide for their custody in accordance with rules to be framed by Provincial Governments in the matter.

As far as the statistics of accidents in factories are concerned, a table published at page 298 of the May, 1944 issue of the *Indian Labour Gazette* shows that the number of recorded accidents increased from 48,736 in 1941 to 54,174 in 1942. Fatal accidents rose from 271 in 1941 to 323 in 1942 and serious accidents from 8,374 to 9,111 over the same period. The remaining accidents were minor. The average number of accidents per 100,000 operatives employed was 2,374 in 1942 as against 2,260 in the previous year. The increase has been variously attributed to better reporting, big expansion in industrial activity especially in the production of munitions of war, longer working hours with the attendant fatigue and longer exposure to risk and employment of persons unused to the hazards of their work. It is of interest to observe that detailed inquiries made by the Factories Department of the Province of Bombay into the causes of accidents have shown that although the "rates for all accidents have varied considerably in the textile industry, the serious accident rate due to purely textile machinery has remained approximately constant for the last ten years: also that the increase in the rate for this industry has been mainly through minor accidents not due to machinery but to causes largely within the control of the workers themselves. Similar remarks could be made with regard to the engineering industry in which accident rates generally are much higher than in the textile. The number of accidents in factories in British India during 1943 was as follows:—

Fatal	..	..	..	..	..	361
Serious	..	..	..	..	..	10,016
Minor	..	..	..	..	..	48,799

## HOUSING AND FACTORY AMENITIES.

The general policy adopted by Government in providing quarters for the labour employed in their industrial establishments is to do so when funds permit but usually only where conditions are such that private enterprise does not adequately meet the demand for housing, or where it is necessary for special reasons to provide quarters for certain classes of staff near to their work places. These principles appear to be generally followed by private companies and concerns as well, especially by coal mine owners in Bihar and Orissa, sugarcane growers and by tea planters in Assam. All the collieries in the Jharia coalfield are amply and efficiently equipped with approved types of houses whose design, construction, ventilation

and general amenities are controlled by the Jharia Mines Board of Health. Every house in the coalfields has to be licensed and licenses are not granted unless the standards are complied with. If labourers are found in occupation of unlicensed houses the management is liable to prosecution. In Assam, all residential employees on tea estates are provided with rent-free quarters in barracks or 'lines' as they are called. These are regularly inspected by district and sub-divisional officers and every endeavour is made to maintain as high a degree of sanitation as is possible. Almost all sugar factories provide housing for their employees because the factories are located near large sugarcane plantations. Large slum clearance programmes have been drawn up by Municipalities and Improvement Trusts in almost all the larger towns and cities in India and much useful work has been done in the last eight years by acquisition and demolition.

The pioneer work in the field of industrial housing has been done by the railways which have spent nearly 50 crores of rupees to date in providing adequate residential quarters for different classes of their employees, and by the Government of Bombay who have built 207 chawls with nearly 17,000 tenements for industrial labour in Bombay City. The latter is a part of a gigantic scheme launched in 1920 by the late Lord Lloyd, then Governor of Bombay, for the construction of 625 chawls having 50,000 tenements in all. The rents of the tenements in these chawls vary from Rs. 5 to Rs. 8 per month. The chawls are situated at Naigaum, Worli, Sewri and at DeLisle Road. The Municipalities of Calcutta, Bombay, Cawnpore, Madras and Karachi, the Calcutta and Bombay Port Trusts and the Improvement Trust in Bombay have done much to house their own labour and also to supply low-rented tenements for other classes of industrial workers. Perhaps the most magnificent schemes of industrial housing conceived in India by private employers are those launched by the Tata Iron and Steel Company Ltd. at Jamshedpur and by the Empress Mills under the agency of Messrs. Tata Sons Limited at Nagpur. The Tata Iron and Steel Company has laid out the town of Jamshedpur on Garden City lines, and had, up to June, 1945 constructed 8,428 houses of different types for its employees, and has now a further extensive programme of housing construction in hand as soon as the difficult conditions created by the war are removed. The plans provide for the building of 5,000 quarters during the next five years. The capital cost of town buildings put up by the Company up to 31st March 1945 was about Rs. 143 lakhs. The Company has furnished all quarters carrying a rent of Rs. 15 a month and above with electric lights and fans and the work of electrification of the lowest rented quarters is in hand. The Company grants loans on liberal terms to its employees for building houses on land leased to them. In 1923, the Empress Mills, Nagpur, obtained from the Government on lease for 27 years extensive land in a locality known as Indora and constructed a Model Village with up-to-date sanitary and other conveniences for its operatives where each worker could own or rent a cottage for himself. Two sizes of plots each measuring 53' x 36' and 53' x 45' are allotted

and not more than one-third of the area is allowed to be built upon. Two types of model houses have been built by the mills, houses on the smaller plots costing about Rs. 960 each and those on the larger plots Rs. 1,500 each, on valuations and cost of construction before the war. Most houses are provided with their own flushed latrines and water taps are laid on in all the houses. Some of the houses built by the Mills have been sold to the workers who pay the cost by easy instalments covering a period of 5 to 7 years while some have been rented to them. Many houses have been built by the workers themselves on plots of land sub-leased to them with moneys advanced to them on easy terms. A large number of houses have their own gardens and a big garden has been provided in the middle of the Settlement. The settlement has been provided with good roads, street lights and playgrounds which are equipped with swings, shoots, etc., for children. Many of the jute mills in Bengal and cotton mills in Bombay City and other centres have provided housing for fair percentages of their total staffs but the majority of textile workers in India are not housed by their employers.

It is of interest to observe that the Government of India, following the recommendation made by the Royal Commission on Indian Labour in the matter, amended the Land Acquisition Act in such a way as to enable owners of industrial concerns to acquire land for the erection of workers' dwellings.

Epidemics of cholera which invariably cause large numbers of deaths have been found to originate in congregations of labourers employed in canal areas in connection with the crushing, etc., of sugar-cane. Labourers' housing conditions in these areas including those of some sugar factories are incompatible with decent sanitation. The temporary huts often consist of brush-wood, thatch or bamboo matting without any plinth, and with no windows or other means of ventilation except one small opening which serves as a door. Inside the huts no person can stand upright. Often no adequate provision is made for supply of drinking water. Too frequently, it is obtained from the nearest nulla or irrigation channel or stagnant pool of percolation water, all of which sources are normally polluted by human and animal excreta and by manures from crops which are washed down into the water. Latrines are seldom provided, and the banks of irrigation channels and of other water-supplies are resorted to for the purposes of nature. It is obvious that such conditions afford an ideal field for the rapid extension of cholera and similar diseases in epidemic form. The Government of Bombay, finding it desirable to take powers to control such labour housing and sanitation in areas outside municipal and cantonment limits, and to make orders which would ensure that employers of labour provide reasonable sanitary conditions and open provisions shops for their labour in such areas enacted the Bombay Non-urban Labour Housing Sanitation and Provision Shops Act, 1944 in the month of April, 1944.

Under the above Act, Government have the power to make regulations in respect of any non-municipal or non-cantonment area or any

employer in respect of the following matters: (1) the provision of plinths for and adequate ventilation and lighting in quarters; (2) provision of adequate open spaces; (3) prevention of overcrowding; (4) prescription of adequate floor area per person; (5) provision of proper drainage and sanitation; (6) adequate supply of water; (7) provision of grain and grocery shops; (8) lighting; (9) medical aid; (10) prevention of fouling of water-supplies; and (11) segregation of infected persons. Controlling Officers, to be appointed by Govt., who have been given wide powers to call upon employers to carry out such matters as they may order, will be responsible for the administration of the Act.

**Rest Shelters, Dining Rooms and Canteens.**—Section 33 (1) of the Indian Factories Act, 1934, makes it obligatory for all factories employing more than 150 workers to provide adequate shelters for the use of workers during periods of rest. Apart from this almost all large industrial establishments in India did provide tiffin rooms and rest shelters for their workmen. Most concerns had also permitted the establishment of tea stalls on the premises but apart from this, little effort had been made to run co-operative canteens on the lines of those which are associated with most of the large factories in the West. Pioneer work in this direction had been done by Messrs. E. D. Sassoon & Co. in Bombay. This Company had established large canteens in all their mills. The management in each case bore the salaries of staff and the on-cost for equipment; and hot meals were supplied to the workmen at actual cost. The Company had also established a hostel for boarding and lodging its poor women workers.

In May, 1939, the Millowners' Association, Bombay, recommended to all its member mills that they should establish canteens with the help of the Indian Tea Market Expansion Board. The suggestion was adopted by a number of mills and permission to make deductions from the wages of workers on account of canteen coupons sold to them was granted by the Chief Inspector of Factories, Bombay, on the understanding that the canteens were run on a non-profit basis. A large number of mills in Bombay have started such canteens and substantial surpluses are being built up especially in those mills where no rents or interest on loans are charged. The Association decided that after certain charges for depreciation and reasonable rent had been met, the surpluses realised should be spent for general welfare work, e.g., provision of milk and biscuits for children in creches, installation of cold drinking water facilities in the departments, health exhibitions, recreation, club equipment including books, journals, a radio set, etc. The Tata Iron and Steel Company maintain a number of restaurants inside their works at Jamshedpur which ensure wholesome meals and refreshments to the workmen at cost price. The Company has its own plant for the manufacture of ice and soda which are provided free of charge to the employees in the works. A women's Rest House has also been provided where women employees can wash and change and leave their babies to be looked after in their absence, these babies being served with milk and biscuits free of charge. Communal factors such as the religious prohibition of Hindus to eat their food

times at which they are open. The scope of the work in the "A" type centres is of a very comprehensive character and covers almost all forms of outdoor and indoor recreational activities; periodic cinema and dramatic performances and bhajan parties; the running of libraries, and reading rooms; the organization of debates, magic lanterns and other lectures and many types of educational classes; the provision of nursery schools, medical aid and advice on maternity and health; radios and add-a-grams, etc. These centres are open from 8-30 to 11 in the mornings and from 5 to 9-30 in the evenings for men and boys and from 1 to 5 in the afternoons for women and girls but the nursery school section supervised by a full-time lady teacher is open at each "A" type centre from 9-30 a.m. to 5 p.m. The "C" type centres are open from 7-30 to 10-30 a.m. and from 6 to 9 p.m. for men and boys and literacy and sewing classes and indoor games for women are conducted from 1 to 4 p.m. Boys under 16 years of age are debarred from attending at any of the centres after 7 p.m. The activities in the "C" type centres mainly cover indoor recreation and reading rooms. The "D" type centres only cover outdoor recreation. The Municipality of Bombay has placed several open spaces in Bombay City at the disposal of Government for this purpose.

An "A" type centre was erected at DeLisle Road out of the contribution of Rs. 15,000 given to Government by Mr. Ramnath Podar and this started functioning in March 1939. Two additional full fledged "A" type centres were started at Worli and Nalgam with effect from 1st June 1940. At the moment of writing (June 1945) there are three "A" type centres in Bombay and one in Ahmedabad. One is in the process of completion at Sholapur. There are eight "C" type centres in Bombay, four at Ahmedabad, five at Sholapur and one at Hubli and there are four "D" type centres in Bombay. Plans for Post-War Planning and Reconstruction in the Province of Bombay provide for 3 "B" type and 6 more "C" type centres for Bombay; one additional "A" type and six more "C" type centres for Ahmedabad; one additional "A" type and 3 more "C" type centres for Sholapur; and the establishment of one "B" type centre each at Viramgaum, Broach, Surat, Jalgaon, Nadiad, Amalner, Dhulla, Barsi and Hubli.

The Industrial Welfare Scheme of the Government of Bombay also covers an Industrial Training Workshop at Ahmedabad which was established to impart instruction in elementary engineering work to apprentices. The primary aim of the workshop is to afford help in solving the problem of industrial unemployment. It is also intended to raise the standard of skill and efficiency of operatives in the cotton textile industry. A sum of Rs. 65,000 was earmarked in the budget estimates for the year 1941-42 from the Development Fund for the purchase of machinery for the workshop at Ahmedabad, for constructional alterations in the existing "A" type centres and for starting circulating libraries. Storeys have been put up at the three "A" type centres in Bombay and these have also been supplied with water taps and shower baths. Circulating libraries have been established in

Bombay, Ahmedabad, Sholapur and Hubli. The books are circulated in such a way that they reach all mohallas (localities) consisting of ten or more chawls. Each Mohalla has a Committee of 5 or 6 members and the Anti-Drink Propaganda Inspector, where one exists, acts as the Secretary of the Committee. Social welfare institutions and well organized labour unions are also to be used as agencies for circulating the books.

Until about the end of the year 1941, the whole of the Labour Welfare Department of the Government of Bombay was under the control and direction of Mr. Gulzari Lal Nanda under the designation of Honorary Commissioner for Amenities to Industrial Labour. Consequent on his resignation, the control of this Department was transferred to the Commissioner of Labour with effect from 15th December 1941, and again from the Commissioner of Labour to the Labour Officer, Bombay, with effect from the date on which Mr. N. A. Mehrban, M.B.E., F.S.S., J.P., was appointed to this post, i.e., the 29th January 1943.

Following the lead given by the Government of Bombay in the field of Labour Welfare, the Governments of the United Provinces and Bengal have also decided to expand their activities in this field. In January 1943, the Government of the United Provinces decided to establish 24 Labour Welfare Centres in all in the Province distributed as follows: Cawnpore—three "A", four "B" and six "C" type centres; Agra—one "A" type centre; Bareilly, Firozabad, Hathras and Saharanpur—one "B" and one "C" type centre each; and Aligarh and Mirzapore—one "B" type centre each. Since then one more "C" type centre has been started at Aligarh and a "B" type centre at Lucknow. The activities at the "A" type centres cover outdoor and indoor recreation, medical aid, child welfare, adult education and welfare of women. The "B" type centres cover all the activities of the "A" type centres but on a smaller scale. The "C" type centres are intended to be in the nature of working men's clubs and as "feeder" centres to the "A" and "B" type centres. The manner in which Provincial Governments in India are recognising the value of welfare work for the working classes can be better appreciated from the fact that the Government of the United Provinces decided to put its Labour Welfare Department on a permanent footing with effect from 1st April 1944. The total number of Labour Welfare Centres opened by the Government of Bengal in the industrial areas of Calcutta, Burdwan, Midnapore and Dacca was 41 in May 1945. Almost all these centres have had radio sets installed in them. Local Advisory Committees have been established to assist the Labour Department with the work of administration of the centres.

The Government of India have set up a Welfare Committee with Sir B. Rama Rao as Chairman, for the purpose of improving the welfare and amenities for Indian seamen at Bombay. A similar Committee has also been appointed for looking after the welfare of British and Allied seamen. Under the auspices of the Bureau of Research and Publications of the Tata Institute of Social Sciences, Bombay,

a research project was undertaken during the summer months of 1944 on 'Labour Welfare in Indian Industries'. Personal visits were paid to big industrial centres in India to see what welfare work was actually being done and

material of the programme of welfare activities carried on in different parts of India was collected. The Institute proposes to publish the findings along with constructive suggestions for the promotion of labour welfare.

## COST OF LIVING AND STANDARD OF LIFE

### COST OF LIVING.

Bombay was the first Province in India to complete and publish a price series intended for measuring changes in the cost of living. A monthly cost of living index number for working classes in Bombay City compiled on the aggregate consumption method and with July 1914 as the base period was regularly published in the *Bombay Labour Gazette* from September 1921 to June 1937 when this series was replaced by another. The scope and the method of the compilation of the old index were described in the issues of the *Labour Gazette* for September 1921, September 1923 and April 1929. A table giving the figures from that index for the months of January, April, July and October in each year from 1918 to 1936 and for the months of January and April 1937 was given at page 572 of the 1941-42 edition of this publication. These figures are now of purely historical interest but it would be useful to reproduce the annual averages for the years 1918 to 1936 in order to show the general trend of prices: 1918—154; 1919—175; 1920—183; 1921—173; 1922—164; 1923—154; 1924—157; 1925 and 1926—155; 1927—154; 1928—147; 1929—149; 1930—137; 1931—110; 1932—109; 1933—103; 1934—97; 1935—101; and 1936—102.

The old Bombay Cost of Living Index series was considered to be somewhat defective as the weights used for its compilation were not based on any family budget enquiry. The Labour Office of the Government of Bombay, therefore, conducted a comprehensive family budget inquiry in Bombay City between Sept. 1932 and June 1933 and taking the weights based on the results of that inquiry it compiled a new cost of living index series on the price relative method with the average prices for the year ended June 1934 equated to 100. A full note on the method used in the compilation of this index number has been given at pages 370-72 of the issue of the *Labour Gazette* for January 1940. This new index was made as comprehensive as possible by expanding the list of commodities covered and by adding a new group for "miscellaneous expenditure" which did not find a place in the old index. The method of compilation of the index number for the cereals sub-groups was readjusted with effect from the index for the month ending 15th May 1943 owing to rationing of certain cereals like *jowar* and *patni* and owing to difficulties in securing continuity of prices for the particular qualities included in the index. The annual averages of the index numbers in the new series for the years 1934 to 1944 were as follows: 1934 (six months)—99; 1935—100; 1936—101; 1937—106; 1938—106; 1939—106; 1940—121; 1941—122; 1942—157; 1943—229 and 1944—136. As this is the most

important cost of living index series compiled in India we are reproducing in the table below the monthly movement of the index since January 1910.

### *Bombay Cost of Living Index.* (1933-34—100.)

Month.*	1940.	1941.	1942.	1943.	1944.	1945.
January ..	114	117	137	203	238	229
February ..	112	119	135	205	230	229
March ..	110	119	137	208	226	225
April ..	110	121	138	225	231	226
May ..	111	122	142	227	235	230
June ..	111	122	152	232	236	235
July ..	113	126	168	235	241	240
August ..	114	131	168	230	250	243
September ..	112	129	170	238	239	240
October ..	113	125	172	245	239	242
November ..	113	126	178	248	242	242
December ..	116	129	188	247	236	242

\* The figures for June 1943 and onwards are for the calendar month. Prior to that they are for the month ending on the 15th in each month.

In addition to the cost of living index series which the Labour Office of the Government of Bombay compiles for working classes in Bombay City, it also compiles similar cost of living index series for three other centres in the Province of Bombay: (1) Ahmedabad; (2) Sholapur; and (3) Jalgaon. Those for Ahmedabad and Sholapur are published regularly in the *Labour Gazette* along with that for Bombay City. The average prices for the year ended July 1927 have been adopted as the basis for the Ahmedabad series while the one for Sholapur is based on the average prices for the year ended January 1928. Details regarding the scope and the method of compilation of the Ahmedabad and Sholapur series have been published in the issues of the *Labour Gazette* for January 1930 and for February 1931 respectively. The introduction of price control and rationing have necessitated changes in the compilation of the group index figures for cereals and pulses in a similar way to that adopted for the cost of living index figure for Bombay.

Other Provinces in India which compile cost of living index series for working classes are Madras, the Central Provinces and Berar, the United Provinces, Bihar, the Punjab and Orissa. Mysore was the first Indian State to start the

compilation of a cost of Living Index for the City of Bangalore in 1942. The Government of Madras compiles nine series in all: one for Madras City with the average prices for the year ended June 1936 equated to 100 and eight other series for low paid employees at Vizagapatam, Ellore, Bellary, Cuddalore, Coimbatore, Madura, Trichinopoly and Calicut with the average prices for the twelve months from July 1935 to June 1936 as base. The Government of the Central Provinces and Berar compiles two series for Nagpur and Jubbulpore with prices in January 1927 as base and six other series for Mofussil textile centres in the Province. Since April 1942 the base period for the indexes for Nagpur and Jubbulpore has been changed to August 1939. In the United Provinces, one series with August 1939 as the base is compiled for working classes in Cawnpore and five other series with prices at 31st July 1939 equal to 100 are specially compiled for low paid Government employees at Lucknow, Benares, Bareilly, Meerut and Gorakhpur.

The Government of Bihar compiles cost of living index numbers with the average prices for the five years ending December 1914 as the base for the following six centres in the Province: Patna, Muzaffarpur, Monghyr, Jamshedpur, Jharia and Ranchi. Average prices for five years are also the base for cost of living indexes for Lahore, Sialkot, Multan, Ludhiana and Roh-tak in the Punjab but the base period in the Punjab is the quinquennium ending December 1935. The Government of Orissa compiles a cost of living series for its headquarters town of Cuttack on the same method and base as those adopted by the Government of Bihar and another with average prices during the year 1939-40 as base, for Berhampur.

Owing to the variations in the method of compilation of these indices, they are not strictly comparable but the table below shows the movement of cost of living index numbers in selected centres for the year 1945 with August 1939 as the base:—

1945.	Bombay.				United Provinces.	Central Province.		Punjab.	Madras.
	Bombay.	Ahmedabad.	Sholapur.	Jalgaon.	Cawnpore.	Nagpur.	Jubbulpore.	Lahore.	Madras.
January ..	218	282	273	282	301	249	287	283	217
February ..	218	267	267	288	301	249	282	285	230
March ..	214	256	267	281	302	247	281	303	229
April ..	215	256	266	277	311	248	277	302	224
May ..	219	262	268	282	294	252	275	292	227
June ..	224	263	271	293	302	257	282	291	227
July ..	229	267	275	304	307	262	286	290	227
August ..	231	275	286	303	315	263	286	293	229
September ..	229	281	284	293	320	272	287	279	231
October ..	230	297	284	293	318	269	282	284	230
November ..	230	277	282	294	317	270	284	291	230
December ..	230	281	279	301	310	272	286	293	229

The Royal Commission on Indian Labour had commented on the unsatisfactory character of the cost of living index numbers published in India and the Rau Court of Enquiry were also greatly handicapped in their investigations owing to the paucity of reliable data in regard to the cost of living index numbers for industrial workers. The Government of India, therefore, in consultation with the Provincial Governments, decided to launch upon an All-India Scheme for the preparation and maintenance of working class cost of living index numbers for selected centres in British India. This

scheme was started in the year 1942 and is now nearing completion. Over 25,000 family budgets have been collected in some 28 selected centres in British India. The data collected in the course of this investigation have now been tabulated and it is expected that the Family Budget Reports for all these centres will shortly be ready. It is further understood that, after receiving the approval of the Provincial Governments, the Government of India will publish cost of living index numbers for all these centres on base January to December 1944 equal to 100.

## STANDARD OF LIFE.

The results of family budget enquiries conducted by what is known as the 'extensive method' from the most satisfactory basis of determining the standard of life of any particular class or community. A higher standard of life means better opportunities to satiate wants and desires other than the primary human needs. A larger percentage expenditure on clothing, housing and miscellaneous items such as education, recreation, etc., is therefore a sure indication of an improved standard of living. The Bombay Labour Office carried out two family budget enquiries for working classes in Bombay City, one in 1921-22 and the other in 1932-33 and the results were published in the years 1923 and 1935 respectively. As has already been mentioned,

similar enquiries have also been conducted in Ahmedabad and Sholapur cities and the results of both these enquiries were published in the year 1923. In Burma, the Labour Statistics Bureau, Rangoon, published in the same year the results of an extensive enquiry conducted by the Bureau into the standard and cost of living of four different classes of industrial workers in Rangoon. In Madras, the Director of Industries published in 1933 the results of an inquiry into the family budgets of industrial workers in organized and unorganized industries in Madras City conducted under the direction of the Commissioner of Labour. A number of family budgets were also collected at Cawnpore in the United Provinces and at Nagpur and Jubbulpore in the Central Provinces with the object of compiling cost of living indexes.

The following comparative data regarding the distribution of expenditure will serve to indicate the standards of life of working classes at certain different centres in India in the years given in brackets below each centre :—

## Percentage Distribution of Expenditure.

Groups.	Bombay (1932-33).	Ahmedabad (1933-35).	Sholapur (1925).	Nagpur (1927).	Jubbulpore (1927).	Rangoon (1929).	Madras (1935).
Food .. ..	46.60	49.31	49.25	64.10	68.00	52.7	52.63
Fuel and light ..	7.11	6.65	9.60	9.62	7.95	5.2	6.67
Clothing .. ..	7.75	9.12	11.86	10.70	10.86	10.6	4.50
House rent .. ..	12.81	10.97	6.27	1.92	1.44	13.9	11.14
Miscellaneous ..	25.73	23.95	23.02	13.66	13.75	17.6	25.06
Total .. ..	100.00	100.00	100.00	100.00	100.00	100.0	100.00

NOTE.—The figures are not strictly comparable due to differences in the items included in the different groups. But they nevertheless serve to show the variations in the distribution of expenditure in a general way.

The standard of life is more often than not conditioned by the size of the family and its income. The following figures are of interest in this connection :—

—	Bombay.	Ahmedabad.	Sholapur.	Nagpur.	Jubbulpore.	Rangoon (Burmese).	Madras.
Average size (of the family in persons) ..	3.70	4.05	4.57	4.33	3.76	3.01	6.03
Average monthly income ..	Rs. a. p. 50 1 7	Rs. a. p. 46 5 0	Rs. a. p. 39 14 10	Rs. a. p. ..	Rs. a. p. ..	Rs. a. p. 58 8 3	Rs. a. p. 37 5 11

It will be seen that the 'miscellaneous' group of expenditure accounts for a comparatively large percentage of the expenditure of the average working class family. In this group is included such items as interest on loans and instalments of debts repaid. Delays in the receipt of earned wages lead to indebtedness of the worker in many cases. The Royal Commission on Labour made certain important recommendations with a view to lessening the burden of indebtedness of the worker and also to prevent its accumulation. The Payment of Wages Act, 1936, was intended to secure to the workmen prompter payments of earned wages so that they may not be put to the necessity of incurring or accumulating debts.

The Government of India have had under consideration certain other pieces of legislation which were also designed to improve the lot of the industrial worker. Following the recommendations of the Labour Commission, the Government of India have amended the Civil Procedure Code with a view to exempting salaries below a defined limit from attachment. Another recommendation of the Labour Commission was that at least so far as industrial workers in receipt of wages or salary amounting to less than Rs. 100 per month are concerned, arrest and imprisonment for debt should be abolished except when the debtor has been proved to be both able and unwilling to pay. The Government of India after consulting the provincial Governments decided to undertake legislation on the recommendation on an experimental scale restricted to the province of Delhi in the first instance. A third recommendation of the Whit-

ley Commission was made with a view to protect workers from harassment for debts. After consulting public opinion and the views of the various Provincial Governments on this question, the Government of India came to the conclusion that Central legislation on the subject was not called for. The Government of Bengal, at the suggestion of the Government of India, passed a Workmen's Protection Act in 1934 which makes besetting of industrial establishments for the purpose of collecting debts a criminal and cognizable offence. Some other provinces are also contemplating similar legislation. The Bombay Moneylenders' Bill introduced by a non-official member in the Bombay Legislative Council in March 1934 was an effort in this direction. But, unfortunately, the motion for the reference of the Bill to a Select Committee was lost.

## GROWTH OF THE TRADE UNION MOVEMENT IN INDIA

The earliest known trade unions in India were (1) the Bombay Millhands' Association, a loose organisation formed in 1890 for the purpose of memorialising Government for improvements in factory law and which soon became moribund after the passing of the 1891 Act; (2) the Amalgamated Society of Railway Servants of India and Burma formed in 1897 by Anglo-Indians and Domiciled Europeans employed on railways, more as a friendly society than a combination for securing concessions; (3) a Printers' Union started in Calcutta in 1905; and (4) the Bombay Postal Union which was formed in 1907. The Kamgar Hitwardhak Sabha, Bombay, which came into existence in 1910, was a body of social workers who were interested in questions connected with the general welfare of labour and was an association rather for the workers than of the workers. Apart from the cases cited, the trade union movement, as this is known in the West, did not begin in India till almost after the end of the first World War.

The decade following the end of that War witnessed rapid developments in the field of trade unionism in India, but it must be regretfully admitted that even today organised association of the workers in the country is far below the stage of development which it has reached in Great Britain and in many other countries of the world. The reason for this can be put in a nutshell: lack of a will to organize as far as the workers are concerned and the absence of efficient leadership. Some labour leaders were men who had the good and welfare of labour genuinely at heart. But quite a few went into the movement merely for the opportunities which it would give them for coming into the limelight. Whereas the former went about affairs with a measure of considered moderation, the latter were mere propagandists and mischief-makers who strung together all kinds of impossible and preposterous demands in the hope that by doing so they would transport Indian

Industrial labour at once into an Arcadia. Both these types of leaders together with some of the more intelligent of the workers at first constituted themselves into strike committees. Many of these committees secured a considerable measure of success in so far as concessions in wage rates were concerned; but, whereas most of them fell into a state of inanition on the conclusion of a dispute, a good few of them, emboldened with the success they had met with, set themselves to the task of creating permanent associations or trade unions of the workers. These were the beginnings of the trade union movement in India, and within a period of five years (1919 to 1923) scores of unions were formed in all parts of the country. As there are no official records to show the names of and the memberships claimed by these earlier bodies, nothing definite can be stated with regard either to their number or to their total membership; but it can be safely asserted that the movement had made a fair penetration on the railways, in postal and telegraph departments, among seamen and in the textile industry in Ahmedabad City, and in some other centres.

The pressing need for a co-ordination of the activities of the individual unions was recognised at a very early stage of the movement and both central and provincial federations were formed. A central organisation at the apex was also necessary because only such a body could make recommendations with regard to the personnel of the labour representation on Indian delegations to the Annual Sessions of the International Labour Conference. Thus, the All-India Trade Union Congress was formed in 1920 on a national basis. The Central Labour Board, Bombay, and the Bengal Trades Union Federation were formed in 1922. The All-India Railwaymen's Federation, co-ordinating all unions of railwaymen on an industrial basis, was formed in the same year and this was closely followed by the creation of both provincial and

whole of the blame for this unwarranted strike to the Bombay Girni Kamgar Union. The publication of this report and the effects of the 1929 strike dealt a blow to the trade union movement from which it took ten years to recover.

The communists made a successful attempt in 1929 either to capture or to break the All-India Trade Union Congress. They affiliated the Bombay Girni Kamgar Union with a membership of 54,000 and the G.I.P. Railway Workers' Union with a membership of 41,000 to that body during the year and with the assistance of the voting strength which these two unions together with some of their other unions gave them, they captured both the Congress and its Executive Committee at The Tenth Session of the Congress which was held in Nagpur in that year. Resolutions were adopted favouring the affiliation of the Congress to international communist organisations and for the boycott of the Royal Commission on Indian Labour, the International Labour Conference and the Round Table Conferences on Indian Reforms. Moderate trade unionists under the leadership of Mr. N. M. Joshi thereupon seceded from the Congress and formed a new organisation called the Indian Trades Union Federation. The All-India Railwaymen's Federation which was till then affiliated to the Trade Union Congress left that body in 1929 and remained outside till 1935.

At the eleventh session of the All-India Trade Union Congress held at Calcutta in July 1931, a further split occurred in its ranks and the extreme left wing under the leadership of Messrs. S. V. Deshpande and B. T. Randive broke away to form the All-India Red Trade Union Congress. By this time, however, trade unionism in India was at a thoroughly low ebb and none of the three national organisations could by any manner or means make a claim to speak on behalf of Indian labour; but, as the Congress had already decided to boycott the International Labour Conference, the Government of India accepted the Indian Trades Union Federation as the body competent to recommend delegates for the International Labour Conference.

With a view to bring about unity in the ranks of Indian labour, a committee called the Trade Union Unity Committee was appointed at a representative conference held in Bombay on the 10th May 1931 under the auspices of the All-India Railwaymen's Federation. This Committee found that three different and distinct sections of labour were in existence in India—(1) the communist group; (2) the liberal group; and (3) the rest—and that the gulf which divided the communists from the other sections was not bridgeable. The Committee, therefore, recommended a platform of unity for the remaining sections of labour in India. It was proposed to organise and unite all unions which accepted this 'platform of unity' under a new federation to be called the National Federation of Labour. At a joint meeting between the General Council of the Indian Trades Union Federation and the Provisional Committee of the National Federation of Labour held at Calcutta in April 1933, the two federations were amalgamated on the

basis of the platform of unity as finally evolved by the Trade Union Unity Conference but subject to certain modifications and the new amalgamation was named the National Trades Union Federation. In 1935, the two sections of the All-India Trade Union Congress composed their differences and it was agreed that the parent body should be recognised as the central organisation of the working classes in India. In the month of February of the same year an agreement was reached between the representatives of the All-India Trade Union Congress and the National Trades Union Federation by virtue of which a Joint Committee of the two organisations was to be formed with a view to exploring the possibilities of common action with the assistance of the affiliated unions of both. Another direction in which an effort towards common action on agreed matters was made was the agreement entered into between the National Federation of Labour and the All-India Congress Socialist Party for joint action on specific political and economic issues. At the end of the year 1937, the National Trades Union Federation had a membership of 83,000 with 62 affiliated unions and the All-India Trade Union Congress had a membership of 46,000 with 98 affiliated unions. It is interesting, however, to note that the labour unions of Ahmedabad which draw their inspiration from Mr. Gandhi have throughout remained aloof from both these bodies.

At a special joint session of the All-India Trade Union Congress and the National Trades Union Federation held at Nagpur on the 17th April 1938, it was decided to combine these two bodies into one central organisation. The principal terms of the agreement approved by the executives of both these bodies were that the basis of representation on the joint General Council of the new combined Trade Union Congress be fifty-fifty—44 members from each group—and that the Trade Union Congress accept the constitution of the National Trades Union Federation *in toto*. The General Council was to act for the combined body with the one limitation that questions relating to general strikes and affiliation with international bodies should be decided by a three-fourth's majority. If this scheme worked well, the task of unification should be pushed further and the two bodies merged into one. The Provisional Affiliation entered into at Nagpur in April 1938 was formally ratified at the Eighteenth Session of The All-India Trade Union Congress held at Bombay on the 28th and 29th September 1940.

This very same Session, however, was responsible for yet another split in the Congress. The Session adopted a resolution of neutrality in connexion with the War Effort but certain elements headed by Dr. Aftab Ali, President of The Seamen's Union at Calcutta desired to support the War Effort. The Trade Union Congress while adhering to the principle of neutrality, however, gave a free hand to such of their affiliated members as desired to support the War Effort. This attitude of luke-warmness did not satisfy Mr. Aftab Ali and he disassociated his Union from the Congress. Another Union, headed by Mr. M. N. Roy and J.

Boycott with Mr. Jamnadas M. Mehta, Barrister-at-Law, formed a new central organisation known as The Indian Federation of Labour with its head office at Delhi. Mr. Jamnadas M. Mehta was appointed its President and Mr. M. N. Roy its General Secretary. Two hundred trade Unions in India with a total Membership of over a quarter of a million have affiliated themselves to the new Federation which was carrying on a country-wide campaign and propaganda for all-out support by Indian Labour for the War Effort.

The last Session of the All-India Trade Union Congress was the Twenty-first Session which was held at Madras in January, 1945. The following office-bearers were appointed: President—Mr. Mrinal Kanti Bose; Vice-Presidents—Messrs. S. A. Dange, Chakkarai Chettiar, S. S. Mirajkar, P. C. Bose and Juggun Khan; Treasurer—Mr. R. A. Khedgikar; General Secretary—Mr. N. M. Joshi; and Assistant Secretaries—Miss Shanta Bhalerao and Messrs. N. V. Phadke and Manek Gandhi.

The All-India Trade Union Congress, at the moment is made up of three distinct groups: (1) the Communists; (2) the Nationalists (including the Indian National Congress and the Congress Socialist Party); and (3) the pure Trade Unionists. There are, however, two important groups outside the Trade Union Congress. One is the Boycotts. The other is the Hindustan Mazdoor Seva Sangh which is the permanent offspring of the Labour Sub-committee set up by the Gandhi Seva Sangh in 1937 to organise labour on the principles set up by Mahatma Gandhi—principles which have been followed by the Textile Labour Association, Ahmedabad, since its inception in 1921. The original Sub-Committee established a training school in Ahmedabad to educate interested persons in trade union work. After completing a course of training in this school, the trainees are sent out to different centres to organise and conduct *bona fide* trade unions. The Sangh acts as an Advisory Body and is not a federation of unions. In politics, its policy is the same as that of the Indian National Congress but it does not organise or conduct trade unions of workers on political lines. According to an enquiry recently made by the Government of India, it has been found that the most representative workers' organization in India is the All-India Trade-Union Congress.

## STATISTICS OF TRADE UNIONS.

One of the Annual Reports which the Government of India have stopped publishing for the duration of the War is that relating to the administration of the Indian Trade Unions Act. Those reports used to contain statistics regarding number of registered unions and their membership. No Province except Bombay has maintained any records for both registered and unregistered unions. The Labour Office of the Government of Bombay has collected full and complete information regarding all trade unions in the Province of Bombay since the year 1922. The following Table shows the progress of the trade union movement in that Province during the last twenty-two years:

## Growth of Trade Unions in the Province of Bombay.

Year.	Average number of Unions during the year.	Average Membership during the year.
1923	18	41,030
1926	52	62,772
1929	91	191,937
1932	86	104,453
1935	103	103,429
1936	103	97,392
1937	105	93,453
1938	140	126,455
1939	170	159,026
1940	177	191,942
1941	174	184,517
1942	183	183,364
1943	214	221,039
1944	261	266,042

If the figures contained in the above table for the year 1943 (1st December) are analysed by industries, the results are as set out below:

## Distribution of Membership of Bombay Unions.

Class of Industry.	Number of Unions.	Membership.	Percentage to total Membership.
Textiles .. ..	46	114,802	40.06
Railways .. ..	9	36,794	12.84
Seamen .. ..	3	22,091	7.71
Posts and Telegraphs .. ..	35	9,679	3.33
Municipal .. ..	21	15,992	5.53
Miscellaneous ..	163	87,208	30.43
Total .. ..	277	236,564	100.00

Out of the 46 unions of cotton textile workers in the Province of Bombay, ten with a total membership of 26,355 are in Bombay City and eleven with a total membership of 70,862 are in Ahmedabad.

## REPRESENTATION OF LABOUR INTERESTS IN THE PROVINCIAL LEGISLATURES.

The question of representation of Labour in the Central and Provincial Legislatures has in recent years assumed considerable importance owing to the growing interest taken by the public in matters connected with Labour. We have given a fairly detailed account of the extent of this representation prior to the advent of Provincial Autonomy and also in the New Legislatures which came into being by virtue of the Government of India Act, 1935, at pages 592 and 593 of the 1941-42 Edition of this publication. Recently fresh elections have been held in this country and in some cases there has been a change in the representatives of labour to the Provincial Assemblies.

## THE FUTURE OF TRADE UNIONISM IN INDIA.

The proposals of the Indian Delimitation Committee with regard to the formation of certain constituencies for the return of representatives of labour to the Provincial Legislative Assemblies on the basis of registered trade unions have had considerable effect both on the formation of new unions and on the registration of such of those as had not registered under the Indian Trade Unions Act. Since Provincial Autonomy has come into existence registered unions have been making better endeavours than they had hitherto done in maintaining proper books of accounts and registers of members in view of their compulsory examination by officials of Government for the purposes of preparing electoral rolls. As far as the workmen in Indian Industries are concerned, however, trade unionism has not taken on anywhere near to the extent which it has with workmen in the West: the fear of victimisation is still strongly entrenched in the minds of the workers to enable them to enter into combinations promoted to safeguard their interests but things are showing a marked improvement during the last year or two. One great difficulty experienced by trade union workers is the collection of subscriptions from members. The experience of the last fifteen years shows that most of the unions which became defunct went to the wall owing mainly to the fact that their officials were not

able to collect subscriptions for the reason that the Indian workman will not part with money for a purely problematic advantage. He wants a return for his outlay in the form of an increase in his wages and if he does not get this within a reasonable period he pays no union subscriptions. The Ahmedabad Textile Labour Union is, happily, in a somewhat different position because it provides a host of welfare schemes in the form of hospitals and dispensaries, education and facilities for recreation, co-operative stores and cheap grain shops, etc., and its members get more than value for their money. The office of the union with its hundred or more clerks is a beehive of industry.

Unfortunately for the trade union movement in India, there are few, if any, unions which are run on the model of the Ahmedabad Textile Labour Union. The vast majority of those which have been kept alive through the zeal of interested outsiders are hollow structures with no funds and bolstered figures of membership—bolstered in order to convince the employers concerned *re. their bona fides* for recognition. No trade union movement can stand on foundations such as these. It is possible, however, that with the spread of education and literacy, Indian industries will attract a more educated type of workman who will be able to persuade his fellows of the advantages of organised combination and that a healthier movement built on more solid foundations will take the place of the weak structure which exists to-day.

## THE INTERNATIONAL LABOUR ORGANIZATION.

Reference has already been made in the preliminary sections of this note to the creation, by the Treaty of Versailles, of an International Labour Organisation and to the work of the International Labour Conference. Since the holding of the first session of the Conference in Washington in 1919, twenty-five further sessions were held till the end of the year 1939 and a total of sixty-seven Conventions were adopted. The 26th Session of the Conference was held in April-May, 1944 at Philadelphia at which post-war reconstruction problems were considered but no conventions were adopted. We give below, in serial order, the year and the place at which each of the twenty-six sessions of the Conference was held, the composition of the delegation from India, and the titles of the different Conventions which were adopted at each session. In the notes on the composition of the delegation Government Delegates are represented by the capital letter "G", Employers' Delegates by the letter "E" and Workers' Delegates by the letter "W". The names of the technical advisers to the Government, Employers' and Workers' Delegates have been omitted in all cases. Symbols (full meanings and explanations of which are given at the end of this section) are placed beside the titles of the Conventions with regard to which action has already been taken by the Government of

India. In all cases where no symbols appear alongside the titles, no action has been taken.

1st Session (Washington, 1919): Indian Delegation.—Government—Sir Atul Chatterjee and Sir Louis Kershaw; Employers—Sir Alexander Murray; Workers—Mr. N. M. Joshi.

### Conventions.

1. Hours of Work (Industry)—(AB).
2. Unemployment—(C).
3. Childbirth.
4. Night Work (Women)—(AB).
5. Minimum Age (Industry)—(D).
6. Night Work (Young Persons)—(AB).  
White Phosphorus—(D).

2nd Session (Geneva, 1920): G—Sir Louis Kershaw and Capt. D. F. Vines; Seamen's Delegate—Mr. A. M. Mazarello.

### Conventions.

7. Minimum Age (Sea)—(E).
8. Unemployment Indemnity (Shipwreck)—(E).
9. Placing of Seamen.

3rd Session (Geneva, 1921): G—Sir Atul Chatterjee and Mr. I. N. Gupta; E—Sir Nowroji Saklatvala; W—Mr. N. M. Joshi; Secretary—Mr. A. G. Clow.

20th Session (Geneva, 1936): G—Sir Bhupendra Nath Mitra and Mr. S. N. Roy; E—Sir H. M. Mehta; W—Rao Sahib R. W. Fulay; Secretary—Mr. S. R. Zaman.

*Conventions.*

50. Recruiting of Indigenous Workers.

51. Reduction of Hours of Work (Public Works).

52. Holidays with Pay.

21st Session (Geneva, 1936): G—Sir Firoz Khan Noon and Mr. A. Dibdin; E—Mr. M. A. Master; W—Mr. Aftab Ali; Secretary—Mr. A. F. Morley.

*Conventions.*

53. Officers' Competency Certificates.

54. Holidays with Pay (Sea).

55. Shipowners' Liability (Sick and Injured Seamen).

56. Sickness Insurance (Sea).

57. Hours of Work and Manning (Sea).

22nd Session (Geneva, 1936): Same Delegation as at the 21st Session.

*Conventions.*

58. Minimum Age (Sea).

23rd Session (Geneva, 1937): G—Sir Firoz Khan Noon and Sir Frank Noyce; E—Sir Hormusjee P. Mody; W—Mr. S. C. Sen; Secretary—Mr. S. R. Zaman.

*Conventions.*

59. Minimum Age (Industry) (Revised).

60. Minimum Age (Non-Industrial Employment) (Revised).

61. Reduction of Hours of Work (Textiles).

62. Safety Provisions (Building).

24th Session (Geneva, 1938): G—Sir Firoz Khan Noon and Sir Frank Noyce; E—Lala Shri Ram; W—Mr. S. V. Parulekar, M.L.A. (Bombay); Secretary—Mr. M. Ikramullah.

*Conventions.*

63. Convention concerning statistics of wages and hours of work in the principal mining and manufacturing industries, including building and construction, and in agriculture.

25th Session (Geneva, 1939): G—Sir Firoz Khan Noon and Sir Frank Noyce; E—Mr. M. L. Dahanukar; W—Mr. R. S. Nimbkar; Secretary—Mr. M. Ikramullah.

*Conventions.*

64. Convention concerning the regulation of written contracts of employment of indigenous workers.

65. Convention concerning penal sanctions for breaches of contracts of employment by indigenous workers.

66. Convention concerning the recruitment, placing and conditions of labour of migrants for employment.

67. Convention concerning the regulation of hours of work and rest periods in road transport.

26th Session (Philadelphia, 1944): G—Sir Samuel Ranganadhan and Mr. H. C. Prior; E—Mr. D. G. Mulherkar; W—Mr. Jammadas Melita; Secretary—Mr. W. B. England.

A = Unconditional ratification.

B = Legislative or other measures passed since the adoption of the Convention.

C = Legislative or other measures anterior to the adoption of the Convention by the Conference.

D = Legislation passed.

E = Legislation in progress or in preparation.

India has ratified the following Conventions unconditionally: Hours of Work (Industry); (2) Night Work (Women); (3) Night Work (Young Persons); (4) Right of Association (Agriculture); (5) Weekly Rest (Industry); (6) Minimum Age (Trimmers and Stokers); (7) Medical Examination of Young Persons (Sea); (8) Workmen's Compensation (Occupational Diseases); (9) Equality of Treatment (Accident Compensation); (10) Inspection of Emigrants; (11) Seamen's Articles of Agreement; (12) Marking of Weight (Packages transported by Vessels); (13) Night Work (Women) (Revised); and (14) Underground Work (Women). In 1938, India denounced the Unemployment Convention which it had ratified in 1921. Legislative or other measures have been adopted in India with reference to the following Conventions: (1) Hours of Work (Industry); (2) Unemployment; (3) Night Work (Women); (4) Minimum Age (Industry); (5) Night Work (Young Persons); (6) Right of Association (Agriculture); (7) Weekly Rest (Industry); (8) Minimum Age (Trimmers and Stokers); (9) Medical Examination of Young Persons (Sea); (10) Workmen's Compensation (Occupational Diseases); (11) Equality of Treatment (Accident Compensation); (12) Inspection of Emigrants; (13) Seamen's Articles of Agreement; (14) Marking of Weight (Packages transported by Vessels); (15) Protection against Accidents (Dockers) (Revised 1932); (16) Night Work (Women) (Revised); and (17) Underground Work (Women). In addition, legislation is either in progress or under preparation in connection with the following Conventions: (1) Minimum Age (Sea); (2) Unemployment Indemnity (Shipwreck); and Holidays with Pay. In March 1943, the Government of India appointed a Special Officer to study the subject of sickness insurance (Convention No. 24, Tenth Session, 1927) with a view to drafting suitable legislation on the subject. The Report of the Special Officer which is a confidential document is now under the consideration of the Government of India.

The outbreak of the Second World War found the International Labour Office prepared to continue its work and to carry out its constitutional obligations. So far back as February 1939, the Governing Body had decided to appoint an Emergency Committee with a tripartite and representative character from its membership which could meet more rapidly in times of crisis. The Committee set forth two important principles: first, that the I.L.O. must continue to function as effectively and as completely as possible in case of war; and, second, that the continued existence of the Organization as an instrument of co-operation between Governments, employers and workers would be of unusual importance in such circumstances.

devoted to the organisation of an economy of abundance in the common interest of Europe and the Americas, Asia and Africa, and Australia is the only practicable alternative to the recurrence of world-wide wars. It contemplates vigorous national action within the framework of a better organised international order in pursuit of constantly broadening social objectives.

In London several preliminary practical steps in furtherance of this programme were taken. The financial arrangements necessary to permit of the effective development of the reconstruction work of the International Labour Office were approved. The machinery necessary to equip the organisation to handle more effectively some of the interactions of economic and social policy was established in the form of the Committee of Economic Statesmen which is to advise the Governing Body. New programmes of study, relating in the first instance primarily to public works policy, migration, agriculture, and textiles were sanctioned. The Emergency Committee also decided to address to Governments suggestions for national preparatory action regarding public works policy and migration. It requested the International Labour Office to suggest to countries which have not yet done so that they should take measures within the general framework of their post-war reconstruction planning to prepare public works programmes in advance and to invite countries which are disposed to accept immigrants after the war to prepare as part of their programme of reconstruction or economic development as close estimates as possible of their immigration requirements. Arrangements designed to enable the Organisation to act as a co-ordinating centre between national reconstruction agencies and to secure full co-operation with other international agencies were also advanced a stage at the meeting.

The valuable work of the International Labour Office in the difficult sphere of post-war reconstruction is receiving increased recognition, and it is significant to recall in this connection that, speaking on the 2nd December 1942 in the House of Commons, Mr. Anthony Eden, the then British Foreign Secretary, suggested that "the International Labour Office might be developed as the main instrument for giving effect to Article 5 of the Atlantic Charter" (ensurance of the fullest collaboration between all nations in the economic field with the object of securing for all improved labour standards, economic advancement and social security).

The change for the better in the war situation and the beginning of concerted international action through, for example, the Food Conference at Hot Springs and the U.N.R.R.A. Conference at Atlantic City, suggested the need for considering the general principles of the Social policy which should be followed in the post-war period and the future policy and programme of the I.L.O. itself. With this end in view, the Twenty-sixth Session of the International Labour Conference was convened at Philadelphia on the 20th April 1944. The items on the Agenda of the Conference were: (1) future policy, programme and status of the I.L.O.; (2) Recommendations for present and post-war social policy; (3) the organisation of employment in the transition from war to peace; (4) Social Security: Principles and Problems arising out

of the War; and (5) Minimum Standards of Social Policy in Dependent Territories. The Conference had reports prepared by the I.L.O. on these items, on the basis of which the Conference was invited to adopt decisions. No draft Conventions were adopted at this session, but three Recommendations were adopted dealing with Social Security, one with Social policy in dependant territories, and three dealing with employment problems. Twenty-three Resolutions were also adopted concerning various aspects of the I.L.O.'s work of which special reference may be made to the holding of regional conferences for the Near and Middle East, and for South East Asia, and the setting up of Committees for the special study of the world's major industries.

The most outstanding feature of the Philadelphia conference was the adoption of the PHILADELPHIA CHARTER—an official declaration by the forty-one nations represented on the conference redefining the aims and purposes of the International Labour Office in the context of the present world situation. The Charter reaffirms that poverty anywhere constitutes a danger to prosperity everywhere and that the war against want should be carried on both nationally and internationally by the workers, employers and Governments acting unitedly; that the attainment of a state of affairs in which all human beings can pursue their material well-being and spiritual development in conditions of freedom and dignity, of economic security and equal opportunity, must constitute the central aim of public policy; and that it is a responsibility of the I.L.O. to examine and consider all international economic and financial policies in the light of this fundamental objective. The Charter recognises that it is the solemn obligation of the I.L.O. to further full employment and the raising of standards of living; to provide facilities for the training and transfer of labour, including migration; to ensure a just share of the fruits of progress to all and a minimum living wage to all employed and in need of such protection; to speed up the extension of social security measures, of child welfare and maternity protection, of adequate nutrition, housing and cultural facilities, and of equality of educational and vocational opportunity. The I.L.O. is further to co-operate with all bodies as are engaged in the fuller and broader utilisation of the world's productive resources, to avoid severe economic fluctuations, to promote the advancement of the less developed regions, to assure greater stability in world prices of primary products, to promote a high and steady volume of International trade; and, in general, to promote the health, education and well-being of all peoples. The principles in the Charter are stated as fully applicable to all peoples everywhere, and their progressive application to dependant peoples as well as to those who have already attained self-government, is declared a matter of concern to the whole civilised world.

India and the International Labour Office: India has played a notable part in the International Labour Organisation from its inception. Its contribution to the funds of the organisation is among the largest. As one of the eight countries of chief industrial importance it occupies a permanent seat on the Governing Body of the

the two posts were again separated and the Commissioner of Labour has since then dealt only with matters connected with labour.

Consequent on the introduction of Provincial Autonomy in India with effect from 1st April, 1937, Sind was separated from the Presidency of Bombay and made into a separate Province. The new Government of Sind modelled its administration of all labour questions on Bombay and created a Labour Office with a special Commissioner of Labour. Since the year 1937, the Governments of the United Provinces, Assam, the Central Provinces and Berar and Bihar have also created special appointments of Commissioners of Labour; but, whereas the appointments in the United Provinces is a full-time one those in the Central Provinces and Berar, Bihar and Assam have been coupled with other posts. In the Punjab, administrative matters connected with Labour are in the hands of the Director of Industries. Labour conditions in Orissa and in the North-West Frontier Province are not considered such as to justify the creation of special appointments of Labour Commissioners.

The Central Government is setting up a separate organisation under its control to look after labour relations matters in "Central Sphere" undertakings, namely, Federal Railways, Mines, oil-fields, Major Ports and undertakings owned or controlled by the Central Government. The Chief Labour Commissioner (Central) who is the head of this organisation, was appointed in February, 1945. He will have under him three Regional Labour Commissioners nine labour Inspectors and 24 Conciliation Officers at different centres in the country.

When the Workmen's Compensation Act was passed in 1923, the Governments of Bengal and Bombay created special full-time appointments of Commissioners of Workmen's Compensation. In the other Provinces, Judges of Small Causes Courts in Provincial Headquarters towns and District Magistrates, District Judges or Sub-Judges in the mofussil were appointed ex-officio Commissioners and the administration of the Act was decentralised. Even in those Provinces where Special Commissioners of Workmen's Compensation were appointed, the jurisdiction of these Officers, except in Bengal, was limited to one or two cities of chief industrial importance. Thus, the jurisdiction of the Bombay Commissioner extended to Bombay City and the Ahmedabad and the Bombay Suburban Districts, the railway system of the G.I.P. and the B.B. & C.I. Railways in the Province, the electricity generating plants conducted by Messrs. Tata Sons (Ltd.) and he was also Commissioner for non-contested matters from the whole of the Province which could be disposed of in Bombay. The special post of Commissioner for Workmen's Compensation in Bombay was abolished in April 1928 and the duties attaching to this post were transferred to the Director of Information and Labour Intelligence, and later to the Commissioner of Labour; but owing to a heavy increase of work in the Bombay Labour Office, the two posts have again been separated with effect from November, 1943.

Under the Indian Trade Unions Act, 1926, every Provincial Government was required to appoint a Registrar of Trade Unions. In those Provinces where special appointments for

administering matters connected with labour already existed the officers holding those appointments were entrusted with the duties of Registrars of Trade Unions, e.g., as in Bombay, Madras and Bengal and later, in Sind. In others such as the Central Provinces and Berar and in the Punjab, the Director of Industries was appointed the Registrar. Today most Commissioners of Labour in the Provinces where such posts have been created are Registrars of Trade Unions as well. In addition, Commissioners of Labour have also been appointed as the Authority under the Payment of Wages Act, 1936.

The appointment of Government Labour Officers in India dates from the year 1934 when Mr. W. B. Gilligan, I.C.S., was appointed Labour Officer, Bombay, under The Bombay Trade Disputes Conciliation Act which was passed in that year. That Act was replaced in the year 1938 by the Bombay Industrial Disputes Act. The latter Act necessitated the appointment of three additional Labour Officers in the Province of Bombay with their headquarters stations at Ahmedabad, Sholapur and Jalgaon. Since the advent of the war, several other Provincial Governments have also appointed Government Labour Officers. Whilst the Govt. Labour Officers in the Province of Bombay have specific duties under the Bombay Industrial Disputes Act and deal with the work of complaints from the workers in the industries to which that Act has been applied, the functions of these Officers in the other Provinces where they have been appointed are not very clearly defined and they act mostly as Conciliators.

Upto the end of June 1943 only two Provincial Governments in India published journals similar to "The Labour Gazette" which is published monthly by the British Ministry of Labour: (1) Bombay, where the "Labour Gazette" has been published every month since September, 1921; and (2) the United Provinces, where the "Labour Bulletin," modelled on the lines of the sister publication in Bombay, was published monthly between January, 1941 and the middle of 1942 when, owing to shortage of paper, it was converted into a quarterly publication. The Government of India started publishing a similar journal with the title of the *Indian Labour Gazette* with effect from July 1943. The Bombay "Labour Gazette" is intended to supply complete and up-to-date information on Indian labour conditions and especially on the conditions existing in the Province of Bombay and to supply to local readers the greatest possible amount of information regarding labour laws and labour conditions in the outside world. Its contents include statistics and discussions regarding the cost of living index series which the Labour Office of the Government of Bombay regularly compiles for Bombay, Ahmedabad and Sholapur, wholesale prices index numbers for Bombay, retail food prices for five important centres in the Province, statistics of industrial disputes and workmen's compensation, full information regarding all industrial disputes in India, statistics of absenteeism with notes on the employment situation in five important industrial centres and information regarding prosecutions under the Factories Act. Since 1939, when the Bombay Industrial Disputes Act, 1938, was first applied to the cotton textile industry in the Province, the full proceedings

**BOMBAY.**

Of all the Provincial Governments in India, the Government of Bombay have always maintained a progressive lead in their solicitude for the welfare of the industrial labour employed in the Province; and the real pioneer work in the field of labour information and statistics in India during the last twenty-five years has been done by the Bombay Labour Office. The Government resolution creating this Office and its various activities have been already dealt with in the prefatory paragraphs of this Chapter. The principal work of the Labour Office during the year was to secure for workers by timely intervention adequate dearness allowances and bonuses to enable them to maintain their pre-war standard of living and partly to share in the large profits of some of the industries. The administration of the Bombay Industrial Disputes Act, 1938, has resulted in a heavy strain on the Labour Organization of the Government. Commissioner of Labour, Chief Conciliator, Bombay Industrial Disputes Act, and Registrar of Trade Unions; Assistant Commissioners of Labour; Labour Officer, Bombay and Officer-in-Charge, Labour Welfare Department; District and Assistant Labour Officers; Commissioner for Workmen's Compensation; Chief Inspector of Factories and the Labour Welfare Officer, Bombay.

**MADRAS.**

The Commissioner of Labour in Madras is also the Chief Inspector of Factories but for the administration of the Factories Act he is assisted by a Deputy Chief Inspector of Factories at headquarters, in charge of the Madras factories Circle. Three additional Factories Circles, each in charge of an Asst. Inspector of Factories have been sanctioned for 1945-46. The Labour Commissioner in Madras has no special statistical office to deal with labour statistics, and no reports have been published of any special inquiries into questions connected with industrial labour in the Province. The conduct of the Quinquennial Census into Agricultural Wages has, however, been placed in his hands and, with a view to the proper administration of the Payment of Wages Act a beginning has been made for a more accurate collection of industrial wages statistics information regarding which is included in the Annual Reports on the Administration of the Factories Act.

In view of the large increase of work resulting from war conditions, the Govt. of Madras sanctioned the creation of a post of Assistant Commissioner of Labour in September, 1943. In February 1944, this Officer was appointed an Additional Commissioner for Workmen's Compensation. An additional post of a Labour Conciliation Officer for the Madura, Ramnad and Tinnevely Districts with headquarters at Madura was created in 1945. The personnel of the Madras Government connected with Labour matters consists of the Commissioner of Labour, Commissioner for Workmen's Compensation, Registrar of Trade Unions, Chief Inspector of Factories and the Authority under the Pay-

ment of Wages Act; Deputy Chief Inspector of Factories; Asst. Commissioner of Labour and Additional Commissioner for Workmen's Compensation and the Labour Conciliation officers.

**CENTRAL PROVINCES AND BERAR.**

Prior to January 1942 when the Government of the Central Provinces and Berar created the post of a Commissioner of Labour, matters in connexion with the administration of questions connected with Labour were dealt with by the Director of Industries. The new Labour Office in Nagpur has been modelled on lines similar to that in Bombay and it is to be responsible for the collection of statistics relating to the cost of living, industrial disputes and trade unions. The Commissioner of Labour is assisted by a Labour Officer and Assistant Labour Officers. The Commissioner and the Labour Officer have been appointed Conciliators under the Trade Disputes Act, 1929.

As a result of prolonged strikes in the Empress and in the Model Mills at Nagpur in May 1941, the Government of the Central Provinces and Berar appointed a Textile Labour Inquiry Committee to make a survey of wages, dearness allowances and industrial strife in textile mills in the Province and to make recommendations. The Committee was composed of Mr. T. C. S. Jayaratnam, C.I.E., I.C.S., as Chairman; Messrs. R. W. Fulay, C. B. Parakh and K. D. Guha (Director of Industries) as members; and Messrs. S. H. Batliwalla, G. Mohota, R. S. Ruikar and J. N. Mujumdar as Associate Members. Mr. Guha was also Secretary to the Committee. This Committee submitted its Report to Government in October, 1941. It recommended restoration of wages to the levels of 1931-32, extended with modifications the recommendations of the Mahalanobis Committee regarding the payment of dearness allowances to all out-station cotton mills in the Province, and advised legislation for the recognition, by employers, of registered trade unions. Among other important recommendations were the creation of a Labour Office, institution of provident funds for industrial workers, payment of a regularity bonus, etc.

**UNITED PROVINCES.**

Following the recommendations of the Cawnpore Labour Inquiry Committee, the Government of the United Provinces sanctioned the post of a wholetime Labour Commissioner in March 1940. This Officer, like the Commissioner of Labour in Bombay, was to hold all the statutory appointments connected with Labour and he was provided with a permanent staff with effect from 1st April 1941. The main functions of the Labour Department are: 1(a) Prevention and settlement of industrial disputes, (b) Disposal of individual complaints received from workmen or their organisations, 2(a) Labour Intelligence, (b) Collection, compilation and publication of accurate statistics of labour conditions and welfare, 3. Organisation, superintendence, direction and control of Labour Welfare Work, 4. Registration of Trade Unions, 5(a) Labour Regulation, (b) Administration of Labour Acts, (c) Supervision and control of the office of the Chief Inspector of Factories and

A Labour Officer whose main duty was to endeavour to bring about settlements in labour disputes was appointed in the year 1938. In addition to conciliation work he is entrusted, as Special Registrar of Co-operative Societies for Workers, with the work of organising co-operative Societies and other welfare Schemes with the help of employers. In the year 1943, the Government of Baroda State instituted an inquiry into the general financial condition of the cotton mills in the State and the conditions of labour employed in them with special reference to recruitment, wages, hours of work, labour welfare and efficiency.

With a view that the increased earnings accruing to industrial workers in the State as a result of war conditions might not be frittered away in drink, etc., the Baroda Government decided to start Co-operative Thrift Societies for the workers. The Government have guaranteed the security of all deposits made in such Societies. By the end of February, 1945, twenty such Societies with a membership of 24,301 workers had been established in the State. The total amount of savings as at the same date amounted to Rs. 20,19,962. The personnel of the Government of Baroda dealing with administrative matters connected with Labour is as follows:

Director of Labour and Registrar of Trade Unions; Labour Officer, Inspector of Factories under the Payment of Wages Act and Special Registrar of Co-operative Societies for Labour and the Inspector of Factories.

### INDORE.

In October 1943, Indore was the fifth largest centre of the cotton textile industry in India with seven mills having 213,446 spindles and 6,301 looms. The total number of factories on the register on 1st October 1944 was 485 of which 322 were perennial and 163 seasonal. These provided employment for 30,297 workers in all of whom 26,377 were employed in cotton mills. Labour legislation in Indore is almost parallel to that in British India and includes Factories, Workmen's Compensation, Trade Unions' and Maternity Benefit Acts. The Indore Trade Disputes Act provides for the appointment of Courts of Inquiry and Boards of Conciliation to deal with disputes and also for a Labour Officer to secure the maintenance of harmonious relations between the workers and their employers. Standardisation of wages has been secured in cotton textile mills and labour has been decasualised by the introduction of the *Badli* Control System on the lines adopted by the Millowners' Association, Bombay. Safety Committees to prevent accidents in factories have also been established. MUSAIB-I-KHAS BAHADUR CAPT. H.C. DRANDA, B.A.Hons. (Oxon.), Bar-at-Law, Commerce Minister, Holkar State, is the Minister in charge of Labour; K. S. SRIKANTAN, M.A., F.R.E.S. (Lond.), Director for Labour and Information; R. S. DATE, B.A., LL.B., Government Labour Officer; RAI RATAN V. N. SHERLEKAR, L.M.E.A. M.Tech.L., is Registrar of Trade Unions and Inspector of Factories.

### COCHIN.

Unlike Mysore, Baroda and Indore, the large industrial population of Cochin State is organised on a cottage basis. The number of concerns on

the Factory Register at the end of the last official year (18th August 1944) was 103 employing 12,806 persons. Today Cochin State has all the labour laws which have been enacted in Indore with a Dock Labourers' Act in addition. Recent additions include an Employment of Children Act and the Employee's Liability Act. The administration of labour matters is generally in the hands of the Director of Industries and Commerce who is also the Labour Commissioner, the Registrar of Trade Unions and Conciliator, under the Trade Disputes Act. The Factories Act and the Workmen's Compensation Act are, however, under the immediate administrative control of the Chief Engineer, Public Works Department and the District Magistrate of the State respectively.

### THE FUTURE

The year 1946 has once again witnessed the coming into power of Popular Ministries in all Provinces of India. At the time of writing, India is also on the eve of getting independence. Thus, a new era is dawning in this country and this consciousness has not left labour unaffected.

Just as during its regime in 1937-39 the Popular Ministries all over the country displayed great enthusiasm in bringing about the amelioration of the conditions of industrial labour within a few months of their coming into power they have shown similar enthusiasm once again. In this respect, Bombay seems to have taken the lead again. The Ministry in Bombay has a large and ambitious programme for the amelioration of the conditions of labour. The Bombay Industrial Disputes Act, it is understood, is being revised and a Special Officer has been appointed to improve the provisions of the Shops Act. Madras proposes to eliminate as much as possible any industrial strife and the Ministries in most of the Provinces are taking every possible opportunity to see to it that production and the earnings of the workers are not allowed to suffer because of protracted strikes and are anxious to intervene at the earliest possible opportunity.

Despite the efforts that are being made to intervene in disputes, the country is faced today with tremendous industrial unrest in several industries including Government concerns such as Railways, the Postal Department, etc. This is a tendency noticeable not only in this country but in many parts of the World including the U.S.A. Because of the changed outlook on labour unrest we have fortunately been able to avert in this country a complete deadlock of our communications and the threatened All-India Railway Strike has been amicably settled. In spite of the early intervention of the Government, however, and the appointment of an Adjudicator, the citizens of this country had to undergo untold suffering on account of the somewhat protracted strike of Postal workers.

To meet post-war conditions of work and wages, the Government of India, have recently appointed a pay commission, consisting mainly of popular representatives. The commission is charged with the duty of making recommendations relating to pay and conditions of service of Government employees—both manual and others. Its recommendations are likely to have important repercussions on the employees of private industries as well.

## CIVIL AVIATION.

The development of internal air services in India was first essayed by Lord (then Sir George) Lloyd during his Governorship of Bombay (1918-23). The first air service was organised by the Government of India between Karachi and Bombay and was operated by the Royal Air Force. It was purely a Government venture and was established as a temporary and experimental measure during the fair-weather season of 1920, with the object of testing the extent to which an airmail service was likely to be used by the public. It was closed down as sufficient data as to running expenses had been collected and its continuance as a purely commercial concern was not advocated.

The general attitude of the Government of India for some time after this was that as no air services in the world had yet been run without a Government subsidy and as India had no money available for such a purpose, a general development of air services in India must await more prosperous times. The pressure of external conditions in favour of Indian aviation enterprise gradually increased. The inauguration of French and Dutch air services across India, as well as the institution of a regular weekly service between England and Karachi, and the general increase of civil aviation in all parts of the world and of visits of flyers of different nations to India, stimulated both Government and public opinion. India had become a party to the International Air Convention and under this she was under a moral obligation to provide ground facilities for aircraft from other countries.

The problem of internal air services was freshly taken up by the Government of India in the Department of Industries and Labour when Sir Bhupendranath Mitra was member of Government for that portfolio.

Non-official members of the Assembly, under the leadership of Dr. Moonje, then an elected member, for some time strongly pressed Government to institute a practical system for the training of young Indians in civil aviation. They foresaw that the development of civil aviation in India was only a matter of time.

The reflection of this foresight is mirrored today in the organisation of the trunk air lines of India. The aerodromes and landing grounds on the main air routes are controlled by Indian Aerodrome Officers who are responsible for their safe operation, while the flying personnel on the internal air routes is 90 per cent. Indian. On the engineering side Indians are now taking their places not only as Assistant but as Chief Ground Engineers to internal operating companies and are already finding their way to responsible positions as Aircraft Inspectors with the Directorate of Civil Aviation.

Owing to war, flying had to be confined to war work. But the war has saved India two generations of gradual progress, since numerous aerodromes built for defence are now at hand, as also facilities, including wireless and meteorology. The developments as a result of the war have provided, in addition to routes traversed before the war, daily services from Peshawar to Madras via Lahore, Delhi, Nagpur and Hyderabad, and

from Bombay to Calcutta, Bangalore and Delhi, from Madras to Calcutta, and from Delhi to Calcutta.

**Development of Indian Air Services.**—Sir Bhupendranath Mitra was in due course obliged to reconsider the question of assisted internal air services in India. An arrangement was made by which the Imperial Airways' Service between Croydon and Karachi was, on 30th December, 1929, extended to New Delhi, mails from and for Europe being carried to and from each week. This conveyance of mails between New Delhi and Karachi was performed under a special arrangement, the chief point of which was that the service was conducted by the Government of India and that British Airways chartered to them machines for the purpose. This meant, in effect, that the Western service of the Airways Company continued to Delhi, but technically the service from Karachi eastwards belonged not to them but to the Government of India. Passengers as well as mails were carried. On the expiration of the period for which the contract on these lines was arranged, the Government of India decided not to renew their charter with British Airways and adopted the alternative course of contracting with the Delhi Flying Club to carry the weekly Karachi-Delhi air mail. Passengers were also carried by this service. This, like the earlier special arrangement with British Airways, was obviously a transitional plan. It came into operation early in 1932. It filled the need of the moment pending the development of a permanent scheme. Before Sir Bhupendranath Mitra could critically develop the matter, he was succeeded in charge of the Departmental portfolio by Sir Joseph Bore and the latter entered with enthusiasm into the problem. Its solution was largely assisted by a great deal of spade-work carried out by Col. Sheldermine before he resigned his appointment as D.C.A. in order to take up the corresponding post in England. A scheme was worked out under the direction of Sir Joseph Bore for the institution of a weekly air service between Karachi and Calcutta in connection with the weekly arrivals and departures of air mails conveyed by British Airways Ltd., from and to England. If the Government of India had at this time taken no steps towards the organisation of a service of the kind, they would have been unable to prevent British Airways or some other non-Indian concern from establishing one and the authorities in India were determined that civil aviation within India should be Indian in character, either through the development of private enterprise or through the institution of Government owned services.

The acute financial stringency following on the world depression, necessitated the abandonment of the Government Karachi-Calcutta service in 1931. Four Avro-10 aeroplanes had already been purchased for the service and they were sold, one of them being retained for the use of Their Excellencies the Earl and Countess of Willingdon, who had newly arrived in India on the appointment of the Earl to be

## Aviation.

in fuel worked out to Rs. 130 for the double journey. As he and his passenger shared the expenses it cost them Rs. 65 each as against a fare by train and boat of Rs. 450.

**Night Lighting Equipment.**—The lighting installations continued to give excellent service and were used with increasing frequency. At Karachi for example, the number of arrivals and departures between sunset and sunrise on regular air services increased from 163 in 1937 to 743 in 1938. Revenue from the extra fees charged for night landings at all lighted aerodromes amounted to Rs. 3,581 in 1938 as against Rs. 3,041 in 1937. The value of the free facilities given to air mail contractors in respect of such fees was Rs. 4,653 and Rs. 2,643 respectively. The Electrical and Mechanical staff which was responsible for operation and maintenance was recruited up to full strength and the entire work of maintaining ground lighting installations was undertaken departmentally. With the exception of temporary breakdowns of the beacons installed at Larkhana and Nawabshah on the Karachi Lahore route, there were no instances of failure of lighting equipment.

Several improvements were made to lighting systems. At Dum Dum and Allahabad flood-lights were resited to conform with other improvements effected to the aerodrome approaches. At Delhi, Allahabad, Cawnpore, Bombay and Hyderabad (Sind) the substitution of red for orange boundary lights on sections of the aerodrome boundary which were unfavourable for take-off and landing was completed.

Arrangements were made with the Chief Inspector of Lighthouses for trials to be made at Karachi to determine the effectiveness of the Manora marine light as an air beacon. Karachi Airport was already provided with a location beacon of Neon type affording guidance to pilots within a range of 25 miles, when flying at a height above the beam of the Manora light.

On the Karachi-Jacobabad route, the ground lighting installations at Jacobabad and Pad Idan were completed and the airway beacons at Nawabshah and Larkhana have been operating regularly. Indian National Airways found these beacons very useful during the short days of the cold weather season when early departures and late arrivals at Karachi have necessitated a certain amount of night flying. Lighting equipment on the Karachi-Bombay route is also completed.

Most of the Civil Aerodromes were placed at the disposal of the Air Forces during the war. These are now being gradually taken over. The R. A. F. are however still in charge of Flying Control at most of the Civil Aerodromes and the night landing facilities are, therefore, on R. A. F. standards. The recommendations made by the Provisional International Civil Aviation Organisation will be given effect to as soon as finally approved.

**Aerodrome and Route Traffic Control.**—Prior to the outbreak of hostilities in 1939, the progress of development of Air Routes and Aerodromes had been comparatively slow. There were 12 Aerodromes in all with staff and other facilities. For Air Navigation during the night, there were 14 Beacons along the routes.

The demands of the war brought about a complete change in the picture. The development of Aerodromes was rapid and improvements in facilities remarkable with the result that at the end of the war, India had several hundreds of Aerodromes, many of them with 2,000 yards concrete runways. Under the present plans, Aerodromes have been classified into 4 categories, International, Major, Intermediate and Minor. When the post-war plans of the Government of India fully mature, there will be 4 International, 10 Major, 32 Intermediate and 57 Minor Aerodromes in India. The International Aerodromes—Karachi, Delhi, Calcutta and Bombay—will be in a position to cater for all types of International traffic.

**Air Traffic Control.**—The demands of the present Air Traffic Control are so exacting that Air Traffic Control is fast developing into a highly specialised organisation with elaborate equipment and highly trained staff.

During the war, many of the Civil Aviation Officers joined the Air Forces and worked in Flying Control at R. A. F. Aerodromes. These Officers have now returned and form the nucleus of the post-war Flying Control organisation.

**Trans-India Sea-plane Route Organisation.**—There has been a change in the site of Sea-plane base at Karachi. Korangi Creek which is only a few miles from Karachi Harbour has been selected as the site for this new sea-plane base. There was some doubt about the suitability of this site during monsoons. Operations during this year have not offered any difficulty and it is expected that Korangi Creek will prove to be a suitable base for all the year round sea-plane operations.

At Allahabad also, a seasonal change of site has been found necessary, due to the lack of enough water in the river during the summer months, but on the whole the Allahabad Flying Boat base has given satisfactory service.

**Communications Services.**—The Civil Aeronautical Communication Service now comprises fifteen radio stations, namely, Allahabad, Bad, Bangalore, Bombay, Calcutta, Delhi, Gaya, Hyderabad, Jaipur, Jalandhar, Kanpur, Karachi, Lahore, Madras and Nagpur. In addition, there are two stations at Gwalior and Raj Samand which are at present maintained and operated on behalf of the Ministry of Civil Aviation and two stations at Bhuj and Jamnagar maintained and operated under arrangement with the State authorities. These stations provide communication facilities for aircraft and also carry out point-to-point services. Direction finding facilities on the international aeronautical frequency of 335 Kc/s are provided at all the stations above mentioned with the exception of Jharsaguda, Bhuj and Jamnagar. High Frequency direction finding facilities are also provided at Ahmedabad and Jharsaguda and a medium frequency four course radio range at Karachi.

Under the Civil Aviation post-war plan, aircraft and point-to-point communication facilities and navigational aids will be installed at approximately 50 aerodromes in India. These will cover international trunk routes and internal routes and will be equipped with

## Travel in India.

as which you have never known  
a visitor seeks variety and pictures-  
e is no region in all the world  
vid colour, of populous cities, of  
igned by master architects, of  
of diverse races, of absorbing  
study and observation such as the  
tions, philosophy and art of one  
civilisations.

ue lover of nature, the botanist  
ralist, India can offer every charm  
ountain, valley, cultivated plain,  
te.

ortman, it can furnish sport such  
tries can give; the tiger in the  
reat mahseer in many rivers, the  
on the jheels, the strong winged  
king pig and many another kind.  
n its enchanting reality still calls  
to the Sunder Bans (the Pretty  
ngal.

untainer, the Himalayas offer the  
nains in the world and some of  
us peaks which are still

far day when that most splendid of emperors  
Shahjehan, bowed his head before his wife's  
coffin in the vault of the finished Taj.

The Taj Mahal, however, is only one of the  
many interesting sights of Agra, and its Fort,  
Itmad-ud-Daulah's Tomb, Akbar's Tomb,  
5 miles from Agra, and Fatehpur Sikri, the  
deserted city of Akbar about 23 miles distant  
are all well worth a visit. No other fortress  
in the world presents so great an appearance  
of knightly splendour, of proud and noble  
dignity or, with a more sovereign grace, crowns  
its red bastions with so wondrous a collection  
of palaces, mosques, halls of state, baths,  
kiosques, balconies and terraces as Agra Fort,  
a mile and a half in circumference, with walls  
70 feet high faced with red sandstone. The  
vigorous style of decorative architecture that  
Akbar introduced into his red sandstone palaces  
was embellished by his grandson Shah Jahan,  
who was largely responsible for the delicate  
clay work and the low reliefs in white marble.  
There are no buildings to equal these except  
those found in the Palace in Delhi Fort which  
Shah Jahan built when he transferred his  
to Delhi. Akbar's vigorous

as supremely attractive style appears at its  
best in Fatehpur Sikri which he built in his joy  
at the realisation of his fondest hopes when  
his son Jahangir was born.

There in the year 1569 A.D. on a lonely  
eminence, Akbar founded his city and there  
began to rise as if by magic those great battle-  
mented walls, the magnificent palaces and  
courtyards, the great mosque and the other  
superb specimens of the skill of the Moghul  
stone-masons which stand to this day a source  
of endless wonder and admiration to visitors.

The traveller moves northward past Muttra  
and Brindaban, famous places of Hindu pil-  
grimage due to their association with the birth  
and early life of Lord Krishna, until Delhi is  
reached. Delhi, the capital of India, in days  
gone by and now the Imperial Capital of India,  
has no rival in greatness, as all men know that  
he who holds Delhi holds India. Here the  
visitor will find much that will interest and  
enthral him. Here he can trace the growth  
and fall of dynasty after dynasty, here he will  
find some of the best examples of the work  
of the Moghul period at his zenith as he wanders  
with muffled feet in the great courtyard of the  
largest mosque in India, the Juma Masjid, or  
in Shahjahanabad, the Fort and Palace of  
Shahjahan whose halls rival those of the palace  
in Agra Fort with their delicate inlay work in  
marble and their gardens. Here are crumbling  
memorials of the Mutiny, Hindu Rao's house,  
the Kashmir Gate beneath which some still  
salute dead Home and Salkhed as they pass,  
the tree encumbered sites of redoubt and  
battery, Nicholson's grave, Asoka's pillar, the  
site of the great Durbar.

Kutab, the first of the so-called seven cities  
of Delhi with its Kutab Minar, 238 feet in height,  
erected in the 12th century A.D. of red and  
cream sandstone overlooks the plain where  
many of the pages of history were written.  
The Kutab Minar, tapering from the base to  
the summit, is divided by five corbelled balconies  
while on the fluting is carved an intricate design  
in which are introduced verses from the Koran.

in you feelings which you have never known before. If the visitor seeks variety and picturesqueness, there is no region in all the world so full of vivid colour, of populous cities, of buildings designed by master architects, of bygone days, of diverse races, of absorbing subjects for study and observation such as the customs, religions, philosophy and art of one of the oldest civilisations.

To the true lover of nature, the botanist and the naturalist, India can offer every charm in forest, mountain, valley, cultivated plain, and wild waste.

To the sportsman, it can furnish sport such as few countries can give; the tiger in the forest, the great mahseer in many rivers, the wily snipe on the jheels, the strong winged duck, the jinking pig and many another kind. Jungle life in its enchanting reality still calls the visitor to the Sunder Bans (the Pretty Jungle) in Bengal.

To the mountaineer, the Himalayas offer the highest mountains in the world and some of the few famous peaks which are still unclimbed. Nanda Devi and Mount Everest still provide thrills to many.

To the statesman, businessman or politician who seeks rest and change without idleness, India presents a sense of busy administration, a nation in the making and an experiment such as has never before been tried.

**Bombay** itself is cosmopolitan like many of the world's great ports and in it you will find jostling each other in the streets representatives of half the races of mankind. The Towers of Silence and the Caves of Elephanta are among the sights to be seen. Elephanta is one of those delightful islands which are freely scattered upon the waters over which Bombay reigns as Queen.

But Bombay is a gateway and through it many interesting trips await the visitor and northwards to Delhi he has the choice of two routes either by the G.I.P. Railway *via* the Ellora and Ajanta Caves, Sanchi, Gwalior, Agra and Muttra or by the B.B. & C.I. Railway *via* Baroda and through Rajputana with its famous cities of Mount Abu, Udaipur, Ajmer and Jaipur to Agra and Muttra. If you decide to go by the G. I. P. Railway route, you will find at Ajanta frescoes which rival many of the old frescoes found in Europe while at Ellora are the most wonderful caves in the world, mountains cut into colossal sanctuaries. You will be able to compare the work of the Buddhists, the Jains and the Brahmans and learn more of Indian mythology than many hours of study will give you. At Sanchi are Buddhist buildings dating back to 150 B.C. The stone carvings are remarkable and are well worth a visit. As you proceed further north, Gwalior is reached. The great Fort of Gwalior has been described by Fergusson as "the most remarkable and interesting example of a Hindu palace of an early age in India." Seventy miles further on lies Agra and of all the romantic cities of India, Agra must surely come first for it contains that crowning glory in marble, the Taj Mahal. Generations have come and gone since that

far day when that most splendid of emperors Shahjehan, bowed his head before his wife's coffin in the vault of the finished Taj.

The Taj Mahal, however, is only one of the many interesting sights of Agra, and its Fort, Itmad-ud-Daulah's Tomb, Akbar's Tomb, 5 miles from Agra, and Fatehpur Sikri, the deserted city of Akbar about 23 miles distant are all well worth a visit. No other fortress in the world presents so great an appearance of knightly splendour, of proud and noble dignity or, with a more sovereign grace, crowns its red bastions with so wondrous a collection of palaces, mosques, halls of state, baths, kiosques, balconies and terraces as Agra Fort, a mile and a half in circumference, with walls 70 feet high faced with red sandstone. The vigorous style of decorative architecture that Akbar introduced into his red sandstone palaces was embellished by his grandson Shah Jahan, who was largely responsible for the delicate clay work and the low reliefs in white marble. There are no buildings to equal these except those found in the Palace in Delhi Fort which Shah Jahan built when he transferred his headquarters to Delhi. Akbar's vigorous but supremely attractive style appears at its best in Fatehpur Sikri which he built in his joy at the realisation of his fondest hopes when his son Jahangir was born.

There in the year 1500 A.D. on a lonely eminence, Akbar founded his city and there began to rise as if by magic those great battlemented walls, the magnificent palaces and courtyards, the great mosque and the other superb specimens of the skill of the Moghul stone-masons which stand to this day a source of endless wonder and admiration to visitors.

The traveller moves northward past Muttra and Brindaban, famous places of Hindu pilgrimage due to their association with the birth and early life of Lord Krishna, until Delhi is reached. Delhi, the capital of India, in days gone by and now the Imperial Capital of India, has no rival in greatness, as all men know that he who holds Delhi holds India. Here the visitor will find much that will interest and enthral him. Here he can trace the growth and fall of dynasty after dynasty, here he will find some of the best examples of the work of the Moghul period at his zenith as he wanders with muffled feet in the great courtyard of the largest mosque in India, the Juma Masjid, or in Shahjahanabad, the Fort and Palace of Shahjahan whose halls rival those of the palace in Agra Fort with their delicate inlay work in marble and their gardens. Here are crumbling memorials of the Mutiny, Hindu Rao's house, the Kashmir Gate beneath which some still salute dead Home and Salkhed as they pass, the tree encumbered sites of redoubt and battery, Nicholson's grave, Asoka's pillar, the site of the great Durbar.

Kutab, the first of the so-called seven cities of Delhi with its Kutab Minar, 238 feet in height, erected in the 12th century A.D. of red and cream sandstone overlooks the plain where many of the pages of history were written. The Kutab Minar, tapering from the base to the summit, is divided by five corbelled balconies while on the fluting is carved an intricate design in which are introduced verses from the Koran.

In the main courtyard stands the famous pillar of solid wrought iron devoid of rust and dating back to about 400 A.D. Visitors to Delhi should not miss seeing the Kutab for it is unique in India.

New Delhi, the eighth city of Delhi, is worthy to rank with its seven predecessors, Kutab, Siri, Tughlakabad, Jahanabad, Firozabad, Purana Qila and Shahjahanabad, the present-day Delhi. Here you find an example of town planning carried out by some of the leading architects and engineers in the world on a site where they could start with a free hand.

If you decide to take the route northwards from Bombay via Rajputana, then you will see another but equally interesting side of India. Rajputana, the land of chivalry, attracts the visitor as few places do. Alone at Udaipur is there, in its perfection, the fairy palace of one's childhood, just such a long cataract of marble terraces and halls falling into the waters of a mountain encircled lake, as the illustrator of an Andrew Lang fairy book delights to draw.

Mount Abu, the Rajput Olympus, combines the delights of a hill station with one of the historic homes of the gods. The Dilwara Temples, the masterpiece of Jain architecture, contain some of the finest carvings in India. Forests of marble columns, carved and polished till they resemble Chinese ivories, are linked by flying arches that twist and twine from pillar to pillar like exquisite creepers, softening outlines and producing the effect of a symphony of graceful movement.

Northwards from Delhi is the Punjab and the North-West Frontier Province whence a large number of the recruits for the Indian Army come. Here you will find Amritsar, the home of the Sikhs, Lahore, one of the most ancient and famous cities of India, the Khyber Pass, the historic gateway into India from the North, the flourishing cities of the Canal Colonies which have risen up since British engineers have harnessed the waters of the Punjab, "the Land of the Five Rivers", which formerly ran to waste, and many another city. Through the Punjab also you will travel to reach Kashmir, famous since the days of the Moghul Emperors.

The glory of Amritsar is the Darbar Sahib (the Golden Temple). The pavements of the sacred tank are all of marble from Jaipur and the tank itself contains a sheet of water 510 feet square. In the midst approached by a marble causeway, rises the Golden Temple, nearly cubical in form and decorated with wonderful richness.

Lahore grew in importance with the dawn of Moghul supremacy when Babar, the founder of that dynasty, made it a place of Royal Residence, reminiscences of which are to be found to-day in the pleasure gardens, tombs, mosques and pavilions of Moghul architectural beauty which have won undying fame for that dynasty here and elsewhere in India.

Khyber Pass, the great natural highway into India through the almost impregnable mountain barrier of the North-West Frontier, is rich in historical association and has from time immemorial been the route by which conquering

hosts have passed into India to disturb the peace of her people and continually alter their destiny. It is still the great trading route between India and the Central Asian States. On Tuesdays and Fridays when the continual string of caravans of great shaggy camels laden with merchandise, accompanied by stern, strong and picturesquely dressed men with their women and children from Central Asia are moving to and from Afghanistan, the pass presents a most interesting and unique sight.

Kashmir, described by poets as "an emerald set in pearls" is a land of rich forests and upland pastures, of slow flowing rivers and glittering mountain torrents, ringed with an almost unbroken girdle of mountain snow-capped all the year. If you can imagine Venice set in the heart of Switzerland, that is Srinagar, the capital of Kashmir. Life is good as you glide along the face of the lakes in a houseboat when the lotus flower is out and the banks are one mass of colour with the snow-capped mountains in the background. When days are warm on the lakes, a trip can be made up the valleys and you can live in Arcady and see the bear in his native haunts and the mountain does on the hill-tops.

For those who have arrived at Delhi via Bombay an interesting return trip can be made via Benares and Calcutta. Many visitors, however, enter India via Calcutta and from here also many interesting tours can be made.

Calcutta, one of the first trading ports of the British East India Company in India, was founded by Job Charnock; it is now the second largest city in the Empire. Its public buildings, the Indian museum, the Fort, the Jain Temple, the Hindu bathing ghats along the river front, the Hindu shrines, particularly the 'Kali Temple', are all worthy of attention.

Before winding your way towards Delhi, trips should be made to Darjeeling and to Puri. The ambition of every visitor to Darjeeling is to see Mount Everest, the world's highest peak, and, in order to do so they must travel some 7 miles away, past Ghoom station to Tiger's Hill (8,514 ft.) as from Darjeeling the mountain is not visible. The best time to see sunrise on Mount Everest is in the early Spring or late Autumn. Then at the end you will find a view unequalled in any other part of the world. Twelve peaks over 20,000 feet with the awe-inspiring Kanchanjunga in the centre are spread out before you.

Darjeeling is one of the nicest hill stations in India and is unequalled for its snow views. From anywhere in the town you see the awe-inspiring Kanchanjunga. The sheer grandeur of the Kanchanjunga snows give Darjeeling a high place in the list of hill stations.

Puri also is an easy run from Calcutta. There in front of the gate of the temple is the famous black marble pillar, one of the most beautifully worked things in India with a tiny figure of the Dawn on its capital. Incongruous as it may seem, in Puri all caste vanishes. The significance of this can be understood only by those who know India. Once a year the image of Krishna is carried in procession upon the

famous Jagannath cars to the Garden Temple. These cars, 45 feet high, standing on solid wooden wheels, seven feet in diameter, are dragged along by the devotees.

Twenty miles north of Puri, along the sea coast, or 54 miles by motor road, stands the unique chariot temple at Konarak, the temple of Surya (the Sun God).

On the road to Delhi, the visitor will travel through the Gangetic plain, one of the most fruitful areas of India. Here he will find cities sacred to the Hindus such as Budh Gaya and Benares, cities intimately connected with the mutiny like Lucknow and Cawnpore and other flourishing cities.

Budh Gaya is one of the most famous and most interesting of all the sacred sites of the Buddhists for it is the scene of the "Great Renunciation" and the Enlightenment of Gautama, afterward named Buddha. It marks the site of his long penance and his final victory over worldly desire.

Benares is reputed to be the oldest city in India, but there is no authentic record how old it is except that it is mentioned in those two great Hindu epics, the Mahabharata and the Ramayana, which deal with events long before the Christian era. Benares is, however, one of the most holy cities in India for the Hindu, and its spiritual significance is shown in the quotation: "Happy is the Hindu who dies in Benares, for he is transported at once to Siva's Himalayan Paradise on Mount Kailasa, north of Lake Manasa, where the great three-eyed ascetic seeing the past, the present and the future, sits in profound meditation."

Benares rests on the banks of the Ganges and floating down the river in a boat the sight of Aurangzeb's Mosque and the many picturesque temples and ghats recall to one's imagination through the dim vistas of time the endless processions of devout people wending their way down the narrow lanes to the temples with fragrant garlands to hang round the necks of the gods or to wreath in solemn devotion the emblem of Siva's divinity.

About 6 miles away from Benares lies Sarnath, where Buddha preached his first sermon after obtaining divine wisdom at Gaya, and in the adjoining Deer Park is a Museum of Archaeology of vivid interest. The Mahabodhi Society (The Central Organisation of the Buddhists) have their headquarters here and in their grounds is included a Buddhist temple with marvellous frescoes on its walls.

Lucknow is a city hallowed by memories of a grim struggle, of heroic deeds and noble sacrifice; its appeal to the Westerner is influenced by its historical connections, its beautiful buildings and the mysterious glamour so closely associated with the East. Legend connects the founding of the city with Lakshmana, son of King Dasaratha of Ayodhya and brother of Rama, the mythological hero of the Ramayana, the epic poem of the Hindus; but Lakshmanpur or Lucknow as it is now called was at its greatest under the five Kings of Oudh (1732-1856).

Visitors wend their way to the Residency and pay homage to the gallant band who held it during the Mutiny against terrific odds until relieved by Sir Colin Campbell. The

deeds of Lawrence who was in command until he was killed and of Havelock who made his historic but unsuccessful attempt to rescue the garrison and was himself besieged are well-known. (Sir Henry Havelock is buried in Alam Bagh, Garden of the World, which is about 4 miles from the Residency).

Among the historic monuments of Lucknow are the Great Imambara, (Machi Bhawan) the Small Imambara (Palace of Lights), and Shah Najaf built by Nawab Haidar Ali as a Masoleum. An old institution of note is the La Martinier College built by General Claude Martin for the education of European and Anglo-Indian boys and girls, though latterly children of Indian gentlemen are also being admitted. Claude Martin is buried in one of the vaults in the building. Fifty boys from the college helped in the defence of the Residency during the Mutiny. Other places of interest are the Dilkusha Gardens, Sikandra Bagh (now Government Horticultural Gardens) and Victoria Park. Life-size portraits of the Nawabs of Oudh are hung in a building situated in the last named resort. Two huge masoleums rise on Hazratganj Road—the main business centre—which are the tombs of Wajid Ali Shah, the last Nawab of Oudh, and his Begum.

Like Delhi, Lucknow is replete with historical lore and a visit to this town will greatly interest the visitor. Lucknow also boasts of an up-to-date museum and in the Harcourt Butler Zoological gardens, the animals live as near as possible in their natural surroundings.

Cawnpore is one of the most important industrial cities of India and here you will find up-to-date factories, a symbol of the West with the teeming bazaars where business is still carried on as it has been done for generations.

Northern and Central India are, however, not the only interesting parts of India and the South can show you sights unlike those in any other part of the world. South India is a land of temples, full of the most wonderful carving, while Mysore, one of the most progressive Indian States, can show you fine buildings, falls higher than Niagara and wonderful scenery.

Madras is the capital of the Madras Presidency and the third largest town in India, and the Presidency includes that part of India, which was one of the first in which English and other foreign nations settled. The visitor will still find in the large houses belonging to the merchant princes with their far spreading compounds, in the conveyances still used by the local inhabitants and in the scenery, which is the India of the old picture books, traces of what India used to be when first the English settled there.

Mysore commemorates in its name the destruction of Mahishasura, a minotaur or buffalo-headed monster, by Chamundi, the form under which the consort of Siva is worshipped as the tutelary goddess of the ruling family. Mysore State is a picturesque land of mountain and forest presenting the most diversified and beautiful scenery. The capital, which bears the same name as the State, is a city with many fine buildings and a visitor to India who wishes to see the working of an up-to-date Indian State situated among wonderful scenery cannot

do better than visit Mysore. Elephants range throughout the southern forests and from time to time keddah operations are undertaken when wild elephants are captured in stockades. Tigers, leopards and bears are numerous and bison is found in certain forests. The famous Gersoppa Falls present one of the most beautiful sights of wild untarnished nature to be found in India. Many of the temples contain examples of the finest carving, and Seringapatam, famous as the capital of Tippu Sultan and about nine miles from Mysore, is well worth a visit. For those who are travelling from Bombay to Colombo an interesting trip can be arranged *via* Mysore.

At Madura and Trichinopoly will be found examples of some of the best and most interesting work in South India.

Madura has been aptly described by European scholars as the "Athens of South India" and from time immemorial has been the abode of South Indian culture in all its aspects.

It contains one of the finest and largest temples in South India and unlike many other temples the tourist is allowed to wander without restrictions over most of it. Near Shiva's shrine and in the Hall (Mandapam) as it is called in the Vernacular and Sanskrit) of a Thousand Pillars can be seen some of the finest carving in stone in all the world. The workmanship is so fine, the chiselling so delicate that one is lost in silent admiration as one looks at the representations of the Hindu Pantheon and at the graceful figures of men, women and animals.

Trichinopoly is noted for its rock temple and about three miles away is Srirangam with its famous temple which is claimed as the earthly abode of Vishnu, the Lord of Creation.

Travancore, the most beautiful and fertile region in all southern India has many charms to offer the traveller within its domains. It has scenery ranging from a countryside of lakes, creeks and canals, to low hills, undulating land, rice fields and forests of cocoanut and areca palms, with a heavy undergrowth of pepper vines and tapioca. The dominant note in Travancore is one of luxuriance in vegetation and picturesque waterways. It has a wonderful highland zone with mountains reaching heights of from 5,000 feet to over 8,000 feet, and hills covered with the densest of virgin jungle, the home of great herds of wild elephants and bison, tiger, bear, black panther and wild boar, and where lies the lovely Periyar Lake over which one may cruise in comfort and see wild life in its natural habitat.

Trivandrum, the capital, is also accessible by well-kept roads from British India, and is connected by air with Bombay, Madras and Colombo, except during the monsoon.

About seven miles south of Trivandrum is Kovalam, a pleasant seaside resort with good facilities for bathing. Cape Comorin, the Land's End of India, is the southernmost point of Travancore, where the sunrise and sunset are magnificent sights. It is a sacred spot to Hindus and a place of pilgrimage as the reputed abode of Kanyakumari, the virgin Goddess to whom the temple there is dedicated.

North of Trivandrum is the ancient town of Quilon and to the north of this, a pleasant trip by boat along delightful backwaters or by car along a good motor road, is the busy seaport of Alleppey.

No one visiting India should miss the opportunity of seeing Burma for it is a country of extraordinary charm, a country of contrasts. Whatever be your hobby, whatever be your interest, be it sport, history, ethnology or botany, or should you be merely fond of beautiful scenery, you will find a greater variety in Burma than in probably any other country. You can see huge snowy ranges and alps spangled with rhododendrons and flowers unknown to science. You can find magnificent jungles almost impenetrable to man, bordering rushing torrents, or yet again you can see emerald green paddy fields and great winding rivers in the plains. Should you be adventurous and seek the wilder regions, you will find great gaps in the frontier unvisited by civilised men and peopled by head hunters, Chins, Nagas and the fierce Black Lisu. Yet you will also find civilisation in the big cities like Rangoon and Maymyo. Rangoon, the capital, is of special interest in that it possesses the famous Shwe Dagon Pagoda, the Sacred Golden Pagoda visited by more pilgrims than any other Buddhist Temple in Indo-China.

This short account of India is not intended to be comprehensive and does not even mention many of the interesting places to be visited, but it is hoped that it will give some indication of the wonderful paeagantry, the magnificent buildings of an older age, the sport, and the many things of interest which India and India alone can offer.

December, January and February are the most pleasant months for a visit to India. The days are pleasantly cool and except on the seaboard the nights are cold. India, speaking broadly, has no winter except in the far north. It is a land of sunshine and colour. But the traveller arriving before November or staying in the country beyond the month of March must expect to find the tropical sun asserting its sway unless he wends his way to fair Kashmir or to one of the hill stations of India; Simla, the summer capital of India, Darjeeling the delightful, or one of the many others situated among the hills of India.

AGRA.—Cecil, Imperial, Empress, Lawries.  
 AMRITSAR.—The Amritsar.  
 AURANGABAD.—State Railway Hotel.  
 BANGALORE.—The West End, Lavender's, Central.  
 BARODA.—State Guest House, near Railway Station (For Europeans and Indians).  
 BENARES.—Clarke's, Cecil, Civil.  
 BOMBAY.—The Taj Mahal, Green's, Majestic, Ritz, Grand, Pyrkas Apollo.  
 CALCUTTA.—Grand, Great Eastern, Spence's, Continental.  
 CAPE COMORIN.—The Cape Hotel.  
 CANNOPORE.—Berkeley House, Bellevue Hotel.  
 COOKDOOR.—Hill Grove, Hampton.  
 DARJEELING.—Bellevue, Mount Everest, Alice Villa and Carlton, New Elgin.  
 DELHI.—Imperial (New Delhi), Maidens, Cecil, Swiss Marina, York, Woodlands.  
 ERNAKULAM.—Malabar Hotel.  
 GWALIOR.—Hotel de Gwalior.  
 HYDERABAD (Dn.), AND SECUNDERABAD.—Perry's, Percy's, Montgomery's, Viccajee's, John's.  
 JAIPUR.—Jaipur State, Kaiser-i-Hind, New Hotel.  
 JODHPUR.—The State Hotel.  
 KALIMPONG.—Himalayan.  
 KARACHI.—Killarney, Bristol, Carlton, Central, North Western Stanyon's.  
 KURSEONG.—Woodhill.  
 LAHORE.—Faleth's, Nedou's, Sunny View, Braganza's.  
 LUCKNOW.—Carlton, Royal, Barlington.  
 MADRAS.—Connemara, Spencers, Bosotto.  
 MAHALESHWAR.—Granville, De Russe, Frederick.

MORMUGAO.—Antigo, Palacios.  
 Mr. Lobo's.  
 MOUNT ABU.—The "Rajputana Hotel."  
 MUSSOORIE.—Charleville, Hakman's, Grand Savoy.  
 MUTTRA.—Royal.  
 MYSORE.—Metropole, Savoy, Carlton.  
 NAINITAL.—Metropole, Royal.  
 OOTACAMUND.—Ooty Club, Savoy, Willingdon House, Cecil, Firgrove.  
 PESHAWAR.—Dean's.  
 POONA.—Napier, Wellesly, Royal.  
 PURI.—B. N. Railway, The "Lodge."  
 RANCHI.—B. N. R. Hotel, Claytons, Silver Oaks.  
 SHILLONG.—Pinewood, Ferndale, Stonylands Hermitage.  
 SIMLA.—Cecil, Clarke's, Corstorphan's, Grand Metropole, Central.  
 SRINAGAR (Kashmir).—Nedou's.  
 TRIVANDRUM.—Mascot.  
 UDAIPUR.—Udaipur Hotel, Lake View Hotel.  
 WALTAIR.—Sea View, Beach, Grand.

**Ceylon.**

ANURADHAPURA.—Grand.  
 BANDARAWELA.—Bandarawela.  
 COLOMBO.—Bristol, Dominion, Galle Face, Globe, Grand Oriental, Metropole, Isabella Court, Victoria.  
 GALLE.—New Oriental.  
 HAPUTALE.—Buona Vista.  
 HATTON.—Adam's Peak.  
 KANDY.—Suisse, Queen's.  
 MOUNT LAVINIA.—Grand.  
 NUWARA ELIYA.—Carlton, Grand, Grosvenor, Maysland, St. Andrew's.  
 TRINCOMALEE.—Maysland, Welcombe.  
 TALAWAKELE.—Coronation.

**AMERICAN CONSULS IN BOMBAY.**  
*Afghanistan*.—115, Walkeshwar Road, Malabar Hill.  
*Belgium*.—11, Carmichael Road, Cumballa Hill.  
*Brazil*.—11, Carmichael Road, Ballard Estate.  
*China*.—Sir Phirozshaw Mehta Road, Bombay.  
*Cuba*.—Churchgate Street.  
*Czechoslovakia*.—124, Wodehouse Road, Colaba.  
*Denmark*.—Indian Mercantile Chambers, Nicol Road, Ballard Estate.  
*Egypt*.—42, Queen's Road.  
*Finland*.—Finnish interests are looked after by the Consul General for Sweden at Bombay.  
*France*.—"Cleardine," 87-B, Nepean Sea Road.  
*Germany*.—German interests are looked after by the Consul General for Switzerland at Bombay.  
*Greece*.—17, Ravelin Street, Fort.  
*Hungary*.—Hungarian interests are looked after by the Consul General for Sweden at Bombay.  
*Iran*.—45-G, Navroji Gamadia Road off Warden Road.  
*Iraq*.—"Panorama," 203, Walkeshwar Road, Malabar Hill.  
*Italy*.—Italian interests are looked after by the Consul for Switzerland at Bombay.  
*Japan*.—Japanese interests are looked after by the Consul General for Sweden at Bombay.  
*Luxemburg*.—Haroan House, Bazargate Street, Fort, Bombay.  
*Monaco*.—39, Pydhownie Road.  
*Netherlands*.—314, Hornby Road, Fort.  
*Nicaragua*.—Alice Building, Hornby Road, Fort.  
*Norway*.—Imperial Chambers, Wilson Road, Ballard Estate.  
*Poland*.—Closed on 30-9-45.  
*Portugal*.—17, Cuffe Parade, Colaba.  
*Roumania*.—Roumanian interests are looked after by the Consul for Sweden at Bombay.  
*Spain*.—"Oceana," Marine Drive, Churchgate Reclamation, Bombay.  
*Sweden*.—Indian Mercantile Chambers, Nicol Road.  
*Switzerland*.—Maneckjee Wadia Building, 125, Esplanade Road.  
*Turkey*.—Firdaus, 56, Marine Drive.  
*United States of America*.—Indian Construction House, Nicol Road, Ballard Estate.

**States having Consulates in Calcutta but not in Bombay.**

*Argentine Republic.*—5, Fairlie Place (c/o Hoare Miller & Co.).

*Bolivia.*—Wellesley House, 7, Wellesley Place.

*Columbia.*—Vacant.

*Dominican Republic.*—102 and 104, Savabazar Street.

*Ecuador.*—6, Lyons Range (c/o Messrs. Turner Morrison & Co.).

*France.*—26, Park Mansions, Park Street.

*Haiti.*—2, Cornwalls St.

*Panama.*—Vacant.

*N.B.*—There are at present no Consuls for Costa Rica, Liberia, Salvador and Mexico at Calcutta. The Consulates for Guatemala and Chile have been abolished.

**Foreign Consular Officers in India.**

*Corrected up to July 1945.*

Name.	Appointment.	Station.
<b>Afghanistan.</b>		
Monsieur Sardar Gholam Mohammed Khan ..	Consul-General .. ..	Delhi.
Abdur Rahman Raoufi .. ..	Consul .. ..	Bombay.
Monsieur Muhammad Yunus Khan .. ..	Do. .. ..	Karachi.
<b>Argentine Republic.</b>		
*J. B. Turnbull .. ..	Vice-Consul .. ..	Calcutta.

## Foreign Representatives in India.

Name.	Appointment.	Station.
<b>United States of America.</b>		
The Honourable George R. Merrell .. .. .	Commissioner of the United States of America to India.	New Delhi.
T. Eliot Weil .. .. .	Secretary of Mission .. .. .	Do.
R. D. Gatewood .. .. .	Do. .. .. .	Do.
James A. Ross, Jr. .. .. .	Economic Adviser .. .. .	Do.
Dr. William A. Johnstone .. .. .	Principal Public Affairs Officer.	Do.
W. F. Dickson .. .. .	Agricultural Adviser .. .. .	Do.
Ernest H. Fisk .. .. .	Assistant Public Affairs Officer.	Do.
John A. Leavitt .. .. .	Economic Analyst .. .. .	Do.
Bernard Paulson .. .. .	Special Disbursing Agent .. .. .	Do.
Edwin D. Davis .. .. .	Administrative Officer .. .. .	Do.
James R. Billman .. .. .	American Vice-Consul .. .. .	Do.
<b>China.</b>		
Vacant .. .. .	Commissioner of China to India.	New Delhi.
S. H. Sih .. .. .	Secretary in charge, office of the Commissioner of China to India.	Do.
C. H. Shen .. .. .	Do. Do. .. .. .	Do.
C. C. Chuang .. .. .	Do. Do. .. .. .	Do.
Mee Wen-Kai .. .. .	Do. Do. .. .. .	Do.
P. Chang .. .. .	Do. Do. .. .. .	Do.
T. S. Tung .. .. .	Do. Do. .. .. .	Do.
<b>France</b>		
René Grimm-Provence .. .. .	Trade Commissioner .. .. .	Calcutta.
Georges Leroy .. .. .	Deputy Trade Commissioner.	Do.
Professor Olivier Lacombe .. .. .	Head of the Cultural Mission.	Do.

The station has a mean annual rainfall of about 65 inches, a major portion falling in the months of October, November and December. Pleasant showers are experienced during April, May and June, the season months, and help to keep the station dust-free for parties and picnics. Neither hot nor cold, Kodaikanal ever accords a warm welcome to every visitor seeking a holiday, a haven of ease and comfort to recoup and rejuvenate, free from the heat of the plains. Kodaikanal is the delight of the gardener. Flowers bloom all the year round.

**Water-Supply.**—The town enjoys the benefit of an excellent water-supply from the Pambur stream which was dammed and converted into a reservoir in 1914.

**Amenities.**—Kodaikanal affords a variety of exhilarating amusements to the tired visitor. The lake is the chief attraction and is skirted by a three-mile road which provides excellent walks. Overlooking the lake are the several residences. The excellent golf course is popular during the season. The many waterfalls make for ideal picnic resorts. The "Fairy-falls" just below the Observatory, "Silver Cascades" on the Law Ghat Road, "Bear Shola Falls" extremely pretty and a good place for picnics and "Glen Falls" on the way to Vihpatti, are some of the popular sights.

Coaker's Walk (so named after a Lieutenant who was on duty in the district from 1870 to 1872) is a semi-circular footpath, by the side of the English Church, which runs along the southern brink overlooking the plains. The view from here is considered by many as unrivalled. On Coaker's Walk the visitor is alone with nature in its varied profusion. Away in the hazy distance lies the ancient city of Madura and on the right the rugged face of the cliff known as the Dolphins Nose.

"The Pillar Rocks" are three masses of granite, some 400 feet high, which stand on the edge of the same side of the plateau as Coaker's Walk but about three miles farther on. They are reached by a fine road which runs through beautiful scenery, well wooded with pines and eucalyptus and form a favourite rendezvous for picnic parties. Between and below them are several caves and chasms into which the more adventurous can descend.

**Solar Observatory.**—Crowning the heights of the Palm Hills, and 850 feet higher than the lake is the Government Solar Observatory surrounded by beautiful fir plantations. It is a long pull and a strong pull from the lake bund though only two miles in distance.

**Sport.**—The adventurous can find big game within a few miles of Kodaikanal. Riding is not popular on the hills for lack of facilities. Hiking finds many votaries. The station is well equipped with the ordinary amenities of life.

Kodaikanal Club is open to visitors. There are also the Boat Club, an Indian Club and a Ladies' Club. Hotels and travellers' bungalows are available. The Municipal authorities publish annually a list of bungalows available for renting and are willing to help visitors during their stay at the station.

The latest addition to the roads on the hills is the Goschen Road popularly known as the "Forty-Miles-Round" leaving the municipal

limits at Pillar Rocks to the Berjam lake and thence to Mannavanur and back to Kodaikanal. The scenery throughout is of pleasing downs in contrast to the wooded areas in the vicinity of Kodaikanal.

### KOTAGIRI.

It is about 14 miles from Coonoor and 18 miles from Ootacamund. Motor buses run from Coonoor railway station daily in connection with the Mail trains and the road journey does not occupy more than an hour. The bus fare is about ten to twelve annas per passenger for a single journey. Cars are also available at about Rs. 7 per trip or Rs. 10 to and fro.

Kotagiri stands, similar to Coonoor, on the lower ridge of the main plateau, but 500 feet higher than Coonoor and 800 feet below Ootacamund Ooty; it thus enjoys a climate half-way between that of Coonoor and Ootacamund—the mean day temperature being 62 degrees. It is also visited by the north-east monsoon and its rainfall is identical with that of Coonoor.

There are not naturally the same facilities as at Coonoor or Ootacamund, but the natural surroundings are even more beautiful, and to those who seek rest and seclusion in a mild form it is an ideal resort.

Hotel.—Blue Mountain.

### KULU VALLEY.

**Kulu.**—A sub-division of the Kangra District of the Punjab—is situated north of Simla and east of Kangra. "Valley of the Gods" is an apt designation as, in addition to several important deities like Ragnathji at Sultanpur and Jamli of Malana, every village has its own particular godling to which the inhabitants pay homage.

Amritsar is the main line junction for Kulu. A broad-gauge branch line runs from Amritsar to Pathankot and a narrow-gauge from Pathankot to Nagrota, the present rail head. Bus services to Kulu are available from Pathankot and Nagrota. This main motor route has seen considerable improvement during recent years and two-way traffic now extends to Jogindernagar, headworks of the Mandi Hydro-Electric scheme. Beyond this point one-way traffic only is permitted with crossing stations at Urala, Drang, Mandi and Aut—all in Mandi State. Kulu can also be reached by trekking from Simla, via the Jalori and Basleo Passes, and from Mandi by way of the Bhabu and Dulchi Passes; also by several other lesser-known routes all of which are rather difficult.

From the foot of the hills, a few miles beyond Pathankot, the motor road provides a variety of scenery and feature, of historical interest unequalled by any other hill road in the Punjab. The rich cultivation of the Kangra valley; the extensive tea gardens surrounding Palampur and Baijnath; the majestic snow-capped mountains of the Dhuala Dhar range standing out in bold relief against the sky line; the ancient temples of Baijnath; the long climb from Jogindernagar to Ghatasni and the winding descent into Mandi City. This city, capital of the State, affords a pleasant halting place for travellers, and provides comfortable accommodation at its commodious dak-bungalow, located on a small hill overlooking the quaint old town. After leaving Mandi the road enters the narrow confines of the Mandi-Larji gorge where, in places, it has been blasted through solid rock and occa-

sionally juts out over built-up galleries which overhang the turbulent river far below. Beyond Aut the valley opens out and the final stretch through the lovely Kulu valley, mainly along the left bank of the Beas, offers an entirely different type of scenic effects. The motor road ends at Manali, but a trade route, suitable for pack traffic, continues over the Rohtang and Bara-lacha Passes (13,500 and 16,500 feet respectively) to Lahoul, Ladakh, Spiti, Yarkand and other remote countries in Central Asia.

The main centres in Kulu Valley are :

**Kulu (Sultanpur).**—4,000 feet. The principal town in the Sub-division and the main shopping centre for stores and provisions. Tehsil, sub-Treasury, Police Station, Hospital, Dak-bungalow, Serai and departmental Rest-houses are all located on the large deodar-fringed *maiden* at the entrance to the town.

**Raison.**—4,600 feet, eight miles from Sultanpur. Accommodation for visitors at "Mayflower" and "The Shacks". Rough golf, tennis and swimming available.

**Katrain.**—4,800 feet, twelve miles from Sultanpur, in the widest part of the Kulu Valley. Accommodation for visitors at "Riverview", adjacent to the main road. Trout hatcheries and stock ponds within half-a-mile.

**Naggar.**—5,800 feet, on the opposite side of the valley to Katrain and summer headquarters of the Sub-divisional and Forest Officers. Departmental Rest-house and Serai, but no hotels.

**Manali.**—8,000 feet, head of the valley and terminus of the motor road, twenty-three miles from Sultanpur is situated amid typical Alpine scenery and within easy distance of the Rohtang Pass. Accommodation for visitors at Sunshine Orchards. Departmental Rest-houses and Mission Hospital.

A number of furnished cottages at Raison, Katrain, Naggar and Manali are also available for visitors to the Valley.

**Climate of Kulu.**—Climatically the best seasons in Kulu are from March to May then again from the beginning of September to the end of November. June, July and early August are usually warm, but never uncomfortably so, especially at the upper end of the Valley. With the exception of Manali, the road to which may occasionally be closed by heavy snow in winter, the Valley is open the whole year.

**Road Transport.**—The Kulu Valley Transport, Ltd., and the Mandi Transport Co. Ltd., run direct bus services from Pathankot and Nagrota to Kulu. As these company's buses run on alternate days it is advisable, when making reservations, to write to both, whose addresses are Mandi City, Mandi State, Punjab.

### MATHERAN.

(2,500 ft.)—The nearest hill station to Bombay, ideal for walkers and anybody wanting rest and quiet. Reached by taking train from Victoria Terminus, Bombay, to Neral (about 1½ hours) whence Matheran may be reached by hill railway (1½ hours) or by pony, rickshaw, or on foot by a good walker.

Though Matheran is no more than 2,650 feet high there are few stations in India, even though their height is far greater, which yield such

magnificent views. The reason for this is that the plain from which hills rise is itself several hundred feet above sea-level. Matheran looks on to the sea, and the coastal plain rises imperceptibly until it reaches the steep ascent of the Ghats.

In his walk round the eighteen miles circumference of Matheran Hill, the visitor can reach no fewer than twenty points. Each has its own character and at almost every one of them the visitor will find comfortable seats, shady trees and fine views. At least six points call for special notice—Garbut, Panorama, Porcupine, Lonsa, Chowk and Alexander Points.

Hotels.—Rugby, Cecil, Lord.

### MAHABLESHWAR.

(4,500 ft.)—Until recently, when expenditure had to be cut down, the summer seat of the Government of Bombay. Those who do not motor the whole way from Bombay, a distance of about 180 miles, usually take train to Poona and then hire a car from Poona to Mahableshwar. Mahableshwar is noted for its delightful vegetation: orchids and lilies bloom in April and May.

Hotels:—Frederick, Race View and Fountain.

### MOUNT ABU.

(4,500 ft.)—An ideal place for combining the pleasures of a mountaineering holiday with the interests of an archaeological excursion. Reached by B. B. & C. I. trains to Ahmedabad, thence by metre-gauge to Abu Road, whence the journey is completed by car. The Rajputana Hotel is recommended. There are local libraries and picture houses and also a Dak Bungalow, containing furnished rooms, permission to use which must be obtained from the Assistant Engineer, P.W.D., Mount Abu. There are excellent gold links and the Station is electrified and has waterworks with public utility taps.

### MURREE.

(7,000 ft.)—The summer headquarters of the Northern Command. Magnificent views and walks. Visitors take train to Rawalpindi whence they complete the remaining 37 miles by car. The principal hotels are the Cecil, the Viewforth and the Brightlands.

### MUSSOORIE.

(7,500 ft.)—Much frequented on account of its exceptionally fine climate. Reached from Bombay by G. I. P. or B. B. & C. I. trains to Dehra Dun, a journey of 35 hours, where it is necessary to change over to motor which reaches Mussoorie about two hours later.

Mussoorie has an excellent water-supply, electric lighting system, hospitals, Nursing Homes, churches, banks and some of the best schools in India, both for boys and for girls.

What it particularly boasts of, however, are the number of interesting and beautiful walks and places for excursions.

The leading hotels are the Charleville, Hackman's and the Savoy.

### NAINI TAL.

(6,500 ft.)—Is the summer residence of the Governor of the United Provinces. From Bombay there are two ways of getting there. The first is to take either G. I. P. or B. B. & C. I. train to Muttra, thence by metre-gauge to Kathgodam, and thence by motor (2 hours)

The second route which takes about 5 hours longer is to take G. I. P. train to Lucknow and then change over to the metre-gauge railway. The Manor House, Metropole and Royal are the best hotels.

### OOTACAMUND.

Familiarily known as Ooty, is situated on the famous Nilgiri Hills at an altitude of 7,500 feet. The mean average of temperature for the year from sunrise to sunset is 57.33 degrees.

In no month is the day temperature less than 54.33 degrees, or more than 61.06 degrees. The nights are, however, cold and, during the winter months, the thermometer touches freezing point.

One of the main features that distinguish Ootacamund from other hill stations is the length of motorable roads it has. The town itself has the appearance of a vast park with its broad well-kept roads which traversed country of beautiful gardens and extensive stretches of turf studded with ornamental trees. The Botanical gardens in the centre, the Race Course, the palaces of the several noblemen, the Assembly rooms and the Government House help to make the town attractive and cheerful. The hydro-electric head works at Pykara is within 18 miles of Ootacamund and is worth a visit.

Ootacamund is the administrative centre of the District and the seat of the Government of Madras for three months of the year from April to July. Reached either by taking train to Mysore (40 hours from Bombay) and then changing to motor-car for five hours, or by taking train to Mettupalayam *Via* Madras and thence by hill railway of Ootacamund.

Ootacamund is a Sportsman's paradise where plenty of shooting is available. Trout fishing is a special attraction. It possesses one of the best holiday golf courses in East India and tournaments are held in May and September.

The principal hotels are the Savoy and Cecil.

### PACHMARHI.

(3,500 ft.)—Situated on a plateau in the Mahadeo Hills of Satpura range of which the highest peak is Dhupgarh range, is the summer quarters of the Government of the Central Provinces. A delightful hot-weather health resort. Reached by G.I.P. railway to Pipariya *Via* Jubbulpore or Itarsi, and a two hours' motor journey. It has 18 links Golf course and numerous picnic points. The bazar of Pachmarhi is in the Cantonment area.

### SIMLA.

The summer headquarters of the Government of the Punjab is situated on several small spurs of the lower Himalayas at a mean elevation of 7,100 feet above sea-level.

From the beginning of October to about the middle of December, Simla enjoys the best climate in the world and throughout the year

it is very equable there being a variation of about 10 degrees between night and day temperatures. The mean rainfall approximates 64 inches. Mean maximum temperature 60 degrees, mean minimum 50 degrees. Kalka, which is 2,100 feet above sea-level, is the terminus for the Broad-gauge railway system and from thence onwards the metre-gauge takes its place, meandering to Simla through over 100 tunnels. For those who prefer a more luxurious mode of travel, rail motors are run by the railway and *en route* the scenery is superb with luxuriant foliage, chiefly of conifers, oak and rhododendron. At Kalka motor cars are available for those who would prefer to travel by road and the journey is completed within 3½ hours. For cheaper travel there is now a bus service to and from Simla.

There are several excellent hotels in Simla, The Cecil, Corstorphans, Clarkes, Grand and for orthodox Indians, Hindu and Muslim and Taj Hotels. In Mashobra, 7 miles out of Simla, there are The Gables and Wild Flower. Boarding houses are in the minority, the best known are Talbot House and Baynston. The Y.W.C.A. and the Y.M.C.A. hostels are open for the greater portion of the year. The United Service Club is also residential for Military Officers and Civil Servants.

The climate of Simla may be divided into four seasons of about three months each. The first quarter beginning with January, rough, snowy, stormy and raw. The second dry and sunny with gradually increasing dust and heat. The third rainy, damp and relaxing. The fourth bright, clear and bracing. In May and June the average maximum temperature is about 73 degrees. In January and February the average minimum temperature is about 36 degrees.

There is a very good road into the interior and hikers to Narkunda, Kotgarh and Rampur Bushahr are lodged in rest-houses that line the road. From Simla there are 2 routes to Mussoorie a distance of 145 miles and little difficulty is experienced for accommodation *en route*; permission to occupy Dak bungalows and Forest Rest Houses must be obtained from the officials concerned. A regular motor bus service now runs to Narkunda and Kotgarh and holiday makers leave at 9 a.m. and are back in Simla by evening or they can stay over-night in the Dak Bungalows that line the route.

There are also direct routes to Tibbet, Srinagar, (Kashmir) and Dalhousie, and motor vehicles are permitted to ply by the Municipality on a pass as far as Narkunda. The scenery *en route* is lovely.

Simla is well provided with a number of excellent Schools, Bishop Cotton and Saint Edward's for the boys and Auckland House, Tara Hall, Jesus and Mary Convent (now about to be rebuilt after the recent conflagration which almost destroyed it) and Mayo School for the girls.

**CLIMBING IN THE HIMALAYAS.**

Owing to their immensity and the time and cost involved in undertaking expeditions into the Himalayas a great deal of mountaineering and exploration remains to be done in the world's highest mountain range. There are over fifty summits of 25,000 ft. and of these only two, Kamet (25,447 ft.) and Nanda Devi (25,660 ft.), have been scaled, whilst there are innumerable lesser summits of such formidable difficulty, owing to the comparatively recent geological formation of the range, that judged by modern mountaineering standards the majority are inaccessible. The highest peak is Mount Everest, which by latest measurements is 29,141 ft. Next come Kanchenjunga and K2, both about 28,150 ft., though which is the higher of the two is not certain.

**Pioneer Climbers.**—Mountaineering in the Himalayas began some eighty years ago when surveyors crossed high passes and scaled peaks in the course of their work. Among these pioneers must be mentioned the Schlamintweit brothers, who in 1855 reached a height of 23,329 ft. on the Eastern Ibi Gamin, one of the subsidiary peaks of Kamet, whilst I. S. Pocock of the Survey of India set up a plane table at 22,040 ft. in the same district. Another notable early explorer was the famous botanist Sir Joseph Hooker who, in 1849, explored the Sikkim valleys of Kanchenjunga and made attempts to climb Kanchenjunga, 22,700 ft. and Pauhuri, 23,150 ft. Some remarkable explorations were also carried out by the Pandits of the Survey of India. Among these men was Babu Sarat Chandra Das who traversed the Jonsong La, 23,200 ft.

Later in the nineteenth century came Lord Conway who, in 1892, made explorations in the Karakoram Himalayas, particularly in the region of the Baltoro Glacier, the greatest of Himalayan glaciers, and climbed a peak of 23,020 ft. Sir Francis Younghusband also made explorations in the Karakoram and accomplished the first crossing of the Karakoram Pass. The Duke of the Abruzzi also made a number of expeditions into this range and reached a height of 25,000 ft. on the Bride Peak. Mountaineering developed rapidly in the "nineties", and a bold attempt was made by A. F. Mummery, Professor N. Collie and Brigadier-General the Hon. C. G. Bruce to climb Nanga Parbat. In a final attempt on the mountain Mummery and his two Gurkhas were lost. In 1899 D. W. Freshfield made the first circuit of Kanchenjunga and explored the Nepal side of the mountain.

**A New Phase.**—Meanwhile, thanks to Brigadier-General Bruce, Gurkhas, and later Sherpas and Bhottas were trained for mountaineering and, with the advent of first-class portage, Himalayan mountaineering entered on a new phase. Dr. and Mrs. Bullock Workman made a number of expeditions into the Karakoram and W. W. Graham made a number of remarkable ascents, with Swiss guides, including an ascent of Kabru, 24,000 ft., which has been the subject of much controversy. Kabru was later attempted by two Norwegians, Messrs. Rubenstein and Monrad Aas, who got within a few feet of that top.

The present century opened with a number of remarkable ascents by Dr. A. M. Kellas, who died during the 1921 Everest expedition. He climbed several great peaks including Kanchenjunga, Pauhuri and Chomomo and made expeditions to the Central Himalayas where, with Colonel H. T. Morshead he reached in 1920 an altitude of 23,500 ft. on Kamet.

In 1907 Brigadier-General Bruce, Dr. T. G. Longstaff and A. L. Mumm explored the Garhwal Himalayas and reconnoitred Kamet. After this Longstaff, with the Swiss guides Alexis and Henri Brocherel, ascended Trisul, 23,406 ft. which, until the Jonsong Peak, 24,344 ft., was climbed in 1930 remained the highest summit reached. In 1911 and 1912 attempts were made to climb Kamet by C. F. Meade and his Swiss guides and a height of 23,500 ft. was gained. Captain Morris Slingby also attempted Kamet at this time.

**Attempts on Kanchenjunga.**—The first attempt on Kanchenjunga was made in 1905 but ended in disaster, Lieut. Pache and three porters being killed by an avalanche. The second attempt in 1929 was made by a solitary American, E. F. Farmer, who lost his life. In the same year a determined attempt was made by a party of Bavarian Mountaineers led by Paul Bauer. A height of over 24,000 ft. was reached on the north-east spur before bad weather forced the party to retreat.

In 1930 a fourth attempt was made by an International expedition led by Professor G. Dyhrenfurth. The party attempted the mountain from the Nepalside, but were repulsed by an ice avalanche which killed one of the porters. Subsequently, they ascended a number of peaks including the Ramthang Peak, 23,200 ft. and the Jonsong Peak 24,344 ft.

The fifth attempt in 1931 was made by Bauer and his party, but failed at a slightly greater elevation than was attained in 1929. One of the party H. Schaller and a porter were killed by a fall during the expedition.

In the summer of 1931 a party of young British climbers led by Mr. F. S. Smythe succeeded in reaching the summit of Mount Kamet (25,447 ft.), the first peak over 25,000 ft. to be climbed.

**Mount Everest.**—There have been six Expeditions to Mount Everest of which those in 1921 and 1935 were reconnaissances and those in 1922, 1924, 1933, 1936 and 1938 attempts to reach the summit.

The preliminary expedition for the reconnaissance of the approaches to Mt. Everest carried out its work in the most complete manner under the leadership of Lt.-Col. C. K. Howard-Bury. The approaches to Mt. Everest on all its northern faces were thoroughly examined, and relations were established with the local authorities. On the information and experience of the reconnaissance expedition the second expedition to Everest was organised and set off the following year under the leadership of Brig.-Gen. the Hon. C. G. Bruce. Capt. G. I. Finch and Capt. J. G.

Bruce succeeded with the help of oxygen in reaching the height of 27,300 ft. During this expedition seven men were killed when an avalanche swept them over an ice cliff some 60 feet high.

The 1924 expedition was again commanded by Brig.-Gen. Bruce. But owing to his ill health Lt.-Colonel E. F. Norton took on the command. Lt.-Col. E. F. Norton and Dr. T. H. Somervell reached a height of 28,100 feet. Then a final attempt was made by G. L. Mallory and A. C. Irvine. They were assisted by a supporting party consisting of N. D. Odell and J. de V. Hazard. On June 6th they left the 25,000 feet camp with three porters who carried loads for them up to 26,800 ft. On June 8th they left camp for their attempt and were never seen again. On June 10th for the third time Odell climbed up to the 26,800 feet camp but could find no sign of Mallory and Irvine, and communicating with Norton evacuated the mountain.

The expedition of 1933 followed a successful effort by Lt.-Col. J. L. R. Weir, Political Officer in Sikkim, to obtain the permission of the Tibetan Government for a further attempt to climb the mountain. An Everest Committee was formed under the aegis of the Royal Geographical Society and the Alpine Club, and Mr. Hugh Rutledge, formerly of the I.C.S., accepted its invitation to take charge of an expedition. Included in it as members were Mr. F. S. Smythe, leader of the successful Kamet Expedition of 1931, and Capt. E. St. J. Birnie, E. E. Shipton and Dr. C. R. Greene who climbed with Mr. Smythe in 1931. The Expedition reached Calcutta in February and forthwith proceeded to its main task.

The 1933 expedition established its base in the Bongbuk Valley on April 17th and on April 21st. Camp I was established. Thenceforward the expedition was dogged by exceptionally bad pre-monsoon weather which greatly hindered the establishment of camps and made the ascent to the North Col. 23,000 ft. prolonged and arduous work. Camp IV, 22,800 ft. was not established until the middle of May after a 40 feet ice wall on the North Col. slopes had been climbed. The expedition was equipped with wireless which enabled weather reports to be received from the meteorological authorities at Alipore. One installation was at Darjeeling, one at the base camp and a third at Camp III, 21,000 ft. Camp III was linked to the North Col. by field telephone so that messages could be received up to 23,000 ft. from the plains of India in a short space of time.

Owing to a series of blizzards and high winds Camp V was not established until May 22nd. But it was pitched at 25,500 ft. several hundred feet higher than previously. The party was then cut off for three days by a furious blizzard and eventually had to retreat to Camp IV. The Camp was re-established on May 28th and on May 29th. Wyn Harris, L. Wager and J. L. Longland continued the ascent and finally pitched Camp VI at 27,400 ft., 600 ft. higher than in 1924, after a magnificent effort on the part of the porters. Longland then brought the porters down but had a terrible time in a

blizzard and only by exercising great mountaineering skill steered them down to Camp V. The following morning Wyn Harris and Wager made a reconnaissance of the route to the summit and failing to discover a route along the crest of the north-east ridge finally followed the same route as Norton in 1924. They were stopped by dangerous conditions at 28,100 ft. and returned to Camp VI where they met Shipton and Smythe who had come up from Camp V, after which they descended to Camp V. The following morning Shipton and Smythe were unable to leave Camp VI owing to a high wind but on June 1st they made their attempt on the summit.

An hour and a half after leaving the Camp Shipton had to return owing to some internal trouble. Smythe carried on alone and reached approximately the same point as Wyn Harris and Wager before he was forced to retreat owing to the deep powdery snow resting on the steep slabs. Shipton descended to Camp V the same day in very bad weather and Smythe spent a third night at Camp VI descending to Camp IV next day in a blizzard. Owing to frostbites, strained hearts, and high altitude deterioration the party had to retire to the base camp. A week later they returned to Camp III to make another attempt. Owing, however, to the breaking of the monsoon this had to be abandoned and the expedition returned to Darjeeling.

An extraordinary attempt to climb Everest was made in 1934 by Maurice Wilson, a young airman. Having penetrated Tibet in disguise he marched to Everest and with a few porters went on in reaching 21,000 feet. He then succeeded alone and nothing more was heard of him, until his body was discovered near the site of Camp III, 21,000 feet, by Mr. E. E. Shipton's party in 1935.

Early in 1935 the Tibetan Government granted permission for a further attempt to take place from June 1935 to June 1936 inclusive.

As there was no time to organise an attempt on the summit it was decided to send out a small party under the leadership of Mr. E. E. Shipton. This had as its objects: Collection of data as to monsoon snow and weather conditions; examination of alternative routes from the west, the trying out of new men for the summit attempt; physiological observations; a stereophotogrammetric survey; examination of ice formations on the North Col.

This expedition proved that Everest cannot be ascended during the monsoon and that the only hope of an ascent is during the period immediately before the monsoon.

Conditions during the monsoon are extremely dangerous and the party had a narrow escape from an enormous avalanche that fell from the slopes of the North Col.

During the course of this reconnaissance two dozen peaks over 20,000 feet high were ascended.

The 1936 expedition was led by Mr. Hugh Rutledge and included three of the 1933 climbers Messrs. Shipton, Smythe and Wyn Harris, and one of the 1933 Signals Officers Lieut. Smith Windham. It encountered exceptionally bad

weather and unusual conditions. Before the monsoon, snowstorms rendered the mountain unclimbable and the usual pre-monsoon north-west wind was lacking to clear the snow away. However, Camp IV on the North Col. was established to schedule and the party were in position to attack the summit when the weather broke and two feet of snow forced them to retreat down the dangerous slopes of the North Col. To cap their discomfiture the monsoon arrived on the exceptionally early date of May 24th. Two attempts were made to re-open the route to the North Col. but on both occasions the party were in great danger and the attempt had to be abandoned when Shipton and Wyn Harris were carried down by an avalanche and nearly lost their lives. Subsequently reconnaissance parties ascended the main Rongbuk glacier and examined the west side of the North Col. which, in spite of Mallory's unfavourable verdict, was found to be not only practicable but less dangerous in monsoon conditions than the east side.

The 1938 expedition consisted of seven climbers, H. W. Tilman, E. E. Shipton, F. S. Smythe, N. E. Odell, Dr. C. B. M. Warren, P. Lloyd and Capt. P. R. Oliver and was led by Mr. Tilman. It was considerably smaller than previous expeditions owing to economic reasons and because experience has shown that the small light expedition has as good and perhaps better chance of achieving its object than a large cumbersome expedition rendered comparatively immobile by its transport and tied down to a fixed plan. Though the expedition failed to reach the summit of Mount Everest it fully justified these beliefs and cost only £2,500 as against the £10,000 or more of previous Everest expeditions.

The expedition reached Rongbuk on April 6th and established Camp 3 on April 26th. Wind and cold made further advance impossible and the party descended to the Kharta valley for a rest and to recuperate from influenza, chills and sore throats. They returned in the middle of May during the commencement of the monsoon which broke on the unprecedented date of May 5th, one month to six weeks earlier than usual. The route up the North Col. was forced in dangerous snow conditions and the party had a narrow escape from an avalanche. Camp 4 was established on May 24th but snowstorms drove the party down. It was then decided to regain the North Col. from the west via the Main Rongbuk Glacier and Camp 4 was re-established after a difficult ice climb on June 5th. On June 8th Camp 6 was established by Shipton and Smythe with seven porters and the following day an attempt was made to reach the summit. Conditions, however, proved impossible owing to deep monsoon snow, and the party was forced to retreat after reaching a height of 27,300 ft. A further attempt by Tilman and Lloyd on June 11th met with no more success and the expedition had to be abandoned.

**Aerial Expedition.**—An interesting side to the exploration of Everest was an aerial expedition undertaken in 1933 for the purpose of photographing the mountain from the air. This venture was financed by Lady Houston. Major L. V. S. Blacker, formerly of the Guides, was its leader

and in charge of its survey work, Lord Clydesdale chief pilot, Flt. Lt. A. McIntyre second pilot and Major P. T. Etherton, its London manager. Two specially equipped aeroplanes, adaptations of the well-known Wapiti, were provided. A special point in their equipment was the provision of compressed oxygen for supply through gas masks to the aviators at high altitudes. The expedition was not permitted to fly across the Tibetan frontier, so as to circle Mt. Everest, but both machines successfully flew over the peak and several good photographs were taken of it. By permission of the Nepal Government a line of flight from Purnea, the base of the expedition, across Nepal territory to Mt. Everest, was taken and along this good survey photographs as the somewhat poor visibility at the time of the flight, in April permitted.

An interesting mountain flight of which details were published in 1933 was one from Risalpur to Gilgit and back, undertaken by the R. A. F. at Risalpur in the course of its routine duties in October, 1932. The expedition was commanded by F. Lt. Isaac and was made by five of the machines ordinarily in use by the Force. The distance from Risalpur by way of the Indus Valley and past Nanga Parbat to Gilgit is 286 miles. It was covered in 2 hrs. 20 mins. on the outward flight and in 2 hrs. 5 mins. on the return journey. From Gilgit the machines further proceeded upon flights over the Hunza, Nagar and Rakjot areas. Brilliant photographs of Nanga Parbat and Rakaposhi, as well as of other places of importance or interest, were taken. Such flights are now frequently made by the R.A.F.

The year 1932 saw a well organised expedition to **Mount Nanga Parbat**. It was conducted by Dr. Merkl, of Munich, and included Lt. R. N. Frier, of the Gilgit Scouts, who acted as transport officer, an American Mr. Rand Herron and Miss E. Knowlton, of Boston, U.S.A. Several determined attempts to reach the summit of the mountain in August were brought to an end by the break-up of the weather before they attained success.

**The Disaster of 1934.**—In 1934 Herr Merkl returned to the attack with an even stronger party, which included a number of well-known German and Austrian mountaineers and Captains Frier and Sangster of the Indian Army as transport officers. Fatality early overtook the expedition, Herr Drexel dying of pneumonia. Owing to various delays, Camp IV was not established until the end of June. The party then proceeded to rush to the peak leaving only skeleton camps behind. Finally, after a height of 25,600 feet had been reached, and Camp VIII established at 24,800 feet, a terrible blizzard broke. The party retreated, but owing to the storm and ill-equipped camps retreat became a route during which no fewer than nine lives were lost, Herren Merkl, Welzenbach and Wleland and six Darjeeling porters—men who had accompanied the 1933 Everest Expedition. Of the Europeans only the two Austrians Herren Schneider and Aschenbrenner escaped whilst of the surviving porters, all of whom were frostbitten, one or two spent a week without food or shelter.

In May 1937, another attempt was made to climb Nanga Parbat by a German expedition, headed by Dr. Wiem. News reached Simla on June 20 that disaster had overtaken the expedition and subsequently it was learned that the entire party of climbers with the exception of one survivor, Dr. Luft, had perished. Eight of the nine members of the expedition were killed along with nine Sherpa porters. Mountaineering experts are of the opinion that the season was not very propitious for the ascent of the peak, which is considered to be more accessible in the autumn.

A further German attempt to climb Nanga Parbat was made in 1938 under the leadership of Dr. Paul Bauer. During the second half of July the party succeeded in reaching a height of over 23,000 ft. but were forced to retreat by bad weather. During the climb the bodies of Herr Willy Mehl and the porter Gay Lay, who perished in 1934 were discovered.

In 1939 another German expedition led by Herr Peter Aufhäuser explored the Diamond Peak of Nanga Parbat.

Another expedition to the Karakoram took place in 1939 under the leadership of Dr. G. Dyhrenfurth. All four peaks of "Queen Mary" were climbed. The highest of these has been triangulated as 24,570 feet, but the party, state it to be more than 1,000 feet higher.

In 1934 Messrs. E. E. Shipton and H. W. Tilman, by a magnificent piece of exploration and mountaineering succeeded in penetrating the hitherto inaccessible Hishi Gorge to the glacial basin of Nanda Devi, thereby solving a problem that had exercised the minds of Himalayan mountaineers for many years and completing the work of pioneers such as Dr. T. G. Longman and Mr. Hugh Rutledge. Messrs. Shipton and Tilman also crossed from Badrinath to Garzod via the Sargang Pass and explored the head of the Garzod glacier. Profound by the discovery of the route to the Nanda Devi basin an Anglo-American party, the leader of which was Mr. H. W. Tilman, successfully scaled Nanda Devi on its south-west ridge. Messrs. E. W. Tilman and N. E. Odell being the climbers to reach the summit. This expedition was remarkable in that, owing to the sickness of the porters the climbers had to carry their own camp up the mountain. This is the first and most difficult peak reached in the Himalayas.

In 1931 the first Polish expedition to visit the Himalaya succeeded in making the ascent of the East Peak of Nanda Devi. Unfortunately an accident led to the death of Mr. M. A. Rapiński and S. Janaszewicz on Tibet above the Hishi Gorge.

Lt.-Col. J. F. Swete, R.E., and Lt. D. M. Pym, R.E., lost their lives on 18th August 1933, while climbing on Rishang, near Badrinath in Kashmir.

In 1935 an attempt to scale Peak 24,515,400 feet in the remote Karakoram was made by Messrs. Walter Hume, J. Hunt, Dr. J. S. Camlav and W. R. Bratherton, R.A.F. A series of attempts were effected but the party reached a height estimated as 24,500 feet. There is no great difficulty between this point and the summit.

In the Autumn of 1935 the summit of Kabru was reached by Mr. C. R. Cooke who was accompanied to the foot of the final rock by Mr. G. Schoberth who was forced to give up owing to a high altitude, cough and the risk of frostbite. This ascent was made on November 18th, an unusually late date and is of great interest as proving that high Himalayan peaks can be climbed in early winter at least.

The 1936 French expedition to the Karakoram, like the Everest expedition, encountered very bad weather and accomplished little.

After Nanda Devi the most remarkable ascent of 1939 was that of Sinolohu, a peak once designated as the "embodiment of inaccessible", in the Karakoram range. This was made by a small German party under the leadership of Herr Paul Bauer. Sinolohu is one of the most beautiful peaks in the Himalayas.

In 1939, a party of Munich mountaineers, consisting of Herren Grob, Palder and Schneider, made the first ascent of the Tent Peak in the Karakoram range and attempted the Twin Peak but were defeated by bad weather.

Other ascents in Sikkim were made by Mr. Marco Palli's party who attempted Sinu and successfully and by Mr. C. R. Cooke and Mr. F. Spencer Chapman who ascended several peaks of over 20,000 feet including the Fluted Peak.

During the summer of 1937 a number of peaks were climbed, the most notable being Chomolhari 29,937 ft. by Mr. F. Spencer Chapman with one porter, and the Mart Peak 23,850 ft. by Captain P. R. Oliver and Mr. F. S. Smythe. The latter completing the ascent of Colonel Capt. Oliver was insufficiently acclimatized. Three other peaks of 21,460 ft., 21,500 ft. and 22,431 ft. were also climbed by Messrs. Oliver and Smythe and attempts made on Nihang and Duncraft which were frustrated by bad weather. They also explored a remarkable plateau above the Burke Glacier, discovered in May 1937 by Messrs. E. A. Gardiner of the Survey of India. In addition, Mr. Smythe with three Tibetan porters climbed seven peaks of the Zaskar Range among them the very difficult peak of Nihang Parbat, 21,254 ft. During this expedition Mr. Smythe came upon some remarkable tracks in the snow which the Tibetan porters believed were made by a Mike or Atomizable Snow Man. These tracks were afterwards identified as bear tracks by the Natural History authorities in London. It is believed that there is now enough evidence to explain this strange legend of the Himalayas.

Garwal was visited in 1935 by a Swiss expedition, led by Mr. André Roch and two fat peaks were scaled, Duncraft and the Wedge Peak.

In 1936 Mr. C. S. Houston led an expedition to the Karakoram during the course of which a bold and determined attempt was made to climb E2, 23,150 ft. After failure to obtain a footing on the N. W. ridge, the party, which included several veteran Sherpa porters, ascended the N. E. ridge to a height of 23,000 ft.

A further attempt on K2 was made by an American party in 1939 but ended in disaster, Mr. Dudley Wolfe, and three Sherpa porters losing their lives in stormy weather high up the mountain.

Another expedition to the Karakorams was that undertaken by Capt. J. B. Harrison, Lieut. J. O. M. Roberts, Mr. R. A. Hodgkin, Dr. T. Graham Brown and Lieut. J. Waller together with Dr. G. A. J. Teasdale and Dr. Elizabeth Teasdale. The principal objective was Masherbrum, 25,660 ft. After establishing Camp 7 at 24,600 ft. Harrison and Hodgkin reached a height of about 25,000 ft. before being forced to retreat by bad weather. In descending to Camp 6 they were overtaken by a blizzard and forced to spend a night in the open as the result of which they were seriously frostbitten. The devotion of the Sherpa porters prevented a more serious disaster.

Further exploration of the Badrinath, Kedarnath ranges at the sources of the Ganges as well as various ascents was made by a German

expedition under the leadership of Dr. R. Schwarzgruber in the autumn of 1938.

The Survey of India are now very active and much work has been accomplished during the re-survey of Garhwal and Kumaon under the direction of Major Gordon Osmaston, whilst several thousand square miles of country have been mapped by Messrs. Shipton and Tilman during their expeditions to the Shaksgam in 1937 by Mr. Shipton during his expedition to the Karakoram in 1939.

The Himalayan Club was founded on 17th February 1928, at New Delhi with the object of encouraging and assisting Himalayan travel and exploration, and extending knowledge of the Himalayas through science, art, literature and sport. The initiation of this Club was due to the late Sir Geoffrey Corbett, Secretary, Commerce Department of the Government of India, and to Major Kenneth Mason, M.C., R.E., Assistant Surveyor-General.

## Freemasonry in India.

In 1728 a dispensation was granted by the Grand Lodge of England to Geo. Pomfret, authorising him to "open a new Lodge in Bengal." Of his personage nothing further is known but under Capt. Farwinter, who in the following year succeeded him as Provincial Grand Master of India, a Lodge was established in 1730, which in the Engraved Lists is distinguished by the arms of the East India Company, and is described as "No. 72 at Bengal in the East Indies." The next Provincial Grand Masters were James Dawson and Zeeh. Gee, who held office in 1740; after whom came the Hon. Roger Drake, appointed 10th April 1755. The last named was Governor of Calcutta at the time of the attack made on the settlement by Surajah Dowlah in 1756. Drake missed the horrors of the Black Hole by escaping and was accused of deserting his post, but, though present at the retaking of Calcutta by Admiral Watson and Olive, it is improbable that he resumed the duties of his masonic office after the calamity that befell the settlement.

The minutes of the Grand Lodge inform us that William Mackett, Provincial Grand Master of Calcutta, was present at the meeting of that body, November 17, 1760, and we learn on the same authority that at the request of the "Lodges in the East Indies" Cullin Smith was appointed P. G. M. in 1762. At this period it was the custom in Bengal "to elect the Provincial Grand Master annually by the majority of the votes of the members present, from amongst those who passed through the different offices of the (Prov.) Grand Lodge and who had served as Dep. Prov. Grand Master." This annual election as soon as notified to the Grand Lodge of England was confirmed by the Grand Master without its being thought an infringement of his prerogative. In accordance with this practice, Samuel Middleton was elected (P. G. M. circa) in 1767; but in passing it may be briefly observed that a few years previously a kind of roving commission was granted by Earl Ferrers in 1762-64 to John Bluvitt, Commander of the "Admiral Watson," Indiaman "for East India where no other Provincial Lodge is to be found." Middleton's election was confirmed October 31st, 1768, and, as the dispensation forwarded by the Grand Secretary was looked upon as abrogating the practice of annual elections, he accordingly held the office of D. G. M. Unfortunately the records of the P. G. L. date back only to 1774, and thus much valuable information is lost to us. This Grand Lodge continued working until 1792 when it ceased to meet. It seems that the officers were selected from only two Lodges much to the dissatisfaction of the other Lodges, and resulted in most of the dissatisfied bodies seceding and attaching themselves to the Athol or Ancient Grand Lodge. In 1813 at the Union both the Ancients and Moderns in Calcutta combined and gave their allegiance to the United Grand Lodge of England and have since been working peaceably under the Provincial Grand Lodge of Bengal which was revived in that year and in 1840 created a District Grand Lodge.

**Madras.**—The earliest Lodge in Southern India (No. 222) was established in Madras in 1752. Three others were also established about 1766. In 1767 Capt. Edmund Pascal was appointed P. G. M. for Madras and its Dependencies and in the following year another Lodge was established at Fort St. George. In 1768 the Athol (or Ancients) invaded this District and in 1781 established a Provincial Grand Lodge and both these Provincial Grand Bodies continued working peaceably side by side until the Union. Indeed, though not generally known, these two Grand Bodies made an attempt at coalition long before any such movement was made by their parent bodies, the Grand Lodge of England, and the Ancient Grand Lodge, and Malden in his History of Freemasonry in Madras states that in a great measure they succeeded. At the Union in 1813 all the bodies in Madras gave their allegiance to the United Grand Lodge. One event worthy of note was the initiation in 1774 at Trichinopoly of the eldest son of the Nawab of Arcot, Umdat-ul-Umra, who in his reply to the congratulations of the Grand Lodge of England stated "he considered the title of English Mason as one of the most honourable that he possessed." This document is now stored in the archives of the United Grand Lodge.

**Bombay.**—Two Lodges were established in this Presidency during the 18th century, Nos. 234 at Bombay in 1758 and 569 in Surat in 1798 both of which were carried on the lists until the Union when they disappeared. A Provincial Grand Master, James Todd, was appointed but there is no record that he exercised his functions and his name drops out of the Freemasons' Calendar in 1799. In 1801 an Athol Warrant was granted (No. 322) to the 78th foot which was engaged in the Maratha War under Sir Arthur Wellesley. In 1818 Lord Morla was asked to constitute a Lodge to be known by the name of St. Andrew by eight Masons residing there and also to grant a dispensation for holding a Provincial Grand Lodge for the purpose of making the Hon. Mountstuart a Mason, he having expressed a wish to that effect. The Petitioners further requested "that his name might be inserted in the body of the warrant, authorising them to instal him after being duly passed and raised a Deputy Grand Master of the Decan." Of the reply to this application no copy has been preserved. Lodge Benevolence was established in Bombay in 1822.

In 1823 a Military Lodge "Orion-in-the-West" was formed in the Bombay Artillery and installed at Poona as No. 15 of the Coast of Coromandel. It seems from Lane's records that in 1830 it was discovered that this Lodge was not on the records of the United Grand Lodge of England. A Warrant was subsequently issued bearing date 19th July 1833. According to the early proceedings of this Lodge, members were examined in the Third Degree and passed to the chair in the Fourth Degree for which a fee of three gold mohurs was charged. In the following year a second Lodge was established at Poona by the Provincial Grand Lodge of Bengal which, however, left no

trace of its existence. In 1825 the civilian element of "Orion" seceded and formed the "Lodge of Hope" also at Poona No. 802.

Here "Orion" unrecognized at home, aided in the secession of some of its members, who obtained a warrant, on the recommendation of the Parent Lodge from the Grand Lodge of England. Two years later it was discovered that no notification of the existence of "Orion-in-the-West" had reached England, nor had any fees been received, although these including quarterages had been paid into the Provincial Grand Lodge, Coast of Coromandel. It was further ascertained that in granting a warrant for a Bombay Lodge the Provincial Grand Master of Coromandel had exceeded his powers. Ultimately a new warrant No. 598 was granted as already stated in 1833. Lodge "Perseverance" was started in Bombay No. 818 in 1828. Up to this time the jurisdiction of the Grand Lodge of England in India had not been invaded; but in 1836 Dr. James Burnes was appointed by the Grand Lodge of Scotland P.G.M. of Western India and its Dependencies. No Provincial Grand Lodge however was formed until 1st January 1838. A second Scottish Province of Eastern India was started which on the retirement of the Marquis of Tweedale was absorbed within the jurisdiction.

Dr. Burnes, who in 1846 became Provincial Grand Master for all India (including Aden) but with the proviso, that this appointment was not to act in restraint of any future sub-division of the Presidencies. Burnes may be best described as being in 1836 in ecclesiastical phrase as a Provincial Grand Master "in partibus infidelium" for whatever Lodges then existed throughout the length and breadth of India were strangers to Scottish Masonry. But the times were propitious. There was no English Provincial Grand Lodge in Bombay and the Chevalier Burnes, whose nature had endowed with all the qualities requisite for Masonic Administration, soon got to work and presented such attractions to Scottish Freemasonry that the strange sight was witnessed of English Masons deserting their mother Lodges, to such an extent that these fell into abeyance, in order to give support to Lodges newly constituted under the Grand Lodge of Scotland. In one case, indeed, a Lodge "Perseverance" under England went over bodily to Scotland, with its name, jewels furniture, and belongings, and the charge was accepted by

Scotland. This Lodge still exists in Bombay and now bears No. 338 on the Register of Scotland. From this period, therefore, Scottish Masonry flourished, and English Masonry declined until the year 1848 when a Lodge St. George No. 549 on the Rolls of the Grand Lodge of England was again formed at Bombay, and for some years was the solitary representative of English Masonry in the Province. In 1844 Burnes established a Lodge "Rising Star of Western India," at Bombay for the admission of Indian gentlemen the result of which is seen at the present day. Thus the seed planted at Trichinopoly in 1774 by the initiation of Umdat-ul-Umra has borne fruit resulting in the initiation of thousands of Indian gentlemen of all castes and creeds, and which has gone far to establishing that mutual trust between West and East a distinguishing characteristic of Speculative Freemasonry. A Provincial Grand Lodge was re-established in Bombay in 1860, and converted into a District Grant Lodge in 1861.

**The Grand Lodge of England.**—All three Constitutions of the United Kingdom, the United Grand Lodge of England, the Grand Lodge of Ireland and the Grand Lodge of Scotland hold jurisdiction in India. By far the largest is the first, the next largest is the third and the number of Lodges under Ireland is as yet small. The Grand Lodge of England divides its rule under Five District Grand Masters independent of each other and directly subordinate to the Grand Master of England by whom they are appointed.

#### Bengal.

- 75 Lodges. Rt. Wor. Bro. A. Barr Pollock, P.G.D., District Grand Master, Dy. D.G.M. S. K. Ghosh, P.A. G.D.C. Asst. D.G.Ms. Brigadier H. Williams, P.Dy. G. Swd. B., and J. E. Hudson.

#### Madras.

- 36 Lodges. Dist. G. M., Rt. Wor. Bro. Sir George Boag, K.C.I.E., C.S.I., M.A., Dy. D.G.M. Wor. Bro. T. V. Muthukrishna Iyer, P.G.D.

#### Punjab.

- 34 Lodges. Rt. Wor. Bro. Rt. Rev. The Lord Bishop of Lahore, C.I.E., O.B.E., V.D., M.A., District Grand Master; Wor. Bro. Lt.-Col. F.R. Gifford, O.B.E., Deputy Dt. Grand Master; G. Reeves-Brown, District Grand Secretary.

District Grand Steward	..	..	..	.. S. S. Imam	..	..	1210
District Grand Steward	..	..	..	.. J. E. Hopkins	..	..	1936

**The Grand Lodge of Scotland** exercises its rule through a Grand Master of All Scottish Freemasonry in India, who is nominated by the Lodges under the jurisdiction subject to confirmation by the Grand Lodge of Scotland. M. W. Bro. Sir Ivon Taunton, Kt., C.I.E., J.P., I.C.S., Grand Master, controls 75 Lodges. Under him the several districts are supervised by the following Grand Superintendents:—

Major G. Bennet Doré, G. Supdt., Northern India.

N. Iredale, G. Supdt., Central India.

Diwan Bahadur D. Srirama Sastri, G. Supdt., Southern India.

H. S. Jamilson, G. Supdt., Eastern India.

The Grand Secretary is R.W. Bro. Khan Bahadur J. C. Mistree, J.P., 17, Murzban Road, Fort, Bombay.

**The Grand Lodge of Ireland** granted a warrant to establish a Lodge at Kurnal in 1837, but it was short lived. An attempt was made in 1869 to establish a Lodge in Bombay, but on the representation of the Grand Secretary of England, to the Deputy Grand Secretary of Ireland that it would be objectionable to create a third masonic jurisdiction in the Provinces there being two already, viz., English and Scottish the Grand Lodge of Ireland declined to grant the warrant. In 1911, however, a warrant was sanctioned for the establishment of Lodge "St. Patrick" and since that year three other Lodges have sprung into being, one of which is now defunct.

**The Irish Constitution** is governed in India by a Grand Inspector for India. He has two Asst. Grand Inspectors, one for the Bombay Presidency, who is Wor. Bro. A. Finan, and one for Bengal who is Wor. Bro. D. O. Rees.

Eleven Lodges are working in India at the following places:

*Bombay.*—Nos. 319, 419, 648. *Calcutta.*—Nos. 263, 382, 464, 465, 490 and 567. *Lahore.*—No. 19. *Simla.*—No. 458.

**Royal Arch Masonry.**—Under England the District Grand Master in any District is nearly always created also Grand Superintendent, who generally appoints his Deputy as Second and another Companion as Third Principal.

Under Ireland there is no local jurisdiction and under Scotland the office is elective subject to confirmation.

The English five Districts are constituted as under:—

*Bengal.*

31 Chapters. Grand Supdt. Most Ex. Comp. A. Barr-Pollock.

*Madras.*

21 Chapters. Grand Supdt. Most Excellent Comp. Sir George Boag, K.C.I.E., C.S.I., M.A.

*Bombay.*

27 Chapters. Most Ex. Comp. Sohrab R. Davar, T.D., Grand Superintendent.

*Punjab.*

22 Chapters. Most Ex. Comp. Rt. Rev. Lord Bishop of Lahore, C.I.E., O.B.E., V.D., M.A., D.D., Grand Superintendent.

**Royal Arch Masonry** under Scotland has a separate constitution to Craft Freemasonry. The District Grand Chapter of India is at present ruled by M. E. Camp. Sir Shapoorjee B. Billimoria, Kt., M.B.E., J.P., under whom there are 33 Chapters in India. The Grand Secretary of All Scottish Freemasonry in India is also District Grand Scribe E. of Scottish R. A. Masonry.

There is one Irish Chapter in Calcutta.

**Mark Masonry.**—Under England, Mark Masonry is worked under the Grand Mark Lodge of England and Wales, and divided into separate Districts; but in most cases the District Grand Master is also District Grand Mark Master.

*Bengal.*

19 Lodges. Rt. W. Bro. Capt. A. Barr-Pollock, District Grand Master.

*Bombay.*

18 Lodges. Rt. W. Bro. Sohrab R. Davar, P. G. Ov., District Grand Master.

*Madras.*

16 Lodges. Rt. Wor. Bro. Sir George Boag, K.C.I.E., C.S.I., M.A., District Grand Master.

*Punjab.*

12 Lodges. Rt. W. Bro. Rt. Rev. The Lord Bishop of Lahore, C.I.E., O.B.E., V.D., M.A., D.D., District Grand Master.

The Mark degree is incorporated with the Royal Arch degree in Irish Chapters. The Mark degree is worked in some S. C. Lodges, but essentially in R. A. Chapters, in which the Excellent, R.A.M. and other degrees can be obtained. S. C. Chapters insist upon candidates being Mark Master Masons before exaltation. The Mark degree in Scottish Craft Lodges is conferred by the Rt. Wor. Master as the S. O. Craft does not recognise the ceremony of Rt. W. Mark Master. This is confined strictly to Chapters. Each Chapter has a Lodge of M. M. working under its charter. Separate charters for Mark Lodges are only issued by the G. Chapter of Scotland.

**Royal Ark Mariner.**—The Royal Ark Mariner degree is worked in the English Constitution by lodge attached to Mark Lodges. Its ruler is the District Grand Mark Master and only Mark Master Masons can take this degree.

There are 10 R. A. M. Lodges under Bengal, 5 under Bombay, 5 under Madras and 4 under Punjab.

**Other Degrees.**—There are many side degrees worked in India, of the Ancient and Accepted Rite, no degree higher than the 18° is worked in India under England, but under Scotland the 30° is worked. The Knight Templar Degree is also worked in several places under both English and Scottish jurisdiction. There are fourteen 18th Degree Chapters working in India.

**The Red Cross of Constantine** has two Conclaves working in India. With them are worked the degrees of K.H.S. and Kt. of St. John. They are governed by the Grand Council in England direct.

The Conclaves working in India are:—

No. 43 Bombay and No. 160, Simla.

**The Order of the Secret Monitor** has 7 conclaves under Bombay, 7 under Madras, 3 in Calcutta and 1 in Cawnpore.

Office-Bearers of the Grand Lodge A. S. F. I. for the year 1945-46—contd.

P. C. Bhasin, P.M. 1364 .. .. .	Grand Architect.

## Scientific Surveys.

**Zoological Survey of India.**—It was established in 1916, when the Zoological and Anthropological Section of the Indian Museum was converted into a Survey on a basis similar to that of the Geological and Botanical Surveys. The Indian Museum itself dates back to 1875, and at the outset the Zoological and Anthropological collections consisted almost entirely of material handed over by the Asiatic Society of Bengal, whose members had been accumulating systematic collections since 1814. Organised zoological investigation in India has thus been in continuous progress for more than 130 years. From the foundation of the Museum in 1875 to the time when the Zoological and Anthropological Section was established as a separate Survey, the Curator (or as he was subsequently termed the Superintendent) of the Indian Museum has been a zoologist, and among the officers who have held the appointment have

been such well-known members as Anderson, Wood-Mason, Alcock and Annandale. Recently Anthropology has been separated from the Zoological Survey of India.

The Survey is unique in that all its officers are Indians. The main functions of the Survey are to investigate the fauna of India, to maintain the National Zoological collections of India and to arrange and preserve the Zoological galleries of the Indian Museum. In addition the Survey issues two series of publications upon Zoological research, namely *The Records and Memoirs of the Indian Museum*. The headquarters of the Survey are at present temporarily located at Benares Cantt.

**Botanical Survey.**—The Botanical Survey department of the Government of India was under the control of a Director. The Superintendent of the Royal Botanic Garden, Calcutta was *ex-officio* Director. The Director having retired since December 3, 1939, the Department is awaiting some reorganisation. The duties of the Director are distributed amongst (i) Dr. K. P. Biswas, M.A., D.Sc. (Edin.), F.R.S.E., Superintendent, Royal Botanic Garden, Calcutta and (ii) S. N. Bal, M.Sc., Ph. C., Curator, Industrial Section, Indian Museum. There is a staff of headquarters of one officer for systematic work and at the Indian Museum a Curator who is engaged in the development and maintenance of the Industrial Section.

The existence of the Botanical Survey, like that of the Geological Survey, has both a cultural and an economic justification. On general grounds it is obvious that a progressive Government should acquaint itself with the vegetable resources of the area it administers, and although apart from the cinchona operations, the activities of the Survey cannot be said to have much immediate economic applicability—consisting as they do of investigations and researches into the systematics, limnology, distribution of plants, ecology and economic botany of plantlife—the work accomplished in pure and applied botany at the Royal Botanic Garden during the last century and a half has exercised a profound and far-reaching influence upon the development of Agricultural Science and Forestry in India. The irreplaceable dried plant materials obtained by botanical explorations and preserved for more than one hundred and fifty six years at the Herbarium of the Royal Botanic Garden, Calcutta, and several thousands of indigenous and exotic trees, shrubs and herbs cultivated in the open, prove to be most useful in dealing with such questions of considerable State-importance as naturalisation of useful plants, introduction of new vegetable products into the country, the adaption of raw produce to the requirements of manufacturing industry, land utilisation, preservation of rural areas, provision of national parks, drainage, sanitation and public health.

**Survey of India.**—The first authoritative map of India was published by D'Anville in 1752, when the exploration of the then unknown India was still largely in French hands. It had been compiled from routes of solitary travellers and rough chart of the coast.

The Survey of India may be said to have been founded in 1767—ten years after the battle of Plassey—when Lord Clive formally appointed

Major James Rennell the first Surveyor General of Bengal, at that time the most important of the East India Company's possessions, though there were earlier settlements in Madras and Bombay.

Rennell's maps were originally military reconnaissances and latterly chained surveys based on astronomically fixed points, and do not pretend to the accuracy of modern maps of India based on the rigid system of triangulation commenced at Madras in 1802 and since extended over and beyond India. Even now, however, the relative accuracy of these old maps makes them valuable in legal disputes, as for instance in proving that the holding of a Bengal landowner was a river area at the time of the Permanent Settlement of 1793, so that he is debarred from its benefits.

From these beginnings, this department has gradually become primarily responsible for all topographical surveys, explorations and the maintenance of geographical maps of the greater part of Southern Asia, and also for geodetic work.

**Geodesy** means the investigation of the size, shape and structure of the earth, and the geodetic work of the department consists of primary (or geodetic) triangulation, latitude, longitude and gravity determinations. From these the exact "figure" of the earth is obtained, whereby points fixed by triangulation can be accurately located on its curved surface. This system of fixed points holds together all topographical and revenue surveys, and the existence of such a system from the early days of the department has avoided the embarrassments caused in other countries where isolated topographical surveys have been started without a rigid framework, with the inevitable result that they could not be fitted together.

A geodetic framework is, therefore, essential in any large survey, but there are a number of other activities, all of them ultimately utilitarian which can be suitably combined with its execution, and the following are some of those which are carried out in India:

Precise levelling for the determination of heights;

Tidal predictions and publication of Tide Tables for thirty-nine ports between Suez and Singapore.

The Magnetic survey;

Observation of the direction and force of gravity;

Astronomical observations to determine latitude, longitude and time;

Seismographic and meteorological observations at Dehra Dun.

Indian geodesy has disclosed widespread anomalies of gravitational attraction in the earth's crust, which have recently led to a reconsideration of the whole theory of isostasy.

**Topographical Surveys.**—In the past this department used to carry out the large scale revenue surveys for most of India, and was still conducting this work for Central and Eastern India in 1905.

Though revenue survey is primarily a record of individual property boundaries and is unconcerned with the surface features, ground levels and exact geographical position essential to a

topographical survey, it was on the whole found economical to carry out both surveys together.

By 1905, however, all the Provinces had taken over the revenue surveys, for which they had always paid, and the Survey of India was enabled to concentrate its energies on a complete new series of modern topographical maps in several colours on the 1-inch to 1-mile scale as recommended by a commission which sat at that time to consider the existing maps of India.

This new series had been rendered necessary by the natural demand for more detailed information to be shown on maps, especially as regards the portrayal of hill features by contours and proper classification of communications.

While some of the unsurveyed places are in remote tracts like the Naga hills of Assam and the high Himalayas, most are accessible. Large areas in Eastern Bengal, North Bihar, South Bombay, Gujrat, Sind and Western Rajputana have yet to be mapped on modern lines.

The activities of the Survey of India have gone beyond the borders of India in the past. Nepal, for instance, was surveyed and mapped at the request of the local authorities in 1927.

Surveys and records of international, state and provincial boundaries have always formed an important item of topographical work.

*Air Surveys.*—The use of air survey has been progressively developed in this department and is now widely used both in support of the topographical survey programme and for special requirements of Irrigation Geology, Town-planning and other development works.

Air survey is, in certain types of terrain and for certain purposes, more speedy and more economical than ground survey and can be carried out by the department at almost any normally required standard of accuracy.

*Paid for work.*—In normal times the department is prepared to undertake or aid local surveys, on payment by those concerned, such as:

Forest and cantonment surveys;

Riverain, irrigation, railway and city surveys;

Surveys of tea gardens and mining areas, with such control levelling as is necessary for those operations;

Administrative assistance is also given, and executive officers lent, in aid of the revenue surveys of various Provinces and States.

*Maps.*—In addition to topographical maps on scales of 1 inch,  $\frac{1}{2}$  inch and  $\frac{1}{4}$  inch to one mile and geographical maps on scale of 16 miles to one inch and smaller scales, the Department produces and holds for sale the following special maps:—

General maps of India, Provincial Maps, City and Town Guide Maps, Cantonment Plans, Manœuvre maps and miscellaneous maps.

All departmental maps published are shown in the 'Survey of India Map Catalogue' which can be obtained for Re. 1 post free from the Director of Map Publication, Dehra Dun.

Administration is in the hands of the Surveyor General under the Agriculture Department of the Government of India.

The Headquarters office is at Delhi under the Deputy Surveyor General and two Assistant Surveyors General.

There are map printing offices at Dehra Dun, Calcutta and Murree, the resources of which may be made use of by Government Departments and the public for printing special maps, illustrations for reports, patents diagrams, etc.

During the war, the Department was almost entirely devoted to work in direct support of the war effort and many of the civil activities outlined above were interrupted or suspended. These activities are now being resumed and intensified particularly in relation to development projects.

*Indian Science Congress Association.*—The Indian Science Congress Association was founded in 1914 largely through the efforts of Prof. P. S. Macmahon and Dr. J. L. Simonsen who were Honorary General Secretaries of the Congress till 1921. The general administrative work of the office of the Congress was under the management of the Royal Asiatic Society of Bengal till 1939. The Association at present has its offices at Statistical Laboratory, Presidency College, Calcutta.

The main objective of the Association is the advancement of science in India, and the annual sessions (Indian Science Congress) are organised for the purpose of (1) encouraging research and making the results generally known among science workers in India; (2) giving opportunities for personal intercourse and scientific companionship in order to overcome to some extent the isolation in this large country of workers in science; and (3) promoting public interest in science.

Membership of the Association is open to all interested in the activities of the Congress. The Association has an average total membership of 1,500. The annual subscription is Rs. 12. There are also Sessional Members at concession rates. The members receive free of cost the proceedings of the annual sessions, which are issued in four parts.

The Congress meets in January each year in one of the principal cities and the proceedings last for six days. The session is opened by a Presidential Address delivered by the President for the year. The President is chosen annually, the different branches of science being usually represented in turn. The work of the Session is divided into thirteen sections: (1) Mathematics, (2) Statistics, (3) Physics, (4) Chemistry, (5) Geology and Geography, (6) Botany, (7) Zoology and Entomology, (8) Anthropology and Archaeology, (9) Medical and Veterinary Sciences, (10) Agricultural Sciences, (11) Physiology, (12) Psychology and Educational Science, (13) Engineering and Metallurgy. The Sections meet separately, and each section is presided over by its own President also chosen annually. The mornings are devoted to the reading and discussion of the papers. Special discussions and symposia are held in the mornings or in the afternoons during the Session. Social functions and visits to places of scientific and industrial interest are arranged in the afternoons by the Local Reception Committee which is formed at the venue of the Congress to arrange for the work of the Session. Popular Lectures by eminent scientists and specialists are delivered in the evenings for the general public and form an important and attractive feature of the programme.

**General Secretaries.**—Prof. P. C. Mahalanobis, F.R.S., Statistical Laboratory, Presidency College, Calcutta; Prof. M. Qureshi, Ph.D., F.N.I., Head of the Dept. of Chemistry, Osmania University, Hyderabad (Dn.).

**The Indian Research Fund Association.**—This Association was constituted in 1911 with a sum of Rs. 5,00,000 set aside as an endowment for the prosecution and assistance of research the propagation of knowledge and experimental measures generally in connection with the causation, mode of spread and prevention of communicable diseases. The Association is a pioneer in organised medical research on a large scale.

The control and management of the Association are vested in a Governing Body. Its President is the Member for Education, Health and Agriculture, Govt. of India. This body is assisted by a Scientific Advisory Board of which not less than three members have seats on the Governing Body. The D. G. I. M. S. is the Chairman of the Board and the Public Health Commissioner with the Govt. of India is the Secy. of the Board and of the Governing Body. Membership of the Association is open to non-officials. Every donor of Rs. 5,000 is entitled to become a permanent life member, while every subscriber of Rs. 100 per annum can be a temporary member.

The original Governing Body was composed exclusively of officials until 1929. Raja of Parlakimedi made a donation of Rs. 1,00,000 to the Association and was appointed a life member. In the same year the Govt. of India, with a view to liberalising the constitution of the Governing Body, decided to enlarge it by including three representatives of the Indian Legislature, two representatives of Medical Faculties of Universities incorporated by law in India and one eminent non-medical scientist to be nominated by the Governor-General. As a result of further representations from the Universities and the Legislature, this Body was again enlarged in 1933 by the addition of a third representative of the Medical Faculties of Indian Universities, whilst it was decided that the non-medical scientist should in future be elected by the Indian Science Congress Association.

A Recruitment and Appointments Board has been formed from amongst the members of the Governing Body of the Association to select and recommend officers for appointment in the Medical Research Department and the All-India Institute of Hygiene and Public Health, Calcutta.

In order to ensure the closest co-operation between workers and to prevent overlapping of efforts, an annual conference of medical research workers and administrative heads of Medical and Public Health Departments used to be convened under the auspices of the Association up to 1938. (In that year it was decided that the Conference should be held biennially in future. No Conference has, however, been held since nor is one to be held in 1946 due to the abnormal travel and food condition prevailing in the country. At this conference free dis-

cussions were held on the work accomplished and on proposals for future work. The results of the discussions enabled the members of the Scientific Advisory Board to make their recommendations for the programme for the following year. The Board is assisted by Advisory Committees consisting of workers on more important items of research, e.g., cholera, malaria, plague, leprosy, filariasis, rabies, clinical research and industrial health, nutrition, maternity and child welfare who examine the proposals for research work and make recommendations to the Scientific Advisory Board. The Board has recently appointed a Clinical Research Advisory Committee to draw up a plan for the development of clinical research in India. The Scientific Advisory Board annually publishes a technical report describing the research work done on the various enquiries carried out under the auspices of the Association during each calendar year. This report is obtainable from the office of the Secretary, Governing Body Indian Research Fund Association, Secretariat, New Delhi on payment.

The results of researches carried out under the auspices of the Association are published in the "Indian Journal of Medical Research" and its "Memoirs" and the "Journal of the Malaria Institute of India." Since the inception of the Association a large number of enquiries have been carried out. Enquiries include investigations on cholera, bacteriophage, malaria, nutrition, leprosy, plague, vaccines, tuberculosis, pharmacology, indigenous drugs, maternal mortality, helminthology, medical mycology, dracontiasis and filariasis, protozoal parasites, cancer, epidemic dropsy, kala-azar, dried blood plasma, sandfly fever, typhus bacillary dysentery, snake venoms, fluorosis, clinical problems, etc.

Besides financing investigations which are conducted by workers in its direct employment, the Association gives grants-in-aid to institutions and also to outside workers. The expenditure for the last few years has amounted to between seven and eight lakhs of rupees per annum. The Association maintained the Research Sections of the Malaria Institute at Delhi as well as its Southern India Branch at Coonoor until March, 1946 when they were taken over by the Government of India.

The Association maintains the Nutrition Laboratories at Coonoor, which carry out investigations which have a direct bearing on the problem of nutrition in India. The diet surveys undertaken by the laboratories have provided very valuable information as to food requirements. The publication of Health Bulletin No. 23 "The Nutritive value of Indian Foods and the planning of satisfactory diets" has made available to the public useful knowledge about Indian foodstuffs. Besides carrying out experiments in nutrition, annual classes are held at which candidates from all over India are trained in the problems of nutrition. The nutrition advisory committee of the Association has been recognised by the Government of India as the National Advisory Nutrition Committee for India.

6. 11. 1971

a mineral survey of a particular area, an enquiry connected with a particular engineering project, or short-term investigations involving special geological knowledge), a charge may be made for the services of the officers deputed for such work.

The results of the investigations and researches of the Department are published in—

- (i) *Records of the Geological Survey of India*, which include the Annual Reports, Annual Mineral Review, and short papers. One volume of 4 parts is published annually. Every 5 years, a Quinquennial Review of the Mineral Production of India, is published as a separate volume of the *Records*.
- (ii) *Memoirs of the Geological Survey of India*; in general each volume deals in detail with a particular area.
- (iii) *Palaontologia India*, which deals entirely with palaontological matters.

As a part of the *Records*, a series of Bulletins on particular minerals have been published in recent years. These Bulletins are intended to summarise the geological information available in India on commercial minerals. As each edition goes out of print, these Bulletins are revised and reprinted.

Thus to cater for the Mineral Industry, the Geological Survey of India publishes:

- (a) An Annual Review of Mineral Production, the contents of which are

mainly production statistics relating to the previous year.

- (b) A Quinquennial Review of the Mineral Production of India, giving a review of the trend of the industry during the past 5 years.
- (c) Bulletins, summarising geological knowledge on mineral occurrences—the Bulletins are of longer term interest than (a) and (b).

During the War, the publication of the *Records* (except Bulletin) and *Memoirs* was suspended, but this has now been resumed.

The advice of the Geological Survey of India is taken by the Central Government and others on all questions of mineral policy. To encourage and assist the teaching of geology in classes and colleges, the Department presents collections of minerals, rocks and fossils and gives lectures to students (and at times to the public with a view to popularising the study of geology).

The geological functions of the Mineral Utilisation Branch of the Department, which was established as a War measure, have been taken over by the Mineral Development Circle.

The Strategic Branch, which was formed during the War with a view to providing geological information and advice for the Allied Forces, has been dissolved.

## PROVING OF WILLS.

In British India if a person has been appointed executor of the Will of a deceased person, it is always advisable to prove the Will as early as possible. If the Will is in a vernacular, it has to be officially translated into English. A petition is then prepared praying for the grant of probate of the Will. All the property left by the deceased has to be disclosed in a schedule to be annexed to the petition. Values must be shewn as at the date of the Petition and Probate Fees will be calculated on such value. The Values of immovable properties are usually assessed at 16½ years' purchase on the nett Municipal assessment, in the absence of a report from a competent architect.

**Scale of Probate Duty.**—Up to Rs. 1,000—Nil.

For the next Rs. 9,000 (i.e. upto Rs. 10,000), 2 per cent.; for the next Rs. 40,000 (i.e. upto Rs. 50,000) 3 per cent.; for the next Rs. 50,000 (i.e. upto Rs. 1,00,000) 4 per cent.; for the next Rs. 1,00,000 (i.e. upto Rs. 2,00,000) 4½ per cent.; for the next Rs. 50,000 (i.e. upto Rs. 2,50,000) 5 per cent.; for the next Rs. 50,000 (i.e. upto Rs. 3,00,000) 5½ per cent.; for the next Rs. 1,00,000 (i.e. upto Rs. 4,00,000) 6 per cent.; for the next Rs. 1,00,000 (i.e. upto Rs. 5,00,000) 6½ per cent.; for amounts exceeding Rs. 5,00,000 (or the portion over Rs. 5,00,000) 7 per cent. In addition to this Probate Duty there is, at present, a surcharge of 25%.

**Exemptions from Probate Duty.**—In determining the amount of the value of the estate for the purposes of probate duty the following items are allowed to be deducted:

1. Debts left by the deceased including mortgage encumbrances,

2. The amount of funeral expenses,

3. Property held by the deceased in trust and not beneficially or with general power to confer a beneficial interest.

In addition, there is general exemption for service personnel killed in action or dying on service in certain circumstances.

**Procedure.**—The particulars of the property of the deceased and the particulars of all items allowed by law to be deducted have to be shown in separate schedules. It is the practice of the High Court to send a copy of these schedules to the Revenue Authorities and if the properties, particularly immovable properties, have not been properly valued, the High Court issues a notice to the petitioner requiring him to amend the schedule of property accordingly. In certain cases the Court requires citations to be published and served on such persons as the Court thinks are interested in the question of the grant of probate. If no objection is lodged by any person so interested within the time mentioned in the citation to the effect that nothing should be done in the matter of the petition for probate without notice to the person objecting or to use the technical language the caveator, and if the Will is shown to have been properly executed, probate is ordered to be granted. If an objection or caveat is filed the petition for probate is converted into a suit in which the petitioner is plaintiff and the caveator is the defendant.

**Probate Codicil, etc.**—Probate has effect over all the property and estate moveable or immovable of the deceased throughout the province in which the same is granted

and is conclusive as to the representative title of the person to whom the probate is granted against all debtors of the deceased and all persons holding property which belongs to the deceased and will afford full indemnity to all debtors paying their debts and all persons delivering up such property to the person to whom such probate is granted. Probate can only be granted to an executor appointed by the Will and the appointment may be express or by necessary implication. Probate cannot be granted to any person who is a minor or is of unsound mind. Where several executors are appointed probate may be granted to them simultaneously or at different times. If a codicil is discovered after the grant of probate a separate probate of that codicil may be granted to the executor if it in no way repeals the appointment of executors made by the Will. If different executors are appointed by the codicil, probate of the Will will be revoked and a new probate granted of the Will and codicil together. When probate has been granted to several executors and one of them dies, the entire representation of the testator accrues to the surviving executor or executors. Probate of a Will when granted establishes the Will from the death of the testator and renders valid all intermediate acts of the executor as such. When a person appointed an executor has not renounced the executorship, letters of administration will not be granted to any other person until a citation has been issued calling upon the executor to accept or renounce the executorship, but when one or more of several executors have proved the Will, the Court may, on the death of the survivor of those who have proved, grant letters of administration without citing those who have not proved. The renunciation may be made orally in the presence of the Judge or by a writing signed by the person renouncing and when made will preclude him from ever

thereafter applying for probate of the Will appointing him executor. If an executor renounces or fails to accept an executorship within the time limited for the acceptance or refusal thereof, the Will may be proved and letters of administration with a copy of the Will annexed may be granted to the person who would be entitled to administration in case of intestacy.

**Residuary Legatee.**—When no executor has been appointed by a deceased in his Will or when the deceased has appointed an executor who is legally incapable or refuses to act or who has died before the testator or before he has proved the Will or when an executor dies after having proved the Will but before he has administered all the estate of the deceased, a universal or a residuary legatee may be admitted to prove the Will and Letters of Administration with the Will annexed may be granted to him of the whole estate or so much of it as may be unadministered.

After any grant of Probate or Letters of Administration with Will annexed, no other than the person to whom the same may have been granted has the power to sue or prosecute any suit or otherwise act as representative of the deceased until such Probate or Letters of Administration has or have been recalled or revoked.

#### SMALL ESTATES.

**Administrator General's Certificate.**—In cases where the value of the estate is Rs. 2,000/- or less, an Administrator General's Certificate can be obtained. The procedure for obtaining this Certificate is simple and less expensive. A fee of 3% on the value of the estate is payable. The value of the estate has, however, to be taken as at the date of the death of the deceased. These Certificates are equivalent to Letters of Administration.

## Earthquakes.

**Physical divisions of India and their relation to Earthquakes.**—The Indian continent is divided geologically and therefore physiographically into three distinct and well-defined units. The northernmost unit consisting of sedimentary and crystalline rocks comprises the great mountain ranges of the Himalayas that were upraised, geologically speaking, in comparatively recent times, and are believed to be still undergoing elevation. They constitute India's most unstable region and are therefore the seat of the most violent earthquakes. The north-south running mountains of Burma are components of the same mountain system, the Andaman and Nicobar Islands being their southern continuation, and Burma likewise pays the same penalty for their instability.

The southward push of these mountains caused a sinking of the Himalayan foreland—the region of the Indo-Gangetic basin, now filled with alluvium. This constitutes the second unit, and on account of its proximity to the restless mountains in the north, it shares, though in a lesser degree, the effects of the Himalayan earthquakes. But it also makes its own independent contribution of such catastrophes, as we know from our recent experience of the Bihar earthquake (January 1934).

The triangular portion of the Peninsula proper constitutes a stable landmass—a Horst—as the geologists call it—and is the third and most stable region in India, being comparatively free from severe earthquakes. Only one earthquake which did any considerable damage has been recorded from this region (April 1843). From the apex of the Peninsula to Madras, however, runs a region of minor shocks, probably connected with some dislocation in the earth's crust, though there is no direct evidence of this. These three units, then, constitute regions of decreasing intensity of earthquakes as we travel from north to south. They are indicated on the accompanying map, which is essentially the same as the one prepared by W. D. West of the Geological Survey of India.

**Causes.**—It will be unnecessary to go into the origin of the individual earthquakes, but a few remarks on the main causes of these phenomena will be illuminating. While minor earthquakes may be due to volcanic activity, the major ones are almost invariably the result of movement along dislocations in the earth's crust or "faults" as the geologists call them, and thrust planes. In the case of thrust planes certain sets of rocks override others, instead of being merely dislocated. The epicentre, that is the place of

parts and there were extensive landslips causing much damage and loss of life. In one day as many as thirty-three shocks were felt and continued for a whole month. Oldham mentions that this earthquake is recorded in the *Mir-at-ul-'Alam*, an unpublished work in the library of the Royal Asiatic Society of Bengal, in *Baddoni* (Bibliotheca Indica Vol. I, p. 319) in the *Memoirs of Babar* (Erskines edition, p. 170) in *Firishtah* (Lucknow edition, p. 183) and its date is therefore authentically recorded.

The Province of Kashmir was shaken by an earthquake in 1552, but no details are available.

Several earthquakes of less intensity took place between the years 1618 and 1664. On the 26th of May, 1618, Bombay experienced an earthquake in which nearly two thousand lives were lost. The accompanying hurricane resulted in the destruction of several vessels. Lakhugar in Assam suffered an earthquake on the 7th February 1663. Shocks were felt in certain parts of eastern Bengal for a period of thirty-two days during the year 1668.

The next earthquake of great intensity which affected India occurred in 1668, between the dates 2nd—11th May. Its effect was so serious that Samáji or Samawáni—a town of 30,000 inhabitants sank into the ground. A record of this appears in the *Masir-i-'Alamgiri* (Edlt. Bibl. Indica, p. 74).

Following this terrible catastrophe there was a period of comparative quiescence of about 50 years. Upper India was however shaken by an earthquake on the '14 Muharam of Aurangzib's 12th year' (*Mir-at-ul-'Alam*, an unpublished work of Bakhtiar Khan) that is, the 4th of June 1669. This earthquake was accompanied by a big shower of meteors, which, it is reported, falling into a lake caused its waters to overflow.

Kashmir and Attock were affected by shocks on 22nd June 1669 and 23rd June 1669 respectively, but not much damage appears to have been done.

A severe earthquake shook Delhi on Friday, the 17th of July 1720, at about mid-day and was accompanied by considerable damage to the fortress, Fatehpur Mosque and other property, as well as loss of life. It is reported that comparatively severe shocks continued for more than a month, so much so that the population of Delhi had to sleep out of doors during this period.

A violent earthquake accompanied by a hurricane of great intensity occurred in Calcutta and the delta of the Ganges in October 1737. It is reported that 20,000 craft plying on the Ganges were cast away, the steeple of a church sank completely into the ground, and 300,000 people lost their lives. It is further reported that 60 ton barques were blown two leagues up the river.

Bengal, Burma and the Arakan coast were affected on 2nd April 1762. In fact it is reported that the emergence of the Arakan coast from the sea is due to this earthquake, but that is an obvious exaggeration, though partial elevation of the coastal strip probably occurred. It is stated that oysters were found attached to rocks forty feet above ground level. Near Chittagong 60 square miles of land sank permanently under water.

Several shocks of varying intensity occurred in different parts of India—Calcutta, Kashmir,

Ongole and the upper reaches of the Ganges between 13th July 1762 and 22nd May 1803, but they were not of much importance.

A violent earthquake took place on 1st Sept. 1803, affecting Mathura, Calcutta, Garhwal, Kumaon and Delhi. At Mathura the domes of several mosques erected by Ghazi Khan sank into the ground. Several villages were swallowed up in Garhwal.

This earthquake is noted for the fact that the upper portion of the famous Qutab Minar fell as a result of it, though it is stated that the Minar was also struck by lightning.

16th June 1819.—This was one of the worst earthquakes experienced in India. Its effect was the severest in Cutch, the chief town of which—Bhuj—was completely ruined and 2,000 persons perished. Ahmedabad, Broach, Surat and Poona were all affected.

In the western region of Cutch the town of Sindree and the neighbouring area was submerged as a result of tidal waves. A tract 15 miles wide was raised in front of a branch of the Indus and the river had to cut a fresh channel across it. This ridge is known to the local inhabitants as Allah Band, or God's Embankment.

One very severe shock followed by minor ones occurred on 29th October 1826 and resulted in several houses falling in Khatmandu and Patan, in Nepal.

1827 Sept. (before 26th Sept. 1827).—The fort of Kolltaran, near Lahore, was destroyed and about 1,000 persons lost their lives. It is stated that a hill falling into the river Ravi resulted in extensive floods.

6th June 1828.—There is record of at least eighty earthquakes affecting the Indian region between the aforementioned date and the year 1830, but of these only two are worth mention, namely, the one that shook the vale of Kashmir on 6th June 1828 and the other that affected Nepal and the eastern and central region, Northern India. In Kashmir alone over a thousand persons lost their lives and for at least two months following the earthquake the number of shocks was as high as one to two hundred per day.

26th August 1833.—Felt in Khatmandu (Nepal) and North Bihar. In Khatmandu alone 100 houses were levelled to the ground and a similar fate overtook other places. There was continuous agitation for full 24 hours.

An earthquake of great intensity affected Burma, more particularly Amarapura and Ava, on 23rd March 1839. It is reported that shocks continued for four or five days, every fifteen to thirty minutes. 200—400 lives were lost and pagodas and other buildings in Ava, Amarapura and Sagaing suffered heavily.

19th February 1842.—Lasted for about three minutes in Kabul and affected Peshawar, Jallalabad, etc. It was very destructive at Peshawar and one-third of the town of Jallalabad was destroyed. Hot springs at Sonah became cold and the amount of water also diminished. The area affected was about 216,000 square miles. The epicentral area was probably near Jallalabad.

Numerous later earthquakes which occurred in different parts of the Indian region do not call for much attention as they were of minor im-

portance. Two earthquakes which affected the Deccan in March and April 1843 may be here recorded, for the Deccan, being a stable landmass, is rarely affected by earthquakes of any intensity. Sholapur, Maktal, Singrurgarh, Bellary, Kurnool, Belgaum were all affected and much damage was done. This is the only earthquake known in the Deccan which caused considerable damage. The epicentre was near Bellary.

Severe shocks, local in their effect, occurred in Upper Sind on 24th January 1852. Fort Kahan was completely ruined and about 350 persons were killed.

24th August 1858.—Burma was affected, but the shocks were not of great intensity. False Island situated south-east of Cheduba Island ( $18^{\circ} 38' N: 93^{\circ} 55\frac{1}{2}' E$ ) disappeared entirely under the Ocean. The same earthquake affected the Punjab and Bengal, but very little damage was done.

10th January 1860.—Experienced in Assam (Cachar), total area where shocks were felt was 250,000 square miles.

A severe earthquake occurred in the Bay of Bengal on the morning of 31st December 1881. The radius of the area affected was about 800 miles, and the total area over which the shock was felt was in the neighbourhood of 2,000,000 square miles, most of it being sea. It was felt at Gaya, Hazaribagh, Agra, Ootacamund and Calcut in India, and in Burma at Akyab where it was followed by the eruption of a mud volcano in Ramri. The northernmost point affected was near Monghyr.

30th May 1885.—This earthquake, although comparatively not so severe, resulted in heavy loss of life and about 3,000 persons perished in Kashmir. The epicentre was a few miles west of Srinagar. The radius of felt area was 300-450 miles, the total area affected being about 110,000 square miles.

14th July 1885.—The epicentre of this earthquake was north-west of Dacca. It was felt violently throughout Bengal, but extended also into Chota Nagpur, Bihar, Sikkim, Bhutan and Assam. The area affected was approximately 230,400 square miles.

20th December 1892.—This was felt over the greater part of Baluchistan, and was connected with an old fault line that runs along the foot of the Kojak range in a N.N.E. direction. The foot of the range is marked by a depression and numerous springs which are indicative of the fault. It is interesting to note that as a result of this earthquake the area west of the fault subsided about one foot and moved southward about 2½ feet! The earthquake was, however, local in its effects.

The worst earthquake which has affected Assam and probably the greatest within historic times occurred on 12th June 1897. Stone buildings in Shillong, Goalpara, Gauhati, Nowgong and Sylhet were almost entirely destroyed everywhere and Calcutta was seriously affected. Over 1,600 lives were lost and the earthquake was felt in an area of 1,730,000 square miles. The earthquake was caused by a "movement along a thrust-plane or thrust-planes, and along secondary thrust and fault-planes, which had a maximum length of about 200 miles and a maximum width of about 50 miles." This movement was due to the relief of differential strains set up in the interior of the earth.

The district of Kangra in the Punjab suffered heavily on 4th April 1905, more particularly because the shocks occurred early in the morning when people were still asleep. There was heavy loss of life—20,000 persons having perished. The area affected was 1,625,000 square miles, Kangra and Dharamsala were completely destroyed. The main shock was from north to south, followed by an equally severe one from south to north. The earthquake is ascribed to movement along one of the reverse faults of the Himalayas.

21st October 1908.—This earthquake affected the Kachhi plain, Baluchistan. Considerable damage was done and over 200 lives were lost. The radius of the felt area was about 16-45 miles. The elongated epicentre was N.W.-S.E. in direction. The earthquake was presumably due to the presence of a fault, though, the area being covered with alluvium, this is more or less conjectural.

A violent earthquake occurred over the greater part of the Northern and Southern Shan States on 21st May 1912, and was felt practically over the whole of Burma, Siam and Yunnan. An area of 125,000 square miles was affected. Shocks continued the following day and were followed on the 23rd May by a severe shock which was felt over an area of 375,000 square miles. Numerous after shocks continued in May, June, July and August, when they finally ceased. The epicentre was close to the great Kyaukkyan fault in the Northern Shan States.

No severe earthquake is recorded during the six years following the last earthquake in Burma, but a violent shock was felt on 8th July 1918 and affected Eastern Bengal, Assam, Burma, North-west India as far as Lahore. It was most strongly felt in Srimangal (Assam) where many tea-estates were ruined. The total area over which it was felt was 800,000 square miles. This earthquake was due to subsidence along a fault. It was accompanied by pouring out of sand, mud and water from fissures created in the ground.

17th December 1927.—Was experienced in Rangoon, but very little damage was done. Affecting as it did a big commercial city like Rangoon its importance cannot be denied. Investigation appears to show that the shock was due to "forces of uplift causing movement along lines of weakness below the deltaic alluvium." Although the area is covered with alluvium and direct observations are not possible, the probability of such a zone of weakness existing in the neighbourhood of the town must be accepted.

The areas around Rawalpindi, Peshawar and Attock are regarded as very unstable, as one big fault and numerous smaller ones are located in this region. The earthquake on 1st February 1929 in the North-West Himalayas was at first thought to be connected with these faults. But it has been shown that the focus of this earthquake lay at a considerable depth—160 kms. Which is a point of interest, for it shows that the shocks were not connected with any surface features such as faults. The epicentre was situated about 25 miles north-west of Abbottabad. Some damage was done to property and a few lives were lost.

**8th August 1929.**—This earthquake, which affected the small town of Swa in Burma, was connected with several of the later earthquakes that occurred in different parts of Burma—the Pegu earthquake of 5th May 1930, the Podo earthquakes of July to December 1930 and the Pyu disaster of 4th December 1930. The epicentral area was quite small and lay about 6 miles to the north-west of Swa. Damage was done to railway lines and bridges. Loaded trucks were lifted off the track and thrown to one side. The shocks were due to movement along a fault in the Tertiary rocks, more or less parallel to the great fault which is known as the Boundary Fault.

A violent shock occurred at about 8-15 p.m. on 5th May 1930, and practically levelled the whole town of Pegu. About 550 lives were lost and considerable damage was done to property in Rangoon as well. The actual area affected was about 220,000 square miles. This earthquake came without any preliminary warning and lasted only 30 seconds. The earlier Burmese earthquake previously mentioned was presumably a forerunner of the present one and did not indicate the dying out of still earlier movements. It is thought that the movement was connected with the boundary faults of the Shan Plateau, which was accentuated by the forward movement of *terra firma* into the gulf of Martaban.

Assam was shaken by a severe earthquake on 3rd July 1930, after about 12 years of comparative quiescence. The total area affected was about 350,000 square miles. The town of Dhubri suffered considerable damage, but fortunately no loss of life occurred. This is probably due to the fact that many houses are built of 'flexible superstructure supporting light, often galvanised iron roofs' and at that time of the year many persons were not sleeping inside their houses. The earthquake was probably due to weakness at the foot of the Assam range, movement along which zone was assisted by the rapid denudation of the mountains, which presumably upset the equilibrium.

**3rd/4th December 1930.**—Several severe shocks were felt between 10-15 p.m. and 1-22 a.m. in Pyu, Burma. Most of the brick buildings were destroyed and about 30 persons lost their lives. The shocks were felt over an area of approximately 220,000 square miles.

**27th August 1931.**—This was one of the worst of the Baluchistan earthquakes, and about 200 lives were lost. It was preceded on the 25th by an earlier earthquake the epicentre of which was near Sharigh. The March earthquake was felt over an area of 370,000 square miles. Both these earthquakes were connected with the sharp bends of the Suleiman, Bugti and Kirthar hills for such bends are regions of strain where earth movements are likely to occur.

**15th January 1934.**—This, the North Bihar earthquake, is still fresh in our minds. It was one of the most violent earthquakes that have affected India. It is estimated that over 10,000 lives were lost and several crores worth of property was damaged. Sitamarhi, Madhubani, Monghyr, Patna, Jamalpur, Muzaffarpur, Darjeeling, etc., and the Nepal valley suffered heavily. The epicentre of this earthquake ran from near Motihari through Sitamarhi to Madhubani. The total area over which it was

felt was 1,000,000 square miles. The earthquake is attributed to faults underlying the alluvium. It is fortunate that it occurred in the afternoon (about 2-15 p.m.), for had it occurred at night it would have been one of the worst of such disasters experienced upon the earth.

**31st May 1935.**—The Quetta earthquake is one of the latest of the more violent catastrophes that have overtaken the Indian region. This can be estimated from the fact that 25,000 lives perished and damage to private property, Railway lines, etc., ran into several crores. The town of Quetta was practically destroyed and the area affected was about 100,000 square miles. The causes leading to these earthquakes are unknown, but the focus was probably shallow. The earthquake is probably connected with the sharp bend in the hill ranges near Quetta.

The frequency of aftershocks of the Quetta earthquake of May 1935, according to the Geological Survey of India, appears to be considerably diminished, but several sharp shocks were felt during the year in the Assam seismic area, including those of 16th January at about 18.45 hours and of 21st March at 21.45 hours, Indian standard time.

The last severe earthquake to be experienced in India occurred in the Hindu Kush on 14th November 1937, and was felt throughout the North-West Frontier Province, Kashmir, as well as largely over the Punjab, United Provinces, northern Sind and Baluchistan. Severe shocks were felt at Lahore, Rawalpindi, Peshawar, Kangra, Chitral and Drosh, and considerable damage was done. No loss of life was reported.

Although minor earthquakes have been reported from different parts of India later than November 1937, none of these has caused damage or loss of life. Details of some of these are given below.

**5th January 1938.**—Two shocks were felt at Drosh in the Chitral District, North-West Frontier Province. Another shock of the same intensity was felt on the 7th January, but there was no damage or loss of life.

**14th April 1938.**—An earthquake shock was felt at Monywa in the Lower Chingwin district, Burma, at 7-47 a.m. Cracks appeared in the walls of several buildings, but there was no loss of life.

**3rd May 1938.**—Two shocks were felt at intervals of about five seconds at Shillong in Assam, at 10-21 p.m. The shocks lasted for about 40 seconds. There was very little damage to property and no loss of life.

**16th August 1938.**—Shocks were experienced in the Upper Chindwin district, Burma, and were felt over a fairly wide area. The shocks, which lasted about 30 seconds, seem to have been severe at Kalembo. Pucca buildings and Pagodas tumbled down, but there was no loss of life. Smaller shocks were also felt at Mawlaik, Paungbyin, Mingin, Indaw, Kalewa, Homalin, Tabyin, etc.

**7th February 1939.**—Two shocks were felt at Drosh in Chitral at intervals of two seconds, but there was neither material damage nor loss of life.

Reports received by the Geological Survey of India from various parts of India and Burma show that 82 earthquake shocks were felt in 1937 in India. With the exception of the rather severe shock of 14th November, which originated in the Hindu Kush region and affected a considerable tract of north-west India, the rest were of slight intensity, unattended by any damage to buildings or persons.

Regionally the shocks were distributed as follows:—

Burma, 28; north-eastern India, including Sikkim, Nepal and Tibet, 31; north-western India, including Kashmir, Chitral and Baluchistan, 21; and Peninsular India, 2

The epicentre of the shock of 14th November 1937 has been located in the Hindu Kush mountains, north-west of Dosh, in Chitral. This has been deduced from observers' reports and from seismographic records available from the Meteorological Observatories at Bombay, Agra, Calcutta and Kodakanal. This shock was felt at such distant places as Kabul, Dehra-Dun, Simla, Multan, Dera Ismail Khan and Roorkee.

At least sixty earthquake shocks were felt in India during the year 1939. Fortunately all these shocks, without exception, were of slight intensity and caused neither loss of life nor serious damage to property.

About twenty of these shocks affected the unstable Assam region, of which four were felt at Dhubri, six at Gauhati and a like number at Shillong, Dosh (Chitral State), Quetta, Lahore, Shikarpur (Cutch), Hyderabad State) and many other towns experienced shocks during the year.

It is unnecessary to give details of the large number of shocks felt during 1939 for most of these were of minor importance. Mention must, however, be made of the earthquake of 21st November, 1939, which was felt at Jammu, Mianwali, Dera Ismail Khan, Peshawar, Rawalpindi, Srinagar, Dalhousie, Kabul, Gilgit, Skardu, etc. Its epicentre was in the Hindu Kush range, being situated at  $36^{\circ}$  N  $75^{\circ}$  E. Its focal depth was 200 KM.

The intensity of this earthquake at Srinagar and Gilgit was VII on the Mercalli scale. At Srinagar three shocks were felt at intervals of 10 seconds each. Cracks developed in the walls of the Observatory and other buildings in the city. At Gilgit, which suffered three shocks at intervals of 2 seconds each, boulders slipped down from the surrounding mountains and dust spread all over the valley.

During 1940 earthquake shocks were felt at Gulmarg in Kashmir, at Barmer (Rajputana) and at Bhuj and Radhanpur in the Western Indian States.

At Gulmarg two shocks of moderate intensity were felt on the 3rd August at 14.45 (I.S.T.) and cracked walls of *Lutcha* houses. Shocks of moderate intensity were also felt on 8th August and 21st September, 1940, but apart from cracks in *Lutcha* houses no damage was done. Barmer and Bhuj experienced a slight shock on 31st October while Bhuj had another shock on 13th November, 1940.

There was no loss of life or serious damage to property during any of these earthquakes.

A large number of earthquake shocks occurred in India during the year 1941. It is unnecessary to give details of all these but particulars of three or four of the more important ones may be given.

An earthquake of moderate intensity took place on the 21st of January 1941 at 18.16 hours (I.S.T.) with its epicentre to the north of Assam. The shocks lasted for about one minute but no damage was caused.

Another earthquake occurred on the 26th June at 17.27 hours (I.S.T.) This earthquake whose epicentre lay in the neighbourhood of Nicobar Islands, was of very great intensity and was felt in Madras, Chittagong, Chandwadi, Colombo, etc. Extensive damage to buildings occurred in Port Blair where 4 persons were killed and 4 seriously injured. The duration of the shock was less than half a minute.

On the 30th of June at 23.58 hours (I.S.T.) a shock of moderate intensity was felt at Port Blair. Its epicentre lay in the neighbourhood of north Andaman.

Another earthquake occurred on the 29th of September at 8.5 hours (I.S.T.) at Quetta. The shocks lasted for about 35 seconds and caused damage to *Lutcha* buildings and mud houses in Quetta.

Three earthquakes of slight to moderate intensity were recorded during the year 1942. An earthquake of slight intensity with its epicentre in Assam was felt at 16.17 hours (I.S.T.) on 22nd February in parts of Bengal and Assam. No loss of life or damage was reported. On 22nd March a quake of moderate intensity was felt at 7.38 hours at Lahore, Rawalpindi and Simla. The epicentre was in the Hindukush mountains. A third earthquake of slight intensity was felt in parts of India on the 15th of May 1942 at 22.25 hours (I.S.T.) The epicentre lay in the Hindu Kush. There was no loss of life or damage to property.

Although a large number of earthquakes have occurred during 1944-45, with the exception of one they were all of comparatively small intensity. An earthquake of moderate intensity was felt on the 25th December, 1944, at Slichar, Shillong and Calcutta, at about 9.25 p.m., Indian Standard Time. At Slichar shocks were felt over a period of 3 minutes and several houses suffered damage. No damage was, however, reported from either Shillong or Calcutta.

Another earthquake of slight intensity was felt at Patna, Bihar district, at 10.25 p.m. on the 18th February, 1944. Though the shocks felt were fairly sharp no damage to property or loss of life took place.

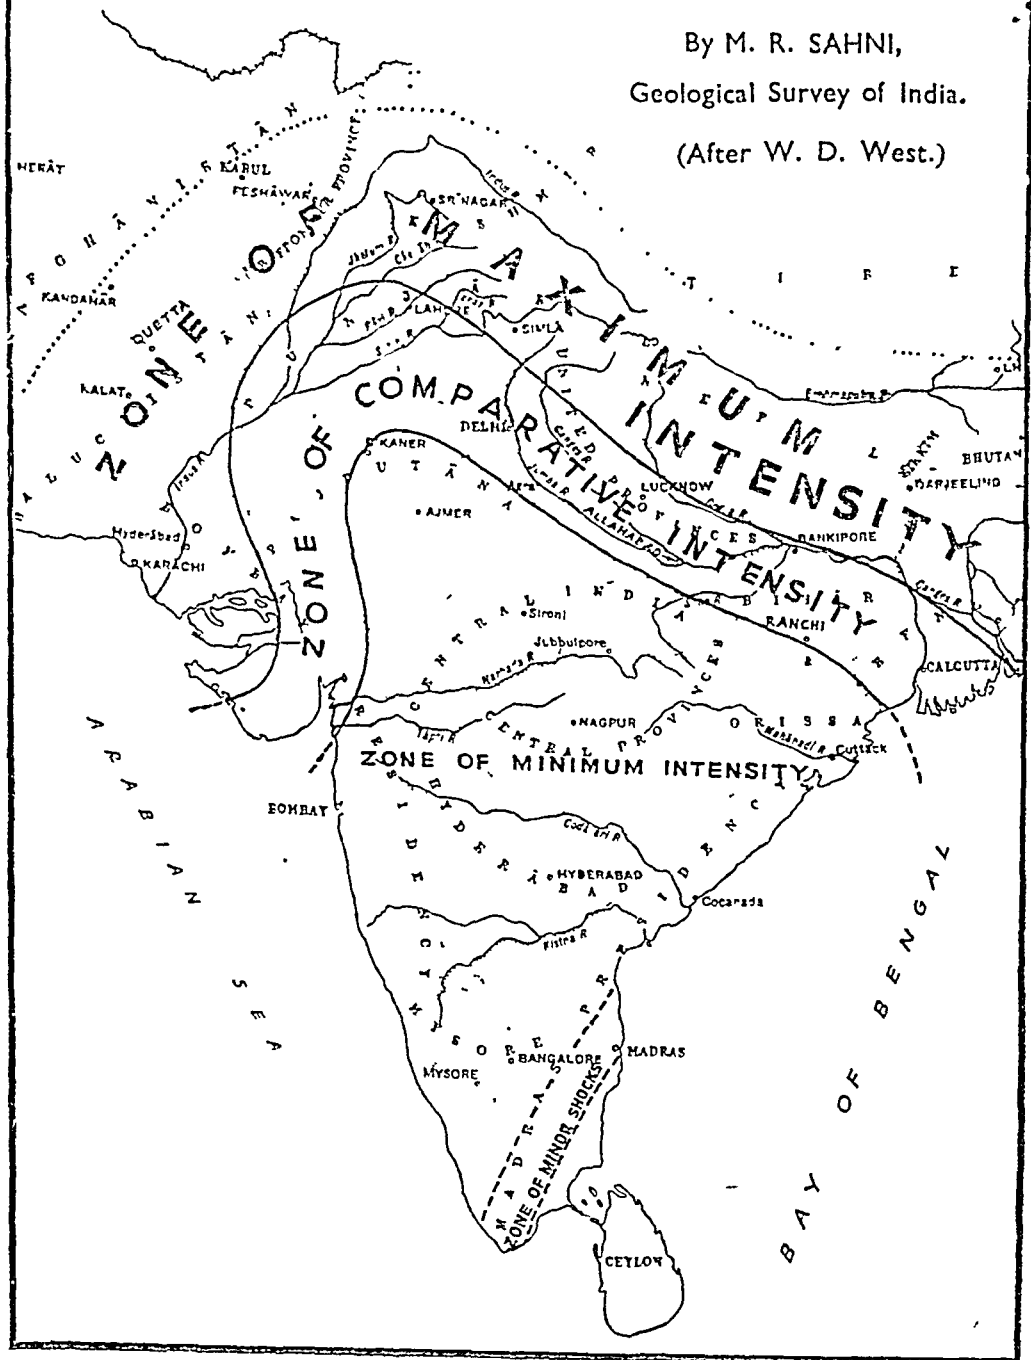

A severe earthquake took place on the 28th November, 1945, and shocks were felt intermittently for a period of two hours, commencing at 3 hours 21 minutes, over a wide area in north western India. This earthquake was due to a submarine land slide. A characteristic feature of this earthquake was the high tide which swept the coastal region to Mekran and neighbouring areas, causing heavy floods, damage to property and loss of life. A lasting visible effect of this earthquake was the appearance of two small islands about 10 miles into the sea, off the Mekran coast.

# MAP SHOWING THE EARTHQUAKE ZONES OF INDIA

By M. R. SAHNI,

Geological Survey of India.

(After W. D. West.)

# Posts and Telegraphs.

## POST OFFICE.

The control of the Posts and Telegraphs of India is vested in an officer designated Director-General of Posts and Telegraphs whose office is attached to the Department of Posts & Air of the Government of India. For financial and budget matters there is a Financial Adviser, Communications. The superior staff of the Direction, in addition to the Director-General himself, consists on the postal side of one Senior Deputy Director-General, one Deputy Director-General, Postal Services, one Assistant Deputy Director-General, War, two Assistant Directors-General, Establishments, one Assistant Director-General, Postal Services, one Assistant Director-General, Planning, one, Assistant Director-General, Pay and Allowances and seven Assistant Dy. Directors-General.

For postal purposes, India is divided into nine circles, namely, Bengal and Assam, Bihar and Orissa, Bombay, Central, Madras, Punjab and North-West Frontier, United Provinces, Sind and Baluchistan and Assam. Each of the first seven is in charge of a Postmaster-General and the Assam and Sind and Baluchistan Circles are each controlled by a Director, Posts and Telegraphs. The Central Circle comprises roughly the Central Provinces and the Central India and Rajputana Agencies.

The Heads of Circles are responsible to the Director-General for the whole of the postal arrangements in their respective circles, including those connected with the conveyance of mails by railways, inland steamers, and air services. All the Postmasters-General are provided with Deputy and Assistant Postmasters-General while in the Sind and Baluchistan and Assam Circles the Director is assisted by Assistant Directors. The nine Postal Circles are divided into Divisions, each in charge of a Superintendent of Post Offices or Railway Mail Service as the case may be and each Superintendent is assisted by a certain number of officials styled Inspectors.

Generally there is a head post office at the headquarters of each revenue district and other post offices in the same district are usually subordinate to the head office for purposes of accounts. The Presidency Postmasters of the Calcutta, Bombay and Madras General Post

Offices, the Chief Postmaster of the Delhi General Post Office and Postmasters of the larger of the other head post offices are directly under the Postmasters-General. The Presidency Postmasters have one or more Inspecting Postmasters subordinate to them! When the duties of the Postmaster of a head office become so onerous that he is unable to perform them fully himself, a Deputy Postmaster is appointed to relieve him of some of them, and if still further relief is required, one or more Assistant Postmasters are employed. The more important of the offices subordinate to the head office are designated sub-offices and are usually established only in towns of some importance. Sub-offices transact all classes of postal business with the public, submit accounts to the head offices to which they are subordinate incorporating therein the accounts of their branch offices, and frequently have direct dealings with Government local sub-treasuries. The officer in charge of such an office works it either single-handed or with the assistance of one or more clerks according to the amount of business.

Branch offices are small offices with limited functions ordinarily intended for villages, and are placed in charge either of departmental officers on small pay or of extraneous agents, such as school-masters, shop-keepers, land-holders or cultivators who perform their postal duties in return for a small remuneration.

The audit and accounts work of the Post Office is entrusted to the Accountant-General, Posts and Telegraphs, who is an officer of the Indian Audit Department and is not subordinate to the Director-General. The Accountant-General is assisted by Deputy Accountant-General, all of whom, with the necessary staff of clerks, perform at separate headquarters the actual audit and accounts work of a certain number of postal circles.

In accordance with an arrangement which has been in force since 1883, a large number of sub-post offices and a few head offices perform telegraph work in addition to their postal work and are known as combined offices. The policy is to increase telegraph facilities everywhere and especially in towns by opening a number of cheap telegraph branches of sub-post offices.

The **Inland Tariff** (which is applicable to Aden, Nepal, Ceylon and Portuguese India except as indicated below) is as follows:—

	When the postage is prepaid.	When the postage is wholly unpaid.	When the postage is insufficiently prepaid.
<i>Letters.</i>	Anna. Pies.		
Not exceeding one tola .. ..	1 6	} Double the prepaid rate (chargeable on delivery).	} Double the deficiency (chargeable on delivery).
And every additional tola .. ..	1 0		
<i>Book and pattern packets.</i>			
For the first five tolas or fraction thereof .. ..	0 9		
For every additional two and a half tolas, or fraction thereof, in excess of five tolas .. ..	0 3		

Postcards.

Single .. ..	6 ples.
Reply .. ..	1 anna.

(The postage on cards of private manufacture must be prepaid in full. Reply postcards cannot be sent to Nepal.)

Parcels (prepayment compulsory).

Parcels not exceeding 12½ seers (1,000 tolas) in weight:—

	Rs. a.
Not exceeding 40 tolas .. ..	0 6
For every additional 40 tolas or part of that weight .. ..	0 6

Registration is compulsory in the case of parcels weighing over 440 tolas.

All parcels to Aden should be registered. There is no parcel service to Nepal. These rates are not applicable to parcels for Ceylon and Portuguese India.

Registration fee. Rs. a.

For each letter, postcard, book or pattern packet, or parcel to be registered 0 3

Ordinary Money Order fees.

For every sum of Rs.10 or fraction thereof 0 2

In the case of money orders for Ceylon and Portuguese India, the rates prescribed for foreign rupee money orders are applicable. There is no money order service to Nepal.

**Telegraphic money order fees.**—The same as the fees for ordinary money orders *plus* a telegraph charge calculated at the rates for inland (the cost of the telegraphic advice to Aden and Ceylon in respect of those countries) telegrams for the actual number of words used in the telegram advising the remittance, according as the telegram is to be sent as an "Express" or as an "Ordinary" message. In addition to the above a supplementary fee of two annas is levied on each telegraphic money order.

There is no telegraphic money order service to Nepal or Portuguese India. In the case of Ceylon the telegraph charge is calculated at the rates shown below:—

**Express.**—Rs. 2-8-0 for the first 12 words and 3 annas for each additional word.

**Ordinary.**—Re. 1-4-0 for the first 12 words and 2 annas for each additional word.

**Value-payable fees.**—These are calculated on the amount specified for remittance to the sender and are the same as the fees for ordinary money orders.

Insurance fees. Rs. a.

Where the value insured does not exceed Rs. 100 .. ..	0 4
Where the value insured exceeds Rs. 100 but does not exceed Rs. 200 .. ..	0 5½
Where the value insured exceeds Rs. 200 but does not exceed Rs. 300 .. ..	0 8

For every additional Rs. 100 or fraction Rs. a. thereof over Rs. 300 and upto Rs. 1,000 0 2

For every additional Rs. 100 or fraction thereof over Rs. 1,000 .. .. 0 1

As regards Aden, Ceylon and Portuguese India see Foreign Tariff.

**Acknowledgment fee.**—For each registered article 1 anna.

**The Foreign Tariff** (which is not applicable to Aden, to Ceylon, to Nepal or to Portuguese India except as indicated below), is as follows:—

**Letters.**—To Aden, Ceylon, Nepal and Portuguese India—Indian inland rates. To Burma—2 annas for the first tola and 1 anna for every additional tola or part thereof.

To all other countries. { 3½ annas for the first ounce and 2 annas for each additional ounce or part of that weight.

Postcards, Single .. .. 2 annas.

„ Reply .. .. 4 annas.

Postcards to Burma: Single 1 anna and reply .. .. 2 annas.

**Printed Papers.**—½ anna for every 2 ounces or part of that weight.

**Business Papers.**—For a packet not exceeding 10 ounces in weight .. .. 3½ annas.

For every additional 2 ounces or part of that weight .. .. ½ anna.

**Samples.**—1½ annas for first 4 ounces and ½ anna per 2 ounces thereafter.

**Printed Papers, Business Papers and Samples.**—To Burma, 9 pies for the first five tolas and 6 pies for every additional 5 tolas or part of that weight.

Parcels.

Parcel postage varies for different countries as shown in the Foreign Post Directory included in the Post and Telegraph Guide. Information relating to the rates of postage on parcels for Great Britain and Northern Ireland is given below:—

(i) Parcels not exceeding 22 lbs. in weight and addressed to Great Britain and Northern Ireland are forwarded as mails to the British Post Office, the rates of postage applicable to such parcels being as follows:—

				Via. Gibraltar.	
					Rs. a. p.
For parcel					
Not over 3 lbs.	..	..	..		1 8 0
Over 3 lbs. but not over 7 lbs.	..	..	..		2 12 0
„ 7 „	..	11	..		3 15 0
„ 11 „	..	22	..		6 3 0

A special air letter form is available from post offices at a cost of 6 annas per form. Similar forms of private manufacture, bearing an indication that they have been approved by the Head of a Circle, can also be used, but they should be prepaid with the usual charge of 6 annas each.

Air letters cannot be registered or insured, nor are any enclosures permitted. No other facility, such as express delivery, is available.

**Magnitude of Business in the Post Office.**—At the close of 1944-45, there were 126,002 permanent and 26,924 temporary, Post & Telegraph officials, 25,860 post offices and 159,000 miles of mail lines. During the year, 1,730 million articles, including 60.1 million registered articles were posted; stamps worth Rs.12.8

crores were sold for postal purposes; about 61.4 million money orders of the total value of Rs. 173 crores were issued; 1,281 thousand Indian Postal orders to the value of Rs. 65 lakhs were sold; a sum of Rs. 24.7 crores was collected for tradesman and others on V.P. articles, about 3.4 million insured articles valued at 147 crores of rupees were handled. Customs duty aggregating over 81 lakhs was realised on parcels and letters from abroad; pensions amounting to about Rs. 203 lakhs were paid to Indian Military pensioners and over 6,000 lbs. of quinine were sold to the public. On the 31st March 1945, there were 3,095,000 Savings Bank Accounts with a total balance of Rs. 80.2 crores and 92,960 Postal Life Insurance Policies with an aggregate assurance of Rs. 18.8 crores.

### Telegraphs.

Up to 1912 the telegraph system in India was administered as a separate department by an officer designated Director-General of Telegraphs who worked in subordination to the Government of India in the Department of Commerce and Industry. In that year it was decided to vest the control of Posts and Telegraphs in a single officer as an experimental measure with a view to the eventual amalgamation of the two Departments.

In pursuance of this policy an experimental amalgamation of the two services was introduced in the Burma and Central Circles from the 1st July 1912. The fundamental principles of this scheme which followed closely the system in force in the United Kingdom and several other European countries were that the traffic and engineering work of the Telegraph Department should be separated, the former branch of work in each Circle being transferred to the Postmaster-General assisted by a Deputy Postmaster-General and a suitable number of attached officers and the engineering branch being controlled by a Director of Telegraphs. Subordinate to this officer there were several Divisional Superintendents who were assisted by a number of attached officers.

In 1914 the complete amalgamation of the two Departments was sanctioned by the Secretary of State and introduced from 1st April. The superior staff of the Direction, in addition to the Director-General himself, now consists on the engineering (including wireless) side of a Chief Engineer. Telegraphs, with one Deputy Director-General Telegraph Staff and Establishments, one Deputy Chief Engineer, one Addl. Deputy Chief Engineer and two Asstt. Chief Engineers. For Engineering Construction work, there is one Addl. Chief Engineer with two Directors of Telegraphs, and some Divisional Engineers, Telegraphs. For traffic work there is a Deputy Director-General with one Controller of Telegraph Traffic and one Assistant Deputy Director-General. To assist in Telephone work there is one Deputy Director-General (Telephones) and two Assistant Deputy Directors-General, Telephones, and in Wireless matters there is one Assistant Dy. Director-General (Wireless). In the Circles the scheme

which has been introduced follows closely on the lines of the experimental one referred to above. For telegraph engineering purposes India was formerly divided up into five Circles, each in charge of a Director. These five Circles were divided into eighteen Divisions each in charge of a Divisional Engineer. In 1922 Sind and Baluchistan Circle was formed with its headquarters at Karachi. This Circle is now under the charge of a Director of Posts and Telegraphs. On the 31st March 1924 there were 7 Circles and 20 Divisions. With a view to complete fusion of the three branches of work, the engineering work of the Bombay and Central Circles was brought under the control of the respective Postmaster-General in 1925 and this unification was gradually extended to other Circles. The fusion was completed in March 1930. This year the Bengal and Assam Circle has been divided into two Circles, namely Bengal Circle and Assam Circle, in charge of a Postmaster-General, and a Director, with headquarters at Calcutta and Shillong respectively. The telegraph traffic and the engineering branches in the Circle are now controlled by the Postmasters-General and the Directors of Posts and Telegraphs, Karachi and Shillong. There is also one Deputy Director of Telegraph Traffic each at Calcutta. Bombay and Madras to look after the speedy disposal of traffic. There are now 24 Engineering Divisions. With effect from 1-7-1939, the Superior Telegraph Engineering and Wireless Branches have been amalgamated into a Single Service, viz.,—Telegraph Engineering Service—Class I.

There has been much expansion on the Telephones side of the Department consequent on the acquisition of the telephone systems at Bombay, Calcutta, Madras, Karachi and Ahmedabad by Government. Separate Telephone Districts which are quite independent of the respective Postmasters-General were created at Bombay, Calcutta and Madras with effect from 1st April 1943. Karachi and Ahmedabad Telephone systems have been placed under the administrative charge of the Bombay District. The Chief Officers of the Bombay and Calcutta Districts are designated General Managers, Telephones. Recently a new Telephone District has also been formed at Delhi where there has been considerable telephone expansion during the war.

The audit and accounts work of the Telegraph Department is, like that of the Post Office, entrusted to the Accountant-General, Posts and Telegraphs, assisted by a staff of Deputy and Assistant Accountants-General.

**Inland Telegrams and Tariff.**—Telegrams sent to or received from places in India or Burma or Ceylon are classed as Inland telegrams. The tariff for Inland telegrams is as follows:—

		For delivery in India.	
		Private and State.	Express. Ordinary.
		Rs. a.	Rs. a.
Minimum charge ..	..	1 10	0 13
Each additional word over 8 ..	0 2	0 1	

		For delivery in Burma.	
		Private and State.	Express. Ordinary.
		Rs. a.	Rs. a.
Minimum charge ..	..	2 12	1 6
Each additional word over 8 ..	0 4	0 2	

		For delivery in Lhasa (Tibet).		For delivery in Ceylon.	
		Private and State.	Express. Ordinary.	Private and State.	Express. Ordinary.
		Rs. a.	Rs. a.	Rs. a.	Rs. a.
Minimum charge ..	..	2 0	1 0	2 8	1 4
Each additional word over 12 ..	0 2	0 1	0 3	0 2	

#### Additional charges.

Minimum for reply-paid telegram .. ..	Minimum charge for an ordinary telegram except in the case of Burma, for which the minimum amount pre-payable is Rs. 2-4-0 for express and Re. 1-2-0 for Ordinary.
---------------------------------------	--

Notification of delivery.. Minimum charge for an ordinary telegram.

Multiple Address telegrams, copying fee for each 100 words or less in each copy beyond the first .. 4 annas.

Collation .. .. One half of the charge for an ordinary telegram of same length.

		Rs.
For acceptance of an Express telegram during the hours when an office is closed.	If both the offices of origin and destination are closed ..	2
	If only one of the offices is closed ..	1
	If the telegram has to pass through any closed intermediate office, additional fee in respect of each such office. 1	

Boat hire .. .. Amount actually necessary.

		For delivery in India.		For delivery in Ceylon.	
		Ex-press.	Ordinary.	Ex-press.	Ordinary.
		Rs. a.	Rs. a.	Rs. a.	Rs. a.
Minimum charge ..	1 8	0 12	1 8		

Each additional 5 words over 40 in respect of India, each additional four words over 32 in respect of Ceylon .. 0 2 0 1 0 2  
The address is free.

**Greetings Telegrams.**—Inland Greetings telegram service has been suspended as a temporary measure.

**Inland De Luxe Telegrams.**—Senders of Greetings telegrams to or from offices in India may use their own phraseology in such telegrams on payment of 2 annas in addition to the charge appropriate to the class of message (Express or Ordinary).

These telegrams will be delivered in specially printed artistic forms and envelopes.

This DE LUXE service is not applicable to telegrams for Burma.

The sender of a DE LUXE telegram should write before the address the special instruction =LX= which will not be charged for.

**Foreign Tariff.**—The charges for foreign telegrams vary with the countries to which they are addressed. The rates per word for telegrams to countries in Europe, America, etc., are as follows:—

Cables are not now accepted to the following enemy or enemy occupied countries:—

Germany, Japan, Japanese possessions, viz:—Kara futo, Corea, Manchuria, Kwangtung leased territory, Formosa, Marhan or Ladrone Islands, Marshall, Palaoa and Caroline Islands, Saghalien, Japanese occupied territories (including Chefoo in China. Wake Island, and such portions of New Guinea as are in enemy occupation.

**Urgent Telegrams—**

Rate double of ordinary rate.

**Daily Letter Telegrams—**

One-third ordinary rate with a minimum charge for 25 words.

Code telegrams (except for the U.S.A. and countries within the British Empire) are accepted at 3/5th of the ordinary rate. Code telegrams for countries within the British Empire and for the U.S.A. are accepted at 2/3rds of the ordinary rate (*Vide clause 425, P. & T. Guide*).

Telegrams are accepted at all Government Telegraph Offices.

Usual rules apply regarding Registration of abbreviated addresses, Reply Paid, etc.

Full lists published in Post and Telegraph Guide.

**Radio-Telegrams.**—For radio-telegrams addressed to ships at sea from offices in India and transmitted via the coast stations at Bombay, Calcutta, Karachi or Madras the charge is thirteen annas per word (ordinary) or eight annas per word (code) in nearly all cases.

The following are the charges (excluding supplementary charges) for radio-telegrams from offices in India transmitted to ships at sea through the coast stations mentioned in the preceding paragraph :—

	Total charge per word.	
	Ordinary.	Code.
	Rs. a.	Rs. a.
(1) All Government or Private Radio-telegrams, excepting those mentioned in (2) and (3) below ..	0 13	0 8
(2) Radio-telegrams to His Britannic Majesty's Ships of War or Ships of the Royal Indian Navy ..	0 8	0 5
(3) Radio-telegrams to Spanish or Swedish ships ..	0 12	0 7½

The sender of a radio-telegram may prepay a reply. He must insert before the address, the instruction "R. P." followed by mention in Rupees and annas of the amount prepaid, e.g., R.P. 7-8. This expression counts as one word.

**DAILY LETTER-TELEGRAMS.**

Daily Letter-Telegrams in plain language, which are dealt with telegraphically throughout are accepted for non-Empire countries and Australasia on any day of the week, and are ordinarily delivered to the addressee on the morning of the second day following the day of booking. They are subject to the conditions prescribed for Deferred Foreign telegrams with certain exceptions as stated below.

The charge for a Daily Letter-Telegram is ordinarily one-third of the charge for a full rate telegram of the same length and by the same route subject to a minimum charge equal to the charge for 25 words at such reduced rate including the indication DLT.

The late fee system does not apply to Daily Letter-Telegrams and such telegrams are not accepted during the closed hours of an office.

On Indian lines Daily Letter-Telegrams are transmitted after Deferred Foreign telegrams.

The only special services admitted in Daily Letter Telegrams are Reply paid, Poste Restante, Telegraph restante, Multiple addresses, de Luxe and telegraph redirection under orders of the addressee.

The class prefix for Daily Letter Telegrams will be DLT.

**NIGHT LETTER TELEGRAMS.**

Night Letter Telegrams (NLT) are accepted for all Empire countries, except Australasia, with which the Daily Letter Telegram Service (DLT) remains in force, at the same rates and under the same conditions as prescribed for Daily Letter Telegrams, except as follows :—

(i) They will be delivered on the morning of the day following the day of booking.

(ii) The special instruction and the class prefix for Night Letter Telegrams will be NLT.

**EMPIRE SOCIAL TELEGRAMS.**

Empire Social Telegrams (GLT) conveying solely greetings, family news or non-commercial personal affairs can be availed of throughout the year at special reduced rates, for all Empire countries except Sudan.

Empire Social Telegrams (GLT) for the purpose of transmission and delivery to a territory or place to which NLT service is available is deferred until the morning of the day following the day of acceptance; where there is no NLT service but a DLT service is available, an Empire Social Telegram is deferred and delivered on the second day following the day of acceptance or as soon as possible thereafter. Minimum charge for an Empire Social Telegram is Rs. 3-6-0 for the first 12 words (excluding the Special Instruction-GLT-which will not be charged) and 4½ annas for every additional word.

The only Special Services admitted in Empire Social Telegrams are "Reply Paid" and "De Luxe."

**Foreign De Luxe Telegrams.**—Telegrams relating to happy events or greetings may be sent to certain foreign countries for delivery on an artistic form in an envelope of the same

character. A supplementary charge of four annas per telegram in addition to the charge at the appropriate rate according to the class (i.e., Urgent, Ordinary, Code, Deferred, D.T., etc.) is charged for such telegrams. This De Luxe Service is not available with U. K. for the duration of the war.

**Greeting Telegrams (Foreign).—**Telegrams conveying Christmas and New Year wishes are accepted for most non-empire countries from the 14th of December to the 6th January inclusive at special reduced rates, subject to a minimum charge for 10 words per telegram. To all Empire countries except Sudan, such greetings may be conveyed by means of Empire Social Telegrams.

**Growth of Telegraphs:—**At the end of 1897-98 there were 50,305 miles of line and 155,988 miles of wire and cable. Compared to this, there were 113,400 miles of line including cable and 1,101,400 miles of wire including conductors on the 31st March 1945. The numbers of departmental telegraph offices were 257 and 89, respectively, while the number of telegraph offices worked by the Post Office rose from 1,634 to 3,984.

The increase in the number of paid telegrams dealt with is shown by the following figures:—

		1897-98.	1944-45.
Inland	{ Private ..	4,107,270	19,775,768
	{ State ..	860,382	6,105,149
	{ Press ..	35,910	433,955

		1897-98.	1944-45.
Foreign	{ Private ..	735,670	8,059,103
	{ State ..	9,826	328,050
	{ Press ..	5,278	83,663
		<u>5,754,415</u>	<u>20,773,033</u>

The outturn of the workshops during 1944-45 represented a total value of Rs. 2,12,18,000.

**Wireless.**—The number of messages handled during the year 1944-45 by departmental wireless stations in India was nearly 342,000. This shows a decrease of about 125,000 over the previous year.

**Telephones.**—With effect from 1-4-43 the Licensed Telephone Systems at Calcutta, Bombay and Madras and with effect from 1-9-43, the Licensed Telephone Systems at Ahmedabad and Karachi were acquired by Govt. on the 31st March 1945, there were about 2,800 exchanges and 125,100 Telephones operated by the Department and Licensed system. About 1.2 million trunk telephone calls were handled during the year 1944-45.

**Posts and Telegraphs.**—The capital outlay of the Indian Posts and Telegraphs Department during and to the end of the year 1944-45 was Rs. 3,09,79,000 and Rs. 22,01,26,000 respectively. The receipts for the year ended 31st March 1945 amounted to Rs. 29,38,15,000 and charge (including interest on capital outlay) to Rs. 19,13,83,000, the result being a net gain of Rs. 10,24,35,000.

## Public Health.

The history of the public health administration in India may be traced back to the appointment of the Royal Commission in 1859, which recommended measures for the amelioration of the health of the army and the civil population in India. In accordance with its suggestions "Commissions of Public Health" were established in the provinces of Madras, Bombay and Bengal in 1861. This led to the appointment of Sanitary Commissioners. In 1888 the Government of India issued a resolution "drawing the attention of local bodies and village unions to their duties in the matter of sanitation." The success achieved by such efforts was negligible except in the larger cities. Owing to the vast number of India's sick the main emphasis was laid on curative medicine; preventive medicine did not receive proper attention. The outbreak of plague in 1890 had a great effect on the people and the Government, awakening them to the need of overhauling the public health machinery in the country. The report of the Plague Commission in 1904 was a landmark in the history of public health administration in India. It recommended the strengthening of public health services and the establishment of laboratories for research and the preparation of vaccines and sera, but the total effect of the measures adopted in pursuance thereof was small. Attention was directed mainly to urban centres while about 90% of the country's population lived in villages. Under the Government of India Act 1919 the health administration was transferred to Provincial Governments making it a subject directly under Ministers responsible to the Legislatures. This position continues under the Government of India Act 1935 and the Provincial Governments are unfettered in the development of health and sanitation in areas under their jurisdiction. The effect of this transfer are summarised by the Health Survey and Development Committee in its report as follows:—

— "Ministers were anxious to promote the growth of Education, medical relief and preventive health measures as far as funds permitted. The establishment of trained public health staffs for rural and urban areas which the "Commissions of Public Health" had recommended in the sixties of the last century was taken up in earnest and, after the introduction of the Reforms of the 1919 Government of India Act, the organisation of such services was a marked feature in a number of provinces. Indeed, there has been, since that time, far greater public health activity in the provinces than ever before."

The Health Survey and Development Committee has made far-reaching recommendations and it is to be hoped that action that may be taken on these will go a long way in improving the health of the people.

### VITAL STATISTICS.

India's population growth is characterised by high levels of fertility and mortality. Inter-connected with this feature is the high infantile mortality. Thus, her birth rate, death rate and infantile mortality rate are much higher than

those of Western countries where population shows a decreasing rate of growth or actual decline at low levels of fertility and mortality in the process of industrialisation and urbanisation. In the quinquennium preceding the War, the birth rate of British India varied round 35 per mille. In 1940 and 1941 it came down to 32 per mille, in 1942 it was 20 per mille and in 1943 and 1944 it went down further to 20 per mille. This lowering of birth rate was shown by practically every province. In Bihar, Orissa, Bengal, Madras, United Provinces, Assam, Coorg and N.W.F.P. the fall was more marked. On the other hand, the rise in death rate during the quinquennium was not so uniform. In fact, in the quinquennium preceding the war, the rate for British India varied between 22 and 24 per mille and it was 21 per mille in 1940 and 1942 and 22 per mille in 1941. It was only in 1943 and 1944 that it increased to 24 per mille. The provinces which showed a marked increase in death rate in 1943 and 1944 were Bengal, Orissa, Delhi and Madras. Bihar and Bombay had a higher death rate in 1944 only. Infantile mortality rate for British India had come down from 164 per 1,000 live births in 1935 to the figure of 156 in 1939 but from 1940 there was an upward swing. In 1940 it was 160 per 1,000 live births and 158, 163, 165 and 169 in the succeeding years from 1941 to 1944. Here again Bengal, Orissa, and Madras showed a more marked adverse trend than the Punjab.

From the trends pointed out above it is almost certain that the rate of increase of population after the census, has slowed down very considerably, mainly due to the lowering of birth rate. Although the point is of very great interest, it is difficult to say anything about the real factors behind this without an elaborate analysis. It appears too optimistic to believe that this is due to a real decline in fertility rates or a change in the age—sex composition of the population. It seems more reasonable to attribute it to wartime strains on public life which may be in the form of breaking up of family life due to recruitment in the army or migration of labour to industrial centres or of food scarcity and temporary lowering of vitality. Unfortunately there are no fertility statistics relating to India which can throw light on the subject. The Government of India appointed a Population Data Committee in 1944. Its report has been published. It has made certain proposals to cover up lacunae in the population data.

Except in the cases of cholera, smallpox and plague morbidity statistics for the general population are as a rule not collected in India. Whatever information in this direction can be gathered is restricted to the Hospital and Dispensary statistics. Mortality statistics relating to the general population, however, are collected in several details, e.g. by age, sex and community. Deaths by different causes are also recorded but there is not much uniformity in the details adopted by the various provinces, as for instance deaths from tuberculosis or malaria are not recorded separately for rural areas by a number of provinces. These statis-

ties of deaths by causes besides suffering from all the shortcomings common to the Indian vital statistics are collected under the further difficulty of lack of facilities for proper diagnosis.

Statistics of cholera, smallpox, and plague are collected throughout India and as their symptoms are understood by the general public we have comparatively reliable figures for these diseases. However, all these three diseases usually do not account for more than 5% of the total mortality in any province. Owing to the general unreliability of the classification of causes of death, the Public Health Commissioner with the Government of India presents the Indian mortality statistics other than those relating to cholera, smallpox and plague under the broad groupings of fevers, dysentery and diarrhoea, respiratory diseases and "all other causes." Of these the most important group is that of fevers under which is shown 50% to 75% of the total mortality in most of the provinces. This group includes a variety of heterogeneous diseases and a large number of unclassified conditions which for want of proper facilities for diagnosis persons, usually illiterate, die of. Owing to the lack of collection of vital statistics, the health administrator in India is handicapped by the lack of precise knowledge of the extent and nature of his problems.

### LEPROSY IN INDIA.

Leprosy has been prevalent in India for many centuries, being recognised and described by ancient Hindu physicians. The *Sushruta Samhita* written 2,500 years ago describes the different forms of leprosy, and its treatment with chaulmoogra oil, the mainstay in its present-day treatment.

The 1931 census report recorded 150,000 persons suffering from leprosy. Investigations carried out by expert leprosy workers indicate that at a conservative estimate the number of cases is about 1 million (10 lakhs). About three-fourths of these cases are of the mild type and are not infective. The disease is found throughout India, but is most prevalent in parts of Assam, Bengal, Bihar, Orissa, Central Provinces, Madras, Hyderabad and Travancore.

Leprosy relief work has been going on in India for a long time. Apart from the Central and Provincial Governments, and some local organisations, the Mission to Lepers and the Indian Council of the British Empire Leprosy Relief Association have played an important role in this field.

**Mission to Lepers.**—Founded by the late Mr. Wellesley Bailey, the first asylum was built at Chamba, Punjab, in 1875. The Mission now runs about 30 leper homes with about 10,000 inmates. It has done very noble work and has given a lead in various ways. The Provincial Governments assist the Mission by making grants on a per capita basis.

**British Empire Leprosy Relief Association (Indian Council).**—The introduction of new methods of treatment of leprosy led to the foundation in the year 1924 of the British Empire Leprosy Relief Association in London followed by the foundation of the Indian Council

of the Association in 1925; later, provincial branches were formed in most of the provinces of India. At the inauguration of the Indian Council H.E. Lord Reading, the then Viceroy and Governor-General of India, issued an appeal on behalf of the Association, and collected a sum of over Rs. 20 lakhs, which forms the Capital Fund of the Indian Council.

The work of the Association has greatly stimulated interest in leprosy in the country, resulting in knowledge of the disease, of its prevalence, clinical forms, prognosis, spread and the factors influencing its spread. The medical profession as a whole is now taking a keen interest in the leprosy problem. H.E. the Viceroy is the President of the Indian Council and Colonel E. Cotter, C.I.E., I.M.S., Public Health Commissioner with the Government of India, the Chairman of the Governing Body; Mr. K. Sanjiva Row, C.I.E., and Sardar Bahadur Balwant Singh Puri, O.B.E. the Honorary Treasurer and Secretary respectively. Dr. Dharmendra, an officer of the Medical Research Department, Government of India, is at present the Research Worker of the Association.

The research work of the Association is carried out at, or directed from, the School of Tropical Medicine, Calcutta, and is done in collaboration with the Endowment Fund of the School and the Indian Research Fund Association. The main activities of the Association are:—

(i) *Research.*—This includes clinical, histological, bacteriological, therapeutic, epidemiological and immunological studies. Recent studies of the only immunological test the "lepromin test" or the "Mitsuda Reaction" by Dr. Dharmendra at the School of Tropical Medicine, Calcutta, have resulted in a great improvement in the test, and have thrown considerable light on the mechanism of the reaction.

(ii) *Post-graduate Training in Leprosy.*—Special post-graduate training classes for training doctors in the diagnosis and treatment of leprosy are arranged annually at the School and over 1,000 doctors from India, and not a few from abroad, have attended these special courses. In addition, lecture-demonstrations in Leprosy are given to the L.T.M. and D.T.M. classes at the School.

(iii) *Leprosy Surveys.*—In the early years, an all-India Survey Party carried out rough sample surveys in different parts of India in order to get an idea of the incidence and distribution of leprosy in the country. More recently, intensive surveys of small selected areas have been carried out in different parts of the country in order to collect information about the factors that favour the spread of the disease and in order to study the possibility of evolving suitable methods of isolation of infective cases for the control of the disease.

(iv) *Publication and Propaganda.*—"Leprosy in India," a quarterly journal published by the Association, is a record of the study of leprosy and of anti-leprosy work in India and other countries. Recently a new propaganda book entitled "Popular lecture on Leprosy" by Dr. Dharmendra has been published, which gives the main facts about leprosy in simple and non-technical language.

(a) *Other activities.*—The Association has played an important role in the Conference and Committees, etc. appointed in India to formulate principles of anti-leprosy campaign. Recently it has collaborated in the production of the "Report on Leprosy and its Control in India" and the "Report on Leprosy Survey" by Committees appointed by the Central Advisory Board of Health, Government of India, and the Indian Research Fund Association respectively. The former gives a comprehensive survey of the leprosy problem in India, and will serve as a basis to formulate the principles of anti-leprosy work in India. The report on leprosy surveys deals with the principles of the surveys as well as with the practical outlines of the work.

*The treatment of leprosy.*—The mainstay in the treatment of leprosy has been injections of chaulmoorga (*hydnocarpus*) oil or its preparations. Recently encouraging results have been reported by the use of certain sulphone drugs such as "Promin" and "Diasone." It is yet too early to assess the value of this group of drugs in the treatment of leprosy. The treatment with chaulmoorga oil is of value in individual cases. It cannot be expected to control the spread of leprosy with treatment alone.

*Control Of Leprosy.*—Leprosy can be controlled by raising the general economic and social conditions of the population and, by preventing contact of infective patients with healthy people, specially children. The only sure method of preventing contact with infective cases is the isolation of these cases in leprosy hospitals, sanatoria, or colonies, etc. Great difficulty is experienced in providing institutional accommodation for all the infective cases in the country. The total accommodation in all the institutions in India at present is for about 15,000 patients whereas a rough estimate of infective cases places the figure at 2½ lakhs. So some other methods of isolation are urgently needed to supplement the institutional isolation.

The two alternatives are the isolation of the patient in his home, and the isolation of all the patients of a village or a group of villages in huts made in the outskirts of the village. Home isolation is practicable only in families with sufficient financial resources. Village isolation appears to be specially suited to India, with its big leprosy problem and limited resources. It is desirable that methods of village isolation should be developed in suitable areas and then widely applied. The Leprosy Committee appointed by the Government of the Central Provinces and Berar in 1943 also has emphasised the necessity of organising village isolation centres as part of health units, anti-leprosy work being linked with other public health work and rural reconstruction activities.

### MALARIA.

Malaria is India's major public health problem both from the point of view of morbidity and that of mortality. While no province can claim to be free from its ravages, in some the incidence of malaria is extremely high. In Bengal, it is stated that more than two-thirds of the villages are subject to malaria and that "over 60 per cent of the total population actually suffer from

it every year. Roughly about 1,000 people die from malaria every day throughout the year." It is unofficially estimated that over India as a whole, upwards of a million people die from malaria every year. Moreover, its incidence is probably three times higher in the rural areas than in the towns, so that it forms a terrible handicap to improved health and a higher standard of living among the rural population.

Malaria can probably be controlled anywhere provided sufficient funds are forthcoming. In urban and industrial areas it can usually be shown clearly that the cost of malaria to the community is greater than the cost of control. The control of malaria in rural areas with isolated groups of houses and a scattered population presents greater difficulties. The development of new insecticides, such as pyrethrum and D.D.T., and of new anti-malaria drugs, however, offer some prospect that methods of malaria control in rural areas may be developed which will not be beyond present financial resources. Controlled experiments in the use of insecticides have been carried out by the Malaria Institute of India and in the few Provinces where there are active anti-malaria organisations promising results have been obtained. Experiments are also being carried out in the use of a new drug, poludrine, which is claimed to be more effective than quinine in malaria treatment and prophylaxis. Most Provincial Governments are creating or developing anti-malaria organisations as part of their reconstruction programmes and the Bombay Government has undertaken a scheme for mosquito control over two whole districts, Kanara and Dharwar, an area of 6,000 square miles with a population of more than one million. This is the most important control scheme yet undertaken in India and if it is successful, it will clearly point the way to large scale control measures in other areas.

### PLAGUE.

Plague in India started from Bombay in 1896 and within a short time the disease spread widely throughout the country. Its incidence reached the maximum in 1904 with a total mortality of 964,577 in British India excluding Burma. Since then there has been a gradual decline and now the incidence of the disease has been reduced very considerably. In 1940 the total deaths recorded in British India were 19,799, which figure came down to 11,984 in 1941 and 10,577 in 1942. In 1943 the figure went up to 13,578 and in 1944, it was 21,525. During these five years the N.W.F.P., Orissa, Sind and Bengal were free from the disease and so were the Punjab and Delhi except in 1944 when a few deaths were recorded. The highest number of deaths were recorded in the United Provinces. There was an epidemic outbreak in 1940 and again in 1944. The incidence in Bihar and the Central Province during these years was not very heavy. Bombay had epidemics in 1940 and 1941 and again in 1944 in the last quarter, the total recorded deaths in these years being 5,573, 5,311 and 2,514 respectively. Madras had a severe epidemic in 1943. There are certain endemic centres situated in the cool and moderately damp areas running from the Himalayas in the north through Central and Eastern India to the Deccan and the province of Madras.

However, the history of plague through the centuries is a warning against taking a complacent view of the reduced prevalence of the disease in India. It is known that the disease can smoulder in its endemic homes for long periods, and that on certain occasions, it acquires an increased striking power and spreads far and wide in epidemic waves into distant lands, to retreat again after a while to those areas where it permanently resides. While, therefore, it is gratifying that plague as a public health problem has been of decreasing importance within the past decade, the fact that endemic foci exist makes it imperative that no slackening of effort for its complete eradication should be permitted.

### BLINDNESS IN INDIA.

In olden days the blind were generally regarded as incapable of participating in the ordinary activities of life, and were left to depend upon begging for their existence.

**Extent of Blindness.**—An estimate of India's blind population places it at 2 millions, of whom 50% are totally blind and the remaining blind to the extent of requiring welfare services. The chief causes are inflammatory diseases of the eye, smallpox, venereal diseases, nutritional deficiencies, glaucoma, and cataract.

**Treatment of Eye Diseases.**—The treatment of eye diseases has, and is, being carried out in the eye wards of Government Hospitals, and Hospitals under the control of Local Authorities in the Provinces and local centres, mission hospitals, a few travelling eye dispensaries, camp eye hospitals and eye fairs, and in small local dispensaries to the limit of their resources.

**Existing Schools and Societies for the Blind.**—These mostly owe their existence to philanthropic and missionary organisations. There are 24 schools for the blind only, 5 for deaf mutes as well as blind, 1 is in combination with a poor asylum, and 2 are departments of missionary establishments. The majority of them receive a small measure of Government and/or municipal aid. They have a total enrolment of 1,212 blind people.

**Special Officer Appointed.**—In January 1943 the Government of India appointed Lt.-Col. Sir Clutha Mackenzie as a Special Officer "to investigate the extent of blindness in India and its cause, and to carry out a survey of the existing societies for the education of blind children and of means of employing trained blind men and women in sheltered industries, and to prepare a scheme for the creation of a national organisation for the blind of India."

**Special Joint Committee.**—Later in the year a Special Joint Committee on Blindness was appointed, which comprised of 2 sub-committees the Education Sub-Committee, and the Medical Sub-Committee, for purposes of discussing the technical details of their respective fields. The report and evidence collected by Sir Clutha Mackenzie formed the basis of its deliberations. Their report and recommendations have now been published by the Government of India, under the title "Report on Blindness in India, 1944" and measures are being taken to implement the recommendations.

**Recommendations.**—The Chief recommendation is that an Indian Council on Blindness should be created at the Centre, representative of the Government, of the philanthropic public and of the blind themselves. There should be two committees, one to deal with Prevention and Treatment, and other with Welfare of the Blind. The Secretary to the first Committee would be the adviser in Ophthalmology, and of the second, the Adviser in Blind Welfare. It is contemplated that similar organisations will be set up by Provincial Governments and by the larger Indian States.

**Tasks which lie ahead.**—(1) The elimination as far as possible of the causes of blindness. (2) The extension of the facilities for treatment of eye diseases, both in quantity and quality. (3) The rehabilitation of the blind, by providing facilities for education, employment, care and recreation. (St. Dunstan's Institute at Delhi Dun under the able direction of Sir Clutha Mackenzie, an officer blinded in the war of 1914-18 is an outstanding example of what can be done.)

### SOCIAL LEGISLATION.

Repeated stress has been laid in the Health Commissioner's reports on the fact that public health cannot be regarded as an entity distinct from the general, social and economic life of the community. It is, therefore, satisfactory that the advent of provincial autonomy and the conferment of extensive powers on Provincial Governments have been followed in many provinces by social legislation which will undoubtedly have far-reaching effects on the economic life and general well-being of the people. Agricultural indebtedness, land tenure and industrial problems, to cite a few examples, are all receiving serious attention and, in so far as legislative and administrative action goes to raise the standard of life, these measures will inevitably help in improving the standard of public health.

In order that there may be no undue feeling of pessimism, it should always be remembered that, less than a century ago, conditions in Great Britain were not much different from those found in India to-day and that, with respect to other countries, reduction of the general death rate below that at present recorded in India dates back to only a few years. There seems no reason why India should not accomplish what has been achieved in other parts of the world, if only organised effort is continued and if public support is given to that effort.

### YELLOW FEVER.

All aircraft from the West are required to land at Karachi where an elaborate organization has been set up by the Government of India to deal with them.

### ANTI-TUBERCULOSIS CAMPAIGN.

The first co-ordinated effort in Tuberculosis control on an All-India basis, was the inauguration of the King George Thanksgiving (Anti-Tuberculosis) Fund to commemorate the recovery of His late Majesty King George V from a serious illness in 1929. This fund was utilised to stimulate activities in the preventive and

curative aspects of this disease, and in the specialised training of doctors and Health visitors.

In 1937, Lady Lidlithgow, the then Viceress, issued an appeal for the King Emperor's Fund for Tuberculosis. This marked the next step forward, and resulted in the formation in 1939 of the Tuberculosis Association of India, the seventh annual report (1945) of which may be obtained from the Tuberculosis Association of India, New Delhi. This determines the end of a period when the paramount considerations of war necessarily overshadowed all other activities in India.

Of the sum of over Rs. 85 lakhs collected as a result of Lady Lidlithgow's appeal, 95% was returned to the various Provinces and States that had contributed, to enable them to proceed with their own Anti-Tuberculosis plans, in co-operation with, and with the advice of the Central Association at New Delhi, the President of which is Her Excellency The Viscountess Wavell, C.I. This Central Association issues its recommendations for the policy to be carried out in the anti-tuberculosis campaign in India. Through its Technical Adviser, expert advice on all aspects of Tuberculosis work is available to all the Branches of the Association in the Provinces and Indian States, and to any official and non-official bodies engaged in such work. It is hoped thereby to facilitate standardization and to prevent waste of effort and money.

Through this Central Committee, in addition to Technical advice, the other aspects of the war against Tuberculosis are brought into prominence. These include Publicity and Propaganda, the training of Tuberculosis workers, the convening of Conference, and the liaison with the work of the 34 affiliated associations in India and similar Associations abroad.

In 1945 there were 124 Tuberculosis clinics and 70 Hospitals and Sanatoria with 4,384 beds in the total number of such Institutes in India. That this is only the beginning of the task which lies before India can be realised when it is stated that the estimated annual deaths from this disease are 500,000 and that there are 2½ million open cases (i.e. in an infective stage) in the country.

The third stage of the campaign will come with the adoption of the recommendations of the Health Survey & Development Committee in the post-war period of this country. This report recommends a comprehensive and integrated tuberculosis organisation, which should include—

- (1) a domiciliary service to organise a home isolation and treatment scheme.
- (2) improvement of housing conditions which entails working hand in hand with local authorities.
- (3) increasing the number of tuberculosis clinics.
- (4) the development of hospital accommodation to meet the requirements of the country on the five year plan of one 200-bedded tuberculosis hospital for each unit of 10 million population. This will be followed by development on a larger scale.
- (5) the establishment of after-care colonies.

(6) the provision of institutions for the care of patients who have passed beyond the curable stages.

(7) the establishment of travelling tuberculosis units for the needs of the remote rural areas.

The Chairman of the Tuberculosis Association of India (Lt. General J. B. Hance, K.O.I.E., O.B.E., I.M.S.) in concluding the annual report for 1945, said "Give us the tools and we will finish the job" an appropriate appeal to a nation whose soldiers have so materially helped to defeat the country's enemies.

### CENTRAL ADVISORY BOARD OF HEALTH.

In April, 1937 the Government of India acting under Section 135 of the Government of India Act constituted a Central Advisory Board of Health. The aim of the Board is to ensure co-operation between the centre and the provinces and between province and province in matters related to health which are of common concern. In addition the Board is designed so as to be representative of Indian States. Work is done through standing or *ad hoc* committee which permits the Board to act as a central information bureau. It advises on all matters referred to by the Central or Provincial Governments and makes suggestions to the Central Government on any matter affecting public health in India to which it considers Government's attention should be drawn.

The Public Health Commissioner with the Government of India is Secretary to the Board.

The inaugural meeting was opened by His Excellency the Viceroy at Simla in June 1937 and at this meeting *ad hoc* committees were appointed to report on:

- (1) the maternity and child welfare work in India including the training of maternity and child welfare workers and the organisation of schemes in Urban and rural areas.
- (2) to examine the question of food adulteration with reference to legislative measures now in force in different provinces and such additions and amendments to these as may be considered advisable.

The Maternity and Child Welfare Committee met in Simla in October 1938 and its report was widely circulated. The Food adulteration Committee produced two reports one on the technical aspect dealing with standards for purity in regard to different foods and the standardisation of the technique to be employed in food analysis, while the other dealt with the legislative aspect of the problem including an examination of the various Acts and Regulations with suggestions for their improvement.

The second meeting of the Central Advisory Board of Health was held in Madras in January 1939 and recommended the appointment of a sub-committee to examine the possibility of introducing a system of compulsory inoculation of pilgrims against cholera. It also appointed an *ad hoc* committee to prepare a report on

doctors and has laid emphasis on equipping him for preventive health work. It has also made elaborate proposals for a considerable expansion of training facilities for the different types of other health personnel required for meeting the country's needs.

The Committee has made it plain that no health development plan can produce adequate results unless sufficient measures are taken for the provision of a healthy environment for community life, such as safe water supply, hygienic houses, a satisfactory system of conservancy and proper supervision over the production, distribution and sale of food intended for public consumption. Specific recommendations have been put forward in respect of these.

In order to secure the active support of the people the establishment of a Health Committee in every village has been recommended. Such Committees are intended to stimulate local effort for the improvement of environmental sanitation, control of infectious disease and the steady development of a programme of health education.

Lastly the Committee has stressed that, in order to ensure a rapid improvement of the public health, a co-ordinated advance on a broad front would be essential and that the schemes put forward for the betterment of community life in all its aspects by various post-war committees should be implemented simultaneously with its own health plan.

## THE MATERNITY AND CHILD WELFARE MOVEMENT.

Amongst the most pressing problems of India's health is that presented by the appalling maternal and infant mortality. The figures for maternal mortality are not accurately known, but some 200,000 mothers lose their lives each year as a result of pregnancy and child birth. The number of mothers who suffer from ill health and are disabled temporarily or permanently as a result of the normal physiological function of child bearing is at least 20 times the annual maternal deaths. Every year more than 2½ million Indian children die before the age of 5 years, while many others survive only to grow weak and feeble from unhygienic surroundings during infancy and childhood.

The maternity and child welfare movement which aims to promote maternal and child health and to reduce deaths, owes much to the All-India Maternity and Child Welfare League initiated by Lady Chelmsford in 1918 and also since 1920 to the Indian Red Cross Society. The amalgamation of these two bodies in 1931 forming the Maternity and Child welfare Bureau, Indian Red Cross Society, has undoubtedly increased and developed the work.

The Maternity and Child Welfare Bureau, Indian Red Cross Society, is the only body voluntary or official at present working on an All-India basis. The Bureau is managed by a technical committee representing the medical and public health services, the nursing profession and voluntary organisations and individuals working in fields allied to maternity and child welfare. The Director of the Maternity and Child Welfare Bureau, Indian Red Cross Society, an officer of the Women's Medical Service, acts as Secretary. The Bureau administers the Victoria Memorial Scholarships fund for the training of dais, the Lady Chelmsford League fund for maternity and child welfare and the Lady Birdwood fund for army child welfare. The income from the funds is expended on the (1) maintenance of a central Bureau of information on all aspects of maternal and child health throughout India, (2) on training schemes for workers in the maternity and child welfare field, doctors, health visitors, midwives, nursery school teachers and nursery nurses, (3) on propaganda, literature and publicity and (4) on grants-in-aid of experimental schemes.

The care needed by the wives and children of sepoy in the Indian Army is being increasingly realised, and nowhere more than

in the units themselves. The result has been in the last few years, the opening of much work in this direction. Much of it is purely medical work, which, in the absence of families hospitals for the Indian soldiers, is a necessity. But genuine child welfare activities are also present in some centres. To allow rapid expansion of welfare activities for the Indian Troops, a special committee, "The Indian Fighting Forces Maternity and Child Welfare" took over the management of the Indian Army Centres in the year 1942 which had until then been under the Bureau. The Secretary of the Indian Red Cross Society and the Director of the Bureau are members of this Committee and a sum of Rs. 18,000 is paid each year from the Bureau for grants in aid to the various centres and technical advice of the Director of the Bureau is available to the Committee. The British Army Child Welfare Centres are still under the Bureau. A remarkable feature of this movement is the keenness of the men themselves to aid it, realising as they do the benefit to their own women and children. There are now very few cantonments where some work of this kind is not going on.

Through the Provincial and State branches of the Indian Red Cross Society it has been possible to organise Maternity and Child Welfare Services throughout India although of recent years the trend has been towards transition from voluntary to official direction and it is noteworthy that the work is most co-ordinated and most energetically carried on where there are persons appointed under the Directors of Public Health whose special duty it is to foster Child Welfare activities. The Governments of Madras, Bengal, Orissa and some of the larger States have assumed some responsibility with regard to schemes relating to Maternal and Child health, the schemes in these Provinces being directed by special officers. At the same time much excellent work is done by voluntary organisations such as the branches of the Indian Red Cross Society in Assam, Bengal, Madras, North-West Frontier Province, Orissa, Punjab, United Provinces and Sind and several Indian States, by the Bombay Mofussil Council and M. & C. W., the Bombay Presidency Infant Welfare Society and the Bihar M. & C. W. Society with the result that in all the provinces and most of the Indian States welfare activities for the care of the mother and her child now exist, the activities

differ in nature of the work undertaken, and the amount of organisation displayed. The Health Survey and Development Committee appointed by the Government of India in 1912 has studied the existing Maternal and Child health services and have made their recommendation for its future development. The Committee has emphasised the need for organising the services as an integral part of the medical and public health services of a Province or State and much emphasis has been laid on the preparation of workers. It is hoped that the implication of the Committee's recommendations on expansion and improvement of facilities for training of public health personnel and in development of the services much progress is expected in the improvement of health, of women and children of India in the near future.

The industrial concerns of recent have realised the importance of providing special facilities for the employees and an increasing number of industries are now maintaining comprehensive welfare schemes for women and children. The Government of India have instructed authorities in the coal mines to establish creches and provide such minimum requirements regarding building staff and equipment as detailed in their circular.

So far the schemes have devoted their attention to educating women in the elements of mothercraft and attempting to preserve

infant lives and improve child health. In a land of so many languages and superracial progress will necessarily be slow and India has yet to decide whether she will work intensively and try to rear a few well developed children as far as adolescence or extensively attempt to bring a large number of infants through the first critical months, only to have them perish at a later stage from the many ills that childhood is heir to in a land of great poverty, under-nourishment, epidemics and famine. In Western lands the Child Welfare Movement has no more marked characteristic than its inability to stop expanding. Its ramifications know no bounds. Its inevitable corollaries are endless, and like the banyan tree it will no doubt in India also develop innumerable fresh roots, medical supervisions, dental clinics, better housing, open air playgrounds, etc. But these are not yet. Its preliminary task is to educate the mothers of India to the enormity of allowing two million babies to perish every year and to convince them of the equally important fact that a high death rate always spells also a high damage rate of sickly, under-developed, incompetent citizens.

Such is the magnitude of the field that a consistent, wide-spread effort on a scale hitherto impossible must be undertaken. If any appreciable reduction is to be made in the appalling mortality of young children.

## INDIAN RED CROSS SOCIETY.

When the Great War first broke out, what is generally termed Red Cross work was undertaken in India and Mesopotamia by the St. John Ambulance Association and by a number of provincial organisations working on independent lines. From August 1916, the central work was taken over by the Indian Branch of the Joint War Committee of the Order of St. John of Jerusalem and the British Red Cross Society. The final report of that Committee shows that up to June 1920 its total receipts amounted to Rs. 1,77,85,716 of which some 17 lakhs had been contributed by the British Red Cross Society. It had spent about 67 lakhs in Mesopotamia, nine lakhs on the Afghan War and Waziristan Expedition; in Mesopotamia and India combined it had spent on Red Cross objects in all about 117 lakhs.

It closed its career in June 1920 under the following circumstances. In the summer of 1919, an invitation had been received to join the International League of Red Cross Societies, having for its object the extension of Red Cross work in the sphere of purely civil activity. Though there was then no formally constituted Red Cross Society in India, the invitation was accepted, thus giving India a distinct position in a world-wide League of humanitarian societies. A Bill to constitute an Indian Red Cross Society was introduced by Sir Claude Hill in the Imperial Legislative Council in March 1920, and duly passed into law as Act XV of 1920. This Act handed over the balance of the funds of the Joint War Committee to the new Society, and authorised it not only to direct the utilisation for war purposes of the capital funds at its disposal but also to devote the interest, as far as possible, for civil purposes. As contemplated in the Act of Constitution of the Society, its activities are com-

pletely decentralised, and are being carried on through 31 Provincial and State Branches under which there are 312 sub-branches.

The objects on which the funds of Society may be spent are:—

1. The care of the sick and wounded men of His Majesty's Forces, whether still on the active list or demobilised.
2. The care of those suffering from Tuberculosis, having regard in the first place to soldiers and sailors, whether they have contracted the disease on active service or not.
3. Child welfare.
4. Work parties to provide the necessary garments, etc., for hospitals and health institutions in need of them.
5. Assistance required in all branches of nursing, health and welfare work, ancillary to any organisations which have or may come into being in India and which are recognised by the Society.
6. Home Service Ambulance Work.
7. Provision of comforts and assistance to members of His Majesty's Forces whether on the active list or demobilised.

The Society has five grades of subscribing members, namely, Honorary Vice-Presidents, Patrons, Vice-Patrons, Members and Associate Members. Their respective subscriptions are Rs. 10,000, Rs. 5,000, Rs. 1,000, Rs. 12 annually or a consolidated payment of Rs. 150 and anything between Re. 1 and Rs. 12 annually or consolidated payment of Rs. 50. The number of adult members of all categories enrolled during 1915 was 37,731 as against 31,207 in previous year.

To stimulate interest in the aims and objects of the Society amongst the future generation, the Junior Red Cross movement has been instituted which embraces the student population. Out of the 31 Provincial and State Branches, 27 have organised Junior Red Cross groups, which is a clear indication of the fact that this children's branch of Red Cross Society which seeks to develop a child's personality by encouraging his individual initiative, making him think and act, is being firmly established all over India. At the end of the year the total membership of the Junior Red Cross was 8,30,782 in 21,090 groups as against 7,76,642 in 19,518 groups in the previous year. The Director of the Junior Red Cross, K. Shanker Nigam, who is in charge of the movement, is guided by a Sub-Committee under the Chairmanship of Sir John Sargent, C. I.E., M.A., D.Litt., Secretary to the Government of India in the Education Department. Several new lines of activity towards the promotion of health, service to the sick and suffering and international fellowship have been initiated during recent war years and the movement is meeting with increasing popularity among the juvenile population of the country.

**Constitution.**—His Excellency the Viceroy is President of the Society. The Managing Body ordinarily consists of a Chairman to be nominated by the President and 25 members of the Society, of whom 12 are the Vice-Presidents nominated by Provincial or State Branches, 8 selected by the Society at the Annual General Meeting from among the members of the Society, and 5 nominated by the President.

The present Chairman of the Managing Body is Sir Joseph Bhoré, K.C.S.I., K.C.I.E. Vice-Chairman; Major General R. Hay, C.I.E., K. H.P., I.M.S., and the Secretary-General Sardar Bahadur Balwant Singh Puri, O.B.E.

The Indian Red Cross Society professes itself as an essentially Indian Society. Most of its members (about 96 per cent.) are Indians. It is controlled in India. Its headquarters are at New Delhi. The Society received a gift of a lakh and a half of rupees from H. H. the Nawab of Junagadh to build headquarters offices in New Delhi. It has branches in every Province of British India and in several Indian States. These branches are again sub-divided into districts, so that there is a network of Red Cross centres all over India. The provincial branches appoint representatives to the Central Committee, called the Managing Body. This Central body, after deduction of management expenses, distributes all its income from invested funds among the branches for their activities.

Like other Red Cross Societies, the Indian Society has never lost sight of its primary obligation to act as an auxiliary to the Army Medical Service in case of war. It maintains a Central Supply Depot administered by headquarters. A large number of military hospitals are supplied with additional equipment and comforts, and these are much appreciated. The Bengal Branch has a Literature Committee, which supplies regular parcels of literature to troops, especially to those stationed in lonely outposts, and many grateful letters of thanks are received. Discharged soldiers suffering from chronic diseases, particularly tuberculosis are referred by the Army Medical Service to the

Red Cross, which follows up the men on their return to their villages, and arranges, where possible, for their treatment. Under this scheme many hundreds of cases have been dealt with.

The development of child health services is one of the important peace-time activities. The various branches of the Indian Red Cross Society have initiated and maintained Maternity and Child schemes in the Provinces and States. In the absence of a Maternity and Child Welfare Section under the Government of India, the Bureau functions as Central Office for information and technical advice for the Red Cross Branches and other voluntary and official organisations conducting Maternity and Child Welfare schemes.

Special mention must be made of the Army child welfare centres, which receive generous support from Red Cross funds. These centres are run for the wives and children of British and Indian troops, and are doing excellent work. In view of the importance of a qualified staff to conduct Maternity and Child Welfare schemes, the Indian Red Cross Society has all along encouraged training schemes for health personnel. The provincial schemes for training of Health Visitors, midwives and dais have received assistance from the Maternity and Child Welfare Bureau.

The Indian Red Cross Society has supported schemes for inauguration of Public Health Nursing in India and has offered scholarships to candidates for such training. The Society, in addition to the endowment fund for post-graduate scholarship under the Indian National Committee of the Florence Nightingale International Foundation, has recently created a few scholarships for post-graduate training of nurses to enable suitable candidates to have a year's Public Health Nursing training in Canada.

Popular health education is carried on steadily by the Society by varied methods. Health lectures in many different vernaculars are regularly organised under Red Cross auspices illustrated by films and slides.

A large number of civil hospitals in India receive regular assistance from Red Cross funds.

The number of trained nurses registered on the Red Cross roll maintained for civil emergency service is eighty-seven. These nurses belong to different parts of India, and with a view to ensuring speed and accuracy at the time of need, they are asked twice a year to intimate any change of address to headquarters. In addition to the nurses registered at headquarters, seventeen hospitals all over the country continued their undertaking to provide the Red Cross with the services of sixty nurses for temporary emergency duty in the event of disaster striking their respective areas. Fortunately, no occasion arose during the year to requisition the services of nurses registered on the roll.

**FINANCES.**—The operations of the Joint War Committee were brought to a close in June 1920 with a capital investment of the face value of Rs. 56,33,000 and Rs. 8,01,500-8-8 in floating and fixed deposit accounts. The Society has since invested further funds in various securities and its finances at the end of December, 1945, stood at a capital investment of the face value of approximately Rs. 76½ lakhs. The income

Branches throughout India.

**INSANITY AND MENTAL HOSPITALS IN INDIA.**

In India, facilities for the care and treatment of persons suffering from mental disorders is still very inadequate. To serve a population of over four hundred million, there are only 17 institutions with a total accommodation for about 15,000 patients. Most of these institutions are little more than lunatic asylums where hardly any provision exists for modern methods of treatment. Many patients are even confined in jails where, of course, no provision exists for any kind of treatment. The most modern mental hospital in India is probably the Mysore State Mental Hospital, Bangalore, which, built at a cost of over Rs. 5 lakhs, is very well equipped for the care and treatment of 300 early mental cases.

The Bangalore Mental Hospital is not merely modern in its buildings and architecture but is also providing facilities for treatment of patients.

All forms of shock therapy are undertaken including Insulin-shock and Cardiazol-convul-

sions. Surgical approach to the brain by means of Pre-frontal Leucotomy is an additional feature and the Mysore Mental Hospital is the only hospital in India to perform this operation (Pre-frontal Leucotomy) on the brain.

According to the 1931 census, out of a total population of 352,837,778 (India and Burma) there are 120,304 persons insane, making a proportion of insane to sane of 3 per every 10,000. In the United Kingdom the proportion of insane to sane is roughly 40 per 10,000, while in New Zealand it is as much as 45 per 10,000. In reviewing these figures it must be borne in mind that those of the United Kingdom and New Zealand include the "feeble-minded", an item that is not included in the figures of British India. The figures of the 1941 Census are not available at the time of going to press. The Govt. of India have under contemplation, as part of post war reconstruction, the provision for increased facilities for the treatment of mental patients on a really adequate scale.

## **National Association for Supplying Medical Aid by Women to the Women of India.**

The National Association for Supplying Medical Aid by Women to the Women of India was founded by the Countess of Dufferin in 1885, the object being to open women's hospitals and women's wards in existing hospitals; to train women doctors, nurses and midwives in India; and to bring them out when necessary from Europe. An endowment fund of about 6 lakhs was obtained by public subscription. In addition branches were formed in each Province, each branch having its own funds and each having a number of Local Committees and Zenana Hospitals affiliated to it.

The Central Fund gives grants-in-aid to several Provincial branches; it gives scholarships to a number of women students at the medical colleges of Bombay, Calcutta, Madras and Delhi. It has in the past brought from England a

certain number of European medical women. It has assisted by grants-in-aid the building of a number of zenana hospitals in different parts of India. It has affiliated to it 12 Provincial branches and a number of Local Committees.

The Government of India subsidise the Countess of Dufferin's Fund to the extent of Rs. 3,70,000 per annum to maintain a Women's Medical Service for India—this service consists of 48 officers, with a training reserve of 22 doctors and a junior service. Medical women either British or Indian, holding registrable post graduate qualifications, are eligible for the senior service.

The President is H. E. The Viscountess Wavell. The Hon. Jt. Secretary is the Surgeon to H. E. The Viceroy, and the Secretary, Dr. H. M. Lazarus, C.M.O., W.M.S., Viceregal Estate, New Delhi and Viceregal Estates, Simla.

**THE WOMEN'S MEDICAL SERVICE FOR INDIA.**

This Service is included in the National Association for supplying medical aid by women to the women of India, generally known as the Countess of Dufferin's Fund, and is administered by the Executive Committee and Council of that Fund. The Government of India has so far allotted the sum of £27,750 per annum towards its maintenance. The present sanctioned cadre is forty-four first class medical women, with a training reserve of 22 women graduates in medicine of Indian Universities. Recruitment to the service is made (a) in India by a Medical sub-committee of the Council which includes the Director-General, Indian Medical Service, the Honorary Joint Secretary to the Council, a medical woman, a medical man and the Chief Medical Officer, Women's Medical Service; (b) in England, by a sub-committee, including a medical man and two medical women conversant with conditions in India. These sub-committees perform the duties of a medical board examining candidates for physical fitness, and for return to duty after invaliding.

The Council determines what proportion of the members of the Service is to be recruited in England and in India respectively. In the original constitution of the Service, duly qualified medical women who were in the service of, or who had rendered approved service to the Countess of Dufferin's Fund, were to have the first claim to appointment, and thereafter special consideration was to be paid to the claims of candidates who had qualified in local institutions and of those who were natives of India.

**Qualifications.**—The qualifications are that the candidate must be (a) a British subject resident in the United Kingdom or in a British Colony or in British India, or a person resident in any territory of any Indian Prince or Chief under the suzerainty of His Majesty exercised through the Governor-General of India or through any Governor or other officer subordinate to the Governor-General of India. (b) Must be between the ages of twenty-four and thirty-two at entry. (c) She must be a first-class medical woman, i.e., she

must possess a medical qualification registrable in the United Kingdom under the Medical Act, or an Indian or Colonial qualification registrable in the United Kingdom under that Act, and an advance post graduate qualification. (d) The candidate must produce a certificate of health and character. The Council reserves the power to promote to the Service ladies not possessing the above qualifications, but who have shown marked capacity. Members of the Service are required to engage for duty anywhere in India. After three years of probation have been satisfactorily passed, their appointments are confirmed.

**The Training Reserve of the Women's Medical Service.**—This Service has a sanctioned cadre of 22, and is open to women

graduates in medicine of the Indian Universities. Salaries range from Rs. 200 to Rs. 250 per month, with furnished quarters.

2. Two of the 22 members of the reserve, but not more at any one time, may be deputed by the Executive Committee for post-graduate training.

3. Ordinarily four years shall be spent in the reserve before a member is considered for appointment to the Women's Medical Service, but the Executive Committee shall have power to shorten this period in special cases. Service in the reserve shall be considered by the Executive Committee when appointments are being made to the Women's Medical Service, but shall not of itself constitute a claim to appointment.

### VICTORIA MEMORIAL SCHOLARSHIPS.

The Victoria Memorial Scholarships Fund was founded in 1903 by Lady Curzon, with the object of securing better standards of midwifery practice by the dais of India. A sum of about 6½ lakhs was secured by public subscription in 1903 and a further sum of Rs. 1,30,000 was added to the Fund in 1935 from Their Majesties Silver Jubilee Fund. The Fund is now administered by the Maternity and Child Welfare Bureau, Indian Red Cross Society and the income is expended as grants-in-aid of training schemes for dais and midwives maintained by voluntary organisations, generally branches

of the Indian Red Cross Societies in the provinces and States of India. The Director Maternity and Child Welfare, I.R.C. Society, an officer of the Women's Medical Service is Secretary to the Fund. In spite of continuous efforts in the training of dais since the beginning of the present century no appreciable improvement has yet been made in the midwifery services in the rural areas. It is, therefore, necessary to extend the training to rural areas taking care that only the required number are trained and allowed to work under supervision until such time that they can be replaced by properly trained midwives.

### LADY HARDINGE MEDICAL COLLEGE AND HOSPITAL.

The Lady Hardinge Medical College was opened by Lord Hardinge on the 17th February, 1916. It is a residential Medical College staffed entirely by women, and was founded to commemorate the visit to Delhi, in 1911, of the Queen Empress. Lady Hardinge took the initiative in raising funds by public subscription to meet the cost of buildings and equipment. Thirty lakhs of rupees, in all, have been given for these purposes, mostly by the Ruling Princes and Chiefs of India. After Lady Hardinge's death in 1914, it was suggested by Her Imperial Majesty Queen Mary that the institution should serve as a memorial to its founder, and be called by her name.

The Governing Body includes the Director-General, Indian Medical Service, the Chief Commissioner of Delhi, the Chief Engineer, Central P.W.D., the Educational Commissioner with the Government of India, the Chief Medical Officer, Women's Medical Service, a representative elected by the All-India Association of Medical Women, the Surgeon to H.E. the Viceroy, an Indian member of the Council of State, 2 Indian members of the Legislative Assembly, a private Indian citizen of Delhi, a private lady resident of Delhi, the Chief Medical Officer, Delhi Province, and the Agent, Imperial Bank of India, Delhi. The Honorary Secretary, who is also a member of the Governing Body, is the Deputy Director-General, Indian Medical Service. An officer of Indian Audit and Accounts Service acts as Honorary Treasurer.

The College and Hospital, together with separate hostels for 186 Medical students and 95

nurses and residences for the medical and teaching staff, occupy a site of 55 acres in New Delhi within easy reach of old Delhi city. The grounds are enclosed and adequate provision is made for the seclusion of both students and patients from outside observation. Strict observance of purdah cannot, however, be guaranteed in the case of students. As the hospital patients are all women or children, it is, for example, necessary that students should, in their final year, attend a brief course of instruction on men patients at the Irwin Hospital, Delhi. The College buildings contain a Library, Museum, Lecture Rooms, Laboratories and offices. Hostels are provided for all students. There are good playing fields and a large swimming pool was opened early in 1938. The hospital is a fine modern building with accommodation for 345 in-patients for teaching purposes and a commodious out-patients' department. The College and Hospital are supported by a grant of Rs. 3,20,000 from the Government of India, supplemented by grants from Provincial Governments and Indian States. Students are prepared for the M.B., B.S. degree of the Punjab University, with which the College is affiliated.

Attached to the Hospital there are: (1) a Training School for Nurses, and (2) a Training School for Dispensers. All particulars as to admission and training may be obtained in the case of (1) from the Nursing Superintendent, Lady Hardinge Medical College Hospital, Delhi, and in the case of (2) from the Lecturer on Pharmacy, at the same address.

### NURSING.

Whilst India cannot show the complete chain of efficiently-nursed hospitals which exists in

England, there has been a great development of skilled nursing of recent years. This activity

is principally centred in the Bengal, Madras and Bombay Presidencies, where the chief hospitals in the Presidency towns are well nursed, and where large private staffs are maintained, available to the general public on payment of a prescribed scale of fees. These Hospitals also act as training institutions and turn out a yearly supply of fully trained nurses, both to meet their own demands and those of outside institutions and private agencies. In this way the supply of trained nurses, English, Anglo-Indian and Indian, is being steadily increased. In Bombay the organisation went a step further, through the establishment of the Bombay Presidency Nursing Association. This was composed of the various Nursing Associations in charge of individual hospitals, and worked under the Government. The principle on which the relations of this Association with the Local Associations was governed was that there was central examination and control combined with complete individual autonomy in administration.

**State Registration of Nurses for all India** is much required. The subject has been under discussion for years. It is desired that India should have its own State Register as in the United Kingdom, South Africa, New Zealand, Australia, Canada and Burma, and that the curricula and examinations should be brought into line with these countries. Government has established a Provincial Register preparatory to an All-India Register.

**Bombay Presidency.**—The Bombay Presidency was amongst the first in India to realise the value of nursing in connection with hospital work. The first step was taken on the initiative of Mr. L. R. W. Forrest at St. George's Hospital, Bombay, where a regular nursing cadre for the hospital was established together with a small staff of nurses for private cases. This was followed by a similar movement at the J. J. and Allied Hospitals and afterwards spread to other hospitals in the Presidency. Ultimately, Government laid down a definite principle with regard to the financial aid which they would give to such institutions, agreeing to contribute a sum equal to that raised from private sources. Afterwards, as the work grew, it was decided by Government that each nursing association attached to a hospital should have a definite constitution and consequently these bodies have all been registered as Associations under Act 21 of 1860. By degrees substantial endowments have been built up, although the associations are still largely dependent upon annual subscriptions towards the maintenance of their works.

The Bombay Presidency Nursing Association was incorporated under the Societies' Registration Act of 1860, in the year 1911, with the primary object of establishing a nursing service from which the Nursing staff at Government aided hospitals under management of Nursing Association might be recruited. This function, however, was never carried out by the Bombay Presidency Nursing Association and it appeared to the Committee improbable that it could be carried out. The auxiliary function of examining and granting certificates to nurses and midwives and maintaining a register of qualified nurses and midwives and also maintaining a Provident Fund for the employees of the

affiliated Associations were, however, carried out. The Memorandum, Rules and By-laws of the Association were not revised and brought into line with the actual working of the Association. This was done towards the end of 1927, when the Committee decided that some steps must be taken to do so. Accordingly a Sub-Committee was appointed to consider the revision and amendment of the Memorandum, Rules and By-laws. The Sub-Committee reported that it appeared to be impossible to amend and revise the rules piecemeal and that the only way to put the things in order was to draft an entirely fresh constitution and rules.

After fully considering the Sub-Committee's report, the Committee agreed that the Association be incorporated by an Act on the line of the Registration Act in the United Kingdom. Pending the passing of the Act, the New Memorandum of Association was brought into operation from 1st April 1929.

**Establishment of the Bombay Nurses, Midwives and Health Visitors' Council.**—The need of legislation for the Registration of Nurses, Midwives and Health Visitors had existed in the Province since a long time and with a view to protect the public from the activities of persons who misrepresent themselves to be fully qualified Nurses, Midwives or Health Visitors, Government, in April 1935, passed the Bombay Nurses, Midwives and Health Visitors' Registration Act. In the absence of State Registration the nurses trained in this Province were subject to certain disabilities and were refused Registration in other Provinces and in other countries, where state registration prevailed. The Act obtains for them the necessary status and secures their registration in other provinces in India or in other parts of His Majesty's Dominions which are willing to reciprocate with the Bombay Nurses, Midwives and Health Visitors' Council which was established in August 1935.

From the date of the establishment of the Council, the Bombay Presidency Nursing Association became defunct. The training and registration of nurses, midwives and health visitors in this Province is now controlled by the Council. Nurses who are trained and registered in this Province can now get registration with the General Nursing Council of England and Wales and the General Nursing Council of Scotland and can practice as qualified nurses in these Countries.

**Lady Minto's Indian Nursing Association.**—The Lady Minto's Indian Nursing Association was founded in 1892 under the title of the "Up-Country Nursing Association" to supplement the supply of trained nurses in India.

The Punjab and the United Provinces were the first provinces to consider the possibility of providing nurses for private work, but it was not until 1906 that provision was made on a really adequate basis.

Lady Minto issued an appeal to the public both in India and England which met with a generous response.

The financial liabilities of the Association are met from five sources:—

Interest on the Endowment Fund; Government Grant; Donations; Subscriptions; Fees.

It is the practice of the Association to invite people to become annual subscribers. This

carries with it two advantages; priority of claim to the services of a Sister, and a reduction in the fees paid for those services. Thus members of the Association are enabled to obtain skilled nursing at moderate charges on a sliding scale of fees determined by the income of each patient.

The control of the Association is in the hands of two Committees; one in England and one in India.

The English Committee is responsible for the recruitment of the staff in the United Kingdom, but fully trained nurses are also eligible in India and the Central Committee has the power to enlist them on the spot.

In addition to this duty the Indian Committee deal with all matters of administration delegation to the Provincial Branches questions of local significance.

Her Majesty Queen Mary is a Patron of the Association.

Her Excellency the Viscountess Wavell is President of the Central Committee in India.

*Hon. Secretary*:—Lieut.-Col. H. Williamson, I.M.S.

*Chief Lady Superintendent*:—Miss C. Wilson, Central Committee.

Lady Minto's Indian Nursing Association, Viceregal Estates, Simla, and Red Cross Buildings, New Delhi.

## THE TRAINED NURSES' ASSOCIATION OF INDIA AND THE ASSOCIATION OF NURSING SUPERINTENDENTS OF INDIA.

The Trained Nurses' Association of India was founded in 1905 and incorporates the Association of Nursing Superintendents of India. It is affiliated with the International Council of Nurses and the National Council of Women in India, and the Nurses' Auxiliary of the Christian Medical Association is an affiliated Association. Its objects are:—

- to uphold in every way the dignity and honour of nursing profession.
- to promote a sense of *esprit de corps* among all nurses.
- to enable members to take counsel together on matters affecting their profession.
- to elevate nursing education and to raise the standard of training.
- to strive to bring about a more uniform system of education, examination, certification and registration.

The Association has accomplished a great deal in raising the standard of nursing throughout India, in improving nursing legislation and in providing post-graduate courses for nurse administrators, sister tutors and health visitors.

It strives in every way to promote efficient and adequate nursing for the sick and to improve conditions, not only for nurses but primarily for patients. The Association is self-supporting and is maintained by the nurses themselves.

The branches of the Association are the Health Visitor's League, the Midwives' Union and the Student Nurses' Association. The number of qualified members is 3,200 and student members 1,400, totalling 4,600. The official organ of the Association is 'The Nursing Journal of India'.

*Patron*: Her Excellency Lady Wavell.

*Vice-Patrons*: H. E. Lady Colville, Bombay; Lady Nye, Madras; Lady Burrows, Bengal; H. E. Sir Evan Jenkins, Punjab; H. E. Lady Dow, Bihar; H. E. Lady Twynnam, Central Provinces; Lady Wylie, United Provinces; H. E. Lady Clow, Assam; H. E. Lady Lewis, Orissa; H. E. Mrs. Hay, Baluchistan; H. E. Lady Caroe, N.W.F.P.; Miss Macqueen, Sind; Her Highness The Maharani Sahiba of Travancore and Her Highness The Princess of Barar.

*Hon. Legal Adviser*: P. A. Mehta, Govt. of India Legislative Department, New Delhi/Simla.

*President*: Miss A. Wilkinson, 3, Commissioner Lane, Delhi.

*Vice-Presidents*: Miss L. E. Mackenzie; Miss M. Craig; Mrs. E. A. Watts; Mrs. N. Bedford; Miss T. K. Adranvala and Mother M. Klinesbuge.

*Officers*: General Secretary: Miss M. E. Abram, T.N.A.I. Office, 4, Underhill Lane, Delhi. Hon. Treasurer: Miss E. Hutchings, Office of the Director-General, Indian Medical Services, New Delhi. Editor: Miss M. E. Abram, T.N.A.I. Office, 4, Underhill Lane, Delhi.

*Hon. Secretaries*: Health Visitors' League: Miss M. Korah, Lady Reading Health School, Delhi; Midwives' Union: Miss S. Round, Lady Reading Hospital, Peshawar; Student Nurses' Association: Miss Van Vranken 20, Stanley Road, Allahabad, U.P.

*Representatives of the Nursing Services and Affiliated Associations*: The Military Nursing Services (India): Miss J. Patterson, R.R.O., Q.A.I.M.N.S., Chief Principal Matron, G.H.Q. Medical Directorate, New Delhi. Madras Government Nursing Services: Miss D. Chadwick, Office of the Surgeon-General with the Government of Madras. Lady Minto's Indian Nursing Service: Miss C. Wilson, Viceregal Estate, Simla/New Delhi.

*The Auxiliary Nursing Service*: Miss E. Hutchings, Chief Lady Superintendent, A.N.S., Office of the D.G.I.M.S., New Delhi. The Nurses Auxiliary of the Christian Medical Association: Miss H. W. Sutherland, L.W.L. Settlement, Chingleput, S. India.

*Membership*: Membership is open to qualified Nurses, Health Visitors and Midwives who have completed their training in hospitals or Health Schools recognised by the Association. All officers are fully trained nurses.

*Subscriptions*: Entrance fee Rs. 3: Annual subscription which includes monthly copies of the Nursing Journal of India Rs. 8 and Nurses whose monthly salaries are under Rs. 50 are entitled to pay half fees.

## THE WOMEN'S MOVEMENT.

The women's movement has had a remarkably smooth run in India. Imperceptibly but steadily, during the past ten or twenty years, the women of India have acquired numerous rights, social and legal no less than political. Their political enfranchisement has been achieved with considerable ease.

Three fundamental causes have led to this remarkable success: first, the deep veneration that is given by the Hindu and Muhammadan religions to the feminine aspect of life equally with the masculine as shown by the importance of goddesses, by the necessity for the presence of the wife at all ceremonies performed by a Brahman, by the idea of the sacred mystery of womanhood implied by the purdah, and by the general veneration of motherhood. Secondly, the time was psychological, for a new era was beginning for the Indian people by the introduction of schemes of reforms in Indian government planned to give a basis of representative government on a progressively extended scale. The door was being opened to complete self-government but only men were being invited to enter through it, although women compose half the population of the country and it had been by the joint efforts of men and women that the agitation for reform in the government had been made. The men and women of India were too awakened and too fair-minded to allow this injustice to remain unredressed. Thirdly, the long and strenuous agitation for the vote by women in Britain and America and their recent victories had brought vividly to the consciousness of all educated Indian men and women the whole question of the inclusion of women in public life, and it was also a national and international necessity that Indian women should be given as high a status as women in other parts of the Empire.

Though the Municipal franchise was granted to the women of the Bombay and Madras Presidencies over fifteen years ago it was so limited in numbers that it did not make a large impact on women's consciousness, and indeed no protest was made when it was suddenly withdrawn from Madras women some years later. Over 1,700 women are qualified to vote for the Bombay Corporation and a fair percentage of these have polled at each election; similarly in other Municipalities in that Presidency women have exercised their vote responsibly and intelligently. Since 1922 scores of women have become Municipal Councillors and members of Local Boards. Their appointment has chiefly been by nomination but there have been notable seats won by election in open contest with men, such as the election of all the four women who first entered the contest for seats in the Bombay Corporation, also the instance in which the single woman contestant in the Municipal elections in Lucknow secured the largest poll of any of the candidates. Many important local reforms have been secured by this large band of women councillors, and every year sees a greater number of women serving on these local Councils and Boards.

It was owing to the rise of the political agitation or Home Rule between 1914 and 1917

that women began to wake up to their position of exclusion by British law from any share in representative government. The interment of one of their own sex, Dr. Besant, stimulated political activity and political self-consciousness amongst women to a very great extent. The ripe moment for giving full expression to their feelings came when the Secretary of State for India came to India to investigate and study Indian affairs at first-hand in 1917.

During the R. Hon. E. S. Montagu's visit only one women's deputation waited on him but it was representative of womanhood in all parts of India, and it brought to his notice the various reforms which women were specially desirous of recommending the Government to carry out.

The first claim for suffrage for Indian women was made in the address presented to Mr. Montagu at this historic All-India Women's Deputation which waited upon him in Madras on the 18th December 1917. The section referring to enfranchisement merits full quotation:

"Our interests, as one half of the people, are directly affected by the demand in the unified (Hindu-Muslim Reform) scheme (1.3) that 'the Members of the Council should be elected directly by the people on as broad a franchise as possible,' and in the Memorandum (3) that 'the franchise should be broadened and extended directly to the people.' We pray that, when such a franchise is being drawn up, women may be recognized as 'people,' and that it may be worded in such terms as will not disqualify on sex, but allow our women the same opportunities of representation as our men. In agreeing with the demand of the above-mentioned Memorandum that a full measure of Local Self-Government should be immediately granted, we request that it shall include the representation of our women, a policy that has been admittedly successful for the past twenty years in Local Government elsewhere in the British Empire. The demand for including women in public life has been a marked feature of the Indian National Congress, in which, since its inception, women have voted and been delegates and speakers, and which, this year finds its climax in the election of a woman as its President. Thus the voice of India approves of its women being considered responsible and acknowledged citizens; and we urgently claim that, in the drawing up of all provisions regarding representation, our sex shall not be made a disqualification for the exercise of the franchise or for service in public life."

The year 1918 was devoted to converting the Government forces to the justice and expediency of Indian Woman Suffrage, but this proved a more difficult matter. It was a disappointment first that though the Secretary of State had given a sympathetic reply to the All-India Women's Deputation, yet when the Scheme of Reforms, drawn up by him and Lord Chelmsford as the outcome of his visit to India was published, no mention of women was made though the widening of the electorate was one of the reforms suggested. When the Southborough Franchise Committee was formed to

investigate the suggestions regarding the franchise in this Scheme, the women suffragists took every means to bring to the notice of the Committee all the evidence which showed the need for, and the country's support of, the inclusion of women in the new franchise.

After the introduction of the Government of India Bill into Parliament in July 1919, a number of Indian deputations proceeded to London to give evidence before the Joint Select Committee of Members of both Houses of Parliament which had been appointed to place the Reforms on a workable basis. Mrs. Annie Besant, Mrs. Sarojini Naidu and Mrs. and Miss Herabai Tata were the women who were heard by the Committee in support of the extension of the franchise to women in India.

The House of Commons decided that the question was one for Indians to answer for themselves and while retaining the sex disqualification in the Reform Bill they framed the Electoral Rules in such terms that if any Provincial Legislative Council should approve by a resolution in favour of women's franchise, women should be put on the electoral register of that Province. This was the only provision regarding franchise matters which might be changed before a 10 years' time limit. Until after that period women were ineligible for election as Legislative Councillors.

Reviewing the position about ten years later the Simon Commission showed the extremely limited extent to which women, enfranchised in the manner set out above, had become qualified as electors. Except in Burma, where it was comparatively high, the percentage of women electors to adult female population was less than one.

Madras led the way in the matter of women's franchise and under the operative provision of the Government of India Act, women became enfranchised. Other provinces followed suit, and at the time of the inquiry by the Simon Commission seven out of the nine provinces had acquired the right. Very soon women began to adorn the benches in legislative chambers, first by nomination and then by election. And they justified the confidence placed in them by sponsoring and successfully carrying through many measures of uplift and reform in regard to the status and influence of women.

During the last ten, or fifteen years, the women of India have made enormous progress in several directions. A great awakening has dawned on them. The raising of the age of consent for marriage, the abolition of the practice of dedicating girls to temples, the demand for legal and property rights *vis-à-vis* men embodied in some of the reform measures—all have tended to raise the status of Indian women in their own eyes as well as in the eyes of the world. They have marched from reform to reform, and their outlook is for ever widening. The Gandhi movement evoked an unprecedented outburst of service and sacrifice among Indian women who were thrown into the thick of a political struggle from which they emerged fully conscious of their political rights and responsibilities. The part played by the two representatives of Indian womanhood at the India Round Table Conferences held in London brought them and their kind in the lime-light.

Small wonder, therefore, that the Government of India Act of 1935 gave Indian women political rights far in advance of those enjoyed by them before that date. In terms of number of seats, women have been allotted 6 seats out of a total of 150 reserved for British India in the Federal Council of State and 9 out of a total of 250 so reserved in the Federal Assembly. In the Provincial Assemblies, women have reserved to them 8 seats in Madras, 6 in Bombay, 5 in Bengal, 6 in the United Provinces, 4 in the Punjab, 4 in Bihar, 3 in the Central Provinces and Berar, 1 in Assam, 2 in Orissa and 2 in Sind.

But by far the greatest improvement in women's political rights occurred in the liberalisation of the franchise qualifications affecting them. Women have been enfranchised who have the property qualification in their own right, or are wives or widows of men so qualified, or are wives of men with a service qualification, or are pensioned widows or mothers of members of the military or police forces, or who possess a literacy qualification. Women not holding the requisite qualification in their own right are required to apply to be enrolled, stating their derived qualification, but this procedure has been waived in some provinces. By means of such enfranchisement, it is estimated more than six million women (against 315,000 under the Act of 1919) have been given the right to vote, compared to 29 million men.

It is noteworthy, too, that men and women can vote both in general constituencies and in special constituencies. Women can vote in and contest elections to the Upper House in provinces where bicameral legislatures have been set up.

Both evidence and result of the awakening among Indian women are to be found in more than one legislative measure sponsored by women legislators calculated to confer greater rights and freedom on women.

#### All-India Women's Conference.

In the past 15 years Indian women's rights, grievances and demands have been voiced principally by the All-India Women's Conference.

The All-India Women's Conference came into existence, as a result of the initiative taken by Mrs. Margaret Cousins, towards the end of 1926, the first session of the conference being held at Poona in the first week of January, 1927. In the beginning it was inclined to concentrate its attention on the basic question of women's education. The resolutions passed at the first conference were almost wholly devoted to the different aspects of women's education, the only exception being a resolution condemning child marriage and supporting Sir H. S. Gour's Age of Consent Bill. Even this subject was touched upon only because it was felt that early marriages were a very serious impediment in the progress of girls' education. Such a narrow programme could not, however, be expected to satisfy the leaders of the women's movement for a long time and it was not surprising that at the third session the scope of the conference was definitely widened to include social reform. Education of women, raising the age of marriage, removal of untouchability and caste restrictions, rural uplift, and reform of the laws of inheritance as affecting women are only the more important of the subjects in which the conference has

interested itself. Year by year its activities have been expanding and they have shown that the educated women of India have become conscious of their rights as well as their duty and are prepared to contribute their share to the task of nation-building.

A satisfactory feature of the women's movement in India has been the spirit of unity and co-operation behind it. A mere glance at the list of presidents of the All-India Women's Conference—which includes the names of the Maharani of Baroda, the late Begum of Bhopal, the late Rani of Mandi, Mrs. Sarojini Naidu, Mrs. Muthulakshmi Reddi, Lady R. Nilkanth, Lady Abdul Qadir, Mrs. Paridoojji, the Maharani of Travancore, Mrs. Cousins, Rajkumari Amrit Kaur, Mrs. Rameshwari Nehru and Shrimati Kamaladevi—should suffice to show to what extent the conference has succeeded in securing the co-operation of the awakened womanhood of India irrespective of the differences of caste and community, race and class.

This organisation, it may be noted, has latterly shown a tendency to transcend the requirements of sectional plea and strayed into wider political activity. It is not, however, difficult to explain this development. The women's movement gained considerable impetus by the part played by and the status accorded to, women in the intensive political movement conducted by Mr. Gandhi and the Congress since 1920. This association, while it has undoubtedly brought women to the forefront of public activity, has also served to bring their outlook in line with that of the Congress. There are doubtless members of the fair sex who hold pronounced views on women's rights and yet do not share the extreme doctrines of Mr. Gandhi or the Congress, but it can safely be said that they are in a minority in the All-India Women's Conference. This will explain the somewhat pro-Congress political views expressed at the annual sessions of this body.

According to the secretary's report submitted to the annual session of the conference held in Hyderabad (Sind) in December 1945, the membership has risen to 25,000. Altogether there are 39 branches and 164 constituent branches. Recording the recent achievements of the conference, the report stated that a memorandum was submitted and evidence tendered before the Hindu Law Committee: the central office of the conference was established; an all-India milk-for-children campaign was launched; agitation was carried on against the employment of women and children in mines; and money was collected for the Kasturba National Memorial Fund.

Presiding over the eighteenth session of the All-India Women's Conference held at Hyderabad (Sind) in December 1945, Mrs. Hansa Mehta made a comprehensive survey of the problems of Indian women and said: "It is not enough to ask for our rights; we must also understand our responsibilities. Woman is an individual as well as a member of society. She can no longer lead the life of a parasite, but must contribute her mite to the common good of society. We may soon be called upon to help in the work of national reconstruction, especially in the fields of education and health."

Defining the place of woman, politically, socially and economically, in the new order to be evolved, Mrs. Mehta spoke of the "woman's charter of rights" in the following terms: "Firstly, we stand for the freedom of woman and her equality with man. Equality is not, however, to mean identity, but equality of opportunity. A woman is as much a human being as man is. If freedom and equality are the basis of human development, woman must be entitled to share them with man. There should be no disability attached to her sex. There should be no domination of one sex over the other and no exploitation of one by the other. This idea should form the basis of the charter. It is gratifying to note that the preamble of the charter signed at San Francisco by the United Nations, which includes India, accepts this position of equality between man and woman. As an individual, woman shall enjoy all the rights of, and shall be required to perform all the duties of, a citizen, whether these rights are political, civil or economic. The state shall recognise the individual as the unit of society and not the family. Woman shall therefore be enfranchised in her own right and not as in relation to man. The present basis of franchise, which gives the woman the right to vote as a wife of a man with a certain income, violates this principle and cannot be accepted by us. We must reaffirm our demand for adult suffrage as the only way to enfranchise a larger number of women than we have today, which is one woman to four men while the population ratio is almost fifty-fifty. Women should be associated more and more with the administration of the country if they are competent to do so."

The President next referred to education and emphasised the right of every woman to be educated. She pleaded for the removal of obstacles like child marriage, child labour and "purdah". She endorsed the plea made in the Sarcent Scheme for the overhaul of the entire educational system and demanded that woman's education should be such as to help the fullest development of woman's personality and to train her to be a useful member of society.

Mrs. Mehta revealed that more women died in India due to child bearing, which is a normal physiological function, than the number of men and women who died of plague, small-pox or cholera and urged that every Indian woman should have facilities to maintain and protect her health. The Indian housewife worked from early morning till late at night without rest or holiday, and yet it was not considered of value because it was not productive and brought no return in the shape of rupees, annas and pies. She pleaded that the housewife should have a right to a part of her husband's income and that, as a corollary, the husband should have no right to dispose of his entire income without the consent of his wife.

Woman's social rights were examined by the President in relation to the three social institutions, property, marriage and family. "With regard to property," she said, "we must claim that every woman shall have the same rights as man to hold, acquire, inherit and dispose of property. Our laws are defective,

particularly Hindu law. It recognises widows' limited estate and does not consider the daughter as an heir to her father's property along with the son. The draft Hindu code prepared by the Hindu Law Committee is a great advance on the present position in that it gives woman an absolute right over her property and a share in that of her father. The Mohammedan law and the Parsi law give absolute right to woman over her property, but they too discriminate between sons and daughters. The Indian Succession Act comes nearest to our ideal, since it gives equal shares to sons and daughters.

"The more important is, however, woman's position in relation to marriage. Whether we call it a sacrament or a civil contract, marriage is a union between man and woman legalised by the state, and, as far as the state is concerned, it is a contract. The conditions under which two persons are allowed to unite in holy wedlock, so far as the Hindu and Mohammedan law are concerned, are not very satisfactory and have made the social life of many an Indian woman hell on earth.

"Woman should also have the right to limit her family. It is she who has to suffer bearing children, looking after them and bringing them up in a civilised way. The right to decide the size of the family should therefore belong to her. Woman should be conscious of this right which she must learn to exercise for her own good, for the good of the family and for the good of the over-populated country."

More than a dozen resolutions were adopted by the conference, including the following:—

"The question of Indian independence should not be delayed any longer. The prevailing distress and chaos in the country can be surmounted only by the transfer of complete power to Indian people and the establishment of a National Government enjoying the full confidence of all...."

The conference viewed with alarm and distress that the close of the major world hostilities had seen the opening of smaller fronts to suppress the rising tide of freedom in various colonial and semi-colonial countries in Asia, Africa and Europe by various imperialist powers. The resolution protested strongly against the combination of imperialist powers jointly to hold subject people in bondage and against the use of Indian men, ships and money to suppress the freedom movement of people in the East.

A third resolution deplored the Government's proposal to spend two crores of rupees annually for the W.A.C.(I) which was not needed in peace time and which exercised "such glaring discrimination against Indian and Anglo-

Indian personnel that several Indian officers had resigned". The resolution also demanded the appointment of an inquiry committee to go into "the scandalous state of affairs" in the W.A.C.(I).

By another resolution the conference reiterated the demand for universal adult franchise and deplored the existing restrictions on the right of vote.

The removal of legal disabilities of women was demanded by another resolution which expressed the hope that the Draft Hindu Code would be introduced in the legislature at an early date.

**Kasturba Fund.**—The work in connection with the emancipation of Indian womanhood and the improvement of the lot of Indian women, particularly in rural areas, obtained an enormous stimulus in 1944-45, thanks to the well-supported Kasturba Memorial Fund created for the commemoration of Mrs. Gandhi who died under detention in February 1944. At Mr. Gandhi's request the trustees of the fund decided to apply the collections to the establishment of a countrywide organisation to improve the lot of Indian women, especially in villages. This is proposed to be done by providing opportunities for Indian women to secure education, acquire knowledge of basic sanitary and hygienic lines and to become alive to their social and political rights. An essential part of the plan is to equip rural areas with up-to-date maternity hospitals and clinics. In order to fulfil this ambitious project a large number of women are being trained in special camps so that after adequate equipment they can scatter themselves throughout the length and breadth of the land and carry the message of women's uplift to every nook and corner of rural India. Among the subjects handled in these training camps are first-aid and home nursing, child welfare, village nursing, health visits, rural sanitation, balanced diet and cheap remedies. The object of these training camps seems to be the raising of an army of experts called "Gram Sevikas" (servants of the village).

**Women in Mines.**—The keen awareness which the leaders of the women's movement in India developed in regard to practices affecting women is illustrated by the repeated protests registered by them against the lifting of the ban on the employment of women in mines. These were echoed in Parliament when the Cabinet spokesman made apologetic references to the need for ensuring adequate supplies for coal for war purposes and promised to secure a revision of the position at an early date. The ban on the employment of Women underground in coal mines was reimposed in February 1946.

## HINDU LAW REFORM.

As the result of increasing consciousness on the part of Indian women generally of their social and political status, there has in recent years been set on foot a move to revise and codify the somewhat vague and contradictory law governing the Hindu home, especially as it affects marriage, divorce, succession to property, etc. In 1937 the Legislature enacted

the Hindu Women's Rights to Property Act. Four years later, the Government of India set up a Committee to overhaul and codify the Hindu Law. This Committee, which is known as the Rau Committee, drafted two bills dealing with Hindu intestate succession and Hindu marriage. When the measures came up for consideration by the two Houses

## The Fisheries of India.

The fisheries of India, potentially rich, as yet yield a mere fraction of what they could were they exploited in a fashion comparable with those of Europe, North America or Japan. The fishing industry, particularly the marine section, has certainly expanded considerably within the last 50 years concurrently with improvement in the methods of transport and increase in demand for fish, cured as well as fresh, from the growing population of the great cities within reach of the seaboard. The caste system, however, exerts a blighting influence on progress. Fishing and fish trade are universally relegated to low caste men who alike from their want of education, the isolation caused by their work and caste and their extreme conservatism, are among the most ignorant,

suspicious and prejudiced of the population extremely averse to amending the methods of their forefathers and almost universally without the financial resources requisite to the adoption of new methods, even when convinced of their value. Higher caste capitalists have hitherto fought shy of associating with the low caste fishermen, and except in large operations on new lines, these capitalists cannot be counted upon to assist in the development of Indian fisheries. As in Japan, it appears that the general conditions of the industry are such that the initiative must necessarily be taken by Government in the uplift and education of the fishing community and in the introduction and testing of new and improved apparatus and methods.

### Madras.

The Madras coast line of 1,750 miles is margined by a shallow-water area within the 100 fathom line of 40,000 square miles outside of the mere fringe inshore, this vast expanse of fishable water lies idle and unproductive. The surf-swept East coast is singularly deficient in harbours whereon fishing fleets can be based, and so from Ganjam to Negapatam, the unsinkable catamaran, composed of logs tied side by side is the only possible easy-going fishing-craft. Its limitations circumscribe the fishing power of its owners and consequently these men are poor and the produce of their best efforts meagre compared with what it would be if better and larger boats were available and possible. The West coast is more favoured. From September till April weather conditions are good enough to permit even dugout canoes to fish daily. No difficulty is found in beaching canoes and boats throughout this season. The fishing population is a large one. In the census taken by the Department of Fisheries in 1930-31, the fisher-population on the West coast totalled 138,294. The esteemed table fish of the coast consist of the Seer (*Cybium* or *Scomberomorus*), Pomfret (*Apolectus* and *Stromateus*) several large species of Horse Mackerel (*Caranx*), Jew fish (*Sciaenidae*), Whiting (*Sillago*), Thread-fins (*Polynemus*), Sardines (*Clupea*), and Mackerel (*Scomber*). In economic importance, however, shoaling fish and fish of inferior quality such as Sardine (*Clupea*), Mackerel (*Scomber* or *Rastrelliger*), Catfish (*Arius*), Ribbon fish (*Trichiurus*), Gogglers (*Caranx crumenophthalmus*) and Silver-bellies (*Leiognathus* and *Gazza*) take precedence of the former. Sardine and Mackerel overshadow all others. A master fisherman of experience was recruited from Scotland in 1936. He found it impossible to stand the climate of India and had to be repatriated in 1937. Since then efforts to revive deep sea fishing research begun by the trawler 'Lady Goschen' have been made. Proposals to charter a motor boat smaller than a trawler but capable of employing all known methods of sea fishing for bottom, mid-water and surface fish in order to test the suitability of those methods for Indian conditions, have reached an advanced stage. The type of vessel selected could not be chartered on account of the outbreak of war. Fishing outside the 5 fathom line is little in evidence save by Bombay boats (Ratnagiri) which are engaged in drift

netting for bonito, seer and other medium-sized fishes. These strangers are enterprising fishers and bring large catches into Malpe and Mangalore and other convenient centres: the material is largely cured for export.

**The Madras Fisheries Service.**—As Government attention has been given in Madras over a longer period to the improvement of fisheries, and a larger staff concentrated upon the problems involved than elsewhere, this Presidency has now the proud position of knowing that her fisheries and collateral industries are better organised and more progressive than those in other provinces. The credit for the wonderful success which has been achieved and the still greater promise of the future, is due in large measure to the wise and cautious plans of Sir F. A. Nicholson, who from 1905 to 1918, had the guidance of affairs entrusted to him. In 1905 he was appointed on special duty to investigate existing conditions and future potentialities; in 1907, a permanent status was given by the creation of a fisheries bureau and this in turn developed into a separate Department of Government. It now forms part of the Department of Industries and Commerce.

They are so varied and far-reaching that it is difficult even to enumerate them in the space available, much less to give details. So far its most notable industrial successes have been the reform of manufacturing processes in the fish-oil trade, the creation of a fish guano industry and the opening of an oyster farm conducted under hygienic conditions. The most noteworthy result of technological research conducted by the department is the production of sardine oil with Vitamin A potency equal to one-fourth that of Cod-liver oil and the discovery of several other Indian Sea fish which yield oils with a high vitamin A content. Madras practically led the way in developing the shark-liver oil industry in the country. Oil from a South Indian Shark-liver is ascertained to be about thirty-five times richer in Vitamin A than an average sample of medicinal Cod-liver oil. It has been established beyond doubt that Shark-liver oil in general is a most potent source of Vitamin A. When Cod-liver oil could not be imported in any quantity during the war, an opportunity was provided for developing an indigenous industry for the production of fish liver oil rich in Vita-

min A, and also for manufacturing malt extract and emulsions and various preparations of this kind. The manufacture of shark-liver oil is undertaken at the fish curing yards and oil extraction centres and in 1944-45, 8,708 gallons of oil were manufactured and sent to the Government Oil Factory, Calcutt, for purification and blending. Up to 30th June 1943, 18,612 gallons of refined oil were produced at the Government Oil Factory and 21,933 gallons were sold. The product, both in the blended and standardised bulk form and in the vitamin concentrated form of "Adamin" has stood its test very well and is facing a useful post-war stabilisation.

**Fish Curing.**—Fish curing is practised extensively everywhere on the Madras coasts; its present success is due primarily to Dr. Francis Day who, after an investigation during 1869-71 of the fisheries of the whole of India, pressed for the grant to fishermen of duty-free salt for curing purposes within fenced enclosures. He advocated much else, but the time was not ripe and the salt concession was the sole tangible result of his long and honourable efforts. His salt suggestions were accepted by the Madras Government, and from 1882 a gradually increasing number of yards or bounded enclosures were opened at which salt is issued free of duty and often at rates below the local cost of the salt to Government. At present there are 112 fish curing yards scattered along the coast. During the year 1944-45, 2,124,345 maunds of fresh fish were brought to these yards for curing and 334,148 maunds of salt were issued for the purpose.

**Smoking and Semi-drying.**—Besides salt curing, the department has started, in 1944, the smoking of fish, mainly for supplying the army. During the year 1944-45, 124,320 lbs. of smoked mackerel, pomfret and seer were supplied to the army and 5,382 lbs. to the Civilian population, from the seven centres of production. The supply to the army has since been stopped and the production is now switched on entirely to supply civilian needs.

Two fish factories for processing prawns are subsidised by the Imperial Council of Agricultural Research and manufacture semi-dried prawns from inland lakes.

**Pearl and Chank Fisheries.**—Off the coasts of Tinnevely and Ramnad Districts of the Presidency lie the valuable pearl oyster beds which, owing to a complex of causes yield an irregular fishery which appears in certain seasons at long intervals, often of many barren years. With a view to elucidating and controlling the fluctuations to the best advantage, the life history of the oyster with correlation to oceanographic factors is studied by the Marine Biological Section of the Department. The rearing of pearl oysters in captivity, started in 1933 at the Krusadal Biological Station, Pamban has been successful and a highly promising technique of pearl production by artificial inducement is being developed here.

Allied to the Pearl fisheries are the Chank fisheries of the maritime districts, both being crown monopolies. Besides the precious sacred chank, the abluton chanks and Pooja conches, lakhs of chank shells feeding the flourishing chank ornament industry in the north go mostly

from the seas of this province. A total of 334,148 chanks were fished during the year 1944-45. Experiments in marking chanks started in 1931 to study the rate of growth and migration of the chank in its natural haunt is continuing and up to 30th June 1945, 5,255 chanks have been marked and liberated.

**Marine Aquarium.**—Perhaps a word is necessary about this institution at Madras. The building was constructed under the auspices of the Superintendent, Government Museum, Madras and was thrown open to the public on 21st October 1909. The Superintendent, Government Museum, had charge of the Aquarium for ten years till 1919 when it was transferred to the Department of Fisheries. Ever since its opening, being the first institution of its kind in Asia, it has been immensely popular with the public. A total of 65,236 persons visited the Aquarium during 1941-42 and the receipts amounted to Rs. 5,165 against an expenditure of Rs. 5,060. On account of war emergency, as the building was required for other purposes Government ordered the closure of the Marine Aquarium and it was closed on 8th March, 1942. The opening of a larger Aquarium on more up to date lines is now under consideration.

**Deep Sea Fishing.**—The annual report of the Public Health Commissioner with the Government of India for 1933 states that the total land area of British India amounts to only 2.44 acre per head of the population but allowing for forests and uncultivated and fallow lands only 0.72 acre per head is under food-crop, quite insufficient for even the present population, and that the population is increasing at an alarming rate and by 1941 will probably reach 400 millions. The finding of the census of 1931 is that agriculture has reached its maximum production under present conditions. Fisheries therefore are the only prime source of food-supply to supplement agriculture, and the Department has been endeavouring to play its true and proper part in improving the catches and methods of sea-going fishermen to augment the fish supply of the Presidency.

With all the age-long popularity and local usefulness of traditional fishing craft and tackle, modern fishing requires improvements so as to cover more of ground as well as of catch. The survey of deep sea fisheries by the trawler "Lady Goschen," though brief, disclosed the existence of important off-shore fisheries unsuspected before. The wealth of fish off Negapatam reported by the trawler was of sufficient importance to attract the notice of Japanese fishermen thousands of miles away. Even then it was realised that if Madras was to benefit by the survey, the allied duty of enabling the local fishermen to exploit the off-shore fishing grounds by suitable craft and tackle must be shouldered by the department.

In 1944, the department initiated deep sea fishing operations in different centres in the Presidency, mainly to augment the output of sharks to feed the growing Shark-Liver Oil industry and also to demonstrate off-shore fishing. The operations resulted in a catch of about 582,000 lbs. of fish in 1944-45, out of which 476,000 lbs. were sharks which gave 50,000 lbs. of liver. In December 1945, a new fishing method was attempted, viz., schooner

11. 1

The need for special efforts to promote co-operation among fisherfolk and to renew and stimulate co-operative societies to more efficient work has been recognised by Government for some years. The Committee on Fisheries recommended that all co-operative work among fishermen both on the West and East Coasts in the Presidency should be done by the Fisheries Department and that, on the analogy of the system in vogue in the Labour Department, the staff of Inspectors of Co-operative Societies should work under the Fisheries Department, the Co-operative Department supplying trained Inspectors and auditing the books of the societies. The Government partially accepted the recommendations and sanctioned the deputation of a Sub-registrar of Co-operative Societies and 2 Inspectors for exclusive work among fishermen under the department.

To promote the education of fisherfolk, the department runs a number of schools for fisher children where free education and midday meals are offered. There are at present 52 Fishery schools with a strength of 5,112 pupils.

While these service institutions of the department have been catering to the needs mainly of the marine fishermen, the diffused distribution of the inland fishermen has been one of the difficulties in the way of equally rapid progress in their rehabilitation work. With the all round developmental programme of the Inland Fisheries in hand, plans for methodical work in this direction are under way. Preparatory

statistics of inland fisherfolk are being collected. The growing social consciousness among fishermen is great encouragement in this task.

The educational work of the Department is becoming one of its most important branches in training men in the technology of curing, oil manufacture, etc., in co-operative propaganda and in general Fisheries Science. In the past Fisheries Officers of most provinces and states have received training in the Madras Fisheries. Now the Fisheries Training Institution in Madras, under the subsidy of the Govt. of India, trains batches of graduates and post-graduates in an half yearly course of general fishery work, while a Popular Short Term Course trains interested persons in the art of fish farming, to enable them to run private farms on efficient lines. Arrangements are made for the training of skilled workers at the Marine Fisheries Technological Institute, Tuticorin while Fisheries Technology has been included in the subjects taught in the Polytechnic recently opened at Cocanada. The Fisheries Station at Banur supplies zoological specimens for the use of college classes and museums and is contributing materially to the advancement of the study of Zoology throughout India.

A Fishery information-cum-propaganda unit has recently been opened to gather and disseminate information on fishery matters and to effect useful propaganda, popularising scientific methods of fish farming, production, exploitation and utilization. Besides, the unit maintains a Central Fisheries Museum and a well equipped library.

## Bengal.

**General.**—The value of the fisheries of this extensive deltaic region lies primarily in the enormous area occupied by inland waters—rivers, creeks, jheels, odd swamps,—to say nothing of paddy-fields and tanks. These swarm with fish and, as the Hindu population are free to a large extent from the aversion to a fish-diet which is widely prevalent among the better castes in the south, the demand for fish is enormous. Rice and fish are indeed the principal mainstay of the population and not less than 80 per cent. of the people consume fish as a regular item of diet. It is calculated that 1·6 per cent. of the population is engaged in fishing and its connected trades, a percentage that rises to 2·6 in the Presidency, Rajshahi, and Dacca Divisions. 490,865 persons in Bengal subsist by fishing and 272,579 are maintained by the sale of fish. As a freshwater fisherman, the Bengali is most ingenious, his traps and other devices exceedingly clever and effective—in many cases too effective—so eager is he for immediate profit, however meagre this may be. The greatest inland fishery is that of the hilsa (*Hilsa ilisha*) which annually migrates from the sea and estuaries in innumerable multitudes to seek spawning grounds in the Ganges and the other great rivers. Other valued and abundant river and tank fishes are the rohu (*Labeo rohita*), the katla (*Calla calla*) and mrigal (*Cirrhina mrigala*); prawns and shrimps abound everywhere. Of important fishes taken in the lower reaches of the rivers and in the great network of creeks spread throughout the Sunderbans, the bhekti or bhetki

(*Lates calcarifer*) and the mullets are the most esteemed; apart from these estuarine fishes the most valuable sea-fishes are the Mango-fish or Thread-fin or Indian Salmon (*Polymemus*) and pomfrets. The sea-fisheries are as yet little exploited. Taking everything into consideration, it can be safely stated that the fishery wealth of Bengal is enormous and is far in excess of any other province.

**Historical.**—Following the inquiry begun in 1906 by Sir K. G. Gupta, an investigation of the steam trawl potentialities at the head of the Bay of Bengal was undertaken, the trawler *Golden Crown* being employed for the purpose. The results showed that there are extensive areas suitable for trawling and capable of yielding large quantities of high class fish. Much attention was devoted during these trawl cruises to the acquisition of increased knowledge of the marine fauna, the results being published in the Records and Memoirs of the Indian Museum. For various reasons, the chief perhaps being the hostility of vested interests, the lack of cold storage facilities and the loss of time involved by the trawler having to bring her catches to Calcutta instead of sending them by a swift tender, the experiment was financially a failure and was dropped. With ever-increasing demand for fish in Calcutta and the concurrent rise in prices, the prospects of remunerative steam-trawling are now much more bright. The trade, however, is a difficult one to organise and without a rare combination of technical fishery knowledge and far-sighted and comprehensive organisation, the danger run by the

## Bombay.

Whereas Bengal's fisheries are at present confined principally to inland waters, those of Bombay are concerned, save in Sind, almost entirely with the exploitation of the wealth of the sea. Bombay is favoured with a coast line abounding with excellent harbours for fishing craft, a fair-weather season lasting for some seven months, and a fishing population more alive to their opportunities and more daring than those of the sister Presidencies. Bombay sea-fisheries are of very great importance financially as well as economically and, there is ample scope for most useful work in improving curing methods, in introducing canning and in the development of minor fishery industries, particularly those connected with the utilization of by-products.

A special department exists for the development of the fisheries of the Province and their organisation on progressive lines. The department is in charge of the Director of Fisheries and has been specially constituted with effect from the financial year beginning April 1, 1915. Till then the administration of fisheries was the responsibility of the Director of Industries who administered the subject of "Fisheries" from 1918 and had for a time two officers in the Department engaged upon fishery investigation and development. A steam trawler was bought for work in Bombay waters in 1920 and began work in May, 1921, off Bombay. The experiment continued until February, 1922, and the trawler was subsequently sold to the Government of Burma. At the outset the results seemed promising, but the experiment as a whole showed that the cost of maintaining a trawler of the type used could not be met by sales of fish at current market rates. Cold storage has since been installed at the principal fish market in Bombay, but for a trawler special facilities are needed such as rapid coaling, supply of ice and stores, and gear for unloading catches. More than this a change is needed in the primitive conditions under which the local fish market is conducted and there is much to be done in popularising little known species of edible fish, such as *karel*, *palu*, *tambusa*, and particularly rays and skates which formed on an average 25 per cent. of the total catch but which is so little esteemed locally that it sells on an average at the rate of 100 lb. for a rupee.

Vast strides have been made in the Bombay fishing industry in the course of the past seven years. This progress is due in a large measure to the awakening among the fishermen, who are traditionally a conservative people, and the introduction of reforms among them is a very gradual process, as strongly ingrained prejudices and customs have to be overcome.

No survey of the fishing industry in the Bombay Presidency in recent years can be complete without a reference to Dr. H. T. Sorley's valuable report on the Marine Fisheries of the Bombay Presidency, published in 1933. The volume is a storehouse of information bearing on the Presidency's fishing industry and the fish trade in general, and contains numerous useful suggestions by the adoption of which the prospects of the fish trade of the Presidency may be improved.

Dr. Sorley has observed that the industry is neither expanding nor declining and that the supply of fish discloses no signs of diminution. Elaborating this view, he observes that the fishermen are healthy and no lately prosperous in comparison with others belonging to a similar social stratum.

Dr. Sorley's more important recommendations are:—

1. The establishment of a marine aquarium in Bombay and Karachi, if they are able to pay their way as the Madras aquarium does.
2. The establishment of a bureau of fisheries information.
3. The advisability of the transfer of the fish curing yards to the control of the Local Government; and
4. The encouragement by the Bombay University of marine biological research.

Dr. Sorley, in his report, also referred to the value of employing fast motor launches to transport fish to the consuming centres in Bombay from the catching sites.

**New Era Started.**—A move in the direction outlined by Dr. Sorley was made towards the end of 1933, when the Government of Bombay launched an experiment implementing in some ways his suggestions. The experiment was formally inaugurated by Sir Frederick Sykes, the then Governor of Bombay, at Danda, and was undertaken in co-operation with the head of the fishing community at Danda. For the purpose of the experiment a launch was obtained on loan from the Royal Indian Navy (then the R. I. M.) and suitable alterations were made to adapt it to the purpose of a carrier launch. The results achieved by the working of this launch were very encouraging. The rapidity with which the fish was transported in a much fresher state than had till then been possible aroused the interest of the fishermen, who realised the benefit to their trade of using fast motor transport to bring the fish to Bombay from the catching fields.

Encouraged by the results, the Government placed in 1931, an order for the construction of two launches—the "Lady Sykes" and the "Sir Frederick Sykes" for the use of the fishermen at Danda. That the progress of this experiment has been encouraging is evident from the fact that every year since then has seen an addition to the number of vessels. The following four vessels have been built since then by parties connected with the fishing trade:—

- (1) The "Lady Sykes", (2) "Sir Frederick Sykes", (3) "Lady Brabourne", (4) "Lord Brabourne", (5) "Nooromohamadi", (6) "Chand Tara", (7) "Sitara", (8) "Karim", (9) "Razaki", (10) "Ruparel", (11) "Mackerel Queen", (12) "Lady Colville", (13) "Relimani", (14) "Gajananprasad", (15) "Dhanluxmi", (16) "Diamond Jubilee", and (17) "Jehangir." All these vessels have been built either in Bombay or along the coast.

The increase in the number of launches in operation was rendered possible on account of the import of 12 gray marine diesel engines from America, early in June 1945.

The launches operate between Bombay and the fishing fields both in the North and South of it. The total quantity of fresh fish brought by the launches during 1945-46 was 30,00,000 pounds as against 12,00,000 pounds brought last year. These vessels also brought into Bombay from Ratnagiri ports 26,00,000 pounds of mangoes as against 2,50,000 pounds brought in the previous year.

**Growth of Refrigerating Facilities.**—Larger supplies of fish made available by the launches have induced the flow of private capital into channels intimately bound up with the fishing trade. Several ice factories and cold storage plants have since been set up at Malwan on the Ratnagiri coast, and Chendla, on the Karwar coast. In Bombay, quick freezing plant employing the Z-process has been installed by a Russian technician at the Kermani market at DeLisle Road and an ice factory and a cold storage plant have been constructed on the east side of Crawford Market (Bombay). A feature of the last plant is that it has a number of small chambers which are hired out at small fees either to one individual or to several collectively. This plant also provides for the quick freezing of fish.

There is also an ice factory and a quick freezing and storage plant at Sassoon Dock (Bombay), where all the launches, both Government and private, land their catches. This factory and cold storage plant have met a long-felt want and proved an undoubted boon both to fishermen and owners of launches and sailing craft. It has obviated the need of obtaining ice from remote centres in the city, thus saving a good deal of time and expenditure. The existence of the cold storage plant at the Dock is a welcome facility to the fishermen, who are now able to store catches at any hour of the day or night when retail vendors are not on the spot.

The provision of refrigerating facilities is one of the biggest problems and is thrown into sharp relief during glut periods. The Government of Bombay realised the need for the extension of these facilities and have placed an order for import from the U.S.A. of two ten-ton and one eighteen-ton ice making plant in addition to cold storage and quick-freezing equipment.

A unique feature of the Bombay Government's fisheries scheme is the provision made to train youths of the fishing community in the running and maintenance of motor launches with the ultimate object of enabling them to take charge of their own launches whenever they decide to go in for these on an extensive scale. The improvement of the economic condition of the fishermen is the paramount consideration kept in the forefront of the whole scheme, which aims at confining the entire fishing trade to the fishing community itself and eliminating the need of employing technical hands who are not fishermen by either caste or vocation.

Lastly, a fisheries information bureau has also been set up. The function of this bureau is to collate and supply information connected with the local and other fisheries. The information collected by the bureau is useful to the fishing industry, as it furnishes information not available to them before.

The war has led to an investigation of the possibilities of the manufacture of oil from shark livers to replace the dearth of supplies occasioned by the stoppage of imports of Cod-Liver Oil from Norway.

A simple process of oil extraction, not involving the use of any complicated machinery, was devised and demonstrated by the department to the local fishermen and to the fishermen at Ratnagiri, Jaltapur, Malwan and Shiroda. The demonstrations were largely attended and the fishermen were greatly impressed by the fact that a new occupation and a fresh source of income had been opened out to them. As a result of the demonstrations the fishermen earnestly took up the work of oil extraction and have regularly been sending to the Fisheries Department oil extracted by them. This is refined by the department and later sold to chemists in Bombay. During 1945-46, 1,195 gallons of Neat Shark liver oil was supplied to the Haffkine Institute for the manufacture of vitamin concentrates and vitamin tablets. 700 gallons of medicinal Shark liver oil (Cod liver oil standard) was prepared by the department. This was packed in one gallon tins and 10 oz. bottles for sale in the country. Also, 64 gallons of Shark liver oil having vitamin "A" potency of 6,000 I. H. per gramme was supplied to various Government Cattle and Poultry Farms, which reported on the excellence of the oil as a valuable cattle and poultry feed. Eight gallons of low potency oil was supplied to an industrial concern to curry leather and temper steel.

The technique of the manufacture of the oil is capable of great improvement, especially in the matter of extraction, refinement and processing of the product. The value of training in the West for this purpose cannot be gainsaid specially for the Shark liver oil industry, which is likely to play an even larger part than hitherto in the country's fishing industry. This purpose underlies the offer to the Government of Bombay, extended through the Government of India, by the British Cod Liver Oil Producers, a noted firm of Hull engaged in the manufacture of Cod liver oil. One of the Superintendents of the Fisheries Departments, was selected for the training and sailed on March 6, 1946, for the United Kingdom.

About 2,22,000 lbs. of Oleum Vitaminatum B.P. were supplied to the Supply Department of the Government of India during the five years from 1940-45.

The superiority of the oil is unquestioned. Oils from certain varieties of Sharks, notably *Carcharias melanopterus* and *Pristis perrotetti* yielded a vitamin. A potency of 140,000 and 40,000 international units per gramme respectively. This is many times more potent than Cod liver oil which, according to the British Pharmacopoeia standard, is between 500 to 1,500 international units per gramme.

The oil obtained from Shark liver is of exceptionally high Vitamin potency, which has to be stepped down in order to bring it on a par with Cod liver oil standard. The reduction of the Vitamin potency of the Shark liver oil is carried out by the Department. The oil produced by the Department

A scheme for setting up of a fish farm to remedy the lack of precise scientific data regarding the breeding habits of various indigenous and exotic food fishes, their rate of growth, food requirements, etc., has been

sanctioned by Government. The farm which will be established at Khopoli on the Tata tail race is expected to come into existence early next year.

## Orissa.

The fishery wealth of Orissa is enormous. The East Coastal line, the Chilka lake and large areas of inland waters yield all the 3 types of fisheries, i.e. (i) marine, (ii) estuarine, (iii) inland.

(i) *Marine*.—Due to lack of communication facilities, the fishing is scattered along the sea coast, the most important fishing centres being Chandbali, Chandipur, Talpada, Puri, Arypalli, Gopalpur, Markandi and Sonapur. Fish is consumed locally, the surplus being simply sundried or salted. Whitebait, sardine, mackerel, seer, hilsa and pomfrets, are the principal varieties. 12 Fish curing yards in Orissa provide duty free salt to fishermen. Catmarans are used throughout the year, the sea being too rough for larger boats. Podows, i.e. country boats, are used in winter for the shore-seine net. Fishing gear employed are hooks and lines, drift nets, drag nets and seines of crude types. These are made locally. Middlemen control the fishery although there are some co-operative societies.

Lack of harbour, cold storage facilities and capital to introduce better fishing methods make improvement of marine fisheries a very difficult problem. The standard of living of the sea-fisherman is extremely poor and calls for improvement. In some fishing centres the fishermen live on fish alone for days together. Improvement of the financial position of the co-operative societies, legislation limiting the middle men's activities, establishment of fishery schools are some of the problems that confront the attention of Government.

(ii) *Estuarine*.—The Chilka lake forms a compact fishing area and yields extremely tasty fish and prawns. The lake is leased out by Zamindars to merchants who have built up an organised fishing industry. The export averages 50,000 mds. per annum and consists of mullets, bhakti, pomfrets, mackerel, Indian salmon, etc. The fish is packed in ice and exported mainly

to Calcutta. Other estuarine fishing centres are Kirtanjakhati, Kujang, Chowmuhun and Sonapur. Lately, due to intensive fishing, there has been a scarcity of adult-sized fish in the Chilka lake. Problems of controlling the mesh of nets after studying the life history of important fishes are under consideration of the I.C.A.R. and the Government. Prohibition of indiscriminate fishing, killing of immature fish, observance of close season, etc., are post-war problems to be tackled.

(iii) *Inland*.—The rivers and tanks form a great potential source of fishing. Hilsa in Orissa is not as tasty as that of the Ganges. Rohu, catla and mrigala are the economic species. These breed only in rivers and in large bunds which resemble rivers during rains as in the Sambalpur District. Collection of fry is carried on every year in Balasore, Cuttack and Sambalpur. An organised fry trade exists in Lakhannath in the Balasore District. Government fry distribution centres supply fry in Cuttack, Sambalpur and Lakhannath.

The fisheries are owned mostly by private individuals. Government fisheries are controlled by the Revenue Department. Although people realise that pisciculture is profitable, the multiple owners of water areas prevent active development. The activities of the Fishery Department have been confined to propaganda which, without executive authority, have not led to appreciable results. The prohibition of killing of fry in canals, paddy fields, etc., by legislation and of letting of sewage into inland waters, construction of dams with fish ladders and placing of Government fisheries under control of the Fisheries Department are under contemplation. A scheme for the development of inland and estuarine fisheries has been instituted in the Province in connection with the "grow more food" drive which is expected to benefit materially, the owners of fisheries, the fishermen and the fish-consuming public.

## The Punjab.

During the year under report the Fisheries Department remained under the Game Warden Punjab upto December 1944 and thereafter it was put under a separate Warden of Fisheries.

The Department was reorganised and its activities now fall under the following categories:

1. *Conservation, Comprising*: (i) District work, (ii) Licensing, (iii) Fish migration, (iv) Fish sanctuaries, (v) Eradication of fish enemies.

2. *Development, Comprising*: (i) Culture of exotic species, e.g. Trout, etc., (ii) Culture of indigenous species, e.g. Carp, etc.

3. *Marketing and Exploitation, Comprising*: (i) Socio-economic condition of fisherman, (ii) Survey of rivers, (iii) Marketing of fish, etc.

4. *Miscellaneous, Comprising*: (i) Propaganda, (ii) Anti-malarial activities.

## I. CONSERVATION:

### DISTRICT WORK

The number of fishing licences issued during the year was 10,724 as compared with 10,074 of the last year. The increase is due to strict supervision by the staff and rise in the price of the fish which induced the fishermen to take out licences. The number of netting licences in the Kulu Valley has been restricted to 60 and the fee for such licences has been raised from Rs. 12 to Rs. 30 per licence.

The receipts from Fisheries in 1944-45 amounted to 1,81,394 as against Rs. 1,14,184 in 1943-44.

The total number of fishing offences reported during the year 1944 was 331 as compared with 300 of the last year.

that the annual fish production of the Punjab has increased considerably as is evidenced from the following :—

Lahore Markets.	Year.	Maunds.
	1920	7,264
	1921	11,946
	1922	13,004
	1923	13,711
	1924	8,191
	1930-40	14,690
	1940-41	14,824
	1943-44	38,826

There used to be only one wholesale market in Lahore upto 1921. But now there are 8

wholesale markets, which is a strong proof to show that the quantity of fish has increased considerably.

#### IV. MISCELLANEOUS.

1. *Propaganda* :—Vigorous propaganda is carried out by the Fisheries Staff to induce the public especially the zamindars to take up fish farming. The public are taking sufficient interest in the matter.

2. *Larvicidal Fish* :—Larvicidal fish have spawned successfully at Chhenawan. 1600 fish were sent from the Chhenawan Fish Farm during the year under report.

#### Sind.

Taking into consideration the limited sea board and the number of fishing villages, Sind has a rich sea fishery. During the year 1940-41, 26,525 maunds of fresh fish were transported by rail to up-country stations from Karachi and 62,870 cwts. of dried fish were transported to distant markets like South Africa, Hongkong, Singapore, Malaya and Colombo.

The fishing grounds are located not only around Karachi, but as far away to the south east as Kutch and towards north as Sonmiani and even Pasni, Ormara, Gwadar up to the Persian Gulf. Vigorous drift net fishing is carried out in the sea board specially between 10 to 20 fathoms deep and right up to 120 miles due south of Karachi for important economic fish like Ghol, Surmai, Sole, Rawas, Choki, Kargoan, Pitho, Hilo, Sang, Sangro, Gissur, Kanderi, Kar, Llaro, etc., etc.

Extensive fish curing operations are carried on with the duty-free coloured salt manufactured in Sind.

A scheme for starting Government Fish curing yards has been approved to begin with 5 yards at Cape Monz, Karachi, Ibrahim Hydri, Sonneri and Mull on the sea coast and one at Buback for Fresh water Fish in Munchur Lake have been sanctioned, where curing will be done under Govt. supervision with clean white duty free Salt in cemented tanks under hygienic conditions. Later on 18-19 such yards will be started throughout the coast.

The best market for Sind's dry fish is Colombo, where in the year 1943-44, 95,000 cwts. of dry fish and cured prawns were sold. Fresh fish packed in ice is also exported to upcountry places like Simla, Lahore, Peshawar, Rawalpindi, Quetta. In the year 1944-45 about 30,000 mds. of fish were exported to these places.

With a view to developing the fishery resources of the Province on the above lines an independent Department of Fisheries was constituted and Dr. M. R. Naidu was appointed as its Director. Of the above schemes the following have since been sanctioned :—

1. Edible Oysters.
2. Semi dried Prawns.
3. Smoke House.
4. Transport of Fish carriers.
5. Shark Liver Oil.

As a result, one Edible Oyster Park has been started at Irbahim Hydri where experiments for the collection of Oysters spats to increase the output of Oysters are being conducted.

22 Maunds of "semi-dried" prawns were manufactured. Owing to the unexpected tidal wave disaster which occurred at the height of

the prawn fishery season, practically 2 or 3 fishing settlements along a 40 miles coast were completely destroyed, 113 fisher folk were drowned, and the prawn fishery was adversely affected.

A Smoke House for smoking "Palla" (Hilsa) Fish has just been completed at Sukkur near the Lloyd Barrage and experiments in smoking Palla fish will be started soon.

2 Motor Fishing Launches, one 75 footer with 160 H.P. Diesel engine and another 95 footer with 260 H.P. Diesel marine engine, both fitted with a power winch, have just been purchased by the Sind Government from the Royal Naval Base at Cochin. These will be brought here after the South West monsoon season and utilized as "fish carriers" to fetch fish caught in distant places in the sea up to the Persian Gulf in the West and Kutch in the South East, and also probably for deep sea fishing.

The first fishermen's Co-operative Purchase & Sale Society has been started at Karachi and is working very well. The Society has exported a first consignment of 1,286 cwts. of cured fish to Colombo. The Government of India have given this Fishermen's Co-operative Society a special Licence Quota of 18,000 cwts. for the export of dry fish abroad.

Arrangements are being made to instal a cold store for fish at Karachi.

The important fishing villages are :—

	Fishing population.
Khudda. (in Karachi)	3,000
Kaliri. "	2,500
Baba Island. "	2,500
Rhiti Island. "	1,600
Ibrahim Hydri.	4,000
Rerhi.	2,000

Besides, there are other less important fishing villages in the deltaic areas of the Sind coast.

**Prawn Fishery.**—Seasonal fishery, which commences from the month of November and ends by end of March, is also a very important fishery of this province. On an average 40,000 mds. of cured prawns are exported every year to Colombo and other places.

The important fishing areas for prawn fishery are :—

- Kurangi creek.
- Phiti creek.
- Kudi creek.
- Patiani creek
- Dabo creek.
- Chaan creek.

Of the above, Phiti, Pitiani and Dhabo creeks are the prolific prawn fishing areas.

were comprehensive and his recommendations sound. Due to this general misunderstanding resulting from Edey's own imperfect summary of his recommendations in the report and his unrealised hope that extensive imports of sea fish were about to commence which might render the development of inland fisheries unnecessary, no serious attention was paid to his report. The only concrete action taken by Government appears to be with reference to the conservation of the sporting fish Mahseer and Trout in hill streams and the general recommendation to the Municipal and District Boards and to the Co-operative Department to develop local fisheries. During the next 20 years no developments occurred except the production of a Marketing report on fish by Mr. Pati Ram Kala, of the U.P. Agricultural Dept.

In 1943 as part of the programme for post-war reconstruction and more immediately to provide against the prevailing shortage of food caused by the War, the development of fisheries received consideration. It was, however, felt that exploitation of the fisheries to increase the supply of fish to towns and the Army was the immediate need and should take precedence of fisheries survey, and fisheries research. The Government therefore decided to take immediate steps to provide a regular, abundant and cheap supply of reasonably good quality fish in the market in Lucknow and in the other important cities. Energetic action was taken by the Government through the Co-operative Department, War Supply staff :—

In improving the existing sources of supply by encouraging market contractors to increase supplies and where this was not possible by directly recruiting fishermen supplying them with Boats and nets and intensively fishing rivers, tanks and Jhils.

In seeking and developing new sources of supply hitherto unexploited.

In improving transport by the provision of ice and refrigeration vans, and

In improving the marketing of fish by direct sale to the public and the Army at equitable rates far below the ruling market prices.

The scheme is now working at Lucknow, Allahabad, Benares and Naini Tal and has been extended to other large consuming centres in 18 out of 48 districts. In March 1944 the need for a technical expert was felt and a Fisheries Development Officer was appointed in the Department of Animal Husbandry to help immediately in the proper expansion of the supply scheme which had been launched and ultimately to plan a Scientific Department of Fisheries for the United Provinces.

A comprehensive 5 years' plan of Post-war Development was drawn up by the fisheries Developments Officer and has been approved by the Government.

In response to the general demand to grow more food a scheme for stocking as many suitable tanks as possible in the 6 districts of Benares, Mirzapur, Jaunpur, Allahabad, Banda and Jhansi was sanctioned jointly by the Government of India and the U. P. Government early in 1945 and some tanks have so far been cleared of predacious fish and stocked with the fry of quick-growing carp. The scheme has since been extended to 18 districts. A further proposal to extend the scheme to 6 more districts round Meerut is now under consideration.

Rivers being the primary source of supply of food fish it was realized that side by side with intensive culture and exploitation the conservation and control of river fisheries should receive attention. A staff of 6 wardens, 15 asstt. wardens and 21 watchers has been sanctioned and has been partially recruited to patrol the rivers. A fisheries research laboratory at Lucknow has been sanctioned for continuous study of conditions obtaining in the rivers and tanks and to initiate suitable measures of fish conservation and culture which will keep pace with intensified exploitation. A suitable site at the Tanda Falls (Mirzapur) has been selected for a research fish farm.

## Baroda.

The fishery resources of the Baroda State to-day, while mainly relating to true fish, both marine and freshwater, include the crustaceans and molluscs; among the latter are the conches and the oysters, one species of oyster being valued for the cheap pearls yielded. To tap these resources a Department of Fisheries, started in September 1937, is being organised by Dr. S. T. Moses, the Director, whose services have been lent by the Government of Madras. Apart from fishery and biological surveys conducted, the main achievements so far are the successful departmental working of the Windowpane Oyster Pearl Fishery for two seasons and the subsequent revival of the lease, along with that of the conch fishery, the demonstration of utilisation of these 'Placuna' pearls, previously used only in medicine, for making jewellery, preparation of oystergrit for poultry from the shells of the edible oyster, conservancy of manure from (1) fish offal, (2) prawn and other crustacean offal and (3) marsh plants (samphire and seablite), preparation of prawn meal dust and the manufacture and sale of shark liver oil with vitamin

contents of 2,000 international units per gramme of A and 200 of D. Gradual attempts to introduce freshwater fish culture as a subsidiary occupation for the ryot are being made and studies of larvicidal and cyclopoecidal fish, both local and imported, have been started. In Baroda City a Fish Market was erected and the Aquarium in the Public Park was revived. Alterations and additions to the aquarium as to include Laboratory facilities are under the consideration of Government. Schemes just being started are the establishment of a 'Prawn Farm' in the Dadhar river and a scheme for 'curing, pickling and smoking of fish' in the Kodinar area, the latter partly financed by the Imperial Council of Agricultural Research. Two other schemes sanctioned are Biological studies of our marine fauna and flora and experiments in their industrial uses and experiments in emulsification, deodorisation, etc., of Shark Liver Oil and bye products. At the famous fishing grounds off Kodinar, which supply almost all pomfrets for Bombay, are exploited mainly by outside fishermen who merely camp in the State during

the season, a colonisation scheme has just been begun under which the fishermen are induced to settle permanently at Koldah by grant of concessions (residential huts, curing yards, salt and even lands for cultivation) ashore and (use of motor launch and loan of nets, etc.) afloat. The first batch of fishermen arrived from Byst in March 1944.

War, however, held up some schemes, e.g., the Velan Backwater Fishfarm for mullets, salmon and edible oysters and the Muldivaraka Fish Hatchery for tilapia. A five-year plan of fishery development in Port Okha, programmed

as follows was also deferred until after the war:—

- 1st year:—erection of a Biological Station;
- 2nd year: erection of an Aquarium;
- 3rd year: erection of a fish liver oil factory and cold storage station and starting of power fishing;
- 4th year: erection of a fishmeal factory;
- 5th year: erection of a cannery. These have now been included in the Post-war Reconstruction Programme of the State and are under consideration by a special committee "Ways and Means Committee" with the member of Post-war Reconstruction as Chairman.

## Hyderabad (Deccan).

The Hyderabad Fisheries Department was established in 1941. Investigations and preliminary survey of many reservoirs and tanks have been carried out, and about 100 varieties of fishes have been collected. Perennial rivers are Godavari, Krishna and Manjira, but most of their tributaries dry up during summer. There are many big reservoirs and more than 35,000 big tanks, besides thousands of small annual ones. 'Murrel' is the most common and popular fish, which is obtained in large numbers during the hot season, and there is always a scarcity during other periods of the year. Breeding and culture of fishes is being taken in hand, and fish-farms near the City and in the Nizamabad district will be established soon, where, besides indigenous fishes, Gourami and Etroplus will be kept for breeding. Stocking of the reservoirs and tanks will also be done on an extensive scale, and some breeding grounds of Catla and other fishes have been rented. The public are taking interest in fish-culture, and several high-class people have started their own concern. Mahseer and other cat-fishes are amongst the sporting fishes.

A plan has been submitted which aims at the development of Fisheries in districts so that a

good item of diet may be available to the cultivators and villagers. Nizamabad and Medak districts have been taken up to start with, and this work will gradually be extended to other districts. A five-year plan has also been formulated under the Post-War Planning scheme for the development of Telangana districts so that fishes may be available all the year round in large quantities. It is expected that if these parts be fully developed, Hyderabad may become self-sufficient to a great extent so far as fish is concerned.

Four Fishermen's Co-operative Societies have already been started, whilst others are being formed in the City and districts. Fishermen will be taught the latest methods for catching fishes in deep water, and other facilities to improve their condition will also be afforded.

*Oryzias*, *Gambusia*, *Brachydanio* and *Xenomus* have been introduced into the A.R.P. static tanks for controlling the breeding of mosquitoes and have proved very successful. For the control of Gulineaworm disease *Barbus ticto* and *Barbus sophore* have proved quite successful.

## Travancore.

The Department of Fisheries of the State is affiliated to the University of Travancore and is now under the control of the Professor of Marine Biology and Fisheries who co-ordinates research and administration.

The coast line of Travancore is 172 miles long and is margined by a shallow water area, within the 100 fathom line, of nearly 3000 square miles. Out of this vast expanse of fishable waters, only a distance of 5-7 miles is exploited at present and the value of the industry to the State at present is estimated at Rs. 1,20,00,000 per year. The surf swept coast is singularly deficient in harbours and during the monsoon months the fury of the breakers is a source of great hindrance to fishing. From Cape Comorin to Trivandrum the unsinkable catamarans composed of logs tied side by side is the only possible easy going fishing craft. From Quilon to the northern most boundary of the State small country made canoes are used and from June to June, when weather conditions are some nets are extensively employed.

The esteemed table fish of the coast consists of pomfrets, seer fish, several species of horse-mackerel, tunny, Jew fish, whiting, mackerel and

thread fins. In economic importance, however, shoal fish and fish of inferior quality such as butter-fish, sardines, white bait and ribbon fish take precedence. Butter-fish, sardines and prawns are abundant in the northern half of the coast, white cat-fish, white bait and ribbon-fish are predominant in the southern half. This conspicuous difference in the distribution of shoal fish has been found to be mainly due to the differences in the nature of the sea bottom. During favourable seasons, butter fish, white bait, ribbon-fish and cat-fish are so greatly in excess of the local food requirements that large quantities are salted and dried both for inland consumption and for export. Travancore exports annually about Rs. 23,00,000 worth of salted fish, the greater part of which is sold in the adjoining Tamil districts and Ceylon.

As the important shoal fish are seasonal in their appearance certain months are more for fishing than others. During these favourable seasons large catches are landed daily along the coast and the only method of conservation of the large unsaleable surplus is salting and drying. But realizing that salted fish is devoid of some of the essential properties

Fish

convert it into a dramatic work by way of performance in public or otherwise, and in the case of a literary dramatic or musical work, to make any record, perforated roll, cinematograph film or other contrivance by means of which the work may be mechanically performed or delivered. Copyright also includes the right to authorise any such acts as aforesaid.

Publication in relation to any work means the issue of copies of the work to the public but does not include the performance in public of a dramatic or musical work, the delivery in public of a lecture, the exhibition in public of an artistic work or the construction of an architectural work of art.

#### Copyright Act.

Copyright in India is governed by the Indian Copyright Act III of 1914 which made the Imperial Copyright Act of 1911 applicable to India with such modifications as appeared to be desirable for adapting its provisions to the circumstances of India. The portions of the Imperial Act made applicable to India form the First Schedule to the Indian Copyright Act III of 1914.

Copyright subsists throughout the parts of His Majesty's dominions to which the Imperial Act extends. Registration is no longer necessary but the publisher of every book has to supply a copy thereof as provided in the Copyright Act and in the Press and Registration of Books Act XXV of 1867. The author of a work is the first owner of the copyright therein and may assign the right either wholly or partially (copyright being a bundle of different rights) and either generally or subject to limitations, or may grant any interest in the right by license to another person but no such assignment or grant is valid unless it is in writing signed by the owner of the right in respect of which the assignment or grant is made or by his duly authorised agent.

#### Duration of Copyright.

Generally the term for which copyright subsists is the life of the author and a period of 50 years after his death but at any time after the expiration of 25 years or in the case of a work in which copyright subsisted at the time of the passing of the Imperial Act of 1911, 30 years from the death of the author of a published work, copyright in the work is not deemed to be infringed by the reproduction of the work for sale if the person reproducing the work proves that he has given the notice in writing prescribed by the Governor-General in Council of his intention to reproduce the work and that he has paid in the prescribed manner to or for the benefit of the owner of the copyright, royalties in respect of all copies of the work sold by him calculated at the rate of 10 per cent. on the price at which he publishes the work.

If, at any time after the death of the author of a literary, dramatic or musical work, which has been published or performed in public, a complaint is made to the Judicial Committee of the Privy Council that the owner of the copyright in the work has refused to re-publish or allow the re-publication of the work or has refused to allow the performance in public of the work and that by reason of such refusal the work is withheld from the public, the owner of the copyright may be ordered to grant a licence to reproduce the work or perform the work in

public as the case may be on such terms and subject to such conditions as the Judicial Committee may think fit.

#### Duration of Sole Ownership of Copyright.

In the case of works first published in British India copyright is subject to this limitation that the sole right to produce, reproduce, perform or publish a translation of the work subsists only for a period of 10 years from the date of the first publication of the work but if within the said period the author or any person to whom he has granted permission so to do publishes a translation of any such work in any language, copyright in such work as regards the sole right to produce, reproduce, perform or publish such translation in that language is not subject to the limitation above prescribed.

#### Copyright of Photographs.

The term for which copyright subsists in photographs is 50 years from the making of the original negative from which the photograph was directly or indirectly derived and the person who was owner of such negative at the time when such negative was made is deemed to be the author of the work.

#### Musical Instruments.

The provisions of the act as to mechanical instruments for producing musical sounds were found unsuitable to Indian conditions. "The majority of Indian melodies," it was explained in Council, have not been published, i.e., written in staff notation, except through the medium of the phonograph. It is impossible in many cases to identify the original composer or author, and the melodies are subject to great variety of notation and tune. To meet these conditions s. 5 of the Indian Act follows the English Musical Copyright Act of 1902 by defining musical work as meaning any combination of melody and harmony, or either of them, which has been reduced to writing.

The Copyright Act does not apply to designs capable of being registered under the Patents and Designs Act II of 1911 except designs which though capable of being so registered are not used or intended to be used as models or patterns to be multiplied by any industrial process.

#### Infringement of Copyright.

Copyright in a work is considered to be infringed by any person who without the consent of the owner of the copyright does anything, the sole right to do which is conferred by the Copyright Act on the owner of the copyright. Where copyright in any work has been infringed, the owner is entitled to all remedies by way of injunction, damages and accounts. Every suit or other civil proceeding regarding infringement of copyright must be instituted and tried in the High Court or the Court of the District Judge. An action in respect of infringement of copyright cannot be commenced after the expiration of 3 years next after the infringement. No Court inferior to that of a Presidency Magistrate or a Magistrate of the First Class can try any offence against the Copyright Act. It is not an infringement of copyright to publish a report in a newspaper of an address of a political nature delivered at a public meeting.

Where a married woman and her husband are joint authors of a work the interest of such married woman therein shall be her separate property.

(c) Minor Forests, containing somewhat inferior kinds of timber and managed for the production of wood, fodder, grazing and other produce for local consumption; these forests are of great importance in agricultural districts.

(d) Pasture lands.—These are not "forests" in the generally understood sense of the term but grazing grounds managed by the Forest Department merely as a matter of convenience.

These four classes of forest are not always sharply divided from each other, and one and the same tract may to a certain extent be managed with more than one object.

**Administration.**—The forest business of the Government of India is carried out in the Department of Agriculture. The Inspector-General of Forests is the technical adviser to the Government of India in forest matters. Under the Constitution of 1919 Forests were made a transferred subject in Bombay and Burma, where they had long been administered by the Provincial Governments, and in 1924 the Reforms Inquiry Committee presided over by the late Sir Alexander Muddiman, Home Member of the Government of India, recommended that they be transferred in other provinces unless any local Government on examination of the position could make out a convincing case against the transfer in its own province. After the Constitution of 1935 Burma was separated from India and Forests were included in the schedule of Provincial subjects throughout India.

**Territorial Charges.**—The various provinces are divided into one or more Forest Circles, each in charge of a Conservator of Forests; usually provinces containing three or more circles also have a Chief Conservator who is the head of the Department for his province. Circles are divided into a number of Forest Divisions, in charge of members of the Imperial or Provincial Forest Service. Each Division contains a number of Ranges in charge of junior members of the Provincial Service or of Forest Rangers or Deputy Rangers; heavy Divisions are also sometimes divided into Sub-divisions. The Ranges are further sub-divided into a number of rounds and beats. These are protective as well as administrative sub-divisions held by Foresters and Forest Guards.

**Non-Territorial Charges.**—Apart from territorial charges there are various important posts of a non-territorial nature connected with Forest Research and Education, Silviculture, Utilisation and the preparation of Forest Working Plans.

**The Forest Service.**—The Forest Service comprises four branches:—

(1) The Indian Forest Service.—This still contains 147 officers. Of these, 139 were recruited direct to the service. Recruitment to this service ceased in 1932.

(2) The Indian Forest Engineering Service.—This service was created in 1919 but since 1922 no further recruitment has been made. Some of the Forest Engineers have been transferred to the Indian Forest Service or the Indian Service of Engineers and some have resigned or have retired. The present number of officers

in the Indian Forest Engineering Service is only 2, one in the Punjab and the other in Bombay.

(3) The Provincial Forest Service.—Till 1928, officers for the lower gazetted Forest Service were recruited for direct appointment as Extra Assistant Conservators of Forests, and were known as Provincial Forest Service Officers. They were trained at the Imperial Forest College, Dehra Dun. After the training of Indian officers for appointment to the Indian Forest Service was started at Dehra Dun, in 1926, the training of the Provincial Forest Service officers was stopped in 1928.

With the advent of Provincial autonomy in 1935 and the consequent cessation of all further recruitment to the Indian Forest Service, Provincial Governments are now building up new Provincial Forest Services of their own to take the place of the Indian Forest Services. As a result the old Provincial Forest Services will disappear in due course.

(4) The Subordinate Forest Service.—These consist of Forest Rangers, Deputy Rangers, Foresters and Forest Guards.

The training of Forest Rangers for the whole of India is concentrated at the Indian Forest Ranger College, Dehra Dun: but in addition to sending candidates to this college, Madras has its own Forest College for training Forest Rangers at Coimbatore.

The training of subordinates below the rank of Rangers is carried out in various local forest schools and training classes.

**Forest Education.**—Forest education in India first started with the founding in 1878 of a Forest School at Dehra Dun, for the training of forest rangers. The school owed its origin to a memorandum submitted in September, 1877, by Sir Dietrich Brandis, the first Inspector-General of Forests to the Government of India, in which he urged the desirability of creating a national Forest School in India, with the object of preparing students for the executive charge of a range, and of enabling Forest Rangers to qualify for promotion to the superior staff. Forestry, he said, must cease to be a subject of foreign introduction: it must become naturalised before it could be regarded as established on a safe and permanent basis.

The hopes of Sir Dietrich have today been more than realised, for not only is the executive charge of ranges and even divisions now being held by ranger students of Dehra Dun or of the daughter college at Coimbatore, but with the establishment of the new Indian Forest College, probationers are now being trained directly for the Superior Forest Services of the various Provinces and States of India.

The original Forest School, established in 1878, came directly under the Government of India in 1884, when it became known as the Imperial Forest College, and trained Rangers at first for all the provinces. In 1912 the Madras Forest College was opened at Coimbatore, serving Madras, Bombay, the Central Provinces, Bihar and Orissa, and the South and Central Indian States, the Imperial Forest College at Dehra Dun serving the rest of India. The Madras Forest College was closed from 1st July 1939, but was re-opened for Madras candidates only in 1945. Apart from this Ranger students

from all parts of India are being trained at Dehra Dun. The College at Dehra Dun has now been renamed the *Indian Forest Ranger College*, to distinguish it from the new *Indian Forest College* for the training of officers for the Superior Forest Service, opened in 1938.

In 1912 a separate course was started for the Provincial Forest Service as then constituted. This course was closed in 1928 with the cessation of direct recruitment to the old Provincial Forest Service. From 1st November, 1926, the training of Indian probationers for the Indian Forest Service was commenced, a separate Indian Forest Service College being established in the old Forest Research Institute at Chandbagh, Dehra Dun. This College, however, had to be closed in November, 1932, owing to the cessation of recruitment to the Indian Forest Service.

Following the transfer of "Forests" to popular control, under the reformed constitution, the old Indian Forest Service is slowly disappearing, and in its place each province is building up its own Superior Forest Service. For the training of officers for these new Provincial Forest Services, and for the corresponding Forest Services of the Indian States, the *Indian Forest College* was established at New Forest in conjunction with the Forest Research Institute and was opened in May, 1938.

**The Indian Forest College.**—The Indian Forest College is housed in the Forest Research Institute building at New Forest and is well equipped with lecture and common rooms, and biological and chemical laboratories. The museums, herbarium laboratories and workshops and the Central Library of the Forest Research Institute form an important part of the College, in so far as they are largely used for educational purposes by the Research Officers and College Staff. A hostel accommodation is provided in separate blocks and there is a common mess. A large playing field with a pavilion provides football and hockey grounds, a cricket pitch and tennis courts.

The staff of the College consists nominally of six—the Principal and Professor of Forestry, and five lecturers, under the Director of Forest Education, who is responsible for both Colleges, and under the general administrative control of the President, Forest Research Institute and Colleges. But in addition the Research Officers of all the branches of the Forest Research Institute act as lecturers in their respective subjects.

The course covers two years, and among other conditions: "An honours degree, not lower than second class, in any natural science or mathematics or agriculture, or its equivalent, is required as a qualification for entry, and the combination of botany and mathematics is preferred." The fees are Rs. 3,500 per year, and the total cost, including stipend for living expenses, cost of camp outfit and equipment, and travelling expenses for field training and tours comes to about Rs. 12,000 for the two years' course. Only those students are accepted who are deputed by their Provinces or States, or who have a guarantee of employment on their successfully completing the course. Holders of the College Diploma are styled "Associates of the Indian Forest College" and

are entitled to use the letters "A.I.F.C." after their names.

**The Indian Forest Ranger College.**—The Indian Forest Ranger College (formerly known as the Forest School, and then as the Imperial Forest College) is located partly at Dehra Dun and partly at Chandbagh, near the Forest Research Institute. The campus covers 100 acres, with lecture and common rooms, dormitories and a lecture hall, biological laboratory and museum, and a hostel for the students. The Forest Research Institute of the main College at Dehra Dun, covering about 4 acres, constitutes a small extension and includes teachers' quarters, while there is a good playing field adjacent.

The staff of the College consists at present of the Director and a few lecturers. Certain of the Research Officers of the Forest Research Institute act as lecturers on their special subjects, while the lecturers in general are all deputed by the Indian Forest College, also, but the core is in Dehra Dun at the Indian Forest Ranger College.

The course covers two years. Among other conditions, the minimum qualification for admission to the College is: A certificate of having passed the Intermediate Examination of any recognized Indian university with a minimum of the following subjects—Mathematics, Physics, Chemistry, Botany, Zoology. A certificate of having passed any other examination of an equivalent or higher standard will be admissible. The fees are Rs. 1,500 per year, and the total cost, including stipend for living expenses, camp outfit and equipment, and travelling expenses for field training and tours comes to about Rs. 5,000 for the two years' course. Only those students are accepted who are deputed by their Provinces or States, or who have a guarantee of employment on their success fully completing the course.

**Research.**—The Forest School founded at Dehra Dun in 1878 became also a recognized centre of Forest Research in 1905, when at the instance of Sir Sainthill Hardy-Willmott, then Inspector-General of Forests, a staff was appointed to investigate problems connected both with the growing of forests and with the utilization of forest produce.

In 1914 the first Forest Research Institute was opened on the Chandbagh Estate, Dehra Dun. Within a very few years the war demand for forest produce emphasized the scope and need for extensive research far beyond that for which accommodation had been provided. Plans were therefore made for a new Forest Research Institute on the Kaulagarh (New Forest) estate a few miles out of Dehra Dun, and it was opened on the 7th November, 1929. The old Institute was converted into the Indian Forest Service College, but with the closing of that college in 1932, the whole of the Chandbagh estate was given up, and with many additions and modifications now forms the Doon School.

The Forest Research Institute is under the administrative control of the President. There are five main branches of forest research, namely Silviculture, Forest Botany, Utilisation, Entomology and Chemistry & Minor Forest Products. Silviculture, which deals with all the production

side of forestry, is under the direction of the Silviculturist. Much of the actual research work is, however, decentralised and done by local provincial silviculturists in the provinces, but the Central Silviculturist co-ordinates their work, does all the statistical computing and acts as an information bureau on silvicultural matters for the whole of India and Burma. The Botanical branch is chiefly concerned with the identification of species, but has a mycological section dealing with fungus diseases of trees and wood rotting fungi. The Utilisation branch has sections dealing respectively with timber testing, wood working, wood preservation, timber seasoning, paper making and wood technology. The sections are under the charge of specially trained Indian assistants and are equipped with up-to-date workshops, testing machines, seasoning kilns, antiseptic treatment plant, sawmill and a paper-making plant sufficiently large to enable paper-making tests to be carried out on a commercial scale. The Forest Entomologist is primarily concerned with research into the control of insect attacks in tree crops, and insect damage to timber. There is also a section dealing with the taxonomy of Indian insects under the Systematic Entomologist. The Chemist does research work into drugs, oils, and other minor forest products, and there is also a Soil Chemist who is engaged on silvicultural problems.

The Forest Research Institute is thus organised and equipped to deal with every aspect of Forest Research and the work it has done in the past and is doing, has gone a long way towards improving the productivity of the forests of India, and had led to the fuller and better utilisation of their products, with correspondingly increased financial returns. Limited facilities also exist at the Forest Research Institute for training in research methods and for the conduct of research by private individuals.

**Forest Products.**—Forest produce is divided into two main heads.—(1) Major produce, that is timber and firewood, and (2) Minor produce, comprising all other products such as bamboos, leaves, fruits, fibres, grass, gums, resins, barks, animal and mineral products, etc. The average annual outturn of timber and fuel from all sources averages about 306 million cubic feet. This was undertaken a few years ago at the initiation and development of certain large exploitation schemes, especially in Madras, which had indifferent success. It was hoped in Madras, by utilising modern American methods, to extract and utilise very large quantities of valuable timbers, but the final result proved that this extensive exploitation was justified neither by the stand of timber in the forests nor by the possibilities of satisfying markets. The Provincial Government after this experience adopted a more cautious policy.

In the Andamans notable developments have taken place. In the past, extraction of timber was done by elephant dragging with the result that only a fringe of the forests could be touched. Attempts were made in employing American methods of mechanical logging, for which machinery was bought and an American expert employed to take charge of the work. The costs of extraction, however, by these means proved too high. Recently the problem has been solved by means of light tramways, the

trains of trucks being drawn by elephants which have been superannuated from ordinary work, and it has been found possible in this way to work large, hitherto inaccessible areas of forest very cheaply. Elsewhere in India a great part of the trade in timber lies in the hands of contractors who are, on the whole, regarded trustworthy if sufficient control over their operations is exercised.

**Forest Industries.**—The important role which the forests of a country play in its general commercial welfare and in providing employment for its population is not always fully recognised. If accurate estimates were available for India, they would no doubt show that apart from the jungle population which is directly dependent on the forests and the large numbers of wood-cutters, sawyers, carters, carriers, raftsmen and others working in and near them, employment on an enormous scale is provided to persons engaged in working up the raw products. Among these latter may be mentioned carpenters, wheelwrights, coopers, boat-builders, tanners, rope-makers, lac-manufacturers, basket-makers, and many other classes of skilled labourers. The Indian census shows over a million people and their dependents so employed in British India and nearly a further half million in Indian States, but these are probably below the actuals, as much forest labour is not whole-time labour, devoting seven or eight months in the year to forest work and the rest to agriculture. With the opening up of the forests, the extension of systematic working, the wider use of known products, and the possible discovery of new products, a steady and extensive development of industries dependent on the forests of India may be confidently anticipated in the future.

**Financial Results.**—The growth of forest revenue, expenditure and surplus during the past 70 years has been steady. Gross revenue, before the late world-wide depression caused a temporary disorganisation of all trades, steadily increased until it amounted to some Rs. 299 lakhs a year, surplus revenue amounting to upwards of 26 per cent. of gross revenue. Most of the provinces ordinarily show a steady increase of surplus. Figures of Revenue, Expenditure and Surplus for the three years ending 1940-41 are as follows:—

Year.	Revenue.	Expenditure.	Surplus.
1940-41	37,105,052.	23,763,614.	133,41,438.
1939-40	30,202,818.	22,744,245.	74,58,573.
1938-39	30,097,367.	22,130,435.	6,966,932.

**Agencies.**—The general practice of the Forest Department in the Government of India and the various Provinces is to conduct their own sales direct with timber dealers or large consumers though there are notable exceptions. Indian timber marketing in England (especially Andaman timbers) is now done under the direction of a Timber Adviser who is attached to the Office of the High Commissioner for India. Sales of Indian timbers and especially timbers from the Andamans are steadily increasing.

**Bibliography.**—A large number of bulletins and other publications has been issued by the Forest Research Institute, and of these a list can be obtained from the President, Forest Research Institute and College, New Forest, Dehra Dun, U.P.

## BROADCASTING.

**History.**—For several years limited broadcasting services were maintained by radio clubs in Calcutta, Bombay and Madras. Although the transmitting sets employed by them were of very low power, the broadcasts were popular. The clubs were assisted financially by a government contribution based upon the revenue from licence fees, but this did not nearly suffice to cover the cost of the transmissions, and great credit is due to the members of those clubs for the sporting manner in which they provided additional funds and undertook the entire responsibility for the programmes.

After negotiations extending over several years, an Indian Broadcasting Company was granted a licence to establish broadcasting services upon lines similar to those of the British Broadcasting Corporation, and transmitting stations were erected at Bombay and Calcutta, the service at the former being inaugurated by His Excellency the Viceroy in July 1927 and the latter by the Governor of Bengal a month later. These stations had each an aerial input of one and a half kilowatts, the same as that of the 2LO stations in London, of which they were practically duplicates. The programmes were so arranged that both Indian and European music were broadcast daily and the news bulletins and market and weather reports were read in two languages.

Owing to financial difficulties the Indian Broadcasting Company went into liquidation with effect from March 1, 1939. Since then the Government of India have been controlling broadcasting in this country. Government for this purpose formed an Indian State Broadcasting Service, now called All-India Radio, and instituted a Central Broadcasting Advisory Committee.

Pe-hawar, which was taken over from the N.W.F.P. Government on April 1, 1937, was converted into a 10-kw mediumwave centre on July 16, 1942.

**Broadcasting House.**—Probably the largest centre of broadcasting activity in the East was completed in 1943. Architecturally, Delhi's newest and one of its most striking sites, it represents from the point of view of equipment, the latest in radio engineering. With its soft-shaded studios, each with an individual acoustic pattern to suit every variety of sound reproduction, its control room—a compact of up-to-the-second scientific efficiency—its dramatic control panels and its luxury-liner corridors between studios, it constitutes a landmark in every sense of the word in the history of Indian broadcasting.

A 100-kw transmitter capable of providing a broadcasting service to countries outside India which was opened on May 1, 1941 constituted another technical development of great importance in AIR's history.

The mediumwave regional transmitters provide a first-grade service for local listeners located within 80-100 miles, and the shortwave regional transmitters a second-grade service for distant listeners within 500 miles of their range.

In the year 1942, India became an important operational base for the Far Eastern theatre of world War II. Consequently His Majesty's Government requested All India-Radio to install at Delhi five short wave transmitters including one 100-kw transmitter as an urgent war measure. These projects were undertaken and completed according to schedule.

- (iii) To provide an alternative urban service (zonal programme) over certain areas where the density of urban population is high.

This post-war broadcasting scheme in general, seeks to provide, among other things, each of the seven lakh villages in India with a community receiving radio set and over 150 transmitting stations broadcasting instructional and entertainment programmes.

**All-India Radio**—All India Radio is an "attached" office of the Department of Information and Arts, of the Government of India. Its head is the Director-General, All India Radio, whose office is located in Broadcasting House, Parliament Street, New Delhi. Other officers at headquarters: Chief Engineer, three Deputy Directors General (Administration, Home and External programmes), Director of Administration, Assistant Chief Engineer, Public Relations Officer, Assistant Director of Administration, Assistant Solicitor, Director of Programmes, and three Officers on Special Duty (Programmes, Administration and Engineering). Under the Directorate General All India Radio, there are four "subordinate offices", each with its own head of office. These are the nine Regional stations (each in charge of a Station Director), the Central News Organisation (under the Director of News and External Services); the Installation Department (the Research Department, the Indian Listener Engineer-in-Charge, High Power Transmitters at Delhi, and the Monitoring Office at Simla).

**Regional Stations**—These Stations are situated at Peshawar, Delhi, Lucknow, Calcutta, Dacca, Madras, Trichinopoly, Bombay and Lahore. Each Regional Centre consists of studios and office building, of transmitter installations and receiving centre installations. The number of studios at each centre varies, ranging from four studios at mediumwave centres to seven studios at the more important regional centres. At Delhi, however, because of its importance as All India Radio headquarters and centre for external broadcasts, fifteen studios have been provided in Broadcasting House. The technical facilities at the studios provide for simultaneous programme transmission, channels for simultaneous rehearsals and tests, listening rooms, recording facilities, etc. The studios at Delhi, Bombay, Madras and Calcutta are air-conditioned.

At Bombay, Calcutta and Madras there are two transmitters each—one mediumwave and one shortwave. At Delhi, however, five transmitters are operated—a 20kw mediumwave transmitter for local services, a 10kw shortwave transmitter for regional services, a 10kw and a 5kw shortwave transmitters for the internal news services centralised at Delhi, and one 100kw transmitter for the external service Peshawar, Lahore, Lucknow, Delhi and Trichinopoly possess only one mediumwave transmitter each. This gives a total of sixteen transmitters of All India Radio besides the five transmitters installed at Delhi at the request of His Majesty's Government. The studios are situated in the towns, and the transmitters as well as the receiving centres some distance from the towns, but connected to the studios by means of telephone lines.

**Transmissions.**—Most stations transmit for about nine to eleven hours a day. This is generally split up into three daily transmissions—morning, afternoon and (longest of all) evening.

**Programmes.**—Programmes, both Western and Indian, are planned by Station Directors with the assistance of their Programme Executives and Programme Assistants. These are drawn up well in advance of their schedule dates, and are published in fortnightly journals of All India Radio. These programmes are broadcast in English and thirteen Indian languages. English is broadcast in various degrees from all stations. The general programme consists of Indian music, talks, plays, feature programmes and programmes for women and children. Rural programmes are broadcast from all stations with the exception of Calcutta and Dacca. Educational broadcasts are given by Bombay, Calcutta, Madras, Trichinopoly, Delhi, Lahore and Dacca. European music is mainly concentrated at Delhi, Bombay, Calcutta and Madras and only a short period is allotted to it at the other stations.

**Central News Organisation.**—This is situated at Delhi and provides (a) news bulletins for Home programmes (in English and seven Indian languages) and (b) external programmes. All the news bulletins are prepared in the Central News Organisation and broadcast from the transmitters at Delhi set apart for news. Each station relays the bulletins suitable for its listening areas.

A few minutes are set apart at each station for local news. This period accommodates news of purely local interest.

The external broadcasts from the Central News Organisation consists of daily services in Mid-Eastern and Far-Eastern languages, programmes for Indians Overseas and programmes for the forces. All these are radiated from Delhi but they are distinct from the programmes of the Delhi (regional) station. Altogether fifteen news bulletins a day in twenty-one languages—fourteen foreign and seven Indian—are broadcast from Central News Organisation at fixed times of the day. The languages used in External Services include Burmese, Thai, Kuoyu, Amoy, Cantonese, Japanese, French, Arabic, Persian, Afghan-Persian, English, Hindu-tani, Tamil, Gujarati, Tonkinese, Cochinese and Italian.

**Installation Department.**—This Department is in charge of the Installation of transmitters, studios and receiving centres. The Research Department deals with all practical technical problems concerning reception of transmissions which require careful study and constant vigilance. Both these departments are situated in New Delhi but the Installation Department has an itinerant staff working on the location required.

**Radio Journals.**—The office of the Editor, "The Indian Listener", who is also in charge of "Awaz" (Urdu) and "Sarang" (Hindi), is situated in New Delhi. There are also two other radio journals; "Vanoli" (Tamil) which is in charge of the Station Director, Trichinopoly, and "Betar Jagat" (Bengali) which is in charge of the Station Director, Calcutta.

**Monitoring Office.**—In order that all news bulletins should be prepared with a knowledge of what is being broadcast by other important stations of the world a Monitoring Office has been established at Simla.

**Public Relations.**—For establishing and maintaining contact between All India Radio and its listeners there is a Public Relations Officer at headquarters and a Liaison Officer and a Listener Research Officer at each Station.

**Advisory Committees,** established at the nine broadcasting centres in consultation with the Provincial Governments, keep the Director General, All India Radio, in touch with local public opinion in the matter of programme construction and advise him on such matters. For advising the Director General All-India Radio, on the choice of a generally acceptable vocabulary for Hindustani, a Hindi-Urdu Standing Advisory Committee was formed in 1940. The first meeting of the Committee was held in May and June 1946.

**Licences.**—Broadcast receiver licences are issued at all head and sub-post offices at a fee of ten rupees per year, and cover the use of receiving sets throughout British India except Baluchistan and the tribal areas of the North-West Frontier Province. Licences for fixed stations for transmitting and experimental purposes are much sought after, and despite a careful scrutiny of the applications, a considerable number have been issued. The number of traders in wireless apparatus who are required to take out special import licences has increased considerably during recent years. Broadcast Receiver Licences are issued to Municipalities or other public bodies for the reproduction of broadcast programmes in public places by the Postmaster-General of the Province. A licence issued for this purpose covers the use of one wireless receiver and any number of loudspeakers at one place only but does not cover any external wiring erected outside the premises of the licensee.

A commercial Broadcast Receiver Licence is, however, necessary in the case of clubs, institutions, messes, etc., for reproducing broadcast programmes at subscription dances, concerts, bazaars, etc., to which the public are admitted. This licence is also issued by the Postmaster-General at a fee of Rs. 25 and is valid for one year.

While the number of wireless receiver Licensees in India has increased, the total for British India of 2,05,130 at the end of March 1946 is negligible, when one considers the vast population, about 325,037,953, and when one compares it with the progress in Europe, America or Japan where it has become an indispensable dynamic social institution.

Taking the figures of wireless licences, there was an increase of 11,000 between January 1933, and April 1935. The number in April 1937 was 42,751, in April 1938, 72,810, in April 1939, 77,608, in April 1940, 100,288, in April 1941, 128,087, in April 1942, 1,56,793, in April 1943, 1,68,276, in April 1944, 1,81,848, and 2,05,130 in April 1946. At the end of March 1946 there were 47,492 licence holders in the

Punjab and North-West Frontier Province Postal Circle which has the largest number in India, the Bombay Postal Circle coming next with 45,144.

The growth of Broadcast receiver licences at the end of March of each year beginning with 1933 is given below which will indicate the interest evinced in radio :

Year	Licences.
1933	9,275
1934	12,037
1935	17,881
1936	28,066
1937	42,152
1938	52,883
1939	72,282
1940	97,537
1941	1,25,347
1942	1,55,733
1943	1,67,123
1944	1,80,660
1945	1,99,589
1946	2,05,130

**Radio Imports.**—The imports of wireless apparatus into India has increased rapidly in recent years, though lately there has been some decline. Imports increased in value from Rs. 11 lakhs in 1933-34 to Rs. 47.7 lakhs in 1937-38. The value for 1938-39 was Rs. 41.1 lakhs, in 1939-40, Rs. 49.8 lakhs and in 1940-41, Rs. 44.3 lakhs. In 1941-42 it rose to Rs. 52.5 lakhs while in 1942-43, it fell to Rs. 30.7 lakhs owing to shipping restrictions, in 1943-44 to 19.9 lakhs and in 1944-45 to 13.2 lakhs. For the nine months 1st April to 31st December 1945, the total value of imports was Rs. 15.0 lakhs.

A feature of the imports statistics is the growth of importations from the United Kingdom, which now heads the list of countries supplying wireless apparatus to India. The United States come second.

During the year 1934-35, imports from the United Kingdom fell by over a lakh from Rs. 5,71,971 to 4,66,316 while those from the United States of America increased by 6½ lakhs from Rs. 1,78,944 to 8,30,348. In 1937-38 imports from the United Kingdom increased to Rs. 15,54,884 and in 1938-39 to Rs. 16,87,726. Imports from the U.S.A. in 1937-38 amounted to Rs. 15,36,217 and in 1938-39 to Rs. 12,63,017. In 1939-40 imports from the U.K. were valued at Rs. 17,33,318 whereas from the U.S.A. at Rs. 15,95,349. In 1940-41 imports from the U.K. were valued at Rs. 29,19,771 and those from the U.S.A. at Rs. 17,12,827. In 1941-42 imports from the U.K. were valued at Rs. 29,09,344 and those from the U.S.A. at Rs. 18,82,353. In 1942-43 imports from the U.K. were valued at Rs. 16,61,497 and those from the U.S.A. at Rs. 7,78,561. In 1943-44 imports from the U.K. were valued at Rs. 13,12,223 and those from the U.S.A. at Rs. 5,58,874. In 1944-45, imports from the U.K. were valued at Rs. 6,39,488 and those from U.S.A. at Rs. 3,87,150. For the nine months, 1st April 1945 to 31st December, 1945, total imports from the U.K. were of the value of Rs. 6,00,251 and from the U.S.A. Rs. 6,92,084

## ALL-INDIA RADIO BROADCASTING SYSTEM.

(With effect from 1st July 1946.)

## Banking.

An event of great importance in the history of Indian banking was the formation on the 27th January 1921 of the Imperial Bank of India by amalgamation of the three Presidency Banks of Bengal, Bombay and Madras.

The idea of a Central Banking establishment for British India was mooted as early as 1836, and was the subject of a minute by Mr. James Wilson, when Finance Member, in 1859. Again, in 1867 Mr. Dickson, the well-known Secretary of the Bank of Bengal, submitted detailed proposals for an amalgamation of the three Presidency Banks. On various later occasions the matter was brought forward without result and it was discussed by the Chamberlain Commission on Indian Finance and Currency in 1913. The present scheme which has come to fruition was however the result of a *rapprochement* on the part of the Banks themselves as a result of the experience gained during the war and the realisation of the desirability of strengthening and extending the Banking system in India.

**The Presidency Banks.**—The history of the Presidency Banks in their relationship with the Government falls into three well-defined stages. Prior to 1862 the Presidency Banks had the right of note issue, but were directly controlled by Government and the scope of their business was restricted by their charters. The second period was from 1862 to 1876. In 1862 the Banks were deprived of the right of note issue, though by their agreements of that year they were authorised to transact the paper currency business as agents of Government. As compensation for the loss of their right of issue, they were given the use of the Government balances and the management of the treasury work at the Presidency towns and at their branches. The old statutory limitations on their business were at the same time greatly relaxed, though the Government's power of control remained unchanged. In 1866 the agreements were revised and the paper currency business was moved from their control and placed under the direct management of Government. The third period dates from the Presidency Banks Act of 1876 by which nearly all the most important limitations of the earlier period were reimposed. But, very briefly, the principal restrictions imposed by this Act prohibited the Banks from conducting foreign exchange business, from borrowing or receiving deposits payable out of India, and from lending for a longer period than six months, or upon mortgage or on the security of immovable property or upon promissory notes bearing less than two independent names or upon goods, unless the goods of the title to them were deposited with the Bank as security. At the same time Government abandoned direct interference in the management, ceasing to appoint official directors and disposing of their shares in the Banks. The Banks no longer enjoyed the use of the Government balances. Reserve Treasuries were constituted at the Presidency towns into which the surplus revenues were drawn and the balances left at the disposal of the Banks were strictly limited.

This system continued with only minor modifications until 1920. During the war, however, the policy was deliberately adopted of reducing the amount of the balances held in

the Reserve Treasuries and leaving much larger balances with the Headquarters of the Presidency Banks in order to assist the money market.

**The Imperial Bank of India.**—Under the Imperial Bank of India Act of 1920 as amended by the amendment Act of 1934 which came into force from 1st April 1935 the control of the Bank is entrusted to a Central Board of Directors with Local Boards at Calcutta, Bombay and Madras and such other places as the Central Board may determine. The Central Board of Directors shall consist of:—

- (a) the presidents, vice-presidents and the secretaries of the Local Boards;
- (b) one person elected from amongst the members by each Local Board;
- (c) a Managing Director and a Deputy Managing Director appointed by the Central Board;
- (d) not more than two non-officials, nominated by the Central Government.

Representatives of any new Local Boards, which may be constituted, may be added at the discretion of the Central Board.

The Deputy Managing Director and the Secretaries of the Local Boards are entitled to attend the meetings of the Central Board but not entitled to vote. The Deputy Managing Director is entitled to vote in the absence of the Managing Director.

The Central Government shall nominate an officer of the Crown to attend the meetings of the Central Board but he shall not be entitled to vote.

Under the Imperial Bank of India Act of 1920 provision was made for the increase of the capital of the bank. The capital of the three Presidency Banks consisted of 3½ crores of rupees in shares of Rs. 500 each, fully subscribed. The additional capital authorised was 7½ crores in shares of Rs. 500 each, of which Rs. 125 has been called up, making the present capital of the Bank Rs. 11½ crores, of which Rs. 5,62,50,000 has been paid up. The Reserve Fund of the Bank is Rs. 6,07,50,000 and the Balance Sheet of 31st December 1945 showed the deposits at Rs. 259,37,45,355 and Cash Rs. 41,59,86,716 with a percentage of cash to liabilities of 16.03.

**Agreement with Reserve Bank of India.**—The Bank has entered into an agreement with the Reserve Bank of India which will remain in force for 15 years and thereafter until terminated after five years' notice on either side. Provisions contained in the agreement between the Imperial Bank of India and the Reserve Bank of India are:—

The Imperial Bank of India shall be the sole agent of the Reserve Bank of India at all places in British India where there is a branch of the Imperial Bank of India which was in existence at the commencement of the Reserve Bank of India Act, 1934, and there is no branch of the Banking Department of the Reserve Bank of India.

In consideration of the performance of the Agency duties, the Reserve Bank of India shall pay to the Imperial Bank of India as remuneration a sum which shall be for the first ten years during which this agreement is in force a commission calculated at 1/16 per cent. on the first 250 crores and 1/32 per cent. on the remainder of the total of the receipts and disbursements

# KEELAVITE

*Hydraulic*

## POWER TRANSMISSIONS

### KEELAVITE (Patented) PUMPS

- Non pulsating delivery.
- High volumetric and mechanical efficiency.
- Variable delivery if required
- Manual or automatic control
- Working parts CANNOT wear
- Performance maintained indefinitely
- Suitable for operation at synchronous electric motor speeds

### KEELAVITE (Patented) MOTORS

- 100% starting torque
- Uniform torque throughout cycle.
- Torque completely controllable throughout speed range
- Reversible when required
- Completely smooth performance at high and low speeds.

### A KEELAVITE HYDRAULIC POWER UNIT Comprising:

Totally enclosed replenishing tank and filter.

Automatic Boost and Bleeding Equipment Variable or Fixed Keelavite Pump (suitable for either belt or direct drive)

All necessary Valves to suit application.

The only external connections necessary being those to Ram or Hydraulic Motor

The Equipment is assembled and tested as a whole before despatch

## Banking.

An event of great importance in the history of Indian banking was the formation on the 27th January 1921 of the Imperial Bank of India by amalgamation of the three Presidency Banks of Bengal, Bombay and Madras.

The idea of a Central Banking establishment for British India was mooted as early as 1836, and was the subject of a minute by Mr. James Wilson, when Finance Member, in 1859. Again, in 1867 Mr. Dickson, the well-known Secretary of the Bank of Bengal, submitted detailed proposals for an amalgamation of the three Presidency Banks. On various later occasions the matter was brought forward without result and it was discussed by the Chamberlain Commission on Indian Finance and Currency in 1913. The present scheme which has come to fruition was however the result of a *rapprochement* on the part of the Banks themselves as a result of the experience gained during the war and the realisation of the desirability of strengthening and extending the Banking system in India.

**The Presidency Banks.**—The history of the Presidency Banks in their relationship with Government falls into three well-defined stages. Prior to 1862 the Presidency Banks had the right of note issue, but were directly controlled by Government and the scope of their business was restricted by their charters. The second period was from 1862 to 1876. In 1862 the Banks were deprived of the right of note issue, though by their agreements of that year they were authorised to transact the paper currency business as agents of Government. As compensation for the loss of their right of issue, they were given the use of the Government balances and the management of the treasury work at the Presidency towns and at their branches. The old statutory limitations on their business were at the same time greatly relaxed, though the Government's power of control remained unchanged. In 1866 the agreements were revised and the paper currency business was removed from their control and placed under the direct management of Government. The third period dates from the Presidency Banks Act of 1876 by which nearly all the most important limitations of the earlier period were reimposed. But, very briefly, the principal restrictions imposed by this Act prohibited the Banks from conducting foreign exchange business, from borrowing or receiving deposits payable out of India, and from lending for a longer period than six months, or upon mortgage or on the security of immovable property or upon promissory notes bearing less than two independent names or upon goods, unless the goods of the title to them were deposited with the Bank as security. At the same time Government abandoned direct interference in the management, ceasing to appoint official directors and disposing of their shares in the Banks. The Banks no longer enjoyed the full use of the Government balances. Reserve Treasuries were constituted at the Presidency towns into which the surplus revenues were drawn and the balances left at the disposal of the Banks were strictly limited.

This system continued with only minor modifications until 1920. During the war, however, the policy was deliberately adopted of reducing the amount of the balances held in

the Reserve Treasuries and leaving much larger balances with the Headquarters of the Presidency Banks in order to assist the money market.

**The Imperial Bank of India.**—Under the Imperial Bank of India Act of 1920 as amended by the amendment Act of 1934 which came into force from 1st April 1935 the control of the Bank is entrusted to a Central Board of Directors with Local Boards at Calcutta, Bombay and Madras and such other places as the Central Board may determine. The Central Board of Directors shall consist of:—

- (a) the presidents, vice-presidents and the secretaries of the Local Boards;
- (b) one person elected from amongst the members by each Local Board;
- (c) a Managing Director and a Deputy Managing Director appointed by the Central Board;
- (d) not more than two non-officials, nominated by the Central Government.

Representatives of any new Local Boards, which may be constituted, may be added at the discretion of the Central Board.

The Deputy Managing Director and the Secretaries of the Local Boards are entitled to attend the meetings of the Central Board but not entitled to vote. The Deputy Managing Director is entitled to vote in the absence of the Managing Director.

The Central Government shall nominate an officer of the Crown to attend the meetings of the Central Board but he shall not be entitled to vote.

Under the Imperial Bank of India Act of 1920 provision was made for the increase of the capital of the bank. The capital of the three Presidency Banks consisted of 3½ crores of rupees in shares of Rs. 500 each, fully subscribed. The additional capital authorised was 7½ crores in shares of Rs. 500 each, of which Rs. 125 has been called up, making the present capital of the Bank Rs. 11½ crores, of which Rs. 5,62,50,000 has been paid up. The Reserve Fund of the Bank is Rs. 6,07,50,000 and the Balance Sheet of 31st December 1945 showed the deposits at Rs. 259,37,45,355 and Cash Rs. 41,59,86,716 with a percentage of cash to liabilities of 16.03.

**Agreement with Reserve Bank of India.**—The Bank has entered into an agreement with the Reserve Bank of India which will remain in force for 15 years and thereafter until terminated after five years' notice on either side. Provisions contained in the agreement between the Imperial Bank of India and the Reserve Bank of India are:—

The Imperial Bank of India shall be the sole agent of the Reserve Bank of India at all places in British India where there is a branch of the Imperial Bank of India which was in existence at the commencement of the Reserve Bank of India Act, 1934, and there is no branch of the Banking Department of the Reserve Bank of India.

In consideration of the performance of the Agency duties, the Reserve Bank of India shall pay to the Imperial Bank of India as remuneration a sum which shall be for the first ten years during which this agreement is in force a commission calculated at 1/16 per cent. on the first 250 crores and 1/32 per cent. on the remainder of the total of the receipts and disbursements

dealt with annually on account of Government. As for the remaining five years the remuneration to be paid to the Imperial Bank shall be determined on the basis of the actual cost to the Imperial Bank of India, as ascertained by expert accounting investigation.

The first ten years of the agreement having come to a close on the 31st March 1945, the rates of remuneration were revised with effect from the 1st April 1945 for a further period of five years. According to the revised rates, the commission payable to the Imperial Bank on the turnover of Government account is to be calculated at 1/10th of one per cent. on the first 150 crores (in place of the first 250 crores), 1/32nd of one per cent. on the next 150 crores (in place of the remainder), 1/64th of one per cent. on the

next 300 crores, and 1/128th of one per cent. on the remainder of the total receipts and disbursements dealt with annually on account of Government.

In consideration of the maintenance by the Imperial Bank of India of branches not less in number than those existing at the commencement of the Reserve Bank of India Act, the Reserve Bank of India shall, until the expiry of 15 years, make to the Imperial Bank the following payments :—

- (a) during the first five years of this agreement Rs. 9 lacs per annum ;
- (b) during the next five years of the agreement Rs. 6 lacs per annum ; and
- (c) during the next five years of the agreement Rs. 4 lacs per annum.

\* Govt. Deposits were taken over by Reserve Bank as from 1st April 1935.

**Reserve Bank.**—The Reserve Bank of India Act was passed by the Legislative Assembly and received the assent of the Governor-General on 6th March 1934 and the Bank began to function from 1st April 1935. From this date, the Reserve Bank took over the management of the Currency Department of the Government of India by the creation of a special department known as the Issue Department. The assets of the Gold Standard Reserve were transferred to the Bank and were combined with the assets of the Currency Department. From July 1st the Banking Department was opened and the scheduled banks deposited the required percentage of their demand and time liabilities. The Clearing House was transferred from the Imperial Bank to the Reserve Bank as from this date.

The share capital of the Reserve Bank is 5 crores of Rupees in shares of Rs. 100 each, fully paid up. The Reserve Fund of Rupees five crores is provided by Government to the Bank in the form of Government Rupee Securities.

The Bank maintains share registers at its offices at Bombay, Calcutta, Delhi, Madras and Rangoon.

**Management.**—The general superintendence and direction of the affairs and business of the Bank is entrusted to a Central Board of Directors which exercises all powers and does all acts and things which may be exercised and done by the Bank. The Board is composed of:—

(a) A Governor and two Deputy Governors appointed by the Central Government after consideration of the recommendations made by the Board.

(b) Four Directors nominated by the Central Government.

(c) Eight Directors elected on behalf of the shareholders on the various registers.

(d) One Government official nominated by the Central Government.

The Governor and Deputy Governors are the executive heads, and hold office for such term not exceeding five years as the Central Government may fix when appointing them, and are eligible for re-appointment. A Local Board is constituted for each of the five areas.

**Business which the Bank may transact.**—The Bank is authorised to carry on and transact the following commercial business, *viz.*:—The accepting of money on deposit without interest; the purchase, sale and rediscount of bills of exchange and promissory notes with certain restrictions; the making of loans and advances, repayable on demand but not exceeding 90 days, against the security of stocks, funds and securities (other than immovable property) against gold coin or bullion or documents of

title to the same and such bills of exchange and promissory notes as are eligible for purchase or rediscount by the Bank; the purchase from and sale to scheduled Banks of sterling in amounts of not less than the equivalent of Rs. 1 lac; the making of advances to the Central Government and to Provincial Governments repayable in each case not later than three months from the date of making the advance; the purchase and sale of Government securities of the United Kingdom maturing within ten years from the date of purchase; the purchase and sale of securities of the Government of India or of a Provincial Government of any maturity or of a local authority in British India or of certain States in India which may be specified.

The Bank is authorised to act as Agent for the Secretary of State in Council, the Central Government or any Provincial Government or State in India for the purchase and sale of gold and silver; for the purchase, sale, transfer and custody of bills of exchange, securities or shares; for the collection of the proceeds, whether principal, interest or dividends, of any securities or shares; for the remittance of such proceeds by bill of exchange payable either in India or elsewhere, and for the management of public debt.

**Right to issue Bank Notes.**—The sole right to issue bank notes in British India is vested in the Reserve Bank and at the commencement the Bank shall issue currency notes of the Government of India supplied to it by the Central Government and on and from the date of such transfer the Central Government shall not issue any currency notes. The issue of bank notes shall be conducted by the Bank in an Issue Department which shall be separated and kept wholly distinct from the Banking Department.

**Obligation to Sell or Buy Sterling.**—The Bank shall sell to or buy from any person who makes a demand in that behalf at its office in Bombay, Calcutta, Delhi, Madras or Rangoon, sterling for immediate delivery in London at a rate not lower than 1*sh.* 5 49/64*d.* and not higher than 1*sh.* 6 3/16*d.* respectively; provided that no person shall be entitled to demand to buy or sell an amount of sterling less than ten thousand pounds.

**Publication of the Bank Rate.**—The Bank shall make public from time to time the standard rate at which it is prepared to buy or re-discount bills of exchange or other commercial paper eligible for purchase under the Act.

The Bank will publish the accounts of both the Issue and Banking Departments weekly in the *Gazette of India*.

The full text of the Reserve Bank Act is reproduced elsewhere in the Year Book.

## THE EXCHANGE BANKS.

The Banks carrying on Exchange business in India are merely branch agencies of Banks having their head offices in London; on the continent, or in the Far East and the United States. Originally their business was confined almost exclusively to the financing of the external trade of India; but in recent years most of them, while continuing to finance this part of India's trade, have also taken an active part in the financing of the internal portion also at the places where their branches are situated.

At one time the Banks carried on their operations in India almost entirely with money borrowed elsewhere, principally in London—the home offices of the Banks attracting deposits for use in India by offering rates of interest much higher than the English Banks were able to quote. Within recent years however it has been discovered that it is possible to attract deposits in India on quite as favourable terms as can be done in London and a very large proportion of the financing done by the Exchange Banks is now carried through by means of money actually borrowed in India. No information is available as to how far each Bank has secured deposits in India, but the following statement published by the Director-General of Statistics in India shows how rapidly such deposits have grown in the aggregate within recent years.

## Exchange Banks' Investments.

Turning now to the question of the investment of the Banks' resources, so far as it concerns India, this to a great extent consists of the purchase of bills drawn against imports and exports to and from India.

The financing of the import trade originated and is carried through however for the most part by Branches outside India; the Indian Branches' share in the business consisting principally in collecting the amount of the bills at maturity and in furnishing their other branches with information as to the means and standing of the drawees of the bills, and it is as regards the export business that the Indian Branches are more immediately concerned. The Exchange Banks have practically a monopoly of the export finance in India and in view of the dimensions of the trade which has to be dealt with the Banks would under ordinary circumstances require to utilise a very large proportion of their resources in carrying through the business. They are able, however, by a system of rediscount in London to limit the employment of their own resources to a comparatively small figure in relation to the business they actually put through. No definite information can be secured as to the extent to which rediscounting in London is carried on but the following figures appearing in the balance sheets latest available of the undernoted Banks will give some idea of this:—

LIABILITY OF BILLS OF EXCHANGE REDISCOUNTED AND STILL CURRENT.		
Chartered Bank of India, Australia and China	£	369,000
Eastern Bank, Ltd.	£	7,580,000
Mercantile Bank of India, Ltd.	£	164,000
National Bank of India, Ltd.	£	693,000
		8,806,000

The following is a statement of the position of the various Exchange Banks carrying on business in India as it appears from the latest available Balance sheets:—

*In Thousands of £*

Name.	Capital.	Réserve.	Deposits.	Cash and Investments.
Chartered Bank of India, Australia and China	3,000	3,000	86,338	60,857

National City Bank of New York...	19,230	35,359	1,228,002	968,732

## JOINT STOCK BANKS.

Previous to 1906 there were few Banks of this description operating in India, and such as were then in existence were of comparatively small importance and had their business confined to a very restricted area. The rapid development of this class of Bank, which has been so marked a feature in Banking within recent years, really had its origin in Bombay

The above figures do not of course relate to re-discounts of Indian bills alone, as the Banks operate in other parts of the world also, but it may safely be inferred that bills drawn in India form a very large proportion of the whole.

The bills against exports are largely drawn at three months' sight and may either be "clean" or be accompanied by the documents relating to the goods in respect of which they are drawn. Most of them are drawn on well-known firms at home or against credits opened by Banks or financial houses in England and bearing as they do an Exchange Bank endorsement they are readily taken up by the discount houses and Banks in London. Any bills purchased in India are sent home by the first possible Mail so that presuming they are rediscounted as soon as they reach London the Exchange Banks are able to secure the return of their money in about 16 or 17 days instead of having to wait for three months which would be the case if they were unable to rediscount. It must not be assumed however that all bills are rediscounted as soon as they reach London as at times it suits the Banks to hold up the bills in anticipation of a fall in the London discount rate while on occasions also the Banks prefer to hold the bills on their own account as an investment until maturity.

The Banks place themselves in funds in India for the purpose of purchasing export bills in a variety of ways of which the following are the principal:—

- (1) Proceeds of import bills as they mature.
- (2) Sale of drafts and telegraphic transfers payable in London and elsewhere out of India.
- (3) Purchase of Council Bills and Telegraphic Transfers payable in India from the Secretary of State.
- (4) Imports of bar gold and silver bullion.
- (5) Imports of sovereigns from London, Egypt or Australia.

The remaining business transacted by the Banks in India is of the usual nature and need not be given in detail.

and set in with the establishment of the Bank of India and the Indian Specie Bank in 1906. After that time there was a perfect stream of new flotations, and although many of the new Companies confined themselves to legitimate banking business, on the other hand a very large number engaged in other businesses in addition and can hardly be properly classed as Banks.

These Banks made very great strides during the first few years of their existence, but it was generally suspected in well informed circles that the business of many of the Banks was of a very speculative and unsafe character and it was a matter of no great surprise to many people when it became known that some of the Banks were in difficulties.

The first important failure to take place was that of the People's Bank of India and the loss of confidence caused by the failure of that Bank resulted in a very large number of other failures, the principal being that of the Indian Specie Bank.

Since those events confidence has been largely restored. But in April 1923 the Alliance Bank of Simla failed. The effect of the failure of this old established Bank might have been disastrous but for the prompt action of the Imperial Bank which dealt with the situation in close association with the Government of India. The Imperial

Bank undertook to pay the depositors of the Alliance Bank 50 per cent. of the amounts due to them. A panic was averted and a critical period was passed through with little difficulty.

During 1923 the Tata Industrial Bank, which was established in 1918, was merged in the Central Bank of India.

The end of June 1938 witnessed a banking crisis in South India in the failure of the Travancore National & Quilon Bank Ltd. The bank held a very important position among the South Indian joint stock banks with a paid-up capital of Rs. 25 lakhs. The total resources were said to be large and the bank had 78 branches. As soon as the news of the failure was received, the Reserve Bank sanctioned special credit limits to banks in South India and these limits were later doubled. Although the acuteness of the crisis soon subsided, an underlying feeling of nervousness continued until the close of the year.

The following shows the position of the better known existing Banks as it appears in the latest available Balance Sheets :— In Lakhs of Rupees.

## INDIAN PRIVATE BANKERS AND SHROFFS.

Indian private Bankers and Shroffs flourished in India long before Joint Stock Banks were ever thought of, and it seems likely that they will continue to thrive for some very considerable time to come. The use of the word "Shroff" is usually associated with a person who charges usurious rates of interest to impecunious people; but this is hardly fair to the people known as "shroffs" in banking circles; as there is no doubt that the latter are of very real service to the business community and of very great assistance to Banks in India. Under present conditions the Banks in India can never hope to be able to get into sufficiently close

touch with the affairs of the vast trading community in India to enable them to grant accommodation to more than a few of these traders direct, and it is in his capacity as middleman that the shroff proves of such great service. In this capacity also he brings a very considerable volume of business within the scope of the Presidency Banks Act, and enables the Presidency Banks to give accommodation which, without his assistance, the Banks would not be permitted to give. The shroff's position as an intermediary between the trading community and the Banks usually arises in something after the following manner. A shopkeeper in the bazaar, with limited means of his own, finds that, after using all his own money, he still requires say Rs. 25,000 to stock his shop suitably. He thereupon approaches the shroff, and the latter after very careful inquiries as to the shopkeeper's position grants the accommodation; if he is satisfied that the business is safe. The business, as a rule, is arranged through a hoondee broker, and in the case referred to the latter may probably approach about ten shroffs and secure accommodation from them to the extent of Rs. 2,500 each. A hoondee usually drawn at a currency of about 2 months is almost invariably taken by the shroffs in respect of such advances.

A stage is reached however when the demands on the shroffs are greater than they are able to meet out of their own money; and it is at this point that the assistance of the Banks is called into requisition. The shroffs do this by taking a number of the bills they already hold to the Banks for discount under their endorsement, and the Banks accept such bills freely to an extent determined in each case by the standing of the shroff and the strength of the drawers.

The extent to which any one shroff may grant accommodation in the bazaar is therefore dependent on two factors, viz.; (1) the limit which he himself may think it advisable to place on his transactions, and (2) the extent to which the Banks are prepared to discount bills bearing his endorsement. The shroffs keep in very close touch with all the traders to whom they grant accommodation, and past experience has shown that the class of business above referred to is one of the safest the Banks can engage in.

The rates charged by the shroffs are usually based on the rates at which they in turn can discount the bills with the Banks and necessarily vary according to the standing of the borrower and with the season of the year. Generally speaking, however, a charge of two annas per cent. per mensem above the Bank's rate of discount, or  $1\frac{1}{2}\%$ , is a fair average rate charged in Bombay to a first class borrower. Rates in Calcutta and Madras are on a slightly higher scale due in a great measure to the fact that the competition among the shroffs for business is not so keen in these places as it is in Bombay.

The shroffs who engage in the class of business above described are principally Marwaries and Multanis having their Head Offices for the most part in Bikaner and Shikarpur, respectively, the business elsewhere than at the Head Offices being carried on by "Moonims" who have very wide powers.

It is not known to what extent native bankers and shroffs receive deposits and engage in exchange business throughout India, but there is no doubt that this is done to a very considerable extent.

### THE BANK RATE.

Formerly each Presidency Bank fixed its own Bank Rate, and the rates were not uniform. After the amalgamation of the Presidency Banks the Imperial Bank fixed the rate for the whole of India until the 4th of July 1935 when the right to fix the official Bank rate was exercised by the Reserve Bank. The rate fixed represents the rate charged by the Banks on demand loans against Government securities only

and advances on other securities or discount are granted as a rule at a slightly higher rate. Ordinarily such advances or discounts are granted at from one-half to one per cent. over the official rate; but this does not always apply and in the monsoon months, when the Bank rate is some times nominal, it often happens that such accommodation is granted at the official rate or even less.

The following statement shows the average Bank Rates during the last 18 years :—

Year.	1st Half-year.	2nd Half-year.	Yearly average.
1928 .. .. .	6·945	5·456	6·2

## BANKERS' CLEARING HOUSES.

The principal Clearing Houses in India are those of Calcutta, Bombay, Madras, Rangoon, Colombo and Karachi, and of these the first two are by far the most important. The members at these places consist of the Imperial Bank, Reserve Bank, most of the Exchange Banks and English Banking Agency firms, and a few of the better known of the local Joint Stock Banks. No Bank is entitled to claim to be a member as of right and any application for admission to a Clearing must be proposed and seconded by two members and be subject thereafter to ballot by the existing members.

The duties of settling Bank are undertaken by the Reserve Bank at Calcutta, Bombay, Madras, Karachi and Rangoon and by the Imperial Bank at Colombo and a representative of each member attends at the office of that Bank on each business day at the time fixed to deliver cash in any form.

The figures for the Clearing Houses in India above referred to are given below:—

## Total amount of Cheques Cleared Annually.

tent of the main line's net earnings in supplement of their own net earnings, the total being limited to 3½ per cent. on the capital outlay. Under these terms, a considerable number of feeder line companies was promoted, though in none were the conditions arbitrarily exacted. As these terms did not at first attain their purpose, they were further revised, and in lieu was substituted an increase in the rate of guarantee from 3 to 3½ per cent. and of rebate from 3½ to 5 per cent. with equal division of surplus profits over 5 per cent. in both cases. At last, the requirements of the market were met, and there was for a time a mild boom in feeder railway construction and the stock of all the sound companies promoted stood at a substantial premium. Conditions changed after the war and the Acworth Committee so far from approving of this system, considered that the aim of the Government should be to reduce by amalgamation the number of existing companies and that it should only be in cases where the State cannot or will not provide adequate funds that private enterprise in this direction should be encouraged.

The existing Branch Line Companies have ceased for some time to raise additional capital for capital requirements. They have either obtained overdrafts from various Banks for this purpose at heavy rates of interest or issued debentures at special rates of interest (usually about 7 per cent.) or in several cases asked for money to be advanced to them by the Railway Board. So far, therefore, from reducing the amount that the Government of India have to raise in the open market, they were increasing the amount. For the above reasons, the Government of India have abolished this system and are now prepared themselves to find the capital required for the construction of extensions or branches to existing main line systems. They have also announced their readiness to consider the question of constructing branch or feeder lines which were not expected to be remunerative from the point of view of railway earnings upon a guarantee against loss from a Local Government or local authority which might desire to have such lines constructed for purely local reasons or on account of administrative advantages likely to accrue in particular areas. This proposal was put forward as affording a suitable method of reconciling the interests of the Central and the Local Governments and of providing for local bodies and for Local Governments a method of securing the construction of railways which may be required for purely local reasons and which, while not likely to prove remunerative on purely railway earnings, are likely to give such benefits to Local Governments and local bodies as will more than repay the amounts paid under the guarantee. Some such arrangements have already been made with Local Governments in Madras, Punjab, Assam and Bombay.

#### Railway Profits begin.

Meantime a much more important change was in progress. The gradual economic development of the country vastly increased the traffic; both passenger and goods. The falling in of the original contracts allowed Government to renew them on more favourable terms. The development of irrigation in the

Punjab and Sind transformed the North-Western Railway. Owing to the burden of maintaining the unprofitable Frontier lines; this was the Cinderella Railway in India—the scapegoat of the critics who protested against the unwisdom of constructing railways from borrowed capital. But with the completion of the Chenab and Jhelum Canals, the North-Western became one of the great grain lines of the world, choked with traffic at certain seasons of the year and making a large profit for the State. In 1900 the railways for the first time showed a small gain to the State. In succeeding years the net receipts grew rapidly. In the four years ended 1907-08 they averaged close upon £2 millions a year. In the following year there was a relapse. Bad harvests in India, accompanied by the monetary panic caused by the American financial crisis, led to a great falling off in receipts just when working expenses were rising, owing to the general increase in prices. Instead of a profit, there was a deficit of £1,240,000 in the railway accounts for 1908-09. But in the following year there was a reversion to a profit, and the net Railway earnings continued to increase steadily till they reached a figure of over £10 millions in 1918-19. This era of profits ended with the close of the year 1920-21 and in 1921-22 there was a loss of over £6 millions. These changes in the fortunes of the railways affected the Budget of the Central Government rather seriously and in 1924-25 the Railway finances were separated from the General Budget. The terms of the separation are referred to in a later paragraph while the profits of the railway in the years from 1924-25 onwards are given below:

Year.	Contribution to General Revenues.	Transferred to Railway Reserve Fund. †	Total Gain or loss. *
	Rs.	Rs.	Rs.
1925-26	5,49,00,000	3,79,00,000	9,28,00,000
1926-27	6,01,00,000	1,49,00,000	7,50,00,000
1927-28	6,28,00,000	4,57,00,000	10,85,00,000

1943-44	37,64,00,000	13,20,00,000	50,84,00,000
1944-45	32,00,00,000	17,88,47,209	49,88,47,209

† Figures preceded by a — indicate a withdrawal from the Railway Reserve Fund.

\* Figures preceded by a — indicate a loss.

1933-34 is the first year to show some signs of recovery since the depression: The earnings of the State-owned lines increased from Rs. 84 crores in 1932-33 to Rs. 86 crores in 1933-34 and to Rs. 95.48 crores in 1936-37; but the net result of the year's working showed a gain of Rs. 121 lakhs.

### Contracts Revised.

One factor which helped to improve the financial position was the revision of the original contracts under which the guaranteed lines were constructed. The five per cent. dividend guaranteed at 22½ per rupee, and the half-yearly settlements made these companies a drain on the State at a time when their stock was at a high premium. The first contract to fall in was the East Indian; the great line connecting Calcutta with Delhi and the Northern provinces. When the contract lapsed, the Government exercised their right of purchasing the line, paying the purchase-money in the form of terminable annuities, derived from revenue, carrying with them a sinking fund for the redemption of capital. The railway thus became a State line; but it was released to the Company which actually worked it. Under these new conditions the East Indian Railway Company brought to the State in the ten years ended 1909 after meeting all charges, including the payments on account of the terminable annuity by means of which the purchase of the line was made, and interest of all capital outlay subsequent to the date on purchase; a clear profit of nearly ten millions. No other railway shows results quite equal to the East Indian, because, in addition to serving a rich country by an easy line, it possesses its own collieries and enjoys cheap coal. But with allowance for these factors, all the other guaranteed companies which have been acquired under similar conditions as their contracts expired, have proportionately swelled the revenue and assets of the State. It is difficult to estimate the amount which must be added to the capital debt of the Indian railways in order to counterbalance the loss during the period when the revenue did not meet the interest charges. According to one estimate it should be £50 million. But even if that figure be taken, the Government have a magnificent asset in their railway property.

### Improving Open Lines.

These changes induced a corresponding change in Indian Railway policy. Up to 1900 the great work had been the provision of trunk lines. But with the completion of the Nagda-Muttra line, providing an alternative broad-gauge route from Bombay to Delhi through Eastern Rajputana, the trunk system was virtually complete. A direct broad-gauge route from Bombay to Sind is needed, but the poor commercial prospects of the line and the opposition of the Rao of Cutch to any through line in his territories, has for some time kept this scheme in the background.

There does not exist any through rail connection between India and Burma, although several routes have been surveyed: the mountainous character of the region to be traversed, and the easy means of communication with Burma by sea, rob this scheme of any living importance. Further survey work was undertaken between 1914 and 1920, the three routes to be surveyed being the coast route, the Manipur route, and the Hukong valley route. The metre-gauge systems of Northern and Southern India will also probably one day be connected and Karachi given direct broad-gauge

connection with Delhi, a project that has been investigated more than once but cannot at present be financially justified. These works are, however, subordinate to the necessity for bringing the open lines up to their traffic requirements and providing them with feeders. The sudden increase in the trade of India found the main lines totally unprepared. Costly works were necessary to double lines, improve the equipment, provide new and better yards and terminal facilities and to increase the rolling stock. Consequently the demands on the open lines altogether overshadowed the provision of new lines. Even then the railway budget was found totally inadequate for the purpose, and a small Committee sat in London; under the chairmanship of Lord Inchcape; to consider ways and means. This Committee found that the amount which could be remuneratively spent on railway construction in India was limited only by the capacity of the money market. They fixed the annual allotment at £12,000,000 a year. Even this reduced sum could not always be provided.

### Government Control and Re-organisation of Railway Board.

As the original contracts carried a definite Government guarantee of interest, it was necessary for Government to exercise strong supervision and control over the expenditure during construction, and over management and expenditure after the lines were open for traffic. For these purposes a staff of Consulting Engineers was formed, and a whole system of checks and counterchecks established, leading up to the Railway Branch of the Public Works Department of the Government of India. As traffic developed, the Indian Railways outgrew this dry nursing, and when the original contracts expired, and the interests of Government and the Companies synchronised, it became not only vexatious but unnecessary. Accordingly in 1901-02 Mr. Thomas Robertson was deputed by the Secretary of State to examine the whole question of the organization and working of the Indian Railways, and he recommended that the existing system should be replaced by a Railway Board, consisting of a Chairman and two members with a Secretary. The Board was formally constituted in March 1905. The Board was made subordinate to the Government of India in which it was represented by the Department of Commerce and Industry. It prepared the railway programme of expenditure and considered the greater questions of policy and economy affecting all the lines. Its administrative duties included the construction of new lines by State agency, the carrying out of new works on open lines, the improvement of railway management with regard both to economy and public convenience, the arrangements for through traffic, the settlement of disputes between lines, the control and promotion of the staff on State lines, and the general supervision over the working and expenditure of the Company's lines. Certain minor changes have taken place from time to time since the constitution of the Railway Board. In 1908, to meet the complaint that the Board was subjected to excessive control by the Department of Commerce and Industry, the powers of the Chairman were increased and he was

given the status of a Secretary to Government with the right of independent access to the Viceroy; he usually sat in the Imperial Legislative Council as the representative of the Railway interest. In 1912 in consequence of complaints of the excessive interference of the Board with the Companies, an informal mission was undertaken by Lord Inchcape to reconcile differences. Various changes were introduced during the years 1912-1920 such as the modification of the rule that the President and members of the Railway Board should all be men of large experience in the working of railways due to the importance of financial and commercial considerations in connection with the control of Indian Railway policy. This decision was, however, revised in 1920 and an additional appointment of Financial Adviser to the Railway Board created instead. The question of the most suitable organization was further fully examined by the Acworth Committee in 1921 and a revised organization which is described later was introduced from 1st April 1924.

Some of the difficulties involved in the constitution of a controlling authority for the railways of India may be realized from a study of the "Notes on the Relation of the Government to Railways in India" which was being printed as appendix 'B' to Volume I of the Annual Report by the Railway Board on Indian Railways upto the Report for the year 1938-39. These notes bring out the great diversity of conditions prevailing which involve the Railway Department in the exercise of the functions of—

(a) the directly controlling authority of the State-worked systems aggregating 21,356 miles on the 31st March 1943,

(b) the representative of the predominant owning partner in systems aggregating 19,169 miles,

(c) the guarantor of many of the smaller companies and

(d) the statutory authority over all railways in India.

Moreover in all questions relating to railways or extra municipal tramways in which Provincial Governments are concerned, the Railway Department is called upon to watch the interests of the Central Government and is frequently asked to advise the Local Governments. Its duties do not end there. The future development of railways depends largely on the Government of India and the Railway Department is therefore called upon to plan out schemes of development, to investigate and survey new lines and to arrange for financing their construction. The evolution of a satisfactory authority for the administration of these varied functions has proved extremely difficult and the question was one of those referred to the Railway Committee (1920-21) presided over by Sir William Acworth who recommended the early appointment of a Chief Commissioner of Railways whose first duty should be to prepare a definite scheme for the reorganization of the Railway Department and Mr. C. D. M. Hindley, formerly Agent of the East Indian Railway and Chairman of the Calcutta Port Trust, was appointed Chief Commissioner on November 1st, 1922;

The principal constitutional change involved in this appointment is that the Chief Commissioner who takes the place of the President of the

Railway Board is solely responsible—under the Government of India—for arriving at decisions on technical matters and for advising the Government of India on matters of railway policy and is not, as was the President, subject to be out-voted and over-ruled by his colleagues on the Board. The detailed re-organization of the Railway Board in accordance with the Chief Commissioner's proposals required careful consideration but one of the most important of his recommendations namely the appointment of a Financial Commissioner was considered of particular urgency and the Secretary of State's sanction was therefore obtained to the appointment with effect from 1st April 1923. The Railway Board as then reconstituted consisted of the Chief Commissioner, the Financial Commissioner and two members. The proposal of the Acworth Committee that the Indian Railways should be sub-divided into 3 territorial divisions with a Commissioner in-charge of each was not accepted and the work of the Members of the Board was divided on the basis of subjects.

The reorganization carried out in 1924 had for one of its principal objects the relief to the Chief Commissioner and the Members from all but important work so as to enable them to devote their attention to larger questions of railway policy and to enable them to keep in touch with Local Governments, railway administrations and public bodies by touring to a greater extent than they had been able to do in the past.

This object was effected by the following new posts which in some cases supplemented the existing ones and in other cases replaced them. Directors of Civil Engineering, Mechanical Engineering, Traffic, Establishment and Finance and 11 Deputy Directors and 2 Assistant Directors working under them.

The necessity of some central organisation to co-ordinate the publicity carried out on railways and to undertake work on the many forms of railway publicity which can be best organised by one central body led to the inauguration of the Central Publicity Bureau under a Chief Publicity Officer in 1927. The Bureau was a great success and the organisation was made permanent from January 1st, 1929. In the slump of the 4th decade of the present century, however, it was found difficult to maintain this. Moreover when the war of 1939 came on, it had its own effects. The Central Publicity Bureau was ultimately shifted to Calcutta on the 1st July, 1940, and amalgamated with the Publicity Offices of the East Indian and Eastern Bengal now the B. & A. Railways.

The growing importance of Labour questions necessitated the organisation of a new branch in the Railway Board's office and to the appointment in 1929 of a third member whose main duties are connected with the satisfactory solution of labour problems and the improvements of the conditions of service of the staff generally and of the lower paid employees in particular.

During the depression which began with the 'thirties it was decided to hold in abeyance many superior posts including those of Member, Traffic, Member, Engineering; Director, Civil Engineering and Director, Mechanical Engineering. Some of these posts have since been

## Railway Conference.

694

revival and on the recommendations of the Indian Railway Enquiry Committee—presided over by Sir Ralph Wedgwood—the Central Accounts organisation of railways was taken over by the Railway Board. The present superior staff in the railway Board, therefore, consists of the Chief Commissioner, the Financial Commissioner, 2 Members, 6 Directors, a Secretary and 15 deputies and assistants.

Under the Railway Board's policy of progressive standardisation, a Central Standardisation Office was established in 1930 under a Chief Controller of Standardisation to provide the means whereby such standardisation would be progressively effected in accordance with changing conditions and as the result of practical experience. The technical Officer under the Railway Board was transferred to this office as a Deputy Controller. This office was made permanent in 1935.

The question of transferring the supervision of railway accounts of State Railways from the Finance Department to the Railway Board was under consideration for some time and in accordance with a resolution adopted, by the Legislative Assembly in September 1925, a start was made with the transfer of the supervision of railway accounts on the East Indian Railway. At the same time a separate Audit Staff was appointed reporting directly to the Auditor-General. As it was found that the reparation of Audit from Accounts led to greater efficiency, a similar organisation was introduced on other State railways during 1929. The supervision of State railways was placed under a Controller

traffic interchanged between State-managed Railways. The work of the different railways was gradually transferred to this office, the North Western Railway being taken over first on the 1st January 1927, the East Indian Railway following on the 1st April, the Eastern Bengal Railway on the 1st January 1928, and the Great Indian Peninsula and B. B. & C. I. Rlys. later.

During 1927-28 demonstrations explaining the Clearing Accounts Office procedure were given to the representatives of the Press as well as to the representatives of the various railways who visited the office to study the new procedure.

### The Railway Conference.

In order to facilitate the adjustment of domestic questions, the Railway Conference was instituted in 1876. This Conference was consolidated into a permanent body in 1903 under the title of the Indian Railway Conference Association. It is under the direct control of the railways, it elects a President from amongst the members, and has done much useful work.

### The Indian Gauges.

The standard gauge for India is five feet six inches. When construction was started the broad-gauge school was strong, and it was thought advisable to have a broad-gauge in order to resist the influence of cyclones. But in 1870, when the State system was adopted it was decided to find a more economical gauge; for the open lines had cost £17,000 a mile. After much deliberation, the metre-gauge of 2 feet 3½ inches was adopted, because of its intention

great bulk of the railway mileage in India have been the subject of discussion in official circles and the public press for many years. In India the question is complicated by the fact that the more important companies have not in recent years been the owners of the railways which they manage and the headquarters of their Boards are in London. The subject was one, perhaps the most important, of the terms of reference of the Acworth Railway Committee. That Committee was unfortunately, unable to make a unanimous recommendation on this point, their members being equally divided in favour of State management and Company management. They were, however, unanimous in recommending that the present system of management by Boards of Directors in London should not be extended beyond the terms of the existing contracts and this recommendation has met with general public acceptance. During the year 1922-23, the question was again referred to certain Local Governments and public bodies and opinions collected and discussed.

The subject has also been discussed on many occasions in the Central Legislature. The Government of India have, however, been following a uniform policy of increasing the scope of direct State-management. The East Indian Railway was taken over for State-management from 1st January, 1925, and since then the policy has been continued, the latest additions to state-management being the Bengal and North Western and Rohilkund and Kumaon Railway which were taken over from the 1st January 1943. From the same date the two were amalgamated and the combined system named as the Oudh and Tirhut Railway.

At the end of 1929-30 the Nizam's Guaranteed State Railways system which was the property of the Company, was acquired and its management taken over by His Exalted Highness the Nizam's Government and is now known as His Exalted Highness the Nizam's State Railway.

**Separation of the Railway from the General Finances.**—The question of the separation of the railway from the general finances was under consideration for some time and as a result of the recommendations of the Acworth Committee in 1921, the question was further examined by the Railway Finance Committee and the Legislative Assembly but it was decided to postpone a definite decision for the present.

The question was examined afresh in connection with the recommendation of the Retrenchment Committee in 1923, that the railways in India should be so worked as to yield an average return of at least 5½ per cent. on the capital at charge and it was decided that a suitable time had arrived when this separation could be carried out. A resolution was accordingly introduced in the Assembly on the 3rd March 1924, recommending to the Governor-General in Council:—that in order to relieve the general budget from the violent fluctuations caused by the incorporation therein of the railway estimates and to enable the railway to carry out a continuous railway policy based on the necessity of making a definite return over a period of years

to the State on the Capital expended on railways:—

(1) The railway finances shall be separated from the general finances of the country and the general revenues shall receive a definite annual contribution from railways which shall be the first charge on railway earnings.

(2) The contribution shall be a sum equal to five-sixths of 1 per cent. on the capital at charge of the railways (excluding capital contributed by Companies and Indian States and Capital expenditure on strategic Railways) at the end of the penultimate financial year plus one-fifth of any surplus profits remaining after payment of this fixed return, subject to the condition that if any year railway revenues are insufficient to provide the percentage of five-sixths of 1 per cent. on the capital at charges surplus profits in the next or subsequent years, will not be deemed to have accrued for purposes of division until such deficiency has been made good. From the contribution so fixed will be deducted the loss in working, and the interest on capital expenditure on strategic lines.

(3) Any surplus profits that exist after payment of these charges shall be available for the Railway administration to be utilised in—

(a) forming reserves for,

(i) equalising dividends, that is to say, of securing the payment of the percentage contribution to the general revenues in lean years,

(ii) depreciation,

(iii) writing down and writing off capital,

(b) the improvement of services rendered to the public,

(c) the reduction of rates.

(4) The railway administration shall be entitled, subject to such conditions as may be described by the Government of India, to borrow temporarily from capital or from the reserves for the purpose of meeting expenditure for which there is no provision or insufficient provision in the revenue budget subject to the obligation to make repayment of borrowings out of the revenue budgets of subsequent years.

(5) In accordance with present practice the figures of gross receipts and expenditure of railways will be included in the Budget Statement. The proposed expenditure will, as at present, be placed before the Legislative Assembly in the form of a demand for grants and on a separate day or days among the days allotted for the discussion of the demands for grants the Member in charge of the Railways will make a general statement on railway accounts and working. Any reductions in the demand for grants for railways resulting from the votes of the Legislative Assembly will not ensure to general revenues, i.e., will not have the effect of increasing the fixed contribution for the year.

(6) The Railway Department will place the estimate of railway expenditure before the Standing Finance Committee for Railways on some date prior to the date for the discussion of the demand for grants for railways.

This resolution was examined by the Committee appointed by the Legislative Assembly on 3rd March 1924 to examine the proposals for the separation of railway from general finances. The final resolution agreed to by the Assembly on September 20th, 1924, and accepted by Government differed from the original resolution in that the yearly contribution had been fixed at 1 per cent. instead of 5/6th per cent. on the capital at charge and if the surplus remaining after this payment to General Revenues should exceed 3 crores, only 1rd of the excess over 3 crores were to be transferred to the Railway Reserve and the remaining 2rd was to accrue to General Revenues. At the same time a Standing Finance Committee for Railways was to be constituted to examine the estimate of railways expenditure and the demand for grants, the programme revenue expenditure being shown under a depreciation fund. This committee was to consist of one nominated official member of the Legislative Assembly as Chairman and 11 members elected by the Legislative Assembly from that body. This would be in addition to the Central Advisory Council which will include the Members of the Standing Finance Committee and certain other official and non-official members from the Legislative Assembly and Council of State. These arrangements were to be subject to periodic revision but to be provisionally tried for at least 3 years. They would, however, only hold good as long as the E. I. Railway and the G. I. P. Railway and existing State Managed Railways remain under State-management and if any contract for the transfer of any of the above to Company management was concluded against the advice of the Assembly, the Assembly would be at liberty to terminate the arrangement.

adopted the Divisional organisation. It is also being adopted by some railways where the general organisation is still on the Departmental basis.

#### The Pope Committee.

When the railway finances were in a bad way, a Committee under the chairmanship of Mr. F. A. Pope, General Executive Assistant to the President of the L. M. S. Railway, was formed to investigate and inaugurate a detailed analysis of every important achievement of railway operation. The Committee started work during 1932-33 and among other things, perfected a system of detailed investigation into individual items of railway working which came to be known as 'Job Analysis.'

Mr. Pope returned to India in 1933-34 and prepared a second report based upon the progress of the work and on further possibilities of economy.

The most important recommendations of Mr. Pope's second report related to:—

1. Intensive use of locomotives.
2. Intensive use of coaching stock.
3. Intensive use of machinery and plant.
4. Disposal of Uneconomical wagons.
5. Combining resources between railways.
6. Handling and transport of smalls traffic and of traffic to be transhipped at break of gauge stations.
7. Ticketless travel.
8. Methods of increasing earnings.

The report was submitted in June 1937 and duly considered by the Railway Board. Early action was taken to implement such of the recommendations as could be accepted without further examination. Where special investigation was considered necessary this was arranged for.

#### Rates Advisory Committee.

The Railway Rates Advisory Committee continued during the year 1942-43 with Khwaja Sir Mohamed Noor as its President.

The functions of the Committee are to investigate and make recommendations on:—

- (1) Complaints of "undue preference"—Section 42(A) of the Indian Railways Act;
- (2) Complaints that rates are unreasonable in themselves;
- (3) Complaints or disputes in respect of terminals—Section 46 of the Indian Railways Act;
- (4) Complaints in respect of conditions as to packing of articles specially liable to damage in transit or liable to cause damage to other merchandise;

- (5) Complaints in respect of conditions as to packing attached to a rate; and

- (6) Complaints that railways do not fulfil their obligations to provide reasonable facilities under Section 42(3) of the Indian Railways Act.

#### Closer Contact with the Public.

The closest possible contact between the Railways and the business community was maintained by means of the Central and Local Advisory Committees, which were first introduced in 1923, meetings with Chambers of Commerce, Trade Associations and personal contact by railway officers with business firms.

#### Inauguration of the Main Line Electric Service, G. I. P. Railway.

The inauguration of the electrified main line section of the G. I. P. Railway from Kalyan to Poona took place on the 5th November 1929, and constituted the first entirely main line of track to be electrified in India. This scheme involved the elimination of the Dhore Ghat Reversing Station.

## All Railways.

**Open Mileage.**—The total route mileage on 31st March 1944, was made up of—

Broad-gauge .. ..	20,673.61 miles.
Metro-gauge .. ..	16,008.10 "
Narrow-gauge .. ..	3,827.62 "

Under the classification adopted for statistical purposes, this mileage is divided between the three classes of railways as follows:—

Class I .. ..	36,795.13 miles.
Class II .. ..	2,652.23 "
Class III .. ..	1,061.90 "

During the year 1944-45 Khargpur subsidiary yard and avoiding lines (14.98) miles, a section of Bengal Nagpur Railway and Jam-Wanthal—Kalawad 16.02 miles, a section of Jammagar-Dwarka Railway were under construction.

**Output of Railway-owned Collieries.**—The output of Railway owned collieries during 1944-45 was 2,946,299 tons. This represents an increase of 17 per cent over the output of 1931-32.

During the year 1944-45, the output of Railway Collieries represents 32 per cent of the total coal consumed on locomotives on Indian Railways.

**Number of Staff.**—The total number of employees on Indian Railways at the end of the year 1944-45 was 9,62,009 as compared with 701,307 at the end of 1938-39. The following table shows the number of employees by Communities on 31st March 1936, 1937, 1938, 1939, 1940, 1941, 1942, 1943, 1944 and 1945 :—

1945	1,634	680,327	230,429	12,284	9,725	23,388	4,222

\* Revised figures : Due to changes made by the Railway administration in the figures published last year.

**Indianisation.**—Superior services, following the recommendation of the Lee Commission that recruitment in India be advanced as soon as practicable up to 75 per cent of the total number of vacancies in the Superior Services of the Railways, the various Railway Companies of India, other railway lines followed the same principle. As far as concerns State Railways, the direct recruitment during the year included no European while 57 Indians were appointed.

**Accidents.**—The following table shows the number of passengers, railway servants and other persons killed and injured in accidents on Indian Railways, excluding casualties in railway workshops, during the year 1944-45 as compared with the previous year:—

Cause.	Killed.		Injured.	
	1943-44.	1944-45.	1943-44.	1944-45.
<i>A.—Passengers.</i>				
In accidents to trains, rolling-stock, permanent way, etc. ..	170	40	493	234
In accidents caused by movements of railway vehicles exclusive of accidents to trains ..	539	664	2,101	2,346
In accidents on railway premises not connected with the movement of railway vehicles.. ..	..	2	33	56
Total ..	709	706	2,627	2,636
<i>B.—Railway servants.</i>				
In accidents to trains, rolling-stock, permanent way, etc. ..	33	46	163	183

In accidents on railway premises not connected with the movement of railway vehicles ..	31	27	171	136
Total ..	3,295	3,170	1,506	1,586
Grand Total ..	4,373	4,239	26,510	27,774

**Amenities for Passengers.**—Railway administration in peace time are constantly endeavouring to make railway travel, especially in the lower classes, more comfortable and the amenities afforded by the railways are a large and varied group of facilities by setting up offices and out-agencies, provision of clean and adequate accommodation in trains, avoidance of overcrowding, arrangements for the vending of wholesome refreshments at reasonable rates in railway premises and trains, amenities to the public waiting at stations in the shape of waiting rooms

and covered platforms and measures for ensuring the security of women passengers are some of the main directions in which progress continues to be made from year to year. But both by the size and scale of arrangements required and its primary necessity to the passenger, the most important of all is the adequate supply of wholesome drinking water to the travelling public, particularly in the hot weather season, for which, in addition to the existing permanent arrangements, a hot weather (special) establishment is drafted every year.

## THE CHIEF RAILWAYS IN INDIA.

### Bengal Assam.

The Assam-Bengal Railway; which is constructed on the metre-gauge, starts from Chittagong and runs through Surma Valley across the North Cachar Hills into Assam. It was worked under a limited guarantee by a company.

The Eastern Bengal Railway was promoted under the original form of guarantee and was constructed on the broad-gauge. The first portion of the line running to Calcutta over the Ganges was opened in 1862. In 1874 sanction was granted for the construction on the metre-gauge of the Northern Bengal State Railway; which ran from the north bank of the Ganges to the foot of the Himalayas on the way to Darjeeling. These two portions of the line were amalgamated in 1884 into one State Railway.

The Assam Bengal Railway has come under State management and has been amalgamated with the E. B. Rly. with effect from 1st January, 1942 and the combined system is named as Bengal Assam Railway.

### Bengal-Nagpur.

The Bengal-Nagpur Railway was commenced as a metre-gauge from Nagpur to Chhatisgarh in the Central Provinces in 1887. A company was formed under a guarantee which took over the line, converted it to the broad-gauge and extended it to Howrah, Cuttack and Katni. In 1901 a part of the East Coast State Railway from Cuttack to Vizagapatam was transferred to it and in the same year sanction was given for an extension to the coal-fields and for a connection with the Branch of the East Indian Railway at Hariharpur.

The State took over the line from October 1, 1944.

### Bombay, Baroda and Central India.

The Bombay Baroda and Central India Railway is one of the original guaranteed railways. It was commenced from Surat via Baroda to Ahmedabad, but was subsequently extended to Bombay. The original contract was terminable in 1880, but the period was extended to 1905; and then renewed under revised conditions. In 1885 the Rajputana-Malwa metre-gauge system of State railways was leased to the Company and has since been incorporated in it. On the opening of the Nagda-Muttra, giving broad-gauge connection through Eastern Rajputana with Delhi the working was entrusted to this Company. On the acquisition of the Company in April 1907 the purchase price was fixed at £11,685,581.

The State has taken over the management with effect from January 1st, 1942.

### East Indian.

The East Indian Railway is one of the three railways sanctioned for construction as experimental lines under the old form of guarantee. The first section from Howrah to Pandua was opened in 1854 and at the time of the Mutiny ran as far as Raniganj. It gives the only direct access to the port of Calcutta from Northern India and is consequently fed by all the large railway systems connected with it. In 1880 the Government purchased the line, paying the shareholder by annuities; but leased it again to the company to work under a contract which was terminable in 1919.

The contract was not terminated until January 1st, 1925, when the State took over the management. From July 1st, 1925, the Oudh & Rohilkhand Railway was amalgamated with it.

### Great Indian Peninsula.

The Great Indian Peninsula Railway is the earliest line undertaken in India. It was promoted by a Company under a guarantee of 5 per cent. and the first section from Bombay to Thana was open for traffic in 1853. Sanction was given for the extension of this line via Poona to Raichur, where it connects with the Madras Railway, and to Jubbulpore where it meets the East Indian Railway. The feature of the line is the passage of the Western Ghats, these sections being 15½ miles on the Bhor Ghat and 9½ miles on the Thul Ghat which rise 1,131 and 972 feet. In 1900, the contract with the Government terminated and under an arrangement with the Indian Midland Railway that line was amalgamated and leased to a Company to work.

The contract was terminated on June 30th, 1925, when the State took over the management.

### Madras and Southern Mahratta Railway.

The Madras Railway was the third of the original railways constructed as experimental lines under the old form of guarantee. It was projected to run in a north-westerly direction in connection with the Great Indian Peninsula

Railway and in a south-westerly direction to Calcutt. On the expiry of the contract in 1907 the line was amalgamated with the Southern Mahratta Railway Company; a system on the metre-gauge built to meet the famine conditions in the Southern Mahratta Country and re-leased to a large Company called the Madras and Southern Mahratta Railway Company.

The contract was terminated and it was decided to bring the railway under State management on the 1st April, 1944.

Net earnings .. Rs.	5,26,80,000
Earnings per cent. .. ..	9.36%

#### North-Western.

The North-Western Railway began its existence at the Sind-Punjab-Delhi Railway, which was promoted by a Company under the original form of guarantee and extended to Delhi, Multan and Lahore and from Karachi to Kotri. The interval between Kotri and Multan was unbridged and the railway traffic was exchanged by a ferry service. In 1871-72 sanction was given for the connection of this by the Indus Valley State Railways and at the same time the Punjab Northern State Railway from Lahore towards Peshawar was begun. In 1886 the Sind-Punjab-Delhi Railway was acquired by the State and amalgamated with these two railways under the name of the North-Western Railway. It is the longest railway in India under one administration.

Earnings per cent. .. ..	9.82%

#### Oudh Tirhut.

The Bengal and North-Western Railway was constructed on the metre-gauge system by a company without any Government assistance other than free land and was opened to traffic in 1885. The system was begun in 1874 as the Tirhut State Railway. In 1890 this line was leased by Government to the Bengal and North-Western Railway. Since then extensive additions have been made in both sections. It is connected with the Rajputana metre-gauge system at Cawnpore and with the Bengal and Assam Railway at Katihar and the East Indian Railway at Benares and Mokameh Ghat.

The Rohilkund and Kumaon Railway was constructed on the metre-gauge and opened for traffic in 1884. Later on extensions were added between 1906 and 1916.

The Bengal and North Western and the Rohilkund and Kumaon Railway have come under State-management from 1st January 1943. From the same date the two were amalgamated and the combined system is named as Oudh Tirhut Railway.

Mileage open .. ..	2,683.94
Capital at charge .. Rs.	23,56,09,000
Net earnings .. Rs.	81,40,000
Earnings per cent. .. ..	2.85%

#### South Indian.

The South Indian Railway was one of the original guaranteed railways. It was begun by the Great Southern India Railway Company as a broad-gauge line; but was converted after the seventies to the metre-gauge. This line has been extended and now serves the whole of the Southern India, south of the south-west line of the Madras Railway. Between Tuticorin and Ceylon a ferry service was formerly maintained, but a new and more direct route to Ceylon via Rameshwaram was opened at the beginning of 1914. As the original contract ended in 1907, a new contract was entered upon with the Company on the 1st of January 1908.

The contract was terminated on 1st April, 1944, when the State took over the management.

Mileage open .. ..	2,340.25
Capital at charge .. Rs.	48,56,08,000
Net earnings .. Rs.	4,08,54,000

#### The Indian States.

The principal Indian State Railways are the following:—

##### Bikaner State.

The line is owned by the Bikaner Government. It was worked by the Jodhpur-Bikaner Railway Administration upto 31-10-1924, when it was taken over by the Bikaner Government.

Mileage open .. ..	883.05
--------------------	--------

##### Jodhpur.

The railway, which was worked by the Jodhpur-Bikaner Railway Administration upto 31-10-1924, is now worked by the Jodhpur Durbar. At present the Railway consists of 318.74 miles of British section and 806.95 miles of Durbar lines.

Total mileage open .. ..	1,125.69
--------------------------	----------

##### Mysore State.

These lines are the property of the Mysore Government. Of the 9 lines 5 sections were worked by the Madras & Southern Mahratta Railway. Of these 3 lines were taken over by the Mysore Government from 1-10-1919 and the other two from 1-1-1938. It consists of 609.47 miles of metre-gauge and 128.80 miles of narrow-gauge lines.

Total mileage open .. ..	738.27
--------------------------	--------

##### H. E. H. The Nizam's State.

The Railway was constructed by a company under a guarantee from the Hyderabad State, which took over the management from 1-4-1930. It consists of 57.82 miles of British sections and 1302.16 miles of Hyderabad State lines.

Total mileage open .. ..	1,359.98
--------------------------	----------

## INDIA AND CEYLON.

The possibility of connecting India and Ceylon by a railway across the bank of sand extending the whole way from Rameswaram to Mannar has been reported on from time to time, and since 1895 various schemes have been suggested.

The South Indian Railway having been extended to Dhanushkodi, the southernmost point of Rameswaram Island, and the Ceylon Government Railway to Talaimannar, on Mannar Island, two points distant from each other about 20 miles across a narrow and shallow strait, the possibility of connecting these two terminal stations by a railway constructed on a solid embankment raised on the sand bank known as "Adam's Bridge," to supersede the ferry steamer service which has been established between these two points, is one of the schemes that has been investigated.

In 1913, a detailed survey was made by the South Indian Railway Company, and the project contemplates the construction of a causeway from Dhanushkodi Point on the Indian side to Talaimannar Point on the Ceylon side, a length of 20.05 miles of which 7.19 will be upon the dry land of the various lands, and 12.86 will be in water. The sections on dry land will consist of low banks of sand pitched with coral and present no difficulty. The section through the sea will be carried on a causeway which it is proposed to construct in the following way. A double row of reinforced concrete piles, pitched at 10 feet centres and having their inner faces 14 feet apart, will first be driven into the sand. These piles will then be braced together longitudinally with light concrete arches and chains and transversely with concrete ties, struts and chains. Behind the piles slabs of reinforced concrete will be slipped into position, the bottom slabs being sunk well into the sand of the sea bottom. Lastly, the space enclosed by the slabs will be filled in with sand.

The top of the concrete work will be carried to six feet above high water level, and the rails will be laid at that level. The sinking of the piles and slabs will be done by means of water jets. This causeway, it is expected, will cause the suspended sand brought up by the currents, to settle on either side bringing about rapid accretion and eventually making one big island of Rameswaram island and Mannar island.

## Indo-Burma Connection.

The raids of the Emden in the Bay of Bengal in 1914, and the temporary interruption of communications between India and Burma, stimulated the demand for a direct railway connection between India and Burma. Government accepted the position and appointed Mr. Richards, M. Inst. C.E., to be the engineer-in-charge of the surveys to determine the best route for a railway from India to Burma. The

coast route appears to be the best one but at present would not be remunerative. This would start from Chittagong, which is the terminus and headquarters of the Assam-Bengal Railway and a seaport for the produce of Assam. The route runs southwards through the Chittagong district, a land of fertile rice fields intersected by big rivers and tidal creeks and it crosses the Indo-Burma frontier, 94 miles from the town of Chittagong. For about 160 miles further it chiefly runs through the fertile rice lands of Arrakan and crosses all the big tidal rivers of the Akyab delta. These include the Kalidan river which drains 4,700 miles of country and even at a distance of about 30 miles from its mouth is more than half a mile wide. About 260 miles from Chittagong the railway would run into the region of mangrove swamps which fringe the seacoast north and south of the harbour of Kawkphu stretching out into the mangrove swamps like ribs from the backbone. Innumerable spurs of the Arrakan Yoma have to be crossed. Yoma is a mountain ridge which extends from Cape Negrais northwards until it loses itself in a mass of tangled hills east of Akyab and Chittagong. At its southern end the height of the ridge is insignificant but it has peaks as high as 4,000 feet before it reaches the altitude of Sandway and further north it rises much higher. It is a formidable obstacle to railway communication between India and Burma. This route is estimated to cost about £7,000,000 and would have to be supplemented by branch lines to Akyab where there is at present a considerable rice traffic and the cost of this would have to be added to the £7,000,000 already referred to.

The other routes examined have been the Hukong Valley route and the Manipur route which were surveyed by the late Mr. R. A. Way many years ago. The Manipur route was estimated to cost about £5,000,000 as it has to cross three main ranges of hills with summit levels of 2,650, 3,600 and 8,900 feet. Altogether there would be about four miles of tunnelling through the three main ridges and through other hills and more than 100 miles of expensive undulating railway with grades as steep as 1 in 50 and 11,000 feet of aggregate rise and fall. The Hukong Valley route is only about 284 miles long and it presents fewer engineering difficulties than either the Coast or the Manipur route. One hundred and fifty miles of this route lie in open country capable of cultivation though at present it is only very thinly populated. Only one range of hills has to be crossed and this can be negotiated with a summit tunnel 5,000 feet long at a height of 2,500 feet. There are less than fifty miles of very heavy work and only about 4,500 ft. aggregate of rise and fall. The Hukong Valley route although cheaper than the Manipur route is not a practical financial proposition.

\$ Revised figures.

The publication of statistics regarding India's mineral production has been discontinued since the outbreak of the war as a war-measure. But the demands made by the war has resulted in a substantial increase in the mineral output. 92,694 workers were employed in mines in British India in 1943 as compared with 55,123 in 1939, the corresponding figures for Indian States being 6,583 and 5,090. The total value of Minerals produced in the country during 1937 and 1938 (which are the latest available) is as under :—

## COAL.

Most of the coal raised in India comes from the Bengal and Bihar and Orissa—Gondwana coal-fields. Outside Bengal and Bihar and Orissa the most important mines are those at Singareni in Hyderabad, and in Central Provinces but there are a number of smaller mines which have been worked at one time or another.

Provincial production of Coal during the years 1937 and 1938 (which are the latest statistics available).

		3 1 11		3 12 1

In 1938 the total production of Indian Coal rose to 28,342,906 tons or 3,306,622 tons (13.2 per cent.) increase on the output of the previous year and is thus the highest figure yet recorded. In the years 1931, 1932 and 1933 there was a continuous decrease in production of coal from the peak figure of 23,803,048 tons in 1930. In 1934 the direction of change was reversed and production increased by 2,268,284 tons (or 11.4 per cent.) from 19,789,163 tons in 1933 to 22,057,447 tons in 1934. In 1935 the increase continued but at a less rate by 959,248 tons (or 4.3 per cent.) to 23,016,695 tons. In 1936 there was again a decrease by 405,874 tons (1.8 per cent.) to 22,610,821 tons, followed in 1937 by an increase of 2,425,565 tons (10.7 per cent.) to 25,036,386 the highest output till then, but which has now been greatly exceeded. This increase was shared by all provinces except Orissa, which showed a slight decrease.

The increased output of 13.2 per cent. in 1938 was accompanied by an increase of 36.2 per cent. in the total value of the coal produced in India to Rs. 10,64,23,835 (£7,942,077) in 1938, from Rs. 7,81,02,439 (£5,872,364) in 1937.

There was also an increase of 10 annas 2 pies in the pit's month value per ton of coal for India as a whole, namely from Rs. 3-1-11 to Rs. 3-12-1. This increase in value was recorded from all provinces without any exceptions. In opposition

to the trend of 1931, 1935 and 1936, the exports of coal from India in 1937 have more than doubled as compared with 1936, deducting Burma's share. Since the separation of Burma on the 1st April, 1937, it appears in these statistics as a foreign country, and in 9 months it has taken a little more than Ceylon did in the year.

The average number of persons employed in the coalfields during the year showed an increase of 16.5 per cent. The average output per person employed showed a decrease from the high figure of 130.2 tons in 1934, which is practically the same as the figure for 1929, namely 130.4 tons, the highest figure recorded, to 124.92 tons in 1938 which is less than the figure 128.59 for 1937. The figures for the last nine years average higher than those previously recorded; these higher figures are partly due to an increased use of mechanical coal-cutters, and partly to concentration of work. During recent years a large number of collieries have been shut down and the labour absorbed in the remainder; this concentration permits of a proportional reduction of the supervising staff, resulting in a larger tonnage per head. The fall in output per person employed in 1938 is of course due to increased employment.

There was a decrease in the number of deaths by accident from 274 in 1935, 435 in 1936, to 213 in 1937 but the number increased to 338

due to accidents in Bengal, Bihar and Hyderabad in 1938. In 1935 there were three major accidents, at Loyabad and Bagdigi collieries in the Jharla coalfield and at Kurhurbare colliery in the Giridih coalfield, in which 11, 19 and 62 lives, respectively, were lost; in 1936 there were two, at Poidih in the Raniganj field, and Loyabad in the Jharla field, which accounted for 209 and 35 deaths respectively. These figures may be compared

with the annual average for the quinquennium 1919-1923, which was 274, the annual average for the quinquennium 1924-1928, which was 218, and the annual average for 1929-1933, which was 186. The death rate was 1.09 per thousand persons employed in 1937 and 1.49 per thousand in 1938: the average figure for the period 1919-1923 was 1.36 for the period 1924-1928 was 1.16, and for the period 1929-1933 was 1.08.

## IRON ORE.

Bengal and Bihar and Orissa are the only provinces in India in which iron ore is mined for smelting by European methods. Iron smelting, however, was at one time a widespread industry in India and there is hardly a district away from the great alluvial tracts of the Indus, Ganges and Brahmaputra in which slag heaps are not found. The primitive iron smelter finds no difficulty in obtaining sufficient supplies of ore from deposit that no European Ironmaster would regard as worth his serious consideration. Early attempts to introduce European processes for the manufacture of pig-iron and steel were recorded in 1830 in the South Arcot District. Since that date various other attempts have been made but none proved a success before that now in operation near Barakar in Bengal. The site of the Barakar Iron-Works was originally chosen on account of the proximity of both coal and ore supplies. The outcrop of iron stone shales between the coal-bearing Barakar and Raniganj stages stretches east and west from the works, and for many years the clay ironstone nodules obtainable from this formation formed the only supply of ore used in the blast furnaces. Recently magnetite and hematite have been obtained from the Manbhum and Singhbhum districts, and the production from the last-named district has largely replaced the supplies of ore hitherto obtained near the iron-works. The Bengal Iron and Steel Company, Limited, have now given up the use of ores obtained from the neighbourhood of Barakar and Raniganj and are now obtaining most of their ores from the Kolhan Estate, Singhbhum. Some years ago the Bengal Iron and Steel Co., Ltd., secured two deposits of iron-ore in Saranda (Singhbhum) forming parts of two large hill masses known as Notu Buru and Buda Buru respectively. Recent prospecting in this part of Singhbhum has led to the discovery of numerous additional deposits of iron-ore, the extension of which has been traced into Keonjhar and Bonal States in Orissa, a total distance of some 40 miles in a S. S. W. direction. At Pansira Buru, a portion of Notu Buru, the deposit has been opened up, and now feeds the Barakar ironwork. Pansira Buru rises to over 2,500 feet above sea level, the low ground on the west side being at about 1,100 feet above sea-level. The uppermost 400 to 450 feet of this hill has now been opened up, and the workings indicate the existence of a deposit about a quarter of a mile long, perhaps 400 feet thick and proved on the dip for about 500 feet. The ore body appears to be interbedded with the Dharwar slates, from which it is separated by banded hematite-jaspers. The ore itself is high-grade micaceous hematite often lateritised at the outcrop. Cross-cuts into the interior of the deposit show that the hematite becomes very friable not far below the

outcrop. In fact the characteristics of this ore, including the surface lateritisation, are almost exactly reproduced in the iron-ore deposits of Goa and Ratnagiri. The Tata Iron and Steel Company at Sakchi possesses slightly richer and purer ore-bodies in the Raipur district, supplies of ore are at present drawn from the deposits in Mayurbhanj. The ore-deposits have all been found to take the form of roughly lenticular leads or bodies of hematite, with small proportions of magnetite, in close association with granite on the one hand and granitic rocks on the other.

For some years up to and including 1929 the production of iron-ore in India had been steadily increasing; India is now, in fact, the second largest producer in the British Empire, and yields place only to the United Kingdom. Her output is of course still completely dwarfed by the production in the United States (30½ million tons in 1935 and 48½ million tons in 1936) and France (32.3 million tons in both 1935 and 1936); but her reserves of ore are not much less than three-quarters of the estimated total in the United States and there is every hope that India will eventually take a much more important place among the world's producers of iron-ore. From 865,000 tons in 1921, the production of iron ore increased to 2,430, 136 tons in 1929. Then came the depression and the output of iron-ore in India fell to 1,228,625 tons in 1933. In 1934, however, there was a turn of the tide and the production recovered sharply to 1,916,918 tons and in 1935 rose still further to 2,364,297 tons, in 1936 to 2,553,247 tons, in 1937, to 2,870,832 tons valued at Rs.45,86,378 (£344,840), but in 1938 the production fell slightly to 2,743,675 tons valued at Rs.45,56,974 (£340,073). These figures exclude the output of about 25,000 tons, by the Burma Corporation, which is used as a flux in lead-smelting.

The Steel Industry (Production) Act 1924 (Act No. XIV of 1924)—authorised, to companies employing Indians, bounties upon rails and fishplates wholly manufactured in British India from materials wholly or mainly produced from Indian iron-ore and complying with specifications approved by the Railway Board, and upon iron or steel railway wagons, a substantial portion of the component parts of which had been manufactured in British India. This Act was repealed by the Act No. III of 1927 and the payment of bounties consequently ceased on the 31st March, 1927; the industry is, however, protected to a certain extent by the varying tariffs on different classes of imported steel. As a result of a new Act, No. XXXI of 1934, provision has been made for an increase of tariffs by about half over the 1927 rates, or about Rs. 10 per ton *ad valorem* in most cases, or about Rs. 40 per ton in the case of articles not of British manufacture.

## MANGANESE ORE.

This industry was started some thirty years ago by quarrying the deposits of the Vizagapatam district, and from an output of 674 tons in 1892, the production rose rapidly to 92,008 tons in 1900 when the richer deposits in the Central Provinces were also attacked, and are now yielding a larger quantity of ore than the Vizagapatam mines. The most important deposits occur in the Central Provinces, Madras, Central India, and Mysore—the largest supply coming from the Central Provinces. The uses to which the ore is put are somewhat varied. The peroxide is used by glass manufacturers to destroy the green colour in glass making, and it is also used in porcelain painting and glazing for the brown colour which it yields. The ore is now used in the manufacture of ferro-manganese for use in steel manufacture. Since 1901, when the total output was 150,190 tons, the progress of the industry has been remarkable owing to the high prices prevailing.

The catastrophic fall in the production of manganese ore in India from the peak figure of 1927, namely 1,129,353 tons valued at £2,702,006 f.o.b. Indian ports to 212,604 tons with a value of £140,022 in 1932 has been recorded previously. In 1933 the output rose slightly to 218,297 tons but the value fell to £123,171. These are the smallest quantities and values reported since 1901, when the output was 120,891 tons valued at £122,831. In 1905 the output was 247,427 tons valued at £223,432, since when the smallest production was 450,416 tons in 1915 valued at £202,546; whilst the smallest value was in 1909 when a production of 614,660 tons was valued at £203,908. In 1934 there was, however, a partial recovery to 406,306 tons valued at £338,240, further increased in 1935 to 641,453 tons valued at £768,630, in 1936 to 813,412 tons valued at £1,121,422 and in 1937 to 1,951,594 tons valued at £3,220,551 but in 1938 there was a fall in output and prices to 967,929 tons valued at £2,932,445. The full magnitude of this catastrophe to the Indian manganese industry is perhaps best realised from the fact that whilst the quantity of the production in 1933 was a little over one-fifth of that of the peak year of 1927, the value was less than one-twenty-second part of the value of the 1927 production. In fact in none of the major Indian mineral industries had the effects of the slump been so seriously felt as in the manganese industry; it is gratifying, therefore, that some measure of recovery can now be recorded, though the value of the output is still less than half the peak figure of 1927, with a much higher value.

The substantial recovery in 1936 is due mainly to increases in the Balaghat, Nagpur and Bhandara districts of the Central Provinces, and to the resumption of work in Panch Mahals. The output from Sandur State fell by a third. The most pleasing feature of this improvement is the recovery of the Central Provinces production from the trivial figure to which it had fallen in 1933 (28,789 tons) to 568,806 tons in 1936.

The recovery in 1936 has been set back by decreases in the Bala Ghat and Bhandara Districts of the Central Provinces, Keonjhar in the Eastern States Agency and in North Kanara (Bombay), the Sandur State (Madras) and in the Chitaldurg districts of Mysore State. There has been an improvement in the production from the Panch Mahals, Chindwara, Bellary, Tumkur and Vizaga-

patam. During 1932 and 1933 the majority of mines in the Central Provinces had been closed, including several mines that had never been closed since the commencement of work in 1900 and 1901; there had been a total cessation of production in the Nagpur district and almost total cessation in Bhandara. The amount of ground recovered can be judged from the fact that the production of the Central Provinces averaged 669,559 tons annually during the quinquennium 1931 to 1933. All producing districts are now actively engaged in the output of manganese ore.

The partial recovery of the Indian manganese industry during 1931 and 1933 was reflected in an increase of exports, including the quantities exported from Mormugao in Portuguese India, from the nadir of 275,991 tons in 1933 to 854,695 tons in 1935. In 1936 this fell to 742,517 tons, and after rising to 1,151,434 tons in 1937 fell to 614,740 tons in 1938. The United Kingdom even with a decrease of over 127,000 tons retained her position as the chief importer of Indian manganese ore. The second place as importer was taken by Japan with 113,212 tons, with the U. S. A. third with 52,037 tons and France a close fourth with 49,950 tons. The Belgium German figures show a marked decrease.

The fall in the Indian output of manganese ore of recent years can be correlated with the fall in the price of first-grade ore, c.i.f. United Kingdom ports, from an average of 22.9d. per unit in 1924 to 11.9d. per unit in 1929, and then to 9.5d. per unit in 1932 and 1933. A partial recovery in output in 1934 accompanied a rise in the average price to 10.5d. per unit, and to 12.26d. in 1936, rising as high as 22.5d. in 1937, but in 1938 the price fell to 19.7d. per unit.

This continued fall in the price of manganese ore from 1924 to 1932 is to be correlated with the fact that from 1924 to 1927 the rate of increase of the world's production of manganese ore was much greater than the rate of increase in the world's production of pig-iron and steel. And although there was a fall in the world's output of manganese ore in 1928, there was a very large increase in 1929, greater than was justified by the increased production of iron and steel in that year, and it is evident that the world's available supplies of manganese ore are now much in excess of normal requirements. The present chief sources of production of Manganese ore are Russia, India, the Gold Coast, South Africa, Brazil, Cuba, Egypt, Czechoslovakia and Japan. Russia is able to place a large quantities of ore on the market at a price with which many Indian producers cannot compete without a return to pre-war railway freights. The Gold Coast has also become a serious competitor of recent years. The large deposits of high-grade manganese ore discovered near Postmasburg in South Africa are also being developed. With this increasing competition and falling prices it is not surprising, therefore, that in spite of the apparent prosperity of the Indian manganese industry in 1929 and 1930, as judged from figures of production and export, yet by 1930 the industry as a whole had arrived at a stage of relative depression, causing many operators to cease work. Added to increased available supplies there was in 1931 and 1932 a disastrous decline in the activities of the iron and steel industry of the world.

# GOLD.

(The Statistics given below are the latest available.)

The steady decline in India's output of gold in spite of the steep rise in the price has been noted since 1921 when it was as much as 390,927 ounces as against 252,262 ounces in 1943. It has nowhere been adequately explained, but is probably due in the main to increased difficulties resulting from the high temperature in the depths of the Kolar Gold Fields (the mines go down to 8,000 feet below ground level, i.e., roughly 5,000 feet below sea level) which account for almost the entire output of gold in this country.

The greater part of the total output of gold in India is derived from the Kolar gold field in Mysore. During the last decade the production of this mine reached its highest point in 1905 when 616,758 ounces were raised. In 1906 the quantity won was 565,208 ounces and this figure fell to 535,085 ounces in 1907. The figures for the latter years reveal a small improvement. The Nizam's mine at Hutti in Hyderabad comes next, but at a respectable distance, to the Kolar gold field. This mine was opened in 1903. The only other mines from which gold was raised were those in the Dharwar district of Bombay and the Anantapur district of Madras. The Dharwar mines gave in output of 2,993 ounces in 1911 but work there ceased in 1912. The Anantapur mines gave their first output of gold during the year 1910; the amount being 2,532 ounces, valued at Rs. 1,51,800. Gold mining was carried on in the North Arcot district of Madras from 1893 till 1900, the highest yield (2,854 ounces) being obtained in the year 1898. The Kyaukpazat mine in Upper Burma was worked until 1903, when the pay chute was lost and the mine closed down. In 1902 dredging operations were started on the Irrawaddy river near Myitkyina, and 216 ounces of gold were obtained in 1904; the amount steadily increased from year to year and reached 8,445 ounces in 1909, but fell in subsequent years until in 1922 it was no more than 24 oz. The small quantity of gold produced in the Punjab, the Central Provinces, and the United Provinces is obtained by washing. Gold washing is carried on in a great many districts in India, but there is no complete record of the amount obtained in this way.

The production of gold in India during the ten years ended 1943 aggregated 3,039,000 ounces or one per cent of the total world production, excluding that of the U.S.S.R.

In 1931 the gradual secular decline in the total Indian gold production was temporarily arrested with an output of 330,488.8 ozs. valued at Rs. 2,08,01,943 (£1,540,885), followed by a rival fall again in 1932, when the output was 329,681.7 ozs. valued at Rs. 2,53,51,438 (£1,906,123). In 1933 there was an increase to 336,108.3 ozs. valued at Rs. 2,76,40,071 (£2,078,201). In 1934 the output fell to 322,142.9 ozs., but the value increased to Rs. 2,92,71,130 (£2,200,836), being the highest in terms of sterling since 1920. It is interesting to note that the output of 1921, which was valued at £2,050,575 a figure very close to that of the 1933 production, was 432,722.6 ozs. In 1935 the output rose again to 327,652.5 ozs. valued at Rs. 3,04,01,775 (£2,285,848), and in

1936 to 333,885.6 ozs. valued at Rs. 3,06,02,413 (£2,300,933). In 1937 the output fell slightly to 331,748.2 ozs., valued at Rs. 3,04,80,105 (£2,291,737). In 1938 the output decreased slightly to 321,137.8 ozs. valued at Rs. 3,04,75,397 (£2,274,283) from 330,743.9 ozs. valued at Rs. 3,03,95,871 (£2,285,404). The estimated production of gold in India in the following years has been given below:—

1939—315,000 ounces, 1940—285,929 ounces (Rs. 3,31,31,783), 1941—260,387 ounces (Rs. 3,72,88,285), 1942—260,302 ounces (Rs. 3,76,83,442), and 1943—252,262 ounces (Rs. 5,02,57,880).

Until the outbreak of the war, the prices of gold remained approximately on world parity although there were occasional and independent fluctuations due to local speculative movements. Up to September 1931, when the United Kingdom went off the gold standard, the gold parity in Bombay was an import parity, i.e., the price in Bombay was the price in London plus the cost of importing gold. After that date until 1940-41 India was an exporter of gold and prices were based on the export parity, i.e., the price of gold in London (or New York) less the cost of sending it to these places.

The outbreak of hostilities in the Far East on December 7, 1941 led to an outburst of speculation and a scramble for gold hoarding, and ready gold rose to Rs. 50-2 on December 19 and the subsequent Japanese advances pushed the prices to Rs. 58-4 on March 12, 1942. A month later, the gold rate declined to Rs. 44-12 on April 18, and then started an upward trend to reach Rs. 71-6 at the close of the financial year. In 1943-44, the price reached a new high level as a result of intensified demand partly induced by the inflation complex. In May the issue of the Defence of India Rule 90-C made all forward and option dealings in bullion illegal, and two months later, another Rule was issued in order to empower the authorities to prohibit advances against commodities and bullion. The Reserve Bank started selling gold on account of the overseas principals on August 16, 1943 and has continued those sales.

The highest, lowest and annual average prices for gold in the Bombay market for the years 1926-27 to 1943-44 are given below:—

Year.	Highest.	Lowest.	Average.
	Rs. a. p.	Rs. a. p.	Rs. a. p.
1926-27 ..	21 11 6	21 4 6	21 7 8

## SILVER.

India's production of Silver has been negligible as compared to the world's output, but the country has got fascination for the white metal and has been a heavy importer of the metal from abroad. The details about the output are given below:—

Year.	World output in ounces.	Indian production.	
		Ounces.	Rs.
1939 .. .. .	264,200,000	22,745	33,361
1940 .. .. .	278,000,000	21,808	34,931
1941 .. .. .	266,000,000	22,929	41,597
1942 .. .. .	248,000,000	22,466	48,451

The highest, lowest, and the annual average prices for Silver in the Bombay market, together with the import duty on silver, since 1926-27 are given below:—

Year.	Highest.			Lowest.			Average.			Import duty.		
	Rs.	a.	p.	Rs.	a.	p.	Rs.	a.	p.	Rs.	a.	p.

## SALT.

The production of salt in India was almost steady during the past 25 years. In 1921, India produced 1,334,000 tons of salt, the figure dropped to 1,034,000 tons in 1935 when it reached the bottom, four years later the output was placed at 1,439,000 tons and moved in the following decade between 1,368,000 tons and 1,533,000 tons. The war gave a further fillip to the production of this article of vital necessity and the figure reached new high levels as the years passed by. In 1940 the salt production amounted to 1,644,000 tons; in the following year, it increased to 1,778,000

tons; and in 1942 it reached the record high level of 1,890,000 tons. No up-to date details are available regarding salt production in the various provinces.

Since the outbreak of the war, imports continued to dwindle and reached a low level of 133,000 tons in 1942-43 as compared with 262,000 tons in the preceding year, 207,000 tons in 1940-41. The decline in imports during the war period was attributable to the elimination of Germany which was an important source of supply before the war and reduced shipments from Aden.

There was a moderate increase in the production of salt in India in 1938, made up of increase in the production in Northern India and Madras, with decreases in the production in Sind and Bombay.

The production in Aden was less in 1938 than in 1937; the production in Burma showed a large decrease.

There was a decrease in the imports of salt into India in 1938.

## Stock Exchanges.

The earliest reference to stock broking in this country dates back to the end of the 18th century when transactions in Government securities and the shares of the East India Company used to take place in Calcutta under a *neem tree*. Similar references are also available about business in shares in Bombay before 1840. The boom following the American Civil war gave great impetus to this business.

By an indenture dated December 3, 1897, the Native Share and Stock Brokers' Association of Bombay was formally constituted. It has a membership of about 475 brokers who carry on business in the Broker's Association from the funds of the Association governed by the rules of the Board. The present value of a broker's card is about Rs. 45,000.

This is the only share market where forward business used to be conducted in an organised way. This business is governed by separate rules approved by the Government of Bombay under powers vested in them by the Bombay Securities Contract Control Act. This legislation was enacted in 1925 in pursuance of the recommendations made by the Stock Exchange Inquiry Committee, with Sir Wilfrid Atlay as President, in 1923. Thirteen years later, the Government of Bombay appointed a Committee, with Mr. W. B. Morison as Chairman, "to examine and report on the organisation and methods of working of the Native Share and Stock Brokers' Association, to consider whether any modifications are desirable in the interests of the investing public and to make recommendations."

Besides the premier share market in Bombay, occasional attempts were made in the city to have an additional share market. In 1917, the Bombay Stock Exchange Ltd. was registered, but it ceased to function after a brief period. A new stock market was opened in 1933 under the name of the Indian Stock Exchange, Ltd.

The Calcutta Stock Exchange Association was founded at No. 2, New China Bazar Road (now known as 2, Royal Exchange Place), Calcutta, with 150 founder members in 1903. Fifteen years later, it was registered as a limited liability concern. The Association is controlled and managed by a Committee and has a membership of 232 brokers.

The only registered institution in South India of brokers dealing in shares and securities is the Madras Stock Exchange Association, Ltd. It was registered in 1937.

Of late, several stock markets have been started at other industrial centres. These include Delhi, Lahore and Cawnpore. Plans for setting up a share market in Nagpur are now under way.

The Ahmedabad Stock Exchange is also a registered body and recognised by the Government of Bombay under the Bombay Securities Contract Control Act.

Among the Indian States, Hyderabad State has recently started a stock market of its own.

The wild orgy of speculation that started in the share markets all over the country in 1943 called for Governmental action. On September 11, 1943, the Government of India issued Rule 94-C under the Defence of India Rules, prohibiting with effect from the 24th of that month all stock exchanges in British India from permitting or affording facilities for *badla* transactions or for the making of any contracts other than for ready delivery contracts. Speaking about the working of this Rule at the annual meeting of the Native Share and Stock Brokers' Association in 1945, Mr. K. R. P. Shroff, however, complained that instead of achieving the objective, the Rule had only created "grey" markets all over the country.

The Government of India have appointed a special officer to investigate into the question of having a centralised control over the affairs of stock markets.

## Chambers of Commerce.

Modern commerce in India was built up by merchants from the west and was for a long time entirely in their hands. Chambers of Commerce and numerous kindred Associations were formed by them for its protection and assistance. But Indians have in recent years, taken a large and growing part in this commercial life. The extent of their participation varies greatly in different parts of India, according to the natural proclivities and genius of different races. Bombay, for instance, has led the way in the industrial and commercial regeneration of the new India, while Bengal, very keen in other fields of activity, lags behind in this one. Arising from these circumstances we find Chambers of Commerce in Bombay, Karachi, Calcutta, Madras and other important centres, with a membership both European and Indian; but alongside these have sprung up in recent years certain Associations, such as the Bombay Indian Merchants' Chamber, and Bureau, of which the membership is exclusively Indian. These different classes of bodies are in no sense hostile to one another but constantly work in association.

In 1921, the London Chamber of Commerce, realising the increasing attention demanded by the economic development of India, took steps to form an "East India Section" of their organisation. The Indian Chambers work harmoniously with this body, but are in no sense affiliated to it, nor is there at present any inclination on their part to enter into such close relationship, because it is generally felt that the Indian Chambers can themselves achieve their objects better and more effectively than a London body could do for them, and on various occasions the London Chamber, or the East India Section of it, have shown themselves out of touch with what seemed locally to be immediate requirements in particular matters.

A new movement was started in 1913 by Sir Fazulbhoy Currimbhoy Ibrahim, a leading millowner and public citizen of Bombay, which aimed at effecting great improvement in strengthening Indian commercial organisation. Sir Fazulbhoy's original plan was for the formation of an Indian Commercial Congress. The proposal met with approval in all parts of India. The scheme was delayed by the outbreak of war but afterwards received an impetus from the same cause and the first Congress was held in the 1915 Christmas holiday season, in the Town Hall, Bombay. The list of members of the Reception Committee showed that all the important commercial associations of Bombay were prepared to co-operate actively.

The Congress was attended by several hundred delegates from all parts of India. The late Sir Dinshaw Wacha, the then President of the Bombay Indian Merchants' Chamber, presided as Chairman of the Reception Committee, at the opening of the proceedings and the first business was the election of Sir Fazulbhoy Currimbhoy as the first President. The Con-

gress resolved upon the establishment of an Associated Indian Chamber of Commerce, and elected a Provincial Committee empowered to take the necessary steps to get the Association registered and to enrol members and carry on work. The Congress also approved of the draft constitution.

The organisation languished for lack of support for some years until a number of merchants specially interested in currency and exchange questions revived it in 1926 at Delhi and in 1927 at Calcutta, the initiative in the new activities coming, like the first movement, from Bombay. The Commercial Congress held in Calcutta on 31st December, 1926, and 1st and 2nd January 1927, decided upon the formation of a "Federation of Indian Chambers of Commerce" and agreed to the registered office of this body being "at the place where the President for the year has his headquarters or where he directs it to be located."

Among the objects for which the Federation is established are the following:—

- (a) To promote Indian businesses in matters of inland and foreign trade, transport, industry and manufactures, finance and all other economic subjects.
- (b) To encourage friendly feeling and unanimity among the business community and association on all subjects connected with the common good of Indian business.
- (c) To enter into any arrangement with any Government or authority supreme, municipal, local or otherwise, that may seem conducive to the Federation's objects or any of them, and to obtain from any such Government or authority all rights, concessions, and privileges which the Federation may think desirable to obtain and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions.
- (d) To sell or dispose of the undertaking of the Federation or any part thereof for such consideration as the Federation may think and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the Federation.
- (e) To take or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the Federation.
- (f) To undertake and execute any trusts the undertaking of which may seem to the Federation desirable either gratuitously or otherwise.
- (g) To draw, make, accept, discount, execute and issue bills of exchange, promissory notes, bills of lading, warrants, debentures and other negotiable or transferable instruments or securities.

Shippers' Association; Calcutta Hydraulic Press Association; Jute Fabric Brokers' Association; Calcutta Baled Jute Shippers' Association; Calcutta Jute Dealers' Association; Calcutta Hides and Skins Shippers' Association; Calcutta Flour Mills' Association; Calcutta River Transport Association; The Masters' Stevedores' Association and the Association of Paint, Colour & Varnish Manufacturers in India; Calcutta Freight Brokers' Association and European Mofussil Jute Balers' Association.

The Chamber does not assist in the preparation of official statistical returns. It publishes weekly the *Calcutta Prices Current*, and also publishes a large number of statistical circulars of various descriptions in addition to a monthly abstract of proceedings and many other circulars on matters under discussion.

The Chamber maintains a Tribunal of Arbitration for the determination, settlement and adjustment of disputes and differences relating to trade, business, manufactures, and to customs of trade, between parties, all or any of whom reside or carry on business personally

or by agent or otherwise in Calcutta or elsewhere in India or Burma, by whomsoever of such parties the said disputes and differences be submitted. The Secretary of the Chamber acts as the Registrar of the Tribunal, which consists of such members or assistants to members as may from time to time, annually or otherwise be selected by the Registrar and willing to serve on the Tribunal. The Registrar from time to time makes a list of such members and assistants.

The Chamber also maintains a Licensed Measures' Department controlled by a special committee. It includes a Superintendent (G. O. Gee Smyth), Head Office Manager (F. W. Kendall) and Assistant Superintendents (Messrs. J. B. F. Henfrey, on active service, B. Perry and S. J. Warwick) and the staff at the time of the last official returns consisted of 110 officers. The usual system of work for the benefit of the trade of the port is followed. The Department has its own provident fund and compassionate funds and Measurers' Club.

## BENGAL NATIONAL CHAMBER OF COMMERCE.

The Bengal National Chamber of Commerce, the premier institution of the Indian Commercial Community in Bengal, was founded in 1887. The objects of the Chamber are to aid and stimulate the development of commercial, agricultural and industrial enterprises in Bengal and Assam and to protect the commercial interest of all persons trading therein; to promote unanimity and uniformity of practice amongst the members of the commercial community; to represent their views and requirements to the Government, railway and port authorities; to arrange for organised action on all matters involving the interests of members including conditions of employment of industrial labour; to arbitrate when occasion occurs between parties willing to submit their differences to the Association, and generally to do all such things as may be conducive to the interests of the commercial classes of Bengal and Assam.

The constitution of the Chamber extends the facilities of Associate and Honorary Membership to the entire trading community in Bengal. The number of Ordinary members on the roll is about 600. Almost all the leading Indian commercial and industrial firms and persons in every branch of the inland and foreign trade in Bengal are members of the Chamber. A considerable portion of the joint stock capital invested in Bengal in banking, insurance, steamer services, cotton mills, etc., is also represented. The constitution of the Chamber provides for a close association as between the Chamber and various sectional organisations of trades and industries in Bengal.

*List of Associations Affiliated to the Chamber.*—All-Bengal Bobbin Manufacturers' Association; All Bengal Electrical Contractors' Association; All-India Soap Makers' Association; All-India Tea Growers' Federation; Association of Engineers; Barisal Mahajan Samity; Bengal Motion Pictures Association; Bengal Hosiery Manufacturers' Association; Bengal Glass Manufacturers' Association; Bengal Banks' Association; Bengal Galvanized Sheet Merchants' Associa-

tion; Bengal Cotton Association, Ltd.; Bengal Industries Association; Bengal Building Traders' Association; Bengal Knitting & Millowners' Association; Bengal Stationers' Association; Bengal Oil Mills' Association; Bolpur Cloth, Merchants' Association; Brick Field Association; Kotrung; Brahmanbaria Merchants' Association; Burdwan Rice Mills Owners' Association; Calcutta Cloth Ration Shop Association; Calcutta Electric Traders' Association; Calcutta Flour Dealers' Association; Calcutta Iron Merchants' Association; Calcutta Jute Exchange, Ltd.; Calcutta Paper Traders' Association; Calcutta Retail Yarn Merchants' Association; Calcutta Rice Dealers' Association; Calcutta Sugar Dealers' Association; Calcutta Timber Merchants' Association; Calcutta Salt Association, Ltd.; Calcutta Rice Mills Association; Calcutta Wine Association; Dacca District National Chamber of Commerce; East India Jute & Hessian Exchange Ltd.; Faridpur Local Merchants' Association; Gramophone & Radio Dealers' Association; Grain & Pulse Dealers' Association; Indian Insurance Institute; Indian Lamp Factories' Association; Indian Cement Distributors' Association; Indian Colliery Owners' Association; Indian Confectioners' Association; Indian Plywood Manufacturers' Association; Indian Plywood Traders' Association; Indian Cycle Traders' Association; Metropolitan Banking Association; Merchants' Association, Khulna; Memari Paddy & Rice Merchants' Association; Pabna Mahajan Samity; Paddy Merchants' Association; Tripura Tea Association; Retail Textile Dealers' Association; Sirajganj Bengali Cloth & Yarn Dealers' Association.

The Chamber enjoys the privilege of electing representatives to the Bengal Legislative Assembly, the Calcutta Port Trust, the Calcutta Improvement Trust, Bengal Industries Board, Economic Enquiry Board, Bengal, Indian Central Jute Committee, Indian Central Cotton Committee, Indian Tea Market Expansion Board, Indian Coal Grinding Board, Provincial Sugar Board and other important bodies.

of the Marwari community, provided the parties are willing to abide by the judgment and decision of the Association.

To adjust controversies between members of the Association.

To communicate with Chambers of Commerce and other mercantile and public bodies within or outside India and to concert and promote measures for the protection of trade, commerce and industries in which Indians, in particular Marwaris, are engaged.

To found and support establishments and institutions for disseminating commercial, technical and general education in different branches of Art and Science in the Marwari community.

To take all necessary steps for promoting, supporting or opposing legislation or other action, affecting the interests of the Commercial communities in general and of the Marwari community in particular either by Government, or any department thereof or by any local body or bodies.

To take such action as may be necessary for securing the redress of grievances of any branch of trade, commerce and industry in which the Marwari community is interested as also such other action as may be conducive to the development and growth of such trade, commerce and industry.

The constituents of the Association are the leading industrialists, exporters and importers of the province of Bengal.

The Association issues certificates of origin to exporters of indigenous goods.

The Association is a member of the Federation of Indian Chambers of Commerce and Industry.

The Association publishes a monthly Journal called "The Journal of the Marwari Association."

The following are the Office-bearers:—  
*President*.—Anandi Lall Poddar, M.  
*Vice-Presidents*.—K. P. Khaitan, Bar-at-law and Babulal Shroff.

*Honorary Secretary*.—Madan Gopal Poddar, B.L., Attorney-at-Law.

*Asst. Secretary*.—Prahlaad Rai Bhagat.  
*Treasurer*.—Murlihar Sonthalia.

*Auditor*.—Ram Chandra Singhi.

*Personal Assistant to the Honorary Secretary and Officer-in-charge*.—Saibendranath Chatterjee, M.A., B.L., Examiner-in-Law, Calcutta University.

The following are representatives on public bodies:—

*Central Legislative Assembly*.—Bajji Bajoria.

*Bengal Legislative Assembly*.—Anandi Poddar.

*Price Advisory Committee, Bengal*.—Mukhlal Chiripal.

*Cotton Cloth and Yarn Control Advisory Committee (Bengal)*.—Mungturam Jaipuria.

*Board of Economic Enquiry, Bengal*.—B. Krishna Jhajharia.

*Board of Industries, Bengal*.—Babu Shroff.

*Non-Official Jail Visitor, Howrah Jail*.—Ratan Lal Goenka.

*Non-Official Jail Visitor, Presidency Jail*.—Kanahays Lal Jatin.

*Non-Official Jail Visitor, Alipore Jail*.—Anandi Lall Poddar.

*E. I. Ry. Wagon Supply Advisory Committee*.—Mahabir Prasad Kasera, B.Com., B.L., M.R.S.S. Sahityaratna.

*B. N. Ry. Wagon Supply Advisory Committee*.—Mahabir Prasad Kasera, B.Com., B.L., M.R.S.S. Sahityaratna.

## INTERNATIONAL CHAMBER OF COMMERCE, INDIAN NATIONAL COMMITTEE.

The Indian National Committee of the International Chamber of Commerce was established for the following purposes in the year 1928:—

(a) To participate in the promotion of the objects for which the International Chamber of Commerce, hereinafter called the "International Chamber," is established, namely:

- (i) To facilitate the commercial intercourse of countries.
- (ii) To secure harmony of action on all international questions affecting finance, industry and commerce.
- (iii) To encourage progress and to promote peace and cordial relations among countries and their citizens

by the co-operation of business men and organisations devoted to the development of commerce and industry.

The Indian National Committee has on roll 37 commercial bodies as Organisation Members and 48 commercial firms as Associated Members.

### OFFICE-BEARERS FOR 1946-47.

*President*.—Lala Gutusharan Lal, Calcutta.

*Vice-President*.—M. A. Master, Bombay.

*Honorary Treasurer*.—D. N. Sen, Calcutta.

*Secretary*.—D. G. Mulherkar.

*Office*.—28, Ferozshah Road, New Delhi.

## BOMBAY.

The object and duties of the Bombay Chamber, as set forth in the Memorandum and Articles of Association, are to encourage and promote a friendly feeling and unanimity among commercial men on all subjects involving their common good; to promote and protect the

general mercantile interests of this Presidency to collect and circulate information on matters of general commercial interest; obtain the removal, as far as such a Society can, of all acknowledged grievances affecting merchants as a body, or mercantile interest.

in general; to receive and decide references on matters of usage and custom in dispute, recording such decisions for future guidance, and by this and such other means, as the Committee for the time being may think fit, assisting to form a code of practice for simplifying and facilitating business; to communicate with the public authorities, with similar Associations in other places and with individuals on all subjects of general mercantile interest; and to arbitrate between parties willing to refer to, and abide by, the decision of the Chamber.

The Bombay Chamber was established in 1836, under the auspices of Sir Robert Grant, who was then Governor of the Presidency, and the programme described above was embodied in their first set of rules. According to the latest returns the number of Chamber members is 225. Of these 12 represent banking institutions, 7 shipping agencies and companies, 3 firms of solicitors, 3 railways, 18 insurance companies, 20 engineers and contractors, 162 firms engaged in general mercantile business.

All persons engaged or interested in mercantile pursuits desirous of joining the Chamber and disposed to aid in carrying its objects into effect are eligible for election to membership by ballot. The Chamber member's subscription is Rs. 300. Gentlemen distinguished for public services, or "eminent in commerce and manufactures," may be elected honorary members and as such are exempt from paying subscriptions. Any stranger engaged or interested in mercantile pursuits and visiting the Presidency may be introduced as a visitor by any Member of the Chamber inserting his name in a book to be kept for the purpose, but a residence of two months shall subject him to the rule for the admission of members.

#### Officers of the Year.

The affairs and funds of the Chamber are managed by a committee of twelve ordinary members, consisting of the President and Vice-President and ten members. The committee as a rule meet at least once a week and the minutes of its proceedings are open to inspection by all members of the Chamber, subject to such regulations as the committee may make in regard to the matter. A general meeting of the Chamber must be held once a year and ten or more members may requisition, through the officers of the Chamber, a special meeting at any time, for a specific purpose.

The Chamber elects representatives as follows to various public bodies:—

The Council of State, one representative.  
Bombay Legislative Assembly, two representatives.

Bombay Municipal Corporation, one member, elected for three years.

Board of Trustees of the Port of Bombay, five members, elected for two years.

The following are the officers of the Chamber for the year 1945-46 and its representatives on the various public bodies:—

President : A. W. Percy.  
Vice-President : L. A. Halsall.  
Committee : C. R. Agar; C. P. Bramble, C.I.E., M.L.A.; C. J. Damala; R. L. Ferard; A. D. Finney; A. L. Hutson; C. G. Marrable; H. C. De Mierre; H. F. Milne; W. G. J. Shaw.

Secretary.—L. Boulton.

Representatives on—

Council of State: The Hon'ble Mr. J. M. B. Gibbons.

Bombay Legislative Assembly: W. M. Martin, M.B.E., C.R. Sharpa.

Bombay Port Trust: R. W. Bullock; C. J. Damala; A. D. Finney; D. R. C. Hartely, C.B.E., D.S.O., E.D.; E. Wilkinson.

Bombay Municipal Corporation: C.B. Cockaine.  
Sydenham College of Commerce Advisory Board: R. W. Bullock.

Bombay Smoke Nuisances Commission: H. F. Milne.

Persian Gulf Lights Committee: C. F. Morris.

Indian Central Cotton Committee: L. F. H. Goodwin.

Empire Cotton Growing Corporation: S. B. Samollis.

Back Bay Reclamation Scheme—Standing Advisory Committee: L. A. Halsall.

Auxiliary Force Advisory Committee: L. A. Halsall.

National Service Advisory Committee.—C. P. Bramble, M.L.A.

Ex-Services Association, India.—A. W. Percy.

Ex-Services Association, Bombay Branch.—C. R. Agar.

Bombay Seamen's Society: L. A. Halsall.

Indian Sailors' Home: N. McLeod.

I. M. M. T. S. Dufferin: A. D. Finney.

Traffic Advisory Committee.—Y. Corbett-Wright.

Federation of Chambers of Commerce of the British Empire: Sir Geoffrey Winterbotham, Kt.

Railway Advisory Committees—

G. I. P.: C. W. Warrington.

B. B. & C. I.: C. W. Warrington.

Railway Rates Advisory Committee: L. A. Halsall; C. J. Damala; A. P. Darlow; and A. L. Hutson.

Government of Bombay Board of Communications: W. R. Wood.

Bombay University: The Hon'ble Mr. J. M. B. Gibbons.

Bombay Provincial Transport Authority: The Hon'ble Mr. J. M. B. Gibbons.

Bombay Provincial Advisory Committee for War Supplies: R. W. Bullock.

#### Special Work.

One of the most important functions performed by the Chamber is that of arbitration in commercial disputes. Rules for this have been in existence for many years and have worked most satisfactorily. The decisions are in all cases given by competent arbitrators appointed by the General Committee of the Chamber and the system avoids the great expense of resort to the Law Courts.

A special department of the Bombay Chamber is its Statistical Department, which prepares a large amount of statistical returns connected with the trade of the port and of great importance to the conduct of commerce. The department consists of nineteen Indian clerks who, by the authority of Government, work in the Customs House and have every facility placed at their disposal by the Customs authorities. They compile all the

The following are the Association's Representatives on public bodies:—

*Bombay Legislative Assembly:* Sir Sorab Saklatvala, Kt., M.L.A.

### Millowners' Mutual Insurance Association, Ltd.

The Millowners' Mutual Insurance Association, Ltd., was registered on 30th June, 1924, as a Company limited by guarantee. The registered office of the Association is located in Elphinstone Building, Churchgate Street, Fort, Bombay.

The objects of the Association are:—

(a) The mutual insurance of members of the Company against liability to pay compensation or damages to workmen employed by them or their dependants for injuries or accidents, fatal or otherwise, arising out of and in the course of their employment; (b) the insurance of members of the Company against loss or damage by or incidental to fire, lightning, etc.; and (c) to reinsure or in any way provide for or against the liability of the Company upon any assurances granted or entered into by the Company and generally to effect and obtain re-insurances, counter-insurances and counter-guarantees, etc., etc.

All members of the Millowners' Association are eligible for admission to the Mutual Company. Non-members are also eligible for membership of the Mutual, provided their application is approved of by the Committee of the Millowners' Association.

The affairs of the Mutual Insurance Association are under the control of a Board of Directors.

The present Directors are:—

Sir Ness Wadia, K.B.E., C.I.E. (Chairman).

Sir Joseph Kay, Kt.; Sir Sorab Saklatvala, Kt.; Krishnaraj M. D. Thackersey; D. M. Khatau; A. Pether; and A. C. M. Cursetjee, M.A., LL.B., Secretary of the Association.

### Indian Merchants' Chamber.

The Indian Merchants' Chamber was established in the year 1907. Its objects are:—

- (a) To encourage friendly feeling and unanimity among the business community on all subjects connected with the common good of Indian merchants.
- (b) To secure organised action on all subjects relating to the interests of the Indian business community directly and indirectly.
- (c) To promote the objects of the Indian business community in matters of inland and foreign trade, shipping and transport, industry and manufacture, banking and insurance.
- (d) To collect and disseminate statistical and other information securing the promotion of the objects of the Chamber, and to make efforts for the spread of commercial and economic knowledge.
- (e) To take all steps which may be necessary for promoting, supporting or opposing legislation or other action affecting the aforesaid interests by the Government or any Department thereof or by any local body or bodies, and in general to take the initiative to secure the welfare of the business community in all respects.
- (f) To make representations to Local, Central or Imperial authorities, Executive or Legislative, on any matter affecting trade, commerce, manufacture or shipping, banking or insurance.
- (g) To undertake by arbitration the settlement of commercial disputes between merchants and businessmen and also to provide for arbitration in respect of disputes arising in the course of trade, industry or transport, and to secure the services of expert technical and other men to that end if necessary or desirable.
- (h) To advance and promote commercial and technical education and to found and support establishments and institutions for such purposes.
- (i) To undertake special enquiries and action for securing redress for legitimate grievances of any branch of trade or industry as also all such other action as may be conducive to the extension of trade, commerce or manufacture or incidental to the attainment of the above objects.
- (j) To secure the interests and well-being of the Indian business communities abroad.
- (k) To secure, wherever possible, organised and/or concerted action on all subjects involving the interests of members including 'regulating conditions of employment of industrial labour' in various industries represented by the members of the Organisation.
- (ii) To nominate delegates and advisers, etc., to represent the employers of India at the Annual International Labour Conference of the League of Nations.

(iii) To take up, consider and formulate ideas on the subjects which are on the Agenda of each International Labour Conference.

(iv) To take all steps which may be necessary for promoting, supporting or opposing recommendations or conventions of the International Labour Conference.

(l) And generally to do all that may be necessary in the interests of the realisation of the above objects of the Chamber directly or indirectly.

Under the Montagu-Chelmsford Reforms the Chamber has the right of electing one representative on the Central Legislative Assembly and under the Government of India Act 1935 it has the right of electing one representative on the Bombay Legislative Assembly. The Chamber also has the right to elect five representatives on the Bombay Port Trust, and one representative on the Bombay Municipal Corporation.

**Secretary.**—D. V. Kelkar, M.A.

**Address:**—Industrial Assurance Building, Church Gate, Bombay.

## KARACHI.

The objects and duties of the Karachi Chamber of Commerce are set forth in terms similar to those of Bombay. Qualifications for membership are also similar. Honorary Membership may be conferred by the Committee upon "any gentlemen interested in the affairs and objects of the Chamber." All new Members joining the Chamber pay Rs. 750 entrance fee and the monthly subscription is Rs. 18. The subscription to the Chamber's periodical returns is at present fixed at Rs. 150 per annum per set for Members and Rs. 280 per annum per set for non-Members. The set comprises:—

(i) a Daily Trade Return containing lists of commodities entered in the Customs House for export, and imports cleared from Customs on each working day, shipping information and statistics of commodities entering Karachi by rail, and leaving by sea,

(ii) a Weekly Price Current and Market Report which, besides giving quotations for commodities traded in the Karachi Markets, also contains statistics of exports and imports compiled from Ships' Manifests, and shipping movements,

(iii) Export Manifests of all Steamers leaving Karachi for Foreign Ports,

(iv) Monthly Import and Export statistics for the main commodities compiled from Ships' Manifests.

The affairs of the Chamber are managed by a Committee of ten Members, consisting of a Chairman, Vice-Chairman and eight other Members, elected at the annual general meeting of the Chamber held early in each year. The Chamber elects a representative to the Sind Legislative Assembly, four representatives to the Karachi Port Trust, one to the Karachi Municipal Corporation and two to the North Western Railway Advisory Committee, Karachi. There were 60 Members of the Chamber in April 1946. The following are the officers for 1946-47:

*Chairman.*—B. R. Graham.

*Vice-Chairman.*—E. J. Pakes.

*Members of Committee.*—A. J. Bebbington; C. M. Clamp; W. J. Cullen, M.B.E.; T. G. R. Eagan, E.D.; H. A. Henry; Lt.-Col. W. B. Hossack, M.L.A.; G. O. Pike; T. Waddell.

*Secretary.*—H. J. Martin.

*Asstt. Secretary.*—J. S. Lobo.

*Public Measurer.*—G. B. Potts. (E.T.W. Nicholas, Acting.)

*Representative on the Sind Legislative Assembly.*—Lt.-Col. W. B. Hossack, M.L.A.

*Representatives on the Karachi Port Trust.*—A. J. Bebbington; T. Waddell; Col. R. B. Fairclough, M.C., E.D.; E. J. Pakes.

*Representative on the Karachi Municipal Corporation.*—N. W. G. Brown.

*Representatives on the North-Western Railway Local Advisory Committee, Karachi.*—A. J. Bebbington and B. R. Graham.

The following are the principal ways in which the Chamber gives special assistance to Members:

The Committee take into consideration and give an opinion upon questions submitted to them regarding the custom of the trade or of the Port of Karachi. The Committee undertake to nominate arbitrators and surveyors for the settlement of disputes. When two Members of the Chamber or when one Member and a party who is not a Member have agreed to refer disputes to the arbitration of the Chamber or of an arbitrator or arbitrators nominated by the Chamber, the Committee will undertake to nominate an arbitrator or arbitrators, under certain regulations. Similarly, the Chamber, under certain regulations, will undertake to appoint an arbitrator or arbitrators for the settlement of disputes in which neither of the parties are Members of the Chamber. A public measurer is appointed under the authority of the Chamber to measure merchandise arriving at or leaving the port.

## MADRAS.

The Madras Chamber of Commerce was founded in 1836. Any person or firm, interested in the general trade, commerce, or manufactures of the Madras Presidency is eligible for Chamber membership. Distinguished persons, members of kindred associations, and officials interested in trade, commerce or industry in the Madras Province may be elected Honorary Members of the Chamber. Honorary Members do not have to pay any subscription and are not entitled to exercise the privileges of Ordinary Members except to speak at any ordinary meeting of the Chamber. Other Chambers of Commerce may be Affiliated Members. Election for membership is by ballot. Every member other than an Honorary Member pays an entrance fee of Rs. 100, provided that banks, corporate bodies and mercantile firms may be represented on the Chamber by one or more members and are liable for an entrance fee of Rs. 100 once in every 10 years. The subscription shall not exceed Rs. 300 per annum, payable quarterly in advance. Each Affiliated Member shall

pay an annual subscription of Rs. 50 payable at the beginning of the calendar year.

The Chamber undertakes arbitrations and surveys, and the granting of certificates of origin.

There are 60 Firms, who are Members of the Chamber; and there are 5 Affiliated Members and 9 Honorary Members of the Chamber in 1945. The officers and the committee of the Chamber for the year are as follows:—

*Chairman:* H. S. Town, M.L.A. *Vice-Chairman:* W. T. Williams. *Committee:* C. P. Johnstone; B. S. Laurence; D. G. Leonard, M.L.A.; S. M. Smith; H. I. Wonfor. *Secretary:* W. Fyfe.

The following are the Chamber's representatives on various public bodies during 1946:—

*Corporation of Madras:* E. F. G. Hunter, G. M. Morrison, and S. M. Smith; *Madras Port Trust:* F. G. Hadden; H. R. Goosey, H. S. Town, M.L.A., H. I. Wonfor; *Madras*

and Southern Mahratta Railway Advisory Committee: J. H. Henrie; South Indian Railway Advisory Committee: D. G. Leonard, M.L.A.; Board of Communications: C. P. Johnstone; Senate of the University of Madras: F. H. Oakley, H. S. Town, M.L.A.; Senate of the Annamalai University: F. H. Oakley; State Technical Scholarship Board: F. H. Oakley; Board of State Aid to Industries: S.

G. H. Davies; South Indian Nursing Association: F. H. Oakley; Madras Provincial Cotton Committee: D. V. Bulloch; Madras City Excise Licensing Board: D. V. Bulloch; Claims Committee under the War Risks Insurance Schemes: H. S. Town, M.L.A.; War Risks (Factories) Insurance Ordinance Advisory Committee: B. S. Laurence; Trade Mark Advisory Committee: D. M. Passmore.

### SOUTHERN INDIA.

The Southern India Chamber of Commerce established in 1909 has its Registered Office in Madras. The objects of the Chamber are those usual for such bodies, concerning the promotion of trade, especially in the Madras Presidency, and the interests of members. Special objects are stated to be:—

“To maintain a Library of books and publications of commercial interest, so as to diffuse commercial information and knowledge amongst its members.

“To establish Museums of commercial products or organise exhibitions, either on behalf of the Chamber or in co-operation with others.”

There are three classes of members, Affiliated, Resident and non-Resident. The usual conditions as to eligibility for election prevail.

The Chamber is a member of the Federation of Indian Chambers of Commerce, the Indian Chamber of Commerce in Great Britain, and the Indian National Committee of the International Chamber of Commerce, Paris.

The Chamber holds survey and arbitration, issues certificates of origin and certificates of invoices; certificates of sampling, analysis and weights.

The right of electing three representatives to the Madras Port Trust was accorded to the Chamber by the Madras Port Trust Amendment Act, 1941. Members of the Chamber hold seats in the Madras Legislative Assembly, and the Chamber has also been accorded the right of electing a representative to that body. Co-jointly with the Nattukottai Nagarathar Association the Chamber has the right of electing a representative to the Federal Assembly.

Under the Madras City Municipal Amending Act, 1936, the Chamber has the right of electing one Councillor to the Madras Corporation. Under the State Aid to Industries Act, 1923, the Chamber has the right to elect one member to the Board of Industries.

The Chamber also sends its representatives to the South Indian Railway Local Advisory Committee, M. & S. M. Railway Local Advisory Committee, Senate of the Madras University, Senate of the Annamalai University, Board of Industries, Board of Communications, Madras City Improvement Trust Board, Indian Tea Market Expansion Board, Madras City Excise Licensing Board, Madras War Supply Advisory Committee, Textile Trade Marks Advisory Committee, Madras Port Committee, Board of Referees, E. P. T. Madras University Employment Bureau, War Risk Insurance Madras Claims Committee, Prices and Supply Board Panel, Transport Board Panel, Railway Rates Advisory Committee, Madras Income Tax Board of Referees, Indian National Committee, H. P. P. Ordinance Panels, Madras Employment Exchange, Advisory Committee for Manufacturing Engineering Stores, Advisory Committee for Madras Requisitioning of Lands, etc.

The Chamber has about 700 members on the rolls and has its own building. Forty-five Associations in the City of Madras and Chambers of Commerce in the mofussil have been affiliated to this Chamber.

*President.*—Dr. Sir Rm. Alagappa Chettiar.  
*Vice-Presidents.*—Messrs. V. Pandurangiah and A. P. Yamal.

*Secretary.*—P. Raghavan Nair, B.A., B.Com.

### NORTHERN INDIA.

“COMMERCE HOUSE,” 14, LAWRENCE ROAD, LAHORE.

The Northern India Chamber of Commerce was founded in 1923 and has its headquarters at Lahore. The business of the Chamber is conducted by the Chairman, and a Committee consisting of a minimum of eight but not more than 11 elected members, and a maximum of 3 co-opted members and ex-officio members.

The Chamber is represented on the Communications Board, Punjab; and Joint Development Board, Punjab; the North-Western Railway Advisory Committee, Lahore Branch; the Managing Committee of the Hailey College of Commerce, Lahore; Board of Economic Enquiry, Punjab; Board of Industries, Punjab; Electricity Board, Punjab; Industrial Survey Advisory Committee, Punjab; Board to deal with trade and prices in the Punjab; Price Control Advisory Committee—Wheat; Provincial Standard Cloth Advisory Committee; Railway Priority Sub-Committee; Executive Committee

S. P. C. A., Lahore; Industrial Development Committee, Punjab; Provincial Transport Authority; Punjab Labour Tripartite Conference Advisory Committee for Engineering Stores; Civil Supplies Board, Punjab; Punjab Board of Film Censors, Punjab Industrial Research Committee and also nominates a panel for the Railway Rates Advisory Committee and Excess Profits Tax (Board of Referees).

The Chamber is affiliated with the Associated Chambers of Commerce of India, and with the Federation of Chambers of Commerce of the British Empire, London.

A Tribunal of Arbitration has been set up under the Rules of which arbitration relating to commercial disputes are carried out on behalf of members and non-members. Surveys of merchandise are also frequently held. Certificates of origins are issued for goods manufactured in India.

The aim of the Chamber is to protect and further commercial, industrial and agricultural interests in Northern India by every possible means, and it is the constant endeavour of the Chamber to achieve as much as possible for the good of the common interest of members—the business prosperity of Northern India.

*Chairman* :—C. T. Mason.

*Vice-Chairman* :—Sardar Bahadur Sarda Sapuran Singh Chawla.

*Secretary* :—G. J. Lumb.

*Head Clerk* :—S. Mohd Hussain Bokhari, D.Com.

*Address* : Commerce House, 14, Lawrence Road, Lahore.

*Telegraphic Address* :—"Commerce".

*Telephone No.* 2237.

## UPPER INDIA.

The Upper India Chamber of Commerce is concerned with trade, commerce and manufactures in the United Provinces and has its registered office at Cawnpore. Members are elected by the Committee, subject to confirmation by the next general meeting of the Chamber. Gentlemen distinguished for public service, or eminent in commerce or manufactures, may be elected honorary members of the Chamber by the members in a General Meeting and such shall be exempted from paying any subscription to the Chamber. There is no entrance fee for membership, but subscriptions are payable as follows:—A firm, company or association having its place of business in Cawnpore, Rs. 500 a year; an individual member resident or carrying on business in Cawnpore, Rs. 500; firms or individuals having their places of business or residence outside Cawnpore pay half the above rates, but the maintenance of a

branch office in Cawnpore necessitates payment of full rates.

The affairs and funds of the Chamber are managed by a Committee of ten members, which has power to constitute Local Committees of from four to seven members each at trade centres where membership is sufficiently numerous to justify the step. Such Local Committees have power to communicate only with the Central Committee.

The Chamber appoints Arbitration Tribunals for the settlement and adjustment of disputes, when invited to do so, members of the Tribunals being selected from a regular printed list of arbitrators.

The Chamber has a membership of 139 excluding 2 honorary, 12 affiliated members.

*President*.—C. W. Tosh.

*Secretary*.—H. W. Morgan, M.B.E.

## MERCHANTS' CHAMBER OF UNITED PROVINCES, CAWNPORE.

The Merchants' Chamber of United Provinces was established in November, 1932, with the object of safeguarding the interests of trade and industry in the United Provinces, providing regular and efficient statistical and intelligence service to the business firms of the province and generally helping the promotion of trade and business in the United Provinces through proper organisation of commercial opinion. Sapuran Singh Chawla, Amritsar Distillery Co., Ltd., Amritsar. *Address:*—Punjab Chamber of Commerce, Post Box No. 24, New Delhi. *Phone:* No. 7460. *Grams:*—"Chamber," New Delhi.

## THE PUNJAB FEDERATION OF INDUSTRIES (Amritsar).

The Punjab Federation of Industries was established in 1937, with the object of creating a solid body of industrialists of the Punjab and Northern India to promote and protect their interests through organised effort. It is now the only body of its kind in the Punjab as a purely industrial association which can speak with authority on all matters relating to industrial development. The Federation has now among its members the largest industrial units in the province and no industry of any importance is left unrepresented in the Federation.

*President:*—St. B. S. Sapuran Singh Chawla, (Managing Director, Amritsar Distillery Co.

Ltd.). *Vice President:*—H. R. Sakhuja, (Managing Director, The Upper India Metal Works Ltd.).

*Members of the Managing Committee:*—Shaikh Ahmed Sadeque (The Amritsar Swadeshi Woollen Mills); Satya Paul Virmani (Jawala Flour Mills); W. Roberson Taylor (Oriental Carpet Mfg. Co. Ltd.); Som Raj Kapur, (Messrs. Shambhu Nath & Sons Ltd.); Lala Kishori Lal (Mohabir Hosiery & Textile Mills); L. Kidar Nath (The Model Woollen & Silk Mills); Y. R. Puri. (The Amritsar Spinning Mills); *Secretary:*—Dr. Jagdish Chand.

## COCANADA.

The Cocanada Chamber of Commerce was established on 29th October 1868.

The following are the members of the Chamber, which has its headquarters at Cocanada, the chief port on the Coromandel Coast north of Madras:—

*Members.*—The Coromandel Co., Ltd.; Ripley & Co.; Gordon, Woodroffe & Co. (Madras) Ltd.; Wilson & Co.; Best & Co., Ltd.; Burmah-Shell Oil Storage and Distributing Co. of India Ltd.; The Agent, Imperial Bank of India; The Deccan Sugar and Abkhari Co., Ltd.; Samalkot & Parry & Co., Ltd., Vizagapatam.

*Members of the Committee.*—S. A. Cheesman (*Chairman*), W. Le Faucheur, J. D. James, G. M. Lake (*Secretary*).

The rules of the Chamber provide that by the term 'member' be understood a mercantile firm or establishment, or the permanent agency of a mercantile firm or establishment, or a society of merchants carrying on business in Cocanada or other place in the Districts of Kistna, Godavari, Vizagapatam, and Ganjam, and duly elected according to the Rules of the Chamber, and that all such be eligible but only members resident in Coca-

nada can hold office. Members are elected by ballot. The Committee, when called upon by disputing members or non-members of the Chamber, give their decision upon all questions of mercantile usage and arbitrate upon any commercial matter referred to them for final judgment. In either case a minimum fee of Rs. 16 must accompany the reference with Rs. 5 from a non-member and Re. 1 from a member as payment for the Chamber's Sealed Certificate.

The Committee consisting of 3 members, including the Chairman, is elected by ballot at the general meeting in January in each year for a term of 12 months. The entrance fee for each member, whose place of business is in Cocanada, is Rs. 100 and for each member whose place of business is elsewhere is Rs. 50. Subscription for members whose place of business is in Cocanada, Rs. 120 per annum, payable quarterly, for others Rs. 60 per annum, payable in advance. The Committee usually meets once a month on the penultimate Thursday and the general body meets on the last Thursday.

A Fortnightly Circular of current rates of produce, freights, and exchange is drawn up by the Committee.

## MARWARI CHAMBER OF COMMERCE.

(ESTABLISHED 1900.)

The main object of this Chamber is to foster the growth of commerce and industry in the country, to safeguard the interests of the commercial communities, to protect and promote the trade, commerce, manufactures, agriculture and industries of Bengal, to watch over and

protect the general commercial interests of persons engaged in trade, commerce, manufactures, agriculture or industries in India and in particular of Calcutta, and to deal with all questions connected with trade, commerce, agriculture, manufacture and industries. It

arbitrates in disputes arising out of commercial transactions' and also issues certificates of origin to exporters of indigenous goods. The Chamber is generally consulted by Government on questions of public interest and commercial matters. It undertakes special enquiries and action for securing redress of legitimate grievances of any branch of trade or industry. The Chamber is the Calcutta agent of the Central Cotton Committee and controls most of the Calcutta piece-goods market. It has an ordinary membership of about 760.

The Chamber accepts surveys to be conducted in the Technological Laboratory, Matunga, Bombay.

*President*:—M. L. Khemka.

*Vice-Presidents*:—Raj Bahadur G. V. Swalka and R. N. Bhojnagarwalla.

*Hon. Secretary*:—K. N. Gungthia. *Hon. Asst. Secretary*:—P. L. Saranogl.

The following Associations are affiliated with the Chamber:—Marwar Association, Kailmpong; District Marwari Merchants' Association, Darjeeling; The Wheat and Seeds Association, Calcutta; Sonada Merchants' Association, Sonada; The Indian Jute & Cotton Association Ltd., Calcutta; Assam Marwari Chamber of Commerce; Calcutta Salt Association; Cloth Merchants' Association, Siliguri; Upper Assam Marwari Chamber of Commerce, Jorhat; Bogra Cloth and Yarn Merchants' Association; Bengal Textile Unit Holders' Association.

*Address*: Imperial Bank Building, Burrabazar Branch, Calcutta.

*Telephone No.* D.B. 2265.

*Telegram Address*:—"Marchamber."

## THE BERHAMPUR CHAMBER OF COMMERCE (ORISSA).

The Berhampur Chamber of Commerce was established soon after the formation of the new province of Orissa. It is registered under the Indian Companies' Act and is recognised by the Government of Orissa. It maintains a library and an information service, arranges commercial arbitration and makes commercial opinion available to Government. It has nearly 100

members on its rolls and is represented on all important Committees set up by Government for various purposes.

*President*:—P. Narayana Rao, B.A. B.L.; *Vice-President*:—The Agent of Messrs. Haji Jamal Nur Mohammad; *Hon. Jt. Secretaries*:—J. Ramanur and T. R. Mohana Rao, B.A.; *Assistant*:—G. V. Rangacharyulu. *Address*:—Berhampur, Ganjam Dist., B. N. Rly.

## DEPARTMENT OF COMMERCIAL INTELLIGENCE AND STATISTICS.

(1, COUNCIL HOUSE STREET, CALCUTTA.)

The Department of Statistics was reabsorbed into the Department of Commercial Intelligence with effect from the 1st December 1922. The joint department has its office at No. 1, Council House Street, Calcutta, and was until lately administered by the Director General of Commercial Intelligence assisted by two Deputy Directors and an Assistant Director. The posts of Director General and Deputy Directors having been abolished there are now two Directors, one designated Director of Commercial Intelligence and the other Director of Statistics with one Assistant Director. It embraces two distinct classes of work; (a) the collection and dissemination of information connected with overseas trade which may be of use to Indian firms and (b) the compilation and publication of All-India statistics.

Among the important publications for which the Department is responsible are the following annual volumes:—Statement of the Foreign Seaborne Trade and Navigation of British India, Statistical Abstract for British India, Agricultural Statistics, Estimates of Area and Yield of Principal Crops and Indian Customs Tariff. The department also publishes a weekly journal—"The Indian Trade Journal"—the principal features of which are (a) information as to tariff changes in foreign countries which affect Indian interests, (b) notices of tenders called for and contracts placed by Government departments and public bodies, (c) crop reports and forecasts, (d) Government orders, communiques and other notifications affecting trade, (e) analysis of Indian trade statistics, (f) market reports, price and trade movements of the staple exports and imports, (g) trade enquiries for securing trade

members on its rolls and is represented on all important Committees set up by Government for various purposes.

The Department also administers the COMMERCIAL LIBRARY AND READING ROOM located at No. 1, Council House Street, Calcutta. This was at first a small departmental library used for the purpose of answering enquiries, but in 1919 the Government of India agreed to the formation of a combined technological library of reference in Calcutta in place of the separate libraries attached to the Departments of Commercial Intelligence and Statistics, and Patents and Designs, and the resultant Commercial Library and Reading Room was placed under the administrative control of the Director-General, which control is now exercised by the Director of Commercial Intelligence. It has now been expanded into a first-class technical library containing over 21,325 volumes on different subjects of commercial, economic and industrial interest as well as Indian and foreign statistical publications, and over 385 technical and commercial journals and market reports. Ordinarily books are consulted in the Library but they are also available on loan upon deposit of value throughout India.

The Department works in close co-operation with the Directors of Industries and other Government Departments in India, with the Indian Trade Commissioners in London, Toronto (Canada), Mombasa (East Africa), New York, Buenos Aires (Argentina), Alexandria, Sydney (Australia), Tehran (Persia) and the Indian Trade Agent, Kabul, with His Majesty's Trade Commissioners in India and the Dominions and with Consular Officers in various parts of the world.

## TRADE COMMISSIONER SERVICE IN INDIA.

### UNITED KINGDOM TRADE COMMISSIONER SERVICE.

The United Kingdom Trade Commissioners are the representatives in India, Burma and Ceylon of the Board of Trade. The two departments of the Board which are mainly concerned with external economic relations are the Commercial Relations and Treaties Department, which is responsible for general external commercial policy, and the Export Promotion Department, which acts as the executive instrument for fostering export trade. Both departments are under the same ministerial direction—the Secretary for Overseas Trade—who is responsible to the President of the Board of Trade under whose guidance he is concerned with the whole field of external trade.

In foreign countries the counterpart of the work performed by Trade Commissioners is undertaken by Foreign Service Officers in Commercial Diplomatic and Consular posts. The Board of Trade is associated with the Foreign Office in the staffing of commercial posts in foreign countries. But the trade policy of the United Kingdom is a matter for the President of the Board of Trade acting, as do all other Ministers, in consultation and agreement with those of his colleagues whose interests are also concerned.

**Function of United Kingdom Trade Commissioners.** The primary duty of the United Kingdom Trade Commissioners consists in the giving of assistance to governments, organisations, firms and individuals who wish to establish contact with sources of supply in the United Kingdom. The Trade Commissioner, in addition, himself collects information in regard to trade opportunities which may arise within his territory. He reports to the Board of Trade on all matters affecting the trade, industry and commerce of the area entrusted to him. He is responsible for maintaining close personal relations with ministers and officials of governments in his area, with chambers of commerce, trade associations and the principal importers and manufacturers. He aims at visiting the principal commercial centres, reporting upon foreign competition, on financial and trade conditions, and new legislation affecting trade. He is also expected to maintain a regular flow of commercial information of all kinds to the Board of Trade, to maintain active correspondence with firms in the United Kingdom who wish to extend their trade, and to give all possible assistance to representatives of

United Kingdom firms who may visit his territory.

The United Kingdom Trade Commissioners in India endeavour to maintain contact with United Kingdom representatives and agents in India. The offices are equipped with a wide range of directories and reference books of all kinds, including libraries of catalogues of the leading United Kingdom manufacturers. Firms desiring information with regard to specific manufacturers are invited either to call personally or to communicate their requirements in writing. It is hoped that local importers and buyers will not hesitate to make more extensive use of the information available in these offices, and to bring to the attention of the United Kingdom Trade Commissioners any cases where difficulties may have arisen over the harmonious development of trade between the United Kingdom and India.

#### Staff:

*Delhi*—Rowland Owen,

His Majesty's Senior Trade Commissioner in India, Burma & Ceylon.

G. T. Dow Smith,

His Majesty's Trade Commissioner at Delhi.

Temporary address: Old Secretariat, Delhi.

Telephone Nos. 5965 and 5966.

Telegrams: TRADCOM, Delhi.

*Calcutta*—W. Godfrey,

His Majesty's Trade Commissioner at Calcutta.

J. H. O'Hagan,

H. M. Trade Commissioner at Calcutta.

Address: Fairlie House, Fairlie Place. Telephone No. Calcutta 1042.

Telegrams: TRADCOM, Calcutta.

*Bombay*—K. E. Mackenzie,

His Majesty's Trade Commissioner at Bombay.

Address: 3 Wittet Road, Ballard Estate.

Telephone No.—Bombay 23095.

Telegrams: TRADCOM, Bombay.

*Colombo*—C. E. Thorogood,

His Majesty's Trade Commissioner in Ceylon.

Temporary address: Galle Face Hotel, Colombo.

Telephone No. 4211.

## THE CANADIAN FOREIGN TRADE SERVICE.

The Canadian Department of Trade and Commerce comprises, as one of its principal divisions, the Foreign Trade Service, formerly described as the Commercial Intelligence Service. This Service had its beginnings prior to the establishment of the Department in 1892 and has since undergone considerable expansion. Before the war it included a head-quarters staff in Ottawa and thirty-four Trade Commissioner offices abroad, seventeen of these being in British and an equal number in foreign countries. Several of these were closed during the war years but are being progressively

reopened and at the beginning of 1946 the service comprised offices in the United Kingdom, the Dominions, India, Newfoundland, Eire, the West Indian Colonies, the United States, Cuba, Egypt, the principal countries of Central and South America, the Netherlands, Norway, Sweden, Portugal, France, and Belgium. Plans are at present under way to expand the service both in respect to offices and trained personnel in order to assist in the transition of Canada's extensive war-time trade to a normal commercial basis.

In those countries where Canada has established diplomatic representation the Trade Commissioner's office has been incorporated into the Canadian embassy or legation.

The office of the Canadian Trade Commissioner for India, Burma and Ceylon was established in Calcutta in 1922 and was transferred to Bombay on April 1, 1940. Its services are at the disposal of Canadian firms interested in the export of their goods to the Indian, Burma and Ceylon markets and to Canadian Manufactur-

urers and others who may be interested in the purchase of local products. It is also in regular touch with import houses in these countries and is prepared to cooperate as well with exporters interested in the Canadian market.

*Canadian Government Trade Commissioner in India, Burma and Ceylon.*—Paul Sykes, Gresham Assurance House, Mint Road, Bombay, P.O. Box 686, Telephone—20672, Tel. Address:—"Canadian, Bombay."

## THE AUSTRALIAN GOVERNMENT TRADE COMMISSIONER SERVICE IN INDIA.

The Australian Government Trade Commissioner is located in Bombay and covers the territory of India, Burma and Ceylon.

The Trade Commissioner deals with enquiries received from India, Burma and Ceylon and places Indian Merchants and Firms in touch with manufacturers in his country. He maintains a flow of trade information to the Department of Commerce, Australia, for dissemination to Australian exporters and information on specific openings for trade, including Government contracts and tenders for which Australian products might be suitable. He watches the

demand for specific goods and gives information concerning competition to be met in their supply. An important function is to provide details of credit conditions and terms of payment. Market surveys on specific commodities are prepared and sent for the information of trade interests in Australia.

Information and literature is available on all aspects of trade with Australia.

*Australian Government Trade Commissioner in India*—H. R. Gollan, P.O. 6, M.C. Address: "Fairlie Place, Calcutta".

## CEYLON TRADE COMMISSIONER FOR INDIA.

In 1937 the Government of Ceylon decided to send over to India a Trade Commissioner for the purpose of stimulating trade between Ceylon and India. "Ceylon House in Bombay" was thus inaugurated in June, 1937, and was to continue operation for a period of three years as an initial experiment. At the expiration of the first period of three years, it has been decided by the Ceylon Government to continue Ceylon House for a further period. The purpose of Ceylon House is not actually to enter into trade directly but to put Ceylon producers in direct touch with Indian importers and to see that all Ceylon products get a fair deal in the

Indian markets or find outlets where they are not much known. In pursuance of this policy the Commissioner helps all local inquirers in obtaining the necessary trade contacts. Information and literature relating to Ceylon and Ceylon produce are being supplied by the Commissioner and free advice is given to intending tourists.

*Trade Commissioner.*—Annesley de Silva; *Secretary.*—G. A. Fernando, B.A. (Lond.). Address: Ceylon House, Jehangir Wadia Building, Bruce Street, Fort, Bombay. Telegrams: "Lankatrade." Tel. 31239.

## SOUTH AFRICAN GOVERNMENT TRADE COMMISSIONER SERVICE.

The South African Government, Department of Commerce and Industries, decided to open the office of the Trade Commissioner in India in 1940 primarily for the purposes of furthering the export of South African products to India, to maintain informative correspondence with firms in South Africa who wish to extend their trade in this direction and to give all possible assistance to representatives of South African firms who may visit this territory, based on the policy of assistance without interference.

During the War the Government of the Union of South Africa found it necessary to obtain various essential commodities from India and the National Supplies Control Board called upon the Trade Commissioner in Bombay to assist in the purchase and prompt shipment of these commodities with the co-operation of the relative Government Control bodies in India

The Trade Commissioner's office also furnishes information to local importers and buyers who wish to contact South African Manufacturers and Exporters and is equipped with reference books and lists of manufacturers who have goods to offer.

Interesting literature and other material relating to publicity, travel and immigration into South Africa is supplied upon application, to enquirers.

SENIOR TRADE COMMISSIONER FOR THE EAST:—

ALBERT H. HANDFORD.

Address: Gresham Assurance House, Mint Road, Bombay. P. O. Box 763.

## IRANIAN TRADE REPRESENTATION IN INDIA.

The Iranian Trade Representation in India purchases all goods required by the Iranian Government as also deals with enquiries received from India and Ceylon and tries to put in contact Indian merchants and firms with firms and merchants in Iran.

The Iranian Trade Representation studies ways and means of improving the trade between India and Iran and endeavours to give all kind of assistance to firms and traders who wish to trade with Iran.

*Address*.—The Office of the Iranian Trade Representation, "Dorchester" Flat 4, Queens Road, Fort, Bombay. Telephone No. 32418. *Telegraphic Address*.—"IRAN TRADE, BOMBAY". *Iranian Trade Commissioner in India*.—N. Emami. *Residence*.—"Alhambra," Carmichael Road, Cumballa Hill, Bombay. Telephone No. 45093. *Assistant Trade Commissioner*.—A. Behnia. *Chief Accountant*.—G. V. Tehrani.

## THE INDIAN CENTRAL COTTON COMMITTEE.

*Office*.—Nicol Road, Ballard Estate, Bombay.

*Secretary*.—D. N. Mahta, O.B.E., B.A. (Oxon.).

*Asst. Secretary*.—C. J. Bocarro, M.B.E., M.A.

*Offg. Director, Technological Laboratory*.—D. L. Sen, M.Sc. (Tech.) (Manch.) M.Sc. (Bom.), A.I.I.Sc., F.I.C.

The Indian Central Cotton Committee was constituted by the Government of India in March 1921, as a result of the recommendation of the Indian Cotton Committee of 1917-18. Originally the Committee was purely an advisory body but with its incorporation under the Indian Cotton Cess Act in 1923, it became an administrative body having at its disposal funds for the improvement and development of the growing, marketing and manufacture of cotton in India. The funds of the Committee are derived from the Cotton Cess of two annas per bale (four annas for the first three years) which was imposed in 1923. Having complete control over its funds, the Committee has been able to build up a satisfactory reserve and is at present spending about Rs. 10 lakhs per annum on cotton improvement, mainly on agricultural and technological research and seed distribution and marketing schemes.

The activities of the Committee now extend to all branches of cotton improvement in India, and, as an authoritative body to advise the Central and Provincial Governments on important matters of cotton policy, it has attained an outstanding position. The Committee provides funds for research into cotton problems of all-India importance and for the development, extension and marketing of improved varieties of cotton. The aim, however, has always been to supplement and not supplant the work of the Agricultural Departments in the cotton growing provinces and Indian States. Including as it does representatives of growers, agricultural officers, traders, spinners and manufacturers, it has been an invaluable forum for the discussion of many problems of general concern. A list of the members constituting the Committee and the various interests they represent as on 1st April, 1946 is given below :—

### MEMBERS OF THE COMMITTEE.

*President*.—Sir Herbert Stewart, C.I.E., I.A.S., Vice-Chairman, Imperial Council of Agricultural Research.

The Agricultural Commissioner with the Government of India, *ex-officio* (Vacant).

### REPRESENTATIVES OF AGRICULTURAL DEPARTMENTS.

*Madras*.—Rao Bahadur Dr. B. Viswanath, C.I.E., Director of Agriculture.

*Bombay*.—Dr. Ganda Singh Cheema, D.Sc., I.A.S., Director of Agriculture.

*United Provinces*.—C. Maya Das, I.A.S., Director of Agriculture.

*Punjab*.—Malik Sultan Ali Noon, I.A.S., Director of Agriculture.

*Central Province & Berar*.—(Vacant).

*Sind*.—Rai Bahadur R. L. Sethi, Director of Agriculture.

The Director of Commercial Intelligence, *ex-officio*.

### REPRESENTATIVES OF CHAMBERS OF COMMERCE AND ASSOCIATIONS.

The East India Cotton Association, Sir Purshotamdas Thakurdas, K.B.E., C.I.E.

The Bombay Millowners' Association, Sir Sorab Saklatvala, M.L.A.

The Bombay Chamber of Commerce, L. F. H. Goodwin.

The Indian Merchants' Chamber, Chimanlal B. Parikh.

The Karachi Chamber of Commerce, A. P. Darlow.

The Ahmedabad Millowners' Association, Nanddas Haridas.

The Tuticorin Chamber of (Commerce), (Vacant).

The Upper India Chamber of Commerce, Major S. R. Pocock, M.C., M.B.E., M.L.A.

The Empire Cotton Growing Corporation, Sir William Roberts, C.I.E., M.L.A.

### COMMERCIAL REPRESENTATIVES NOMINATED BY CENTRAL GOVERNMENT.

*Central Provinces and Berar*.—Baburao Krishnaji Patil; Seth Gopaldas Mohta.

*Madras*.—G. V. Doraiswamy Naidu.

*Punjab*.—Sardar Ujjal Singh.

*Bengal Representative*.—Suryya Kumar Basu.

### CO-OPERATIVE BANKING REPRESENTATIVE.

Sir Chunilal V. Mehta, F.C.S.I.

### REPRESENTATIVES OF COTTON- GROWING INDUSTRY.

*Madras.*—D. Gnanasromani; L. Madhava Reddi.

*Bombay.*—Rao Bahadur F. B. Laxmeshwar; B. K. Patel.

*United Provinces.*—Major Nawab Sir Mohd. Jamshed Ali Khan, M.B.E., M.L.A.; Rai Bahadur Kunwar Lakshmi Raj Singh, M.L.C.

*Punjab.*—Main Mohd. Nurulla; Chaudhri Ram Sarit, M.L.A.

*Central Provinces and Berar.*—Rao Bahadur Sir Madhwarao Deshpande; Mir Riyat Ali.

*Sind.*—Fakirji Phirozjee Gohwala.

### REPRESENTATIVES OF INDIAN STATES.

*Hyderabad State.*—Rai Bahadur Kalidasa Sawhney, Director of Agriculture.

*Baroda State.*—Sir Robert Allan, C.I.E., Commissioner of Agriculture.

*Gwalior State.*—N. M. Deshmukh.

*Rajputana and Central India States.*—(Vacant.)

### ADDITIONAL MEMBERS NOMINATED BY THE CENTRAL GOVERNMENT.

Rao Sahab V. C. Pavate, Deputy Director of Agriculture, S. D. Dharwar; M. J. Narasimhan, Director of Agriculture in Mysore, Bangalore; R. Balasubramania Ayyar, Cotton Specialist, Coimbatore; Musahib-i-Khas Bahadur Capt. H. C. Dhandia, Commerce Minister, Holkar State, Representative of the Holkar State; Dr. B. L. Sethi, Deputy Director of Agriculture, Western Circle, U.P., Meerut. Sir Shri Ram, Representative of the Cotton Millowners of Delhi; Dewan Bahadur Sir T. Vijayaraghavacharya, F.B.E.; Camer Tyabjee, Second representative of Hyderabad State; Dr. V. K. R. V. Rao, Director of Statistics, Food Department, Government of India; Sir Padampat Singhania; R. G. Saraiya, O.B.E., J.P.; Roger Thomas, C.I.E.; G. V. Deshmukh; Khan Sahib Asif Yusuf Ali, Director of Agriculture, Bahawalpur State, Bahawalpur; Sir Chunilal B. Mehta (Vice-President) and Sardar Bahadur Sardar Bant Singh.

Amongst the research schemes of the Committee, plant breeding schemes for the improvement of quality naturally take pride of place. The schemes employed by the Committee for its research work have varied little in character since 1925, though they have grown in number. It continues to maintain a Technological Laboratory at Bombay which includes a complete experimental spinning plant and a scientific laboratory for research on the cotton fibre and a Testing House which is recognised by the F.I.S.I.A. The Committee also provides a large proportion of the funds for the Indore Institute of Plant Industry.

For a considerable period the Committee restricted its grants to agricultural research, but in 1930 it was decided that the time had come to add its support to the efforts already being made to bridge the gap between the experiment station and the cultivator and to supplement the funds which the Agricultural Departments were devoting to the introduction of improvements into agricultural practice. Special attention from that time began to be devoted to seed distribution schemes.

The Committee has not stopped at the production of better cotton, but from its inception has devoted special attention to better marketing, to the prevention of adulteration and other abuses and to many other problems connected with the cotton trade of the country. Regulated Cotton Markets existed in Berar before the establishment of the Committee, and that system which had stood the test of time was commended with certain modifications for general adoption. Regulated Cotton Markets have now been established in Bombay, Central Provinces, Madras, Punjab, Hyderabad, Baroda and Indore. Similarly, on the recommendation of the Committee, the Cotton Transport Act was passed in 1923 by which Provincial Governments are empowered to exclude from any specified area cotton, *kapas* or seed from outside unless required for a special purpose and covered by a licence. Prior to the passing of this Act, inferior cottons used to be imported in large quantities into the staple cotton tracts for purposes of adulteration, to the detriment of the reputation of several valuable cottons. The Act is now in force in almost all the important staple cotton areas of Bombay, Madras and the Central Provinces as well as in Baroda, Rajpipla, Chhota Udepur, Hyderabad and Indore, etc. In 1925, on the recommendation of the Committee, the Cotton Ginning and Pressing Factories Act was passed. This provides for a certain measure of control of ginning and pressing factories and especially for the marking of all bales of cotton pressed with a press mark and serial number which enables them to be traced to their origin. Recently the Act has been used for the prevention of watering and for the mixing of non-cotton articles with cotton. The Committee has also taken steps to bring to the notice of the trade, both in India and abroad, those improved varieties which have now reached a commercial scale.

It may be stated without hesitation that, as a result of the efforts of the Committee, the last nineteen years have seen a marked change in the character of the Indian crop, particularly in the percentage of short and medium staple. Equally important is the result of agricultural research and its application to the yield of cotton per acre. The average yield per acre in the quinquennium 1929-34 for the whole country was 112 lbs. This is 18 per cent. higher than for the quinquennium 1927-32. The average yield per acre in 1944-45 was 121 lbs. The ascertained area under improved cotton during 1944-45 was about 52 per cent. of the total. The ultimate ideal is to encourage the establishment of single variety tracts wherever agricultural conditions and the limitations of irrigation supply and soil make this possible.

## THE EAST INDIA COTTON ASSOCIATION, LIMITED.

**Bombay.**—The Association is the outcome of the findings of the Indian Cotton Committee which was appointed by the Governor-General in Council under a resolution dated September 27th, 1917. Until the end of 1917 the Cotton Trade of Bombay was in the hands of seven distinct bodies, viz., The Bombay Cotton Trade Association, Ltd., The Bombay Cotton Exchange, Ltd., The Bombay Millowners' Association, The Bombay Cotton Brokers' Association, Ltd., The Marwari Chamber of Commerce, The Bombay Cotton Merchants' and Mucacadums' Association, Ltd., and The Japanese Cotton Shippers' Association. None of these bodies were representative of the trade as a whole and their interests often came into conflict with each other. The necessity of a system of periodical settlements, such as existed in Liverpool, was badly felt, especially when speculation was rife in futures which was so excessive in 1918 that the Trade had to invoke the aid of Government to prevent a financial crisis.

The Cotton Contracts Committee was created under the Defence of India Act in June 1918 as a temporary measure under the Chairmanship of G. Wiles, I.C.S. This body was replaced by the Cotton Contracts Board in 1919, which continued to function until May 1922, when the Act, under which the Board worked, was repealed, and its functions were carried on by the East India Cotton Association under Bombay Act No. XIV of 1922.

The Association continued to function under the above Act until 31st October, 1932. With effect from 1st November, 1932, the Association has been regulating transactions in cotton under Bombay Act No. IV of 1932 under which it has been declared to be a recognised Cotton Association.

The Constitution of the Board on 1st September 1945 was as under:—

Sir Purshotamdas Thakurdas, K.B.E., C.I.E. (President); Haridas Madhavadas (Vice-President), (Sellers' Panel); Ramdas Kilachand, Jehangir Pestonji Patel, Madanmohan R. Ruiya, Arthur Pether (Buyers' Panel); Hansraj Jivandas, Fathechand Jhunjjunwala, Shivchandari Jhunjhunwala (Sellers' Panel); Chunilal Krishanlal Sayta, Maganlal Popatbhai Mehta, Chandulal Chhotalal, Hemraj Anandilal, Madanlal Nemani, Hiral A. Dave (Brokers' Panel); Rao Bahadur Sir Madhaorao G. Deshpande, K.B.E., L. Madhava Reddi, B.A., B.L., Vakil, Major Nawab Mohd. Jamshed Ali Khan, M.B.E., M.L.A. (Cotton Growers' Representatives nominated by the Indian Central Cotton Committee); Rao Bahadur F. B. Laxmeshwar Kurtkoti, P.M. Bildiker (Cotton Growers' Representatives nominated by the Government of Bombay).

### Officers.

C. M. Parikh, B.Com., Secretary; S. A. P. Aiyar, Assistant Secretary.

Some of the objects for which the Association is established are:—To provide and maintain suitable buildings or rooms for a Cotton Exchange in the City of Bombay and elsewhere in India and to regulate admission to

and prohibition of the use thereof and the nature and times of such user, whether in the case of the general body or particular classes or any individual or firm or company using the Exchange; to provide forms of contracts compulsory or permissive and regulate the making, carrying out and enforcement or cancellation of contracts; to adjust by arbitration or otherwise controversies between persons engaged in the cotton trade; to establish just and equitable principles in the trade and to maintain uniformity of control; to fix or adopt standards of classification of cotton; to acquire, preserve and disseminate useful information connected with the cotton interest throughout all markets; to decrease or insure the local risk attendant upon business; and generally to control, promote and regulate the cotton trade in the Presidency of Bombay and elsewhere in India, improve its stability and augment the facilities with which it may be conducted; to establish and maintain a Clearing House for the purpose of dealing with cotton transactions, and to regulate admission to and prohibition of the user thereof and the nature and times of such use whether in the case of the general body or particular classes or any individual or firm or company using the Clearing House; to regulate the handling and exportation of cotton from India and the importation of cotton into India in so far as it may be imported; to bring, prosecute, or defend, or aid in bringing, prosecuting, or defending, any suits, actions, proceedings, applications, or arbitrations on behalf of Members or Associate Members or Special Associate Members or otherwise as the Directors of the Association may think proper or conducive to the objects of the Association and to prescribe the principle of framing of contracts with a view to eliminate the temptation and possibility of speculative manipulation.

The Association has a fine Building at Sewri Cotton Depot, containing 121 Buyers' Rooms and 84 Sellers' Rooms, a large Trading Hall on the lines of Liverpool and New York Exchanges, Survey Rooms, Appeal Rooms, etc.

The Association has another fine Building, "The Cotton Exchange" at the corner of Sheikh Memon Street and Kalbadevi Road, wherein trading in "forward" contracts is conducted. It comprises of a basement, a ground floor (Trading Hall) with two galleries and six other upper floors. There are 114 telephone cabins for members on the ground floor and the galleries. The top floor accommodates the administrative offices of the Association and the Clearing House, and the remaining five floors contain 113 rooms for members' offices.

The Association has a membership of 537.

The Bombay Cotton Annual containing matters relating to every branch of the trade is published annually in December and statistics are issued twice weekly.

**Address:**—Cotton Exchange, Marwari Bazar, Bombay 2.

**Telephone:**—Bombay No. 26176.

**Telegraphic Address:**—"Cotboard."

## British & Japanese Trade Delegations.—

This was followed by the arrival in India of an official Delegation from Japan and an unofficial Trade Delegation from the United Kingdom. The United Kingdom unofficial Delegates' deliberations with Indian millowners culminated in what has been termed the Mody-Lees Pact of 1933, an understanding which was to be in force until the end of 1935. Similar discussions between certain unofficial delegates from Japan and Indian millowners proved abortive, but the efforts of the Japanese official delegates resulted in a fresh Convention and Protocol being agreed to early in 1934, under which a link was established between the exports of Indian raw cotton to Japan and the imports of cotton piece-goods from Japan. Japan agreed to take one million bales of Indian raw cotton in return for the right to export 325 million yards of cotton piece-goods to this country, with a maximum limit of 400 million yards for an aggregate offtake of 1½ million bales of Indian raw cotton. Japan was also accorded most-favoured-nation treatment in respect of her miscellaneous trade. In virtue of the terms of the Protocol, the duties on Japanese cotton piece-goods were reduced, with effect from 8th January 1934, to 50 per cent. *ad valorem* with a minimum specific duty of 5½ annas per pound on plain grey goods.

The protective duties on cotton yarn and piece-goods imposed by the Cotton Textile Industry (Protection) Act, 1930, were due to expire on 31st March 1933, but as Government were not able to complete their consideration of the report of the Tariff Board of 1932 (which had recommended the institution of specific duties based on weight subject to their being combined with alternative *ad valorem* duties to prevent a loss of revenue and the imposition of a duty of one anna per pound in the case of yarns below 50s count) before that date, they extended the provisions of the Act for another year.

**Textile Protection Bill.**—The Cotton Industry (Textile Protection) Bill of 1934 sought to give effect to the recommendations of the Tariff Boards on the cotton and sericultural industries in the light of the Indo-Japanese Protocol and the unofficial agreement entered into between Indian and Lancashire millowners. So far as yarn was concerned, the Act, as passed, fixed the rates of duties at 5 per cent. (British) and 6½ per cent. (non-British) with a corresponding alternative minimum specific duty of 1½ annas and 1½ annas per pound on counts up to and including 50s. In the case of piece-goods, the levels of the duties were fixed at 25 per cent. and 50 per cent. on British and non-British goods respectively, with a minimum specific duty of 4½ annas and 5½ annas per pound on plain grey goods. The Act also guaranteed protection to the industry for a period of five years ending March 1939, but recognized the need for an examination of the scale of duties on two occasions: firstly on the expiry of the Mody-Lees Pact at the end of 1935, and secondly, at the end of the Indo-Japanese Protocol in March 1937. Accordingly, at the end of 1935, Government directed the Tariff Board to examine the adequacy of the then existing levels of duty on British goods. Accepting the recommendations of the Board, Government reduced, with

effect from June 25, 1936, the duty on all United Kingdom cotton piece-goods, with the exception of prints, to 20 per cent. *ad valorem* with a minimum specific duty of 3½ annas per pound on plain grey goods.

**Textile Trade Agreement.**—The Indo-Japanese Trade Protocol was subsequently renewed for a further period of three years ending March 1940, without any material modification in the rates of duties applicable to Japanese cotton piece-goods. With the separation of Burma from India in April 1937, however, the basic quota of cotton piece-goods for India was reduced to 283 million yards, rising to a maximum of 358 million yards, leaving a margin of 42 million yards for Burma.

The negotiations between the Government of India and His Majesty's Government in the United Kingdom for the conclusion of a new Trade Agreement in replacement of that entered into at Ottawa in 1932 were brought to a conclusion early in 1939, and the new Agreement specifically provided for a reduction of the basic rates of duties on United Kingdom cotton piece-goods as under:—

Printed goods ..	17½% <i>ad valorem</i> .
Grey goods ..	15 % <i>ad valorem</i> or As. 2-7½ ps. per lb., whichever is higher.
Others ..	15 %

The basic rates were subject to a reduction of 2½ per cent. if imports from the United Kingdom in any year were less than 350 million yards and to an increase to the same extent in the event of United Kingdom imports exceeding 500 million yards. The new rates of duty came into force on April 1, 1939. In the year 1939-40, the European War affected imports from the United Kingdom, and as her sendings of piece-goods did not exceed 350 million yards, the duties on all classes of British piece-goods were reduced by 2½ per cent. with effect from April 17, 1940.

**Between Two Wars.**—This was a period of chequered career for the industry. Yet it recorded such a good progress in the inter-war period that the share of imports in the cloth requirements of the country decreased from about four-fifths to much less than a fifth. In the same period, the number of mills in British India increased from 227 to 355, the number of spindles from 6.2 millions to 8.4 millions and the number of looms from 109,000 to 168,000. The output of yarn more than doubled in weight and the output of piece-goods nearly trebled in length. Many technical improvements were effected by the industry during this period, chief among these being the installation of modern machinery for spinning and weaving and the development of new bleaching, dyeing, printing and finishing processes.

The following table shows at a glance the progress made by the Indian Cotton Mill Industry during the last forty-five years:—

**Fine Count Yarn.**—Substantial progress has been made in the last few years in the direction of spinning fine count yarn. Much, however, remains to be accomplished; but the duty

of one anna per pound which Indian mills have now to pay for long staple cotton imported from abroad is a factor which is likely to hamper more rapid progress.

The statement below shows the total quantities of woven goods manufactured in Indian mills during the past four years :—

	1941-42.	1942-43.	1943-44.	1944-45.
	Yds.	Yds.	Yds.	Yds.
Grey & Bleached goods .. ..	3,310,230,682	3,020,518,284	3,765,350,893	3,608,103,822
Coloured Piece-goods .. ..	1,183,382,586	1,088,818,506	1,105,336,010	1,118,368,451
Grand Total ..	4,493,613,268	4,109,336,790	4,870,686,903	4,726,472,273

Here again, it may be pointed out that Indian mills are now turning out increasingly larger quantities of fine Dhooties, Cambries and fine Longcloth on the lines recommended by the first Tariff Board (1927).

**Textile Industry and the War.**—After continuous period of almost unrelieved gloom extending over a period of nearly two decades, culminating in measures being actively explored with a view to bringing about an organised curtailment of production throughout the country, the war in Europe which commenced in September 1939 opened up the prospect of a spell of prosperity for the industry. Following the cessation of trade with Japan, which happened to be the leading supplier of cotton textile to the East in December 1941, the Indian cotton textile industry enjoyed a completely monopolistic position. It was faced with a steadily expanding demand from overseas, an increasing volume of war orders and growing domestic requirements for civil purposes stepped up by inflationary forces. The cloth production was stepped up from 4,012·4 million yards in 1939-40 to the record level of 4,870·6 million yards in 1943-44. Yet the industry was unable to meet the growing demand and the prices were pushed up to four times the pre-war levels.

In May 1943 the Government of India issued the cotton cloth and yarn (control) order based on an agreement between the Government of India and the representatives of the textile industry. Its objects were to reduce prices and stimulate production by controlling the cost and supply of mill stores and by regulating the price of raw cotton and by superintending the distribution of cloth from the mills to the retailers. The control authorities were, however, faced with a formidable task created by reduction in output due to coal shortage and *hartals* on the one hand and growing demand on the other. Consequently, though in the following

two years, the prices stamped on the cloth were brought down by about 60 per cent. the full benefit was not passed to the consumer owing to widespread black market activity, mainly encouraged by illicit exports due to trade regulations and large scale hoarding as inflation hedge.

The latest supply position was reviewed by the Chairman of the Textile Control Board recently when he said: "In the calendar year 1945, Indian cotton mills produced 4,687 million yards of cloth and 1,625 million lbs. of yarn in 1944 and 4,715 million yards of cloth and 1,620 million lbs. of yarn in 1943. The loss in production in 1944 is primarily due to reduction in output following stoppages of mills for lack of coal or inferior coal. In 1945 a higher production might have been attained had it not been for a large number of spindles and loom hours lost through *hartals*, shortage of labour, shortage of raw materials, etc. It is estimated that the total quantity of cloth and yarn exported in 1945 would be approximately 387 million yards of cloth and 13 million lbs. of yarn as compared with 434 million yards of cloth and 18 million lbs. of yarn in 1944. Supplies of cloth and yarn for defence services in 1945 have amounted to 417 million yards of cloth and 25 million lbs. of yarn as compared with 583 million yards of cloth and 28 million lbs. of yarn in 1944. The net available supplies of mill made cloth for civilian consumption in 1945 amount, therefore, to 3,883 million yards as compared with 3,794 million yards in 1944. Including handloom, it is estimated that the cloth available for the civilian population of India in 1945 is approximately 14 yards per head per annum for India's population of 400 million."

The table below sets out the exports of cotton twist and yarn from India to her chief export markets :—

	1938-39.	1941-42.	1943-44.	1944-45.
	lbs.	lbs.	lbs.	lbs.
United Kingdom .. ..	182,238	3,651,838	..	..
Burma .. ..	12,442,644	29,165,816	..	..
Straits Settlements .. ..	5,537,768	2,506,320	..	..
Hongkong .. ..	8,168,448	3,881,286	..	..
Syria .. ..	3,400,400	1,547,100	14,000	841,360
Others .. ..	8,228,101	49,776,205	18,922,952	16,077,053
Grand Total ..	37,959,599	90,528,565	18,936,952	16,918,413

return owing to the high margin of profit varying up to 46 per cent. usurped by a chain of middle men.

With a view to improving the position of the industry, the Government of India have constituted the All-India Handloom Board on which the weaver, the provincial governments and Indian States interested in the industry are represented. The recommendation of the Board favouring the increase of the present yarn supply to the industry by reserving half the production from the spindles to be installed during the first five years of the post-war development plan has been accepted by Government. Proposals for organising the industry on a sound footing by rationalising and standardising its products and consolidating its markets are under examination. A scheme is being evolved for ensuring free inter-provincial movement of handloom cloth in order to enable the industry to regain the pre-war markets within the country.

**Post-War Plan.**—The expansion of India's present productive capacity of mill-made cloth from 4,800 million yards to 7,200 million yards per annum is desirable but impracticable at present because of difficulty in securing the necessary machinery, says a press note announcing the post-war plan for the industry issued by the Industries and Supplies Department, Government of India, on May 3, 1946. It adds that an expansion of about 2.75 million spindles proposed as the immediate target will produce an additional 1,700 million yards a year, consisting of 510 million yards of fine and 1,190 million yards of coarser cloth. This production, together with handloom cloth, will help to provide approximately 18 yards per head per annum after allowance for exports of 10 per cent. of the total Indian production.

Planning must be on an all-India basis and the distribution of new plants and extensions

of the existing plants should follow territorial divisions of India. The plan will in the present circumstances be an interim plan and it is the intention of the Government of India to review it when world economic conditions or other circumstances make a review desirable. In order to ensure increased supplies of yarn for handloom weavers and other consumers, the Government of India have directed that at least 25 per cent. of the new spindles installed shall be left uncovered by looms. Each British Indian Province and Indian State would of course be the best assessor of its own exact needs, and the Government of India propose, therefore, that the Provinces and States may, if so advised, reserve a larger spindleage for such purpose.

On the question of reduction in the duty on foreign cotton and a full rebate of import duty paid on cotton for the benefit of India's export trade, the press note says that the Government of India will review the matter when competitive conditions return in order that the Indian export trade may be able to compete in world markets on equal terms with other countries.

The Government of India have turned down the suggestion for banning imports of second-hand machinery on the ground that it will be some years before India can produce enough cloth for her own requirements. They will, therefore, allow import licences for second-hand machinery for the present if they are fully satisfied that the machinery in question will be serviceable for a reasonable period and suitable for economic production. As regards the suggestion that import of certain machinery should be permitted freely from any country in the world, Government consider that import should be permitted only when there is reason to believe that the plant will be delivered appreciably earlier or will be considerably cheaper or better than if obtained from the sterling area.

## Progress of the Industry.

The record of the jute industry may well be said to be one of uninterrupted progress. The following statement shows the number of Mills, capital invested, number of looms and spindles employed in the industry in the various Provinces from 1929-30 to 1938-39 :—

Province.	No. of Mills.	Authorised Capital Rs., £ and \$	Paid-up Capital Rs., £ and \$	Number of		
				Looms.	Spindles.	
Bihar .. .. .	3	Rs. 62,00,000†	Rs. 39,00,000	455	11,025

† Capital of one mill not stated.

(a) Capital of two mills not stated.

(b) Includes one mill in French Settlements.

(c) The mill is situated in Raigarh State.

(d) Capital of one mill not stated as it has other branches of business for which capital cannot be distinguished.

**Jute and Jute Manufactures.**—(Rs. 45,42 lakhs). The total export of raw and manufactured jute during the year 1942-43 amounted to 803,000 tons as compared with 1,213,000 tons in 1941-42, showing a decrease of 350,000 tons or 29 per cent. The value of these shipments

which also recorded on equal percentage decrease fell from Rs. 64,31 lakhs to Rs. 45,42 lakhs. The following table shows the variation in export of raw jute and manufactured goods separately during the past five years as compared with 1935-36.

	Export of raw jute.	Percentage variation as compared with 1935-36.	Exports of sacking bag and cloth.	Percentage variation as compared with 1935-36.	Export of Hessian bags and cloth.	Percentage variation as compared with 1935-36.
	Tons (000)		Tons (000)		Tons (000)	
1935-36 ..	771	100	438	100	354	100
1938-39 ..	690	89	488	111	451	127
1939-40 ..	570	74	511	117	546	154
1940-41 ..	243	32	445	102	404	131
1941-42 ..	315	41	403	92	460	130
1942-43 ..	243	32	331	76	273	77

Exports of raw jute decreased in quantity from 315,000 tons in 1941-42 to 243,000 tons in 1942-43 or a decrease in 23 per cent, the value showing a fall of 13 per cent from Rs. 10,42 lakhs to Rs. 9,02 lakhs. The decline was shared by almost all the principal consuming countries except the United States of America which occupied the premier place for the first time displacing the United Kingdom. Exports to the United States of America increased from 99,000 tons to 124,000 tons in the year under review, but those to the United Kingdom fell by 57,000 tons to 89,000 tons in 1942-43. As a result of the situation brought about by the war the Continental countries excluding the U.S.S.R. were completely out of the picture. Export to U.S.S.R. amounted to 7,000 tons as against 14,000 tons in 1941-42. There were no exports to China and Japan in the year under review which took respectively 1,700 tons and 2,000 tons in 1941-42. The amount sent to the Argentine Republic was 7,000 tons as against 12,000 tons, while that to Brazil 9,000 tons as against 15,000 tons in the preceding year. Shipments to Australia fell from 4,000 tons to 2,000 tons in 1942-43.

The consumption of raw jute by Indian mills recorded a slight decrease in 1942-43 as compared with that in the preceding year. The following table shows the exports and Indian consumption of raw jute during the last five seasons, July to June:

Season (July-June)	Exports of raw jute.	Consumption in India.*	Proportion of consumption to exports. (%)
	Tons (000)	Tons (000)	
1938-39 ..	693	1,112	160
1939-40 ..	529	1,288	243
1940-41 ..	211	989	410
1941-42 ..	276	1,222	443
1942-43 ..	235	1,202	511

\*Figures refer to mills in the membership of the Indian Jute Mills Association.

It will be observed that during all these years consumption was higher than exports, the relative proportion between the two being the highest in 1942-43 when the consumption was five times that of exports.

Exports of jute bags and cloth in the past three years are shown in the following table:—

	Bags (Millions.)	Cloth (Million yards.)
1940-41 ..	678	1,546
1941-42 ..	492	1,096
1942-43 ..	406	908

The Indian Jute Mills Association, now one of the most important, if not the most important, of the bodies affiliated to the Bengal Chamber of Commerce, was started under the following circumstances:—In 1886 the existing mills, finding that, in spite of the constant opening up of new markets, working results were not favourable, came to an agreement with the late S. E. J. Clarke, Secretary to the Chamber of Commerce as trustee, to work short time. The only mills which stood out of this arrangement were the Hooghly and Serajgunge. The first agreement for six months dating from 15th February 1886, was subsequently renewed at intervals without a break for five years up to February 15, 1891. The state of the market at the time of the renewals dictated the extent of the short time, which varied throughout the five years between 4 days a week, 9 days a fortnight and 5 days a week. Besides short time, 10 per cent. of the sacking looms were shut down for a short period in 1890. An important feature of this agreement was a mutual undertaking by the parties not to increase their spinning power during the currency of the agreement, only a few exceptions being made in the case of a few incomplete new mills.

**Working Hours.**—With the introduction of the electric light into the mills in 1890; the working day was increased to 15 hours, Saturdays included, which involved an additional amount of cleaning and repairing work on Sundays. In order to minimise this Sunday work and give them a free Sunday, an agitation was got up in 1897 by the Mill European assistants to have the engines stopped at 2 or 3 p.m. on Saturdays. The local Government took the matter up, but their action went no further than applying moral suasion backed by a somewhat half-hearted threat. The Mill Association held meetings to consider the question and the members were practically agreed as to the utility of early closing on Saturdays, but, *more suo*, could not trust

themselves to carry it out without legislation. Unfortunately the Government of India refused to sanction the passing of a Resolution by the provincial Government under the Factory Act and the matter was dropped. It is about 20 years now that the Jute Mills Association in despair brought out an American business expert, Mr. J. H. Parks, to advise them on the possibility of forming a jute trust with a view to exercising some control over the production and price of jute. Mr. Parks came, and wrote a report which the Association promptly pigeon-holed because the slump was over and the demand was so prodigious that there was no need to worry about the price of jute.

The working agreements referred to above have been followed by others, differing in points of detail, but with the same object in view namely the restriction of production. By an agreement operating from October 1931 the mills in the membership of the Association, comprising some 95 per cent. of the trade, worked during 1932, 1933 and the greater part of 1934 for 40 hours per week, with 15 per cent. of the total complement of looms sealed; and the agreement incorporated a clause which provided that the mills would not install any extra productive machinery or relative buildings during the currency of the agreement. The agreement also provided machinery whereby production could be gradually increased by reducing the percentage of looms required to be kept sealed. The process of increasing production in this way was begun on 1st November 1934, when 2½ per cent. of the total complement of looms were unsealed, and was continued throughout 1935, a further 2½ per cent. of looms being unsealed on 1st May 1935, 2½ per cent. on 5th August and 2½ per cent. on 11th November. The remaining 5 per cent. of looms were unsealed on the 17th February 1936. Throughout this time the mills, with five exceptions, continued to restrict their working hours to 40 per week. The five exceptions, namely, Premchand, Craig, Waverley, Megna and Nuddea had, by the terms of the agreement, been granted the privilege of working 54 hours per week with a full complement of machinery and all five worked in accordance with the special terms allowed to them. This working agreement between the Association mills, however, in accordance with the requisite notice given in December 1935, terminated on the 31st March 1936 and was superseded by an agreement, operating from the 1st April 1936, under which the mills were permitted to work up to but not exceeding 54 hours per week on single shift, with no night work. As in the old agreement, this new agreement incorporated a clause which restricted the mills from installing any extra productive machinery or relative buildings during the currency of the agreement.

Under this agreement the mills' working hours were increased by successive stages until with effect from the beginning of August 1936 all mills in the membership of the Association were working 54 hours per week on single shift. With effect from the 1st March 1937, however, the agreement was suspended indefinitely and mills were at liberty to work whatever hours and install, whatever machinery they desired; in 1938 the position was reviewed and a new

short time working agreement was proposed to take effect from the 15th March 1939, whereby member mills agreed to hours of work which would not be less than 40 nor greater than 54 per week. A supplementary agreement was entered into with effect from the 31st July 1939, by which the mills worked 45 hours per week with 20% Hessian and 7½% Sacking looms sealed. This was the position at the outbreak of the present war, after which large government orders for sandbags and a heavy overseas demand necessitated increased production; the restriction on working hours was withdrawn and all mills went into full production at 60 hours per week. This was an emergency arrangement that came into effect from about the middle of November 1939 to cope with the British Government orders, for which provisions in the Factories Act regarding working hours had to be relaxed. After a few months however, it was realised that as a result of the small offtake of sand bags and difficulties in obtaining shipping facilities, the mills were producing more goods than there was demand for. To meet this situation the working hours of the mills were reduced to 54 per week from the 8th April 1940. This arrangement continued up to August, but the mounting of stocks made it clear that this could not continue after the sand bag orders were completed. From 19th August 1940, mill working hours were further curtailed to 45 per week. This too did not have the desired effect on the stock position and the Indian Jute Mills Association decided to close their mills for one week in each month from September 1940 up to the end of the year. With new orders for sandbags the working hours had to be reviewed again and the mills worked 60 hours per week upto May 17, 1942. In view of shipping difficulties the working hours were again changed to 54 from May 18 when 10 per cent of the looms were also sealed.

This arrangement continued up to March 14, 1943, when to meet an urgent demand for 12 crores yards of hessian from the U. S. Government the Association decided to increase the working hours of jute mills from 54 to 60 per week with effect from March 15, 1943, and to unseal 10 per cent of the looms then under seal. The working hours were again curtailed to 54 hours per week from May, 1943, and 10 per cent of the looms were also sealed. After a month, on June 15, all looms were unsealed to meet the demand of another big American order. Since then no change took place up to May, 1945.

In addition to the above working agreements which applied only to the mills in the membership of the Association, an agreement was entered into, with effect from 1st August 1932, with the five principal mills outside the Association, namely, Adamjee, Agapara, Gagalbhai, Ludlow and Shree Hanuman, whereby these mills undertook to restrict their working hours to 54 per week up to 30 June 1933. With certain modifications this agreement was extended and became a continuing agreement subject to six months' notice of termination being given by either party, which notice of termination could not be given before 1st July 1934. On the 30th September 1935 the Association gave the required notice and the agreement terminated on the 31st March 1936.

**Indian Central Jute Committee.**—A Central Jute Committee has been constituted by the Government of India with 27 members. Representation has been found in the Committee for trade and agricultural interests and for the Provincial Governments most concerned, namely, Bengal, Bihar and Assam.

The formation of the Committee is the result of a recommendation made by the Royal Commission on Agriculture, which suggested that there should be a committee on the lines of the Indian Central Cotton Committee to watch over the interests of all branches of the jute trade from the field to the factory.

The functions of the Committee include agricultural, technological and economic research; the improvement of crop forecasting, of production, of testing, and of distribution of improved seed; enquiries and recommendations relating to banking and transport facilities and transport routes; improvement of marketing in the interests of the jute industry; and collection and distribution of all relevant information on Jute.

The Committee will also advise the Local Governments concerned on any points within its prescribed functions which may be referred to it.

The Offices of the Committee are situated at 4, Hastings Street, Calcutta. *President (Ex-Office):* H. R. Stewart, C.I.E., I.A.S. (Vice-Chairman, Imperial Council of Agricultural Research); *Secretary:* B. Das Gupta, M.A.

**Agricultural Research.**—The Jute Agricultural Research Laboratories are situated at Dacca and are working on (1) the improvement of the plant, both in regard to quality and yield (2) the improvement in the methods of jute-growing, (3) the reduction of loss caused by diseases and insects, and (4) the improvements in the methods of retting. These aspects of research are being tackled in five sections viz., Botany, Agronomy, Mycology, Entomology and Chemistry.

In the field of genetics considerable progress has been made, the mode of inheritance of branching habit, pigmentation patterns and other important characters have been worked out.

Very interesting work has been done on the anatomy of jute from seedling to maturity. These investigations have helped in a fuller understanding of the changes involved in the retting of jute and the origin of certain commercial defects. Quite hopeful results have been achieved in the field of breeding improved races of jute which is in progress at Dacca and three sub-stations. Interesting experiments have been carried out which help in assessing the relative importance of factors such as climate, soil variety and retting water on the quality of jute. The effect of spacing and manuring on jute is being tested. It has been established that line sowings are more economical and profitable than the usual practice of sowing the crop broadcast.

Some new light has been thrown on the mode of infection by stemrot fungus and certain measures have been devised to combat the spread of infection through the seed. Work has been commenced on hitherto unrecorded

diseases of jute. Intimate knowledge regarding the bi-nomics of jute pests has been gained on the basis of which practical control measures have been devised for most of the jute pests. A field-centre has been opened to control diseases and pests in the ryots' fields.

The causes for the colouration of jute have been worked out. The chemical changes that take place in the water during the retting process have been determined. Such aspects as the relationship between the volume of jute steeped and the volume of water, the depth of steeping, gradual steeping, etc., are under investigation.

**Technological Research.**—The work undertaken at the Technological Research Laboratories of the Committee at Tollygunj, Calcutta, includes the spinning of samples of fibre obtained in agricultural experiments (breeding, manurial trials, etc.) and reporting on their quality as indicated by the results obtained. The spinning tests are carried out at a standard temperature and humidity and a special technique has been worked out to give good results with as little as 12 lb. of fibre.

Work of fundamental importance includes the investigation of the relations that may exist between spinning quality and measurable chemical or physical characters of the fibre. In this considerable progress has been made.

Problems dealt with, which are of direct interest to the mill, comprise the effect of twist on yarn strength, the improvement of jute bags for storing commodities such as sugar and cement in damp atmospheres and the spinning of flax and other fibres on jute machinery, either alone or blended with jute.

The matter of finding new or extended uses for jute is constantly in view and in this connection machinery for spinning fine yarns from jute has been installed.

A certain amount of time is devoted to day-to-day problems submitted by mills of other bodies.

Tests are made on fibres which are, or may become, competitors for jute, with the twofold object of assessing the danger from competition and of determining the suitability of the fibres for spinning on jute machinery.

A useful Library has been got together and information bearing on the technology of jute is abstracted and indexed.

The Principal Officers of the Technological Research Laboratories are:—

*Director.*—C. R. Nodder, M.A. (Cantab.); *Manager.*—A. S. Gillies; *Senior Research Physicist.*—K. R. Sen, D.Sc. (Dacca); *Senior Research Chemist.*—P. B. Sarkar, D.Sc., A.I.C.

**Marketing.**—During 1938 and part of 1939, the Marketing Section carried out a comprehensive enquiry into the conditions governing the marketing and transport of jute in the principal jute growing districts of Bengal, Assam, Bihar, Orissa and the United Provinces. The data, thus collected, were published in two reports entitled, "Report on the Marketing and Transport of Jute in India" (1940) and "Report on the Marketing of Jute and Jute Products"

(1941). The former embodies the results of the enquiry relating to the marketing and transport of raw jute so far as inland business is concerned while the latter embodies that relating to the jute export trade and manufacturing industry. Thus, the two reports will appear to give a complete picture of the jute industry and trade in India.

For the last few years, the Section has been engaged in certain developmental work of which the main are :—

(i) *Dissemination of jute prices in the mofussil.*—With the help of the Publicity Section of the Committee, jute growers in the interior of the jute-growing provinces of Bengal, Bihar, Orissa and Assam are informed of the daily prices prevailing in Calcutta so that they may be well posted with fluctuations taking place in the terminal market. This is being done since the 1939-40 season.

(ii) *Marketing of fibre grown from improved seed.*—This scheme is intended to interest growers in improved jute seed which can give higher yield and at the same time produce better fibre. Seeds of improved strains are distributed to growers at concessional prices and the results of grading and marketing of fibre produced both from the improved and local varieties are studied with a view to demonstrating to the growers the advantages of using good seed. The scheme is in operation since the 1942-43 season.

(iii) *Organisation of Grading Parties.*—The primary producers are instructed through peripatetic Grading Parties to assort jute themselves, according to the trade specifications and sell it on the basis of grades so that the middlemen may not under-estimate the value of their fibre. They are also told about the various faults that occur in jute and the steps that should be taken to eradicate them. The scheme has been operating from the 1941-42 season.

(iv) *Establishment of Co-operative Jute Sale Societies.*—With a view to forming a selling organisation of the growers, a few such Societies have been established in 1942-43 in Bengal, as an experimental measure. Three such societies are also working in Orissa. While those in the former province do not provide for credit facilities, those in the latter have linked credit with marketing.

(v) *Study of Indian Market with a view to increasing the consumption of jute and jute goods.*—The war has closed many overseas markets for jute and its manufactures; at the same time, substitutes are becoming more important. Therefore, a comprehensive study of the Indian market is being undertaken with a view to explore the possibilities of increasing the internal consumption of jute. The scope of the enquiry includes both mill-made and cottage industry goods.

Principal Officer in charge of the Section.—S. M. Gupta, B.A. (Bombay).

*Jute Forecast.*—Work on the Jute Census have long been completed. The results of the random sampling survey have been considered to be satisfactory and the method has been adopted by the Government of Bengal, for forecasting the jute acreage.

Experiments are being conducted to find out a cheap and accurate method for the determination of the yield of the crop.

**Economic Research.**—The Economic Research Section keeps constant vigilance over all aspects of the economics of jute. Some important findings relating to the world consumption of jute, its trend in recent years and its relation to the changes in the world market, such as those brought about by the war, have been published in the Committee's *Economic Research Bulletin* No. 1. An investigation into the relationship between the demand for and the supply and price of jute is now under progress, the results of which may have an important bearing on the question of the control of the jute crop. Other investigations have thrown light on some important aspects of the jute industry, such as the productive capacity of the Indian Jute Mills, the possibility of extending the market for jute goods manufactured in India, etc. The effect of the growth of jute substitutes and of new uses of jute on the jute trade is also being investigated. A pamphlet on Jute substitutes is expected to be published soon.

Besides research work on the economics of jute, a large volume of information on various subjects pertaining to jute is regularly collected from authoritative sources in different parts of the world. The Committee has also a special correspondent in the Argentine Republic to report on the conditions of the jute trade in that country. A close watch is maintained on all developments in economic and commercial policy abroad calculated to replace jute by its possible substitutes, and prompt steps are taken to collect all relevant information on the subject to place it at the disposal of the trade and others concerned.

**Publicity.**—A monthly journal, known as the *Indian Central Jute Committee Bulletin*, the annual subscription of which is Rs. 5-8 or 10s. (including postage), is published monthly, containing figures of production, consumption, prices, stocks, imports and exports of jute and jute manufactures, and also information regarding the prices and utilisation of jute substitutes. It also includes items relating to export and import restrictions imposed on various countries and other information regarding the economics of jute and its competitors, as well as general information of interest to the trade. The Committee also disseminate information to the grower to assist him towards improved methods of growing and retting, and getting better prices for his crop. A preliminary investigation into the economics of jute growing has been undertaken in three representative villages of Bengal.

Principal Officers of the Economic Research Section :—*Director.*—D. Ghose, M.A. (Cantab.), Bar-at-Law; *Asst. Economics Officer.*—K. C. Basak, B.A. (Cantab.)

Besides all general publicity work of the Committee, the Publicity Section has been entrusted with the organisation of a big Central Jute Museum in Calcutta which is soon expected to materialise.

Principal Officer in charge of the Section :—K. I. A. Quaderi.

## Indian Iron and Steel Industry.

Less than thirty years ago the iron and steel industry on a modern scale was non-existent in India. Today India has practically reached self-sufficiency in the more widely used form of steel. It is now a vital, national, basic and defence industry. The last great period of usefulness; the present war has confirmed its indispensability.

**History of Iron and Steel in India.** India has known iron and steel since at least four to five thousand years before the Christian era. In 1830 Josiah Heath stated that it is a claim to the discovery of iron in India was beyond doubt. The Iron Age in India is well known to all visitors to Delhi is estimated to be about 1,500 years old. Considerable skill must have been exercised in working and shaping this Pillar which is over 27 ft. in length, weighs approximately 6 tons and varies from 12½ to 16½ inches in diameter.

The manufacture of steel has been known in India for over 1,000 years. Days were made of Wootz sword or dagger blades of genuine Indian manufacture can still be obtained in Northern India. These weapons of the Iron Age, which they were produced were obtained by Persian traders centuries ago and exported to Arabia, Damascus. It happened, however, that the Indian steel makers never overcome certain difficulties and did not progress with the process.

The first recorded efforts to found an iron and steel industry on modern lines were those of Mottee and Parquhar in 1770. In 1825 Josiah Heath of the Indian Civil Service, Madras, resigned his appointment in order to establish an iron and steel works in that province. The charcoal furnaces installed by him at Porto Novo resulted in complete failure owing to financial difficulties and lack of practical experience, and the East India Company, who acquired his derelict works and formed a new Company in 1853, did not achieve any commercial success and ceased operations in 1874.

The next undertaking was started by Messrs. Jersop & Co. which finally resulted in the erection of the Barakar Iron Co. at Kulti in 1875. After passing through several vicissitudes, it passed into the hands of the Barakar Iron & Steel Co. in 1887. In 1890, the plant was modernized and it became known as the Bengal Iron & Steel Co. A steel plant started in 1905 closed within a year as the orders received could not be supplied at economic rates. Since 1910, this company has been known as the Bengal Iron Co. and it amalgamated with the Indian Iron and Steel Co. Ltd. in 1937.

The credit for the first successful attempt to manufacture steel in India on a commercial scale goes to The Tata Iron & Steel Co. Ltd., and it is to the genius, perseverance and foresight of Jamshedji Tata, the great pioneer of India industry, and his sons, that The Tata Iron and Steel Co. owes its origin and development. It owns valuable iron ore concessions, manganese ore deposits, limestone, dolomite, coal, magnesite and chromite, scattered over India.

Other large-scale steel companies were subsequently started in Bengal at Bokaro and Mysore. The first year of the first year was made in 1911, and of steel in 1912. There has been continuous development and The Tata Iron and Steel Co. has become the largest and one of the most important in the British Commonwealth.

One of the greatest difficulties faced by the iron and steel industry in India is the lack of iron ore. The quantity of iron ore available in India is estimated to be about 100 million tons, and the quantity of steel available is estimated to be about 10 million tons.

**Rare Materials.** Of the raw materials required by the iron and steel industry, the most important are iron ore, coal, and limestone. The quantity of iron ore available in India is estimated to be about 100 million tons, and the quantity of steel available is estimated to be about 10 million tons.

**Iron Ore.** The amount of the high ash of iron ore available in India is estimated to be about 100 million tons, and the quantity of steel available is estimated to be about 10 million tons.

(i) **Mysore.** These are the deposits of quartz and iron ore in Mysore but they are of low grade and would require concentration before use. The ores used in the Bokaro Iron Works can be compared to Singhbhum ores containing about 60% Fe and the quantity available may be put at 30 million tons.

(ii) **Goa.** Large quantities of iron ore are available near Goa. Though the grade is good, the ores are soft and require either sintering or briquetting and lagging before despatch.

(iii) **Singhbhum and Orissa.** In what is known as the Singhbhum Iron Belt, consisting of the Singhbhum District, in which the Tata Iron & Steel Company's Steel Works are situated, and the neighbouring Orissa Federated States, there exists some of the richest iron ore deposits in the world. The iron ore content is nearly 60%, and these deposits are estimated to contain about 3,000 million tons, which are sufficient for the iron and steel requirements of India for nearly 1,000 years. In other parts of the world equally rich iron ore may be found but it cannot always be landed at the iron works at anything like the same cost. The advantage India possesses in the shape of iron ore is, therefore, very great.

**Coal.** Nature has not been so bountiful to India in respect of its coal resources. The most important coal measures in India are (i) the Gondwana (Permian) coalfields of the Peninsula, such as Raniganj, Jharia, etc., and (ii) the Tertiary coalfields of Assam, the Punjab and Baluchistan. Taking only seams with a thickness of more than 4 feet and ash content below 20% and those occurring within a depth of 2,000 feet only, the Indian coal resources have been estimated to be of the order of 24,000 million tons. Out of this,

good quality coal, with less than 18 per cent. ash content, is estimated to amount to only 6,000 million tons and coal capable of yielding coke of metallurgical quality to only about 1,400 million tons, which is found in the Gondwana (Permian) coal fields of the Damodar basin.

More than 1,000 million tons of strongly coking coal with less than 8% ash, but high in sulphur, occur in the Tertiary coalfields of Assam, but these are not at present considered useful for metallurgical purposes.

The manufacturers of hard coke in India rely on the Jharia coalfields to an overwhelming extent to meet their requirements. With the present wasteful means of extracting coal and the use of metallurgical coal for non-metallurgical purposes, some experts consider that the coking coal resources of the Jharia field will not last for more than 30 years. The Indian Coal Mining Committee reported in 1937 that these reserves would last for about 57 years.

If the Government and the coal industry co-operate and adopt adequate measures for improved methods of mining coal and conserving and economising the use of metallurgical quality coal, the life of these reserves will be extended beyond the gloomy prognostications referred to above.

In addition, it might become possible in the future, as the result of technical research, for the iron and steel industry to use coals not regarded as coking coals at present, by blending them with strong coking coals.

While the reserves of coking coal in India are not adequate for melting the huge quantity of iron ore available, frequent repetition of this statement has produced an impression abroad that adequate raw materials are not available in India for a large scale iron and steel industry, which is entirely a mistaken view. The metallurgical industry has taken its own precautions to prevent the speedy exhaustion of its coking coal reserves. It is unfortunate that so much of India's best coking coal is still being used for steam raising purposes but we can confidently hope that this practice will tend to diminish in the near future.

The coalfields and the iron ore deposits are situated within a short distance of one another and there are ample supplies of limestone and dolomite within a reasonable distance of other raw materials.

**Importance of the Industry in the National Economy.**—The total capital invested in the iron and steel industry in India is estimated to be about Rs. 25 crores. Roughly 150,000 men and women are employed directly and indirectly in the Indian iron and steel industry, the re-rolling mills and the auxiliary enterprises. Including their dependents, the total number of people dependent on the industry in India is about 600,000. The industry is contributing to the Government and the public revenues between Rs. 7 to 8 crores per annum by way of excise and customs duties, income and super taxes.

**Development.**—The last decade has seen a great expansion of the iron and steel industry in India accompanied by improvement in the various processes and the application of scientific

methods of control. The successful development on a commercial scale of the rapid de-phosphorising process and the making of acid steel out of Indian basic pig iron, for both of which full credit is due to the Tata Iron & Steel Company Ltd., may be regarded as the most important advance in steel making practice that the young Indian steel industry has made. It is likely to have far-reaching effects on the establishment of several new industries in India such as locomotive manufacture, and the manufacture of railway wheels, tyres and axles for which acid steel is specified. The development and manufacture of a low alloy high tensile steel containing copper and chromium known as Tiscrom is another instance. The steel is being employed for the construction of the New Howrah Bridge.

Besides metallurgical research, fuel research, chemical research and research in refractories are being pursued in India.

**Special Steels Manufactured in India.**—Amongst special steels now manufactured in India and special bars for the manufacture of shells, bullet-proof armour plate for the fabrication of armoured vehicle bodies, bullet-proof plate for howitzer shields and gun turrets, various kinds of alloy steels for the manufacture of steel helmets, armour piercing bullets and shots, and shear blades for shearing armour plates, chrome molybdenum alloy steel for aircraft, spring steels for machine-guns, special deep drawing for rifles and machine-gun magazine, nickel steel plates for gun-carriage mountings, high carbon steels for high explosive shells and mint dies, high speed steel for machine tools and stainless steel for surgical instruments. Other manufactures by the industry include steel mill rolls, steel billets for drawing into telegraph wires and barbed wire, and steel to Admiralty specification for ship-building. A process for the manufacture of acid open hearth steel required for gun forgings, gun carriage axles and railway wheels, tyres, etc. has also been developed.

A new chapter in India's iron and steel industry was opened when the Tatas added a Wheel Tyre and Axle plant with up to date mills and finishing requirements to their plant at Jamshedpur and began the manufacture of acid steel. It is bound to go a long way towards the country's self-sufficiency so far as its steel requirements are concerned. This might be also a prelude to a large-scale manufacture of locomotives in India.

**India's Munitions Output.**—Referring to India's important munitions output, the India Office recently announced: "The American Technical Mission has recently sponsored several new plants including work for machine tools. India has also undertaken the manufacture of alloy steels which form the components of special steels. The manufacture of ferro-silicon has been established in one Indian works and at least half of India's requirements will be met from this source. The production of aluminium in India will begin shortly on a scale which is ultimately expected to enable India to meet her requirements of this metal. The progress of the steel industry is one of the outstanding developments of the war in India."

## The Paper Making Industry.

Paper making in India is of some antiquity. The manufacture by hand had been practised from quite early times. The first paper-making machine in India was erected and operated by a famous missionary, Dr. William Carey, over a century ago at Serampore on the Hooghly River near Calcutta, but the establishment of paper making as a modern industry may be said to date from 1867. In that year the Royal Paper mill was established at Bally, only a few miles away, using in the first instance Dr. Carey's original plant and machinery. About 15 years later the Upper India Couper Paper Mill at Lucknow and the Titaghur Paper Mills at Titaghur, near Calcutta, were started. Other mills at Raneeunge and Kankinara, in Bengal and other Provinces soon followed. Production began to increase, so that by about 1900 the total made annually in India amounted to approximately 20,000 tons.

To-day the quality of paper produced by Indian mills is accepted as equal to that of most imported paper of the same class, and the range of qualities has been extended to include coloured banks and bonds, tub-sized rag papers, embossed covers and writings, supercalendered tinted printings, and imitation art and kraft.

**Raw Materials.**—In its early days the Indian industry considered the manufacture of high class white paper rather beyond its capacity, and this was to some extent due to its dependence upon rags and waste paper for its raw material. But this crude practice was soon to change. Routledge in 1860 proved the virtues of esparto—a semi-tropical grass—and in 1875 and 1879 reported upon the possibilities of Indian bamboo which served to draw attention to other Indian fibres. There are only incomplete records of the early experiments with Indian fibres, but it is known that two mills made use of Moonj (*Saccharum Moonja*) and Sabai (*Ischaemum Angustifolium*) in their first years. Moonj seems to have held the field in the beginning, for it made a very good paper. Sabai, however, presented less difficulty as regards treatment, and, therefore, soon came into universal favour among Indian mills. Having found in Moonj and Sabai ample resources of plant fibre it was perhaps natural that the Indian mills then in operation should at that time have made no effort to follow up Routledge's researches in bamboo—a much more difficult problem. Possibly India might have come to the front as one of the world's most important producers of pulp and paper. What actually happened was that the industry based on Sabai grass, while relatively still in its infancy, was almost put out of business by the competition of wood pulp. Nevertheless in bamboo it later found a new raw material of great value.

The Bamboo Paper Industry (Protection) Act of 1925 not only gave Indian mills an opportunity of repairing the damage to their plant and machinery caused by the incessant and intensive work required by India's first world war demands, and of overcoming the difficulties of getting stores and machinery replacements, but also encouraged and enabled them to develop bamboo pulp as their main fibre. The protective

tariff on paper was renewed by the Government of India on the recommendation of the Tariff Board in 1932, and imported wood-pulp was also made subject to a duty of Rs. 45, or approximately £3 a ton. This pulp duty naturally had the direct effect of preventing the establishment of new paper mills designed to work only on imported wood-pulp. The mills, therefore, immediately began to develop and increase the production of bamboo pulp, which had already been proved to be eminently suitable for all the usual classes of fine writing and printing papers, banks, ledgers, &c. Sabai grass, which is the Indian equivalent of esparto, having its own special characteristics, is also used by some of the mills, but bamboo pulp is now the main material. Incidentally the manufacture of pulp from bamboo is at present practically exclusive to India.

The protective tariff attracted others to a profitable field of industry, and there are at present 13 paper mills operating 28 machines with a total production of nearly 90,000 tons. Another one-machine mill in Hyderabad, Deccan, is nearing completion.

**Experimental work.**—For many years the paper pulp section of the Forest Research Institute at Dehra Dun has been carrying out experimental work in connection with the development of new fibres for paper-making, and it has been reported that considerable success has been obtained in making kraft paper from bamboo pulp. Two paper Mills in India have been successfully manufacturing, for over a year, kraft papers from bamboo.

**Newsprint.**—With the assistance and encouragement of the Commerce Department of the Government of India, Newspapers have now come to an arrangement to ration supplies of imported newsprint and to charge certain agreed prices for various sizes of newspapers. Imports of newsprint from U.S.A. and Canada are permitted up to certain limits by a system of licenses.

Indian Mills are not in a position to meet any part of the newspapers requirements of newsprint.

The whole of India's newsprint requirements is imported, it being not possible so far to produce it in the country on an economical basis owing to the lack of the necessary raw materials. Recent enquiries show that the Kashmir and Tehri-Garhwal States can supply fir and spruce in quantities sufficient for the establishment of a newsprint mill in each of the two states. The two species of woods are well known raw materials for the production of mechanical pulp for use in newsprint manufacture and the suitability of both the species from the two States has recently been tested at the Forest Research Institute, Dehra Dun. Enquiries are in progress in connection with the maturing of projects for the manufacture of newsprint from the two species of woods available in the two states. The abnormal rise in the costs of machinery and the difficulties of importing these from abroad, however, appear to be serious handicaps in the early materialisation of the projects.

The industry has made such headway in recent years that the outbreak of the second world war found it ready to take up the vastly increased demand for Indian paper brought about by the difficulty of importing from abroad. Imports of fine papers are very limited and Indian mills are working to full capacity. The emergency has undoubtedly given the newer mills an excellent opportunity of establishing themselves but with the considerably increased consumption of paper by the Central and Provincial Governments and the Army, a serious shortage of paper has been felt by industry and commerce and the general public. From April 1, 1943, the Government of

India decided to release for civilian consumption 30 per cent of the total production of Indian made paper, which was further reduced by an Ordinance issued in June 1944 to 30% of the quantity used in 1943. Government have also taken action to increase the output of Indian mills by giving them every possible assistance in the matter of transport facilities for raw materials and also in obtaining chemicals such as Sulphur, Alum, Caustic Soda, etc. Indian paper mills have also been asked to confine production to 6 or 7 standard varieties so as to permit of longer runs on machines and therefore allow of the production of the maximum amount of writing surface.

## THE WOOL INDUSTRY.

Although the woollen industry in India is very ancient, flourishing as it did as a cottage industry, its rise as a factory industry is only a few decades old. The first mill was established in 1876, but its progress was halty and hesitant, so much so that, by 1914, there were only four mills, the Dhariwal and Cawnpore mills, the Bombay Woollen Mill manufacturing both woollen and wasted goods, and the Bangalore Woollen Mill making only coarse blankets. The large demand for woollen goods after the first world war stimulated private enterprise to start more woollen mills, and, between the years 1919 and 1921, three new companies were floated which opened mills in or near about Bombay. About the same time, other mills sprang up in Bangalore, Baroda, and Amritsar. The total number of spindles rose to about 74,500 and the capital investment increased from about Rs. 50 lakhs to about Rs. 240 lakhs in 1921. Owing to foreign competition, the industry was in a depressed condition thereafter, and, between 1925-33, three of the mills went into liquidation.

The major units of the industry are concentrated in Cawnpore, Dhariwal (Punjab), and Bombay. Bombay has six mills and Cawnpore one. Smaller units are located at Bangalore, Amritsar, Srinagar, Baroda and Mirzapur. The powerloom industry is almost completely centred in Amritsar. In 1939, there were 24 woollen mills in India (16 in British India and 8 in Indian States) employing 17,201 persons daily. In addition, there were 19 woollen carpet and *shawl* weaving establishments and 73 hosiery factories employing 3,382 and 264 persons, respectively. According to one estimate, there were also about a lakh of handlooms engaged in the weaving of wool.

Until the outbreak of World War II, many of the woollen factories were not altogether prosperous, and some of them were actually incurring heavy losses. This is mainly due to the fact that indigenous goods could not compete with imported lines as the latter were never all-wool affairs. In other words, the enormous amount of the cheaper types of woollen goods imported into this country from Italy, Poland, Germany, and Japan was composed of waste wool, wool reclaimed from old garments, and fibres other than wool, whereas the Indian mill industry justifiably prided itself on producing pure wool stuff from all-virgin wool.

The outbreak of World War II came to the rescue of this industry, as of many other industries also. The Indian woollen mills were invited to undertake production for the Defence Services on a 100 per cent basis. The terms of payment were on a cost *plus* profit basis, and the mills got full work, namely three shifts per day. The output of the organised mills is reported to have increased by 375 per cent., mainly as a result of the introduction of standardisation schemes. This naturally led to the importation of Australian wool on a large scale. Imports of wool which remained at Rs. 2·66 crores improved to Rs. 3·07 crores in 1939. There was some setback in 1940, when the value of imports declined to Rs. 2·16 crores. During 1941 to 1943, imports were somewhat restricted on account of enemy U-boat activity. In 1944 and 1945, the value of imports aggregated Rs. 2·46 crores and Rs. 2·14 crores, respectively. During the war period, there was a sharp recession in imports of woollen yarn, knitting wool, as also woollen and worsted piecegoods, thanks to the absorption of the U.K. in the war effort. Now that the war is over, it is likely that the U.K. will try to resume exports of woollen and worsted goods to India to some extent.

It is well-known that India has been enjoying a good export trade in wool and woollen carpets for the last many years. Generally speaking, wool exported from India consists not only of wool grown in India itself, but of imports from foreign sources, these latter coming into India both by land and sea. Imports by sea came chiefly from the Commonwealth of Australia, while a certain quantity from Iran also comes by land. The main imports are from Afghanistan, Central Asia, Tibet, and Nepal. Many of the Punjab districts enjoy a good lucrative *entrepot* trade, as, for instance, Amritsar, Multan, Lahore, etc. In 1944, raw wool exports came to Rs. 2·42 crores, but this figure was surpassed in 1945, when the value improved to Rs. 3·54 crores.

Besides raw wool, India used to send substantial quantities of woollen carpets and rugs to overseas countries, particularly to the U.S.A., Canada, and the U.K., where they are popular not only on account of their cheapness but also owing to their attractive designs and bright colours. During the war, this trade was hit hard owing to lack of freight facilities, but it is hoped that this trade will revive ere long.

Generally speaking, all the worsted mills in this country, of which there are four today, are dependent upon supplies of Australian wool and tops for their manufacture of worsted cloth and hosiery yarn. The woollen sections of mills use indigenous wools largely for blankets and rugs. It will be more or less correct to say that, apart from blankets and rugs, very little of indigenous wool is used in cloth intended for apparel.

The handloom woollen industry is spread throughout the country and its production is confined to the making of coarse blankets which have a large seasonal demand from the poorer

classes. Another section of the handloom industry generally specialises in the manufacture of carpets and *durries*. The principal centres of this trade are Mirzapur, Amritsar, and Srinagar in the North, and Bangalore and Ellore in the South. The war gave considerable fillip to this industry, since the demand from the Army for barrack blankets was quite enormous and far in excess of available productive capacity. The Supply Department placed heavy orders and it is estimated that handloom weavers supplied more than a million blankets in a year to the Army.

## Silk.

Sericulture has been practised in India for the last two thousand years and a lot of silk used to be exported in days long gone by. Now, however, India has lost her export market and imports annually Rs. 13,000,000 worth of silks. Switzerland and United Kingdom never exported raw silk to India. Italy's export stopped long ago. China and Japan used to export till the last Great War. At present India is not importing silk from any foreign country. The world demand for silk and silk waste has shrunk and there is increasing competition from foreign silk goods and mixtures and artificial silk substitutes. In Assam, eri, mulberry and muga silk worms are being reared and about Rs. 1,70,000 worth of silk is annually produced there. Bengal produces Rs. 20,00,000 worth of mulberry silk, Bihar and Orissa produce Rs. 42 lakhs worth of tasar and a little eri silk. A little mulberry silk is also being produced in Bihar in the district of Purnea. The Central Provinces produce Rs. 14 lakhs worth of tasar silk.

Mysore, Kashmir, Jammu, Madras and the Punjab produce Rs. 38,00,000, Rs. 10,00,000,

Rs. 2,00,000, Rs. 5,00,000, Rs. 16,600 worth of silk respectively.

Bombay and the United Provinces are investigating whether sericulture can be introduced. The new era industry in Baroda is spreading. Some of the native States, Madras and the Punjab are trying to introduce era silk-worm rearing.

The industry has been declining in almost all parts of India. China is exporting more silk to India than Japan in spite of the tariff wall. It is progressing in Mysore and Kashmir only. It is believed that the moribund industry will be resuscitated if sufficient duty is imposed on foreign silks.

The price of indigenous raw silk has been increased by about 300 per cent. on account of stopping of the import of raw silk from China and Japan due to the war. Almost all the above Provinces and States are trying to increase their production both in quality and quantity. The production of raw silk has also gone up about 200 % more due to its increase in price.

## Indigo.

Indigo dyes are obtained from the *Indigofera*, a genus of Leguminosae which comprises some 300 species, distributed throughout the tropical and warm temperate regions of the globe, India having about 40. Western India may be described as the headquarters of the species, so far as India is concerned, 25 being peculiar to that Presidency. On the eastern side of India, in Bihar, Bengal, Assam and Burma there is a marked decrease in the number of a species but a visible increase in the prevalence of those that are met with.

There is evidence that when Europeans first began to export the dye from India, it was procured from the Western Presidency and shipped from Surat. It was carried by the Portuguese to Lisbon and sold by them to the dyers of Holland, and it was the desire to obtain a more ample supply of dyestuff that led to the formation of the Dutch East India Company and so to the overthrow of the

Portuguese supremacy in the East. Opposition to indigo in 17th century Europe was keen owing to its interference with the wood industry, but it was competition to obtain indigo from other sources than India that led to the first decline of the Indian indigo industry. In the middle of the eighteenth century, when the cultivation of indigo in the West Indies had been given up—partly on account of the high duties imposed upon it and partly because sugar and coffee were found to be more profitable—the industry was revived in India and, as one of the many surprises of the industry, the province of Bengal was selected for this revival. It had no sooner been organised, however, than troubles next arose in Bengal itself through misunderstandings between the planters, their cultivators and the Government, which may be said to have culminated in Lord Macaulay's famous *Memorandum* of 1837. This led to another migration of the industry from Lower

and Eastern Bengal to Tirhut and the United Provinces. Here the troubles of the industry did not end, for the researches of the chemical laboratories of Germany threatened the very existence of any natural vegetable dye. They first killed the madder dye of Europe, then the safflower, the lac and the *al* dyes of India, and are now advancing rapidly with synthetic indigo, intent on the complete annihilation of the natural dye. With what success may be judged by the present state of affairs. Actually there was a revival of the industry in India during the last War and for a few years after, but after the war with many countries producing synthetic indigo, among them being Germany,

Switzerland, Great Britain and America, the natural indigo industry was almost killed. There has been a mild revival since the commencement of the present war but unless protected the industry cannot survive. There are many advantages to India in the revival of the natural indigo industry, as besides keeping a large sum of money in the country that now goes abroad, it gives considerable employment, and the crop itself has a great value to the peasant grower as a change crop. It is a leguminous plant that brings down nitrogen from the heavens into Indian soil, and it has peculiar value as an organic manure in a country where animal manure is not available.

## OILS AND OIL CAKES.

The statistical publications, issued by the Commercial Intelligence Department of the Government of India, show that the export of all oil seeds from India is steadily going down except groundnuts on account of keen international competition.

It is economically as well as industrially unsound for India to export her oil seeds instead of manufacturing oils, oil cakes and other allied products in India. The present practice allows the other countries to derive the manufacturing profits and at the same time deprives Indian agriculture of the great potential wealth of oil cakes as cattle feed and manure.

In India there are about 600 oil mills registered under the Factories Act and over 1,000 medium size power driven oil mills. An immense quantity of oil is, as a matter of fact, already manufactured in this country by crude as well as up-to-date processes.

Village Oil Mills worked by bullocks and handpresses exist in all parts of the country and supply most of the local demand for oil and oil cakes. The big mills supply the requirements of the towns and export trade. These mills treat all kinds of oil seeds available in the country.

The industry has made good progress in the production of mustard oil, castor oil, groundnut oil and linseed oil and as a result the export of these oils and oil cakes to foreign countries has steadily improved during the last ten years. The progress in the case of groundnut and castor is very satisfactory.

The development of oil milling industry in India has to face the under-mentioned difficulties. There are high protective tariffs in European countries which encourage the export from India of raw materials rather than the manufactured products. Secondly there is a better

market for the oil cake in Europe and Indian oil cake, on account of want of standard specifications, is sold at a discount. The freight on oil seeds is less than that on oils and oil cakes, hence it is easy and economical to transport oil seeds by sea than oils or oil cakes. The development in the export trade in oils demands special consideration of shipping companies to provide tanks for bulk transport of oils as arranged by the railway companies.

The standardisation of oils and oil cakes will help the industry in finding markets in foreign countries where a better price can be obtained for the articles.

It is necessary to educate the Indian Cultivator in the use of oil cakes for feeding and manurial purposes and it should be impressed on him that the value of the article does not depend on the oil content but on oil and albuminoid content of the article. The animal cannot properly digest a cake having a higher oil content and it thus goes waste.

**Effect of War on the Oil Industry of India.**—During the War of 1914-18 the average export of linseed oil, groundnut oil and castor oil had increased by 443%, 150% and 60% respectively over the last pre-war average of 1912-13 and 1913-14, but the export of cake had, however, no marked change during that period. The oil crushing industry of India had a good opportunity of developing during the second war period.

The prices of oils and oil cakes at the commencement of War in September were lower than half the prices of these articles during last pre-war, war and early post-war periods on account of general low price levels since 1933-34. The second world war has resulted in increasing the price level and brisk trade in oils.

## Tea.

Among plantation crops in India tea is the most important. The indigenous tea plant, growing in a wild condition, was first discovered in Assam about 1820. It soon drew the attention of the East India Company, which after some enquiries started an experimental garden in 1835. After working for five years, the plantations of the Government were sold in 1840 to the Assam Company, the first tea concern and to this day the largest company in India. It was anything but prosperous during the first ten years of its existence. But about 1852, its condition began to improve and its success made the prospects of the industry appear so promising

and attractive that speculators eagerly rushed into it. The discovery of the indigenous tea in Sylhet and Cachar gave the impetus for an expansion of the industry into the Burma valley, and in a few years thereafter the whole of the upper portions of the province of Assam (both Brahmaputra and Burma valley) was converted into huge tea plantation. Thus the foundations of the present tea industry were laid during the fifties of the last century. Since that period the growth of the industry has been phenomenal and "in less than a hundred years the British Empire has become the tea garden and tea-shop of the world."

The following table shows the growth of the industry since 1900:—

## Progress of the Industry.

Year.	Area under tea in '000 acres.	Production in '000,000 lbs.	Year.	Area under tea in '000 acres.	Production in '000,000 lbs.
1900-1904 (average)	523	291	1931	867	324
1905-1909 " "	539	242	1932	899	424
1910-1914 " "	591	290	1933	818	384

			1942	836*	561*

\* Subject to revision.

It will be seen from the above table that since the beginning of the present century, while the area under tea has risen by nearly 60 per cent., the production has more than doubled.

Assam and Bengal are the two most important centres of the tea industry in India, Assam alone accounting for more than half the total production. In 1942, Assam produced 309 million lbs. or 55 per cent. of the total Indian production. The rest of Northern India produced 160 million lbs. or 28 per cent. and Southern India 95 million lbs. or 17 per cent.

The total number of persons employed in the industry in 1940 was 918,354 as against 925,237 during the previous year. Of these 865,226 were permanently employed and 53,128 temporarily employed. The average monthly wages of labourers employed in the tea gardens in Assam excluding non-cash payments, in 1939-40 were as follows:—

Men.	Women.	Children.
Rs. a. p.	Rs. a. p.	Rs. a. p.
9 2 9(a)	7 14 5(a)	5 6 6(a)
8 2 4(b)	8 6 2(b)	5 7 5(b)

(a) Settled labourers, (b) Faltu or Basti labourers.

Although India produces large quantities of tea its consumption of tea is comparatively very little. The low domestic consumption, however, enables India to export large quantities to other countries, the principal among which is the United Kingdom. In 1942-43, 57 per cent. of the total quantity of tea produced in India was exported abroad. This was, however, considerably less than in the preceding year when the quantity exported represented 76 per cent. of the total production. Of the total exports of 323 million lbs., the United Kingdom alone took 252 million lbs. during the year.

The year 1932-33 was one of the worst for the tea industry. In addition to the world-wide depression, there was considerable over-production with the result that producers of tea all over the world were faced with declining prices and accumulation of stocks. The preference granted to Empire teas did not prove sufficiently effective to check the consumption of cheap Java teas. Besides this there was only a small difference in the price of medium and common teas and there was thus no inducement to grow the former. To check over-production a scheme was therefore introduced to restrict production and to limit exports. A Bill giving legislative effect to the scheme was passed at the autumn session of the Legislative Assembly in 1933. The

industry has consequently been able to enjoy more stable conditions than would otherwise have been possible in the circumstances of the last six years. The export quota which was fixed at 82½ per cent. of the standard exports in 1935-36 rose steadily to 92½ per cent. in 1938-39. Due to accumulation of stocks and decline in prices the quota for the following year was fixed at 90 per cent., but the restriction of supply and an increase in demand had the effect of placing the industry again in a favourable position in the world market even before the outbreak of the war.

The outbreak of war gave rise to entirely new conditions. In the United Kingdom, the entire tea trade passed under the control of the Government. A Tea Controller for India was appointed to administer the emergency tea control scheme. Owing to the suspension of re-exports from London, the need for replenishing their stocks by America and the Colonies and the transfer of their demand by some of the markets supplied by Java to Indian tea there was a strong demand for practically all kinds of tea and the export quota was, therefore, raised to 95 per cent. in October 1939 and was kept unchanged at 95 per cent. for the next season. In June 1940,

however, the International Tea Committee reduced the quota for 1940-41 to 90 per cent. for all participating countries. An Ordinance amending the Indian Tea Control Act, 1938, was passed in August 1940 authorising the Government of India to alter the Indian allotment at any time during the financial year. The reduction had a stimulating effect on the markets, but it was soon discovered that in view of the increased requirements of the United Kingdom, U.S.A. and other countries, the maintenance of the export quota at 90 per cent. would result in a severe curtailment of the available supplies and the quota was revised to 92½ per cent. from October 1940. The export quota for 1941-42 was fixed at 110 per cent. of the Standard exports. The export quota for 1942-43 was fixed at 479 million lbs. The internal demand for tea had, however, been steadily on the increase, and to prevent a shortage the Government of India announced in October 1942 that exports would not be allowed to exceed 421½ million lbs.

The International Tea Agreement which was due to expire on 31st March 1943, is to remain in force for the duration of the hostilities and for two years thereafter.

The following table explains briefly the position as regards the *export of tea* by sea from India:—

Year.	Amount exported (million of lbs.)	Value in lakhs of rupees.
1	2	3
1930-31 .. .. .	356	23,56
1931-32 .. .. .	341	19,44
1932-33 .. .. .	379	17,15
1933-34 .. .. .	318	19,85
1934-35 .. .. .	325	20,13
1935-36 .. .. .	313	19,82
1936-37 .. .. .	302	20,04
1937-38 .. .. .	334	24,39
1938-39 .. .. .	348	23,29
1939-40 .. .. .	359	26,31
1940-41 .. .. .	349	27,75
1941-42 .. .. .	382	39,57
1942-43 .. .. .	323	31,64

The following table shows the exports of tea from India to different countries by sea:—

	1941-42 (million lbs.)	1942-43 (million lbs.)
United Kingdom .. .. .	288	252
Canada .. .. .	30.5	9.2
U.S.A. .. .. .	23.6	18.6
Australia .. .. .	8	13.4
Egypt .. .. .	4	1.9
Iraq .. .. .	1.8	8.1
Arabia .. .. .	1.7	6.3
Iran .. .. .	1.4	5.6
Ceylon .. .. .	5.6	0.7

The exports to British Empire countries amounted to 279 million lbs. and to other countries 44 million lbs. during the year 1942-43 as against 345 and 37 million lbs. respectively during the previous year.

From 1923 to 1927 the prices obtained for tea were good; but in 1928 a decline set in, and in 1929 and 1930 prices fell further still. The price of Indian common tea particularly fell more than that of others. While as compared to 1923, 'all tea' fluctuated in the London market within a range of 25 per cent., Indian common tea fell by about 50 per cent.

In 1932-33 the fall in tea prices was almost catastrophic. The average price of tea per lb. realised at the Calcutta auction sales during 1932-33 was 5 as. 2 p. as against 6 as. 5 p. in 1931-32 and 9 as. 4 p. in 1930-31. The position, however, has improved considerably since then. After the outbreak of the war the prices of tea assumed a marked rising trend. The demand for practically all kinds of tea was strong and the prices advanced steadily till they reached their peak at the beginning of December. By the middle of January, however, they began to decline and by the end of the season had reached the pre-war levels. Nevertheless, the

The following table gives the figures of the production and exports of Indian coffee :—  
*Production and Export of Indian Coffee in thousands cwt.*

12 Months ending June 30th.						Production.	Export.	Surplus available for Home consumption.
1928	..	..	..	..	..	317.5	261.5	56.0
1929	..	..	..	..	..	247.9	138.3	109.6
1930	..	..	..	..	..	352.0	279.4	72.6
1931	..	..	..	..	..	204.4	208.4	86.0
1932	..	..	..	..	..	300.1	162.0	138.1
1933	..	..	..	..	..	295.0	168.7	126.3
1934	..	..	..	..	..	308.8	186.6	122.2
1935	..	..	..	..	..	292.6	147.5	145.1
1936	..	..	..	..	..	367.6	230.0	137.6
1937	..	..	..	..	..	303.6	162.4	141.2
1938	..	..	..	..	..	299.3	146.5	152.8
1939	..	..	..	..	..	358.1	206.7	151.4
1940	..	..	..	..	..	310.9	118.9	192.0
1941	..	..	..	..	..	280.7	48.7	232.0

The declared value per cwt. of coffee was Rs. 46-2-4 during 1940-41 as against Rs. 43-8-8 during the previous year.

The Indian Coffee Cess Act, providing for the creation of a fund to be expended by a Committee specially constituted in this behalf for the promotion of the cultivation, manufacture and sale of Indian Coffee, was passed in November, 1935. It provides for the levy of a customs duty on all coffee produced in India and exported therefrom to any place beyond the limits of British India or to Burma at a rate, not exceeding one rupee per cwt., fixed by the Governor-General in Council on the recommendation of the Coffee Cess Committee. The rate originally fixed was 8 as. per cwt. But from 1st June, 1938, it was raised to Re. 1 per cwt.

In addition to this cess, an excise duty on all coffee is also leviable at the rate of Re. 1

per cwt. under the coffee Market Expansion Ordinance which was promulgated in December 1940 for the control of the coffee industry in order to secure a fair price for the grower and to secure export markets for the surplus coffee. The provision made thereunder was continued by the enactment in March 1942 of the coffee Market Expansion Act, 1942. The Act will remain in force till the end of the twelve months commencing on the 1st day of July subsequent to the termination of the present hostilities and during this period the Indian Coffee Cess Act shall be deemed to be repealed, without prejudice, however, to the continuing validity of any action taken by the Indian Coffee Cess Committee which is not inconsistent with the provisions of this Act. Similar legislation has also been brought into force by the States of Mysore, Cochin and Travancore.

## Sugar.

Sheltered behind adequate tariff protection, guaranteed for a period of fifteen years, ending on March 31, 1946, which has been extended by another year, pending a further Tariff Board Enquiry, the Indian sugar industry has made phenomenal progress and has achieved the position now of being the largest sugar producing country (including *Gur*) in the world. And, the capital invested in the industry is estimated at Rs. 35 crores.

An important landmark in the history of the sugar industry was the year 1930-31, when the question of protection was referred to the Tariff Board by Government. Pending consideration of the Tariff Board's report, the revenue duty was enhanced to Rs. 7-4 per cwt. in March, 1931. In addition, a revenue surcharge of 25 per cent. (amounting to Rs. 1-13 per cwt.) was imposed in September, 1931. In accordance with the Tariff Board's recommendations, Government issued a *communiqué* on January 30, 1932, fixing the protective duty at the rate of Rs. 7-4 per cwt. of all classes of sugar until March 31, 1938. The total import duty along with the surcharge was Rs. 9-1-0 per cwt. till 31st March, 1934. From 1st April, 1934, the protective duty was enhanced to Rs. 7-12,

but the surcharge was reduced to Rs. 1-5-0 and made equivalent to the excise duty of Rs. 1-5-0 imposed on internal production. Thus the total import duty remained the same, *viz.*, Rs. 9-1-0 per cwt. From the 28th February, 1937, the protective duty was decreased to Rs. 7-4-0, and a surcharge was imposed at the rate of Rs. 2-0-0 per cwt., equivalent to the increased excise duty of Rs. 2 per cwt. on internal production from the same date. The total import duty from 28th February, 1937, was Rs. 9-4-0 per cwt. With effect from 1st April, 1939, the import duty was reduced to Rs. 8-12-0 per cwt. and it was raised to Rs. 9-12-0 from 1st March, 1940, as a result of the increase in the excise duty from Rs. 2 to Rs. 3 per cwt. As a result of the imposition of a general surcharge of 20 per cent. on all customs duties, with the exception of cotton, salt and petrol, the import duty on sugar is now higher at Rs. 11-1-7½ per cwt. (the excise duty remaining Rs. 3 per cwt.) with effect from 1st March 1942. The emergency surcharge levied on all import duties in the financial year 1942-43 was continued till 31st March 1946, after which the duty on the present level was again continued for a period of one year, ending 31st March, 1947, by when a

fresh Tariff Board will hold an enquiry to determine the quantum of protection required after 31st March, 1947.

A Tariff Board Enquiry was instituted in March, 1937, for determining the extent of protection to be conferred on the industry for the remainder of the period of 8 years. The Tariff Board submitted its Report in December, 1937, but as the Government of India could not complete their examination of the Report before March, 1938, they continued the existing import duty on sugar up to 31st March, 1939. On the 30th March, 1939, the Government of India published the Tariff Board's Report—after a period of 15 months. The Tariff Board had recommended continuance of the protection at the existing rate, viz., Rs. 9-4-0 per cwt. upto 31st March, 1946, but the Government not agreeing with this recommendation, announced their decision to decrease the protection by Rs. 0-8-0 per cwt. pending a further Tariff Board Enquiry in 1940, and passed an Act giving protection to the industry at the rate of Rs. 8-12-0 per cwt. for a period of two years, ending 31st March, 1941. The existing protective duty has been continued by stages, upto 31st March, 1946.

With a view to check a too rapid growth of the industry under artificial stimuli and in order to replace losses of revenue from this source, an excise duty of Rs. 1-5 per cwt. on factory produced sugar was imposed during the financial year 1934-35. Besides, it was proposed to set aside from the proceeds of the excise duty an amount equivalent to one anna per cwt. to be

protective duties have been continued up to 31st March, 1946 and again extended up to 31st March, 1947.

The area under cultivation of sugar-cane has kept pace with increased production: from 2,677,000 acres in 1929-30, it increased to 4,440,000 acres in 1936-37 but fell to 3,969,000 acres in 1937-38 and to 5,165,000 acres in 1938-39. Again it increased to 5,731,000 acres in 1939-40 and to 4,417,000 acres in 1942-43 and to 1,234,000 in 1944-45. Prior to 1932-33, there were only 31 cane-factories; 25 new factories were added in 1932-33 alone while another 15 new factories were started in the following year—an increase of 46 per cent. In two years. Since 1935-36, about 34 new factories of large cane-crushing capacity have been established, and in 1941-42, no less than 150 factories were working. Production of sugar in India may be classified under three main heads—by modern factories working with cane, by modern refineries working with raw sugar (gur) and by indigenous open pan concerns. Sugar production in India a few years ago amounted approximately to half the estimated total consumption within the country. Since 1931-32, the volume of factory produced sugar has increased by approximately 700 per cent. During 1936-37, India produced over 1,250,000 tons of sugar, i.e., slightly more than her estimated consumption of about 1,150,000 tons in 1936-37, and after two lean years, again produced over 131 lakh tons in 1939-40. The maximum production was achieved in 1943-44, which was estimated to be 1,304,000 tons.

Statistics given below, show the progress of the industry in recent years:—

Year.	No. of Factories.	Quantity of sugar manufactured from cane. Tons.	Quantity of sugar refined from gur. Tons.	Quantity of Khandari production Tons. (Est.)	Total quantity of sugar. Tons.
1937-38 .. .. .	136	930,700	16,500	125,000	1,072,200
1938-39 .. .. .	139	650,800	14,200	109,000	765,000

distributed among the provinces "for the purpose of assisting the organisation and operation of co-operative societies among the cane-growers so as to help them in securing fair prices." The excise duty was enhanced to Rs. 2-0-0 per cwt. from 28th February, 1937, and to Rs. 3-0-0 per cwt. with effect from the 1st March, 1940.

Due to the outbreak of the European war, the Central Government announced in September, 1940, that no tariff board would be appointed, as was announced by them in March, 1939. In the Delhi sessions of the Legislatures in 1941 the Government of India passed an Act, whereby the existing duties were continued in the first instance upto March, 1942. Subsequently the

Along with a rapid increase in internal production, there has been a sharp decline in imports. For instance, from an average of approximately one million tons in the years up till 1930-31, imports fell by about 45 per cent. in the following year and dropped to about 250,000 tons in 1933-34 and decreased further to 221,000 tons in 1934-35. During 1935-36, imports fell further to 198,888 tons, and in 1936-37, the net import was only 11,960 tons. As a result of dwindling imports Government are losing revenue from this source. The import during 1937-38 was only 9,410 tons but the import in 1938-39 was over 254,000 tons, in view of the deficit in indigenous production. In 1939-40, due to the greatly increased internal production and the outbreak of the European

War, the imports dwindled to about 35,000 tons. The yield from this source diminished from over Rs. 10 crores in 1930-31, to about Rs. 3.81 crores for the financial year ended March 31, 1935, to 3.24 crores for the year ended March 31, 1936, to Rs. 50 lakhs in 1936-37, to Rs. 25 lakhs in 1937-38, and to Rs. 45 lakhs in 1938-39. In 1939-40, however, it went up to about Rs. 3,96,00,000 due to increase in imports, necessitated by the small cane-crop, diseased cane, etc., in 1938-39, in India. The imposition of the excise duty at the rate of Re. 1-5-0 per cwt. on factory sugar, and Re. 0-10-0 on Khandsari sugar, from April 1st, 1934, has yielded a revenue to the Government of Rs. 97,22,000 in 1934-35, and Rs. 1,53,24,000 in 1935-36, and Rs. 2,52,02,000 in 1936-37. With the increase in excise duty on factory sugar to Rs. 2 per cwt. and Re. 1 per cwt. on Khandsari sugar the yield during 1937-38 was Rs. 3,30,97,000 in 1937-38, and Rs. 4,22,44,000 in 1938-39 and Rs. 2,47,19,000 in 1939-40. With a further increase in the excise duty from March 1, 1940, the yield was Rs. 3,92,00,000 in 1940-41. In the year 1941-42 the amount collected was very much higher at Rs. 6.72 crores. In the twelve months ended March, 1943, the amount collected was Rs. 4.83 crores. In 1943-44, the duty amounted to Rs. 7.24 crores, and in 1944-45 to Rs. 6.90 crores.

Since the imposition of the excise duty it is noteworthy that the Khandsari production has gone down considerably. From 1st March, 1939, the duty on Khandsari sugar was decreased to Re. 0-8-0 per cwt., but the definition of "factory" in the Sugar Excise Duty Act, 1934, was amended, so as to omit the reference to the number of workers employed with a view to enabling duty being charged even in premises where less than 20 workers are employed. The Government of India expected that with the definition of 'factory' thus amended even with the reduced duty on Khandsari of Re. 0-8-0 per cwt. there would be a revenue of about Rs. 6,00,000 during 1939-40. But this hope was not fulfilled. The yield was only about Rs. 1,46,000 in 1939-40. The amount of duty levied in 1940-41 was Rs. 2,86,000 and in 1941-42 Rs. 4,43,000. In 1944-45 it was Rs. 3,65,000 only.

During the year 1937, there was a precipitate fall in the price of sugar and in order to avert internal unrestrained competition a Sugar Syndicate was brought into existence, comprising over 90 mills. Later in the year, the industry approached the Government for legislative interference with a view to avoid over-production of sugar and to overcome internal unrestrained competition, which brought down the price of sugar to an uneconomically low level. The Governments of the U.P. and Bihar, to whom these representations were made passed Sugar Factory Control Acts, and made it compulsory for every mill to obtain a licence for working sugar factories from the Government. One of the conditions of the grant of licence to a factory has been membership of the Indian Sugar Syndicate. The Indian Sugar Syndicate has thus been given legislative recognition by the Governments of the U.P. and Bihar, and all mills working in the provinces of the U.P. and Bihar are compelled to sell their sugar through the Syndicate. The Governments of the U.P. and Bihar have also appointed a

joint Control Board consisting of the representatives of the U.P. and Bihar Governments, the representatives of the industry, and of cultivators and consumers. In 1940, the life of the Sugar Control Act was extended by Bihar and U. P. Governments up to June 30, 1944, and a Sugar Commission was also appointed by them to be "a final authority, subject to Government control, on all matters connected with the production and sale of sugar, as well as other matters regarding cane-prices, etc."

The life of the U.P. and Sugar Control Act has now been extended till 30th June, 1950.

There was a very large carry-over of sugar, approximating over 4 lakhs tons, at the beginning of the 1940-41 season and as a consequence the U. P. & Bihar Governments restricted, by means of quota, the production of sugar in factories in U. P. and Bihar. There was no check, however, to the production of sugar in Provinces outside U.P. & Bihar and in Indian States. Since 1942, the policy adopted by Government is to maximise production, and their efforts have met with considerable success, as can be seen from the increase in production in 1942-43 and 1943-44 in spite of handicaps of obtaining sulphur, coal, etc. The production of sugar fell in 1944-45 and also in 1945-46 owing to shortage of cane and transport difficulties. High prices realised for *Gur* also diverted cane supplies to some extent from the manufacture of sugar in factories to the manufacture of *Gur*.

During the year 1937 the Government of India imposed a ban on the export of sugar from India, by sea, to any country except to Burma, for a period of five years.

The International Sugar Agreement expired in August, 1942. In view of the opportunities afforded in the export sugar markets, for Indian sugar on account of the loss of Java, Philippines and other important producing centres, and the utter uselessness of continuing the International Sugar Agreement when many of the signatories had ceased to exist, the Government of India decided to terminate the agreement in deference to the wishes of the industry.

As a result of the termination of the International Sugar Agreement India is now free to export sugar by sea but whether it will be possible to take full advantage of the present situation cannot be said as there is a shortage of sugar within the country and there is hardly any surplus left over for export.

It is also of interest to note the production of *gur* for direct consumption since 1931-32.

	<i>gur</i> .

1945-46 .. ..	3,600,000

The price of sugar has been fixed since 1917 by imposing a control on the industry by the Sugar and Sugar Products Control Order and the factories are compelled to sell their sugar at controlled rates, and to consign their sugar to depots as advised by the Sugar Controller from time to time. In 1936, the price was Rs. 16-0-0 per maund, varying slightly according to quality.

In view of the character of sugar production in 1944-45 and 1945-46, the various Provinces were allocated quotas, smaller by about 25 per cent than the previous consumption, and in certain big cities like Bombay, sugar was rationed from 1943 onwards. The ration in Bombay was 3 lbs. of sugar per person and in other places the ration is smaller. In 1946, this ration was cut by 25 per cent in Bombay.

It may be noted also as a matter of interest that India is the largest producer of sugar

(including *guava*) and all the countries in the world. The total yield of sugar for 1945-46 was 5,152,000 tons and the Indian Sugar Industry Annual, for 1945-46, by M. P. Govilkar.

The total value of sugar and sugar produced in India is estimated at about Rs. 100 crores in 1944-45, and in 1945-46, it would be about Rs. 100 crores.

The Indian Sugar Industry is now the second largest industry, next in importance to only the Cotton Textile Industry, giving employment to over 120,000 workers, in addition to about 3,000 graduates and technical men and 25 million employees, and represents a capital investment of about Rs. 1,000 crores.

Recently in the British sugar corporation of 6 per cent sugar is not pure, the highest yield of sugar is 10 per cent, and the yield is 15 per cent.

## INDIAN TOBACCO.

**History.**—The Portuguese are credited with having conveyed the tobacco plant and the knowledge of its properties to India about the year 1508. Though there are many species in the genus *Nicotiana*, the tobacco of commerce comes only from the two species *Nicotiana glauca* and *Nicotiana glauca*. Of the two, the former is more common and commercially important.

**Importance.**—India is one of the principal tobacco producing countries of the world, being second only to the United States of America.

In 1944-45 the area under tobacco was 1,089,000 acres, the production during the same period was 923 million lbs. The Chief Tobacco growing provinces are Madras (325,000 acres), Bengal (300,000 acres), Bombay (143,000 acres), and Bihar (121,000 acres).

**Research.**—A great deal of research work has been done in India during the last 30 years both by the Government and by private agencies.

A sum of Rupees Ten lakhs is now being annually set apart for research and development work on this commodity, out of the receipts of excise duty which was levied on tobacco from April 1943.

The Government of India have set up an Indian Central Tobacco Committee on the lines of the Indian Central Sugarcane Committee and other such Committees already functioning. This Committee is fully representative of all interests relating to tobacco from the grower to the consumer, including research workers. This Committee came into being in Novr. '45, and the annual grant of Rs. 10 lakhs set aside for the improvement of production and marketing of tobacco has been placed at the disposal of this Committee. The Committee has plans for establishing a Central Tobacco Research Station in Guntur and Experimental Research Stations for the main types in particular parts of the country such as Rajahmundry for Cigarette tobacco, Rangpur for Cigar and Cheroot tobacco, Anand for Bidi tobacco and some suitable place in Bihar, for Hookah and Chewing tobacco.

Apart from the stations there is a number of sub-stations in various parts of the country. The Committee has also arranged to carry out exploratory work in different parts of the country with a view to find out suitable places capable of growing Virginia tobacco of good quality and high yield. The Committee's Headquarters are in Bombay.

The Imperial Agricultural Research Institute, Pusa, (now at New Delhi) isolated Pusa T. 25 and T. 63 among *N. glauca* varieties and Pusa T. 18 among *N. rustica* for chewing and pipe purposes respectively. Details of the methods of blue-curing of Virginia tobacco were worked out in 1928.

On the Tobacco Research Station at Nadiad, the Bombay Department of Agriculture, isolated Gampla 6, Pillu 45, Pillu 25, and Kellu 49, heavy yielding bidi and chewing tobacco strains. Attempts are also being made to improve the Nipani tobacco on the Tobacco Research Station, Nipani.

In Bengal, trials are being carried out on the Government Agricultural Farm at Burihat (Rangpur), to find out the possibility of growing superior varieties of cigar tobacco from Sumatra, Havana, Manila and Pennsylvania.

The Madras Department of Agriculture on the Agricultural Research Station at Guntur isolated the high yielding strain T. 20 in *Natu* or country tobacco for cheroot and pipe purposes and early maturing strain (H. S. 9) of Harrison special, the cigarette tobacco variety popular in India.

The Imperial Council of Agricultural Research, New Delhi, started in 1935 a Tobacco Research sub-station at Guntur for the improvement of the quality of cigarette tobacco. It was found that jowar (*Andropogon Sorghum*) as a preceding crop to tobacco helped to improve the quality of cigarette tobacco better than Maize and Variga (*Panicum Miliaceum*).

A strain of Cigarette tobacco called Amarelo 5 which is reported to be superior to HS 9 in its curing properties and yield of top-grade leaves has also been evolved recently at the station.

The India Leaf Tobacco Development Company, the largest buyers of tobacco in India, have been experimenting since 1920, chiefly in the Guntur area (Madras) and also in Saharanpur (United Provinces) and Whitefield (Mysore State), on the commercial possibilities of Virginia tobacco production and have helped to build up the Virginia tobacco industry to the position it now occupies.

The cultivation of Virginia tobacco in the Mysore State has increased appreciably during recent years due to the impetus given by the Mysore Tobacco Company.

**Improvement in Marketing.**—The marketing survey of tobacco conducted by the Agricultural Marketing Adviser to the Government of India revealed the urgent need for standardising the methods of grading and preparing tobacco before putting it on the market. With a view to assisting the trade in this direction, the Indian Tobacco Association, which consists of representatives of growers, dealers and manufacturers, was formed at Guntur. Since then, another association known as the East India Tobacco Federation, has come into being with the same object in view. Under the Agricultural Produce (Grading and Marking) Act, rules were framed in 1937, laying down grade designations, definitions of quality, methods of marking and packing for unmanufactured flue-cured and sun-cured Virginia and sun-cured *Natu* (country) tobacco. Grade specifications for *Jutty* and *Motihari* types of tobacco are under notification, and those for *Jati* and *Jati Bishpath* have been drawn up for notification.

With a view to controlling the quality of tobacco exported from India, the Government of India have banned under the Sea Customs Act of 1878 the export of unmanufactured tobacco of flue-cured and sun-cured Virginia, sun-cured *Natu* (country) and *Motihari* varieties unless such tobacco conformed to Agmark standards and was certified as such. An Inspectorate staff was appointed in 1945 consisting of a Chief Inspector and several Inspectors for examining the quality of tobacco and for supervising its grading on the basis of specifications laid down for Agmark grades. The staff was considerably augmented in the beginning of 1946. A panel of members from the trade has also been set up to settle disputes between the Inspectorate and the authorised packers in respect of the quality of tobacco. During the period May to December 1945, 4,236,880 lbs. of the above varieties of tobacco worth Rs. 22,67,021 were graded.

Another important aspect of marketing improvement is the regulation of markets. Attempts at regulating the market charges for tobacco have been made only in Madras so far, where the provisions of the Madras Commercial Crops Markets Act were applied to tobacco in Guntur District and Bezvada taluq of Kistna District in 1939. In this connection, the Guntur Tobacco Market Committee was set up in the same year, and this Committee took up the regulation of market practices regarding weighing, trade allowances and methods of sale. Market yards have been opened by the Committee where the growers and dealers are given facilities for transacting their business

in tobacco. This Committee is also attending to the dissemination of market news and propaganda for improving the cultivation of tobacco. The progress achieved so far is not however appreciable and there seems to be clear need for reorganising the organisation in Guntur.

**Production.**—More than half the Indian production is concentrated in 5 clearly defined zones, viz :—

(1) THE NORTH BENGAL AREA comprises the districts of Rangpur, Jalpaiguri and Dinajpur of Bengal including the Cooch Behar State. About three-fourths of the crop in this area is under *N. tabacum* which includes the varieties locally known as *Jati*, *Bhengi*, *Naokhol* and *Hingli*. The remaining one-fourth is under *N. rustica* which includes the local *Vilaiti* and *Motihari* varieties. *N. tabacum* varieties are mainly used for cigar and cheroot making and *N. rustica* varieties for hooka and chewing purposes.

The soils are grey ashy coloured loams rich in potash. Tobacco is sown in the nurseries from August to September and transplanting of seedlings is done from October to December. The crop is irrigated from temporary wells and is harvested from January to March. The leaf is cured by air-curing and sun-curing methods. The produce is marketed from March to October. The finer qualities of *Bhengi* are shipped to Burma, while the poorer qualities are sold in India for cigarette manufacture. *Hingli* and part of *Motihari* are sold for making snuff.

(2) THE GUNTUR AREA comprises the districts of Guntur, Kistna and adjoining portions of Hyderabad State. Varieties of *N. tabacum* are exclusively grown in this area. Prior to the introduction of flue-curing of Virginia tobacco in 1928, all the tobacco was sun-cured. The tobacco produced in this area is grouped into (i) Virginia :—(a), Flue-cured (b), Sun-cured, (ii) Country or *Natu* tobacco, invariably sun-cured. In the first group, Harrison Special and in the second group *Thoka Aku*, *Kara Aku* varieties are important. Flue-cured tobacco is being used in India and is also exported to the United Kingdom and Egypt for manufacture of cigarette and pipe tobacco. The sun-cured Virginia, and *Natu* tobaccos are used for making cheaper cigarettes, etc. The soils are deep, heavy black cotton soils and rich in lime. Tobacco seed is sown in August and seedlings are transplanted from October to November. The crop is grown invariably without the help of irrigation and is harvested from January to March. The flue-cured Virginia tobacco is marketed from January to April while the sun-cured Country and Virginia tobaccos are marketed from March to June. There are nearly 6,000 flue-curing barns and the Virginia tobacco is cured by means of artificial heat radiated from hot iron pipes arranged on the floor of the barn. The sun-curing is done by stringing the leaf to jute twine and curing them on racks pitched on the open field for drying in sun. To the Indian Leaf Tobacco Development Company Ltd. goes the credit for establishing the industry of Virginia tobacco production and for assisting the growers in seed and seedling distribution, research and propaganda in manurial require-

a useful wax which is associated with lac, the resulting wax-free lac being prized for its greater transparency.

Most of the lac produced in India is exported, principally to the U. S. A. and the U. K., to be used there in literally hundreds of industrial processes and materials, the chief, however, being in the manufacture of gramophone records, French polish, transparent varnishes from bleached lac, electrical insulating materials, hats, leather dressings, grinding wheels, sealing waxes, etc. About 10,000 tons of seedlac goes to the U. S. A. annually for conversion into bleached lac and the world-consumption of shellac for making 200,000,000 gramophone records is 10,000 tons.

In India, lac is used for making gramophone records, French polish, lacquering wooden toys, bangles, sealing-wax, etc.

The Indian Lac Research Institute at Namkum, near Ranchi, has been investigating better methods of production of lac and finding new uses for lac and gives practical demonstrations to those interested. Among new materials based on lac are plastic moulded articles, baking insulating varnishes, oil-cloth, abrasive papers, laminated boards, etc. A Lac Information Officer attached to the Institute answers all enquiries regarding the better utilisation of lac in industries. There is provision at the Institute for training those interested in up-to-date methods of cultivation of lac and its applications for various uses.

## INDIAN FILM INDUSTRY.

The Indian film industry, which is now 33 years old, can well claim to be the largest of the medium-scale industries of the country.

The first Indian film "Harischandra" was produced by Mr. D. G. Phalke in the year 1913, and since then the development of the industry has been both extensive and rapid. With the coming of talkies in 1931 the pace of progress substantially increased. Early development

took place in Bombay, which today is the "Hollywood of India." It is estimated that about 66 per cent. or two-thirds the total annual production of Indian films comes from Bombay studios. From Bombay the industry spread to other provinces, and it is now well established in Bengal and Madras.

For some years now, half a dozen pictures have annually been produced in Lahore as well

## NUMBER OF STUDIOS.

There are to-day about 50 film studios in India, and over 150 concerns engaged in producing films. The principal film producing studios are located at Bombay, Poona, Kolhapur, Calcutta, Madras, Salem, Coimbatore and Lahore.

Although exact figures are not available in certain cases, it is roughly estimated that about Rs. 10 crores is invested in the Production, Distribution and Exhibition branches of the Indian film industry, in which some 15,000 persons find employment. Investment in Production and Distribution amounted to about Rs. 4½ crores; Investment in the construction and equipment of Studios about Rs. 1½ crores, and investment in the Construction and Equipment of Cinemas about Rs. 4½ crores.

Of the 15,000 employed in the industry some 4,000, mainly artistes and technicians are engaged in Production, some 4,500, mainly clerical, are engaged in the Distribution, and some 6,500 are engaged in the Exhibition of films. The total salaries paid out in a year are estimated to come to about Rs. 1 crore.

The Average number of workers\* employed in film studios registered under the Factories Act as on 31st December 1942 was

Bombay Province	..	..	2,224
Madras	..	..	462
Calcutta and Lahore numbers are not available but are estimated at.			650
Total	..		3,336

These employees receive under Rs. 200 a month. Supposing the average paid to be Rs. 100, the annual payroll of these employees is estimated at .. .. Rs. 40,003,200 (\*i.e., excepting Author, Photo-playwriter, Scenario Writer, Composer of Songs, Production Manager, Assistant Production Manager, Costume Designer and his assistants, Art Director and his assistant, Music Director, Cameraman in chief, Sound Engineer, Chief Recordist, Sculptor, Make up Supervisor, Painter, Decorator, Property Man, and Orchestra.)

## Raw Film Imports.

Following are the import figures since 1937-38 :—

Year of Import.	Footage of Raw Film Imported.
1937-38	7,42,35,103
1938-39	7,38,55,853
1939-40	8,30,00,000
1940-41	7,00,00,000
1941-42	9,30,00,000
1942-43	8,65,53,000
1943-44	7,87,58,000
1944-45	..
1945-46	..
	.. Not available.

## FEATURES AND SHORTS.

The following table gives the number of short films published by the Boards of Film and feature films exhibited in India. The table Censors at Bombay, Calcutta, Madras and has been compiled from reports of censored Lahore.

Year.	FEATURES		SHORTS		GRAND TOTAL

1945 .. ..	98	332	689	664	787	996

The sudden drop in Indian feature film production in 1944 and 1945 is explained by the severe shortage of raw films. On the other hand the extraordinary increase in Indian short films during the same period is due entirely to the Government of India who, to enable exhibitors to show war effort films under D.I.R. 44A, had themselves to produce the necessary films in the absence of civilian short film producers. These short films, which included the Indian News Parade, were released chiefly in English, Hindustani, Tamil, Telugu and Bengali.

The increase in the number of foreign feature

and short films is explained (1) by the entertainment needs of the numerous Service units stationed during the period of the War in India (2), by the fact that the American, the British and the Soviet Governments put out many films calculated to explain the progress of the War and intensify the common war effort and (3) because the importers utilised their import quotas to the maximum extent permitted under the import regulations. Other Allied Government such as France, Belgium and Poland sent out their own short films.

## COUNTRY OF ORIGIN OF FEATURE FILMS.

The following Table gives the country of origin of feature films exhibited in India for the years 1933 to 1945 :—

	1936	1937	1938	1939	1940	1941	1942	1943	1944	1945

## DISTRIBUTORS.

There are about 150 distributors in all, of whom 9 are distributors of foreign films. 8 distributors of foreign films represent American and one represents British producers. These distributors imported on an average about 280 Feature Films and 300 Shorts every year.

During the period of World War II the import of feature films fell down by one-fourth, while that of short films became negligible as exhibitors were compelled under the Defence of India

Rules to exhibit not less than 2,000 ft. of such films as were approved or produced by the Government of India which took away all the time that was formerly used for showing imported short films.

The distributors are mainly centred in Bombay Calcutta, Delhi, Madras, Lahore, Bangalore. Karachi and Bhusawal to supply cinemas, throughout the country with pictures for exhibition.

## CINEMAS IN INDIA.

When compared to the world's film business, the Indian film industry rates below 3 per cent. For a population of 400,000,000 there are about 1,605 cinemas whether permanent or touring

in India. Britain for a population of 4,74,16,842 has nearly 5,000 cinemas while America with a population of 12,27,75,046 has as many as 17,000 cinemas.

Country.	Population.	Cinema Houses.	Persons per cinema.	Cinemas per 1,000 population.
Great Britain .. .. .	4,74,16,842	5,000	9,483	0.01
U. S. A. .. .. .	12,27,75,046	17,000	7,222	0.14
India .. .. .	40,00,00,000	1,605	2,35,294	0.0040

The number of cinemas has been increasing and there were in 1943 some 1657.

The gross annual income of cinemas showing Indian films amounted pre-war to about Rs.2.40 crores. Although there is a source of income from abroad for Indian films this does not amount to much. It is estimated that about 5 per cent. only of the total income from Indian films comes from abroad while 95 per cent. comes from India itself. The gross annual income of cinemas showing foreign films was estimated pre-war at about Rs. 60 lakhs.

### Production in 1944.

In 1944 and 1945, however, these incomes increased five-fold as a direct result of gainful employment provided by the needs of World War II and because large numbers of American and British soldiers were stationed in the country.

The gross box office collection in the official year 1944-45 is estimated at Rs. 11,53,25,611 which is nearly four times the gross box office collection of Rs. 3,62,88,000 of the year 1941. In this new increased gross income Producers, Distributors and Exhibitors, whether of Indian or foreign films, as well as Government as collectors of taxes (to the extent of 40 per cent) share.

The following table shows how the box office collection of 1944-45 was distributed:—

Gross Income .. .. .	Rs. 11,53,25,611
Less 25% paid as taxes other than entertainments tax .. .. .	2,88,31,402
	8,64,94,209

Less 50% share of exhibitors of which 20% represents exhibition of foreign films .. .. .	Rs. 4,32,47,105
	4,32,47,105
Less 15% earned by distributors. .	64,87,065
	3,67,60,040
Less 20% income on foreign films ..	73,52,088
Net income of Indian film producers .. .. .	2,94,07,952

The amount recovered from the film industry in all Central, Provincial and Municipal taxes is:—

Entertainments Tax .. .. .	2,44,12,496
Taxes other than the Entertainments Tax .. .. .	2,88,31,402
Total ..	5,32,43,898

21st September, 1946.

### Film Production.

The total number of films produced in India in 1944 was 124 against 149 in the previous year. There was reduced production in view of shortage of raw film imports. The imports were controlled by Government upto 15th Dec., 1945. In 1945 production was further curtailed by one-fourth.

The following table gives the production of films in the year 1940 to 1943:—

Language.	1940	1941	1942	1943	1944	1945
Tamil .. ..	35	30	21	11	13	11

<b>Grand Total ..</b>	<b>162</b>	<b>137</b>	<b>165</b>	<b>149</b>	<b>124</b>	<b>98</b>

The provincial production showed that Bombay maintained its ascendancy in production with 81 pictures in 1944.

Bombay 99 pictures.

Bengal 20.

South India 18.

The Punjab 5.

Total 124.

No less than one-third of the films produced came from the Major Producers.

#### Film Control Order.

The system of licencing production of Indian films with a view to conserving raw film introduced by Government on the 17th July 1943 continued until 15th December 1945.

### TAXATION.

The taxation includes (1) Import Duty on Raw Films and Production and Projection Machinery (2) An Octroi or Terminal Tax which is levied by most District Municipalities (3) An Advertisement Tax on cinema publicity of every sort including slides shown on the screen in the cinemas. This tax is levied by important Municipalities (4) Government Elec-

tricity Duty (5) Entertainment Tax (6) Income Tax, Super Tax and Excess Profits Tax upto 31st March 1946. The sum total of these taxes is estimated at 40 per cent. of the gross annual income of the industry. Thus, on the industry's gross income in 1944-45 of Rs. 11,53,25,611 Rs. 5,32,43,698 were paid in these taxes.

### IMPORTS OF FILMS.

The following table giving in footage and value the totals of raw and exposed films imported into India and of the import duty paid to Government:—

Cinematograph films .. .. .	31.06	29.67	30.86	34.08	31.65	37.81

## The Cocaine Traffic.

The form of cocaine chiefly used in India is Cocaine Hydrochloride. This salt forms light shining crystals, with a bitterish taste, and is soluble in half its weight of water. The alkaloid cocaine—of which this is a salt—is obtained from the dried leaves of the Erythroxylon Cocaine which grows in Bolivia, Peru, Java, Brazil and other parts of South America. The leaves are most active when freshly dried and are much used by the Natives as a stimulant. Tea made from them has a taste similar to green tea and is said to be very effectual in keeping people awake.

**Spread of the habit.**—The cocaine traffic in India is of comparatively recent growth, though it is impossible to estimate how widespread it was in 1903 when the Bombay High Court for the first time decided that cocaine was a drug included within the definition of an intoxicating drug in the Bombay Abkari Act. Since that date the illegal sale of cocaine in India has largely increased and the various provincial Excise Reports bear witness to the spread of the "Cocaine habit." The consumers of the drug, which is notoriously harmful, are to be found in all classes of society. In India, as in Paris, the drug is mostly used by prostitutes or by men as an aphrodisiac. The habit has spread chiefly to those classes which are prohibited by religion or caste rules from partaking of liquor and the well-known Indian intoxicating drugs.

**Smuggling.**—So far as the cases already detected show, the persons who smuggle the drug by sea from Europe and places outside

India, into India, are chiefly sailors, stewards, firemen and sometimes engineers and officers of foreign ships. The ports through which cocaine enters India are Bombay, Karachi, Calcutta, Madras, Mormugao and Pondicherry. The main inland distributing centres are Delhi, Lucknow, Meerut, Lahore, Mooltan, Surat and Ahmedabad. Delhi especially is notorious for the cocaine trade. Great ingenuity is employed in smuggling cocaine through the Custom Houses. It is packed in parcels of newspapers, books, toys and piece-goods and in trunks which have secret compartments. The retail trade in the towns is very cunningly organised and controlled. In addition to the actual retailers, there is a whole army of watchmen and patrols whose duty is to shadow the Excise and Police officials and give the alarm when a raid is contemplated. During the Great War No. 1 several cases of importation of Japanese cocaine were detected, the importers being Japanese and Chinese sailors. The original marks on the packets and phials are usually destroyed so that the name of the manufacturing firm may not be found out.

It is no longer possible to buy cocaine from any betelnut seller as it was some years ago, but scores of cases in the Police Courts show that the retail trade thrives, though to a diminished extent, in Bombay. High profits ensure the continuance of the trade.

During World War II illicit import of Cocaine into India from the Far East came to a standstill with the result that the number of addicts shrank sharply.

**The Law in regard to Cocaine.**—This varies in different provinces. A summary of the law in Bombay is as follows: No cocaine can be imported except by a licensed dealer and importation by means of the post is entirely prohibited. The sale, possession, transport and export of cocaine are prohibited except under a license or permit from the Collector of the District. A duly qualified and licensed medical practitioner is allowed to transport, or remove 20 grains in the exercise of his profession; and as much as 6 grains may be possessed by any person if covered by a *bona fide* prescription from a duly qualified medical practitioner. The maximum punish-

ment for illegal sale, possession, transport, etc., under Act V of 1878 as amended by Act XII of 1912 is as follows: Imprisonment for a term which may extend to one year or fine which may extend to Rs. 2,000 or both and on any subsequent conviction imprisonment for a term which may extend to 2 years or fine which may extend to Rs. 4,000 or both. The law in Bombay has been further amended so as to enable security to be taken from persons who have been convicted of cocaine offences. The amended Act also contains a section for the punishment of house-owners who let their houses to habitual cocaine sellers.

## The Opium Trade.

Mention opium and half the Western world directs its thought to India, as though India were a most unscrupulous producer of the most noxious drug on earth. Refer to the League of Nations' proceedings in regard to opium and again, mainly under the leadership of American representatives, one finds India and the Government of India held up to humanity as traffickers in opium and as thereby obstacles to making the world a better place to live in. In fact, neither India nor the Government of India has anything to be ashamed of in its opium history. Whatever may be the case in other countries, centuries of inherited experience have taught the people of India discretion in the use of the drug and its misuse is a negligible feature in Indian life. Abuse of its properties is rarer in India than the abuse of alcohol in Western countries.

The record as regards exports is equally clean. India has never driven hard bargains to secure the sale of the product overseas. Where it has been bought the reason is its superiority over other supplies, because of the stringent regulations by which its manufacture has always, under the British authorities, been regulated in India, in order to secure the purity and cleanliness of the finished product. Directly any importing country has expressed a desire to have the trade reduced, the Government of India have responded by stiffening their restrictions on export. There have, in recent years, mainly at the instance of America, been numerous International conferences with a view to making opium and drugs derived from it more difficult to obtain and in every case it has been found that India had already given the lead in the special regulations which it was proposed to lay down.

**The China Trade.**—The classic case of Indian restriction of her export opium trade is provided by China. There is a long history of Indo-Chinese negotiations on the subject, but it is unnecessary to go further back into these than 1911. On 8th May of that year, there was drawn up between India and China an agreement under which the Government of India assented to: (1) the payment of an import duty three times the existing amount in return for the promised abolition of provincial taxes; (2) the

partial closure of China to Indian opium by provinces, including not only stoppage of transit passes, but also treaty port closure, Shanghai and Canton excepted; (3) the total extinction of trade before 1917 on proof of total cessation of opium production in China; and (4) revision of the agreement on due notice by either party. This agreement, as its terms indicate, was on the side of China the outcome of a professed desire to stamp out the opium trade and opium consumption in her midst. And on her side China, in the agreement, undertook, among other things, to reduce production in China *pari passu* with the reduction of export from India.

In addition to the limit to the China trade imposed by the agreement, the Government of India undertook in order to lessen the danger of smuggling into China, and as an earnest of their desire to assist that country, strictly to confine the remainder of Indian opium export to the legitimate demands of the non-China markets. A figure was elaborately calculated for these markets and India drastically cut her non-China exports down to it in 1911. In subsequent years, she progressively reduced the permissible export limit and in 1913 she stopped exports to China altogether.

The financial sacrifice thereby undertaken by India in order to help the Chinese in their professed desire for reform amounted to many millions sterling a year. China never carried out her side of the bargain. She is still the greatest opium producing country in the world.

**Agreements observed by India.**—The Government of India have carried out to the letter their side of the 1911 agreement. They have gone further. Not only were exports to China stopped and exports to non-China countries in the East limited in accordance with the agreement with China, but exports to non-China countries have, on the voluntary initiative of India, been subjected to successive restraining agreements with the countries concerned. The Government of India introduced, with effect from 1st January 1923, a certificate system recommended by the League of Nations, whereby all exports of opium must be covered by certificates from the Government of the importing country that its consignment

is approved and is required for legitimate purposes. The pressure exerted by the League of Nations in this regard was not pressure upon the Government of India but upon the Governments of the importing countries and, so far as India was concerned, the new system was welcomed because it removed from the shoulders of the Government of India all responsibility in regard to opium consumption in the importing countries and laid it upon their own respective Governments. In 1926, in order to fulfil the spirit of her international agreements, India decided, though she was in no way bound to do so, to reduce her exports to Far Eastern countries for other than medical and scientific purposes by 10 per cent. yearly, so as to extinguish them altogether by December 1935, and effect has been given to that policy at considerable financial sacrifice.

**Indian Uses of Opium.**—There is a fundamental difference between the problem in India and that in foreign countries, particularly in America and Europe. America and Europe are principally concerned with the problem of the vicious consumption of cocaine and morphia and it is on the experience of the abuse of these drugs in those countries that much of the condemnation of Indian policy is based. It is accepted that the consumption of opium in America and Europe is in effect hardly less disastrous than that of morphia and cocaine. And the reason is that to Americans and Europeans opium is an unaccustomed drug. The habit of its use being both new and strange to them, it is never used to moderation but always abused, and the results have no relation to the result of moderate opium eating in India. The fact appears to be that peoples acquire a tolerance to drugs to the use of which they are long habituated. Opium has been used in India since the 16th century at least. The method of use is eating and in India, generally speaking, eating seems to do little, if any, harm. Smoking, which is the habit of the Far Eastern races, rather than of the Indian races, seems to do much more harm in India than eating, while on the other hand where smoking is in ordinary use competent authorities (e.g., the Royal Commission on opium in Malaya) think eating to be more harmful than smoking.

The Government of India have fully participated in the different International Conferences on the drug question and responded to the obligations which her assent to their conclusions has placed upon her in regard to home consumption. But the principal effect upon India to these international discussions has been to draw the fresh attention of her Government and people to the opium situation in her midst, to cause consultations on the subject between the Government of India and the Indian Legislature and to produce what may be described as considerable intelligent progress in the development of those regulations upon the use of opium which are time-honoured.

**India's Opium Policy.**—The current attitude and policy of the Government of India were explained on their behalf to the League of Nations at Geneva. Their representative declared that any genuine measure of reform initiated by a Provincial Minister in connection

with it would receive encouragement and support from the Central Government and showed that the policy of that Government is, and has been, one of non-interference with the moderate use of raw opium, whether the object of the consumer be some real or supposed physical benefit or merely the indulgence of the almost universal desire of human beings, particularly those whose occupations involve exposure or severe bodily exertion, for a stimulant or narcotic. It is, and always has been, the desire of Government to suppress excessive indulgence.

In a statement in the Council of State in April 1946, Mr. V. Narahari Rao, Finance Secretary, said: "The position is kept under constant review. While the consumption of opium by addicts and its use as a prophylactic or anodyne or as a household remedy by people to whom qualified medical assistance is inaccessible are tolerated, every step is being taken to check its use and to reduce consumption. The people of India have, by long experience, acquired an empirical skill in the use of opium for medical and semi-medical purposes and until proper medical aid becomes generally available throughout the country, it would appear neither practicable nor humane to prohibit the use of opium altogether. The Government of India are, however, at present reviewing the whole field in consultation with the provincial governments and the states and in particular are examining the practicability of suppressing opium smoking.

Under the Government of India Act of 1919, opium was a provincial transferred subject. Nevertheless, owing to the jealous watching and criticism by observers in every continent, the Government of India called an official All-India Conference, which was opened at Simla by Lord Irwin, on 5th May 1930, to consider the question of certain areas where opium consumption was alleged to be unduly high. This was followed by the prosecution of special provincial inquiries by committees set up by the Local Governments at the special instance of His Majesty's Government. The Conference, after an exhaustive discussion of the phenomena presented by the various areas selected for investigation, and in the light of the personal knowledge of the representatives of the different Provinces and of the reports of the local committees, concluded that it appeared that certain parts of Assam and Calcutta might correctly be regarded as having excessive consumption and that Orissa and the Ferozepore District of the Punjab might be held to provide cases for further inquiry. In other cases the Conference considered that there was no evidence of prevalent excess. But they gave a series of examples to show that there were simple explanations showing harmless causes for what appeared to be excessive consumption in many places.

Opium policy has on several occasions during the past few years come under discussion in the Central Indian Legislature and in regard to it the Government of India and the non-official members of the Legislature have been in accord. The area under cultivation of poppy is fixed every year with references to the requirements of opium for home consumption, manufacture of alkaloids and exports. Its cultivation is now restricted to a compact area in the

United Provinces and is the only source of supply to the Government of India Factory at Ghazipur. Several Indian States in the Central India are, however, known to have unrestricted cultivation to meet their requirements of their people the Government of India Factory at Ghazipur in the United Provinces where it can only be cultivated under license. Importation into British India from the Indian States is controlled by prohibition of imports except on Government account and by agreement with the states concerned that they will not allow exports to British India except by arrangement. But smuggling is the main source of getting opium from these States into British India. Cultivation in British India is progressively and rapidly being reduced. The process of reduction was stayed in 1931-1932 because it was found that the rate before 1931 had been too rapid so that stocks were brought to a dangerously low level. Progressive and rapid reduction was resumed in 1933, and continued till 1941-42. The area under poppy cultivation was, however, raised thereafter in order to meet the large demands for opium and its alkaloids for medical and scientific purposes from the United Kingdom, the U.S.A., the Eastern Group countries and the Indian Defence Services. The total area of cultivation of poppy from 1932-33 is as under :—

1932-33	=	27,228 Acres.
1933-34	=	13,792 "
1934-35	=	6,806 "
1935-36	=	7,167 "
1936-37	=	6,366 "
1937-38	=	6,564 "
1938-39	=	4,812 "
1939-40	=	4,899 "
1940-41	=	4,819 "
1941-42	=	15,301 "
1942-43	=	27,778 "
1943-44	=	36,415 "

**Gradual Extinction Of Exports.**—Lord Reading, as Viceroy, made the position clear in a statement in February, 1926, when he explained that to avoid complications that would arise in attempting to sit in judgment on the internal policy of other Governments the Government of India had decided to reduce exports to all countries in the Far East by a fixed proportion annually with a view ultimately to discontinuing them altogether.

In June, 1926, it was announced that extinction of these exports would take place in ten years.

Since the beginning of 1936, exports of opium from India are not allowed except in the following cases: small quantities sent to the French and Portuguese Settlements in India, Nepal, Zanzibar and Pemba in accordance with long standing practice; quantities sent to Burma and Aden which until recently formed part of India; and exports of raw opium to the United Kingdom for the manufacture of alkaloids. Exports to these places are allowed in accordance with longstanding practice and are subject

to arrangements (prescribed by the League of Nations) which confine the amount of such exports to the quantities approved by the Governments of these territories.

Exports of opium averaged 51 cwts. between 1909-10 and 1913-14. They were reduced to 14 cwts. in the following five years and were further brought down to 9 cwts. during the five years ended 1923-24.

The steady decrease in the average annual net receipts (after deducting expenditure) from the opium export trade is shown by the following table:

1910-11 to 1912-13	..	..	Rs. 801·62 lakhs.
1920-21 to 1922-23	..	..	Rs. 183·41 "
1922-23 to 1924-25	..	..	Rs. 167·51 "
1932-33 to 1933-34	..	..	Rs. 55·22 "
1934-35..	..	..	Rs. 19·35 "

In making this sacrifice, the Government of India had gone further than the requirements of the provisions of international conventions. India's voluntary relinquishment of crores in revenue has not, however, contributed to the reduction of consumption in the Far Eastern countries, which are now obtaining their supplies of opium from various other sources.

**Total Prohibition In Assam.**—The control of policy about internal consumption rests with Provincial Governments, who are adopting several measures to curtail supply to the public.

Since 1919 various restrictive measures had been adopted by the Government of Assam in their efforts to eradicate the opium habit, such as the raising of the retail price, the rationing of shops, the issue of passes, introduction of prohibition in selected areas, and accelerated reduction of rations.

The Government of Assam embarked upon a policy of total prohibition in the included areas of the Province from March 1, 1941. A system of quarterly accelerated reduction of opium rations by which rations of all consumers were reduced at the rate of one-eighth of a tola—according to the prescribed scale—was enforced from September 1, 1939, in the partially excluded areas of the Province with a view to eradicating this pernicious habit of opium consumption in these areas within a period of two years.

Close supervision is maintained over the licensed vendors in all parts of British India; the conditions of their licenses require that the shops shall always be open to inspection, that no opium shall be sold to children or bad characters, that sales shall only be made on the licensed premises and during the prescribed hours, that only unadulterated Government opium shall be sold, that credit shall not be allowed, that no consumption shall be permitted on the premises, that full accounts shall be maintained and that the names and addresses of purchasers of more than one or two tolas shall be recorded. These conditions are effectively enforced by the excise departments of the various provinces.

## GLASS AND GLASSWARE.

Glass was manufactured in India centuries before Christ. Pliny mentions "Indian glass" as being of superior quality.

As a result of recent archaeological excavations a number of small crude glass vessels, indicative of the very primitive stage of the industry at the time, have been discovered.

The first Indian references to glass are in the Mahavamsa, the Chronicles of the Sinhalese Kings (306 B.C.), when glass mirrors were carried in processions.

It is certain, according to Sir Alfred Chatterton, that by the sixteenth century, glass was an established industry in India, producing mainly bangles and small bottles. The quality of the materials was bad and the articles turned out were rough.

Manufacture of glass in India on modern European lines dates from the nineties of the last century, when some pioneer efforts were made in this direction. Since then, a number of concerns have started. They devote themselves to the manufacture of bangles and lamp-ware, while bottlemaking and production of table articles increased rapidly since the beginning of this War.

In its present stage, the industry takes two well-defined forms—(1) Indigenous Cottage Industry and (2) the modern Factory Industry. The former, which is represented in several parts of the country, has its chief centres in the Firozabad area in the United Provinces. It is mainly concerned with the manufacture of cheap bangles made from glass blocks manufactured in large quantities. With the coming of the factory-scale manufacture of bangles, the Cottage Industry is struggling hard for existence. The Factory Industry is turning out much better quality bangles and has also successfully eliminated Japanese imports. Firozabad is in full control of the bangle market since the outbreak of the War. It was experiencing extreme prosperity in the first three years of the war, lately tuned down by shortage of coal.

In other fields the factory industry is mainly concerned with the manufacture of bottles, lamp chimneys and globes, tumblers and jars, the chief centres of production being the United Provinces, Calcutta and Bombay. During the war the manufacture of a number of new articles was founded at the instance of Government, for the use both of Fighting Services and Civilian population. Three sheet glass factories are at present in existence and two in construction, while before the war there was only one sheet glass factory in India.

Records of pre-war ventures have shown that failure in some cases was due in part at least, to lack of enlightened management and the lack of

expert guidance. As a result of an enquiry held in 1931 the Government of India decided to assist the glass industry by way of a rebate of customs duty on imported Soda Ash.

In 1938 special action towards development of this industry was taken by the Government in the United Provinces. A glass Technology Section was established under the direction of Dr. A. Nadel, Glass Technologist to Govt., U.P. Since then modern recuperative furnaces have been introduced, and the large scale industry as a whole changed over from pot-furnaces to tank furnaces, which are more economic and better suited for mass production. Numerous glass shaping, refining and decorating machines of a modern type have been installed in factories, in some cases at Government expense, according to development plans implemented by the Section. The production of laboratory ware was initiated and also the manufacture of glass beads was introduced, as an entirely new cottage industry, following a process hitherto unknown in India. The glass Section tends to improve working conditions in Firozabad and other centres and evolves new types of decorative glasses for the bangle and bead industry. Several modern glass factories were built by the Section to cope with war supplies of articles never before made in India. They are now in full production. In particular the bottle industry has been organised on semi-automatic lines and the production of glass elements for the use of electric lamp factories has been established on large scale. One factory situated at Shikohabad specializes exclusively in electric lamp shells.

Due to technical improvements of a fundamental nature on the other hand due to favourable economic conditions connected with the war, the glass industry in the United Provinces has taken the lead, both in quality and quantity, and supplies the bulk of glass consumed in India, successfully replacing foreign imports. Various new lines, never before made in India, like boiler gauges, steamware, hospital ware, technical articles required by the Defence Departments, etc., have been evolved in the Laboratory of the Section and handed over to the industry for regular production.

Next to the United Provinces, the glass industry has lately grown in Calcutta where, due to the increased demand for glass goods, a number of small and medium-sized factories have come into existence. In Bombay one old-established bottle factory has greatly developed the quantity and quality of its products, also venturing into the field of glass instrument making. There are also several small factories of recent origin.

Lately the Government of India have decided to call into being a Glass & Ceramic Institute to be situated in Calcutta.

**HIDES, SKINS AND LEATHER.**

**Supply of raw hides and skins.**—India is regarded as a surplus country in respect of her resources of raw hides and skins. It is estimated that normally she produces 20 million cattle hides, 5.7 million buffalo hides, 27.5 million goat and 17 million sheep skins a year. Only a portion of the cattle and buffalo hides is obtained from slaughtered animals and the bulk, about 75 to 80 per cent., is derived from animals that die a natural death. On account of this reason the output of these hides increases when famine, flood, cattle epidemics, etc., take an undue toll on livestock. Goat and sheep skins are, however, derived from animals slaughtered for meat and their production remains more or less at a steady level. In normal times India also imports annually mostly from the neighbouring countries about 1 million hides and 5 million goat and sheep skins. So the total quantities of hides and skins normally available are about 26.7 million hides and 50 million goat and sheep skins annually.

**Trade in raw hides and skins.**—Just before the second World War about the year 1938-39 about 10 per cent. of the buffalo hides, 22.5 per cent. of the cow hides (kips), 6.5 per cent. of the sheep skins and 80 per cent. of the goat skins available in India annually were exported and the balance tanned in the country. The figures show that surpluses for export dwindled considerably except in the case of goat skins. This was due to the expansion of hide and sheep skin tanning in India. Goat skin tanning did not expand much.

Cattle hides are cured for the export trade by air drying and dry salting. The better grades of the former are dried out, being stretched lengthwise on frames, and are called "Framed" hides, and the inferior ones are dried by spreading on the ground and are known as "Crumpled" hides. Air dried hides are treated with a solution of arsenic to ward off insect damage before export. Dry salt curing is done mostly in Bengal with a saline earth known as "Khari Salt" which consists principally of sodium sulphate mixed with varying proportions of sodium chloride and earthy matter. Goat skins are mostly dry salted and to a lesser extent air dried. The total export of raw hides and skins amounted to Rs. 3,84,66,560 in 1938-39.

The Agricultural Marketing Adviser to the Government of India has been attempting to grade slaughtered cattle hides. Hide-grading stations have been started at slaughter houses at Delhi, Agra, Bandra (Bombay), Bareilly, Karachi and Rampur, and specifications for grades have been formulated. Hides and skins are included in the Schedule to the Agricultural Produce (Marketing and Grading) Act of 1937. An attempt is being made by the Central Agricultural Marketing Department, Govt. of India, to improve flaying in the slaughter house, where grading stations have been started by giving a bonus to flayers. The Department has published a Report on the Marketing of Hides in India and Burma (Marketing Series No. 36) and another Report on the Marketing of Skins in India and Burma (Marketing Series No. 40) which contain valuable information regarding Indian hides and skins.

**Tanning in India.**—The expansion of the tanning industry in India just before the second World War has already been mentioned. The War stimulated this expansion further. The tanneries which had existed when the war broke out extended their plants and increased their productive capacity and a number of new tanneries were also started during the war. India's tanning capacity has increased so much now that all the available hides and sheep skins can be tanned in the country leaving practically no surplus for export. Tanning of goat skin is also making steady progress in India. The Indian tanning industry may be divided into 2 categories, indigenous and modern.

**Indigenous tanning.**—This is carried out principally by the people of the tanning caste which is a depressed Hindu community known as the Chamar. They tan according to indigenous methods and their products may be divided into a number of typical groups, viz., (i) the miscellaneous crude leather produced in the villages to meet local needs, (ii) the bag tanned buffalo sole leather produced in the Punjab, Calcutta, Bombay and many other places which is extensively used for making shoes, (iii) tanned sheep skins of the Punjab known as "Kabuli Bheris" used as a cheap book binding leather throughout India, (iv) half-tanned leather of Madras and Bombay. The first three varieties are all consumed in India while the better grades of the fourth are exported chiefly to the United Kingdom and from there to other countries. The half-tanned cattle hides and calf skins are known in the International trade as East India tanned Kips and Calf skins. These are retanned and finished in the importing countries for making shoe upper and other varieties of dressing leather. The cattle hides used to be tanned formerly with avaram or turwar bark (*Cassia auriculata*) which occurs in South and Western India. But since the first world war they are being tanned in Madras with wattle bark, large quantities of which are imported from South Africa. The goat and sheep skins in Madras and these as well as cattle hides in Bombay are still tanned with avaram bark. The export of half-tanned leather was of the value of Rs. 5.6 crores in 1938-39. During the war the production of half-tanned leather in South India suffered a reduction due to lack of hides and skins.

**Modern tanning.**—Leather for Harness and Saddlery for military equipment has long been manufactured at Cawnpore by Western processes of vegetable tanning in pits from buffalo and heavy cow hides using the local tanstuffs, babul bark (*Acacia arabica*) and myrobalans (*Terminalia Chebula*). At present large quantities of South African wattle bark and its extract (*Mimosa Extract*) are also being used as the supply of babul bark is getting inadequate. Since the first world war sole leather has also been manufactured in Cawnpore, Agra, Calcutta and Madras from buffalo hides according to modern process for use in ammunition boots and better types of civilian footwear. Its output is now quite considerable in the country and is increasing. The second world war greatly stimulated the

production of vegetable tanned harness and sole leather and all the big and medium sized tanneries in India capable of producing these leathers were engaged in their manufacture. Most of them had to extend their plants to cope with the war demand for leather and all were supplying practically the whole of their outputs to the Government. Even after the war the increased production of pit tanned buffalo sole leather is continuing to meet its demand for the manufacture of civilian footwear in India and for export.

**Chrome tanning.**—The outstanding feature in the field of modern tanning in India since the first World War is the phenomenal development of chrome tanning, especially for the manufacture of the shoe upper leather, Box and Willow sides from cattle hides and Box and Willow calf from calf skins. A number of tanneries in Cawnpore, Calcutta and Madras are engaged in the production of these leathers. Some of the tanneries are quite big and equipped with the latest chrome tanning machinery while there are large numbers in Calcutta which are small. Indian Box and Willow sides have been regularly exported to Burma, the Straits Settlements, Iraq, Persia and Africa since that war. But after the Ottawa Trade Pact of 1933 Indian Box and Willow sides and Calf were exported in increasing quantities to the United Kingdom, being helped by a preferential tariff in favour of India. The export of these leathers to the United Kingdom rose to Rs. 54,15,500 worth in 1937. The Ottawa Trade Pact has also helped the development of the manufacture of glaze kid in India and its export from the country. The export of glaze kid rose to the value of 9.3 lakhs of rupees in 1938. Fairly

large quantities of embossed stout chrome upper leather were manufactured during second World War by a number of Chrome tanners in India for ammunition boots. Export of chrome leather from India to U.K. and other countries was considerably reduced during the last war due to war time exigencies. After the war its demand from the Overseas Markets continues to be keen and its export on a larger scale has been resumed recently. Its demand and consumption in India are also increasing considerably for the manufacture of civilian shoes.

Other items of modern tanning which have made some progress in India are belting leather, chamois leather, Suede leather, Vegetable and chrome patent leather, improved type of case leather, picking bands, roller skins, chrome lace leather, etc.

**Training centres for leather industry.**—There are a few training centres among which the Bengal Tanning Institute in Calcutta and Jullundar Tanning Institute, Jullundar City, Government Tanning Institute, Bombay, maintained respectively by the Governments of Bengal, Punjab and Bombay may be mentioned. Particulars of the courses of training may be obtained from the institutes. There are also peripatetic tanning demonstration parties under the Industries Departments of the Governments of the Punjab, U.P., Bihar, Orissa and Bengal which hold instructional classes in rural areas to introduce improved processes of tannings.

**Tanners Federation of India.**—To look after the interests of the Indian Tanning Industry this Federation was started a few years ago. Its Head quarters are the Upper India Chamber of Commerce, Cawnpore. Most of the organised tanneries in India are members of the Federation.

## COIR.

Coir is the trade name given to the fibre obtained from the husk of the coconut fruit. India and Ceylon have a virtual monopoly in the production of this by-product of the coconut industry and its development in these countries has been rendered possible by the fact that these coconuts are usually harvested when the husk of the fruit is still green, though the coconut within is ripe. Good quality coir can only be produced from the fresh green husk of the ripe fruit. If the nut is not fully ripe the fibre in the husk has not developed its full strength, and if the fruit has dried out the fibre is weak, dark coloured and difficult to extract.

In Ceylon, the extraction is done by mechanical means on a factory scale after the husks have been retted in water for two or three weeks, and under such methods it is not possible to obtain either the colour or cleanliness of the fully retted Indian coir. The process consists of holding the husk against a revolving spiked drum which combs and extracts the fibre. The shorter fibres collect in the drum and after cleaning are classed as "mattress fibre." The longer fibres are retained in the hand of the operator and are classed as "bristle fibre" which is exported and used in the manufacture of brushes, etc. About 75 per cent. of the Ceylon produce is exported as raw fibre, and only 25 per cent. as yarn or manufactured coir.

The Indian industry, as far as the export trade is concerned, is confined to the backwater regions of the Malabar coast, Cochin, Travancore, and to the Laccadive and Divi Islands, which are administered by the Madras Government. The extraction of the fibre and the manufacture of coir yarn forms a well organised cottage industry. The freshly harvested nuts are purchased by merchants who convey them down the backwaters to suitable places for retting. Such places are situated along the tidal reaches of the backwaters, and sites for retting are selected in places where the ground contains a considerable admixture of sand. Here, pits are dug, either in the backwater itself or on the banks and after lining these with palm leaves they are filled with the husks. When filled they are covered with plaited coconut leaves and weighed down with soil or mud. The husks are left to ret in these pits for a period of about eight months, the tidal rise and fall of the water and the porous nature of the ground ensuring constant water movement through the mass of retting husks and thus supplying aeration for the necessary bacterial action. At the end of this period, the husks are removed from the retting pit, washed in clean water and distributed among the local people who extract the fibre. This is usually spare time work done by the women of the house. Firstly, the outer skin of the husk is removed and the husk is then

beaten with a wooden mallet on a block of wood or stone. This separates the fibre from the decaying pithy matter in which it is embedded in the husk. The fibre thus extracted is dried in the shade and then beaten or walloved with thin bamboo canes. The fibre is then returned to the merchant who further cleans this in a revolving drum furnished with projecting splices resembling thin saw blades made of iron. The fibre is sorted out into colour grades and distributed among the local people who spin this into yarn. The fibre is first made into "slivers" and is then either spun by hand or on a wheel. This is again returned to the merchant who again grades this for colour and splices the short lengths into a continuous length of 450 yards. It is then tied into bundles and is disposed of to the factories where it is either baled up for export or is manufactured into matting, door mats, braid, ship's fenders, rope, etc.

The yarn is very carefully graded, both for manufacture and for export, according to its colour, which is, in reality, a gauge of proper retting. The best quality of coir is a golden-yellow colour and the lowest grade is a grey colour which shows that the husks have either been over-retted or that the condition for retting have not been satisfactory.

Properly retted coir is of the highest quality. It is much more easily spun than machine made coir, because the fibres are clean and free from adhering pith and a much more even yarn is obtained. It is much stronger than machine-made coir because none of the longer "bristle" fibres have been removed in the process of extraction. The colour is not only attractive, but is an indication that retting has been carried through to the correct stage.

Coir fibre, when made into rope, is extremely elastic and thus yields to heavy strain, and it therefore has special uses. It does not rot easily when exposed to atmospheric conditions, or to salt or fresh water, and in manufacture it is found to take dye readily.

The value of the Indian trade is considerable, the imports into Great Britain alone, which represent less than 20 per cent. of the Indian exports, are shown in the Board of Trade returns to amount in value to more than one million pounds per annum. It is an industry which provides a profitable occupation to the densely populated back water tracts of Western India, and it provides the raw material in the shape of yarn and fibre for a considerable industry in Europe. More than 80 per cent. of the manufactured coir products imported into the United Kingdom are produced in India and more than 90 per cent. of the coir yarn. The imports of coir fibre from India are inconsiderable and amount to only 25 per cent. of the quantity imported. The export of coir fibre from India represents in value only 0.35 per cent. of that of the total Indian exports of coir and coir products.

The Government of Madras are conducting a coir demonstration school at Bypore near Calicut under the control of the Director of Industries and Commerce, where students are trained in improved methods of cleaning fibre, of spinning of coir yarn on the wheel, of producing ropes, belts, mats, rugs, etc.

It is proposed to enlarge the activities of the School and also to open fresh centres in suitable localities on the East Coast for teaching coir handicraft and increasing the output of coir articles.

## PATENTS, DESIGNS AND TRADE MARKS.

'Patents,' 'Designs' and 'Trade Marks' constitute certain forms of personal rights which are collectively referred to as rights of 'industrial property'. In British India the rights in Patents and Designs are regulated by the Indian Patents and Designs Act, 1911, as amended from time to time, and the procedure under the Act is regulated by the Indian Patents and Designs Rules, 1933 and the Indian Secret Patent Rules, 1933. The Act and the Rules are contained in the *Patent Office Handbook*, which is available from the Manager of Publications, Civil Lines, Delhi, at a cost of Re.1 per copy. The Handbook contains in addition detailed instructions for those interested in Patents and Designs. In the latest edition (6th) of the Handbook is added a new chapter wherein are collected together some of the important decisions of the Courts, the Central Government and the Controller of Patents and Designs. These decisions are helpful in interpreting the provisions of the Indian Patents and Designs Act of 1911. The broad features of the Patents and Designs Act may be described as follows:—

### PATENTS.

A patent is a legal document which confers upon the patentee the exclusive privilege of making, selling and using the patented inven-

tion and of authorising others so to do. Patents granted under the Indian Patents and Designs Act are operative throughout British India. The normal term of a patent in British India is 16 years. But in exceptional cases, this term can be extended by a maximum of ten years. The continuance of the right conferred by a patent after the first four years of its term is subject to the payment of an annual renewal fee.

**What may be patented.**—A patent may be granted for an 'invention,' which is defined as "any manner of new manufacture including an improvement or an alleged invention." In other words, to be patentable an invention must be a *manufacture*; it must be new; it must be useful and it must not be such as may be said to be obvious to a person skilled in the art to which the invention relates and acquainted with the common knowledge in that art at the time of applying for the patent. The word 'manufacture' includes any process, apparatus, device, machine, article, or composition of matter.

Illustrations of patentable inventions are new textile machines, power plants, agricultural implements, domestic appliances, drying and moistening apparatus and processes and sanitary appliances.

In the field of chemical industry *new* processes and apparatuses for manufacturing synthetic products, foodstuffs, dyes, tallow substitutes, starchy raw materials, soda ash, caustic soda, bleaching powder, toilet preparations, and processes for the treatment of oil seeds, by-products and waste materials, are all patentable inventions.

A plan of campaign in warfare or business, or the discovery of a hitherto unknown natural law is not patentable. Similarly, a game of chance or skill which does not require new means for playing it, or a method of calculation or a new notation for writing music, a new method of curing diseases, natural substances suitable for food, cannot be classed as 'manufactures,' and are therefore not patentable.

What are commonly called "patent medicines" are medicines prepared by secret formulae and are not usually covered by the grant of patents. The proprietors of such medicines may in most cases possess trade mark rights in the names by which the medicines are known.

*New* methods of using well-known apparatus may also be patented, provided the *new* methods result in unforeseen technical advantages. *New* compositions of matter may also be patented if their properties would not be deducible from known properties of their constituent substances.

In the case of chemical inventions, it should be noted that, the article or substance which is produced may be old, but if the mode of producing it is new, the process will be patentable.

**Who may obtain a patent and how.**—Any person in possession of an invention may obtain a patent. Application for a patent should be made to the Controller of Patents and Designs and filed at the Patent Office at 214, Lower Circular Road, Calcutta. The applicant himself need not be the inventor, but the name of the inventor has to be disclosed. The application should be accompanied by either a Provisional specification or a Complete specification, in duplicate. If the application is accompanied by a Provisional specification, it will be necessary to file a Complete specification within 9 months from the date of the application. This period of nine months may be extended by one month by paying an additional fee of Rs. 10.

The fee payable in respect of an application accompanied by a Provisional specification is Rs. 10, and in respect of an application accompanied by a Complete specification is Rs. 30. The fee payable in respect of filing a Complete specification following a Provisional specification is Rs. 20. All applications for patents and the specifications in respect thereof are examined by the Patent Office and after their acceptance are advertised in the Gazette of India, Part II, Section I, so as to enable interested parties to oppose the grant of patents.

**Other features.**—Inventors of instruments or munitions of war may assign their inventions to the Central Government and obtain 'secret' patents therefor. No fees are payable in respect of 'secret' patents.

Improvements on an existing patent may be protected by 'patents of addition,' for which

no renewal fee need be paid, but which would ordinarily remain in force only so long as the main patent is in force.

After a patent is obtained, the patentee may either sell the patent outright or may grant licences for its exploitation. He may work the patent himself.

If, during the continuance of a patent, any person makes, sells, or uses the invention without obtaining a licence from the patentee, or counterfeits it or imitates it, the patentee may institute a suit for infringement against the said person.

The defendant in an infringement suit may counterclaim revocation of the patent. A patent worked wholly outside British India may also be revoked by the Central Government.

## DESIGNS.

For the purpose of the Indian Patents and Designs Act, 1911, a 'design' means the features of shape, configuration, pattern or ornament applied to any article by any industrial process, which in the finished article appeal to and are judged solely by the eye. A model or principle of construction, or anything which is in substance a mere mechanical device, or a trade mark is not a design for the purpose of the Indian Patents and Designs Act. Literary or artistic creations such as books, pictures, and music, which fall under the Indian Copyright Act (Act III of 1914) do not also come within the scope of the Indian Patents and Designs Act.

A design to be registrable must be *new* or *original* and must be applicable to an *article*. The original registration remains in force for five years, but the period can be extended upto fifteen years in all.

During the existence of copyright in a registered design, the unauthorised application of the design to the article in question for purpose of sale is prohibited. The penalty for each infringement is a sum not exceeding five hundred rupees recoverable as a contract debt; the proprietor may, in the alternative, elect to bring a suit for the recovery of damages and for an injunction against the repetition of the infringement, in which case the infringer is liable to pay such damages as may be awarded. By a recent amendment of section 18 of the Indian Sea Customs Act, the importation into British India of goods bearing a pirated design can be stopped.

## GENERAL.

On the whole, Indian Law and practice for the protection of Inventions and the registration of designs closely follow the law and practice of the United Kingdom. The existing Indian Patents and Designs Act extends to British India only. The Indian States do not come within the scope of the Indian Patents and Designs Act; but Baroda, Cochin, Cooch Behar, Hyderabad (Deccan), Indore (Holkar), Jodhpur, Jammu and Kashmir, Mysore, Rampur and Travancore have patent laws of their own, and particulars of the same may be obtained from the Patent offices of the respective States.

A patent granted in British India does not extend to the United Kingdom or to any other British possession. But, under a reciprocal arrangement, an applicant for a British Indian patent may, under certain conditions, claim a 12 months' priority in Australia, Baroda, Canada, Ceylon, Eire, Mysore, New Zealand, Rampur, the Union of South Africa, and the United Kingdom for the corresponding patents that may be granted to him in those countries. Similarly an applicant for a patent in any one of the said countries may claim a 12 months' priority for his corresponding patent in British India.

### WAR LEGISLATION.

Rules 81A to 81C of the Defence of India Rules enable the Central Government to grant licences under enemy-owned patents and designs.

For further information on this subject reference may be made to the Patent Office, 211, Lower Circular Road, Calcutta.

Rule 42 of the Defence of India Rules provides that except under the authority of the Controller, no person shall make an application for the grant of a patent or the registration of a design in any country or place not included in His Majesty's Dominions, and not being an Indian State.

The Indian Patents & Designs (Extension of Time) Act, 1942, authorizes the Controller of Patents & Designs to grant extensions of time for the completion of proceedings under the Indian Patents & Designs Act, 1911, when such proceedings could not be completed within the prescribed time due to delay caused by war conditions.

## TRADE MARKS.

The Trade Marks Act, 1910 (Act V of 1910), was passed by the Indian Legislature in March 1910, to provide for the registration and more effective protection of trade marks in British India. Sections 1 and 85 of the Act came into force at once, and under the latter section, intending applicants for registration were enabled to deposit their trade marks. About 1,58,000 trade marks were so deposited, which were since classified and indexed.

Before the other provisions of the Act could be brought into force the Act was amended in 1941 (Act XXVII of 1941) to establish a separate Trade Marks Registry at Bombay under a Bombay Registrar with jurisdiction over textile marks only. The Amended Act came into force on the 1st June 1942, but had again to be amended by the Trade Marks Amendment Act, 1943. The Act was further amended in April 1946 (Act XII of 1946) with a view to avoiding conflict of registration in various Indian States who have either passed Trade Marks Act of their own or proposed to do so in the near future, and also to make trade marks registered in any territory effective in all territories in India, in which trade marks legislation has been enacted.

Infringement actions of trade marks and certification of trade marks registered in British India can accordingly be filed in any of the reciprocating Indian States thus making it unnecessary for the proprietor of a trade mark to register a trade mark more than once in India. The Trade Marks Register is kept at the Registry at Bombay under the control and management of the Registrar of Trade Marks. Mr. K. S. Shavaksha, B.A. (Oxon.), Bar-at-Law, is at present the Registrar of Trade Marks.

A branch of the Trade Marks Registry is established at Calcutta, at which a copy of the Register and the Refused Textile Marks List are kept. The Branch Registry is in charge of the Deputy Registrar who is empowered under section 4 (2A) of the Act to discharge, under the superintendence and direction of the Registrar, any function which under the Act may be discharged by the Registrar. Any reference in the Act to the Registrar includes a reference to the Deputy Registrar when so discharging any such function. Where the

Registrar directs the Deputy Registrar to deal with a particular matter, he has in disposing of such matter the same powers as the Registrar. At present, the Deputy Registrar of Trade Marks is Dr. S. Venkateswaran, D.Sc., F.L.

The following is a summary of the important provisions of the Trade Marks Act, 1940:

A "mark" includes a device, brand, heading, label, ticket, name, signature, word, letter or numeral or any combination thereof; a "trade mark" means a mark used or proposed to be used in relation to goods for the purpose of indicating or so as to indicate a connection in the course of trade between the goods and some person having the right to use the mark. A trade mark may be registered only in respect of particular goods or classes of goods. Any person who is desirous of registering a mark should apply to the Registrar in the prescribed manner. The application may be made either at the Registry at Bombay or at the branch office at Calcutta.

Under section 6 (1), distinctiveness is the prime requisite of a trade mark for registration. A registrable trade mark must consist of or contain at least one of the following essential particulars: (1) name of a company or individual represented in a special or particular manner, (2) signature of the applicant or some predecessor in business, (3) one or more invented words, (4) word or words, having no direct reference to the character or quality of the goods and not being according to its ordinary meaning a geographical name or surname or the name of a sect, caste or tribe in India and (5) any other distinctive mark. A mark consisting of a name, signature, or any word other than such as fall within the above description is not registrable except upon evidence of distinctiveness. In determining whether a trade mark is distinctive the extent of the inherent distinctiveness of the mark, as well as its acquired distinctiveness by use or otherwise, will be considered. The commonly accepted name of any single chemical element or chemical compound is not registrable in respect of a chemical substance or preparation. Trade marks which are contrary to law or morality, or disintegrated to protection in a Court of Law by being likely to deceive or cause confusion,

or which are likely to hurt religious susceptibilities, are not registrable. The Act contains also special provisions for the registration of certification trade marks, and for defensive registration.

When an application for registration has been accepted subject to such conditions, if any, as the Registrar might think fit to impose, the Registrar shall cause the application to be advertised accordingly. Under section 15 (2) any person may in the prescribed manner oppose an application so advertised within 4 months, and after hearing the parties, the Registrar will decide whether registration is to be permitted. The date of registration of an application shall be the date of filing such application in the Registry.

The registration of a mark will be in force for 7 years in the first instance, after which it may be renewed for a period of 15 years. In all legal proceedings relating to a registered trade mark, the fact of registration shall be *prima facie* evidence of validity of the registration and of all subsequent assignments and transmissions. Further, after seven years from the date of registration, the validity of the original registration cannot be questioned except on grounds of fraud or deception or unless the mark offends against section 8.

The registered proprietor of a trade mark is entitled to an action for infringement under the Act. This valuable right is extended to owners of "old" marks, who had applied for registration of their trade marks within five years from the commencement of the Act and registration of which has been refused by the Registrar. The rights of action to passing off are not affected by registration, and are expressly preserved under the Act. Registration gives to the registered proprietor the exclusive right to the use of the trade mark in relation to the goods for which the mark is registered. Where a mark is already registered by one person, the same or nearly similar mark cannot be registered by another person, except in case of honest concurrent use or of other special circumstances section 10 (2).

The proprietor of a registered trade mark has power to assign the mark, and may assign it whether in connection with the goodwill of the business or not. A registered proprietor may also assign an unregistered trade mark without the goodwill of the business along with a registered trade mark under certain circumstances. Any assignment made without the goodwill of the business must be advertised as directed by the Registrar.

A person other than the proprietor of a mark may be registered as a registered user, on application being made both by the proprietor and such person to the Registrar in the prescribed manner, accompanied by particulars relating to their relationship, the control of the one over the other, and other facts relevant to the "permitted" use. The registered user may under certain circumstances file an action for infringement in his own name as if he were the proprietor, but cannot assign or transmit the mark.

Any person aggrieved by the presence of a mark or entry on the Register may apply in the prescribed manner to the Registrar or to a High Court for rectification of the Register. The registered proprietor may apply to the Registrar for correction or cancellation of any entry in the Register, relating to his trade mark. He may also apply for alteration of the registered mark in any manner not substantially affecting its identity.

With effect from the 1st January, 1947, it will be an offence to describe a trade mark as registered when it is not so registered. The use of the word 'Registered', however, is permissible if it is clearly indicated that the reference is to registration of the mark under the law of a country outside British India or if the word is used solely in relation to goods to be exported to a foreign country where the mark is registered. Declaration of ownership of a trade mark under the Indian Registration Act of 1908 is not equivalent to registration under the Trade Marks Act, 1940, and the use of the word "registered" to signify registration of declaration of ownership would therefore be an offence with effect from the aforesaid date. The use of Royal Arms, Heraldic devices, and State emblems without due authority may be restrained by injunction from the Registrar or at the suit of any other person who is duly authorised to use such Arms, etc., but the rights to their use acquired before the coming into force of the Act, are not affected.

All appeals from the decisions of the Registrar lie to the High Court.

There are also special provisions for registration of textile trade marks and for the constitution of an Advisory Committee to advise the Registrar with respect to usages of the textile trade.

The criminal law relating to the registration of trade marks is contained in the Merchandise Marks Act (IV of 1889), which has recently been amended. Section 3 of this Act enacts sections 478—489 of Chapter XVIII of the Indian Penal Code.

Total Miscellaneous Premium Income ..	.94 "	1.04 "	1.37 "	1.47 "

There was considerable expansion of insurance business in India during the decade preceding the War. This is shown by the fact that the total business remaining in force with Indian life offices which, at the end of the year 1929 was Rs. 82,00,00,000 had, by the end of 1938, grown to Rs. 219,00,00,000, or an average increase of Rs. 13.7 crores yearly.

The War years saw new business written by Indian Companies decline in 1939 to Rs. 42.5 crores against Rs. 43.3 crores in 1938. There was a further sharp drop in the year 1940 to Rs. 32.3 crores. In 1941 new business showed an improvement to Rs. 34.4 and in 1942 to Rs. 36.4 crores. In 1943 there was a very substantial improvement to Rs. 62.9 crores, while in 1944 new life business passed the 100 crore mark attaining a level of 151,000 policies insuring Rs. 106.20 crores, a record figure.

There is however enormous leeway to be made up in life insurance in India. This will be evident if it is realised that as against per capita insurance in India of about only Rs. 10, the per capita insurance in the U.S.A. is nearly 1,000 dollars and in Canada it is 700 dollars. These two countries with only 7 per cent of the world's population, possess as much as 75 per cent of the world's life insurance. The rapid strides insurance has been taking in the U.S.A. since the close of the world War I will be evident from these figures:—The average of life insurance per family shot up to 4,300 dollars in 1943 from 1,400 dollars in 1918.

When industrialisation takes place and the economic condition of the masses improves, life insurance in India will have to take enormous forward strides. The above figures pertaining to U.S.A., if applied to a country of nearly three times its population, even if only partly realized, will indicate the enormous work that lies before insurers in this country, particularly in the field of life insurance.

### DISTRIBUTION OF COMPANIES.

The total number of insurers registered under the Insurance Act, 1938, up to 30th September 1945 was 330 of which 234 insurers were Indian insurers and 96 were non-Indian insurers.

Of the 234 Indian insurers 89 had their head offices in the Bombay Presidency, 58 in the Bengal Presidency, 37 in the Madras Presidency, 17 in the Punjab, 14 in Delhi Province, 8 in the United Provinces, 4 in the Central Provinces, 3 in Sind, 2 in Bihar and 1 each in Assam and Ajmer-Merwara.

Of the 96 non-Indian insurers 65 (including 3 insurers holding standing contracts with Lloyds) were constituted in the United Kingdom, 21 in the British Dominions and Colonies, 6 in the United States of America, 3 in Switzerland and 1 in Java.

Most of the Indian insurers carry on life insurance business only. They are 151 in number, and of the remaining 83 Indian insurers, 47 carry on life business along with other insurance business, and 36 carry on insurance business other than life only. Of the Indian insurers 41 are either Mutual Insurance Companies or Co-operative Insurance Societies. Further there are a few pension funds, mostly

connected with Government services, and the Postal Insurance Fund which are exempt from the operation of the Insurance Act.

As regard non-Indian insurers, most of them carry on insurance business other than life. Out of the total number of 96 non-Indian insurers, 81 carry on insurance business other than life, 4 carry on life business only, and 11 carry on life business along with other insurance business.

### LIFE INSURANCE BUSINESS.

The total net new life insurance business effected in India during the year 1944 amounted to 451,000 policies insuring a sum of Rs. 106.2 crores and having an annual renewal premium of Rs. 5.74 crores, of which the new business done by Indian insurers amounted to 4,32,600 policies insuring a sum of Rs. 95.2 crores and having a yearly renewal premium income of Rs. 5.12 crores. The new life business effected by Non-Indian insurers amounted to 19,000 policies insuring a sum of Rs. 11 crores and having a yearly renewal premium income of .62 crores.

The average sum insured per policy under the new policies issued in India by Indian insurers was Rs. 2,206 and under those issued by non-Indian insurers Rs. 5,874.

The total net life insurance business effected in India and remaining in force at the end of 1944 amounted to 2,127,000 policies insuring a total sum of Rs. 443.13 crores including bonus additions and having an annual premium income of Rs. 22.43 crores. Of this the share of Indian insurers is represented by 1,940,000 policies insuring a sum of Rs. 366.15 crores and having an annual premium income of Rs. 19.10 crores. The share of non-Indian insurers is represented by 187,000 policies insuring a sum of Rs. 76.98 crores and having an annual premium income of Rs. 4.33 crores.

The following table shows the New Sums Insured by Indian Life Offices, the Average Sum Insured Per Policy and the Total Sums Insured in Force at the end of the year:—

Year.	New Sums Insured.		Total Sums Insured in Force.
	Sum insured (in crores).	Average sum insured per policy.	Sum insured including bonus additions (in crores).
	Rs.	Rs.	Rs.
1930	16.50	1,518	88.66
1931	17.76	1,786	98.02
1932	19.66	1,697	105.02
1933	24.83	1,573	118.77
1934	28.92	1,547	136.65
1935	32.81	1,565	151.63
1936	37.80	1,532	174.67
1937	41.74	1,520	196.74
1938	46.68	1,498	218.86
1939	45.96	1,511	232.42
1940	35.23	1,685	243.91
1941	36.68	1,841	256.43
1942	37.89	2,193	266.60
1943	65.24	2,258	310.95
1944	95.20	2,206	366.15

**ANNUITY BUSINESS.**

The total new annuity business effected during the year 1944 was for the amount of Rs. 9,46,000 per annum, of which the share of Indian insurers was Rs. 4,09,000 per annum. The total annuity business remaining in force at the end of the year was the amount of Rs. 42,65,000 per annum, of which the amount payable by Indian insurers was Rs. 21,84,000 per annum, and by non-Indian insurers Rs. 20,81,000 per annum.

Some Indian Life Offices have been operating outside India also. The total new sums insured by these offices outside India in 1944 amounted to 9,200 policies insuring Rs. 3.06 crores having an annual renewal premium of Rs. 0.19 crore, and the total business remaining in force at the end of 1944 amounted to 69,000 policies insuring Rs. 18.73 crores and having an annual premium income of Rs. 0.73 crore.

The total income of Indian and non-Indian insurers during 1944, in respect of their life insurance business amounted to Rs. 29.12 crores, while the total outgo was Rs. 17.5 crores.

The total income of Indian and non-Indian Insurers during the year 1944, in respect of their life insurance business was made up of:—

(In lakhs of rupees.)

Particulars of Income.	Indian Insurers.	Non-Indian Insurers.
	Rs.	Rs.
Premium.. ..	19,31	4,59
Interest, Dividend and Rents .. ..	3,20	1,13
Other Receipts .. ..	48	41
Total ..	22,99	6,13

The total outgo of these insurers during the year in respect of the life insurance business was made up of:—

(In lakhs of rupees.)

Particulars of Outgo.	Indian Insurers.	Non-Indian Insurers.
	Rs.	Rs.
Claims by death ..	2,67	88
Claims by Maturity ..	3,41	1,65
Annuities .. ..	8	11
Surrender value ..	62	47
Expenses of Management .. ..	6,03	85
Depreciation and Transfer to Investment Reserves, etc... ..	16	4
Miscellaneous .. ..	7	37
Transfer to Shareholders Reserves and dividends .. ..	4	5
Total ..	13,08	4,42

The respective balances of Rs. 9.91 lakhs and Rs. 1.71 lakhs represent the increase in the Funds of the Indian and Non-Indian Insurers.

**INTEREST RATE & EXPENSE RATIO.**

The net rate of interest earned on the mean life insurance funds during the year 1944 by Indian Insurers was 3.68 per cent. The net rates of interest realized on mean life insurance funds by the Indian insurers in each of five years were as follows:—

Year.	1940	1941	1942	1943	1944
Rate of Interest per annum ..	4.37	4.17	3.94	3.88	3.64

The total expenses of management of Indian insurers in respect of life insurance business, expressed as a percentage of the Premium income during each of five years was as follows:—

Year.	1940	1941	1942	1943	1944
Expense Ratio ..	28.9	27.4	26.7	27.9	31.2

If the figures of half a dozen Insurers having the largest premium income are excluded, the expense ratio in the case of remaining Insurers would be as under:—

Year.	1940	1941	1942	1943	1944
Expense Ratio ..	36.0	34.3	31.3	31.4	36.1

The net rates of interest realised in India on mean life insurance funds by the Non-Indian Insurers in each of five years were as follows:—

Year.	1940	1941	1942	1943	1944
Rate of Interest per annum ..	3.66	3.63	3.50	2.79	3.35

The total expenses of management of Non-Indian Insurers in respect of life Insurance business in India expressed as a percentage of the premium income during each of five years was as follows:—

Year.	1940	1941	1942	1943	1944
Expense Ratio ..	16.6	15.6	17.8	16.0	18.6

**NON-LIFE BUSINESS.**

The net Indian premium income of all Insurers under insurance business other than life insurance during 1944 was Rs. 7.39 lakhs (Rs. 7.63 lakhs in 1943) of which the Indian Insurers' share was Rs. 3.22 lakhs and that of the non-Indian Insurers Rs. 4.17 lakhs. The total amount was composed of Rs. 3.45 lakhs from Fire, Rs. 2.47 lakhs from Marine, and Rs. 1.47 lakhs from Miscellaneous Insurance business.

The Indian Insurers received Rs. 1.79 lakhs from Fire, Rs. 77 lakhs from Marine, and Rs. 66 lakhs from Miscellaneous Insurance business.

The non-Indian Insurers received Rs. 1.66 lakhs from Fire, Rs. 1.70 lakhs from Marine, and Rs. 81 lakhs from Miscellaneous Insurance business.

Some Indian Insurers who transact fire, marine or miscellaneous insurance business also operate outside India. These insurers had a net premium income of Rs. 1.18 lakhs in 1944 from business outside India.

## ASSETS OF INSURERS.

The assets of all the Indian Insurers amounted to Rs. 1,22,21 lakhs on 31st December 1944 which were held invested in:—

(In lakhs of rupees.)

Particulars.	Amount.
	Rs.
Indian Government Securities ..	71.42
Securities of Indian States ..	81
British, Colonial and Foreign Government Securities ..	87
Municipal, Port Trust and Improvement Trust Securities ..	6.78
Mortgages on Property ..	1.30
Loans on Policies ..	7.29
Loans on Stocks and Shares ..	18
Other Loans ..	57
Shares in Indian Companies ..	11.53
Land and House Property ..	5.60
Agents' Balances, outstanding Premium and Interest, etc. ..	5.54
Deposit, Cash and Stamps ..	6.13
Miscellaneous ..	1.10

The following table shows the assets in India of Non-Indian Insurers:—

(In lakhs of rupees.)

Insurers constituted in	Total Assets in India of	
	Life or composite companies.	Non-life companies.
United Kingdom ..	14.05	1.95
Dominions and Colonies ..	15.93	1.39
U.S.A. ..	..	32
Switzerland ..	20	6
Java ..	..	4
Total ..	30.18	3.76

## PROVIDENT INSURANCE SOCIETIES.

When the Insurance Act, 1938 came into force there were 505 Provident Insurance Societies (Provident Insurance Societies issue policies of small values, the maximum being a Sum Assured of Rs. 500 or an Annuity of Rs. 50 inclusive of any Profit or Bonus).

A large number of societies which existed at the commencement of the Act were either unable to make the initial deposit of Rs. 5,000 or did not choose to continue their business.

Between 1st October 1944 and 30th September 1945, only two societies were newly registered under the Insurance Act and the registration of 5 were cancelled. On 30th September 1945 there were in existence 137 provident societies.

The total new business effected by the societies during the year 1944 amounted to 18,700 policies insuring a sum of Rs. 83,81,300 and annuities for Rs. 900 per annum. The premium income received during the year on these policies amounted to Rs. 3,57,000. The business in force at the end of the year amounted to 72,500

policies, insuring a total sum of Rs. 2,25,56,999 including bonuses and annuities for Rs. 21,709.

The total life insurance funds of these societies at the end of 1944 amounted to Rs. 56,59,999 showing a net increase of Rs. 1,03,000 over 1943.

The net rate of interest realized on mean life funds of the societies in the year was 4.11 per cent., and the total expenses of management expressed as a percentage of the premium income was 48.

Out of 127 societies, which had submitted their returns for the year ending 31st December 1944, 18 had renewal expense ratios, calculated in the prescribed way, in excess of 100 per cent. and 32 between 50 per cent. and 100 per cent. Further 12 societies have not yet built up any life fund. There has been no improvement in this respect in spite of repeated warning given to the Societies while examining their annual accounts year after year. Commenting on the condition of provident societies the Government Year Book states.

"There is an appreciable number of societies with less than 100 policies on their books and quite a large number with less than 1,000 policies, while only a very few have 1,000 policies or more. All these societies which have been functioning for a period of 10 years or more and yet have less than 1,000 policies on their books should realize in their own interests and those of the policyholders whom it is their desire to serve, that they have not been able to secure the confidence of the public and that therefore they should amalgamate with larger societies."

## INSURANCE AGENTS.

Insurance agents constitute an important pillar of the insurance structure. The rapid increase in their number during the last few years, as indicated by the table below, naturally raises the question whether the growth has kept within healthy limits or whether the evil of overcrowding is present in this profession as well.

Year.	1942	1943	1944
Number of Agents	52,955	65,921	89,902

As regards Life Insurance business, the Government Year Book states that even assuming that Insurers had paid the maximum first year's and renewal commission on the total new business transacted by them in 1943 and on the balance of business on their books as at 31st December 1943 respectively, the average commission per annum accruing to each agent amounted to something less than Rs. 30. Further if allowance is made for the fact that generally, and quite justifiably, Insurers pay as first year's commission a basic rate much less than 40 per cent. and work up to that limit as the size of the new business introduced by the agent increases and that some new business, particularly under staff and other special schemes, is secured without the intervention of agents and that so far as old business is concerned no renewal commission would fall to be paid when the agent is dead or no longer in service, the average figure of Rs. 30 would be significantly reduced. As this reduced figure is only an average it will be evident that there should be a large number of agents drawing commission amounting to Rs. 10 per annum and perhaps even less.

## Finance.

The gradual evolution of the present financial organisation of India is in many respects a reflection of her constitutional development. In the earliest days of British rule, the Provinces, and especially the older Presidencies, were for all practical purposes independent of the central government and responsible only to the authority sitting in London. After the middle of the nineteenth century the process was reversed, and the Government of India was all-powerful, controlling the Provinces down to the smallest items of their expenditure. This centralisation reached its highest point during the long Viceroyalty of Lord Curzon, who was so jealous of his supreme authority that he sought to deprive the Presidency Governors of their right to correspond direct with the Secretary of State for India. This system was found top-heavy in the days of his successors, and a continuous process of devolution took the form of long-term "contracts" with the Provincial Governments, and later in the assignment of definite heads of revenue to the Provincial Governments, thus removing dual authority and responsibility which was clogged progress. A much clearer cut was made when the great reform scheme embodied in the Government of India Act of 1919 was passed. Here, for all practical reasons, provincial finance was entirely separated from the finances of the Government of India, and with one reservation the Local Governments were made masters in their own financial houses. The reservation arose from the circumstance that the funds of the Government of India did not then permit them to do entirely without contributions from the Provinces. These contributions were fixed in the shape of definite sums, which the Provincial Governments had to find from their own resources and pay to the Government of India in cash. They varied between Province and Province, on a scale which at first sight seemed inequitable, but which had a definite logical basis. The total of these contributions was a little less than ten crores of rupees. This was admittedly a temporary expedient, to last only so long as was necessary for the Government of India to reduce its post-war expenditure and develop its resources to the point when they would balance without drawing from the Provinces. They were an open sore, each Province claiming that it paid an undue proportion of the total contribution, and that it was starved in consequence. There was no possibility of adjusting these differences, so the contributions were reduced as fast as the finances of the Government of India permitted. They finally disappeared from the Budget in 1928-29.

But this did not end the discussion; indeed it was only the first phase. The Government of India had taken the growing heads of revenue—those which issue from taxes on income and customs. The Provinces were left with resources either almost static, like land revenue, or actually declining, as with excise where steps are being taken to reduce the consumption of alcoholic liquor in response to the strong Indian sentiment towards prohibition. At the same time the Provinces were confronted with the great growing sources of expenditure, like those on education and sanitation which bulk largely in Provincial budgets.

### Federal Finance Committee.

The financial organisation was, of course, reviewed as part of the work of the Round Table Conference. A sub-committee of the Federal Structure Committee was appointed under the chairmanship of Lord Peel to examine the question of federal finance and the principles embodied in the sub-committee's report were endorsed by the parent Committee with basis. A Federal Finance Committee with Lord Eustace Percy as Chairman was appointed at the end of 1931 to subject to the test of figures, the suggested classification of revenues by the Peel Committee and to estimate the probable financial position of the Federal and of the Provincial Governments under the proposed scheme. In the course of their report the Federal Finance Committee said that the transfer to the Provinces of taxes on income though defensible in principle would leave the Centre in deficit. Therefore the Peel Committee suggested a method of transferring to each Province a percentage of the share of income-tax estimated to be attributable to it. But in view of the incomplete data on which the estimates were made, a special review was held to be necessary at the time federation is established in order to fix the initial percentages. A strict allocation on a percentage basis would still leave some Provinces in deficit and so as to right their finances the committee suggested spreading the charge over the other Provinces by giving them back less in income-tax than they were entitled to.

Regarding possible new sources of revenue, Federal or Provincial, the Federal Finance Committee reported as follows:—

#### Federal.

**Excise on Tobacco.**—The present position in regard to this tax appears to be that a substantial revenue may be expected from a system of vend licenses and fees, but that an excise duty imposed in the near future could not be relied on to yield a substantial revenue. There is general agreement that such a duty could not be imposed on the cultivated product, and it is doubtful whether a duty on the manufactured product could be successful while manufacture continues to be so largely carried on in small establishments and even as a domestic industry. Vend licenses and fees can obviously be imposed only by the Governments of the Units, and their imposition by the Provincial Governments is now being encouraged by the Government of India.

**Excise on Matches.**—The imposition of an excise duty on matches is already under active consideration, and we feel justified in contemplating the existence of such a duty from the outset of federation. We are advised that the probable net yield of the tax for all-India at a reasonable rate, with due allowance for reduced consumption, would be about 3 crores, of which at least 2.50 crores would be raised in British India. (Here it may be noted that an excise duty on matches made in British India was first imposed in the 1934-35 Budget and has continued since).

constitution on this point since we are advised that, in practice, it would scarcely be possible for either the Federal or a Provincial Government to take into consideration income not liable to taxation by it, except with the consent and co-operation of the other Government. We are aware of no reliable data for estimating the yield of such taxation.

### Niemeyer Report.

A necessary prelude to the introduction of the Constitutional Reforms was an investigation of their safety in the light of the financial situation and prospects of India. The investigation was carried out by Sir Otto Niemeyer whose report was published in April 1936. The Report proposed immediate financial assistance from the beginning of provincial autonomy to certain provinces partly in the form of cash subventions, partly in the form of cancellation of the net debt incurred previous to April 1, 1936, and partly in the form of distribution to the jute growing provinces of a further 12½ per cent. of the jute tax.

Annual cash subventions are as follows: To the U. P. Rs. 25 lakhs for 5 years only, to Assam Rs. 30 lakhs, to Orissa Rs. 40 lakhs, to the N.-W. F. Province Rs. 1,00 lakhs (subject to reconsideration after 5 years), and to Sind Rs. 1,05 lakhs to be reduced by stages after 10 years.

The total approximate annual relief in lakhs aimed at by Sir Otto Niemeyer is as follows:—Bengal Rs. 75, Bihar Rs. 25, C. P. Rs. 15, Assam Rs. 45, N.-W. F. Province Rs. 110, Orissa Rs. 50, Sind Rs. 105, and U. P. Rs. 25, extra recurrent cost to the centre Rs. 192 lakhs.

Orissa is to get a further non-recurrent grant of Rs. 19 lakhs and Sind of Rs. 5 lakhs by six equal steps beginning from the sixth year from the introduction of provincial autonomy, but

subject to the proviso to section 138 (2) of the Act. The Centre is to distribute the income-tax to the provinces so that finally 50 per cent. of the distributable total has been relinquished in the intermediate five years, so long as the portion of the distributable sum remaining with the Centre, together with any contribution from the Railways, aggregates 13 crores.

As regards the provincial share of the proceeds from income-tax, Sir Otto Niemeyer recommended that half of the proceeds should remain with the Centre, while the other half should be distributed among the provinces on the following percentage division:—Madras 15, Bombay 20, Bengal 20, U. P. 15, Punjab 8, Bihar 10, C. P. 5, Assam 2, N.-W. F. Province 1, Orissa 2 and Sind 2.

Sir Otto Niemeyer suggested that the Centre would not be in a position to distribute any part of income-tax proceeds for the first five years from the beginning of provincial autonomy but that it might be in a position to distribute some of the proceeds, though not necessarily the percentage allocated, within the first ten years of provincial autonomy. But this, he said, largely depended on the financial condition of the railways and their ability once again to contribute to general revenues. His remarks on this point were:—

“The position of the railways is frankly disquieting. It is not enough to contemplate that in five years' time the railways may merely cease to be in deficit. Such a result would also tend to prejudice or delay the relief which the provinces are entitled to expect.

“I believe that both the early establishment of effective co-ordination between the various modes of transport and the thorough-going overhaul of railway expenditure in itself are vital elements in the whole provincial problem.”

## RECENT INDIAN FINANCE.

India, in common with other countries of the world, felt the full force of the economic blizzard which began in 1930 and attained its maximum the following year. The net result from the Government of India's point of view was the introduction during 1931 of two Budgets, the ordinary Budget in the spring of the year and a supplementary Budget containing fresh taxation proposals in September.

**The 1932-33 Budget.**—Presenting the 1932-33 budget on March 7, 1932, the Finance Member explained that the circumstances were somewhat unusual. The supplementary budget had been introduced only six months earlier. He did not, therefore, propose to ask the House at the present stage to approve any extensions or modifications of the plan for raising revenue put forward in September 1931.

**The 1933-34 Budget.**—In introducing the budget, the Finance Member summarised the results for the two previous years. He estimated the general position for 1933-34 to be the same as for the current year, neither better nor worse, and in particular that India would be able to maintain the same purchasing power for commodities imported from abroad.

**The 1934-35 Budget.**—In order to provide an even balance for 1934-35 it was necessary to find means of improving the position to the extent of Rs. 1,53 lakhs. The Finance Member announced the imposition of an excise duty on sugar, a reduction in the silver import duty by 2½ annas to 5 annas per ounce and the abolition of the export duty on raw hides. Announcing that the Government intended to hand over half the jute export duty to the jute producing Provinces, the Finance Member said that the Government of India would recoup their losses by imposing an excise duty on matches.

**The 1935-36 Budget.**—This Budget was expected to show a surplus of Rs. 1,50 lakhs available for tax reduction. The Silver duty was reduced to 2 annas an ounce. The export duty on raw skins was abolished. The remaining surplus of Rs. 1,42 lakhs was disposed of, first, in restoring the emergency cuts in pay, and second, in taking off some of the surcharge on income-tax. This surcharge was reduced by one-third; the cost was Rs. 1,36 lakhs, leaving a nominal surplus of Rs. 6 lakhs.

**The 1936-37 Budget.**—The surplus for 1936-37 was estimated at Rs. 2,05 lakhs, and this was

disposed of in two ways. First, the remaining surcharge on income-tax and super-tax was cut by a half, leaving it at one-twelfth of the original figure; further, income-tax on incomes between Rs. 1,000 and Rs. 2,000 a year was abolished. Second, a postal concession was made by increasing the weight of the one-anna letter from half to one tola, and adopting a scale of an additional half-anna for every additional tola. The effect of these changes was to reduce the surplus to Rs. 7 lakhs.

**The 1937-38 Budget.**—The prospective deficit for 1937-38 (due to trade depression and consequent smaller receipts from customs and income-tax) was Rs. 1.55 lakhs, which would have been Rs. 3.42 lakhs but for an amount available in the Revenue Reserve Fund. The deficit was met by a series of imposts: import and excise duties on silver were raised from two annas to three annas an ounce, while the sugar duties were raised on a graduated scale. Changes were made in the postal rates for parcels, book-patterns and samples, and the existing rates of salt duty, income-tax and super-tax were continued.

**The 1938-39 Budget.**—This Budget was generally regarded as preserving the *status quo*, since no changes in the taxation system were introduced and a surplus of Rs. 9 lakhs was anticipated. But there were special features in regard to Defence, for which an extra Rs. 80 lakhs was to be expended. A further feature of the 1938-39 Budget was the financing of Provincial Autonomy in its inaugural stages. While the separation of Burma caused a loss of Rs. 2.50 lakhs, payments to the Provinces under the Niemeyer Award amounted to Rs. 1.98 lakhs. To start the Provinces in a sound state the following steps were taken: their existing debts to the Centre were partly cancelled and partly consolidated at a lower rate of interest; additional grants-in-aid were made to deficit provinces; a larger share of the jute excise duty was disbursed and with the improvement in railway revenues, a start was made on the distribution of income-tax receipts to the provinces.

**The 1939-40 Budget.**—On the basis of the maintenance of existing taxation and the adoption of the new system of income-tax embodied in the Income-Tax (Amendment) Act of 1939 and the "slab system" of assessment (for details of which see under "Income-Tax"), the position was as follows: Estimated Revenue, Rs. 82.15 lakhs; Estimated Expenditure, Rs. 82.65 lakhs; Estimated Deficit, Rs. 50 lakhs. Both revenue and expenditure were down on the previous year, the former because of trade recession which would result in lower receipts from customs, and the latter because of economies under interest charges and Defence.

To meet the prospective deficit the Finance Member proposed an increase of 100 per cent. in the tariff duty on imported raw cotton, from six pices per lb. to one anna per lb. This was estimated to yield Rs. 55 lakhs, thus converting the deficit into a small estimated surplus of Rs. 5 lakhs. Other changes embodied in the Budget were the new rates of income-tax and super-tax drawn up on the "slab system" and modifications in the excise duty on sugar, estimated to yield an extra Rs. 51 lakhs.

**The 1940-41 Budget.**—A fortunate surplus for the previous financial year (1939-40) of Rs. 91 lakhs, but the necessity of finding new revenue to meet a prospective deficit of Rs. 7.16 lakhs in 1940-41 were the basic features of India's first War Budget presented by the Finance Member Sir Jeremy Raisman. By applying the surplus of Rs. 91 lakhs towards the coming year, the prospective deficit was reduced to Rs. 6.25 lakhs.

This short fall Sir Jeremy Raisman proposed to meet in three ways. The first was an Excess Profits Tax, to provide for an impost of 50 per cent. on all abnormal war profits, above a taxable minimum of Rs. 30,000, earned since September 1, 1939, these excess profits to be calculated on the basis of a standard year which might be, at the assessee's option, any financial year between 1935-36 and 1939-40. This was estimated to produce a net accession to revenue of Rs. 3.00 lakhs. The second means was a further increase of two annas per gallon in the duty on motor spirit (petrol), estimated to yield Rs. 1.40 lakhs, while the third impost was an increase from two rupees to three rupees in the excise duty on refined sugar with corresponding increase in the import duty, calculated to yield Rs. 1.90 lakhs. The three changes together were expected to produce Rs. 6.30 lakhs and to convert the prospective deficit of Rs. 6.25 lakhs in to a small surplus of Rs. 5 lakhs.

On the expenditure side, the main feature was naturally the Defence Budget, which provided for an increase of Rs. 5.11 lakhs on the previous year's estimate and stood at the sum of Rs. 49.29 lakhs. Under the settlement reached with His Majesty's Government on the division of defence obligations, India was to be liable only for the normal peace time cost of the Army in India, adjusted in relation to the rise in prices, plus the cost of India's own immediate war measures, plus a lump sum of Rs. 1.00 lakhs towards the maintenance of external defence troops overseas. In terms of figures it worked out as follows: (1) Normal peace Defence Budget, Rs. 36.77 lakhs; (2) effect of rise of prices on (1), Rs. 25 lakhs; (3) Indian war measures, Rs. 3.86 lakhs; (4) Non-effective charges, Rs. 8.41 lakhs; Total Rs. 49.29 lakhs.

**The 1940-41 Supplementary Budget.**—The rapidly mounting expenditure on defence coupled with the dislocation of trade caused by the war and consequent loss of Customs revenue, led to a deterioration in India's financial position which impelled the Finance Member to introduce a Supplementary Budget in November 1940. He had to meet an increase of at least Rs. 1.14 crores in defence and nearly Rs. 7 crores in Civil expenditure, coupled with a drop of Rs. 3 crores in revenue. He therefore supplemented the Finance Act, 1940, by two measures of fresh taxation designed to bring in Rs. 6 crores in a full year, leaving the position to be fully surveyed in the following February. The first measure was a 25 per cent. surcharge on all taxes on income including Super-tax and Corporation Tax. The second measure was an increase in postal rates, telegram and telephone charges, designed to bring in Rs. 1 crore in a full year.

**The 1941-42 Budget.**—Presenting the Budget for 1941-42, the Finance Member said that while Government's expenditure was expected to rise by Rs. 15 crores to a total of Rs. 1.26 crores, its

revenue was expected to rise by Rs.3 crores to a total of Rs.1.06 crores, leaving a prospective deficit of Rs.20 crores. One-third of this was proposed to be met by fresh taxation and the remainder from Defence Loans. For the previous year 1940-41, instead of the deficit being Rs.13 crores as estimated in November, the deficit was expected to be no more than Rs.8 crores; this was due to an increased contribution from the railways and a surplus over from the year before.

The additional taxation intended to raise a further Rs.6.61 lakhs in order to meet a share of the cost of India's war measures took the following forms: The Excess Profits Tax was raised from 50 per cent. to 66½ per cent. to yield Rs.250 lakhs, and the Central surcharge on Income-tax and Super-tax from 25 per cent. to 33½ per cent. to produce a further Rs. 190 lakhs. Other proposals were to double the match duty, to raise the import duty on artificial silk yarn and thread from 3 annas to 5 annas per pound, and to levy an excise duty on pneumatic tyres and tubes, to yield together Rs. 221 lakhs.

**Defence.**—The main purpose of these fresh imposts was to strengthen all arms of India's Defence Services, and for this a total expenditure of Rs.84 crores was envisaged in 1941-42. Rs.35 crores of this was for India's own war measures, while His Majesty's Government in Britain were paying separately for all supplies and services rendered to them by India and were also providing free of charge much of the equipment needed for the modernisation of the Army in India. The strength of India's armed forces, already well over half a million, was to be further expanded. Civil expenditure had increased by Rs.2.61 lakhs, mainly on account of schemes connected with the war. The Supply Department's expenditure on placing orders for Indian products for allied Governments, the value of which had already exceeded Rs.82 crores, was expected to be Rs.58 lakhs.

**The 1942-43 Budget.**—Presenting the Budget for 1942-43 Sir Jeremy Raisman, the Finance Member, disclosed a revenue deficit of Rs. 17 crores for the year and a prospective deficit on the prevailing basis of taxation of Rs. 47 crores for the next year. The revised estimate on defence in 1941-42 was placed at Rs. 102 crores; in 1942-43 it was estimated at Rs. 133 crores. The amount of expenditure on defence services and supplies which the Government of India expect to recover from His Majesty's Government under the operation of the financial settlement would exceed Rs. 400 crores in 1942-43.

Sir Jeremy Raisman proposed to meet the deficit by raising loans to the tune of Rs. 35 crores and leaving taxation to cover the balance of Rs. 12 crores. The new taxation proposals included: (1) the surcharge on income-tax and super-tax to be increased from 33½% to roughly 50%; (2) an all-round customs surcharge of 20% to be levied on existing import tariff except on raw cotton, petrol and salt; (3) petrol tax to be increased by 25% and post and telegraph rates also to be increased. The share of the provinces in the income-tax was placed at Rs. 7.39 lakhs in the current year and Rs. 8.37 lakhs in the following year. Sir Jeremy estimated the total additional revenue from fresh

taxation at Rs. 12 crores, leaving a deficit of Rs. 35 crores to be covered by the borrowing programme.

**Defence.**—Of the gross expenditure on defence likely to be brought to account in India's books during 1942-43, Sir Jeremy revealed that nearly three-quarters, totalling Rs. 400 crores, would be met by Whitehall. In addition His Majesty's Government undertook to supply India with large quantities of aeroplanes, vehicles, guns and other equipment without charge; these free supplies already made or expected to be received by the end of the following financial year total roughly an additional Rs. 60 crores.

**The 1943-44 Budget.**—Presenting the Budget for 1943-44, Sir Jeremy Raisman stated that the total revenue estimates for the coming year amounted to Rs. 199.3 crores, as compared with Rs. 178.76 crores in the revised estimates for the current year. The total expenditure was expected to be Rs. 259.59 crores, leaving a prospective deficit of Rs. 60.29 crores. The deficiency was to be made good by Rs. 20.1 crores of new taxation and the remainder totalling Rs. 40.19 crores by borrowing. He estimated that increases in income-tax, super-tax and corporation tax would yield Rs. 7 crores of new revenue. As a result of the budget proposals a 66 per cent. income-tax surcharge would be applied uniformly over all levels of income.

**Defence Expenditure.**—Reviewing defence expenditure, Sir Jeremy Raisman pointed out that the revised estimates for the current year had risen from Rs. 133 crores mentioned in the budget last year to Rs. 189.75 crores. For the coming year, however, this expenditure is expected to fall to Rs. 182.81 crores. The decrease is due to the fact that during the coming year the land forces in India will have reached a stage which can be regarded as reasonably adequate to meet all the demands likely to be made upon them.

**The 1944-45 Budget.**—Presenting the Budget on February 29, 1944, the Hon. Sir Jeremy Raisman, Finance Member, placed the total revenue estimates at Rs. 284.97 crores as compared with Rs. 254.50 crores in the revised estimates for 1943-44. The estimates for expenditure amounted to Rs. 363.18 crores comprising of Rs. 86.57 crores under civil estimates and Rs. 276.61 crores under Defence Services. Thus, a revenue deficit of Rs. 78.21 crores was foreshadowed. He proposed to meet this deficit by measures of ordinary taxation and compulsory deposit. The most important of the latter was a provision for advance payments of tax on income from which tax was not deducted at source. The compulsory deposit of one-fifth of the excess profits tax was increased to 19/64 of the tax with the object of immobilising the whole of the excess profits. He hoped to reduce the prospective revenue deficit by Rs. 23½ crores by raising the scale of income-tax which was expected to bring in an additional revenue of Rs. 8½ crores and by getting Rs. 1 crore from the increased surcharge on tobacco and spirits under customs duties, Rs. 10 crores from the increased excise duty on tobacco and Rs. 4 crores by bringing betelnuts, coffee and tea under the Central Excise Tariff. The total effect of new measures of taxation and compulsory deposits would approximate to Rs. 100 crores.

**Defence Expenditure.**—Reviewing the defence expenditure, the Finance Member stated that the revised estimates for 1943-44 amounted to Rs. 282.64 crores and Rs. 38.39 crores under the revenue and capital heads respectively as compared with the budget estimates of Rs. 182.81 crores and Rs. 16.85 crores for the respective items. He estimated that the defence expenditure for 1944-45 would amount to Rs. 276.61 crores and Rs. 24.60 crores under the revenue and capital heads respectively.

**Excess Profits Tax.**—The budget proposals for 1944-45 took the most important step of immobilising as deposits the whole of the excess profits remaining after the excess profits tax has been paid on them and income-tax and super-tax has been paid on the balance. This compulsory deposit has not hitherto been payable in connection with provisional E. P. T. assessments made under the provisions of the Ordinance, but now it has to be made. The level of E. P. T. remains unchanged at 66½ per cent. and there is no change in the proportion of the tax, namely one-tenth, which is to be repaid to the assessee.

The system of compulsory deposit, which was raised this year from one-fifth of the tax to 19/64 of the tax, was first prescribed in Ordinance No. XVI of 1943. In announcing it, the Finance Member told the press conference on May 17, 1943 that the assessee would be able to withdraw the compulsory deposit within 12 months of the termination of hostilities or two years from the payment of the deposit whichever is later. On that money he would get two per cent. interest. In addition, he would be entitled to 6½ per cent. which Government were putting into the fund for his benefit.

**The 1945-46 Budget.**—In his budget speech, the Finance Member, Sir Jeremy Raisman, stated that the actual deficit for 1943-44 turned out to be Rs.189.79 crores as against the revised estimate of deficit of Rs.92.43 crores due to an excess of Rs.96 crores in defence expenditure. The total revenue estimates for 1945-46 were placed at Rs.353.74 crores compared with Rs.356.88 crores in the revised estimates for 1944-45, the defence estimates amounted to Rs.394.23 crores and Rs.17.76 crores for the revenue and capital heads respectively as against Rs.397.23 crores and Rs.59.41 crores respectively in the revised estimates for 1944-45. The expenditure on civil estimates was estimated at Rs.123.40 crores, showing an increase of Rs.8 crores over the revised estimates. As a result, a prospective revenue deficit of Rs.163.89 crores was foreshadowed.

He hoped to get an additional revenue of Rs.8.60 crores by raising the tobacco duty, by increasing the rate for postal parcels from as. 6 for the first 40 tolas and as. 4 for every 40 tolas thereafter to a uniform as. 6 for every 40 tolas, by raising the surcharge on telephone rentals from one-third to one-half and that on trunk call fees from 20 to 40 per cent. and by increasing the surcharge on ordinary and express telegrams by one anna and two annas respectively. Thus the prospective deficit would be reduced to Rs.155.29 crores to be met by borrowing. A feature of the budget was the recognition of the practice prevailing abroad of differentiating between earned and unearned incomes.

**The 1946-47 Budget.**—The first peace-time budget has for its background the possible effects on the country's economy of a steep fall in wartime expenditure and income levels, as well as the continued need closely to watch and control the position arising from the wartime legacy of inflation. The budget, therefore, lays stress on subordinating fiscal policies to the broader aims of national economy with revenue receipts at Rs. 311.65 crores and total expenditure at Rs. 355.71 crores, the deficit envisaged is of the order of Rs. 44.06 crores, after taking into account new taxation measures and the transfer to revenue of the balance in the two war Risks Insurance funds amounting to Rs. 26.10 crores.

The new taxation proposals for 1946-47 offer a number of substantial concessions to industry and to persons of moderate means. Such concessions to industry include (1) the complete abolition of the Excess Profits Tax after the 31st March 1946, (2) the grant of special initial depreciation allowances of 10 per cent. on new buildings and 20 per cent. on new plant and machinery as well as allowances for expenditure on scientific research for purposes of Income Tax; the scope of the obsolescence allowance will be widened so as to include the loss of an asset by destruction or demolition, and also extended to buildings, (3) the relief from Customs duty on raw materials imported for industry and reduction of rates on such imported plant and machinery as are now dutiable, (4) a net reduction of 1½ annas in the present total rate of Super Tax and Income Tax (payable by a company) from 7½ annas to 6 annas, as a result of the lowering of Super Tax by 2 annas and the raising of the Income Tax by ½ anna and (5) the exemption from Income Tax for two years in the case of buildings for residential purposes and an initial depreciation allowance of 15 per cent. for buildings used as business premises. In addition, the total rate on life insurance companies has been reduced from 5 annas 3 pies to 5 annas. Other concessions include (1) the reduction of the rate on the second slab of income of Rs. 3,500 from 15 pies to 12 pies and the rate on the third slab of Rs. 5,000 from 2 annas 1 pie to 2 annas, and (2) the raising of the earned income allowance from one-tenth of the earned income, (subject to a maximum of Rs. 2,000) to one-fifth (subject to a maximum of Rs. 4,000). Similarly in the Super Tax range there will be differential treatment in favour of earned income at the rate of 1 anna in the rupee between Rs. 25,000 and Rs. 2 lakhs and of ½ anna between Rs. 2 lakhs and Rs. 5 lakhs.

Under indirect taxation, the duty on kerosene oil has been reduced by nine pies from 4 annas 6 pies to 3 annas 9 pies per imperial gallons, and on motor spirit from 15 annas to 12 annas per imperial gallons, the latter as an incentive to increased motor transport.

The following further concessions estimated to cost Rs. 5.12 crores to the Central Exchequer were announced by the Finance Member during the course of discussion on the Budget: (1) reduction in the duty on kerosene by an anna and half instead of only 9 pies as was originally proposed, (2) reduction in the excise duty on betelnuts from two annas to one anna per lb., (3) reduction by 6 pies of the increase in the

customs duty on betelnuts originally proposed in the budget and (4) reduction in the duty on cinematographs film (not exposed) from 6 pies per linear foot as originally proposed to 3 pies. Other concessions announced were a reduction in the price of a match-box from 9 pies to 6 pies and a similar reduction in the price of a post-card from 9 pies to 6 pies to come into force respectively from August 1 and July 1, 1946.

Reductions in expenditure arising from the cuts by the Legislative Assembly amount to Rs. 93.34 lakhs on revenue account and Rs. 3.46 crores under capital disbursements. In consequence of changes in taxation and expenditure, the expected deficit of Rs. 44.06 crores for 1946-47 will move up by Rs. 4.19 crores to Rs. 48.25 crores, with revenue at Rs. 341.87 crores and expenditure at Rs. 390.12 crores.

An innovation in the budget is the presentation of a Capital Budget separately from the Revenue Budget. The advantage is that it enables a person to focus attention on the productive and dead-weight debts of the Government and their relative disbursements on productive and non-productive schemes.

Presenting the budget, which was his first and last one, Sir Archibald Rowlands stated that the drop in defence expenditure on account of His Majesty's Government and the Government of India combined would be of the order of Rs. 600 crores in 1946-47 as compared with the budget for the previous year. He, therefore, indicated the measures for public expenditure and the establishment of an Industrial Finance Corporation in order to ensure the availability of medium and long term finance to industrial enterprise in India. Another matter under consideration was in respect of the planning of investment, both public and private, with a view to securing the fullest and most advantageous utilisation of the economic resources of the country in the interest of planned capital development.

### Repatriation of Sterling Debt.

The year 1943-44 saw the final stage of the programme of repatriation of India's sterling debt. Of the total amount of £ 323 million repatriated since 1937-38 at the purchase value of £ 321 million (or Rs. 429 crores), stocks of the value of Rs. 155.7 crores or a little over one-third have been cancelled, while rupee counterparts have been issued in respect of the balance of Rs. 273.6 crores. During the year 1945-46 stray lots of the face value of £ 0.28 million were repatriated at a cost of Rs. 37 lakhs, the rupee counterparts created being only Rs. 1 lakh. The outstanding debt at the end of 1945-46 was only Rs. 37.46 crores as compared with Rs. 469.10 crores at the end of 1938-39 and represented mostly repatriated stocks not surrendered earlier.

### Sterling Balances.

The Finance Member estimated that the total sterling holdings of the Reserve Bank on March 31, 1946, would be of the order of £ 1,330 million. Additions to this total on account of His Majesty's defence expenditure would be quite small next year. On the contrary, he thought, there was a possibility of even reducing them through Britain's increased exports. The negotiations for the transfer of these balances would be held

after the U.S. Congress had ratified the U.S.-U.K. Loan Agreement; but he assured the Legislature that no grounds existed for the fears that "India's ability to obtain, in the immediate future, capital equipment from abroad will be prejudiced by the fact that a large proportion of her foreign exchange reserves are in the form of Sterling."

### Empire Dollar Pool.

"The Dollar Pool", he said, "is in effect the modification, imposed by war conditions, of the sterling area arrangement which has existed for a century. When war broke out, an arrangement was entered into among them whereby earnings of dollars and other hard currencies would be pooled and the essential requirements of the several countries, in terms of these currencies, would be met from the Pool. India had free access to the Pool to finance her essential current imports from hard currency countries. Moreover, a sum of Rs. 20 million dollars was specifically earmarked to pay for capital equipment required by India from non-sterling countries for her post-war development. Under Article 7 of the Anglo-American Loan Agreement, the U.K. are committed to making arrangements which will involve the dissolution of the Dollar Pool within one year of the effective date of that Agreement."

As regards the accounts, he stated: "Between September 1939 and March 1945 India earned hard currency assets to the amount of Rs. 364.33 crores. Excluding the 20 million dollar special fund, India has utilized hard currency assets to the amount of Rs. 265.02 crores. To this latter figure should be added the net import of gold from the United Kingdom during the same period. Computed at the world (not the Indian) price, the value of this gold is Rs. 50.08 crores. The balance in India's favour is, therefore, Rs. 49.23 crores as at March of last year."

### Post-War Planning.

The Central Government announced during the year their policies and plans of development in respect of a number of subjects. According to a statement issued on April 21, 1945, the fundamental objectives of Government's policy in regard to the industrial development of the country were (1) to increase the national wealth by the maximum exploitation of the country's resources (additional wealth to be distributed in a socially equitable manner), (2) to make the country better prepared for defence and (3) to promote a high and stable level of employment. To attain these objectives, Government propose (1) to transfer from provincial jurisdiction to the Centre 20 industries and (2) to nationalise basic industries of national importance.

Government further propose to assist industries by means such as making loans or subscribing a part of the capital or guaranteeing a minimum dividend and buying, as far as possible, Indian products in preference to others. Government have also appointed an Interim Tariff Board, while they have now under preparation a plan for establishing an Industrial Finance Corporation for ensuring the availability of medium and long-term credit to industrial enterprises. The planning of investment, both public and private, with a view to securing the

maximum utilisation of the economic resources of the country is also under Government's active consideration.

The Industrial Research Planning Committee has recommended the creation of a Central Research Organisation to be called the National Research Council. Recommendations have also been made for the immediate adoption by the Council of a five-year plan which includes the establishment of a national chemical laboratory, a national physical laboratory and a network of laboratories in all provinces and major States.

The Labour Department has prepared a housing scheme for industrial workers which envisages the construction of two million houses in 10 years, estimated to cost Rs. 40 crores within the first two years. The scheme provides for Central subsidies up to 12½ per cent. to local bodies and industrial and other employers, provided that the provincial government concerned will make an equivalent grant. The Central Government have also forwarded to provincial Governments a unified scheme of social security covering health insurance, maternity benefits and compensation for accidents. The scheme covers all perennial factories and is designed to remove some of the defects in the present working of the Workmen's Compensation Act and the Maternity Benefits Act.

The Posts and Telegraphs Department has prepared a 15-year plan which envisages the establishment of one telegraph office for every town with a population of 5,000 and a quicker and more efficient telegraph service throughout the country. The All-India Health Survey and Public Health Committee issued a report in February 1946 which envisages a ten-year plan of public health at an estimated cost of Rs. 1,000 crores. The plan aims at providing one doctor for every 2,000 citizens and, when brought into full operation, the country is expected to have in all 185,000 doctors as against 47,500 at present.

The Central Government have made provision for an expenditure of Rs. 49 crores on their own schemes, for developmental purposes, of which Rs. 22 crores are in respect of railways.

### Estate Duty.

With a view to assisting provincial governments in implementing their post-war plans, a bill to levy an estate duty on non-agricultural property was introduced in the Central Assembly on March 21, 1946. Modelled on the Estate Duty Act of the United Kingdom, it seeks to charge a duty at graduated rates according to the principal value of all property passing on the death of any person whether by disposition of the deceased or by any settlement made by others. Immoveable and movable property not exceeding Rs. 1 lakh in value and (with certain minor exceptions) property situated outside British India are exempted. The duty is leviable on non-agricultural property, the provinces being free to levy a similar duty in respect of agricultural property. The basis for distribution of the proceeds as between the Central and the provinces will be decided in consultation with the latter. Separate legislation will be undertaken at a later stage to fix the rates of duty, which are expected to vary from time to time.

### Public Debt.

Excluding the liability for the British War Loan, which remains suspended, the total regular interest-bearing debt on March 31, 1939 amounted to Rs. 1,158 crores, comprising Sterling loan and Railway Annuities Rs. 445 crores, Rupee loans and Treasury Bills Rs. 484 crores and Unfunded debt (i.e., Cash Certificates, Savings Bank Deposits and Provident Funds) Rs. 229 crores. It is estimated that by the end of 1945-46 this would have risen to Rs. 1,950 crores comprising Sterling loans and Railway Annuities Rs. 39 crores, Rupee loans and Treasury bills Rs. 1,576 crores and Unfunded debt Rs. 335 crores. The corresponding figures on March 31, 1947 are expected to be

Rs. 713 crores will have been utilised towards meeting the revenue deficits and the capital expenditure. Actually the amounts required on these accounts total Rs. 991 crores, as it is expected that during the eight years ending March 31, 1947, the cumulative revenue deficits excluding the provision for debt redemption (Rs. 26 crores) will have amounted to Rs. 645 crores and the capital outlay to Rs. 346 crores. The balance, viz., Rs. 278 crores, will be covered by the net balance resulting from the other debt head transactions such as repayment of loans by provinces, issue of rupee coins to the Reserve Bank, small coin profits, etc.

By far the greater portion of this debt of Rs. 2,465 crores is what may be compendiously termed as productive. Thus, the capital outlay on Railways upto the 31st March 1947

accounts for no less than Rs. 818 crores, on Posts and Telegraphs and other Commercial Departments Rs. 50 crores, Loans and Advances (including the debt due from Burma) Rs. 130 crores, and cash and investments Rs. 597 crores, making a total of Rs. 1,597 crores. This leaves an uncovered debt of Rs. 870 crores against the pre-war figure of Rs. 208 crores. Even this may not be called wholly unproductive debt for the large Defence Capital outlay of Rs. 169 crores and the grant of Rs. 35 crores to provinces for development are not entirely unremunerative, and, similarly, the large capital outlay on Central property the value of which is either not shown at all in the Government accounts or is shown only as non-commercial (such as the Delhi Capital Outlay) is not without value.

### General Statement of the Revenue and Expenditure.

## THE LAND REVENUE.

The principle underlying the Land Revenue system in India has operated from time immemorial. It may be roughly formulated thus—the Government is the supreme landlord and the revenue derived from the land is equivalent to rent. On strict theoretical grounds, exception may be taken to this statement of the case. It serves, however, as a substantially correct description of the relation between the Government and the cultivator. The former gives protection and legal security. The latter pays for it according to the value of his holding. The official term for the method by which the Land Revenue is determined is "Settlement." There are two kinds of settlements in India—Permanent and Temporary. Under the former the amount of revenue has been fixed in perpetuity, and is payable by the landlord as distinguished from the actual cultivator. The Permanent Settlement was introduced into India by Lord Cornwallis at the close of the eighteenth century. It had the effect intended of converting a number of large revenue farmers in Bengal into landlords occupying a similar status to that of landowners in Europe. The actual cultivators became the tenants of the landlords. While the latter became solely responsible for the payment of the revenue, the former lost the advantage of

holding from the State. This system has prevailed in Bengal since 1795 and in the greater part of Oudh since 1830. It also obtains in certain districts of Madras. Incidentally, the Bengal system was the subject of an exhaustive examination by a Commission under the chairmanship of Sir Francis Floud in 1939-40, which produced a radical report—a minority dissenting—in favour of State purchase of land, thus challenging the Bengal system of land tenure based on the Permanent Settlement.

Elsewhere the system of Temporary Settlements is in operation. At intervals of thirty years, more or less, the land in a given district is subjected to a thorough economic survey, on the basis of the trigonometrical and topographical surveys carried out by the Survey Department of the Government of India. Each village area, wherever the Temporary Settlement is in vogue, has been carefully mapped, property-boundaries accurately delineated, and records of rights made and preserved. Under the Permanent Settlement in Bengal the occupant does not enjoy these advantages. The duty of assessing the revenue of a district is entrusted to Settlement Officers, members of the Indian Civil Service specially delegated for this work. The duties of a Settlement Officer are thus described in Strachey's *India*

(revised edition, 1911):—"He has to determine the amount of the Government demand and to make a record of all existing rights and responsibilities in the land. He has a staff of experienced subordinates, almost all of whom are natives of the country, and the settlement of the district assigned to him is a work which formerly required several years of constant work. The establishment of agricultural departments and other reforms have, however, led to much simplification of the Settlement Officer's Proceedings, and to much greater rapidity in the completion of the Settlements, all the work of the Settlement Officer is liable to the supervision of superior officers, the assessments proposed by him require the sanction of the Government before they become final in binding; and his judicial decisions may be reviewed by the Civil Courts. It is the duty of the Settlement Officer to make a record of every right which may form the subject of future dispute, whether affecting the interests of the State or of the people. The intention is to alter nothing; but to maintain and place on record that which exists."

### The Two Tenures.

Under the Temporary Settlement and tenures fall into two classes—peasant-holdings and landlord-holdings, or *Ryotwari* and *Zemindari* tenures. Broadly speaking, the difference between the two in a fiscal sense is that in *Ryotwari* tracts the *ryot* or cultivator pays the revenue direct; in *Zemindari* tracts the landlord pays on rental assessment. In the case of the former, however, there are two kinds of *Ryotwari* holdings—those in which each individual occupant holds directly from Government, and those in which the land is held by village communities, the heads of the village being responsible for the payment of revenue on the whole village area. This latter system prevails in the North. In Madras, Bombay, Burma and Assam, *Ryotwari* tenure is on an individual basis, and the Government enters into a separate agreement with every single occupant. The basis of assessment on all classes of holdings is now more favourable to the cultivator than it used to be. Formerly what was believed to be a fair average sum was levied on the anticipated yield of the land during the ensuing period of settlement. Now the actual yield at the time of assessment alone is considered, so that the cultivator gets the whole of the benefit of improvements in his holding subsequently brought about either by his own enterprise or by "unearned increment." The Government, however, may at a new settlement re-classify a holding so as to secure for itself a fair share in an increment that may have resulted from public works in the vicinity, such as canals and railways, or from a general enhancement of values. But the principle that improvements effected by private enterprise shall be exempt from assessment is now accepted by the Government and provided for in definite rules.

### Incidence of the Revenue.

The incidence of the revenue charges varies according to the nature of the settlement, the class of tenure, and the character and circumstances of the holding. Under the Permanent Settlement in Bengal Government derive rather

less than £3,000,000 from a total rental estimated at £12,000,000. Under Temporary Settlements, 50 per cent. of the rental in the case of *Zemindari* land may be regarded as virtually a maximum demand. In some parts the impost falls as low as 35 and even 25 per cent. and only rarely is the proportion of on half the rental exceeded. In regard to *Ryotwari* tracts it is impossible to give any figure that would be generally representative of the Government's share. But one-fifth of the gross produce is the extreme limit, below which the incidence of the revenue charge varies greatly. About sixty years ago, the Government of India were invited in an influential signed memorial to fix one-fifth of the gross produce as the maximum Government demand. In reply to this memorial and other representations the Government of India (Lord Curzon being Viceroy) issued a Resolution in defence of their Land Revenue Policy. In it was stated that "under the existing practice the Government is already taking much less in revenue than it is now invited to exact" and "the average rate is everywhere on the down grade." This Resolution, together with the statements of Provincial Governments on which it was based, was published as a volume; it is still the authoritative exposition of the principles controlling the Land Revenue Policy of the Government of India. In a series of propositions claimed to be established by this Resolution the following points are noted:—(1) In *Zemindari* tracts progressive moderation is the keynote of the Government's policy, and the standard of 50 per cent. of the assets is more often departed from on the side of deficiency than excess; (2) in the same areas the State does not hesitate to interfere by legislation to protect the interests of the tenants against oppression at the hands of the landlords; (3) in *Ryotwari* tracts the policy of long-term settlements is being extended, and the proceedings in connection with new settlements simplified and cheapened; (4) local-taxation (of land) as a whole is neither immoderate nor burdensome; (5) over-assessment is not, as alleged, a general or widespread source of poverty, and it cannot fairly be regarded as a contributory cause of famine. At the same time the Government laid down as principles for future guidance—(a) large enhancements of revenue, when they occur, to be imposed progressively and gradually, and not *per saltum*; (b) greater elasticity in revenue collection, suspensions and remissions being allowed according to seasonal variations and the circumstances of the people; (c) a more general resort to reduction of assessments in cases of local deterioration.

### Protection of the Tenants.

In regard to the second of the five propositions noted above, various Acts have been passed from time to time to protect the interests of tenants against landlords, and also to give greater security to the latter in possession of their holdings. The Oudh Tenancy Act of 1886 placed important checks on enhancement of rent and eviction; and in 1900 an Act was passed enabling a landowner to entail the whole or a portion of his estate; and to place it beyond the danger of alienation by

his heirs. The Punjab Land Alienation Act, passed at the instance of Lord Curzon; embodied the principle that it is the duty of a Government which derives such considerable proportion of its revenue from the land, to interfere in the interests of the cultivating classes. This Act greatly restricted the credit of the cultivator by prohibiting the alienation of his land in payment of debt. It had the effect of arresting the process by which the Punjab peasantry were becoming the economic serfs of money-lenders. A good deal of legislation affecting land tenure has been passed from time to time in other provinces; and it has been called for more than once in Bengal where the problems arising out of the Permanent Settlement have been examined by a Royal Commission under Sir Francis Floud which visited Bengal in 1939-40, and whose proposals are still under consideration.

### Government and Cultivator.

While the Government thus interferes between landlord and tenant in the interests of the latter; its own attitude towards the cultivator is one of generosity. Mention has already been made of the great advantage to the agricultural classes generally of the elaborate systems of Land Survey and Records of Rights carried out and maintained by Government. In the Administration Report of Bombay for 1911-12, it is stated:—"The Survey Department has cost the State from first to last many lakhs of rupees. But, the outlay has been repaid over and over again. The extensions of cultivation which have occurred (by allowing cultivators to abandon unprofitable lands) have thus been profitable to the State no less than to the individual; whereas under a *Zemindari* or kindred system the State would have gained nothing, however much cultivation had extended throughout the whole of 30 years' leases." On the other hand, the system is of advantage to the *ryots* in reducing settlement operations to a minimum of time and procedure. In the collection of revenue the Government consistently pursues a generous policy. In times of distress, suspensions and remissions are freely granted after proper inquiry.

Land revenue is now a provincial head of revenue and is not shown in the All-India accounts. It may be taken roughly at £28 million, as compared with £84 million said to have been raised annually by Aurungzebe from a much smaller Empire.

Since the coming into operation of provincial autonomy in April 1937, there has been a great impetus towards land revenue reform in most provinces, the primary object being to better the lot of the tenant by modifying *Zemindari* rights and usages, and by altering the system of land revenue assessment. To this end, legislation has been introduced in practically all the autonomous provinces during the years 1937 to 1939 and widespread changes are in process of being made everywhere.

In May 1940, after more than a year's inquiry, the Bengal Land Revenue Commission presided over by Sir Francis Floud, published a long and lucid report. By the Permanent Settlement of 1793, a system of land tenure and taxation was

laid down by which the Bengal zemindar pays to Government a part of the rent he receives from the cultivator. The Commission decided that the admitted defects in the zemindari system can best be removed not by amending the system but by abolishing it altogether. It recommended that the Permanent Settlement should be abolished and the zemindar bought out by Government, who would thus acquire all the superior interests in agricultural land in Bengal. Ministerial changes coupled with the exigencies of the war situation have delayed the implementing of these recommendations which were submitted to an expert by the Bengal Government.

Following strong representations by Dr. B. R. Ambedkar, the Harijan leader, the Bombay Government in 1941 agreed to suspend the levy of an increased *judi* or payment in cash upon the inam lands of Watandar Mahars. The watandari system is a legacy from the Peshwas who created a large class of alienated lands popularly called inams, the holders of which were designated as inamdars or watandars. These watandars did various services in return for remuneration—in land, money and kind—though the principle of "no service, no pay" is by no means general. As Dr. Ambedkar pointed out in the memorial submitted to His Excellency the Governor, there is a large class of landholders including inamdars, jahagirdars, hereditary district officers and kulkarnis who, while freed from the obligation to serve, retain substantial portion of their emoluments. Government's new policy, now suspended, was actuated by a desire to reduce the number of village servants which it considered excessive.

The growing conflict between the landlord and the tiller of the soil during the past few years has brought to the forefront the need for drastic reforms in the settlement system. In pursuance of the promise given to the electorate by the Congress on the eve of the elections to the provincial legislatures in 1946, the Congress ministries in the various provinces have taken up the question of land revenue reform which includes the gradual elimination of the zamindari system. The Government of the United Provinces, Bihar and Orissa are engaged in working out the details for the abolition of the system. In Bombay the bill to amend the Khoti Settlement Act of 1880 has been referred to the Select Committee of the Legislature. Moving the first reading of the Bill, the Revenue Minister declared that it had been the policy of Government to see that the rights of tenants were protected. It was in pursuance of that policy that the Tenancy Act had been amended in 1939 and legislation to facilitate consolidation of holdings in the province had been undertaken. The Madras Government has decided to levy agricultural income-tax on persons whose total agricultural earnings are not less than Rs. 5,000 a year.

Pleading for a radical reform in the land revenue system, the sub-committee of the National Planning Committee observed in its report: "Whatever the reason and justification at the time of the origin of this system may be, the fact of land revenue settlement being open to revision from time to time makes it difficult for the cultivator to be quite sure about the return to himself from further investment of

labour and capital in land. Another handicap is the fixed cash demand which remains unchanged all through the period of the settlement, no matter what the changing level of prices may be and no matter what the peculiar fortunes of agricultural produce in any given season may be." As a part of the reform, it said "the absentee landlord must be progressively, if not all at once, eliminated with or without compensation as the State may determine." Co-operative farming and consolidation of holdings were two other principal recommendations of the sub-committee.

The literature on the subject is considerable. The following should be consulted by readers who require fuller information:—"Land Revenue Policy of the Indian Government," 1902 (Superintendent of Government Printing); Baden Powell's "Land System of British India"; Sir John Strachey's "India; its Administration and Progress, 1911," (Macmillan & Co.); M. Joseph Chailley's "Administrative Problems of British India" (Macmillan & Co., 1910), and the Annual Administration Reports of the respective Provincial Government.

## EXCISE.

The Excise revenue in British India can be classified into two divisions—one derived from the Central Excise Duties and belonging to the Central Government's finance and the other derived from the manufacture and sale of intoxicating liquors, hemp drugs, toddy and opium. The latter is a provincial revenue. The revenue from the Central Excise Duties has increased by six times during the past decade. As against a comparatively small revenue of Rs. 7,66 lakhs in 1937-38 and Rs. 12,79 lakhs in 1942-43, the budget for 1946-47 forecasts a revenue of Rs. 46,70 lakhs. These duties are at present levied on motor spirit, kerosene, sugar, matches, steel ingots, tyres, tobacco, vegetable product, betel-nut, coffee, tea and coal cess.

The Budget of the Government of India for 1944-45 brought in force important changes in the field of Central Excises. It raised the rates of duty on unmanufactured tobacco and on cigars and cheroots and included in the central Excise Tariff betel-nuts, coffee and tea.

A further change in respect of tobacco was proposed in the following year. Accordingly, the highest class of flue-cured tobacco in the excise tariff was sub-divided into three and subjected to a duty of Rs.7-8, Rs.5 or Rs.3-8 per lb., according as it was intended for use in manufacturing cigarettes containing more than 60 per cent. more than 40 but not more than 60 per cent, or more than 20 but not more than 40 per cent. by weight of imported tobacco. In order to avoid double incidence, some of the provincial governments reached an agreement with the Centre by which they withdrew the provincial excise duty on tobacco in lieu of a share in the proceeds from the Centre's tobacco excise. Tobacco excise has been responsible for nearly half the receipts under central Excise Duties.

As the result of the discussion in the Legislature on the budget for 1946-47, the duty on Kerosene has been reduced from 4 annas six pies to 3 annas per imperial gallon. The duty on Motor spirit has been lowered by three annas to 12 annas and that on betelnuts from 2 annas to 1 anna per lb. A Reduction in excise duty on matches was also announced with a view to lowering the price of a match-box from 9 pies to 6 pies.

The provincial excise revenue in British India is derived from the manufacture and sale of intoxicating liquors, hemp drugs, toddy and opium. The percentage of excise to total revenues of the provincial Government increased from 16.0 to 24.5 between 1938-39 and 1945-46.

The forms of intoxicating liquor chiefly consumed are country spirit; fermented palm juice; beer made from grain; country brands of rum, brandy, etc., locally manufactured malt beer and imported wine, beer and spirits. Country spirit is the main source of revenue, except in the Madras Presidency, and yields about two-thirds of the total receipts from liquors. It is usually prepared by distillation from the Mhowra flower, Molasses and other forms of unrefined sugar, fermented palm juice and rice. In Madras a very large revenue is derived from fresh toddy. The British inherited from the Native Administration either an uncontrolled Out-Still System or in some cases a crude Farming System and the first steps to bring these systems under control were the limitation of the number of shops in the area farmed, and the establishment of an improved Out-Still System under which the combined right of manufacture and sale at a special shop was annually granted. This of course was a kind of control, but it only enabled Government to impose haphazard taxation on the liquor traffic as a whole by means of vend fees. It did not enable Government to graduate the taxation accurately on the still-head duty principle nor to insist upon a standard of purity or a fixed strength of liquor. Moreover for political and other reasons the extent of control could not at first be complete.

### Various Systems.

The Out-Still System may be taken to include all systems prior in order of development to the imposition of Still-head duty. Briefly stated the stages of development have been—First: farms of large tracts; Second: farms of smaller areas; Third: farms of the combined right to manufacture and sell at particular places without any exclusive privilege over a definite area; Fourth: farms of similar right subject to control of means and times for distilling and the like. The Provincial Governments have had to deal with the subject in different ways suited to local conditions, and so the order of development from the lower forms of systems to the higher has not been always everywhere identical in details. Yet in its essence and main features the Excise Administration in most provinces of British India has progressed on uniform lines the keynote lying in attempts, where it has not been possible to work with the fixed duty system in its simplest forms, to combine the farming and fixed duty systems with the object of securing that every gallon of spirit should bear a certain amount of taxation. The Out-Still System has in its turn been superseded by either the

Free-supply system or the District Monopoly system. The Free-supply system is one of free competition among the licensed distillers in respect of manufacture. The right of vend is separately disposed of. The District monopoly system on the other hand is one in which the combined monopoly of manufacture and sale in a district is leased to a farmer subject to a certain amount of minimum still-head duty revenue in the monopoly area being guaranteed to the State during the term of the lease.

### Reforms.

The recommendations of the Indian Excise Committee of 1905-06 resulted in numerous reforms in British India, one of them being that the various systems have been or are gradually being superseded by the Contract Distillery System under which the manufacture of spirit for supply to a district is disposed of by tender, the rate of still-head duty and the supply price to be charged are fixed in the contract and the right of vend is separately disposed of. This is the system that now prevails over the greater portion of British India. The other significant reforms have been the revision of the Provincial Excise Laws and Regulations, and the conditions of manufacture, vend, storage and transport, an improvement in the quality of the spirit, reductions and re-distributions of shops under the guidance and control of Local Advisory Committees and gradual enhancement of taxation with a view to checking consumption.

Excise was made over entirely to the Provincial Governments, and the duties vary from province to province. The governing principle in fixing these rates is the highest duty compatible with the prevention of illicit distillation.

Sap of the date, palmyra, and coconut palms called toddy, is used as a drink either fresh or after fermentation. In Madras and Bombay the revenue is obtained from a fixed fee on every tree from which it is intended to draw the liquor and from shop license fees. In Bengal and Burma the sale of shop licenses is the sole form of taxation. Country brands of rum, and so-called brandies and whiskies, are distilled from grape juice, etc. The manufacture is carried out in private distilleries in various parts of India. A number of breweries has been established, mostly in the hills, for the manufacture of a light beer.

### Prohibition.

After the introduction of provincial autonomy in April 1937, it became the avowed policy in principle of all provincial Governments to discourage the consumption of alcoholic beverages; but the Congress administrations which held office in seven provinces until September 1939 went further and, before they resigned, adopted an active policy of enforcing prohibition within a period of years. The measures taken by them varied from province to province, but generally speaking, they took the form of declaring certain areas, either urban or rural, "dry," and within those areas the production, sale and consumption of liquor were banned. Thus in Madras four districts were declared "dry"; a special excise

regime was set up and active steps were taken to wean the populace from the use of liquor. Early reports indicated that a considerable measure of success had been attained, but later it was officially admitted that enthusiasm for prohibition was waning. In the United Provinces, Bihar, Orissa, the Central Provinces, Sind and Assam similar steps were taken to prevent the people of certain areas from drinking alcohol. In order to discourage the consumption of alcohol in the United Provinces, the provincial government enhanced the excise duty in 1946-47. In Bengal and the Punjab (where Coalition Governments were in office), on the other hand, there was no actual prohibition but only temperance propaganda.

In Bombay, the Congress scheme went further than elsewhere. The capital city Bombay and the second largest city Ahmedabad were declared "dry," subject to an elaborate system of personal "permits" for Europeans, Parsees and "confirmed addicts." In Bombay, as in Madras, newspapers and magazines published in the province were forbidden to publish liquor advertisements—a ban which persisted after the Congress administrations had resigned and the prohibition drive had lost most of its force. In April 1941, however, the Government of Bombay withdrew the ban on newspaper advertisements of a full bench. In Bombay, successive judgments of the original Congress legislation and the subsequent "Governor's Act" were *ultra vires* the provincial administration, and refused to allow that administration to appeal to the Federal Court on the question of the validity or otherwise of the prohibition law. The ban on sales of foreign liquor was accordingly withdrawn as from July 2, 1940, and that on country liquor was modified subject to severe restrictions.

The restoration of provincial autonomy in the middle of 1946 is to be followed by revival of the old policy of prohibition in the Congress provinces. The Government of Bombay have tightened the machinery charged with enforcement of prohibition and contemplate legislation on the Madras model. The Madras Government have chalked out a two-year plan for complete prohibition. The C.P. Government will introduce prohibition in certain districts on October 1. A feature of their plan is to have a shopless zone of 10 miles round the "dry" areas.

**Difficulties of Enforcement.**—Even on the limited and "permissive" scale adopted, the enforcement of prohibition had been by no means free from abuses and difficulties. It placed a severe strain on the authorities and numerous cases were reported of evasion and defiance of the law on an organised basis. In addition to smuggling into the "dry" areas and others not entitled to permits used to take place every week-end and holiday from the cities to adjacent areas where prohibition was not in force, and much drinking to excess was known to occur. Although Congress and orthodox opinion continued to support prohibition, it gave rise to popular resentment among certain classes and communities, as also to grave legal anomalies. In Bombay, after several hundreds of persons had been convicted for breaches of the prohibition

rules in the first eight months of their introduction, the validity of the rules was successfully challenged in the courts of law.

Despite the efforts of the Governor of Bombay (the Congress Ministry having in the meantime resigned office) to avoid administrative chaos and legalise the position, the experiment may be said to have failed because it lacked both legal sanction and general approval. The position in all the erstwhile Congress provinces was then somewhat as follows: Governors and their advisers while not committed to prohibition in principle and while reserving the right to make such further changes as might seem fit, refrained from reversing the policy of their former ministries. On the other hand, they did not extend the policy, even in its modified form, to new areas, but left the whole future of prohibition open, to be settled by whatever popular regime might later assume office. And here it is pertinent to note that apart from the moral issue, the financial implication of prohibition was far-reaching. In some provinces it involved a sacrifice of anything up to a quarter of the total provincial income and the imposition of new and burdensome taxation. A further complication was caused by the existence of Indian States whose territories are inextricably mixed with British India, and which have not yet adopted a prohibitionist policy any more than the Government of India has done. Thus the whole future of the prohibition experiment is problematical.

**Drugs.**—The narcotic products of the hemp plant consumed in India fall under three main categories, namely, ganja or the dry flowering tops of the cultivated female hemp plant charas, or the resinous matter which forms an active drug when collected separately; and bhang, or the dried leaves of the hemp plant whether male or female cultivated or uncultivated. The main features of the existing system are restricted cultivation under supervision, storage in Bonded Warehouses, payment of a quantitative duty before issue, retail sale under licenses and restriction on private possession.

Licenses to retail all forms of hemp drugs are usually sold by auction. The sale of charas has been prohibited in the Bombay Presidency from the 1st April 1922.

**Opium.**—The general practice is to sell opium from the Government Treasury, or a Central Warehouse, to licensed vendors. The right of retail to the public is sold by annual auction to one or several sanctioned Shops. Further legislation against opium smoking in clubs and dens is now under contemplation.

The revenue from opium is derived mainly from exports of what is called provision opium to foreign countries and from the sale to Provincial Governments of excise opium for internal consumption in India. The entire quantity is now exported under the system of direct sales to Foreign and Colonial governments, the system of auction sales in Calcutta to traders for export to foreign countries having been stopped with effect from 7th April 1926. In no case are exports permitted without an import certificate by the Government of the country of import as prescribed by the League of Nations.

It was decided to reduce the total of the opium exported since the calendar year 1926 by 10 per cent. annually in each subsequent year until exports were totally extinguished at the end of 1935. The war, however, witnessed the revival of the trade.

Excise opium is sold to Provincial Governments for internal consumption in India at a fixed price based on the cost of production. This opium is retailed to licensed vendors at rates fixed by the Provincial Governments and varying from Province to Province. The price of opium was raised in 1946-47.

Opium, which was an important source of revenue till 1933-34, receded in importance gradually and became a burden on the general revenues in 1943-44 and in the following two years. A small revenue surplus of Rs. 8 lakhs is, however, anticipated in the 1946-47 budget.

## SALT.

The salt revenue was inherited by the British Government from Native rule, together with a miscellaneous transit dues. These transit dues were abolished and the salt duty consolidated and raised. There are four great sources of supply; rock salt from the Salt range and Kohat Mines in the Punjab; brine salt from the Sambhar Lake in Rajputana; salt brine condensed on the borders of the lesser Rann of Cutch; and sea salt factories in Bombay, Madras and at the mouth of the Indus.

The Salt Range mines contain an inexhaustible supply. They are worked in chambers excavated in salt strata, some of which are 250 feet long, 45 feet wide and 200 feet high. The Rajputana supply chiefly comes from the Sambhar Lake where brine is extracted and evaporated by solar heat. In the Rann of Cutch the brine is also evaporated by solar heat and the product is known as Baragara salt. Important works for the manufacture of that salt were opened in Dhrangadhra State in 1923. In Bombay and Madras sea water is

let into shallow pans on the sea-coast and evaporated by solar heat and the product sold throughout India. In Bengal the damp climate together with the large volume of fresh water from the Ganges and the Brahmaputra into the Bay of Bengal render the manufacture of sea-salt difficult and the bulk of the supply, both for Bengal and Burma, is imported from Liverpool, Germany, Aden, Bombay and Madras.

Broadly, one-half of the indigenous salt is manufactured by Government Agency; and the remainder under license and excise systems. In the Punjab and Rajputana the salt manufactures are under the control of the Northern India Salt Department, a branch of the Commerce and Industry Department. In Madras and Bombay the manufactures are under the supervision of Local Governments. Special treaties with Native States permit of the free movement of salt throughout India, except from the Portuguese territories of Goa and Damaun, on the frontiers of which patrol lines are established to prevent the smuggling of salt into British India.

## INCOME-TAX.

The income-tax was first imposed in India in 1860, in order to meet the financial dislocation caused by the Mutiny. It was levied at the rate of four per cent. or a little more than 9½d. in the pound on all incomes of five hundred rupees and upwards. Many changes have from time to time been made in the system, and the present schedule was consolidated in the Act of 1886. This imposed a tax on all incomes derived from sources other than agriculture which were exempted. On incomes of 2,000 rupees and upwards it fell at the rate of five pies in the rupee, or about 6½d. in the pound; on incomes between 500 and 2,000 rupees at the rate of four pies in the rupee or about 5d. in the pound. In March 1903 the minimum taxable income was raised from 500 to 1,000 rupees. The income-tax schedule was completely revised, raised, and graduated in the Budget of 1916-17 in the general scale of increased taxation imposed to meet the deficit arising out of war conditions.

Since then the process has been almost continuous and in every financial difficulty the authorities turn to the Income-Tax as a means of raising fresh revenue.

The Supplementary Finance Bill of 1931 imposed surcharges on income-tax and super-tax to meet the emergency of that year. The surcharges were subsequently scaled down in succeeding years, but were not completely abolished until after the passage of the Income-Tax (Amendment) Act of 1939. That Act itself was the sequel to an exhaustive inquiry from 1935 onwards by a committee consisting of Khan Bahadur J. B. Vachha, C.I.E., Commissioner of Income-Tax in Bombay, and Messrs. C. W. Ayers and S. P. Chambers of the British Inland Revenue Department. Their report covered a wide field and made numerous recommendations, most of which were incorporated in the Act of 1939, summary of which is given below. Among other recommendations was that for the adoption of the "Slab" system instead of the "Step" system, and this was duly done in the India Budget for 1939.

Taxation on income under Corporation, Income and Excess Profits Taxes provided the largest expansion in yield during the war. These three taxes contributed an increasingly higher portion of the total revenue, from 20·2 per cent. in 1940-41 to 49·1 per cent. in 1944-45. In 1945-46 it was as much as three-fifths. This was rendered possible by the gradual increase in the surcharges on basic rates of income-tax

and super-tax upto 66 per cent. and the introduction of the Excess Profits Tax. The total collections under E. P. T. since its introduction in April 1940 to the end of 1946-47, when it would be abolished, would amount to Rs. 350·18 crores or 43 per cent. of the total taxes on income or 19·3 per cent. of the total revenue during these years before deducting the provincial share.

The financial proposals for 1946-47 marked an important step in the direction of giving relief to the industry and the ordinary tax-payer, though the year witnessed the amalgamation of the surcharges with the basic rates of income-tax and super-tax. These measures include:— (1) the grant of special initial depreciation allowances of 10 per cent. on new plant and machinery as well as allowances for expenditure on scientific research, (2) widening the scope of depreciation allowance so as to cover the loss of the asset by destruction or demolition and its extension to buildings, (3) the exemption from income-tax for two years in the case of buildings for residential purposes and an initial depreciation allowance of 15 per cent. for buildings used as business premises, (4) a net reduction of 1½ annas in the present total rate of income-tax and super-tax payable by a company from annas 7½ to annas 6 and additional-super tax at steepening rates on dividends, other than those payable at a fixed rate, in excess of 5 per cent. of the capital of a company (other than a private company) including reserves or 30 per cent. of the total income, whichever is higher, with a view to keeping the dividends within reasonable limits and encouraging the ploughing back of profits into industry, (5) reduction in the rate of tax in lower ranges and increase in the earned income allowance from one-tenth of the earned income, subject to a maximum of Rs. 2,000 in terms of income to one-fifth, subject to a maximum (in terms of income), of Rs. 4,000, (6) carryover of the differential treatment in favour of earned income to the super-tax range at the rate of one anna in the rupee between Rs. 25,000 and Rs. 2 lakhs and of half an anna in the rupee between Rs. 2 lakhs and Rs. 5 lakhs, (7) an increase in the rate of income tax on the balance of the income above Rs. 15,000 from annas 4-9 to annas 5-0, (8) an increase in the number of slabs subject to super-tax, resulting in a more gradual steepening of the rates, which will be more severe on the largest incomes than at present, (9) a reduction of the rate on life insurance companies from annas 5½ to annas 5, and (10) discontinuance of the provision for funding a portion of the tax in the case of income upto Rs. 6,000.

## EXCESS PROFITS TAX.

In regard to the Excess Profits Tax, it is announced that the tax will be discontinued after March 31, 1946. The discontinuance of the tax will not, however, affect the revenue in 1946-47 since the tax will be payable in respect of all excess profits earned upto March 31, 1946. The scheme of compulsory deposits will also remain in force to the end of E. P. T. period. As regards the refunds of E. P. T. deposits, they will be sanctioned in advance of the date for

which the law provides on condition that they are not distributed as dividends to shareholders but are required for the provision or replacement of buildings, plant or machinery. As regards the loss and expenditure arising in the period of transition from wartime to peacetime conditions, the question of allowing them against the profit of the final E.P.T. chargeable accounting period is under consideration.

**GUIDE TO NEW TAXES ON INCOME.****RATES OF INCOME-TAX.**

A.—In the case of every individual, Hindu undivided family, unregistered firm and other association of persons, not being a case to which paragraph B of this Part applies:—

	Rate, Nil.
1. On the first Rs. 1,500 of total income.	
2. On the next Rs. 3,500 of total income.	One anna in the rupee.
3. On the next Rs. 5,000 of total income.	Two annas in the rupee.
4. On the next Rs. 5,000 of total income.	Three and a half annas in the rupee.
5. On the balance of total income.	Five annas in the rupee.

Provided that:—

- (i) no income-tax shall be payable on a total income which, before deduction of the allowance, if any, for earned income, does not exceed Rs. 2,000;
- (ii) the income-tax payable shall in no case exceed half the amount by which the total income (before deduction of the said

allowance, if any, for earned income) exceeds Rs. 2,000.

(iii) the income-tax payable on the total income as reduced by the allowance for earned income shall not exceed either:—

(a) a sum bearing to half the amount by which the total income (before deduction of the allowance for earned income) exceeds Rs. 2,000 the same proportion as such reduced total income bears to the introduced total income; or

(b) the income-tax payable on the income as reduced at the rates specified in this Schedule.

whichever be less.

B.—In the case of every company and Local Authority, and in every case in which under the provisions of the Indian Income-tax Act, 1922, income-tax is to be charged at the maximum rate:—

Rate.
On the whole of total income, Five annas in the rupee.

**RATES OF SUPER-TAX.**

A.—In the case of every individual, Hindu undivided family, unregistered firm and other association of persons, not being a case to which paragraph B or paragraph C or paragraph D of this Part applies:—

	Rate, if income wholly earned, Nil.	Rate, if income wholly unearned, Nil.
On the first Rs. 25,000 of total income.		
On the next Rs. 10,000 of total income.	Two annas in the rupee.	Three annas in the rupee.
On the next Rs. 10,000 of total income.	Three annas in the rupee.	Four annas in the rupee.
On the next Rs. 15,000 of total income.	Four annas in the rupee.	Five annas in the rupee.
On the next Rs. 20,000 of total income.	Five annas in the rupee.	Six annas in the rupee.
On the next Rs. 30,000 of total income.	Six annas in the rupee.	Seven annas in the rupee.
On the next Rs. 40,000 of total income.	Seven annas in the rupee.	Eight annas in the rupee.
On the next Rs. 50,000 of total income.	Eight annas in the rupee.	Nine annas in the rupee.
On the next Rs. 50,000 of total income.	Nine annas in the rupee.	Nine and a half annas in the rupee.
On the next Rs. 1,00,000 of total income.	Nine and a half annas in the rupee.	Ten annas in the rupee.
On the next Rs. 1,50,000 of total income.	Ten annas in the rupee.	Ten and a half annas in the rupee.
On the balance of total income	Ten and a half annas in the rupee.	Ten and a half annas in the rupee.

B.—In the case of every Local Authority:—

Rate.
On the whole of total income . . . . . One anna in the rupee.

C.—In the case of an association of persons being a co-operative society, other than the Sanikatta Saltowners' Society in the Bombay Presidency, for the time being registered under the Co-operative Societies Act, 1912, or under an Act of the Provincial Legislature governing the registration of co-operative societies:—

	Rate.
On the first Rs. 25,000 of total income.	Nil.
On the balance of total income. -	One anna in the rupee.

D.—In the case of every company:—

	Rate.
On the whole total income.	One anna in the rupee.

and in addition, in respect of that part of the total income (as reduced by the amount of dividends payable at a fixed rate) which does not exceed the amount of dividends, not being dividends payable at a fixed rate, declared in British India in respect of the whole or part of the previous year for the assessment for the year ending on the 31st day of March 1947—

on the amount by which such part—

	Rate.
(a) exceeds 30 per cent., but does not exceed 40 per cent., of the total income as so reduced.	Two annas in the rupee.
(b) exceeds 40 per cent., but does not exceed 45 per cent., of the total income as so reduced.	Three annas in the rupee.
(c) exceeds 45 per cent., but does not exceed 50 per cent., of the total income as so reduced.	Four annas in the rupee.
(d) exceeds 50 per cent., but does not exceed 55 per cent., of the total as so reduced.	Five annas in the rupee.
(e) exceeds 55 per cent., but does not exceed 60 per cent., of the total as so reduced.	Six annas in the rupee.
(f) exceeds 60 per cent. of the total income as so reduced.	Seven annas in the rupee.

Provided that—

- (i) no additional super-tax shall be payable where such part is less than, or equal to, five per cent. on the capital of the company;
- (ii) where such part is more than five per cent. on the capital of the company, the additional super-tax payable shall be reduced by the amount of additional super-tax which would, but for the provisions of clause (i) of this proviso, have been payable had such part been equal to five per cent. on the capital of the company;

- (iii) where any dividends (not being dividends payable at a fixed rate) have been declared before the 1st day of March 1946 in respect of the whole or part of the previous year for the assessment for the year ending on the 31st day of March 1947, and the amount of super-tax computed at the rates set out in this paragraph exceeds the amount of super-tax which would be payable by the company at the rate specified in the Indian Finance Act, 1945, such proportion of the amount of super-tax computed under this paragraph as the amount of dividends declared before the 1st day of March 1946 bears to the total amount of dividends declared in respect of the said previous year (not being dividends payable at a fixed rate) shall be so reduced as not to exceed the same proportion of the super-tax computed at the rate specified in the Indian Finance Act, 1945.

Explanation.—For the purposes of the paragraph,—

- (a) the expression “capital of the company” shall be deemed to mean the paid-up share capital at the beginning of the previous year for the assessment for the year ending on the 31st day of March 1947 (other than capital entitled to a dividend at a fixed rate) plus any reserves other than depreciation reserves and reserves for bad or doubtful debts at the same date as diminished by the amount on deposit on the same date with the Central Government under section 10 of the Indian Finance Act, 1942, or section 2 of the Excess Profits Tax Ordinance, 1943.
- (b) the expression “dividend” shall be deemed to include any distribution included in the expression “dividend” as defined in clause (6A) of section 2 of the Indian Income-tax Act, 1922, and any such distribution made during the year ending on the 31st day of March 1947 shall be deemed to have been made in respect of the whole or part of the previous year.

Government of India directed on July 15, 1943, that the quarter-rupee coin minted during and after August 1943 should have the same security edge as quaternary rupees and half rupees.

In 1941-42, the design of the half-rupee coin of 1941 and after was altered so as to make it conform to that of the quaternary rupee coin. The minting of the quaternary half and quarter rupee silver coins was, however, suspended by a notification in May 1946 in order to enable the Government to discharge the obligation to return in kind, within five years of the end of the war, the 226 million ounces of silver borrowed from the U. S. Government between 1913 and 1945.

### Copper and Bronze.

Copper coinage was introduced into the Bengal Presidency by Act XVII of 1835 and into the Madras and Bombay Presidencies by Act XXII of 1844. The weight of the copper coins struck under Act XXIII of 1870 remained the same as it was in 1835. It was as follows:—

	Grains
	troy.
Double pice or half-anna .. .. .	200
Pice or quarter-anna .. .. .	100
Half-pice or one-eighth of an anna ..	50
Pie being one-third of a pice or one-twelfth of an anna .. .. .	33½

The weight and dimensions of bronze coins were as follows:—

	Standard weight in grains troy.	Diameter in millimetres.
Pice .. .. .	75	25·4
Half-pice .. .. .	37½	21·15
Pie .. .. .	25	17·45

Double pice coin is being withdrawn from circulation since 1924, but is still received at Treasuries and Issue Offices.

With a view to protecting further issues of pice against hoarding resulting from the black market value of the metallic contents rising above the face value, the Government of India issued in February 1943 a new design of pice, which economises the metal and is expected to be convenient to the public. The Finance Department notification dated February 23, 1943, provided for the mintage of the new pice with a smaller diameter and a circular hole in the centre, reduced in weight from 75 grains to 35 grains and with a metallic composition of 97 per cent. copper, 2½ per cent. zinc and one-half per cent. tin instead of the former fineness of 95½ per cent. copper, 3 per cent. tin, and 1½ per cent. zinc. The notification also provided for the discontinuance of the coinage of half-pice and pie pieces. The new pice was issued from the Bombay office of the Reserve Bank on February 1, 1943.

### Nickel.

The Act of 1906 also provided for the coinage of a nickel coin. It was directed that the nickel one-anna piece should thenceforth be coined at the Mint and issued. The notification also prescribed the design of the coin, which has a waved edge with twelve scollops, the greatest diameter of the coin being 21 millimetres and its least diameter 19·8 millimetres. The disability of issuing a half-anna nickel coin was considered by the Government of India in 1909, but after consultation with Local Governments

it was decided not to take action in this direction until the people had become thoroughly familiar with the present one-anna coin. The two-anna nickel coin was introduced in 1917-18; and the four-anna and eight-anna nickel coins in 1919. The eight-anna nickel was withdrawn from circulation in 1924 but is still being received at issue offices only.

On account of war activities, the demand for small coin greatly increased and in January 1942 the Government of India issued a new half anna coin which economises metal and is convenient to the public. Further with a view to economising the use of nickel, it was decided to mint new half-anna pieces and the one anna coin and the later two anna coin in a nickel-brass alloy instead of the cupro-nickel alloy. The notification of January 24, 1942, provided for the mintage of the new half anna coin of a square shape and equal to three-fourths the weight of one anna piece. According to this notification, the half anna and one anna pieces were minted in nickel-brass composed of 79 per cent. copper, 20 per cent. zinc and 1 per cent. nickel. A similar change in the metallic contents of two anna piece was announced on March 21, 1942.

Towards the end of November 1945, the Government of India decided that further requirements of two anna and one anna pieces should be minted in the cupro-nickel alloy instead of nickel-brass alloy which had been adopted as a wartime expedient and later found unsatisfactory.

In May 1946 the Central Government authorised the minting and issue of half and quarter rupee coins in pure-nickel owing to "inadequate supplies of silver in the open market and the prevailing high prices in India." These new coins are exactly the same in size and weight as the early silver coins with designs usually adopted for decimal coins of 50 cents and 25 cents respectively. The new coins have no security edge and have been designed with the margin lettering and head of the King Emperor on one side and the name of the country, the denomination in three languages, English, Devanagari and Urdu, with the figure of an Indian tiger on the reverse.

**DECIMALIZATION OF THE COINAGE.**—With a view to simplifying accounting and facilitating calculations the Government of India have under consideration the introduction of a decimal system of a coinage in India. The present occasion, calling for a huge recoinage programme necessitated by the unpopularity of the Nickel Brass coin introduced in 1942 as a wartime measure, is considered to be most opportune for the proposed reform. The proposals under this system are that the rupee would remain unaltered and the half rupee and the quarter rupee, while retaining their present shape, size and weight, would be issued as 50 cents and 25 cents coins. The existing lower denominations of small coin would, however, be discarded and, instead, cupro-nickel coins of 10 cents, 5 cents and 2 cents and bronze coins of 1 cent and, if necessary, ½ cent will be issued. A bill incorporating the above changes was introduced in the Central Legislative Assembly on the 18th February, 1946 and has been circularised to elicit public opinion.

# The Currency System.

## I. THE SILVER STANDARD.

Prior to 1893 the Indian currency system was a mono-metallic system, with silver as the standard of value and a circulation of silver rupees and notes based thereon. But with the opening of new and very productive silver mines in the United States of America the supply of silver exceeded the demand and it steadily receded in value. The result was that the gold value of the rupee, which was nominally two shillings, fell continuously until it reached the neighbourhood of a shilling. These disturbances were prejudicial to trade, but they were still more prejudicial to the finances of the Government. The Government of India has to meet every year in London a substantial sum in the form of payment of interest on the debt, the salaries of officials on leave, the pensions of retired officials, as well as large payment for stores required for State enterprises. As the rupee fell in its gold value the number of rupees required to satisfy these payments rose. The total reached a pitch which seriously alarmed the Government, which felt that it might be called upon to raise a sum in rupees which would necessitate a considerable increase in taxation, which should be avoided if possible. It was therefore decided to take measures to raise and fix the gold value of the rupee for the purposes of exchange.

**Closing the Mints.**—The whole question was examined by a strong committee under the presidency of Lord Herschell, whose report is commonly called the Herschell Report. It was decided in 1893 to close the mints to the unrestricted coinage of silver. This step led, as was intended, to a gradual divergence between the exchange value of the rupee and the gold value of its silver content. Government ceased to add rupees to the circulation. Rupees remained unlimited legal tender and formed the standard of value for all internal transactions. Since Government refused, and no-one else had the power to coin rupees, as soon as circumstances led to an increased demand for rupees, the exchange value of the rupee began to rise. By 1898 it had approached the figure of one shilling and four pence. Meantime, in response to the undertaking of Government to give notes or rupees for gold at the rate of fifteen rupees to the pound sterling, gold began to accumulate in the Paper Currency Reserve. Those purposes having been attained, a second committee was appointed under the chairmanship of Sir Henry Fowler to consider what further steps should be adopted in the light of these conditions. The report of the Fowler Committee as it was called marked the second stage in Indian currency policy.

## II. THE NEW STANDARD.

The Fowler Committee rejected the proposal to re-open the Mints to the free coinage of silver. They proposed that the exchange value of the rupee should be fixed at one shilling and fourpence, or fifteen rupees to the sovereign. They further suggested that the British sovereign should be made a legal tender and a current coin in India; that the Indian mints should be thrown open to the unrestricted coinage of gold; so that the rupee and the sovereign should freely circulate side by side in India. The goal which the Committee had in view was a gold standard supported by a gold currency. Now under the condition which compelled the Government of India to give either rupees or rupee notes for gold tendered in India, at the rate of fifteen rupees to the sovereign, it was impossible for the rate of exchange to rise above one shilling and four pence, save by the fraction which covered the cost of shipping gold to India. But if the balance of trade turned against India, it was still possible for the rate of exchange to fall. To meet this the Fowler Committee recommended that the profits on coining rupees should not be absorbed in the general revenues, but should be set aside in a special reserve, to be called the Gold Standard Reserve. Inasmuch as the cost of coining rupees was approximately elevenpence halfpenny, and they were sold to the public at one and four pence, the profits were considerable; they were to have been kept in gold, so as to be freely available when required for the support of exchange.

**A 16 pence Rupee.**—The Government of India professed to accept all the recommendations of the Fowler Committee; actually only a portion of them was put in practice. The official rate of exchange was fixed at one and fourpence. The sovereign and the half sovereign were declared unlimited legal tender in India. But after a first attempt, when sovereigns soon came back to the treasuries, no effort was made to support the gold standard by an active gold currency. The gold mint was not set up. The Gold Standard Reserve was established, but, instead of holding the Reserve in gold, it was invested in British securities. These practices gave rise to conditions which were never contemplated by the Fowler Committee. References have been made to the Home Charges of the Government of India, which at the time amounted to about seventeen millions sterling a year. These are met by the sale of what are called Council Bills. That is to say, the Secretary of State, acting on behalf of the Government of India, sold Bills against gold deposited in the Bank of England in London. These Bills when presented in India were cashed at the Government Treasuries. Now if the Secretary of State sold Council Bills only to meet his actual requirements, it follows that the balance of trade in favour of India over and above this figure would be liquidated, as it is in other countries, by the importation of bullion or by the creation of credits. It is a fact that owing to the failure of the policy of encouraging an active gold

circulation to support the gold standard, gold tended to accumulate in India in embarrassing quantities. In 1904 therefore the Secretary of State declared his intention of selling Council Bills on India without limit at the price of one shilling fourpence one-eighth—that is to say gold import point. The effect of this policy was to limit the import of gold to India, for it was generally more convenient to deposit the gold in London and to obtain Council Bills against it, than to ship the gold to India. Nevertheless as the Egyptian cotton crop was very largely financed in sovereigns it was sometimes cheaper and more convenient to ship sovereigns from Egypt, or even from Australia, than to buy Council Bills. Considerable quantities of sovereigns found their way into India and circulated freely, particularly in the Bombay Presidency, the Punjab and parts of the Central Provinces.

**Sterling Remittance.**—This system worked until 1907-08. A partial failure of the rains in India in 1907, and the general financial stringency all over the world which followed the American financial crisis in the autumn, caused the Indian exchange to become weak in November. This was one of the occasions contemplated, in a different form, by the Fowler Committee when it proposed the formation of the Gold Standard Reserve. There had been very heavy coining of rupees in India and the amount in the Reserve was ample. But the Reserve was in securities not in gold, and was therefore not in a liquid form, nor was the time an opportune one for the realisation of securities. Moreover the authorities did not realise that a reserve is for use in times of emergency. It had been assumed that in times of weakness it would be sufficient

for the Secretary of State to stop selling Council Bills, and it would firm up; meantime he would finance himself by drawing on the funds in the Gold Standard Reserve. But it was apparent that the stoppage of the sales of Councils was not enough; there was an insistent demand for the export of gold, or the equivalent of gold. The Government of India refused and exchange fell to one and threepence twenty-three thirtyseconds. Ultimately the authorities had to give way. It was decided to sell in India a certain quantity of sterling bills on London at one and threepence twenty-nine thirtyseconds, representing gold export point, and the equivalent of the export of gold. These were met in London from the funds in the Gold Standard Reserve. Bills to the extent of between eight and nine millions sterling were sold, which regularised the position and the Indian export trade recovered. Thus were gradually evolved the main principles of the Indian currency system. It consisted of silver rupees and rupee notes in India, with the sovereign and half sovereign unlimited legal tender at the rate of fifteen rupees to the sovereign, or one and fourpence. The rate of exchange was prevented from rising above gold import point by the unlimited sale of Council Bills at gold point in London; it was prevented from falling below gold point by the sale of Sterling Bills (commonly called Reverse Councils) at gold export point in India. But it was not the system proposed by the Fowler Committee, for there was no gold mint and only a limited gold circulation; some people invented for it the novel term of the gold exchange standard, a term unknown to the law of India. It was described by one of the most active workers in it as a "limping standard."

### III. THE CHAMBERLAIN COMMITTEE.

This brings us to the year 1913. There were many critics of the system. Some hankered for a return to the open mints; others objected to the practice of unlimited sales of Council Bills as forcing rupees into circulation in excess of the requirements of the country. But the general advantages of a fixed exchange were so great as to smother the voices of the critics, and the trade and commerce of the country adjusted itself to the one and fourpenny rupee. But there gradually grew up a formidable body of criticism directed against the administrative measures taken by the India Office. These criticisms were chiefly directed at the investment of the Gold Standard Reserve in securities instead of keeping it in gold in India; at a raid on that reserve in order temporarily to relieve the Government of the difficulty of financing its railway expenditure; at the transfer of a solid block of the Paper Currency Reserve from India to London; at the holding of a portion of the Gold Standard Reserve in silver in order to facilitate the coining of rupees; and at the unlimited sales of Council Bills at rates which prevented the free flow of gold to India, thus forcing token rupees into circulation in quantities in excess of the requirements of the country. The cumulative effect of this policy was to transfer from India to London an immense block of India's resources, aggregating over seventy millions, where they were

lent out at low rates of interest to the London bankers, whilst India was starved of money until at one point money was not available for loans even against Government securities and the bank rate was artificially high. All these things were done, it was contended, on the *obiter dicta* of a small Finance Committee of the India Office, from which all Indian influence was excluded, and on which London banking influence was supreme. The India Office for long ignored this criticism, until it was summarised in a series of articles in *The Times*, and public opinion was focussed on the discussion through the action of the India Office in purchasing a big block of silver for coining purposes from Messrs. Montagu & Co., instead of through their recognised and constituted agents, the Bank of England. The Government could no longer afford to stand aloof and yet another Currency Committee was appointed under the chairmanship of Mr. Austen Chamberlain. This was known as the Chamberlain Committee.

**New Measures.**—The conclusions of this Commission were that it was unnecessary to support the Gold Standard by a gold currency; that it was not to the advantage of India to encourage the internal use of gold as currency; that the internal currency should be supported by a thoroughly adequate reserve of gold and sterling; that no limit should be fixed to the

amount of the Gold Standard Reserve, one-half of which should be held in gold; that the silver branch of the Gold Standard Reserve should be abolished; that Reverse Councils should be sold on demand; that the Paper Currency should be made more elastic; and that there should be two Indian representatives out of three on the Finance Committee of the India Office. The Committee dealt in conclusively with the accumulation of excessive balances in London, the general tenor of their recommendations being "not guilty, but do not do it again." They gave a

passing commendation to the idea of a State Bank. Sir James Begbie, the only Indian banker on the Committee, appended a vigorous minute of dissent, in which he urged that the true line of advance was to discourage the extension of the token currency by providing further facilities for the distribution of gold when increases to the currency became necessary, including the issue of an Indian gold coin of a more convenient denomination than the sovereign or the half sovereign.

#### IV. CURRENCY AND THE WAR OF 1914-18.

The report was in the hands of the Government of India before the outbreak of the last war. Some immediate steps were taken, like the abolition of the silver branch of the Gold Standard Reserve, but before the Government could deal entirely with the temporising recommendations of the Commission, the war broke out. The early effects of the war were precisely those anticipated. There was a demand for sterling remittance which was met by the sale of Reverse Councils, 68,707,000 being sold up to the end of January 1915. There were withdrawals from the Post Office Savings Banks, and a net sum of Rs. 8 crores was taken away. There was some lack of confidence in the Note issue, and a demand for gold; Notes to the extent of Rs. 10 crores were presented for encashment and the Government were obliged to suspend the issue of gold. But these were transient features and did not demand a moratorium; confidence was soon revived and Exchange and the Note issue continued strong. The difficulties which afterwards arose were from causes completely unanticipated by all students of the Indian currency. They arose from an immense balance of trade in favour of India, caused by the demand for Indian produce for the United Kingdom and the Allies and the decline in the export trade from these countries; a heavy expenditure in India on behalf of the British Government; and a phenomenal rise in the price of silver. If we take the three years 1916-17 to 1918-19 the balance of trade in favour of India was £6 millions a year above the corresponding years of the previous quinquennium. The disbursements in India on behalf of the Government of the United Kingdom and the Allies were by December 1919 £240,000,000. This balance of trade and expenditure for Imperial purposes could not be financed either by the import of the precious metals, owing to the universal embargo on the movement of gold and silver nor by credits in India. It could be financed only by the expansion of the Note issue, against sterling securities in the United Kingdom, chiefly Treasury Bills, and the issue of coined

rupees. But simultaneously there was a reduction in the output of the silver mines of the world coinciding with an increased demand for the metal. The price of silver in 1915 was 27½ pence per standard ounce. In May 1919 it was 58 pence, on the 17th December of that year it was 78 pence. The main difficulties in India were not therefore the prevention of the rupee from falling below the ratio of 15 to one, but to keep it within any limits and to provide a sufficiency to meet the demand.

**Rise in Exchange.**—The measures adopted by the Government of India in these emergencies were to bring exchange under rigid control confining remittance to the finance of articles of national importance. The next step was to raise the rate for the sale of Council Bills, so that silver might be purchased at a price which would allow rupees to be coined without loss. The following table shows how rates were raised from one shilling fourpence to two shillings fourpence:—

Date of Introduction.	Minimum Rate for Immediate Telegraphic Transfers.
3rd January 1917	1 4½
28th August 1917	1 5
12th April 1918	1 6
13th May 1919	1 8
12th August 1919	1 10
15th September 1919	2 0
22nd November 1919	2 2
12th December 1919	2 4

#### V. THE 1919 COMMITTEE.

The effect of these measures however was to justify the currency policy pursued from 1893 to 1915, the main object of which was to stabilise the rupee at one and fourpence. The war being over, a Committee was appointed to advise in regard to the future of Indian exchange and

currency. It sat in 1919 and reported towards the end of the year. Its main recommendations are summarised below:—

(i) It is desirable to restore stability to the rupee and to re-establish the automatic working of the Indian currency system.

(ii) The reduction of the fineness or weight of the rupee, the issue of 2 or 3-rupee coins of lower proportional silver content than the present rupee, or the issue of a nickel rupee, are expedients that cannot be recommended.

(iii) The maintenance of the convertibility of the note issue is essential, and proposals that do not adequately protect the Indian paper currency from the risk of becoming inconvertible cannot be entertained.

(iv) The rise in exchange, in so far as it has checked and mitigated the rise in Indian prices, has been to the advantage of the country as a whole, and it is desirable to secure the continuance of this benefit.

(v) Indian trade is not likely to suffer any permanent injury from the fixing of exchange at a high level.

If, contrary to expectation, a great and rapid fall in world prices were to take place, and if the costs of production in India fail to adjust themselves with equal rapidity to the lower level of prices, then it might be necessary to consider the problem afresh.

(vi) The development of Indian industry would not be seriously hampered by a high rate of exchange.

(vii) The gain to India of a high rate of exchange for meeting the Home charges is an incidental advantage that must be taken into consideration.

(viii) To postpone fixing a stable rate of exchange would be open to serious criticism and entail prolongation of Government control.

(ix) The balance of advantage is decidedly on the side of fixing the exchange value of the rupee in terms of gold rather than in terms of sterling.

(x) The stable relation to be established between the rupee and gold should be at the rate of Rs. 10 to one sovereign, or, in other words at the rate of one rupee for 11·30,016 grains of fine gold, both for foreign exchange and for internal circulation.

(xi) If silver rises for more than a brief period above the parity of 2s. (gold), the situation should be met by all other available means rather than by impairing the convertibility of the note issue. Such measures might be (a) reduction of sale of Council Bills; (b) abstention from purchase of silver; (c) use of gold to meet demands for metallic currency. If it should be absolutely necessary to purchase silver, the Government should be prepared to purchase even at a price such that rupees would be coined at a loss.

(xii) Council Drafts are primarily sold not for the convenience of trade but to provide for the Home charges in the wider sense of the term. There is no obligation to sell drafts to meet all trade demands; but, if without inconvenience or with advantage the Secretary of State is in a position to sell drafts in excess of his immediate needs, when a trade demand for them exists, there is no objection to his doing so, subject to due regard being paid to the principles governing the location of the reserves.

Council Drafts should be sold as now by open tender at competitive rates, a minimum rate being fixed from time to time on the basis of the sterling cost of shipping gold to India. At present this rate will vary, but when sterling is again equivalent to gold, it will remain uniform;

The Government of India should be authorised to announce, without previous reference to the Secretary of State on each occasion, their readiness to sell weekly a stated amount of Reverse Councils (including telegraphic transfers) during periods of exchange weakness at a price based on the cost of shipping gold from India to the United Kingdom.

(xiii) The import and export of gold to and from India should be free from Government control.

(xiv) The statutory minimum for the metallic portion of the Paper Currency Reserve should be 40 per cent. of the gross circulation.

As regards the fiduciary portion of the reserve, the holding of securities issued by the Government of India should be limited to 20 crores. The balance should be held in securities of other Governments comprised within the British Empire, and of the amount so held not more than 10 crores should have more than one year's maturity and all should be redeemable at a fixed date. The balance of the invested portion above these 30 crores should be held in short-dated securities, with not more than one year's maturity, issued by Government within the British Empire.

The sterling investments and gold in the Paper Currency Reserve should be revalued at 2s. to the rupee. The depreciation which will result from this revaluation, cannot be made good at once, but any savings resulting from the rise in exchange will afford a suitable means of discharging this liability in a limited number of years.

(xv) With a view to meeting the seasonal demand for additional currency, provision should be made for the issue of notes up to five crores over and above the normal fiduciary issue as loans to the Presidency Banks on the security of export bills of exchange.

**Minority Report.**—The main object of the Committee, it will be seen, was to secure a stable rate of exchange, without impairing the convertibility of the Note issue, and without debasing the standard silver rupee in India, or substituting another coin of inferior metallic content, which would be debasement in another form. In order to attain these ends it was imperative to fix a ratio for the rupee in relation to gold which would ensure that the Government was able to purchase silver for coining purposes without more than temporary loss. For reasons given in the report they fixed this point at two shillings gold: all other recommendations are subsidiary thereto. But in this they were not unanimous: an important member of the Committee, Mr. Dadiba Dalal of Bombay, appended a minority report in which he urged the adoption of the following courses:—

(a) The money standard in India should remain unaltered; that is, the standard of the sovereign and gold mohur with rupees related thereto at the ratio of 15 to 1.

(b) Free and unfettered imports and export by the public of gold bullion and gold coins.

(c) Free and unfettered imports and export by the public of silver bullion and silver coins.

(d) The existing silver rupees of 165 grains of fine silver at present in circulation to continue full legal tender.

checked the export of Indian cotton. Japan is the largest buyer of Indian cotton, and when her merchants not only stopped buying but began to re-sell in the Indian markets, the trade was severely shaken and stocks accumulated at a great rate. Even before the 1920 crop came into the market the stocks in Bombay were double those in the corresponding period of the previous year. The expectations of a revival in the buying power of the Continent which were held in many quarters were disappointed and throughout the year there was a heavy balance of trade against India, which made the stabilisation of exchange at the high ratio attempted a hopeless proposition.

**Confession of Failure.**—Government struggled long against these conditions in the desperate hope that a revival of the export trade would come to their assistance, but they were further handicapped by the variations of the sterling-dollar exchange, which at one time took the rate for Reverse Councils to two shillings tenpence halfpenny. They sold two millions of Reverse Councils a week, then five millions, then dropped down to a steady million. But their policy only aggravated the situation. In addition to arresting the export trade and stimulating the import trade at a time when the precise converse was demanded, their action created an artificial movement for the transfer of capital from India to England. Large war profits accumulated in India since 1914 were hurriedly liquidated and transferred to England. Then the difference between the Reverse Council rate and the market rate, which on some occasions was several pence, induced gigantic speculations. The Exchange Banks set aside all their available resources for the purpose of bidding for Bills, and at once sold their allotments at substantial profits. Considerable groups of speculators pooled their resources and followed the same course. In this way the weekly biddings for the million of Reverse Councils varied from a hundred and 20 millions to a hundred and thirty millions and the money market was completely disorganised. The biddings assumed such proportions that it was necessary to put up fifty lakhs of rupees to obtain the smallest allotment made, five thousand pounds, and Reverse Councils and the large profits thereon came under the entire control of the Banks and the wealthy speculators. Various expedients were tried to remedy the situation but without the slightest effect.

**Sterling for Gold.**—The first definite break from the recommendations of the Currency Committee came at the end of June, when the Government announced that instead of trying to stabilise the rupee at two shillings gold they would aim at stabilising it at two shillings sterling, leaving the gap between sterling and gold to be closed when the dollar-sterling rate became par. The effect of this was to alter the rate at which Reverse Councils were sold from the fluctuating rate involved in the fluctuations of dollar-sterling exchange to a fixed sterling rate, namely, one shilling elevenpence nineteen-thirty seconds. But this had little practical effect. The biddings for Reverse Councils continued on a very big scale and the market rate for exchange was always twopence or threepence below the Reverse Council rate. This practice continued until the

end of September, when it was officially declared that Reverse Councils would be stopped altogether. Exchange immediately slumped to between one and sixpence and one and sevenpence, and it continued to range between these narrow points until the end of the year. The market made its own rate; it made a more stable rate than the efforts of Government to attain an administrative stability.

**Other Measures.**—Apart from the effort to stabilise exchange, which had such unfortunate results, the policy of Government had certain other effects. During the year all restrictions on the movement of the precious metals were removed, in accordance with the recommendations of the Currency Committee. This included the abandonment of the import duty on silver, always a sore point with Indian bullionists. Legislative action was taken to alter the official ratio of the sovereign from fifteen to one to ten to one; due notice of this intention was given to holders of sovereigns and of the gold mohurs which were coined as an emergency measure in 1918, and they were given the option of tendering them at fifteen rupees. As the gold value of these coins was above fifteen rupees only a limited number was tendered, although there was extensive smuggling of sovereigns into India to take advantage of the premium. Then measures were adopted to give greater elasticity to the Note issue. Under the old law the invested proportion of the Note issue was fixed by statute and it could be altered only by altering the law or by Ordinance. An Act was passed fixing the metallic portion of the Paper Currency Reserve at fifty per cent. of the Note Issue, the invested portion being limited to Rs. 20 crores in Indian securities and the balance in British securities of not more than twelve months' currency. The invested portion of the Paper Currency Reserve was revalued at the new rate of exchange, and an undertaking was given that the profits on the Note issue would be devoted to writing off the depreciation, as also would be the interest on the Gold Standard Reserve when the total had reached £40 millions. Further, in order to give greater elasticity to the Note issue, power was taken to issue Rs. 5 crores of emergency currency in the busy season against commercial bills. These measures, save the alteration of the ratio, were generally approved by the commercial public.

**Results.**—It remains to sum up the results of these measures. In a pregnant sentence in their report the Currency Committee say that whilst a fixed rate of exchange exercises little influence on the course of trade, a rising exchange impedes exports and stimulates imports, a falling exchange exercises a reverse influence. Here we have the key to the failure of the currency policy attempted. At the moment when it was sought suddenly and violently to raise the rate of exchange by the introduction of the new ratio of two shillings gold, the export trade was weak and the import trade in obedience to the delivery of long deferred orders was strong. The very principle enunciated by the Currency Committee wrecked the policy which they recommended. The rising rate of exchange scotched the weak export trade and gave a great stimulus to imports. Unexpected forces, such as the financial crisis in Japan, the lack of buying power on the Continent, and the movement for the

transfer of capital from India to England at the artificially high rate of exchange stimulated these forces, but they had their origin in the attempt by administrative action artificially and violently to raise the rate of exchange. If left alone, the natural fall in exchange would have tended to correct the adverse balance of trade; the official policy exaggerated and intensified it. The effects on Indian business were severe. Exporters found themselves loaded with produce for which there was no foreign demand; importers found themselves loaded up with imported goods, bought in the expectation of the continuance of a high rate of exchange, delivered when it had fallen one and fourpence from the highest point reached. Immense losses were incurred by all importers. The Government sold £55

millions of Reverse Councils before abandoning their effort to stabilise exchange at the new ratio; the loss on these—that is the difference between the cost of putting the funds down in London and in bringing them back to India—was Rs. 35 crores of rupees. Government sold £53 millions of gold, without breaking or seriously affecting the premium on gold. The Secretary of State, in the absence of any demand for Council Bills, was able to finance his expenditure in England only through the lucky chance of heavy expenditure on behalf of the Imperial Government for the forces in Mesopotamia—this expenditure being made in India and set off by payments in London. The only advantages were a considerable contraction of the Note issue and the silver token currency.

## VII. COMMISSION OF 1925-26.

These unfortunate experiments induced a period of great caution in dealing with Indian currency. The currency quacks having had their way, and proved their ignorance, went out of the field, and the wholesome policy of leaving Exchange alone, to find its natural level, followed. Left alone Exchange established itself round about the old ratio of fifteen to one, that is one shilling and fourpence to the rupee. Meantime great improvements were made in the organisation of Indian credit. The three Presidency Banks were merged in the Imperial Bank of India, a State Bank in all but name, and the Bank entered into a contract with Government to open a hundred new branches in the first five years of its existence. The Bank mobilised and strengthened and widened Indian credit. The metallic backing of the Paper Currency was strengthened and the fiduciary portion of the Reserve brought within negligible proportions. Greater elasticity was established in the currency by the power to issue emergency currency up to Rs. 12 crores against commercial paper endorsed by the Imperial Bank when there is a tightness of money, and the practice of also issuing emergency currency against sterling in England. The Government of India now purchases sterling in India to meet its Home Charges when the conditions are favourable, instead of relying entirely on the sales of Council Bills in London. A notable feature in Exchange history was the rise of Exchange, of its own strength, above the one and fourpenny figure. Towards the close of 1924 it gradually rose to one shilling and sixpence and stayed there.

At this figure Exchange was maintained by Government, though the state of trade might have led to a higher figure. But as the wholly artificial ratio of the two shilling rupee remained on the statute book, the demand for an authoritative inquiry to fix the ratio of the rupee to gold or sterling was insistent, and a Committee was appointed in the autumn of 1925. Of this Commander Hilton Young was chairman, with Sir Henry Strakosch as the chief gold expert. The personnel of the Committee was strongly criticised in India, on the ground that the Indian membership was inadequate, and that the individuals selected were not authoritative; a resolution was passed in the

Assembly hostile to the whole body. Nevertheless the Committee arrived in India in November 1925 and took evidence in Delhi, Bombay and Calcutta. It sailed for England in February 1926, and resumed its hearings in London, and reported on July 1st, 1926.

The main recommendations of this Commission are summarised in the actual report in the following terms, and they are textually reproduced in order that they may be above question:—

(i) The ordinary medium of circulation should remain the currency note and the silver rupee and the stability of the currency in terms of gold should be secured by making the currency directly convertible into gold, but gold should not circulate as money.

(ii) The necessity of unity of policy in the control of currency and credit for the achievement of monetary stability involves the establishment of a Central Banking system.

(iii) The Central Banking functions should be entrusted to a new organisation, referred to as the Reserve Bank.

(iv) Detailed recommendations are made as to the constitution and functions and capacities of the Bank.

(v) The outlines of a proposed charter are recommended to give effect to the recommendations which concern the Reserve Bank.

(vi) Subject to the payment of limited dividends and the building up of suitable reserve funds, the balance of the profits of the Reserve Bank should be paid over to the Government.

(vii) The Bank should be given the sole right of note issue for a period of (say) 25 years. Not later than five years from the date of the charter becoming operative, Government notes should cease to be legal tender except at Government Treasuries.

(viii) The notes of the Bank should be full legal tender, and should be guaranteed by Government. The form and material of the note should be subject to the approval of the Governor-General in Council. A suggestion is made as to the form of the note.

(ix) An obligation should be imposed by statute on the Bank to buy and sell gold without limit at rates determined with reference to a fixed gold parity of the rupee but in quantities of not less than 400 fine ounces, no limitation being imposed as to the purpose for which the gold is required.

(x) The conditions which are to govern the sale of gold by the Bank should be so framed as to free it in normal circumstances from the task of supplying gold for non-monetary purposes. The method by which this may be secured is suggested.

(xi) The legal tender quality of the sovereign and the half-sovereign should be removed.

(xii) Government should offer "on tap" savings certificates redeemable in 3 or 5 years in legal tender money or gold at the option of the holder.

(xiii) The paper currency should cease to be convertible by law into silver coin. It should, however, be the duty of the Bank to maintain the free interchangeability of the different forms of legal tender currency, and of the Government to supply coin to the Bank on demand.

(xiv) One-rupee notes should be re-introduced and should be full legal tender.

(xv) Notes other than the one-rupee note should be legally convertible into legal tender money, i.e., into notes of smaller denomination or silver rupees at the option of the currency authority.

(xvi) No change should be made in the legal tender character of the silver rupee.

(xvii) The Paper Currency and Gold Standard Reserves should be amalgamated, and the proportions and composition of the combined Reserve should be fixed by statute.

(xviii) The proportional reserve system should be adopted. Gold and gold securities should form not less than 40 per cent. of the Reserve, subject to a possible temporary reduction, with the consent of Government, on payment of a tax. The currency authority should strive to work to a reserve ratio of 50 to 60 per cent. The gold holding should be raised to 20 per cent. of the Reserve as soon as possible and to 25 per cent. within ten years. During this period no favourable opportunity of fortifying the gold holding in the Reserve should be allowed to escape. Of the gold holding at least one-half should be held in India.

(xix) The silver holding in the Reserve should be very substantially reduced during a transitional period of ten years.

(xx) The balance of the Reserve should be held in self-liquidating trade bills and Government of India securities. The "created" securities should be replaced by marketable securities within ten years.

(xxi) A figure of Rs. 50 crores has been fixed as the liability in respect of the contractibility in the rupee circulation. Recommendations are made to secure that an amount equal to one-fifth of the face value of any increase or decrease in the number of silver rupees in

issue shall be added to or subtracted from this liability, and the balance of profit or loss shall accrue to or be borne by the Government revenues.

(xxii) The Issue Department of the Reserve Bank should be kept wholly distinct from its Banking Department.

(xxiii) The Reserve Bank should be entrusted with all the remittance operations of the Government. The Secretary of State should furnish in advance periodical information as to his requirements. The Bank should be left free, at its discretion, to employ such method or methods of remittance as it may find conducive to smooth working.

(xxiv) During the transition period the Government should publish a weekly return of remittances made. A trial should be made of the system of purchase by public tender in India.

(xxv) The cash balances of the Government (including any balances of the Government of India and of the Secretary of State outside India), as well as the banking reserves in India of all banks operating in India, should be centralised in the hands of the Reserve Bank. Section 23 of the Government of India Act should be amended accordingly.

(xxvi) The transfer of Reserve assets should take place not later than 1st January 1929, and the Bank's obligation to buy and sell gold should come into operation not later than 1st January 1931.

(xxvii) During the transition period the currency authority (i.e., the Government until the transfer of Reserve assets and the Bank thereafter) should be under an obligation to buy gold and to sell gold or gold exchange at its option at the gold points of the exchange. This obligation should be embodied in statutory form, of which the outline is suggested.

(xxviii) Stabilisation of the rupee should be effected forthwith at a rate corresponding to an exchange rate of 1s. 6d.

(xxix) The stamp duty on bills of exchange and cheques should be abolished. Bill forms, in the English language and the vernacular in parallel, should be on sale at post offices.

(xxx) Measures should be taken to promote the development of banking in India.

(xxxi) Every effort should be made to remedy the deficiencies in the existing body of statistical data.

**A Minute of Dissent.**—Whilst all the members of the Commission signed the report, one of them, Sir Purshotamdas Thakurdas did so subject to a minute of dissent. In the first part of this Minute Sir Purshotamdas subjected the long correspondence between the Government of India and the India Office on currency policy to a detailed analysis. The conclusions to which he came were that throughout the Government of India had striven for a system following the Fowler Report—a gold standard based on a gold currency, and that the efforts were emasculated by successive Secretaries of State, who had in view some which was often called the Gold

Exchange Standard, but which was in effect no standard at all. On the question of the Gold Standard, he stressed the importance of the free movement of gold in India, but subject to this condition accepted the Gold Bullion Standard recommended by his colleagues. As for the proposed Reserve Bank, Sir Purshotamdas, whilst recognising that the scheme proposed might be the ideal, to be attained in process of time, thought that the best immediate course was to develop the Imperial Bank into a central bank for India. The chief point of difference with his colleagues was however the ratio.

Dealing with the ratio of the rupee to gold Sir Purshotamdas said that in September 1924 the rate was approximately one and fourpence gold. At that time the Government was pressed to stabilise at the then ratio, and thus legally to restore the long current legal standard of money payments. This it declined to do, and by limiting the supply of currency, the ratio was raised to one and sixpence gold by April 1925. He declined therefore to attach any importance to a ratio reached by such measures. Proceeding to analyse the course of prices and wages, he combated the conclusion of his colleagues that prices had adjusted themselves in a preponderant degree to one shilling and sixpence. For these reasons he recommended that the rupee should be stabilised at the rate which was current for nearly twenty years, namely one and fourpence. His conclusions were summarised in the following terms:—

"I look upon the question of the ratio in this Report as being no less important than the question of the standard to be adopted for the Indian Currency System. I am convinced that if the absolute necessity of the free inflow of gold, which I have emphasised, is recognised, and steps taken to ensure it, the gold bullion standard proposed will be the correct one, and the likelihood of its breaking down under the strain of any convulsions in the future will be as remote as it can reasonably be. But I have very grave apprehensions that if the recommendation of my colleagues to stabilise the rupee at 1s. 6d. is accepted and acted upon, India will be faced during the next few years with a disturbance in her economic organisation, the magnitude of which is difficult to estimate, but the consequences of which may not only hamper her economic development but may even prove disastrous. Such a disturbance and its consequences my colleagues do not foresee to-day. But the possibility of their occurring cannot be ignored. Until adjustment is complete, agriculture threatens to become unattractive and less remunerative than it is to-day, and industries will have to undergo a painful process of adjustment, unnatural, unwarranted and avoidable—an adjustment which will be much to their cost, and affect not only their stability and their progress, but in certain cases, their very existence. And should Nature have in store for India a couple of lean years after the four good harvests that we have had, during the period of forced adjustment to a rate of 1s. 6d., the steps that the Currency Authority will have to take to maintain exchange at this rate may deplete

the gold resources of the country to an extent that may seriously shake the confidence of the people in the currency system recommended."

**A Survey.**—The official summary of the Report, and the summary of the minute of dissent, given above, do not however convey an idea of the far-reaching proposals embodied therein. These can be appreciated only if they are examined in close relation to the currency system of India in its various phases since 1899. This was done in an article contributed to *The Bankers' Magazine* by Sir Stanley Reed, which was recognised to be a fair presentation of the position. The main features thereof are reproduced below. There is here some re-treading of the path laid out in the introductory section, but this is unavoidable, if the full bearing of the measures proposed by the Commission are to be appreciated. After describing the standard in force Sir Stanley Reed asked:—

"What was the standard thus established? It is generally described in London as the Gold Exchange Standard. That status was never claimed for it by its principal protagonist, the late Sir Lionel Abraham, who described it as a 'limping standard.' The Royal Commission declares that 'in truth in so far as it amounted to a definite standard at all, it was a standard of sterling exchange.' Later they show that 'the automatic working of the exchange standard is thus not adequately provided for in India, and never has been. The fundamental basis of such a standard is provision for the expansion and contraction of the volume of currency..... Under the Indian system, contraction is not, and never has been, automatic.'

"However, the standard limped along until the third year of the war. The exchange value of the rupee was stable; prices adjusted themselves to the ratio; Indian trade and industry developed. From the narrow standpoint of profit and loss, the investment of the reserves, instead of keeping them in gold, resulted in a considerable gain to the finances estimated in 1925 at £17,962,466. But it had three great disadvantages: it did not inspire public confidence; it placed the Indian currency at the mercy of the silver market which was on occasion deliberately cornered against it; and it left the control of currency by the Government divorced from the control of credit by the Presidency Banks, afterwards amalgamated in the Imperial Bank of India. On this the Commission make a very suggestive comment: 'when allowance has been made for all misunderstandings and misapprehensions, the fact remains that a large measure of distrust in the present system is justified by its imperfections.'

"There is, I think, an inadequate appreciation of the influence on the Indian currency and exchange of the war, and the action taken thereafter. The first break in the permanent ratio of one shilling and fourpence did not occur until 1917, when the full effect of dependence on the silver market was revealed. Faced by the unprecedented rise in the price of silver the Government of India had either to raise the price of Council Drafts or else abandon the

convertibility of the Note Issue. Wisely, it took the former alternative; the price of Council Drafts followed the price of silver. The effect of this would have been transitory, but for the attempt in 1920, on the advice of the Barington Smith Committee, to stabilise the rupee at a new ratio of two shillings gold when all gold prices were crashing. It is easy to be wise after the event, but if the Government had followed silver down, as it followed silver up, there is no room to doubt that the rupee would have returned to its 'permanent' ratio with no more disturbance than was inevitable under war conditions. However, this was not done. The vain effort to stabilise the new ratio was abandoned in September, 1920, and the two shilling rupee has since been a legal fiction. Left free from administrative action, the rupee fell below one shilling and threepence sterling and one shilling gold in 1921. Since under the influence of good harvests, it has climbed upwards, and has been in the neighbourhood of one shilling and sixpence gold for the past twelve months. But it is not always realised in London that under these vicissitudes the Indian standard has legally perished. In the words of the report, 'The stability of the gold value of the rupee is thus based upon nothing more substantial than a policy of the Government, and at present that policy can be found defined in no notification or undertaking by the Government. It has to be implied from the acts of the Government in relation to the currency, and those acts are subject to no statutory regulation or control.'

"The responsibility remitted to the Commission was not therefore the mere stabilisation of the rupee, but the establishment of a standard which would command reasoned confidence in India, to link the rupee to that standard, and to provide for its statutory control, automatic working and stability; to bring the control of currency and of credit under a single authority and to free the Indian currency and exchange system from the dominance of the silver market. In short, it was to establish the rule of law in place of the practice of administrative discretion.

**Scheme for Gold Currency.**—"In the course of their inquiries in India the Commission had placed before them a scheme for the immediate establishment of a gold bullion standard, and its early conversion into the gold standard supported by the gold currency which a large body of Indian opinion has insistently demanded. The scheme was presented by the officials of the Finance Department, but it is known to be the work of the Finance Member, Sir Basil Blackett, whose work in India is of the greatest value.

"The essential features of this Scheme were the undertaking of a statutory obligation by Government to buy and sell gold bullion in 400 oz. bars; as soon as sufficient gold was available to put a gold coin in circulation; after a period tentatively fixed at five years to undertake to give gold coin in exchange for notes and rupees, and after a further period, also tentatively fixed at five years, make the silver rupee legal tender only for sums up to a small fixed amount. The scheme involved the

disposal of 200 crores of silver rupees, or 687 million fine ounces, in ten years; the acquisition in all of £103 millions of gold; and the establishment of credits in London or New York. The cost was estimated at one and two-thirds crores of rupees per annum during the first five years and thereafter from two-thirds of a crore to 1·12 crore.

"This scheme is subjected by the Commission to a detailed examination, and rejected on grounds which are convincing. The main grounds for this decision are that the estimates of the amount and time of the gold demand are uncertain, and the absorption by India of this £103 millions of gold, in addition to the normal absorption for the arts, hoards, etc., would powerfully react on the supplies of credit, the rates of interest, and gold prices, throughout the world. The reaction on the silver market from the dethronement of the rupee and realisation of this large quantity of silver bullion would be even more marked, with severely prejudicial effects on the silver hoards of the people of India and the exchanges with China, where India still does a large business. Moreover, the capacity to raise the required credits is doubtful, and the cost is placed by the India Office at Rs. 3 crores a year.

"The evidence of the highest financial authorities in London and New York established beyond doubt that it is not in the interests of India to precipitate any currency reform that would violently disturb the gold and silver markets, however desirable that reform might be in itself. Also, that whilst London, working in close harmony with New York, would strain every nerve to supply India with the funds she might require for her own development, it could hardly be expected to provide credits for a scheme which would upset the gold and silver markets. But whilst on these grounds the Commission were not able to endorse Sir Basil Blackett's scheme, there is no doubt that they were profoundly influenced by it in their own recommendations. The ultimate evolution of a policy which promises a cure for India's currency bills is therefore in large measure due to the courage and resolution with which the Finance Authorities in that country faced them.

**A Gold Bullion Standard.**—"The currency system recommended by the Commission is a gold bullion standard. They propose that an obligation shall be imposed by statute on the currency authority to buy and sell gold without limit at rates determined with reference to a fixed gold parity of the rupee, but in quantities of not less than 400 fine ounces, no limitation being imposed as to the purpose for which the gold is required. The essence of this proposal is "that the ordinary medium of circulation in India should remain as at present the currency note and the silver rupee, and that the stability of the currency in terms of gold should be secured by making the currency directly convertible into gold for all purposes, but that gold should not circulate as money. It must not circulate at first, and it need not circulate ever." In breaking adrift from any idea of a sterling exchange, or gold exchange standard, the Commission were powerfully influenced by two factors—the necessity of safeguarding the

Indian system from the price of silver rising above the melting point of the rupee and the desirability of establishing confidence by giving the country not only a real, but conspicuously visible link between the currency and gold.

"This reasoning is eminently sound, and the scheme in its broad outlines should command the unhesitating support not only of India, but of all interested in Indian trade. India will have nothing to do with any exchange standard; its experience has been too painful. Proposals to that end would be rejected by the legislature and prolong the currency controversies it is desired to close. The gold bullion standard satisfies all the country's real needs. True, it will not give it the gold mint and the gold currency which have long been demanded; it involves the demonetization of the sovereign to which a sentimental influence attaches. But whilst it does not do these things, it keeps one door open. No one contends that a gold standard and a gold currency are immediately practicable. The most rapid progress thereto is embodied in Sir Basil Blackett's scheme, which is full of uncertainties and risks. But when the gold reserves are strengthened to the requisite point, the proposals leave India perfectly free to decide, through her legislature, where a gold currency is worth the expense.

"We must, however, face the obligation which a gold bullion standard imposes on the currency authority in India; indeed the Commission do not attempt to burke it. 'The obligation is to convert the currency, not merely into foreign exchange, but into metallic gold, and it is an obligation that is not, as formerly, conditional and circumscribed, but absolute and unlimited. Nevertheless. . . it has been undertaken by every other country that has adopted an effective gold standard; and we have satisfied ourselves that the present resources in the form of reserves at the disposal of the Government of India are adequate to enable the currency authority safely to undertake the obligation, with the measures of fortification, and at the time, which we specify.' It is important, therefore, to examine the reserves and the procedure thereat.

"The reserves held for the purpose of maintaining the value of the token currency are twofold—the Paper Currency Reserve and the Gold Standard Reserve. Their constitution on April 30, 1926 (the date taken by the Commission), was as follows:—

*Paper Currency Reserve.*

	Rs. Crores.
Silver coin .. .. .	77.0
Silver bullion .. .. .	7.7
Gold coin and bullion .. .. .	22.3
Rupee securities .. .. .	57.1
Sterling securities .. .. .	21.0
	<hr/>
	185.1

(The gold coin and bullion and the sterling securities are converted at the legal fiction ratio of two shillings per rupee.)

"The Gold Standard Reserve amounts at present to £40,000,000 invested in Gold and in British Treasury Bills and other sterling securities.

"In theory the two reserves fulfil entirely different functions. The Paper Currency Reserve is the backing for the Note Issue. The Gold Standard Reserve, accumulated from the profits on coining, is designed to maintain the external value of the rupee. In practice their action is closely interlocked, and the first line of defence in the event of a demand for remittance from India is the gold in the paper currency reserve. This invisible line of demarcation will disappear if the Commission's proposals are adopted. The Commission are justified in recommending that the two shall be amalgamated. Their further proposals are that the proportions and composition of the combined Reserve should be fixed by statute; that gold and gold securities should form not less than 40 per cent. of the whole, with 50 to 60 per cent. as the ideal; and that the holding of gold, which now stands at about 12.8 per cent. should be raised to 20 per cent. as soon as possible, and to 25 per cent. in ten years. Generally, they are of opinion that during this period no favourable opportunity of fortifying the gold holding in the Reserve should be allowed to escape.

"The proposal to bring the combined Reserve under statutory control is wise; an arguable case could be made out for the thesis that the currency difficulties of India have arisen in the main from the decision of Lord Curzon's Government not to invest the official acceptance of the Fowler Report with legislative authority. The strengthening of the gold reserves is in entire accord with Indian needs.

**The Ratio.**—"The majority of the Commission, Sir Purshotamdas Thakurdas being the only dissentient, recommend that the rupee be stabilised in relation to gold at a rate corresponding to an exchange rate of one shilling and sixpence to the rupee. Round this point controversy in India will be concentrated; it is worth while to refresh our memories of the history of the ratio. The Fowler Committee recommended that the rupee should be permanently stabilised at one shilling and fourpence; the Secretary of State for India accepted their recommendations without qualification. The rupee was substantially steady at this point until August 1917.

"One principle advanced in Sir Dadiba Dalal's prophetic minority report in 1910, that the legal standard of money payments should be and usually is, regarded as less open to repeal or modification than any other legislative Act, will command general acceptance. But when Sir Dadiba went on to suggest that the Government of India might have avoided this measure by larger borrowings in India and encouraging investment abroad he was on ground where no one in touch with Indian conditions can follow him. In the circumstances of the day the Government had no alternative to raising the rate of exchange save in declaring the rupee inconvertible, which during the war would have been disastrous. I must reiterate the belief that the real mischief was done not when the rate of exchange was raised to meet the rise in silver, but when it was not lowered as silver fell; the attempt to stabilise the rupee

at the two shilling rate caused the Government of India large losses, and inflicted a terrible blow on trade; after it was abandoned in September, 1920, the rupee fell below one shilling and threepence sterling and one shilling gold. Thereafter, under the influence of a succession of abundant harvests, it recovered. In 1923, it was one shilling and fourpence sterling; in October, 1924 one and sixpence sterling and one and four gold. With the rise in the pound to gold parity, the rupee reached one and sixpence gold in June, 1925, and has remained there.

"It is not, I think, open to doubt that if the vain attempt to stabilise the rupee at two shillings had not been made in 1920, or if advantage had been taken of its return to one and four, the permanent standard might have been re-established without undue disturbance. Sir Purshotamdas Thakurdas asserts in his minute of dissent that 'the Executive had made up their minds to work up to a one shilling and sixpence ratio long before this Commission was appointed to examine the question. Indeed, they have presented to us the issue in this regard as a *fait accompli*, achieved by them, not having hesitated by manipulation to keep up the rate even while we were in session. I cannot conceive of any parallel to such a procedure in any country.'

"It is to my mind a great misfortune that the opportunity of restoring the permanent ratio of one and four was not seized when it offered. Not because there is any special sanctity in a ratio as such but because there is a sanctity in the legal standard of money payments. If this had been done the Commission's scheme would have received practically unanimous support in India; as it is, a violent controversy will rage round this secondary issue, obscuring the great merit of the Commission's basic recommendation a true gold standard, statutory in its composition and automatic in action, with the coalescence of the currency and credit authorities. However, we have to deal with facts as we find them. The majority of the commission base their recommendation on the 'conviction, which has been formed and cumulatively reinforced during the progress of our inquiry, that at the present exchange rate of about one shilling and sixpence, prices in India have already attained a substantial measure of adjustment with those in the world at large, and as a corollary, that any change in the rate would mean a difficult period of readjustment, involving widespread economic disturbance, which it is most desirable in the interests of the people to avoid, and which would in the end be followed by no countervailing advantage.' Sir Purshotamdas Thakurdas, in a closely-reasoned minute of dissent, supported by a wealth of figures, avers—and to my mind with conclusive force that the adjustments are far from complete, and cannot be completed in regard to wages without disastrous labour disputes. Both sides admit that their conclusions are weakened by the unreliability of the Indian index figures.

"The truth, I suggest, lies between these two contentions. There have been very substantial adjustments to one shilling and sixpence; no ratio could be operative for over a year without inducing this result. But it is clear that the adjustments, especially in regard to wages in

Western India, are not complete. In the matter of the indebtedness of the agricultural classes of India—seventy per cent. of the whole population there has been no adjustment, not in relation to the land revenue they pay to Government. The ratio therefore cannot be determined as a question of academic principle, but is a matter of expediency.

"Here, it seems to me, the decisive factor is the economic consequence of a return to one shilling and fourpence. There is no half-way house; the rate must be either the *de facto* one of one and sixpence, or the old permanent ratio of one and fourpence. The change would be immediate not a matter of weeks or months, but of hours or minutes. There would be an immediate rise in prices of twelve and a half per cent., with a consequent reduction of real wages by that proportion; there would be convulsive disturbance of the foreign trade; there would be violent speculation. I omit all calculation of the effect of the lower rate on the finances of the Government of India, because this is an influence which has been over-valued in the past; it is infinitesimal in comparison with the industrial and commercial interests involved. No one who realises the sensitiveness of the Indian market, and the proneness to speculation, can contemplate these violent disturbances without a feeling akin to dismay. The balance of advantage lies with stabilisation at one and six; the controversy which must ensue is part of the price to be paid for the neglect to re-establish the permanent ratio when it was practicable.

**The Note Issue.**—"Before the war there was a considerable and growing circulation of sovereigns. On the outbreak of hostilities these disappeared as currency; the actual currency of India is a token, the silver rupees and another token, the note convertible into rupees. Ever since the breakway from the accepted gold standard this obligation has imposed serious difficulties on the currency. It drove it into the very heavy coining which followed recovery from the famine of 1899-1900; it compelled heavy purchases of silver, which invariably rose in prices as the Government came into the market; and it placed the Indian currency system, as occurred during the war, at the mercy of the silver market. The maintenance of the convertibility of the note into silver rupees of the present fineness is only possible so long as silver does not rise above 48*d*. an ounce. The removal of this anomalous provision, the Commission say, is an essential step in Indian currency reform which must be taken sooner or later. 'No opportunity for the termination of this obligatory convertibility is likely to be so favourable at the present when, by making the notes convertible into gold bars for all purposes, a more solid right of convertibility is attached to them than they have ever had since silver ceased to be a reliable standard of value.' Both propositions can be accepted in their entirety.

"The rise in the volume of the paper currency is one of the most remarkable features in Indian financial history. It developed from no change in the status of the note itself; it was always convertible on demand; but from increased facilities for the encashment of notes, beginning with the introduction of universal notes of small de-

nomination and steadily progressing as experience was gained. We can therefore endorse the conclusion of the Commission that the best way to foster the use of currency notes is to establish confidence in their practical convertibility, and this confidence has been secured not so much by a legal obligation to encash them at currency offices as by making rupees readily available to the public at centres where there is a demand for them."

"The Commission therefore propose that whilst the legal obligation to convert into rupees all the notes in circulation shall remain, this obligation should not attach to the new notes to be issued by the Central Bank, and coincidentally the one-rupee note, which had acquired great popularity before it was discontinued on the ground of economy, shall be re-issued. The legal obligation on the Central Bank will be to give legal tender money, either notes of smaller denominations or silver rupees, at its option; but it will be the duty of the Bank to supply rupees freely in such quantities as may be required for circulation, and of the Government to furnish the Bank with such coin. The currency position is such that the change in the legal status of the note will be unfelt. India is suffering from a surfeit of rupees, the total volume of which is estimated at approximately Rs. 400 crores. There are Rs. 85 crores of silver coin and bullion in reserve. The whole tendency will be in the direction of a return of rupees to the reserve rather than to an appetite therefor. Not only will there exist the fullest capacity to supply rupees on demand, but there will be a positive inducement to the currency authority to encourage a demand for rupees in order to get rid of its redundant stock. It is clear that the present opportunity of freeing the currency authority from the dependence on the silver market which has hampered India for so many years is exceptionally favourable, and should be seized without hesitation."

The reception of the Report followed very closely the lines indicated as probable in the article in *The Bankers' Magazine* which we have quoted extensively above. There was a considerable protest, strongest in Western India but shared in other parts of the country, against the proposal to stabilise the rupee at one shilling and sixpence and a demand for a reversion to the old fourpence. There was, particularly in Bombay, a reluctance to agree to the establishment of the Reserve Bank, coupled with the desire that the Imperial Bank of India should be re-moulded in order to make it the Central Bank, with the functions proposed to be remitted to the Reserve Bank. These voices were so loud that they overbore the consideration of the basic recommendations of the Report, a true gold standard, and the establishment of an organisation which would link currency with credit.

In August 1926 the Government published the text of a Bill designed to fix the ratio at one and six, and to support it by the sale of bullion on the lines laid down in the Report. At the re-

quest of a large body of opinion in the Legislative Assembly, which urged that there had not been time to study the Report and that the papers were not available, the discussion of this measure was postponed until the 1927 session. On November 18th the Government of India issued a notification to the following effect:—

"After considering the report of the Royal Commission on Indian Currency and Finance, the Secretary of State for India in Council in agreement with the Government of India, is prepared to accept as a whole the recommendations of the Commission, subject to such further consideration of details as may prove to be necessary. The necessary legislation to give effect to these recommendations will be introduced in the Indian Legislature during the forthcoming session."

**The New Ratio.**—So far from closing the discussion, this notification intensified it. Feeling ran high on the subject of the ratio, considerable interests in the country being convinced that one shilling and sixpence was a higher rate than the manufacturing and agricultural industries could bear without prolonged and disastrous readjustment. These found strong expression when the Bill to give effect to the new rate was brought before the Legislative Assembly in February-March 1927. The Indian Currency Bill was, however, accepted by the Assembly by a small majority, and adopted by the Council of State. It established the ratio of one shilling and sixpence by enacting that the Government would purchase gold at a price of twenty-one rupees three annas ten ples per tola of fine gold in the form of bars containing not less than forty tolas and would sell gold or, at the option of Government, sterling for immediate delivery in London at the same price after allowing for the normal cost or transport from Bombay to London. A rate of one shilling five pence forty-nine sixths was notified as Government's selling rate for sterling to meet these obligations.

Exchange has since remained stable at the one and sixpenny rate. World trade depression in the slump of 1930 made it increasingly difficult for the Government of India to maintain the statutory ratio, but their difficulties were solved when Great Britain went off the Gold standard in September 1931, and the rupee was linked to sterling. Since then, large exports of commercial and hoarded gold from India have served to keep the exchange ratio stable, despite much agitation for a reversion to the 1s. 4d. ratio by interested parties. Generally speaking, the tendency in the last ten years has been for the rupee to be worth more than 1s. 6d., and thus Government have found no difficulty in maintaining a stable exchange. Since the outbreak of the war in September 1939, official restrictions on exchange operations have become increased and caused some inconvenience to businessmen. But the rupee continues to maintain its strength and there is little doubt that, left to itself, it would appreciate in terms of foreign currencies rather than depreciate.

## CURRENCY AND WAR No. II.

Of the total wartime absorption of legal tender currency of Rs. 1,198·64 crores, notes accounted for Rs. 988·89 crores or 82·5 per cent., rupee coin for Rs. 142·16 crores or 11·9 per cent., and small coin for Rs. 62·59 crores or 5·6 per cent.

Another significant feature of the war was the accumulation of huge sterling balances in London of the order of Rs. 1,654·71 crores which enabled the Government to repatriate their sterling debt amounting to Rs. 429·28 crores.

**Developments During 1944-45.**—Note circulation registered a further increase in 1944-45. Though the rate of expansion declined as in the last year despite the sustained tempo of the country's war effort, the annual rate of increase fell to 23 per cent. as against 37 per cent. in 1943-44 and 69 per cent. in 1942-43, which was the highest rate of rise in note circulation. The circulation increased from Rs. 882.49 crores at the end of 1943-44 to Rs. 1,084.88 crores at the end of 1944-45. The total amount of notes legal tender in India stood at Rs. 1,094.66 crores at the end of 1944-45 compared with Rs. 894.84 crores at the end of the previous year, while the average circulation for the year worked out at Rs. 968.69 crores as against Rs. 777.17 crores during 1943-44. Of the total absorption of Rs. 912.52 crores of notes since September 1, 1939, when the circulation in India stood at Rs. 172.36 crores, the year under review accounted for Rs. 202.39 crores or 22 per cent. as compared with 26 per cent. in 1943-44 when Rs. 238.91 crores of notes were absorbed.

There was a net absorption of notes during all the months of 1944-45 except in July when for the first time since July 1941 a net return was recorded. The average monthly absorption declined to Rs. 16.87 crores from Rs. 19.91 crores in 1943-44 and Rs. 21.82 crores in 1942-43, the peak year of absorption. The slower rate of expansion as a whole during the year under review may be attributed to vigorous loan and taxation programmes and official sales of bullion.

The demand for rupee coin (including Government of India one rupee notes) showed a further fall during the year. The decline in the rate of expansion, being more marked than in the case of notes, the absorption stood at Rs. 10.05 crores compared with Rs. 25.60 crores in 1943-44 and the record figure of Rs. 44.93 crores in 1942-43.

With the cessation of the legal tender character of the standard coin with effect from November 1, 1943, the quaternary rupees and the Government of India one rupee notes constitute as from that date the total amount of rupee coin in circulation. Their aggregate circulation stood at Rs. 123.81 crores at the end of October 1943. The circulation of rupee coin rose to Rs. 137.33 crores at the end of 1943-44 and to Rs. 147.38 crores at the end of 1944-45.

While the metallic coin continued to be in demand in the interior, a marked partiality for the more convenient and handy one rupee note was in evidence in urban areas and to an extent in certain mofussil parts; with restricted issues of one rupee notes, however, the demand for quaternary rupees stepped up from about the middle of the year.

The demand for small coin continued unabated during 1944-45 and greater quantities were absorbed than in any previous year. The absorption of small coin during the year under review stood at the record figure of Rs. 19.20 crores as compared with Rs. 18.46 crores in 1943-44, Rs. 11.64 crores in 1942-43, Rs. 5.06 crores in 1941-42 and Rs. 2.21 crores in 1939-40, and accounted for 31.3 per cent. of the total absorption of Rs. 61.28 crores since September 1, 1939.

Although the total output and issues of small coin during 1944-45 exceeded those of the previous year, there were signs of a gradual falling off in demand during the closing months of the year. The mintage of small coin amounted to 2,143 million pieces in 1944-45, as against 1,836 million pieces in 1943-44 and 963 million pieces in 1942-43. By the end of the financial year, the mints were able to curtail production. As compared with the peak of 219 million coins in August 1944, the combined output of the three mints declined to 190 million in February 1945 and 199 million in March 1945.

The total absorption of currency, including small coin, during the year was lowered at Rs. 231.64 crores as against Rs. 282.97 crores in 1943-44 and compared with the aggregate total absorption of Rs. 199.10 crores during the whole of the last war period between 1914-15 and 1918-19. Of the total wartime absorption of currency of Rs. 1,136.14 crores to the end of 1944-45, notes accounted for Rs. 934.32 crores or 82 per cent., rupee coin for Rs. 140.54 crores or 12 per cent. and small coin for Rs. 61.28 crores or 6 per cent.

**Total Money Supply.**—Under this head is given below a somewhat closer analysis of the trends during the course of war in the 'total money supply' in the country and in its main constituents, with a view to indicating the fundamental factors underlying the process of monetary expansion during wartime.

### "TOTAL MONEY SUPPLY" IN INDIA.

(Excluding Rupee Coin Circulation.)

(In crores of Rupees.)

Last Friday of .. .. .	Aug. 1939.	Sept. 1940.	Sept. 1941.	Sept. 1942.	Sept. 1943.	Sept. 1944.	March 1945.
Note Circulation .. .. .	169	217	268	493	760	941	1,085
Demand Deposits of Banks (Scheduled and Non-Sche- duled) .. .. .	141	163	213	324	473	610	597
Deposits of Reserve Bank ..	43	63	68	91	118	313	393

Index .. .. .	100	126	157	259	385	532	592

Note circulation (excluding notes held by banks) plus demand deposits of banks may be said to represent the cash balances of the public; deposits with the Reserve Bank consist of two main items: the cash balances of banks (including a certain necessary amount of reserve balances) and the cash balances of Government (including balances held by the Government on account of certain classes of tax-payers and refundable to the latter). Underlying the rising general trend of total money supply, there is a measure of compensatory movements in the cash balances of the public and the cash balances of Government.

As regards the sources of additions to money supply during wartime, the total net accrual of

sterling from the balance of payments on private as well as Government's account is the largest part of what may be termed as the inflationary potential the budget deficit on revenue account and the defence expenditure on capital account are other constituents of this inflationary potential: the addition to the internal debt of the country acts largely as a deflationary influence but has been reflected partly in the high and rising level of Government balances recently, the expansion of the public's cash balances given by the addition to the aggregate amount of note circulation, rupee coin and small coin and of deposits of banks, scheduled and non-scheduled, measures the extent of monetary inflation. The progressive series of each of these factors since 1939-40; are given below:—

#### GENERAL ANALYSIS OF SOURCES OF MONEY SUPPLY.

(In crores of rupees)

<i>Total of Both</i> ..	92	1,470	2,079
Increase in the Rupee debt of the Central Government since March 31, 1939, progressive .. .. .	18	623	860

#### MONETARY AGREEMENTS.

**International Monetary Fund.**—The year 1945-46 witnessed the establishment of the International Monetary Fund and the International Bank for Reconstruction and Development as, in terms of the Final Act, countries representing more than 65 per cent. of the total of the quotas had signed the Bretton Woods Agreement before December 31, 1945. In order to secure for India the advantages of the original membership of the Fund and of the Bank, the Government of India promulgated an Ordinance on December 24, 1945, providing themselves with the necessary powers for signing

the Agreement. This was done on December 27. The inaugural meeting of the Boards of Governors of the Fund and of the Bank was held at Savannah (Georgia) in March. India was represented on both the Boards by Sir Chintaman Deshmukh, Governor of the Reserve Bank of India. The head offices of these institutions will be located in Washington. Their bye-laws have been adopted and the date for admission of those signatories of the Bretton Woods Agreement was extended to the end of 1946. The first annual meeting of the full Board of Governors will be held in September but until

then, to facilitate business, a Procedure Committee of 12 Governors was appointed. In addition, the inaugural meeting proceeded with the work of electing Executive Directors of the Fund and the Bank. In terms of the Final Act, in addition to five Executive Directors appointed by nomination by the Big Five—the U.S.A., the U.K., France, China and India—, seven Executive Directors from amongst the members have been elected. India will be represented on the Fund by Mr. J. V. Joshi, Economic Adviser to the Reserve Bank of India, and on the Bank by Mr. N. Sundaresan, Joint Secretary, Finance Department of the Government of India.

#### Anglo-American Financial Agreement.—

The Anglo-American Financial Agreement entered into in December 1945 and ratified by the American Senate and the House of Representatives in the middle of 1946 may be said to be the biggest step towards the revival of the multi-lateral trade. The agreement stipulates the grant by the U.S.A. of a loan to the United Kingdom of \$ 4.4 billion (of which \$ 650 million was to be applied to the liquidation of lend-lease), and repayment in 50 equal instalments beginning with 1951 and carrying two per cent. interest. The purpose of the loan as stated in the White Paper issued on December 6, 1945, was to facilitate purchases by the United Kingdom of goods and services in the United States, to assist the United Kingdom to meet transitional post-war deficits in her current balance of payments, to help maintain adequate reserves of gold and dollars and generally to enable her to assume the

obligations of multilateral clearing. As regards accumulated sterling balances, Britain was to seek an early settlement with the countries concerned; it was also agreed that one year after the ratification of the loan by both the countries, any sterling balances released will be freely available for current transactions in any currency area without discrimination.

Monetary agreements were concluded with a number of countries during the course of 1945-46 by the British Government. These agreements also applied to India, as the arrangements made covered financial transactions with all countries within the sterling area. In most cases the agreements provided for the fixing of a rate of exchange between the currency of the country concerned and sterling and an arrangement under which payments between the sterling area and these countries were to be made through the medium of sterling accounts of residents in these countries. In certain cases the Governments of the United Kingdom and the signing countries agreed to hold each other's currencies to agreed limits. In all cases the agreements were to be subject to revision in the event of any general international monetary agreement such as would occur when the International Monetary Fund commenced operations. The countries covered by these agreements were Czechoslovakia, Denmark, Finland, Netherlands, and Norway. In the case of Yugoslavia, arrangements were made only for the resumption of financial transactions with Yugoslavia through the medium of payments through "Yugoslav sterling accounts." Monetary agreements were also concluded with Switzerland and Turkey.

The Balance Sheet of the Reserve Bank of India as at 30th June 1945 was as follows :—

\* Includes Cash and Short-term Securities.

\*\* Included in the above is the sum of Rs. 5,83,075-0-0 being the book value of Dead Stock at Rangoon.

if the number of such applicants is greater than one-fifth of the total number of shares assigned to the register, shall determine by lot the applicants to whom the shares shall be allotted.

(7) If the number of such applicants is less than one-fifth of the number of shares assigned to the register, the Central Board shall allot the remaining shares firstly, up to the limit of one-half of such remaining shares, to those applicants who have applied for less than five shares, and thereafter as to the balance to the various applicants in such manner as it may deem fair and equitable, having regard to the desirability of distributing the shares and the voting rights attached to them as widely as possible.

(8) Notwithstanding anything contained in sub-sections (6) and (7), the Central Board shall reserve for and allot to Government shares of the nominal value of two lakhs and twenty thousand rupees to be held by Government for disposal at par to Directors seeking to obtain the minimum share qualification required under sub-section (2) of section 11.

(9) If, after all applications have been met in accordance with the provisions of sub-sections (6), (7) and (8), any shares remain unallotted, they shall, notwithstanding anything contained in this section, be allotted to and taken up by Government, and shall be sold by the Central Government as soon as may be, at not less than par, to residents of the areas served by the register concerned.

(10) The Central Government shall have no right to exercise any vote under this Act by reason of any shares allotted to him under sub-section (8) or under sub-section (9).

(11) A Director shall not dispose of any shares obtained from Government under the provisions of sub-section (8) otherwise than by re-sale to Government at par, and Government shall be entitled to re-purchase at par all such shares held by any Director on his ceasing from any cause to hold office as Director.

**Increase and reduction of share capital**  
—(1) The share capital of the Bank may be increased or reduced on the recommendation of the Central Board, with the previous sanction of the Central Government and with the approval of the Central Legislature, to such extent and in such manner as may be determined by the Bank in general meeting.

(2) The additional shares so created shall be of the nominal value of one hundred rupees each and shall be assigned to the various registers in the same proportions as the shares constituting the original share capital.

(3) Such additional shares shall be fully paid up, and the price at which they may be issued shall be fixed by the Central Board with the previous sanction of the Central Government.

(4) The provisions of section 4 relating to the manner of allotment of the shares constituting the original share capital shall apply to the allotment of such additional shares, and existing shareholders shall not enjoy any preferential right to the allotment of such additional shares.

The Bank shall, as soon as may be, establish offices in Bombay, Calcutta, Delhi, Madras and Rangoon and a branch in London, and may establish branches or agencies in any other

place in India or, with the previous sanction of the Governor-General in Council, elsewhere.

The general superintendence and direction of the affairs and business of the Bank shall be entrusted to a Central Board of Directors which may exercise all powers and do all acts and things which may be exercised or done by the Bank and are not by this Act expressly directed or required to be done by the Bank in general meeting.

(1) The Central Board shall consist of the following Directors namely:—

(a) a Governor and two Deputy Governors, to be appointed by the Central Government after consideration of the recommendations made by the Board in that behalf.

(b) four Directors to be nominated by the Central Government.

(c) eight Directors to be elected on behalf of the shareholders on the various registers, in the manner provided in section 9 and in the following numbers, namely:—

- (i) for the Bombay register—two Directors;
- (ii) for the Calcutta register—two Directors;
- (iii) for the Delhi register—two Directors;
- (iv) for the Madras register—one Director;
- (v) for the Rangoon register—one Director;

and (d) one government official to be nominated by the Central Government

(2) The Governor and Deputy Governors shall devote their whole time to the affairs of the Bank, and shall receive such salaries and allowances as may be determined by the Central Board, with the approval of the Central Government.

(3) A Deputy Governor and the Director nominated under clause (d) of sub-section (1) may attend any meeting of the Central Board and take part in its deliberations but shall not be entitled to vote:

Provided that when the Governor is absent a Deputy Governor authorized by him in this behalf in writing may vote for him.

(4) The Governor and a Deputy Governor shall hold office for such term not exceeding five years as the Governor-General in Council may fix when appointing them, and shall be eligible for re-appointment.

A Director nominated under clause (b) or elected under clause (c) of sub-section (1) shall hold office for five years, or thereafter until his successor shall have been duly nominated or elected, and, subject to the provisions of section 10, shall be eligible for re-nomination or re-election.

A Director nominated under clause (d) of sub-section (1) shall hold office during the pleasure of the Central Government.

(5) No act or proceeding of the Board shall be questioned on the ground merely of the existence of any vacancy in, or any defect in the constitution of the Board.

**Local Boards.**—(1) Local Board shall be constituted for each of the five areas specified in the First Schedule, and shall consist of—

(a) five members elected from amongst themselves by the shareholders who are regis-

tered on the register for that area and are qualified to vote, and

(b) not more than three members nominated by the Central Board from amongst the shareholders registered on the register for that area, who may be nominated at any time:

Provided that the Central Board shall in exercising this power of nomination aim at securing the representation of territorial or economic interests not already represented, and in particular the representation of agricultural interests and the interests of co-operative banks.

(2) At an election of members of a Local Board for any area, any shareholder who has been registered on the register for that area, for a period of not less than six months ending with the date of the election, as holding five shares shall have one vote, and each shareholder so registered as having more than five shares shall have one vote for each five shares, but subject to a maximum of ten votes, and such votes may be exercised by proxy appointed on each occasion for that purpose, such proxy being himself a shareholder entitled to vote at the election and not being an employee of the Bank.

(3) The members of a Local Board shall hold office until they vacate it under sub-section (6) and, subject to the provisions of section 10 shall be eligible for re-election or re-nomination as the case may be.

(4) At any time within three months of the day on which the Directors representing the shareholders on any register are due to retire under the provisions of this Act, the Central Board shall direct an election to be held of members of the Local Board concerned, and shall specify a date from which the registration of transfer from and to the register shall be suspended until the election has taken place.

(5) On the issue of such direction the Local Board shall give notice of the date of the election and shall publish a list of shareholders holding five or more shares, with the dates on which their shares were registered, and with their registered addresses, and such list shall be available for purchase not less than three weeks before the date fixed for the election.

(6) The names of the persons elected shall be notified to the Central Board which shall thereupon proceed to make any nominations permitted by clause (b) of sub-section (1) it may then decide to make, and shall fix the date on which the outgoing members of the Local Board shall vacate office, and the incoming members shall be deemed to have assumed office on that date.

(7) The elected members of a Local Board shall as soon as may be after they have been elected, elect from amongst themselves one or two persons, as the case may be, to be Directors representing to the shareholders on the register for the area for which the Board is constituted.

(8) A Local Board shall advise the Central Board on such matters as may be generally or specifically referred to it and shall perform such duties as the Board may by regulations, delegate to it.

(1) No person may be a Director or a member of a Local Board who—

(a) is a salaried government official or a salaried official of a State in India, or

(b) is, or at any time has been, adjudicated an insolvent, or has suspended payment or has compounded with his creditors, or

(c) is found lunatic or becomes of unsound mind, or

(d) is an officer or employee of any bank, or

(e) is a director of any bank, other than a bank which is a society registered or deemed to be registered under the Co-operative Societies Act, 1912, or any other law for the time being in force in British India relating to co-operative societies.

(2) No two persons who are partners of the same mercantile firm, or are directors of the same private company, or one of whom is the general agent of or holds a power of procuration from the other, or from a mercantile firm of which the other is a partner, may be Directors or members of the same Local Board at the same time.

(3) Nothing in clause (a), clause (d) or clause (e) of sub-section (1) shall apply to the Governor, or to a Deputy Governor or to the Director nominated under clause (d) of sub-section (1) of section 8.

(1) The Central Government may remove from office the Governor, or a Deputy Governor or any nominated or elected Director:

Provided that in the case of a Director nominated or elected under clause (b) or clause (c) of sub-section (1) of section 8 this power shall be exercised only on a resolution passed by the Central Board in that behalf by a majority consisting of not less than nine Directors.

(2) A Director nominated or elected under clause (b) or clause (c) of sub-section (1) of section 8, and any member of a Local Board shall cease to hold office if, at any time after six months from the date of his nomination or election, he is not registered as a holder of unencumbered shares of the Bank of a nominal value of not less than five thousand rupees, or if he ceases to hold unencumbered shares of that value, and any such Director shall cease to hold office if without leave from the Governor-General in Council he absents himself from the consecutive meetings of the Central Board convened under sub-section (1) of section 13.

(3) The Central Government shall remove from office any Director, and the Central Board shall remove from office any member of a Local Board, if such Director or member becomes subject to any of the disqualifications specified in sub-section (1) or sub-section (2) of section 10.

(4) A Director or member of a Local Board removed or ceasing to hold office under the foregoing sub-sections shall not be eligible for re-appointment either as Director or as member of a Local Board until the expiry of the term for which his appointment was made.

(5) The appointment, nomination or election as Director or member of a Local Board of any person who is a member of the Indian Legislature or of a local Legislature shall be void

unless, within two months of the date of his appointment, nomination or election, he ceases to be such member, and, if any Director or member of a Local Board is elected or nominated as a member of any such Legislature, he shall cease to be a Director or member of the Local Board as from the date of such election or nomination, as the case may be.

(6) A Director may resign his office to the Governor-General in Council, and a member of a Local Board may resign his office to the Central Board, and on the acceptance of the resignation the office shall become vacant.

(1) If the Governor or a Deputy Governor by infirmity or otherwise is rendered incapable of executing his duties or is absent on leave or otherwise in circumstances not involving the vacation of his appointment, the Central Government may, after consideration of the recommendations made by the Central Board in this behalf, appoint another person to officiate for him, and such person may, notwithstanding anything contained in clause (d) of sub-section (1) of section 10, be an officer of the Bank.

(2) If an elected Director is for any reason unable to attend a particular meeting of the Central Board, the elected members of the Local Board of the area which he represents may elect one of their number to take his place, and for the purposes of that meeting the substitute so elected shall have all the powers of the absent Director.

(3) Where any casual vacancy in the office of any member of a Local Board occurs otherwise than by the occurrence of a vacancy in the office of a Director elected by the Local Board, the Central Board may nominate thereto any qualified person recommended by the elected members of the Local Board.

(4) Where any casual vacancy occurs in the office of a Director other than the vacancies provided for in sub-section (1), the vacancy shall be filled, in the case of a nominated Director by nomination, and in the case of an elected Director by election held in the manner provided in section 9 for the election of Directors:

Provided that before such election is made the resulting vacancy, if any, in the Local Board and any vacancy in the office of an elected member of such Board which may have been filled by a member nominated under sub-section (3) shall be filled by election held as nearly as may be in the manner provided in section 9 for the election of members of a Local Board.

(5) A person nominated or elected under this section to fill a casual vacancy shall, subject to the proviso contained in sub-section (4), hold office for the unexpired portion of the term of his predecessor.

(1) Meetings of the Central Board shall be convened by the Governor at least six times in each year and at least once in each quarter.

(2) Any three Directors may require the Governor to convene a meeting of the Central Board at any time and the Governor shall forthwith convene a meeting accordingly.

(3) The Governor, or in his absence the Deputy Governor authorized by the Governor under the proviso to sub-section (3) of section 8 to vote

for him, shall preside at meetings of the Central Board, and, in the event of an equality of votes, shall have a second or casting vote.

**General Meetings.**—(1) A general meeting (hereinafter in this Act referred to as the annual general meeting) shall be held annually at a place in British India where there is an office of the Bank within six weeks from the date on which the annual accounts of the Bank are closed, and a general meeting may be convened by the Central Board at any other time

Provided that the annual general meeting shall not be held on two consecutive occasions at any one place.

(2) The shareholders present at a general meeting shall be entitled to discuss the annual accounts, the report of the Central Board on the working of the Bank throughout the year and the auditors' report on the annual balance-sheet and accounts.

(3) Every shareholder shall be entitled to attend at any general meeting and each shareholder who has been registered on any register, for a period of not less than six months ending with the date of the meeting, as holding five or more shares shall have one vote and on a poll being demanded each shareholder so registered shall have one vote for each five shares, but subject to a maximum of ten votes and such votes may be exercised by proxy appointed on each occasion for that purpose, such proxy being himself a shareholder entitled to vote at the election and not being an officer or employee of the Bank.

**Central Board's First Constitution.**—(1) The following provisions shall apply to the first constitution of the Central Board, and, notwithstanding anything contained in section 8, the Central Board as constituted in accordance therewith shall be deemed to be duly constituted in accordance with this Act.

(2) The first Governor and the first Deputy Governor or Deputy Governors shall be appointed by the Central Government on its own initiative, and shall receive such salaries and allowances as it may determine.

(3) The first eight Directors representing the shareholders on the various registers shall be nominated by the Central Government from the areas served respectively by those registers, and the Directors so nominated shall hold office until their successors shall have been duly elected as provided in sub-section (4).

(4) On the expiry of each successive period of twelve months after the nomination of Directors under sub-section (3) two Directors shall be elected in the manner provided in section 9 until all the Directors so nominated have been replaced by elected Directors holding office in accordance with section 8. The register in respect of which the election is to be held shall be selected by lot from among the registers still represented by nominated Directors, and for the purposes of such lot the Madras and Rangoon registers shall be treated as if they comprised one register only.

As soon as may be after the commencement of this Act, the Central Board shall direct elections to be held and may make nominations, in order to constitute Local Boards in accordance with the provision of section 9, and the

members of such Local Boards shall hold office up to the date fixed under sub-section (6) of section 9 but shall not exercise any right under sub-section (7) of that section.

**Business.**—The Bank shall be authorized to carry on and transact the several kinds of business hereinafter specified, namely:—

(1) the accepting of money on deposit without interest from, and the collection of money for, the Secretary of State, the Central Government (the Federal Railway Authority, the Provincial Governments, the Government of Burma, the British Military Administration, Burma, the Burma Railway Board), States in India, local authorities, banks and any other persons;

(2) (a) the purchase, sale and rediscount of bills of exchange and promissory notes, drawn on India or Burma and payable in India or Burma and arising out of *bona fide* commercial or trade transactions bearing two or more good signatures, one of which shall be that of a scheduled bank or a Burma scheduled Bank, and maturing within ninety days from the date of such purchase or rediscount, exclusive of days of grace;

(b) the purchase, sale and rediscount of bills of exchange and promissory notes, drawn either in India or in Burma and payable either in India or in Burma and bearing two or more good signatures, one of which shall be that of a scheduled bank, a Burma scheduled bank, a provincial co-operative bank or a Burma co-operative bank, and drawn or issued for the purpose of financing seasonal agricultural operations or the marketing of crops, and maturing within nine months from the date of such purchase or rediscount, exclusive of days of grace;

(c) the purchase, sale and rediscount of bills of exchange and promissory notes drawn either in India or Burma and payable either in India or Burma and bearing the signature of a scheduled bank or a Burma scheduled Bank, and issued or drawn for the purpose of holding or trading in securities of the Central Government, a Provincial Government, or the Government of Burma, or such securities of States in India as may be specified in this behalf by the Central Government on the recommendation of the Central Board, and maturing within ninety days from the date of such purchase or rediscount, exclusive of days of grace;

(3) (a) the purchase from and sale to scheduled banks and Burma scheduled Banks of sterling in amounts of not less than the equivalent of one lakh of rupees;

(b) the purchase, sale and rediscount of bills of exchange (including treasury bills) drawn in or on any place in the United Kingdom and maturing within ninety days from the date of purchase, provided that no such purchase, sale or rediscount shall be made in India except with a scheduled bank or in Burma except with a scheduled bank or a Burma scheduled bank, and

(c) the keeping of balances with banks in the United Kingdom;

(4) the making to States in India, local authorities, scheduled banks, Burma scheduled banks, provincial co-operative banks, and

Burma co-operative banks, and the principal currency authority of Ceylon of loans and advances, repayable on demand or on the expiry of fixed periods not exceeding ninety days, against the security of—

(a) stocks, funds and securities (other than immovable property) in which a trustee is authorized to invest trust money by any Act of Parliament or by any law for the time being in force in British India or Burma;

(b) gold or silver or documents of title to the same;

(c) such bills of exchange and promissory notes as are eligible for purchase or rediscount by the Bank;

(d) promissory notes of any scheduled bank, Burma scheduled bank, provincial co-operative bank or Burma co-operative bank, supported by documents of title to goods which have been transferred, assigned, or pledged to any such bank as security for a cash credit or overdraft granted for *bona fide* commercial or trade transactions, or for the purpose of financing seasonal agricultural operations or the marketing of crops;

(5) the making to the Central Government, (the Federal Railway Authority, Provincial Governments, the Government of Burma, and the Burma Railway Board) of advances repayable in each case not later than three months from the date of the making of the advance;

(6) the issue of demand drafts made payable at its own offices or agencies and the making, issue and circulation of bank post bills;

(7) the purchase and sale of Government securities of the United Kingdom maturing within ten years from the date of such purchase;

(8) the purchase and sale of securities of the Central Government, a Provincial Government, or the Government of Burma of any maturity or of such securities of a local authority or such Indian States as may be specified in this behalf by the Central Government on the recommendation of the Central Board;

Provided that securities fully guaranteed as to principal and interest by any such Government, authority, or State shall be deemed for the purposes of this clause to be securities of such Government, authority or State:

Provided further that the amount of such securities held at any time in the Banking Department shall be so regulated that—

(a) the total value of such securities shall not exceed the aggregate amount of the share capital of the Bank, the Reserve Fund and three-fifths of the liabilities of the Banking Department in respect of deposits;

(b) the value of such securities maturing after one year shall not exceed the aggregate amount of the share capital of the Bank, the reserve fund and two-fifths of the liabilities of the Banking Department in respect of deposits; and

(c) the value of such securities maturing after ten years shall not exceed the aggregate amount of the share capital of the Bank and the Reserve Fund and one-fifth of the liabilities of the Banking Department in respect of deposits;

## Central Banking Functions.

(9) the custody of monies, securities and other articles of value, and the collection of the proceeds, whether principal, interest or dividends, of any such securities;

(10) the sale and realisation of all property, whether movable or immovable, which may in any way come into the possession of the Bank in satisfaction, or part satisfaction, of any of its claims;

(11) the acting as agent for the Secretary of State, the Central Government (or any Provincial Government or the Government of Burma, or any local authority or any Indian State) in the transaction of any of the following kinds of business, namely:—

- (a) the purchase and sale of gold or silver;
- (b) the purchase, sale, transfer and custody of bills of exchange, securities or shares in any company;
- (c) the collection of the proceeds, whether principal, interest or dividends, of any securities or shares;
- (d) the remittance of such proceeds, at the risk of the principal, by bills of exchange payable either in India or elsewhere;
- (e) the management of public debt;

(12) the purchase and sale of gold coin and bullion;

(13) the opening of an account with or the making of an agency agreement with, and the acting as agent or correspondent of, banks which are the principal currency authorities of any country under the law for the time being in force in that country or any international bank formed by such banks, and the investing of the funds of the Bank in the shares of any such international bank;

(14) the borrowing of money for a period not exceeding one month for the purposes of the business of the bank, and the giving of security for money so borrowed;

Provided that no money shall be borrowed under this clause from any person in India or Burma other than a scheduled Bank, or from any person outside India and Burma other than a bank which is the principal currency authority of any country under the law for the time being in force in that country;

Provided further that the total amount of such borrowings from persons in India and Burma shall not at any time exceed the amount of the share capital of the Bank;

(15) the making and issue of bank notes subject to the provisions of this Act and the making and issue of Burma notes in accordance with the law of Burma; and

(16) generally, the doing of all such matters and things as may be incidental to or consequential upon the exercise of its powers or then discharge of its duties under this Act and the law of Burma;

When, in the opinion of the Central Board or, where the powers and functions of the Central Board under this section have been delegated to a committee of the Central Board or to the Governor, in the opinion of such committee or of the Governor as the case may be, a special occasion has arisen making it necessary or expedient that action should be taken under this section for the purpose of regulating credit in the interests of Indian or Burman trade, commerce, industry and agriculture, the Bank may, notwithstanding any limitation contained in sub-clauses (a) and (b) of clause (2) or sub-clause (a) or (b) of clause (3) or clause (4) of section 17—

- (1) purchase, sell or discount any of the bills of exchange or promissory notes specified in sub-clause (a) or (b) of clause (2) or sub-clause (b) of clause (3) of that section though such bill or promissory note does not bear the signature of a scheduled bank, a Burma scheduled bank, a provincial co-operative bank or a Burma co-operative bank; or
- (2) purchase or sell sterling in amounts of not less than the equivalent of one lakh of rupees; or
- (3) make loans or advances repayable on demand or on the expiry of fixed periods not exceeding ninety days against the various forms of security specified in clause (4) of that section;

Provided that a committee of the Board or the Governor shall not, save in cases of special urgency, authorise action under this section without prior consultation with the Central Board and that in all cases action so authorized shall be reported to the members of the Central Board forthwith.

**Forbidden Business.**—Save as otherwise provided in sections 17, 18 and 45, the Bank may not—

- (1) engage in trade or otherwise have a direct interest in any commercial, industrial, or other undertaking except such interest as it may in any way acquire in the course of the satisfaction of any of its claims: provided that all such interests shall be disposed of at the earliest possible moment;
- (2) purchase its own shares or the shares of any other bank or of any company, or grant loans upon the security of any such shares;
- (3) advance money on mortgage of, or otherwise on the security of, immovable property or documents of title relating thereto, or become the owner of immovable property, except so far as is necessary for its own business premises and residences for its officers and servants;
- (4) make loans or advances;
- (5) draw or accept bills payable otherwise than on demand;
- (6) allow interest on deposits or current account.

## CENTRAL BANKING FUNCTIONS.

The Bank shall undertake to accept monies for account of the Secretary of State, the Central Government, the Provincial Governments and such States in India as may be approved of and notified by the Central Government in the Gazette of India, and to make payments up to the amount standing to the credit of their accounts respectively, and to carry out their exchange, remittance and other banking operations, including the management of the public debt.

(1) The Central Government and Provincial Governments shall entrust the Bank, on such conditions as may be agreed upon, with all their money, remittance, exchange and banking transactions in India, and, in particular, shall deposit free of interest all their cash balances with the Bank;

Provided that nothing in this sub-section shall prevent the Central Government or any Provincial Government from carrying on money transactions at places where the Bank has no branches or agencies, and the Central Government and Provincial Governments may hold at such places such balances as they may require.

(2) The Central Government and each Provincial Government shall entrust the Bank, on such conditions as may be agreed upon, with the management of the public debt and with the issue of any new loans.

(3) In the event of any failure to reach agreement on the conditions referred to in this section the Central Government shall decide what the conditions shall be.

(4) Any agreement made under this section to which the Central Government or any Provincial Government is a party shall be laid, as soon as may be after it is made, before the Central Legislature and in the case of a Provincial Government before the Provincial Legislature also.

**Bank Notes.**—(1) The Bank shall have the sole right to issue bank notes in British India, and may, for a period which shall be fixed by the Central Government on the recommendation of the Central Board, issue currency notes of the Government of India supplied to it by the Central Government, and the provisions of this Act applicable to bank notes shall, unless a contrary intention appears, apply to all currency notes of the Government of India issued either by the Central Government or by the Bank in like manner as if such currency notes were bank notes, and references in this Act to bank notes shall be construed accordingly.

(2) On and from the date on which this Chapter comes into force the Central Government shall not issue any currency notes.

**Issue Department.**—(1) The issue of bank notes shall be conducted by the Bank in an Issue Department which shall be separated and kept wholly distinct from the Banking Department, and the assets of the Issue Department shall not be subject to any liability other than the liabilities of the Issue Department as hereinafter defined in section 34.

(2) The Issue Department shall not issue bank notes to the Banking Department or to any other person except in exchange for other bank notes or for such coin, bullion or securities as are permitted by this Act to form part of the Reserve:

(3) In this section, references to bank notes include references to Burma notes.

Bank notes shall be of the denominational value of five rupees, ten rupees, fifty rupees, one hundred rupees, five hundred rupees, one thousand rupees and ten thousand rupees, un-

less otherwise directed by the Central Government on the recommendation of the Central Board.

The design, form and material of bank notes shall be such as may be approved by the Central Government after consideration of the recommendations made by the Central Board.

(1) Subject to the provisions of sub-section (2), every bank note shall be legal tender at any place in British India in payment or on account for the amount expressed therein, and shall be guaranteed by the Central Government.

(2) On recommendation of the Central Board the Central Government may, by notification in the Gazette of India, declare that, with effect from such date as may be specified in the notification, any series of bank notes of any denomination shall cease to be legal tender save at an office or agency of the Bank.

(3) Every Burma note shall be guaranteed by the Central Government.

The Bank shall not re-issue bank notes which are torn, defaced or excessively soiled.

(1) Notwithstanding anything contained in any enactment or rule of law to the contrary, no person shall of right be entitled to recover from the Central Government or the Bank, the value of any lost, stolen, mutilated or imperfect currency note of the Government of India, or bank note:

Provided that the Bank may, with the previous sanction of the Central Government, prescribe the circumstances in and the conditions and limitations subject to which the value of such currency notes or bank notes may be refunded as of grace and the rules made under this proviso shall be laid on the table of both Houses of the Central Legislature.

(2) The Provisions of sub-section (1) of this section, other than the proviso thereto, shall apply to Burma notes as they apply to bank notes; and refunds may be made as of grace in respect of Burma notes in accordance with the provision made in that behalf by the law of Burma.

The Bank shall not be liable to the payment of any stamp duty under the Indian Stamp Act, 1899, in respect of bank notes or Burma notes issued by it.

(1) If in the opinion of the Central Government the Bank fails to carry out any of the obligations imposed on it by or under this Act or by or under the law of Burma, the Central Government may, by notification in the Gazette of India, declare the Central Board to be superseded, and thereafter the general superintendence and direction of the affairs of the Bank shall be entrusted to such agency as the Central Government may determine, and such agency may exercise the powers and do all acts and things which may be exercised or done by the Central Board under this Act.

(2) When action is taken under this section the Central Government shall cause a full report of the circumstances leading to such action and of the action taken to be laid before the Central

Legislature at the earliest possible opportunity and in any case within three months from the issue of the notification superseding the Board.

No person in British India other than the Bank or, as expressly authorized by this Act, the Central Government shall draw, accept, make or, issue any bill of exchange, hundi, promissory note or engagement for the payment of money payable to bearer on demand, or borrow, owe or take up any sum or sums of money on the bills, hundis or notes payable to bearer on demand of any such person :

Provided that cheques or drafts, including hundis, payable to bearer on demand or otherwise may be drawn on a person's account with a banker, shroff or agent.

(1) Any person contravening the provisions of section 31 shall be punishable with fine which may extend to the amount of the bill, hundi, note or engagement in respect whereof the offence is committed.

(2) No prosecution under this section shall be instituted except on complaint made by the Bank.

#### Assets of the Issue Department.

(1) The assets of the Issue Department shall consist of gold coin, gold bullion, sterling securities, rupee coin and rupee securities to such aggregate amount as is not less than the total of the liabilities of the Issue Department as hereinafter defined.

(2) Of the total amount of the assets, not less than two-fifths shall consist of gold coin, gold bullion or sterling securities :

Provided that the amount of gold coin and gold bullion shall not at any time be less than forty crores of rupees in value.

(3) The remainder of the assets shall be held in rupee coin, Government of India rupee securities of any maturity and such bills of exchange and promissory notes payable in British India or in Burma, as are eligible for purchase by the Bank under sub-clause (a) or sub-clause (b) of clause (2) of section 17 or under clause (1) of section 18 :

Provided that the amount held in Government of India rupee securities shall not at any time exceed one-fourth of the total amount of the assets or fifty crores of rupees, whichever amount is greater, or, with the previous sanction of the Central Government, such amount plus a sum of ten crores of rupees.

An ordinance issued on February 8, 1941 called as the Reserve Bank of India (Amendment) Ordinance, 1941, omitted the proviso to sub-section (3).

(4) For the purposes of this section, gold coin and gold bullion shall be valued at 8.47512 grains of fine gold per rupee, rupee coin shall be valued at its face value, and securities shall be valued at the market rate for the time being obtaining.

(5) Of the gold coin and gold bullion held as assets, not less than seventeen-twentieths shall be held in British India, and all gold coin and gold bullion held as assets shall be held in the custody of the Bank or its agencies :

Provided that gold belonging to the Bank which is in any other bank or in any mint or treasury or in transit may be reckoned as part of the assets.

(6) For the purposes of this section, the sterling securities which may be held as part of the assets shall be securities of any of the following kinds payable in the currency of the United Kingdom, namely :—

(a) balances at the credit of the Issue Department with the Bank of England ;

(b) bills of exchange bearing two or more good signatures and drawn on and payable at any place in the United Kingdom and having a maturity not exceeding ninety days ;

(c) government securities of the United Kingdom maturing within five years :

Provided that, for a period of two years from the date on which this Chapter comes into force, any of such last mentioned securities may be securities maturing after five years, and the Bank may, at any time before the expiry of that period, dispose of such securities notwithstanding anything contained in section 17.

**Liabilities of the Issue Department.**—(1) The liabilities of the Issue Department shall be an amount equal to the total of the amount of the currency notes of the Government of India and bank notes for the time being in circulation.

(2) For the purposes of this section any currency note of the Government of India or bank note which has not been presented for payment within forty years from the 1st day of April following the date of its issue shall be deemed not to be in circulation, and the value thereof shall, notwithstanding anything contained in sub-section (2) of section 23, be paid by the Issue Department to Central Government or the Banking Department, as the case may be ; but any such note, if subsequently presented for payment, shall be paid by the Banking Department, and any such payment in the case of a currency note of the Government of India shall be debited to the Central Government.

In this section, references to bank notes include references to Burma notes.

On the date on which this Chapter comes into force the Issue Department shall take over from the Central Government the liability for all the currency notes of the Government of India for the time being in circulation and the Central Government shall transfer to the Issue Department gold coin, gold bullion, sterling securities, rupee coin and rupee securities to such aggregate amount as is equal to the total of the amount of the liability so transferred. The coin, bullion and securities shall be transferred in such proportion as to comply with the requirements of section 33 :

Provided that the total amount of the gold coin, gold bullion and sterling securities so transferred shall not be less than one-half of the whole amount transferred, and that the amount of rupee coin so transferred shall not exceed fifty crores of rupees :

the Central Board, in such amounts, at such fixed rate of exchange and subject only to such rate or rates of commission as may be approved by the Central Government and the Government of Burma.

Provided that so long as the Bank is bound under Part II of the India and Burma (Burma Monetary Arrangements) Order, 1937, to issue on demand India rupee coin in exchange for legal tender notes, the rate of exchange shall be at par.

(2) Burma assets and liabilities of the bank or any scheduled bank shall be valued, for the purposes of this Act, at the rate of exchange so fixed or, as the case may be at par.

#### Cash Reserves of Scheduled Banks.—

(1) Every bank included in the Second Schedule shall maintain with the Bank a balance the amount of which shall not at the close of business on any day be less than five per cent. of the demand liabilities and two per cent. of the time liabilities of such bank in India and Burma as shown in the return referred to in sub-section (2).

*Explanation.*—For the purposes of this section liabilities shall not include the paid-up capital or the reserves, or any credit balance in the profit and loss account of the bank or the amount of any loan taken from the Reserve Bank.

(2) Every scheduled bank shall send to the Central Government and to the Bank a return signed by two responsible officers of such bank showing—

(a) the amounts of its demand and time liabilities, respectively, in India,

(b) the amounts of its demand and time liabilities, respectively, in Burma,

(c) the total amount held in India in currency notes of the Government of India and bank notes,

(d) the total amount held in India in Burma notes,

(e) the total amount held in Burma in currency notes of the Government of India and bank notes,

(f) the total amount held in Burma notes,

(g) the amounts held in India in rupee coin and subsidiary coin, respectively,

(h) the amounts held in Burma in rupee coin, subsidiary coin and Burma coin, respectively,

(i) the amounts of advances made and of bills discounted in India, respectively,

(j) the amounts of advances made and of bills discounted in Burma, respectively, and

(k) the balance held at the Bank, at the close of business on each Friday, or if Friday is a public holiday under the Negotiable Instruments Act, 1881, at the close of business on the preceding working day; and such return shall be sent not later than two working days after the date to which it relates:

Provided that where the Bank is satisfied that the furnishing of a weekly return under this sub-section is impracticable in the case of

any scheduled bank by reason of the geographical position of the bank and its branches, the Bank may require such bank to furnish in lieu of a weekly return a monthly return to be despatched not later than fourteen days after the end of the month to which it relates giving the details specified in this sub-section in respect of such bank at the close of business for the month.

(3) If at the close of business on any day before the day fixed for the next return, the balance held at the Bank by any scheduled bank is below the minimum prescribed in sub-section (1), such scheduled bank shall be liable to pay to the Bank in respect of each such day penal interest at a rate three per cent. above the bank rate on the amount by which the balance with the Bank falls short of the prescribed minimum, and if on the day fixed for the next return such balance is still below the prescribed minimum as disclosed by this return, the rates of penal interest shall be increased to a rate five per cent. above the bank rate in respect of that day and each subsequent day on which the balance held at the Bank at the close of business on that day is below the prescribed minimum.

(3A) When under the provision of sub-section (3) penal interest at the increased rate of five per cent. above the bank rate has become payable by a scheduled bank, if thereafter on the day fixed for the next return the balance held at the Bank is still below the prescribed minimum as disclosed by this return,—

(a) every director and any managing agent, manager or secretary of the scheduled bank, who is knowingly and wilfully a party to the default, shall be punishable with fine which may extend to five hundred rupees and with a further fine which may extend to five hundred rupees for each subsequent day on which the default continues, and

(b) the Bank may prohibit the scheduled bank from receiving after the said day any fresh deposit,

and, if default is made by the scheduled bank in complying with the prohibition referred to in clause (b), every director and officer of the scheduled bank who is knowingly and wilfully a party to such default or who through negligence or otherwise contributes to such default shall in respect of each such default be punishable with fine which may extend to five hundred rupees and with a further fine which may extend to five hundred rupees for each day after the first on which a deposit received in contravention of such prohibition is retained by the scheduled bank.

(4) Any scheduled bank failing to comply with the provisions of sub-section (2) shall be liable to pay to the Central Government or to the Bank, as the case may be, or to each, a penalty of one hundred rupees for each day during with the failure continues.

(5) The penalties imposed by sub-sections (3) and (4) shall be payable on demand made by the Bank, and, in the event of a refusal by the defaulting bank to pay on such demand, may be levied by a direction of the principal Civil Court having jurisdiction in the area where an

office of the defaulting bank is situated, such direction to be made only upon application made in this behalf to the Court by the Central Government in the case of a failure to make a return under sub-section (2) to the Central Government, or by the Bank with the previous sanction of the Central Government in other cases.

(6) The Central Government shall, by notification in the Gazette of India, direct the inclusion in the Second Schedule of any bank not already so included which carries on the business of banking in British India and which—

(a) has a paid-up capital and reserves of an aggregate value of not less than five lakhs of rupees, and

(b) is a company as defined in clause (2) of section 2 of the Indian Companies Act, 1913, or a corporation or a company incorporated by or under any law in force in any place outside British India,

and shall by a like notification direct the exclusion from that Schedule of any scheduled bank the aggregate value of whose paid-up capital and reserves becomes at any time less than five lakhs of rupees, or which goes into liquidation or otherwise ceases to carry on banking business.

The Bank shall compile and shall cause to be published each week a consolidated statement showing the aggregate of the amounts under each clause of sub-section (2) of section 42 exhibited in the returns received from scheduled banks under that section and from Burma scheduled banks under the corresponding provisions of the law of Burma.

The Bank may require any provincial co-operative bank with which it has any transactions under section 17 to furnish the return referred to in sub-section (2) of section 42, and if it does so, the provisions of sub-sections (4) and (5) of section 42 shall apply so far as may be to such co-operative bank as if it were a scheduled bank.

**Agreement with the Imperial Bank.**—(1) The Bank shall enter into an agreement with the Imperial Bank of India which shall be subject to the approval of the Central Government, and shall be expressed to come into force on the date on which this Chapter comes into force and to remain in force for fifteen years and thereafter until terminated after five years' notice on either side, and shall further contain the provisions set forth in the Third Schedule.

Provided that the agreement shall be conditional on the maintenance of a sound financial position by the Imperial Bank and that if, in the opinion of the Central Board, the Imperial Bank has failed either to fulfil the conditions of the agreement or to maintain a sound financial position, the Central Board shall make a recommendation to the Central Government, and the Central Government, after making such further enquiry as it thinks fit, may issue instructions to the Imperial Bank with reference either to the agreement or to any matter which in its opinion involves the security of the Government monies or the assets of the Issue Department in the

custody of the Imperial Bank, and in the event of the Imperial Bank disregarding such instructions may declare the agreement to be terminated.

(2) The agreement referred to in sub-section (1) shall, as soon as may be after it is made, be laid before the Central Legislature.

(3) As from the commencement of Part III of the Government of India Act, 1935, references in the said agreement to the Governor-General in Council in relation to his general banking business, his accounts, and sums due to or from him, and references to Government in relation to receipts and disbursements dealt with on account of Government shall be construed as including references to the Provincial Governments and the Federal Railway Authority.

### General Provisions.

The Central Government shall transfer to the Bank rupee securities of the value of five crores of rupees to be allocated by the Bank to the Reserve Fund.

**Allocation of Surplus.**—After making provision for bad and doubtful debts, depreciation in assets, contributions to staff and superannuation funds, and such other contingencies as are usually provided for by bankers, and after payment out of the net annual profits of a cumulative dividend at such rate not exceeding five per cent. per annum on the share capital as the Central Government may fix at the time of the issue of shares, a portion of the surplus shall be allocated to the payment of an additional dividend to the shareholders calculated on the scale set forth in the Fourth Schedule and the balance of the surplus shall be paid to the Central Government:

Provided that if at any time the Reserve Fund is less than the share capital, not less than fifty lakhs of rupees of the surplus, or the whole of the surplus if less than that amount shall be allocated to the Reserve Fund.

**Schedule.**—(A) If the maximum rate of dividend fixed under section 47 is five per centum and so long as the share capital of the Bank is five crores of rupees—

(1) if the surplus does not exceed four crores of rupees—Nil

(2) if the surplus exceeds four crores of rupees—

(a) out of such excess upto the first one and a half crores of rupees a fraction equal to one sixtieth;

(b) out of each successive additional excess up to one and half crores of rupees—one-half of the fraction payable out of the next previous one and a half crores of excess.

Provided that the additional dividend shall be a multiple of one-eighth of one per cent. on the share capital, the amount of the surplus allocated thereto being rounded up or down to the nearest one-eighth of one per cent. on the share capital.

(B) If the maximum rate of dividend fixed under section 47 is below five per centum, the said fraction of one-sixtieth shall be increased in the ratio of the difference between six and the fixed rate to unity.

(C) When the original share capital of the Bank has been increased or reduced the said fraction of one-sixtieth shall be increased or diminished in proportion to the increase or reduction of the share capital.

Notwithstanding the provisions of section 47 of the Reserve Bank of India Act, 1934 (II of 1934) and of the Fourth Schedule to that Act (given above), the aggregate of the rate at which payment of the cumulative dividend and the additional payable to shareholders of the Bank under the said provisions is made shall not, so long as this Ordinance (the Reserve Bank of India limitation of Dividend Ordinance of 1943) remains in force, exceed four per cent. per annum on the share capital of the Bank; and the balance of the surplus of the net annual profits of the Bank shall be paid to the Central Government.

(1) Notwithstanding anything contained in the Indian Income-tax Act, 1922, or any other enactment for the time being in force relating to income-tax or super-tax, the Bank shall not be liable to pay income-tax or super-tax on any of its income, profits or gains.

Provided that nothing in this section shall affect the liability of any shareholder in respect of income-tax or super-tax.

(2) For the purposes of section 18 of the Indian Income-tax Act, 1922, and of any other relevant provision of that Act relating to the levy and refund of income-tax any dividend paid under section 47 of this Act shall be deemed to be "Interest on Securities."

The Bank shall make public from time to time the standard rate at which it is prepared to buy or re-discount bills of exchange or other commercial paper eligible for purchase under this Act.

(1) Not less than two auditors shall be elected and their remuneration fixed at the annual general meeting. The auditors may be shareholders, but no Director or other officer of the Bank shall be eligible during his continuance in office. Any auditor shall be eligible for re-election on quitting office.

(2) The first auditors of the Bank may be appointed by the Central Board before the first annual general meeting and, if so appointed, shall hold office only until that meeting. All auditors elected under this section shall severally be, and continue to act as, auditors until the first annual general meeting after their respective Elections:

Provided that any casual vacancy in the office of any auditor elected under this section may be filled by the Central Board.

Without prejudice to anything contained in section 50, the Central Government may at any time appoint the Auditor General or such auditors as he thinks fit to examine and report upon the accounts of the Bank.

Every auditor shall be supplied with a copy of the annual balance-sheet, and it shall be his duty to examine the same, together with the accounts and vouchers relating thereto; and every auditor shall have a list delivered to

him of all books kept by the Bank, and shall at all reasonable times have access to the books, accounts and other documents of the Bank, and may, at the expense of the Bank if appointed by it or at the expense of the Central Government if appointed by that Government employ accountants or other persons to assist him in investigating such accounts, and may, in relation to such accounts, examine any Director or officer of the Bank.

(3) The auditors shall make a report to the shareholders or to the Central Government as the case may be, upon the annual balance-sheet and accounts, and in every such report they shall state whether, in their opinion, the balance-sheet is a full and fair balance-sheet containing all necessary particulars and properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs, and, in case they have called for any explanation or information from the Central Board, whether it has been given and whether it is satisfactory. Any such report made to the shareholders shall be read together with the report of the Central Board, at the annual general meeting.

**Returns.**—(1) The Bank shall prepare and transmit to the Central Government a weekly account of the Issue Department and of the Banking Department in the form set out in the Fifth Schedule or in such other form as the Central Government may by notification in the Gazette of India, prescribe. The Governor-General in Council shall cause these accounts to be published weekly in the Gazette of India.

(2) The Bank shall also, within two months from the date on which the annual accounts of the Bank are closed, transmit to the Central Government a copy of the annual accounts signed by the Governor, the Deputy Governors and the Chief Accounting Officer of the Bank, and certified by the auditors, together with a report by the Central Board on the working of the Bank throughout the year, and the Central Government shall cause such accounts and report to be published in the Gazette of India.

(3) The Bank shall also, within two months from the date on which the annual accounts of the Bank are closed, transmit to the Central Government a statement showing the name, address and occupation of, and the number of shares held by, each shareholder of the Bank.

**Agricultural Credit Department.**—The Bank shall create a special Agricultural Credit Department the functions of which shall be—

(a) to maintain an expert staff to study all questions of agricultural credit and be available for consultation by the Central Government [Provincial Governments, the Government of Burma] provincial co-operative banks, Burma Co-operative Banks and other banking organisations.

(b) to co-ordinate the operations of the Bank in connection with agricultural credit and its relations with provincial co-operative

banks, Burma Co-operative banks and any other banks or organisations engaged in the business of agricultural credit.

(1) the Bank shall, at the earliest practicable date and in any case within three years from the date on which this Chapter comes into force, make to the Central Government a report, with proposals, if it thinks fit, for legislation, on the following matters, namely:—

(a) the extension of the provisions of this Act relating to scheduled banks to persons and firms, not being scheduled banks, engaged in British India in the business of banking and

(b) the improvement of the machinery for dealing with agricultural finance and methods for effecting a closer connection between agricultural enterprise and the operations of the Bank.

(2) When the Bank is of opinion that the international monetary position has become sufficiently clear and stable to make it possible to determine what will be suitable as a permanent basis for the Indian monetary system and to frame permanent measures for a monetary standard it shall report its views to the Central Government.

(1) The Local Board of any area may at any time require any shareholder who is registered on the register for that area to furnish to the Local Board within a specified time, not being less than thirty days, a declaration, in such form as the Central Board may by regulations prescribe, giving particulars of all shares on the said register of which he is the owner.

(2) If it appears from such declaration that any shareholder is not the owner of any shares which are registered in his name or that any shareholder, to whom the provisions of sub-section (4A) of section 4 apply, is the holder of shares in excess of a total nominal value of twenty thousand rupees, the Local Board may amend the register accordingly.

(3) If any person required to make a declaration under sub-section (1) fails to make such declaration within the specified time, the Local Board may make an entry against his name in the register recording such failure and directing that he shall have no right to vote, either under section 9 or section 14, by reason of the shares registered in his name on that register.

(4) Whoever makes a false statement in any declaration furnished by him under sub-section (1) shall be deemed to have committed the offence of giving false evidence defined in section 191 of the Indian Penal Code, and shall be punishable under the second paragraph of section 193 of that Code.

(5) Nothing contained in any declaration furnished under sub-section (1) shall operate to affect the Bank with notice of any trust, and no notice of any trust expressed, implied or constructive shall be entered on the register or be receivable by the Bank.

(6) Until Local Boards have been constituted under section 9 the powers of a Local Board under this section shall be exercised by the Central Board in respect of any area for which a Local Board has not been constituted.

(1) Nothing in the Indian Companies Act, 1913, shall apply to the Bank, and the Bank shall not be placed in liquidation save by order of the Central Government and in such manner as it may direct.

(2) In such event the Reserve Fund and surplus assets, if any, of the Bank shall be divided between the Central Government and shareholders in the proportion of seven-fifty per cent. and twenty-five per cent. respectively:

Provided that the total amount payable any shareholder under this section shall not exceed the paid-up value of the shares held by him by more than one per cent. for each year after the commencement of this Act subject to a maximum of twenty-five per cent.

(1) The Central Board may, with the previous sanction of the Central Government, make regulations consistent with this Act to provide for all matters for which provision is necessary or convenient for the purpose of giving effect to the provisions of this Act.

(2) In particular and without prejudice to the generality of the foregoing provision, such regulations may provide for all or any of the following matters, namely:—

(a) the holding and conduct of elections under this Act, including provisions for holding of any elections according to the principle of proportional representation by means of the single transferable vote;

(b) the final decision of doubts or disputes regarding the qualifications of candidates for election or regarding the validity of elections;

(c) the maintenance of the share register in the manner in which and the conditions subject to which shares may be held and transferred, and, generally, all matters relating to the rights and duties of shareholders;

(d) the manner in which general meetings shall be convened, the procedure to be followed thereat and the manner in which votes may be exercised;

(e) the manner in which notices may be served on behalf of the Bank upon shareholders or other persons;

(f) the manner in which the business of the Central Board shall be transacted, and the procedure to be followed at meetings thereof;

(g) the conduct of business of Local Boards and the delegation to such Boards of powers and functions;

(h) the delegation of powers and functions of the Central Board to the Governor, or Deputy Governors, Directors or officers of the Bank;

(i) the formation of Committees of the Central Board, the delegation of powers and functions of the Central Board to such Committees, and the conduct of business in such Committees;

(j) the constitution and management of staff and superannuation funds for the officers and servants of the Bank;

(k) the manner and form in which contracts binding on the Bank may be executed;

(l) the provision of an official seal of the Bank and the manner and effect of its use;

(m) the manner and form in which the balance-sheet of the Bank shall be drawn up and in which the accounts shall be maintained;

(n) the remuneration of Directors of the Bank;

(o) the relations of the scheduled banks with the Bank and the returns to be submitted by the scheduled banks to the Bank;

(p) the regulation of clearing-houses for the scheduled banks;

(q) the circumstances in which, and the conditions and limitations subject to which the value of any lost, stolen, mutilated or imperfect currency note of the Government of India or bank note may be refunded; and

(r) generally, for the efficient conduct of the business of the Bank.

(3) Copies of all regulations made under this section shall be available to the public on payment.

In the Indian Coinage Act, 1906, for section 11 the following section shall be substituted, namely:—

"11. Gold coins, coined at His Majesty's Royal Mint in England or at any mint established in pursuance of a proclamation of His Majesty as a branch of His Majesty's Royal Mint, shall not be legal tender in British India in payment or on account, but such coins shall be received by the Reserve Bank of India at its offices, branches and agencies in India at the bullion value of such coins calculated at the rate of 8.47612 grains troy of fine gold per rupee."

The Indian Paper Currency Act, 1923, the Indian Paper Currency (Amendment) Act, 1923, the Indian Paper Currency (Amendment) Act, 1925, and the Currency Act, 1927 are hereby repealed.

In sub-section (3) of section 11 of the Indian Companies Act, 1913, after the word "Royal" the words "Reserve Bank" shall be inserted.

The Reserve Bank began work with the opening of the financial year 1935-36. The Bank made a net profit of Rs. 53,42,100 for the year ended December 31, 1936.

## REPORT FOR THE YEAR ENDED JUNE

30th, 1945.

The report of the Central Board of Directors of the Reserve Bank of India for the year ended June 30, 1945 states that after payment of expenses of administration and provision for sundry liabilities and contingencies, the net profit amounts to Rs. 14,89,26,893-11-1. Of this amount the sum of Rs. 20,00,000 will be utilised for payment to shareholders of a dividend at the rate of four per cent., the maximum dividend permissible under the Ordinance issued on June 30, 1945, leaving a surplus of Rs. 14,69,26,893-11-1 for payment to the Central Government in accordance with the said section

as modified by the Ordinance. The net profit is higher than in the previous year by Rs. 4.63 crores owing to a further increase in the interest-bearing assets of the Bank.

The total number of shareholders decreased during the year from 48,292 to 46,640. The number of shares on the register of the Calcutta area, which had remained practically unchanged last year, rose and that on the Bombay register continued to increase at the expense of the remaining three areas.

**Notes and Coins.**—A new design of the ten rupee notes was introduced from October 5, 1944, while a new series of the Government of India one rupee notes was issued from December 1, 1944. As a first step in the rehabilitation of the country's economy in the liberated parts of Burma, a Proclamation relating to the status of the various types of currency circulating in Burma was issued by the Supreme Allied Commander of the South East Asia Command on May 1, 1945. With a view mainly to avoiding the disproportionate waste of metal involved in the use of nickel-brass alloy in the minting of the new series of the two anna, one anna and half-anna pieces introduced in 1942, and to replacing the new pice pieces, which have not been popular, the Government of India have decided to undertake a large recoinage programme as soon after the end of the war as possible. Under this programme, the nickel-brass alloy will be replaced by the pre-war cupro-nickel alloy, and a pice of new design will be issued. There is also a proposal to take advantage of the opportunity which might thus arise to introduce in India a decimal system of coinage which has replaced other forms in most of the countries of the world.

**Exchange.**—In the rupee sterling exchange market, banks quotations for telegraphic transfers continued unaltered at 1 sh. 5-31/32 d. selling and 1 sh. 6-1/32 d. buying. There was a shortage of sterling for ready delivery and to relieve this the Reserve Bank commenced selling ready sterling in limited quantities from October onwards at 1 sh. 5-63/64 d. Purchases of sterling for forward delivery continued and the net purchases by the Bank during the year amounted to £63,139,341-5-8 as compared with £101,493,921-4-10 in the preceding year. Repayments made by the Secretary of State on account of recoverable war expenditure and purchases made on behalf of His Majesty's Government and Allied Governments, after deducting the sterling requirements of the Central Government and the Government of Burma, left a net credit in favour of India of £240,195,000 at the end of the year as against £162,685,000 at the end of the previous year. Sales of currencies of countries outside the sterling area continued to be restricted but a more liberal policy was pursued in regard to demands for foreign exchange for purposes which were considered to be of value and importance to the country. The quotas under the import licensing system for the import of consumer goods from countries outside the sterling area were increased as a means of combating inflation and of meeting the extreme shortages arising from the severe restrictions on imports that had been imposed during the previous four years.

ment in respect of recoverable war expenditure incurred on behalf of the Allied Government. The percentage of gold and sterling securities to total notes issued stood higher at 93.66 against 92.51 at the close of the previous year. 'Rupee coin', which includes Government of India one rupee notes, increased from Rs. 12.81 crores to Rs. 15.20 crores at the end of June 1945. The Bank received from the Central Government Rs. 10 crores of 'rupee coin' during the year in terms of sub-section (3) in addition to Rs. 5 crores under sub-section (2) of section 36 of the Reserve Bank of India Act. 'Rupee securities' which had declined from Rs. 118.41 crores on the 30th June 1943 to Rs. 57.84 crores at the end of the last year remained unchanged at that level throughout the accounting year under review.

### BANKING DEPARTMENT.

The total of the balance sheet of the Banking Department more than doubled, rising from Rs. 201.69 crores to Rs. 425.89 crores mainly owing to a sharp increase under Central Government Deposits on the liabilities side, and a corresponding increase in 'Balances held abroad' on the assets side. The deposits of the Central Government increased by Rs. 212.72 crores to Rs. 277.97 crores. The deposits by banks fluctuated widely between Rs. 113.10 crores for the week ended the 3rd November 1944 and Rs. 67.27 crores for the week ended the 26th January 1945, largely reflecting the changing trade demand for funds, and stood at Rs. 80.19 crores at the end of June 1945. On the assets side, 'Balances held abroad' increased by Rs. 214.39 crores from Rs. 173.74 crores to Rs. 388.13 crores and 'Investments' by Rs. 10.34 crores to Rs. 21.45 crores while 'Bills Purchased and Discounted' were reduced from Rs. 2.59 crores to nil.

**Bretton Woods Agreement.**—The United Nations Monetary and financial conference held at Bretton Woods in July 1944 has recommended the setting up of two international monetary institutions, *viz.*, an International Monetary Fund and an International Bank for Reconstruction and Development. The former is to deal with the problem of short term equilibrium

in international balance of payments with a view to promoting reasonable exchange stability and the balanced growth of international trade consistently with the freedom of member countries to pursue their own domestic, social or political policies. The Bank is intended mainly to stimulate and where necessary to supplement the flow of international long-term capital for the purpose of assisting the reconstruction and development of member countries and the attainment of long-term international equilibrium. The two institutions are largely complementary in character and membership.

**Sterling Balances.**—The sterling assets of the Reserve Bank continued to increase, the net accretions during the accounting year being Rs. 420.39 crores as against Rs. 358.40 crores in the previous 12 months and Rs. 1,352.88 crores since the beginning of the war. The total holdings in the Issue and Banking Departments as on the 30th June 1945 amounted to £ 1066.85 million or Rs. 1,422.46 crores, which are maintained in the form of cash and investments in short-term British Government securities renewed from time to time. The problem represented by these balances is not one of monetary transfer or exchange but of transfer of resources of an amount equivalent in value to the balances. On the Indian side it is, firstly, the problem of gauging and developing the capacity to absorb the flow of goods, particularly capital goods from abroad, equivalent to the value of sterling balances, in industries and uses adapted to the requirements of demand, national needs and reasonable efficiency of production and, to this end, of speeding up the preparation of plans of development, private and Governmental, including the establishment of the conditions necessary for the creation and growth of industries. For the United Kingdom the problem is how best to establish either through direct trade with India or through trade with other countries the surplus of exports over imports necessary to meet the needs of India and the other creditors in addition to covering the gap in the balance of payments resulting from the loss of overseas investments and of income from these and other invisible exports.

## Trade.

India is an agricultural country with farming regarded by her people as a tradition rather than a business. She has, however, large deposits of raw materials vitally needed for development of industries. She is the biggest producer of raw cotton and tobacco except the U. A. S. She has the monopoly of jute and is the largest producer of sugar today. She is also the largest grower of oilseeds and has vast mineral resources, most of which have remained untapped. She possesses the world's largest reserves of richest class of iron ore and manganese ore. There is no lack of tungsten, chromium and cobalt which are necessary for manufacturing alloy steel. She also leads in mica and bauxite. Great discoveries of sulphur have been made recently. As regards the position of oil, India is relatively near to the world's largest oil deposits around the Persian Gulf and fresh resources of oil have recently been struck in the country also. These advantages have enabled her to make a steady progress towards industrialisation during the past quarter of a century.

If we look back on the course of agriculture over a long period of years, we shall note a striking development towards stability. In the days that are past, the outturn of the soil was subjected to periodic shocks from famines arising from the failure of the rains, when the export trade in these staples dwindled to small proportions. But the spread of irrigation has produced a great change, and though no doubt in future heavy losses may be incurred from the weakness of the monsoons, they are never likely to be as catastrophic as in such years as 1896-97 and 1899-1900. It is a well-known fact that 6,000,000 acres of additional land have come under irrigation in the last 20 years.

Twenty-five years ago in this country—the second largest producer of raw cotton in the world—long staple varieties of cotton were almost unknown. The position at the outbreak of the present war was that the Indian textile industry was meeting a considerable portion of its long staple requirements from indigenous production. The improvement in the quality of the crop was accompanied by an increase in the average yield per acre of the order of 30 per cent. during the same period. The record of jute has not, however, been one of uninterrupted progress. The steeper fall in the prices of raw jute during the world depression, accompanied by a cut in acreage, was estimated to have reduced the income of the average jute grower by about two-thirds. The plight of the cultivator no doubt improved later but the difficulties of the jute manufacturing industry resulted in a fall in the consumption of raw jute and this necessitated a large measure of State control in regard to the area under this crop.

The progress of sugarcane cultivation was limited solely by the capacity of the internal consumption of sugar to increase. The estimated production of cane in 1924-25 was less than 30 million tons, but by 1936-37 it had exceeded 67 million tons. This turned out to be far in excess of the effective demand and the manufacturing industry was in a state of over-production. As a result, the production of

cane came down to the low level of 36 million tons in 1938-39, but it improved to 48 million tons in the next year. A large proportion of the total area under sugarcane in India is now devoted to the improved *Coimbatore* varieties with a yield per acre higher than that of other varieties by more than 30 per cent.

The one agricultural commodity whose fortunes were not appreciably affected by the world depression was groundnut. A quadrupling of the area and a proportionate increase in output in the course of two decades is a record which is not shared by any other crop. This phenomenal increase in acreage is explained as due to the highly remunerative nature of the crop. The greater part of the increased production was exported; in the result groundnut had steadily displaced the other oilseeds from the export trade of India, and moreover by 1939 India had become first among the groundnut exporting countries of the world.

This story of continued progress has to be varied somewhat in relation to the production of foodgrains. The output of rice has obstinately refused to improve in spite of the best efforts of the Agricultural Department. About 4½ million acres of rice land were brought under improved varieties but this has no perceptible effect on the total production; actually, the output declined by something like 10 per cent. as between 1920-21 and 1940-41. The tendency to substitute other crops for rice was greatly accentuated by the availability of an abundant supply of cheaper varieties of imported rice.

The results of research have been applied with much greater success in the case of wheat. About a third of the total area under wheat has been brought under improved crop and in the course of 20 years the total output of wheat has increased from 6,000,000 tons in 1920-21 to 8,000,000 tons in 1940-41. The cost of production in India, however, remained very high in comparison with the other wheat-producing countries of the world and the Indian wheat grower was hit so hard by the fall in the world prices of wheat during the depression that in his interest a protective duty had to be imposed on imports of wheat.

The experience of the other cereals, particularly millets, was more or less similar to that of rice. The millet crops are concentrated in areas of very poor rainfall and it is in such areas that any improvement in cultivation is of peculiar difficulty.

Thus while India's economy is essentially agricultural, she ranks as one of the eight greatest industrial countries of the world. Although the basic raw materials of industry were present in great abundance in the country, it was not generally realized until the early twenties of this century that with the development of the necessary manufacturing processes it would be possible to effect a gradual displacement of various categories of imports by home-made articles. The pace of industrial development since that period has been greatly accelerated by the policy of active assistance pursued by the State both by way of granting tariff protection in deserving cases and of giving prefer-

ence to the products of Indian industry in purchasing Government requirements. The prospects of continued Government help and the anticipation of handsome profits encouraged a rapid flow of private capital into industry. New capital invested in joint stock enterprise alone in the inter-war period was some thing like Rs. 150 crores.

The outstanding instance of an industry which was greatly fostered by State encouragement is the iron and steel industry. The real growth of the industry took place in the last two decades, and it is remarkable that the industry recorded the most rapid progress during the world depression. Between the year 1932-33, when the regular collection of production figures started, and the year 1940-41, the steel ingot production of the country increased from less than 6 lakhs tons to more than 1.3 million tons. During the same period the output of finished steel jumped up from 359,000 tons to 925,000 tons. This development was accompanied by an expansion of the activities of various ancillary industries like foundries and the structural steel and wagon-building industries, the last-named of which had received an early promise of preference from the Railways.

The cotton textile industry recorded such good progress in the inter-war period that the share of imports in the cloth requirements of the country decreased from about four-fifths to much less than a fifth. In the same period the number of mills increased from 227 to 355, the number of spindles from 6.2 millions to 8.4 millions and the number of looms from 109,000 to 168,000. The output of yarn more than doubled in weight and the output of piecegoods nearly trebled in length. Many technical improvements were effected by the industry during the period, chief among these being the installation of modern machinery for spinning and weaving and the development of new bleaching, dyeing, printing and finishing processes. The jute manufacturing industry had, however, to face numerous troubles in the last twenty-five years but in the period taken as a whole the industry did show a fair degree of improvement.

The history of the sugar industry in India may be said to begin with the grant of protection to the industry. The output of sugar which was only about 300,000 tons in 1932-33 has now risen to over a million tons. The industry had to contend for a time against a number of difficulties arising from organisational weaknesses but to offset this there has been the steady improvement in the quality of cane which, in conjunction with the recent technological advances, has made possible a higher percentage recovery of sugar from cane.

The paper industry would have languished in the decade following the last war but for the protection granted to it in 1925. The duty imposed on imported wood pulp some years later was instrumental in the development of the production of indigenous bamboo pulp which is now the main raw material for paper making in the country. The production of fine writing and printing paper increased rapidly in the last decade. The same was the case with kraft or packing paper; but in the absence of

proper raw materials for making mechanical pulp all efforts made by the Forest Research Institute to produce newsprint in this country have not been crowned with success so far and the whole of our annual requirements totalling about 50,000 tons of newsprint has to be imported from abroad.

Among the industries that were struggling for existence in the early years but which stabilised themselves without direct outside assistance, first mention should be made of the cement industry. It staged a surprising recovery in the thirties on the basis of a mutual agreement and the greater part of the credit for the enormous increase in the consumption of this relatively new building material goes to the industry itself.

Steel, Sugar, Paper and Cement are four major instances of industries which have established themselves in the last twenty years but there are several smaller industries which have witnessed a striking advance in the past ten years. Among the comparatively new industries are paints, soap, matches and chemicals. At the outbreak of the present war although many important constituents, as for example the finer varieties of pigments for the paints industry and soda-ash for the soap industry had still to be imported from abroad, the position was that two-thirds of the country's requirements of paints and almost the whole of the supply of soap came from local production whereas at the end of the last war only a very small portion was so met in either case. This is largely true of the match industry as well.

The development of the Indian chemical industry was handicapped from the beginning by the absence of indigenous supplies of sulphur and in view of the fact that the industry had a measure of protection only for the short period of less than two years; the increase in the output of sulphuric acid by more than 60 per cent. in less than eight years should be considered a creditable achievement for the industry. The other acids also showed a similar improvement but in the case of salts the progress was not an uninterrupted one. The production of ammonium sulphate, to take one instance, which increased from 8,000 tons in 1932-33 to 18,000 tons in 1936-37 fell to 15,000 tons in 1938-39. The import difficulties created by the present war led to an expansion of the indigenous production of ammonium sulphate as evidenced by the output of 28,000 tons in 1940-41 but the industry will have to increase its capacity much more if the greatly enlarged internal demand is to be satisfied.

An obvious lacuna in the country's production of chemicals is in respect of alkalis, particularly soda-ash, the available supply of which remained the sole limiting factor in the expansion of the glass and soap industries in the country in recent years.

The growth of organised industry in India was necessarily accompanied by a number of developments not all of which have been beneficial to the country's economy. In the first place the increased output of factory products led to a gradual decline in handicrafts with the solitary exception of handloom weaving.

was higher during the year than in the preceding year, although shortages of power, skilled labour and transport affected production in certain industries.

Following the adoption of stabilisation measures earlier the rate of expansion in currency during 1944-45 showed a considerable decline, being 23 per cent. as against 37 per cent. in the preceding year. Easy money conditions continued to be the governing element in the financial markets. Gilt-edged prices remained firm almost throughout the year, while industrial share values, which experienced wide fluctuations also registered gains except in the cotton textile section. Speculation prevailed in the bullion market, reflecting the pressure of idle funds and paucity of floating stocks, particularly of silver, and the quotations showed a marked resilience in the face of favourable war news.

The scope of remedial measures instituted by Government since May 1943 to deal with the serious inflationary forces at work in the country's economy was widely extended during the year to provide for larger supplies of essential goods through free flow of imports, partial diversion to other sources of supply of the heavy defence requirements and allocation for civilian use of a part of the productive capacity reserved for defence requirements. Increased taxation and larger borrowing, sales of bullion and extension of commodity and price controls also assisted in establishing a measure of comparative equilibrium, a vital factor in holding inflationary spiral was the rapid return of confidence accompanying successive Allied victories. The prospects of an early successful termination of the war had favourable reactions on wide sectors of the economy. The stimulus of war has led to some industrial advance in the country and expansion of existing capacity in many industries, but the overall measures of industrialisation secured and the durable gain of productive capacity have been small relatively to many other Empire countries. Industrial and economic activity during the year under review was fairly well maintained, although expansion was restrained by shortages of transport, coal and skilled labour.

The food situation showed a marked improvement during the year, owing to a fuller implementation of the main recommendations of the Foodgrains Policy Committee relating to imports of Foodgrains, extension of rationing, statutory price control, larger production, etc. The general consumer goods position was alleviated by increased imports by Government and by releases of a wide range of goods in common use.

The overall supply position also benefited from receipts of materials under lend-lease and under the Mutual Aid Agreement concluded in August 1944 between India and Canada. The supply position is expected to improve further as a result of the institution in March 1945 of the system of open general licence for imports, liberalisation of quotas, and further prospects of betterment in the shipping and exchange situation. Early in 1945, an official mission was sent to the United Kingdom to explore ways and means of reducing the strain on the

country's civilian economy in view of the expected intensification of military operations in 1946.

The Calcutta index number of wholesale prices, after touching the peak of 353 in September 1943, gradually declined to 304 in March 1944, moving thereafter within a comparatively narrow range of 295 in May 1944 and 310 in March 1945; the average for 1944-45 stood lower at 303 compared with 321 in the previous year. The Bombay cost of living tended downwards after reaching a peak of 241 in August 1944 and stood at 217 in March 1945; it averaged 228 in 1944-45 compared with 229 in 1943-44 and 168 in 1942-43.

**Trend in International Trade.**—As mentioned in earlier reviews, war served the principal arteries of trade and led to new alignments canalising trade into blocs or groups more or less conditioned by military developments and the availability of trade routes. Moreover the restriction of the civilian economy at the expense of the war economy's activity affected foreign trade even more than internal trade owing to the need to conserve foreign exchange and available tonnage for essential war uses. In many countries, rise in the value of foreign trade was accounted for mainly by inflated prices. Also the goods exchanged internationally contained large amounts of inflation. In India, while the rise in export prices had been greater than in import prices, the quantum of exports declined by nearly 50 per cent.

**Balance of Trade.**—The value of published returns of India's foreign trade for drawing up a balance of payments statement for the country is impaired by the exclusion of the trade in defence account, which partly involves financial payments as between Government, and by the inclusion in the trade returns of lend-lease imports and reciprocal lend-lease exports on non-defence account which do not result in money transfers. Movements in the recorded foreign sea-borne trade continued, during the year under review, to be governed by war conditions modified by the recent policy of the Government of India which aims at larger supplies of consumer goods and of essential raw materials and machinery.

The table below carries forward by another year the comparison of the trade in merchandise on the basis of information veiled in statistical brown-out :—

(In crores of rupees).			
	1938-39	1943-44	1944-45
Exports (including re-exports) ..	109	210	228
Imports ..	152	119	201
Total.. ..	321	329	429
Balance of Trade ..	+17	+91	+27

The total value of India's foreign sea-borne trade, which had remained upward since the outbreak of the war owing mainly to the rise in commodity prices, reached a new high level of Rs. 429 crores as compared with Rs. 329 in the

During the year under review, India's favourable trade balance, being the excess of exports over imports without taking into account re-exports, was reduced to a paltry sum of Rs. 10,07 lakhs as compared with the grand level of Rs. 81,25 lakhs in the preceding year and was brought nearer to the pre-war level of Rs. 10,46 lakhs. The rising trend in imports which set in with November 1943 was re-inforced during the year and values of monthly imports exceeded those in the corresponding months of 1943-44 and 1942-43. The average monthly imports amounted to Rs. 16,75 crores in 1944-45, Rs. 9,9 crores in 1943-44 and Rs. 9,20 crores in 1942-43. The exports, on the other hand, showed only a moderate rise and were valued at Rs. 18,92 crores, Rs. 17,50 crores and Rs. 16,23 crores in 1944-45, 1943-44 and 1942-43 respectively.

Out of the total imports amounting to Rs. 200,98 crores the British Empire was responsible for sending 38.8 per cent. of the goods and the United Kingdom alone accounted for one-fifth of India's imports, the next important source within the Empire being Australia. The foreign countries sent goods worth Rs. 122,98 crores during the year under review and increased their share in the trade from 42.1 per cent. in the pre-war year 1938-39 to 61.2 per cent. in the year under review. In spite of the difficult dollar situation, the intake from the U.S.A. increased from 6.4 per cent. in 1938-39 to 25.1 per cent. in 1944-45. The next important supplier was Iran which sent goods, mainly oil, worth Rs. 49,33 lakhs in the year under review as against only Rs. 3,49 lakhs in 1938-39. Egypt stood third with a share of Rs. 17,38 lakhs, mainly of raw cotton.

Exports amounted to Rs. 211,05 crores for which the British Empire was the main customer, her share being 65.3 per cent. Exports to the United Kingdom totalled Rs. 65,71 lakhs as against Rs. 55,51 lakhs in 1938-39 but the share in the total trade declined from 34.1 per cent. to 29.2 per cent. Among foreign countries, the U.S.A. was the best customer with an absorption of goods worth Rs. 44,79 lakhs. Nearly half of this was on account of cashewnuts.

An analysis of the trade returns shows that imports exceeded exports in the case of foreign countries, while the trend was in the opposite direction in the case of Empire countries. India had a favourable balance of trade to the tune of Rs. 59,89 crores with the Empire countries and an adverse balance of Rs. 49,83 crores with foreign countries. The U.S.A., Egypt and Iran accounted between them for an adverse trade balance of Rs. 66,28; but the favourable balance of trade with other countries amounted to Rs. 16,45 lakhs. The net result was a favourable balance of trade, without taking into account re-exports, of Rs. 10,07 crores.

**Composition of Trade.**—The following table gives the composition of India's imports and exports (including re-exports) according to the main commodity groups during the years 1942-43 and 1943-44 and compares them with the pre-war year 1938-39. Although the exclusion of trade on Government account detracts from the value of these figures, they serve as a comparative guide to the distribution of trade over the constituent categories during the period under review.

	1938-39		1943-44		1944-45	
	Rs.		Rs.		Rs.	
	crores.	per cent.	crores.	per cent.	crores.	per cent.
Food .. .. .	24,00	15.7	7,08	6.0	18,85	9.4
Raw Materials .. .. .	38,18	21.7	64,08	54.4	117,26	58.3
Manufactured Articles .. .. .	92,79	60.8	44,95	38.2	62,47	31.8
<b>IMPORTS.</b>						
Food .. .. .	39,43	23.3	47,79	22.8	49,83	20.9
Raw Materials .. .. .	76,28	45.1	53,70	25.6	58,19	25.6
Manufactured Articles .. .. .	50,72	30.0	106,08	50.5	116,27	51.5
<b>EXPORTS.</b>						

The trade returns for 1944-45 fully reflected the change brought about by the war in the face of India's economy. Imports of manufactured goods occupying a key position in the sea-borne trade were relegated to the background their percentage to total trade being 60.8 per cent. in 1938-39, 38.2 per cent. in 1943-44 and 31.8 per cent. in the year under review. On the other hand, the growing demand for raw materials arising from broadening of the industrial activity in the country necessitated larger imports of raw materials which accounted for 58.3 per cent. in 1944-45 as compared with 54.4 per cent. in the preceding year and only 21.7 per cent. in the pre-war year. The arrivals of foodstuffs fluctuated widely owing to food shortage throughout the world. From a 15.7 per cent. share, imports of food were

reduced to a low level of six per cent. in 1943-44 but saw a smart recovery to 9.4 per cent. in the following year.

Prior to the war raw materials headed the export list; but their place was acquired by finished goods in the following six years. This could be partly attributed to India's position as an important supplier of cotton textiles and partly to the growing inquiry for other consumer goods of which there was a keen shortage in the East. Export of manufactured articles advanced from Rs. 50,72 lakhs in 1938-39 to Rs. 106,08 lakhs in 1943-44 and to a new high level of Rs. 116,27 lakhs in 1944-45, the respective percentages being 30, 59.5 and 51.5. Exports of raw materials were on a downward grade and were reduced to Rs. 58,19 lakhs in

the year under review compared with Rs. 53.70 lakhs in 1943-44 and Rs. 76.28 lakhs in the pre-war year. From a high level of 45.1 per cent. in the pre-war year, the share of raw materials to total trade dropped to 25.6 per cent.

in 1943-44 at which it was well held in the following year. Exports of food ruled quietly steady with their share at 23.3 per cent. in 1938-39, 22.8 per cent. in 1943-44 and 20.9 per cent. in the following year.

## II—IMPORTS OF MERCHANDISE.

India's import trade created history in 1944-45 by touching a new high figure of Rs. 200.98 lakhs, showing a rise of Rs. 83.20 lakhs over the preceding year. The substantial increase was partly due to the easing of the shipping position following the improvement in the war situation and the vigorous efforts of Government to ensure larger supplies of goods from abroad to prevent the Indian economy from disruption. Forty per cent. of the total imports were under oils valued at Rs. 80.70 lakhs showing a rise of Rs. 44.22 lakhs over the preceding year. Cotton and cotton waste

accounted for an intake of Rs. 21.01 lakhs being higher by Rs. 6.48 lakhs over the 1943-44 figure. Arrivals of metals and machinery ranked third in order of importance and amounted to Rs. 22.77 lakhs, showing a rise of Rs. 7.33 lakhs over the previous year. Imports of grain, pulses and flour were valued for the year at Rs. 8.09 lakhs as against hardly 31 lakhs in the previous two years. Sizeable gains were also noted under chemicals drugs and medicines, non-metallic mining and quarry products and paper and stationery.

The following table shows the comparative importance of the principal articles imported into British India :—

	IMPORTS			(In thousands of rupees)
	1942-43	1943-44	1944-45	Percentages on total imports.
Oils .. .. .	27,76.25	36,48.02	80,70.33	40.14
Cotton and cotton goods .. .. .	16,78.52	18,86.21	25,55.05	12.70

**Cotton Manufactures (Rs. 1,34 lakhs).—**The progressive deterioration in the imports of cotton yarn and manufactures witnessed since the beginning of the war cried halt in 1944-45 during which a small improvement was noticed. The total imports were valued at Rs. 154 lakhs as compared with Rs. 133 lakhs in 1942-43. Yarn accounted for an intake of Rs. 4 lakhs only showing a further drop from Rs. 12 lakhs in the preceding year and Rs. 16 lakhs in 1942-43. The improvement in the imports of piecegoods was shared by all the three varieties. Arrivals of grey, which had been reduced from Rs. 1,27,044 in 1942-43 to a nominal level of Rs. 4,674 in the following year, recovered to Rs. 64,357 in the year under review. Imports of white goods were valued at Rs. 9,60,983 in 1944-45 as against Rs. 7,29,996 in 1943-44 and Rs. 31,59,705 in 1942-43. Coloured goods were credited for imports valued at Rs. 22 lakhs being Rs. 5 lakhs in excess of the figure for 1943-44 but less than 1942-43 figure by Rs. 24

lakhs. Imports of cotton hosiery advanced sharply from the small value of Rs. 19,353 in 1943-44 to Rs. 1,83,232 in the following year, the intake for 1942-43 being Rs. 84,596.

Quantitatively, the imports of cotton piecegoods totalled 5.2 million yards in 1944-45 as against 3.7 million yards in the preceding year and 13.1 million yards in 1942-43. Of these, the United Kingdom accounted for 4.9 million yards as compared with 3.3 million yards in 1943-44 and 11.8 million yards in 1942-43. The intake of cotton twist and yarn totalled 192,000 lbs. reaching a fresh bottom in the history of the trade, the previous low levels being 630,000 lbs. in 1943-44 and 945,000 lbs. in 1942-43. Of this, the United Kingdom sent 45,000 lbs. valued at Rs. 1,21,000 in the year under review as compared with 66,000 lbs. valued at Rs. 1,36,000 in 1943-44 and 60,000 lbs. worth Rs. 1,41,000 in 1942-43.

The following are the details regarding imports of yarn in thousands of lbs. :—

Year ending 31st March	Counts 1-20	Counts 21-40	Counts above 40	Unspecified and other descrip- tions.	Total.
1942-43 .. .. .	126	10	204	605	945
1943-44 .. .. .	70	60	89	411	630
1944-45 .. .. .	3	13	30	146	192

Before the war, foreign cotton piecegoods held a front seat in order of importance in India's import trade. During the depression of 1928-29, British India imported a record quantity of 1,937 million yards of cotton piecegoods valued at Rs. 53,82 lakhs.

**Raw Cotton (Rs. 24,01 lakhs).—**A 40 per cent. increase in value and 20 per cent. rise in quantity was achieved by imports in raw cotton in 1944-45. The total intake in that year was 512,300 bales valued at Rs. 24,01 lakhs as compared with 426,100 bales worth Rs. 17,53 lakhs in 1943-44 and 490,600 bales valued at Rs. 15,42 lakhs in 1942-43. Imports from the U.S.A. were nil as in the preceding year; but arrivals from Egypt and Kenya showed handsome gains. The intake from Egypt in 1944-45 stood at 49,659 tons valued at Rs. 15,06 lakhs as compared with 43,431 tons valued at Rs. 10.21 lakhs in the preceding year and 36,329 tons worth Rs. 7,50 lakhs in 1942-43. Imports from Kenya totalled 30,490 tons valued at Rs. 6,79 lakhs in the year under review as against only 10,860 tons valued at Rs. 2,42 lakhs in 1943-44 and 24,515 tons worth Rs. 3,33 lakhs in 1942-43.

The wartime restrictions on the imports of foreign cotton continued during the year under review. The purchases of high quality types continued to be made by the Co-ordinating Committee in a pool from which allocations were made to India from time to time and these were regulated in India through the agency of the Controlled Purchase Scheme which was charged

with the duty of allocating it to the mills according to their requirements.

In February 1945, the question arose as to whether the import of Nyasaland sown-ginned cotton would adversely affect the growers of Indian cotton and the East India Cotton Association unanimously expressed the view to the Government of India, after inspecting the sample, that the import of such cotton would compete with Indian cotton and that India should not be made a dumping ground for the produce of sweated labour of the African growers at the expense of Indian cotton growers even during the war period.

**Wool, Raw and Manufactured (Rs. 3,15 Lakhs).—**Import trade in Wool, raw and manufactured, shrank further to Rs. 315 lakhs in 1944-45 as against Rs. 4,47 lakhs in the preceding year and Rs. 3,79 lakhs in 1942-43. The decline was rather sharp in the case of raw wool, which after being marked up from Rs. 2,96 lakhs in 1942-43 to Rs. 4,02 lakhs, fell sharply to Rs. 2,10 lakhs in the year under review. On the other hand, arrivals of woollen manufactures advanced sharply from Rs. 45 lakhs in 1943-44 to Rs. 1,05 lakhs in the following year, the value for 1942-43 being Rs. 83 lakhs. Of these, woollen piecegoods accounted for Rs. 44 lakhs as against Rs. 18 lakhs in 1943-44 and Rs. 29 lakhs in 1942-43, while woollen shawls and lohis disappeared completely from the trade returns during the past two years. As usual, Australia was the leading supplier of raw wool.

**Silk, Raw and Manufactured (Rs. 8,518).—**The trade in this line, which was greatly affected by the spread of the war to the Far East in 1942-43, the main source of supply of these goods came to a standstill in the year under review for which the import dwindled from Rs. 62,041 to Rs. 8,518. Imports of raw silk were worth Rs. 11 only as against Rs. 1,73,590 in 1942-43 and Rs. 25,427 in 1943-44, while silk piecegoods amounted to only Rs. 5,203 as compared with Rs. 12,851 in 1943-44 and Rs. 13,540 in 1942-43.

Owing to limited supply of the materials, there was keen competition among buyers and the Government of India introduced controls over the price and distribution of silk yarns and fabrics.

**Artificial Silk (Rs. 36 Lakhs).—**Owing to the spread of war in the far East, the main sources of these goods were cut off during 1942-43 and the total value of the imports of artificial silk, yarn and manufactures, had slumped heavily to Rs. 10 lakhs only in that year from Rs. 3.49 lakhs in 1941-42. In 1943-44, arrivals were reduced to Rs. 7 lakhs; but a sharp improvement to Rs. 36 lakhs was noted in the year under review. There was greater advance under artificial silk yarn the arrivals of which jumped up from Rs. 5 lakhs to Rs. 28 lakhs in the year under review while artificial silk piecegoods noted a rise of Rs. 7 lakhs to Rs. 8 lakhs.

The meagre flow of supplies and the resultant scramble for acquiring the goods led the Government of India to enforce control over the distribution and the prices of imported goods throughout the year.

**Iron and Steel (Rs. 3,56 lakhs).—**After dwindling from Rs. 2.81 lakhs in 1942-43 to Rs. 2.03 lakhs in the following year, imports of iron and steel made an impressive recovery to Rs. 3.56 lakhs in 1944-45. Quantitatively, imports in the year under review stood at 87,100 tons as against, 46,000 tons in the preceding year and 48,000 tons in 1942-43. Most of the increase was noticed under unprotected varieties of steel. The intake of protected iron and steel stood at 23,700 tons in 1944-45 being higher by 15,100 tons over 1943-44 figure and only 800 tons in excess of 1942-43 level. The war exigencies explained for the fall in imports which amounted to 118,400 tons in 1930-40. The highest imports for the past 25 years were recorded in 1928-29 when they amounted to 1,170,000 tons valued at Rs. 20.24 lakhs.

In spite of the advance in imports, arrival of steel bars continued to be extremely limited and remained unchanged at Rs. 3 lakhs in the year under review as against Rs. 8 lakhs in 1942-43. Beams, channels, pillars, girders and bridge work noted a minor improvement after declining sharply from Rs. 1,33,118 in 1942-43 to Rs. 3,250 in the following year and were valued at Rs. 10,656 only in 1944-45. There was practically no change to report under pipes and fittings which shrank slightly from Rs. 5,75,000 in 1942-43 and 1943-44 to Rs. 5,23,000 in 1944-45. But the sharp increase was recorded by imports of sheets and plates

which jumped up in value from Rs. 3,74,000 in the preceding year to Rs. 23,84,000 in 1944-45. Yet these imports were far below the level reached in 1942-43, the worst period of the war, for which they were valued at Rs. 64 lakhs.

**Other Metals (Rs. 2,96 lakhs).—**The continued demand on the metallurgical industries of the united nations for war requirements was responsible for carrying the wartime pattern of the trade under this head into one more year. Metals, other than iron and steel, and ores were imported to the extent of 26,100 tons valued at Rs. 2,96 lakhs in the year under review as compared with 22,124 tons worth Rs. 2.20 lakhs in the preceding year. Imports of metallic ores and scrap iron were halved from Rs. 11 lakhs to Rs. 5 lakhs, while as 75 per cent. rise was noted under metal manufactures other than iron and steel which were valued at Rs. 3.56 lakhs as against Rs. 2.03 lakhs in 1943-44.

The major improvement was noted under wrought copper, the imports of which mounted up from Rs. 1.20 lakhs to Rs. 1.83 lakhs and accounted for half the intake under this group. Arrivals of unwrought copper were reduced to zero after early progressive reduction from Rs. 59 lakhs in 1942-43 to Rs. 26 lakhs in 1943-44. Supplies of tin from abroad were valued at Rs. 76,682 in 1942-43 and Rs. 13,776 in 1943-44 but were nil in the year under review. Imports of Zinc shrank further in 1944-45 when they were valued at Rs. 4 lakhs only as compared with Rs. 8 lakhs in the preceding year and as much as Rs. 62 lakhs in 1942-43.

**Machinery and Millwork (Rs. 16.39 lakhs).—**The improvement in value of machinery and mill work noted in the preceding year became more marked in 1944-45 for which imports were valued at Rs. 16.29 lakhs as compared with Rs. 11.31 lakhs in the preceding year. Partially the increase in imports reflected the settled conditions in the market after the elimination of Japan and partly it could be traced to the sharp rise in prices. The improvement was shared by all kinds of machinery excepting the cotton textile machinery. After the sharp setback in 1943-44, the arrivals of machine tools noted a substantial advance, while electrical machinery was responsible for nearly 20 per cent. of the total intake in the year under review. The United States was the principal source of supply, followed by Japan in 1942 and the U.S.A. and other hard currency countries owing to the need for conserving the foreign exchange.

The following table shows the details of the main types of machinery for the past three years :—

	1942-43	1943-44	1944-45
	(Rs. in lakhs)		
Primemovers other than electrical .. ..	60	62	76
Electrical machinery .. ..	2.04	2.24	3.02
Machine tools, etc. .. ..	47	28	1.46
Cotton machinery .. ..	1.83	2.40	2.27
Jute machinery .. ..	35	24	55
Other textile machinery ..	60	54	66

The details of other types of machinery are not available; but the following information is available for the three years ended March 31, 1943:—

(Rupees in lakhs)  
1940-41 1941-42 1942-43

Agricultural machinery .. ..	23	30	8
Boilers .. ..	36	60	48
Mining .. ..	31	18	27
Oil crushing and refining .. ..	15	7	3
Paper mill .. ..	31	31	15
Refrigerating .. ..	18	20	3
Rice and flour mill .. ..	5	4	2
Saw mill .. ..	7	15	11
Sewing and knitting machines and parts .. ..	51	62	28
Sugar machinery .. ..	41	20	8
Tea machinery .. ..	16	11	12
Printing and lithographing presses .. ..	5	22	2
Beltting for machinery .. ..	62	68	48
Typewriters .. ..	24	24	18

**Vehicles (Rs. 1.78 lakhs).**—Imports of vehicles excluding locomotives for railways made a slight recovery to Rs. 1.78 lakhs in the year under review after facing a sharp setback from Rs. 5.71 lakhs in 1942-43 to Rs. 1.27 lakhs in the following year. The improvement was mainly due to larger arrivals of carriages and wagons and parts thereof and chassis. The former jumped up by three and a half times from Rs. 9 lakhs to Rs. 42 lakhs while the latter mounted up from Rs. 1½ lakhs to 15½ lakhs as against Rs. 2.04 lakhs in 1942-43. Imports of motor cars were reduced further from 41 cars valued at Rs. 1 lakh in 1943-44 to only 12 cars valued at Rs. 51,000 in 1944-45.

**Hardware (Rs. 1.29 lakhs).**—Imports of hardware, excluding cutlery and electroplated ware showed a rise of 37 per cent. in the year under review, for their value was Rs. 1.29 lakhs as compared with Rs. 94 lakhs in 1943-44 and Rs. 1.01 lakhs in 1942-43. The United Kingdom monopolised the bulk of the shipments; but imports from the U.S.A. and Canada trickled through the strainer of the import trade control.

**Chemicals Drugs and Medicines (Rs. 10.14 lakhs).**—Imports under this head staged a sharp recovery of 48 per cent. in the year under review and were valued at Rs. 10.14 lakhs after making a small progress from Rs. 5.91 lakhs in 1942-43 to Rs. 6.86 lakhs in 1943-44. Nearly three-fifths of the imports were in respect of chemicals which amounted to Rs. 6.88 lakhs in 1944-45 as compared with Rs. 4.97 lakhs in the preceding year and Rs. 4.67 lakhs in 1942-43. The arrivals of drugs and medicines were able to maintain the pace of progress of the preceding year when they were valued at Rs. 2.09 lakhs as against Rs. 1.47 lakhs in 1942-43 and Rs. 2.87 lakhs in 1944-45. The bulk of the imports were in respect of proprietary medicines.

**Paper and Pasteboard (Rs. 2.61 lakhs).**—Imports under this group showed handsome improvement in 1944-45 for which they were

valued at Rs. 2.61 lakhs as compared with Rs. 1.78 lakhs in the preceding year and Rs. 1.83 lakhs in 1942-43. The increase in the value of imports was almost wholly attributable to the higher imports of paper which amounted to Rs. 2.40 lakhs in the year under review as compared Rs. 1.63 lakhs in the preceding year and Rs. 1.65 lakhs in 1942-43. No details regarding the quantity or sources of supply are available; but it is believed that imports of paper in 1944-45 may be equal to the quantity arrived in 1942-43, i.e. around 0.4 million cwts. Canada and the U.S.A. were the principal sources of supply.

Owing to acute shortage of supply, the official and non-official efforts were directed towards maximising production and reducing consumption. The paper mills in the country were provided with higher coal allotment but were able to turn out 1,472,320 cwts. of paper in 1944-45 as compared with 1,752,160 cwts. in the preceding year. The private consumption of paper was subjected to a rigid control under the Paper Control Economy Order which was issued in June 1944 when the first signs of falling production were noted.

No information is available regarding imports of newsprint which were about 45,000 tons a year in the pre-war years. In 1941, the News Print Control Order was issued and the stocks were frozen and rationed. The price of newspapers was controlled in November 1943. Owing to modest improvement in imports in the year under review, the Government of India raised the quota of newspapers by one-third with effect from August 1, 1944.

**Liquors (Rs. 1.08 lakhs).**—The small improvement noted in imports of liquors in 1943-44 was followed by a sharp setback in the following year when imports under this head were valued at Rs. 1.08 lakhs being less than the 1943-44 figure by Rs. 16 lakhs. The intake of ale, beer and porter showed a gain of Rs. 2 lakhs and amounted to Rs. 14 lakhs. Spirit which accounted for nearly three-fourth of the imports of liquor, recorded a fall in value from Rs. 1.00 lakhs to Rs. 85 lakhs, while imports of wines were reduced from Rs. 13 lakhs to Rs. 9 lakhs.

No quantitative figures are available from the trade returns; but the monthly survey of Business conditions in India reported that imports totalled 1,061,000 gallons in 1944-45 as compared with 910,000 gallons in the preceding year.

**Sugar (Rs. 1.864).**—The import trade in sugar, which occupied a key position before the introduction of protection gradually dwindled until it reached a negligible value of Rs. 1,864 representing a small consignment in May 1944 as compared with 21 tons valued at Rs. 12,931 in the preceding year. The imports in 1942-43, the year which saw the conquest of the sugar exporting countries in the east by Japan were valued at Rs. 1,87,314 and totalled 563 tons as compared with 937,000 tons worth Rs. 16,09 lakhs in 1928-29.

**Provisions and Oilmen's Stores (Rs. 1.21 lakhs).**—After reaching the bottom at Rs. 55 lakhs in 1943-44 the imports of provisions and

oilmen's stores made an impressive upswing to reach Rs. 1,21 lakhs in the year under review. This was attributed to the large scale arrivals of condensed and preserved milk and farinaceous and patent foods due to extreme shortage of fresh milk. Imports of condensed and preserved milk jumped up by five times from Rs. 16 lakhs to Rs. 19 lakhs while those of farinaceous and patent foods mounted up from Rs. 12 lakhs in 1913-14 to Rs. 33 lakhs in the year under review. A small improvement of Rs. 3 lakhs was noted under canned and bottled provisions which were valued at Rs. 11,39,679 in 1911-15. Biscuits and cakes, which formed an important item in this group, accounted for imports worth Rs. 6,675 only as compared with Rs. 12,141 in 1913-14.

**Dyes and Colours (Rs. 7,92 Lakhs).**—The tightening of restrictions on imports of dyes and colours from non-britling areas resulted in reduction of imports from Rs. 8,20 lakh in 1913-14 to Rs. 7,92 lakhs in the following year. The decline was more in dyes and was partly offset by an increase in imports of paints and colours. Imports of alizarine dye were valued at Rs. 5 lakhs only showing a drop of Rs. 13 lakh over the preceding year, while consignments of other coal tar dyes received a sharp setback of Rs. 32

lakhs and were valued at Rs. 6,96 lakhs in 1914-15. Pottery and colours accounted for an intake of Rs. 65 lakhs as compared with Rs. 46 lakhs in the preceding year, to which they had dropped from Rs. 61 lakhs in 1912-13.

**Other Articles.**—The following table shows the trend of imports in respect of some of the other articles of importance:—

	(Rs. in lakhs) 1912-13.	(Rs. in lakhs) 1913-14.	(Rs. in lakhs) 1914-15.
Dyes .. ..	77	62	129
Biscuits .. ..	54	71	74
Cloves .. ..	84	21	69

Cement .. ..	7	616	1
Sax .. ..	7	2	2

### III.—EXPORTS OF MERCHANDISE

Exports of merchandise from British India during 1914-15 were influenced mainly by the need to consolidate the home front in the face of the rising tide of inflation and by the shipping space. Yet, the total export trade in the year under review reached a new high level owing mainly to the increase in the prices of exportable goods.

Out of Rs. 211,05 lakhs of total exports, three commodities, namely, jute, cotton and tea accounted for nearly three-fourths of the shipments. Jute, raw and manufactured, showed a

substantial increase over the preceding year and grew at 15 per cent. in importance. The total shipments represented a little over 22 per cent. of the total value of exports in 1914-15 as against 29 per cent. in the preceding year. Exports of raw cotton were approximately the same; but those of cotton manufactures received a sharp setback and their share was a little less than 18 per cent. as compared with 21.3 per cent. in the preceding year. Exports of tea were almost steady. Importance of seeds in the trade was reduced further; but the trade in other articles showed sizeable advance.

#### EXPORTS

(In thousands of rupees)

	1912-13.	1913-14.	1914-15.	Percentage on total exports of merchandise in 1914-15.

**Jute, Raw and Manufactured (Rs. 67,92 lakhs).**—Exports under this head accounted for 23 per cent. of the total Indian exports in 1944-45 as compared with 30 per cent. in the previous year following further improvement from Rs. 57,78 lakhs to Rs. 67,92 lakhs as compared with Rs. 45,39 lakhs being the value of the combined shipments of raw and manufactured jute in 1942-43.

Exports of jute manufactures advanced by 11 per cent. in volume and 22 per cent. in value and totalled 708,184 tons valued at Rs. 60,42 lakhs in 1944-45 as compared with 634,296 tons worth Rs. 49,47 lakhs in the preceding year. Shipments of gunny bags amounted to Rs. 24,50 lakhs showing a gain of Rs. 4,71 lakhs over 1943-44 figure, while exports of gunny cloth advanced from Rs. 28,97 lakhs in 1943-44 to Rs. 34,45 lakhs in the following year, the gain being more than 90 per cent. over 1942-43 shipments which were valued at Rs. 18,54 lakhs.

On the other hand, exports of raw jute shrank further from 177,400 tons valued at Rs. 8,33 lakhs to 160,200 tons worth Rs. 7,50 lakhs in the year under review.

The total supplies of raw jute at the commencement of the 1944-45 season were estimated to be 41.3 lakh bales and the outturn of the 1943-44 season at 54.93 lakh bales making a total available supply of 96.23 lakh bales. The total consumption was placed at 83 lakh bales. But the prospect of a 22 per cent. increase in the current season's crop was mainly responsible for a downward trend in prices. The index number of average raw jute, which ruled at 123 in March 1944 moved up to 126 in the following month and then gradually reacted to 117 in

October at which it remained unchanged for the rest of the year. Although the prices of raw jute remained unofficially controlled since July 1943, they were given official recognition only from April 1944 when a comprehensive order was issued fixing ceilings for all grades of jute as well as manufactures.

The year was notable for the institution of a complete control over the jute industry which continued to be handicapped by shortage of coal fuel and requisitioning of certain units. The Indian Jute mills' Association introduced a scheme whereby the loss of production of all requisitioned mills could be made good by increased output in other units. The total production of the industry showed a small improvement of 28,300 tons over the previous year and was placed at 975,000 tons for the year under review. Stocks of hessian cloth and bags which stood at 44.5 crores yards in March 1944 steadily declined to 26.3 crores yards by December and then gradually went up to 29.1 crores yards in March 1945. The same trend was noticed in the case of sacking cloth and bags, stocks of which were placed at 23.6 crores yards at the end of March 1945 as against 29.4 crores yards and 30.9 crores yards for April and May 1944 respectively.

Reports from overseas consuming centres indicated acute shortage of jute goods for packing and other purposes. In the United Kingdom, imported jute goods served to meet urgent requirements only. Out of the remaining two important customers of this country, the U.S.A. ceased to be a free market for both raw and manufactured jute; but the potential demand was estimated to be 700 million yards per year. The grain trade in Argentine was adversely

hit by shortage of jute packing following the supplies from India being equivalent to 55 per cent. of that country's total requirements.

**Cotton, Raw, (Rs. 6.93 lakhs).—**After a downward trend as the result of the war developments, exports of raw cotton saw a welcome turn in the trend in 1944-45 during which the overseas demand broadened from 252,099 bales valued at Rs. 6.36 lakhs to 319,000 bales worth Rs. 6.93 lakhs. The United Kingdom absorbed 73 per cent. of the exports and was responsible for taking 234,000 bales of Indian cotton as compared with 180,000 bales in 1943-44. The total intake of cotton from India by the British Empire was 250,099 bales as against 216,000 bales in 1943-44. Other shipments totalled 69,000 bales as against 66,000 bales. India's former customers in Europe and the Far East continued out of the picture of the export trade.

The area under cotton crops in 1944-45 season was officially estimated at 14,744,000 acres yielding 3,543,000 bales representing a drastic cut of 25 per cent. in acreage and 31 per cent. in yield over the previous year. The reduction in output was attributable to the statutory restrictions on growth of cotton in provinces like Bombay, a vigorous campaign for growing food in several other provinces and unfavourable weather conditions at the sowing time in many of the major cotton growing areas. The proportion of medium and long staple lengths to total output declined from 62 per cent. in 1943-44 to 45 per cent. in the year under review.

The cotton trade placed the season's world supply of Indian cotton, including the previous season's carryover of 4,050,000 bales at 8,350,000 bales compared with 8,950,000 bales for 1943-44. The season's mill consumption of Indian cotton was the second best in the history of the commodity at 4,245,000 bales compared with 4,168,000 bales in 1943-44. While the total world consumption of the commodity was estimated at 4,690,000 bales as against 4,579,000 bales in the preceding season. The world's carryover of Indian cotton on September 1, 1945 was placed at 3,000,000 bales showing a reduction of 450,000 bales over the corresponding day a year ago. Of this, about 3,475,000 bales, comprised of old and new crop short and medium staple cottons, represented the carryover in India showing an overall reduction of 475,000 bales in the carryover.

**Cotton Manufactures (Rs. 37.60 lakhs).—**The acute shortage of cotton goods within the country brought about a sharp reduction in the export of cotton yarns and manufactures from Rs. 42.62 lakhs to Rs. 37.60 lakhs. The value of cotton twist and yarn for 1944-45 was Rs. 2.23 lakhs showing a decline of Rs. 69 lakhs. While exports of cotton piecegoods shrunk by Rs. 278 lakhs to Rs. 33.79 lakhs. Quantitatively exports of yarn declined from 19,078,000 lbs. in 1943-44 to 16,918,000 lbs. in the following year, while these of cotton piecegoods were reduced from 462.3 million yards in 1943-44 to 414.9 million yards in the following year representing nearly a 50 per cent. cut in the record shipment touched in 1942-43.

As in the previous year, the working of the industry was subject to governmental control under the cotton cloth and yarn control. Yet

the black markets continued to flourish and even the measures to control the management of some of the mills failed to achieve the objective. Complaints were also received at the beginning of the year regarding exports of inferior cotton goods at fabulous prices. The Government of India, therefore, inaugurated a scheme for restricting profit margin on export of cloth and yarn and also for regulating their quality. A certain percentage of the profit margin was taken as a cess fee for financing research in textile technology.

In the domestic market, production was reduced owing to shortage of coal and was placed at 4,695.1 million yards representing a drop of 4.2 per cent. over the all time record output reached in the preceding year. On the other hand, the demand on civilian account continued to broaden with the result that the distribution machinery was tightened by directing the mills to distribute their output to only those holding connections in the three years ended 1942 and by evolving a scheme for retail distribution including rationing of cloth in certain cities. The question of prices was reviewed by the Textile control Board periodically and the gradual reduction in cloth prices was faithfully reflected in the drop of the index number of wholesale prices of cotton manufactures in India from 381 in January 1944 and 324 for April to 274 for March 1945.

**Tea (Rs. 38.12 lakhs).—**Next to jute manufactures, tea occupied unique importance in the export trade of this country. Exports of tea were subjected, as in the past to governmental regulation. The Government of India had fixed quota in 1943 at 421.56 million lbs., i.e., 110 per cent. of the standard export quota; but lowered it for 1944 at 364.03 million lbs. being 95 per cent. of India's standard export figure owing to the early estimates of reduced output subject, however, to upward revision later on in the light of the crop outlook. Following the clamour for Indian tea among overseas buyers, the export quota was subsequently raised by 15 million lbs. to 379.41 million lbs. being equivalent to 99 per cent. of India's standard export figure.

Under an arrangement between the Government of India and the British Ministry of Food, the latter was given the monopoly for buying tea for export. The price arrangement arrived at in the first year of the war continued to remain in force. By this arrangement, tea planters were paid the average prices for the year 1935, 1937 and 1938 plus allowances for increase in the production costs since the end of the basic period. In 1944, the Food Ministry agreed to pay 5 d. per lb. of tea more than the basic price of each estate in India.

Exports of tea amounted to 415,455,000 lbs. valued at Rs. 38.12 lakhs in the year under review as compared with 403,162,000 lbs. valued at Rs. 37.19 lakhs in 1943-44. The United Kingdom and Ireland were India's best customers having absorbed between them nearly 63 per cent. of the total shipments, i.e., 262,265,000 lbs. as compared with 269,805,000 lbs. in 1943-44 and 307,995,000 lbs. in 1938-39. Canada and the U.S.A. accounted, on the other hand, for continued improvement in their takings

during the war period. Exports to the former totalled 41,281,000 lbs. in 1944-45 as against 32,822,000 lbs. in the preceding year and presented an increase of 170 per cent. over the 1938-39 share. Shipments to the U.S.A. were reduced from 59,966,000 lbs. to 51,433,000 lbs., but still stood considerably high above the pre-war figure of only 8,096,000 lbs.

The Indian tea industry which is mainly concentrated in Assam and Bengal passed through an anxious period owing to the political and economic conditions created by the fighting on the Assam border and numerous shortages in respect of labour, coal, fertilisers, food, transport and managerial personnel. Yet, the area under plantation in 1944 was 840,644 acres being approximately the same as in 1939 and showed a full of only 1,657 acres over the preceding year. But the output showed a sharp decline of 8 per cent. from 554,830,000 lbs. in 1943 to 509,500,000 lbs. in 1944. Of this, the tea gardens in Northern India produced 409,26 million lbs. compared with 452.33 million lbs. in 1943.

The average wholesale price of tea for internal consumption remained upward, the rise being from as. 9-8 per lb. for March 1944 to as. 13-2 in the same month a year after. The annual average prices of tea sold at Calcutta auctions for consumption in India were as. 10-7 per lb. in 1944 as compared with as. 9-8 in 1943. Rs. 1-0-10 in 1942 and only as. 4-4 in 1939. On the other hand, the prices of tea for exports were stabilised at as. 13-9 for clean common broken pekoe and as. 14-11 for medium broken after they were stepped up at the end of June from as. 12-5 and as. 13-7 per lb. respectively.

**Oilseeds (Rs. 10.53 Lakhs).**—The gain in value of exported oilseeds noted in the preceding year was wiped in the year under review during which exports totalled Rs. 10.53 lakhs as compared with Rs. 11.15 lakhs in 1943-44 and Rs. 10.52 lakhs in 1942-43. Quantitatively, however, the outward shipments mounted up from 323,399 tons in 1943-44 to 340,927 tons in the following year. There was very good demand for Indian oilseeds from all over the world owing to acute shortage of fats and oils, but the exports from India were regulated by the Central Government after having due regard to the requirements at home. The British Ministry of food was the main overseas buyer during the year as in the past.

The Indian linseed crop of the season 1943-44, which was mostly marketed in the year under review, was estimated at 395,000 tons as against 410,000 tons in the preceding season. No quantitative figures are available; but exports, which had declined from Rs. 3.10 lakhs in 1942-43 to Rs. 1.10 lakhs in the following year, advanced to Rs. 2.74 lakhs in the year under review. Shipments from India in 1942-43 were of the order of 161,000 tons. Most of the exports took place through the British Ministry of food. The price trend was upward.

The production of groundnuts which normally accounted for 3 million tons out of total output of 7½ million tons oilseeds was estimated at 3,560,000 tons for 1944-45 showing a reduction of 6.9 per cent. over the preceding year. No quantitative figures regarding exports are available; but their value amounted to Rs. 6.31

lakhs representing 60 per cent. of the total shipments of oilseeds and showed a fall of Rs. 1.91 lakhs over the preceding year. The United Kingdom was the main customer; but small shipments were also sent to South Africa, Canada and Australia.

Following the shortage of food supplies within the country there was intense agitation for banning totally the exports of groundnut and its oil which are regarded as subsidiary foods. Several commercial bodies led by the Federation of Indian Chambers of Commerce and Industry pleaded towards the end of 1943-44 for a complete ban on exports of groundnuts till the end of food emergency. But the fact that groundnuts cannot take the place of pulses and millets to an unlimited extent without a radical change in the habits of the people and the limitations on the storage capacity, coupled with the acute shortage of fats and oils in the overseas countries, particularly Britain, influenced Government's decision to allow exports to limited quantities which were allocated to the quota holders.

The prices of groundnut ruled more or less steady in the year under review. The British Ministry of Food, which was the principal buyer, lowered its buying limit to £30 at the beginning of 1944.

Exports of castor seed continued to decline and stood at Rs. 20 lakhs in the year under review as compared with Rs. 53 lakhs in 1943-44 and Rs. 60 lakhs in 1942-43. The Ministry's purchase price averaged £30½ as compared with £33 at the beginning of 1944.

Shipments of rapeseed continued to remain more or less unchanged and were valued at Rs. 60 lakhs in the year under review as against Rs. 57 lakhs in the preceding year and Rs. 66 lakhs in 1942-43. The output of rape and mustard dropped by 11 per cent. from 1,070,000 tons in 1943-44 to 955,000 tons in the following year.

Exports of sesamum received a sharp setback from Rs. 21 lakhs in 1943-44 to Rs. 7 lakhs only in the following year, while the production was reduced by 12 per cent. from 447,000 tons to 393,000 tons.

**Hides and Skins (Rs. 8.20 Lakhs).**—The downward trend of exports of hides and skins witnessed in the previous two years was carried forward to one more year owing to acute shortage of supply. The total exports under this head were valued at Rs. 8.20 lakhs in the year under review as compared with Rs. 8.49 lakhs in the preceding year.

Shipments of tanned hides and skins amounted to Rs. 4.21 lakhs being less by Rs. 17 lakhs than the preceding year. Of these, hides totalled 4,281 tons valued at Rs. 1.49 lakhs only as against 6,976 tons worth Rs. 2.03 lakhs in 1943-44, while exports of skins advanced by a little over two per cent. in volume and 20 per cent. in value from 3,701 tons valued at Rs. 2.08 lakhs to 3,786 tons valued at Rs. 2.51 lakhs.

Exports of raw hides and skins were valued at Rs. 3.99 lakhs in the year under review showing a drop of Rs. 14 lakhs over the preceding year. The bulk of the shipments consisted of skins which were valued at Rs. 3.78 lakhs in the year under review as compared with Rs. 3.67 lakhs in the preceding year. Exports of goat skins

## Index Numbers of Prices.

Index Numbers of wholesale prices in India during the years 1861-1931 are available in the publication "Index Numbers of Indian Prices, 1861-1931" issued by Director-General of Commercial Intelligence and Statistics, Calcutta which contains (1) the unweighted index numbers of 28 articles of export; (2) the unweighted index numbers of 11 articles of import; (3) the general unweighted index numbers for 39 articles of export and import and (4) the weighted index numbers of 100 articles. The last of the four series is a continuation of the series first compiled and published by F. J. Atkinson in the Journal of Royal Statistical Society in March 1897. The index figures subsequent to 1931 are available in the addenda to the Index Numbers of Indian Prices 1861-1931 published from time to time. The compilation of all these series was discontinued in August 1941.

The following table contains these index numbers since the year 1931 :—

(Price in 1873 = 100)

Year	Exported articles 28 (unweighted)	Imported articles 11 (unweighted)	General Index No. for all (39) articles (unweighted)	Weighted Index No. (100 articles)
1931 .. .. .	125	134	127	157
1932 .. .. .	120	139	126	149
1933 .. .. .	118	128	121	139

1941 (Seven-monthly average) ..	Not available	Not available	181	„

\* Provisional.

In 1938, the Economic Adviser to the Government of India started a series of index numbers of weekly wholesale prices of certain articles in India. In addition to this series a new series was started in 1940 with a different base period and both these series are being published every week by the Office of the Economic Adviser to the Government of India, which consist of unweighted index numbers of (1) 11 articles of agricultural commodities, (2) 7 articles of raw materials and (3) 5 manufactured articles.

In addition to these series of wholesale prices for the whole of India, wholesale price index numbers for Calcutta and Cawnpore are being published by the Director-General of Commercial Intelligence and Statistics, Calcutta, and the Government of the United Provinces respectively. Similar wholesale prices index numbers for Bombay, Karachi and Madras which were being compiled and published by the Governments of Bombay, Sind and Madras respectively were discontinued since November 1943, June 1942 and June 1943 respectively.

The following table gives these index numbers since 1931 :—

*Wholesale price index numbers for Calcutta, Bombay, Karachi, Cawnpore and Madras.*

Year	Calcutta (July 1914=100)	Bombay (July 1914=100)	Karachi (July 1914=100)	Cawnpore (1913=100)	Madras (Week ended 21st August 1939=100)
1931 .. .. .	96	109	95	..	..
1932 .. .. .	91	109	99	..	..
1933 .. .. .	87	98	97	..	..
1934 .. .. .	89	95	96	..	..
1935 .. .. .	91	99	99	..	..
1936 .. .. .	91	96	102	117	..

1938 .. .. .	95	101	104	85	..
1939 .. .. .	108	109	108	101	..
1940 .. .. .	120	118	116	100	119
1941 .. .. .	139	137	120	104	137
1942 .. .. .	185	219	†	175	192
1943 .. .. .	307	256† (ten-mon- thly average)		304	270† (five-mon- thly average)
1944 .. .. .	298			296	
1945 .. .. .	289			307	

† Discontinued.

About the end of the year 1929 there began a sharp decline in wholesale prices which continued during 1930 and 1931. This downward trend, although somewhat checked in 1932, continued during 1933 and 1934 when the prices reached their lowest level. The prices, however, showed some improvement during the next two years and registered a sharp rise during 1937. The prices registered a perceptible fall in the following year but they soon recovered and registered a further rise in Calcutta and Bombay during 1939.

With the outbreak of the war the wholesale prices began to soar. This tendency continued till December, 1939, but thereafter there was a gradual fall till June, 1940, when they again showed a partial recovery which continued till the middle of 1941. From June onwards, the prices rose very rapidly till about the end of the year 1943. The Bombay wholesale prices index number reached its highest level (267) in June 1943 and stood at 240 in October 1943 when the series was discontinued. During 1944 wholesale prices both at Calcutta and Cawnpore registered a fall, which was maintained at Calcutta during the following year. At Cawnpore, however, the index number rose to 307 during 1945.

The various Provincial Governments publish in their respective *Gazettes* fortnightly and monthly statements of retail and wholesale prices of certain important commodities. In addition to these, however, some of the Provincial Governments also publish working class cost of living index numbers. Such index numbers are being published regularly every month for the following centres: for Bombay, Ahmedabad, and Sholapur by the Labour Office of the Government of Bombay; for Nagpur and Jabulpore by the Labour Commissioner, Central Provinces and Berar; for six centres in Bihar by the Commissioner of Labour and Employment, Bihar; for Madras, by the office of the Secretary to the Commissioner of Civil Supplies, Board of Revenue, Madras; for Lahore, Sialkot, Ludhiana, Rohtak and Multan by the office of the Director of Industries, Punjab and for Cuttack, by the office of the Director of Development, Orissa. In addition to these series, working class cost of living index number for Jalgaon in the Bombay Province and for Bangalore in the Mysore State and cost of living index numbers for low paid employees at eight places in Madras Province and for low paid government servants at five places in the United Provinces are at present being compiled.

The working class cost of living index number for Bombay, which was originally compiled on a pre-war basis, was revised during 1937, the base adopted for the new series being July 1933 to June 1934=100. The revised index number stood at 242 in December 1945, the average for 1945 being 235. The Ahmedabad cost of living index number, with base August 1926 to July 1927=100, stood at 205 in December 1945 while the Sholapur cost of living index number, with base February 1927 to January 1928=100, stood at 204 in December 1945. The Nagpur cost of living index number, on base January 1927=100, was 173 in December 1945 while the Jabulpore Index on the same base was 167. The

Madras cost of living index number, with base July 1935 to June 1936=100, was 224 in December 1945. The Lahore cost of living index number, with 1931-35 prices equated to 100, was 351 in December 1945. The cost of living index numbers for Sialkot, Ludhiana, Rohtak and Multan, with 1931-35 prices equated to 100, were 349, 388, 344 and 323 respectively for September 1945.

The catastrophic fall in retail prices which commenced at the end of 1929 continued during 1930 and 1931. In 1932 prices ruled at a slightly lower level than in 1931. In 1933 and 1934 the downward tendency of prices continued. This downward tendency was somewhat checked during 1935 and 1936. The prices showed a definite rise in 1937, remained more or less steady during 1938-39 and registered continuous marked increases during the succeeding four years.

The inadequacy as also the general unreliability of Indian price statistics has been the subject of comment by many committees and commissions of enquiry including the Indian Economic Enquiry Committee of 1925, the Royal Commission on Indian Labour and also by Messrs. Bowley and Robertson who were invited by the Government of India to advise them on the question of obtaining more accurate and detailed statistics. The eleventh Industries Conference held at Mysore in December 1939 and the first Conference of the Labour Ministers held at New Delhi in January 1940 recommended that the Central Government should undertake legislation to facilitate the collection of statistics relating to industries. In pursuance of this recommendation, the Government of India introduced in the Legislative Assembly in February 1942 a bill on the subject which has since been passed by the Central Legislature and received the assent of the Governor-General. This Act which is called the Industrial Statistics Act, 1942, empowers the provincial Governments to arrange for the collection of statistics relating to prices of commodities as also certain other matters like wages, employment, industrial disputes, etc.

In view of the inadequacy of the existing retail price data, especially from the point of view of compiling cost of living index numbers, the Court of Enquiry constituted in August, 1940, under the Trade Disputes Act 1929 under the Chairmanship of the Hon'ble Sir B. N. Rau to investigate the question of dearness allowance for the railway employees recommended that the Central Government should take up the work of preparation and maintenance of cost of living index figures for three distinct classes of areas in India, viz. city, urban and rural. In pursuance of this recommendation, the Government of India outlined a tentative scheme for the preparation and maintenance of cost of living index numbers for important centres in British India. The scope of the Scheme has been limited to the preparation of figures for industrial labour. A special post of the Director, Cost of Living Index Scheme, has been created and a Committee of experts has been appointed to assist him. Unweighted retail price index numbers for 15 selected rural centres in British India where cost of living index numbers are not available are being published by the Director, Cost of Living Index Scheme.

## The Press.

The newspaper Press in India is an essentially English institution and was introduced soon after the task of organising the administration was seriously taken in hand by the English in Bengal. In 1773 was passed the Regulating Act creating the Governor-Generalship and the Supreme Court in Bengal and within seven years at the end of the same decade, the first newspaper was started in Calcutta by an Englishman in January 1780. Exactly a century and a third has elapsed since, not a very long period certainly, a period almost measured by the life of a single newspaper, *The Times*, which came into existence only five years later in 1785; but then the period of British supremacy is not much longer, having commenced at Plassey, only twenty-three years earlier. Bombay followed Calcutta closely, and Madras did not lag much behind. In 1789 the first Bombay newspaper appeared, *The Bombay Herald*, followed next year by *The Bombay Courier*, a paper now represented by *The Times of India* with which it was amalgamated in 1861. In Bombay the advent of the press may be said to have followed the British occupation of the island much later than was the case in Calcutta. In Calcutta the English were on sufferance before Plassey, but in Bombay they were absolute masters after 1685, and it is somewhat strange that no Englishman should have thought of starting a newspaper during all those hundred and twenty-five years before the actual advent of *The Herald*.

The first newspaper was called *The Bengal Gazette* which is better known from the name of its founder as *Hicky's Gazette* or *Journal*. Hicky like most pioneers had to suffer for his enterprising spirit, though the fault was entirely his own, as he made his paper a medium of publishing gross scandal, and he and his journal disappeared from public view in 1782. Several journals rapidly followed Hicky's, though they did not fortunately copy its bad example. *The Indian Gazette* had a career of over half a century, when in 1833 it was merged into the *Bengal Harkaru*, which came into existence only a little later, and both are now represented by *The Indian Daily News* with which they were amalgamated in 1866. No fewer than five papers followed in as many years, the *Bengal Gazette* of 1780, and one of these, *The Calcutta Gazette*, started in February 1784, under the avowed patronage of Government, flourishes still as the official gazette of the Bengal Government.

In 1821 a syndicate of European merchants and officials commenced the publication of *John Bull in the East*, a daily paper which was intended to reflect Tory opinion in India and set an example to the Press generally in the matter of moderation and restraint. The name of this journal was altered to *The Englishman* by the famous Stocqueler in 1836.

From its commencement the press was jealously watched by the authorities who

put serious restraints upon its independence and pursued a policy of discouragement and rigorous control. Government objected to news of apparently the most trivial character affecting its servants. From 1791 to 1799 several editors were deported to Europe without trial and on short notice, whilst several more were censured and had to apologise. At the commencement of the rule of Wellesley Government promulgated stringent rules for the public press and instituted an official censor to whom everything was to be submitted before publication, the penalty for offending against these rules to be immediate deportation. These regulations continued in force till the time of the Marquis of Hastings who in 1818 abolished the censorship and substituted milder rules.

This change proved beneficial to the status of the press, for henceforward self-respecting and able men began slowly but steadily to join the ranks of journalism, which had till then been considered a low profession. Silk Buckingham, one of the ablest and best known of Anglo-Indian journalists of those days, availed himself of this comparative freedom to criticise the authorities, and under the short administration of Adam, a civilian who temporarily occupied Hastings' place, he was deported under rules specially passed. But Lord Amherst and still more Lord William Bentinck were persons of broad and liberal views, and under them the press was left practically free, though there existed certain regulations which were not enforced, though Lord Clare, who was Governor of Bombay from 1831 to 1835, once strongly but in vain urged the latter to enforce them. Metcalfe, who succeeded for a brief period Bentinck, removed even these regulations, and brought about what is called the emancipation of the press in India in 1835, which was the beginning of a new era in the history of the Indian press. Among papers that came into being, was the *Bombay Times* which was started towards the close of 1838 by the leading merchants of Bombay, and which in 1861 changed its name to the *Times of India*. *The Bombay Gazette* founded in 1791, ceased publication in 1914.

The liberal spirit in which Lord Hastings had begun to deal with the press led not only to the improvement in the tone and status of the Anglo-Indian press, but also to the rise of the Native or Indian Press. The first newspaper in any Indian language was the *Samachar Durban* started by the famous Serampore Missionaries Ward, Carey and Marshman in 1818 in Bengali, and it received encouragement from Hastings who allowed it to circulate through the post office at one-fourth the usual rates. This was followed in 1822 by a purely native paper in Bombay called the *Bombay Samachar* which still exists, and thus was laid the foundation of the Native Indian Press which at the present day is by far the largest part of the press in India, numbering over 650 papers.

From 1835 to the Mutiny the press spread to other cities like Delhi, Agra, Gwallior, and even Lahore, whereas formerly it was chiefly confined to the Presidency towns. During the Mutiny its freedom had to be temporarily controlled by the Gagging Act which Canning passed in June 1857 on account of the license of a very few papers, and owing still more to the fears of its circulating intelligence which might be prejudicial to public interests. The Act was passed only for a year at the end of which the press was once more free.

On India passing to the Crown in 1858, an era of prosperity and progress opened for the whole country in which the press participated. There were 19 Anglo-Indian papers at the beginning of this period in 1858 and 25 Native papers and the circulation of all was very small.

The number of the former did not show a great rise in the next generation, but the rise in influence and also circulation was satisfactory. Famous Journalists like Robert Knight, James Maclean and Hurris Mookerji flourished in this generation. The *Civil and Military Gazette* was originally published in Simla as a weekly paper, the first issue being dated June 22nd, 1872. Prior to and in the days of the Mutiny the most famous paper in Northern India was the *Mofussilite*, originally published at Meerut, but afterwards at Agra and then at Ambala. After a lively existence for a few years in Simla the *Civil and Military Gazette* acquired and incorporated the *Mofussilite*, and in 1876 the office of the paper was transferred from Simla to Lahore, and the *Gazette* began to be published daily.

## INDIAN PRESS LAW.

Before 1835 all printing of books and paper was subject to licence by the Governor-General in Council, and the licences were issued or refused at the discretion of Government. Act XI of 1835 repealed the old Regulations and merely required registration of the printer and made a few minor requirements. That Act was replaced in 1867 by the present Press and Registration of Books Act, and, except for an Act which was in force for one year during the Mutiny, there was no further legislation directly affecting the Press until 1878 when the Vernacular Press Act was passed. That Act was repealed during the Viceroyalty of Lord Ripon in 1882. From that date until 1907 Government made no attempt to interfere directly with the liberty of the Press, the growth of sedition being dealt with in other ways by the passing in 1898 of section 124A of the Penal Code in its present form, which had been originally enacted in 1870, and by the introduction into the Penal Code of section 153A and into the Criminal Procedure Code of section 108. There were a certain number of prosecutions under those sections up to 1907, but the dissemination of sedition through the Press continued. In 1908 the Newspaper (Incitement to Offences) Act was passed which dealt with papers inciting to murder or to acts of violence. This Act failed to have the desired effect.

The Indian Press Act, 1910, was a measure of wider scope, the main object of which was to ensure that the Indian press generally should be kept within the limits of legitimate discussion.

The Act deals not only with incitements to murder and acts of violence, but also with other specified classes of published matter, including any words or signs tending to seduce soldiers or sailors from their allegiance or duty; to bring into hatred or contempt the British Government, any Native Prince; or any section of His Majesty's subjects in India, or to intimidate public servants or private individuals.

**Repeal of Press Legislation.**—By the autumn of 1917 the Government of India had begun to consider the desirability of modifying at least one section of the Press Act to which great exception had been taken on account of the wide powers that it gave. Finally, after more than once consulting Local Governments, a Committee was appointed in February 1921 after a debate in the Legislative Assembly, to examine the Press and Registration of Books Act, 1867, and the Indian Press Act, 1910, and report what modifications were required in the existing law. That Committee made an unanimous report in July 1921, recommending:—

- (1) The Press Act should be repealed.
- (2) The Newspapers Incitements to Offences Act should be repealed.
- (3) The Press and Registration of Books Act and the Post Office Act should be amended where necessary to meet the conclusion noted below: (a) The name of the editor should be inscribed on every issue of a newspaper and the editor should be subject to the same liabilities as the printer and publisher, as

regards criminal and civil responsibilities; (b) any person registering under the Press and Registration of Books Act should be a major defined by the Indian Majority Act; (c) local Governments should retain the power of confiscating openly seditious leaflets, subject to the owner of the press or any other person aggrieved being able to protest before a court and challenge the seizure of such document, in which case the local Government ordering the confiscation should be called upon to prove the seditious character of the documents. The powers conferred by Sections 13 to 15 of the Press Act should be retained. Customs and Postal officers being empowered to seize seditious literature within the meaning of Section 124A of the I. P. C. subject to review on the part of the local Government and challenge by any persons interested in the courts; (e) any person challenging the orders of Government should do so in the local High Court; (f) the term of imprisonment prescribed in Sections 12, 13, 14 and 15 of the Press and Registration of Books Act should be reduced to six months; (g) the provisions of Section 16 of the Press Act should be reproduced in the Press and Registration of Books Act.

Effect was given to these recommendations during the year 1922.

**The Indian and Eastern Newspaper Society.**—An important development in connection with newspapers in India took place in 1939, when the Indian and Eastern Newspaper Society was formed. The Society's principal objects are as follows:—(a) To act as a central organisation of the Press of India, Burma and Ceylon; (b) To promote and safeguard the business interests of members as affected by the action of Legislatures, Governments, the Law Courts, municipal and local bodies and associations or organisations commercial or formed for any other purpose; (c) To collect information upon all topics having a practical interest for members and to communicate the same to them; (d) To promote co-operation in all matters affecting the common interests of members; (e) To hold periodical conferences of its members to discuss and determine action on matters of

common interest; (f) To make rules to govern the conduct of its members in specified matters, to provide penalties for the infringement thereof, and to provide means of determining whether there has been such infringement; (g) To maintain a permanent secretariat in India which should watch over the interests of members and should permit of a constant interchange of information and views; (h) To do all such other things as may be conducive or incidental to the attainment of the aforesaid objects.

**Editors' Conference.**—During 1940 a Conference of Editors was called by Mr. K. Srinivasan of *The Hindu* to consider the Government of India's restrictions on the Press under the Defence of India Act in connection with the Congress satyagraha movement. The Conference was held at Delhi and formed itself into a body representing the Editors of Indian newspapers. As a result of its representations the Government of India decided to withdraw the restrictions on the Press under the Defence of India Act and to set up in each province a Press Advisory Committee which Provincial Press Advisers should consult in connection with articles about which there was doubt. A Committee was also set up at Delhi to act in conjunction with the Chief Press Adviser. These Committees are intended to act as a sort of liaison between the Press and Government and are appointed with the sanction of both Government and the President of the Editors' Conference.

The All-India Newspaper Editors' Conference subsequently adopted a constitution with the following aims and objects:—(a) To preserve the high traditions and standards of journalism. (b) To serve and safeguard the interests of the press in regard to the publication of news and fair comment. (c) To secure all facilities and privileges to the press for the due discharge of its responsibilities. (d) To represent the press in India in its relations with the public and public institutions and particularly in its relations to Government to set up Committees who would act as liaison between the Government and the press as a whole. (e) To establish and develop contacts with Association with similar objects in other countries.

## The Indian National Congress.

For a complete history of the movement represented by the Indian National Congress the reader is referred to earlier editions of the *Indian Year Book*. The Congress was founded in 1885 by Mr. Allan Octavian Hume, a retired member of the Indian Civil Service, and it held its first session in Bombay at Christmas of that year. The fundamental principles of the Congress then laid down were —

Firstly, the fusion into one national whole of all the different and discordant elements that constitute the population of India;

Secondly, the gradual regeneration, along all lines, mental, moral, social and political of the nation thus evolved; and

Thirdly, the consolidation of union between England and India by securing the modification of such of the conditions as may be unjust or injurious to the latter country.

With these objects in view the Congress pursued an uneventful career until 1907. It undoubtedly exercised a great influence in inducing a spirit of national unity amongst the diverse peoples of India, in focusing the chief political grievances and in providing a training ground for Indian politicians. But in 1907 the extremists, chiefly of the Deccan and the Central Provinces, who had for some time chafed under the control of the older generation, succeeded in wrecking the Surat session of the Congress and produced a split. The senior members of the Congress therefore re-crystallised its creed in definite terms. They laid down that —

"The objects of the Indian National Congress are the attainment by the people of India of a system of Government similar to that enjoyed by the self-governing members of the British Empire, and a participation by them in the rights and responsibilities of the Empire on equal terms with those members. These objects are to be achieved by constitutional means by bringing about a steady reform of the existing system of administration and by promoting national unity, fostering public spirit and developing and organising the intellectual, moral, economic and industrial resources of the country."

For some years following 1907 efforts were made to heal the split, but these were without avail. In 1916 a re-united Congress met at Lucknow under the presidency of Babu Ambika Charan Muzumdar of Faridpur in Bengal; but the union then effected was purely superficial. The difference between the moderates and the extremists proved to be fundamental, and the extremists captured the machinery of the Congress, so that from the period of the special session held at Calcutta in September 1920 the Congress passed entirely under the domination of Mr. Gandhi and his lieutenants.

In 1927 the Congress adopted Independence as the goal of India. In the following two years the Congress made what

the extremists felt described as a dash down. At its 1927 session the Congress, while adhering to Independence, agreed to accept Dominion Status, if granted, before the end of 1929. There were further to come a satisfactory settlement when in the latter half of 1929 the Congress indicated its immediate repudiation of Dominion Status as an alternative that Dominion Status would be the basis of discussion at the Round Table Conference to be convened in London between representatives of London, British India and the Indian States. Here was the parting of the ways. The Moderates went their way and the Congress its own. In fulfillment of the "Literature" issued at its previous session, the Congress, at its 1929 session, declared itself for complete independence or "Purna Swaraj." Throughout the year 1931 the Congress was engaged in a defence of the law of the land which, it was hoped, would help India to attain complete independence. Early next year the Congress suspended civil disobedience by virtue of an agreement arrived at with the Government.

As a result of this Mr. Gandhi, on behalf of the Congress, went to London to take part in the Round Table Conference. While he was away things took a turn for the worse in the country, and matters reached a crisis with the birth of the New Year. In 1932 the Government bent all its efforts to making it impossible for the Congress to carry on its subversive activities and succeeded fully in its object. The Congress was crushed and all forms of Congress work throughout the country were an actually prevented. In fact as well as in law the Congress ceased to exist. In the middle of 1931 the civil disobedience movement, which had rendered the Congress illegal, was withdrawn. In the autumn of that year Mr. Gandhi retired from the Congress, although he remains in practice the virtual dictator of the organisation. During the next four or five years, the Congress functioned as a constitutional organisation. It was actually in charge of His Majesty's Government for more than two years in eight provinces under the 1935 constitution. (See past issues of the *Indian Year Book* for a history of the non-co-operation and the civil disobedience movements, and for the parliamentary activities of the Congress.)

This parliamentary phase proved to be short-lived. Soon after the declaration of the present war the Congress withdrew its Ministers in the majority of the provinces and gave supreme command of the organisation and its members to Mr. Gandhi who launched another campaign of civil disobedience—this time on the issue that Congressmen should have the right non-violently to preach against India's war effort. Thousands of Congressmen answered Mr. Gandhi's call, uttered anti-war slogans and courted jail. This civil disobedience campaign was not of the mass type, but restricted to individuals carefully chosen by Mr. Gandhi himself. Even so, close upon 25,000 representative Congress leaders are said to have taken part in the campaign.

Late in the year 1941 the satyagrahi prisoners were released by Government whereupon the movement was suspended. Early in the summer of 1942 the Congress was presented with an opportunity to return to parliamentary work, in the shape of the scheme drafted by the British War Cabinet and brought to India by Sir Stafford Cripps; but this was not availed of. The Congress thus reverted to another period of barrenness, with this difference that during this period it did not indulge in any anti-government or anti-war activity; rather did it protest that its demand for the creation of a National Government was not met and thereby it was prevented from prosecuting the defence of India vigorously.

This state of suspended hostilities did not, however, last long. The failure of the Cripps Mission brought in its wake a wave of disappointment, frustration and bitterness which was bound sooner or later to burst out into a conflagration. And it did. Mr. Gandhi raised the slogan of "Quit India," explaining that the British should transfer all political and administrative power to Indians, reserving only the authority to take measures for the defence of India and the prosecution of the war. In pursuance of this demand the All India Congress Committee authorised Mr. Gandhi to meet the Viceroy and, failing satisfaction, to launch a mass civil disobedience movement to enforce the demand.

On the morrow of the session of the A.I.C.C. Mr. Gandhi and all prominent Congress leaders were taken into custody and detained under the Defence of India Rules. Their arrest was followed by countrywide disturbances marked by murder, sabotage, arson and looting. Government took strong measures to put down the trouble which had assumed the dimensions of an open rebellion. By the end of the year comparative quiet had been restored.

Early in 1943, Mr. Gandhi undertook a 21-day fast as a protest against Government's refusal to let him meet the members of the Congress Working Committee or enable him to examine and meet the charges of violence levelled at the Congress. He outlived the fast in detention, Government throughout remaining firm in respect both of his release and of facilities to intermediaries to meet him. In less than a year, a sad development brought Mr. Gandhi into contact with the world again. Mrs. Gandhi, who was detained in the same place as her husband, fell a victim to heart attacks and succumbed in February 1944. Friends and relatives were allowed to be present by her death-bed and to attend her funeral.

**Mr. Gandhi's Release.**—Shortly after Mr. Gandhi had a severe attack of malaria and his health broke down. In May 1944 he was released unconditionally "solely on medical grounds." As a free man he did not take long to recover his normal health. Within a few months of his release he made advances both to British authority and to the Muslim League. Neither responded favourably, and Mr. Gandhi once again shrank into his shell, advising Congressmen outside jails to concentrate on constructive work. In the

summer of 1945 all members of the Congress Working Committee were set free to enable the Congress to consider a new proposal framed by Lord Wavell, the Viceroy, in consultation with His Majesty's Government.

**Wavell Plan.**—The Wavell Plan sought to set up an interim Government at the centre composed of the people's representatives on the basis of parity between caste Hindus and Muslims but providing for representation to minorities such as the Sikhs and the scheduled castes. The projected central machinery was to function within the framework of the present constitution for the duration of the war without prejudicing the claims of any party in regard to the shape of the future Indian constitution. A conference called by the Viceroy to consider the scheme ended in failure.

Meanwhile Britain went to the polls and the war-time national coalition Cabinet was replaced by a full-fledged Labour Government with an overwhelming majority in Parliament. The new Labour Government lifted the ban on the Congress in the various Indian provinces, ordered general elections in India and summoned Lord Wavell to London for fresh consultations. On his return His Excellency made a declaration reiterating British determination to confer full self-government on India.

**British Labour Government's Indian Policy.**—The Congress entered the election fray heart and soul and made a good job of it. In March, 1946, the British Premier made a pronouncement on the Labour Government's policy towards India, in which he said that India would be free to shape her own destiny and that Britain would help her in the process of framing her own constitution. With a view to enabling the Indian political parties to agree on a machinery to devise the future constitution, it was decided to send three members of the British Cabinet, headed by the Secretary of State for India, to this country. The Premier also announced that, while it was his Government's intention to give adequate protection to the minorities, the latter would not be allowed to veto the progress of the country as a whole.

The Cabinet Mission arrived in India very soon and set about its task with great earnestness of purpose. After interviewing representatives of various shades of Indian opinion, the Mission tried to bring the League and the Congress together and to make them agree to a common approach to the problem. This having failed, the Mission in May announced a scheme for the transfer of power from British to Indian hands. A Constituent Assembly elected by the new Provincial Legislative Assemblies on the basis of one to a million of population, was to meet and devise a three-tier constitution—a Union Centre with limited subjects, three group constitutions if the provinces so desired, and provincial constitutions. Pending the meeting of the Constituent Assembly, there would be an Interim Government representative of the principal elements which accepted the long-term proposals.

The Congress sought clarification on several aspects of the proposals and a controversy ensued over the interpretation of the Cabinet Mission scheme. Meanwhile, the Viceroy endeavoured to constitute an Interim Government. Here again the League and the Congress failed to agree. The Mission and the Viceroy suggested a compromise solution. The League accepted both the long and short-term proposals, while the Congress accepted the long-term scheme but rejected the proposals for the Interim Government. Elections to the Constituent Assembly were then held. These resulted in the return of a majority of Congress nominees. Meanwhile, the League withdrew its acceptance of the Cabinet Mission's scheme and decided to launch upon direct action. Thereupon the Viceroy called upon the Congress to assist him in the formation of an Interim Government. In the Autumn of 1946, the Congress formed the Government at the Centre, with the aid of representatives of minorities. The League kept out of it for a time, but after nearly two months decided to come in. (For the Congress attitude to the war see last year's *Indian Year Book*.)

**Ramgarh Congress, 1940.**—The annual session of the Congress was held at Ramgarh in April 1940. Maulana Abul Kalam Azad presided. Only one resolution was adopted by the Ramgarh session. It stated *inter alia*:

"The Congress hereby declares again that nothing short of complete independence can be accepted by the people of India. Indian freedom cannot exist within the orbit of Imperialism and Dominion Status or any other status within the imperial structure is wholly inapplicable to India, is not in keeping with the dignity of a great nation, and would bind India in many ways to British politics and economic structure. The people of India alone can properly shape their own constitution and determine their relations to the other countries of the world, through a constituent assembly elected on the basis of adult suffrage.

"The Congress is further of opinion that, while it will always be ready, as it ever has been, to make every effort to secure communal harmony, no permanent solution is possible except through a constituent assembly, where the rights of all recognised minorities will be fully protected by agreement, as far as possible, between the elected representatives of various majority and minority groups, or by arbitration if agreement is not reached on any point. Any alternative will lack finality. India's constitution must be based on independence, democracy and national unity, and the Congress repudiates attempts to divide India or to split up her nationhood. The Congress has always aimed at a constitution where the fullest freedom and opportunities of development are guaranteed to the group and the individual, and social injustice yields place to a juster social order.

"The Congress cannot admit the right of the rulers of Indian States or of foreign vested interests to come in the way of Indian freedom. Sovereignty in India must rest with the people, whether in the States or the provinces, and all

other interests must be subordinated to their vital interests. The Congress holds that the difficulty raised in regard to the States is of British creation and it will not be satisfactorily solved unless the declaration of the freedom of India from foreign rule is unequivocally made. Foreign interests, if they are not in conflict with the interests of the Indian people, will be protected." (For full text of the resolution see past issues of *The Indian Year Book*.)

**The Congress in 1940-41.**—The weeks that followed the Ramgarh session of the Congress were occupied by intensive preparation for a direct action movement under the guidance of Mr. Gandhi, side by side with expressions of hope by Mr. Gandhi and other Congress leaders that such a struggle might be avoided. Mr. Gandhi's notion of "preparation" was as usual on the constructive plan, that is, hand-spinning, removal of untouchability and promotion of Hindu-Muslim unity.

As for communal unity, Mr. Gandhi stoutly resisted the Muslim League demand for Pakistan but declared that, although, as a man of non-violence, he could not resist the proposed partition with force, he could never be a willing party to the proposed vivisection of the country. He wrote: "My whole soul rebels against the idea that Hinduism and Islam represent two antagonistic cultures and doctrines. To assent to such a doctrine is for me denial of God. For I believe with my whole soul that the God of the Quran is also the God of the Gita, and that we are all, no matter by what name designated, children of the same God. I must rebel against the idea that millions of Indians who were Hindus the other day changed their nationality on adopting Islam as their religion."

**A Big Jump.**—A few weeks later the war took a sudden turn for the worse. The invasion of the Low Countries, the capitulation of Belgium and the collapse of France produced in India a new feeling in favour of Britain. There was clear evidence of a desire on the part of many Congress leaders actively to help in the war in spite of Mr. Gandhi's known convictions on the subject.

By now the feeling had grown among Indians that the war had come closer to this country and that the danger of external aggression and internal disorder were not remote possibilities. This realisation caused a revolution in the minds of most Congressmen who had not the courage to adhere steadfastly to Mr. Gandhi and his non-violence in any eventuality. The Congress Working Committee virtually abandoned Mr. Gandhi and offered to co-operate in the war effort provided a fully representative National Government was formed at the centre. Apart from the ideological separation from Mr. Gandhi, this offer constituted a big jump for the Congress—from non-participation in any war to active help in the prosecution of this war.

**Poona Offer.**—The resolution said, among other things:—

"The Working Committee are more than ever convinced that the acknowledgment by

Great Britain of the complete independence of India is the only solution of the problems facing both India and Britain and are, therefore, of opinion that such an unequivocal declaration should be immediately made and that, as an immediate step in giving effect to it, a provisional National Government should be constituted at the Centre, which, though formed as a transitory measure, should be such as to command the confidence of all the elected elements in the Central Legislature, and secure the closest co-operation of the responsible Governments in the provinces.

"The Working Committee are of opinion that, unless the aforesaid declaration is made, and a National Government accordingly formed at the Centre without delay, all efforts at organising the material and moral resources of the country for defence cannot in any sense be voluntary or as from a free country, and will, therefore, be ineffective. The Working Committee declare that if these measures are adopted, it will enable the Congress to throw in its full weight in the efforts for the effective organisation of the defence of the country."

**British Government's August Offer.**—Then came the famous statement by the Viceroy, known as the British Government's August offer. (For full text see past issues of *The Indian Year Book*.) It said:

"Last October His Majesty's Government again made it clear that Dominion Status was their objective for India. They added that they were ready to authorise the expansion of the Governor-General's Council to include a certain number of representatives of political parties, and they proposed the establishment of a Consultative Committee. In order to facilitate harmonious co-operation it was obvious that some measure of agreement in the Provinces between major parties was a desirable prerequisite to their joint collaboration at the Centre. Such an agreement was unfortunately not reached, and in the circumstances no progress was then possible.

His Majesty's Government do not feel that they should any longer postpone the expansion of the Governor-General's Council, and the establishment of a body which will more closely associate Indian public opinion with the conduct of the war by the Central Government

"They (His Majesty's Government) have authorised me accordingly to invite a certain number of representative Indians to join my Executive Council.

"They have authorised me further to establish a War Advisory Council, which would meet at regular intervals and which would contain representatives of the Indian States and of other interests in the national life of India as a whole.

"It goes without saying that they could not contemplate the transfer of their present responsibilities for the peace and welfare of India to any system of Government whose authority is directly denied by large and powerful elements in India's national life. Nor could they be parties to the coercion of such elements into submission to such a Government.

"With regard to the machinery for building, within the British Commonwealth of Nations, a new constitutional scheme when the time comes, there has been very strong insistence that the framing of that scheme should be primarily the responsibility of Indians themselves, and should originate from Indian conceptions of the social, economic and political structure of Indian life. His Majesty's Government are in sympathy with that desire and wish to see it given the fullest practical expression, subject to the due fulfilment of the obligations which Great Britain's long connection with India has imposed upon her, and for which His Majesty's Government cannot divest themselves of responsibility.

"It is clear that a moment when the Commonwealth is engaged in a struggle for existence is not one in which fundamental constitution issues can be decisively resolved.

"But His Majesty's Government authorise me to declare that they will most readily assent to the setting up, after the conclusion of the war, with the least possible delay, of a body representative of the principal elements in India's national life in order to devise the framework of the new Constitution, and they will lend every aid in their power to hasten decision on all relevant matters to the utmost degree."

**Congress Rejection.**—The Congress, however, rejected the Viceroy's offer as being wholly opposed not only to the principle of democracy, acclaimed by the British Government in their war aims, but also to the best interests of India.

In order to meet the League objections to the Congress idea of a National Government Mr. C. Rajagopalachariar made what has come to be known as a "sporting offer". He said: "In answer to Mr. Amery's difficulty as to the minorities, I may make a sporting offer that if His Majesty's Government agree to a Provisional National Government being formed at once, I will undertake to persuade my colleagues in the Congress to agree to the Muslim League being invited to nominate the Prime Minister and to let him form a National Government as he would consider best. If there is sincerity in the difficulty felt by His Majesty's Government it should be met by what I offer." Nothing, however, came out of this "sporting offer."

**Civil Disobedience.**—When this "last gesture" was ignored, the Congress meekly returned to Mr. Gandhi and his non-violence. This was the outcome of the deliberations of the All-India Congress Committee held in Bombay in the middle of September 1940. The A.I.C.C. passed a resolution confirming the August resolution of the Working Committee rejecting the Viceroy's offer and requesting Mr. Gandhi to take over the leadership of the Congress.

About a fortnight after this, Mr. Gandhi unfolded his plan of individual civil disobedience restricted to a limited number of satyagrahis.

Mr. Gandhi chose as his first satyagrahi Mr. Vinoba Bhave who had been doing village uplift work. The satyagraha for the time being was to be confined to Mr. Bhave. According to plan, Mr. Vinoba Bhave set out on a marching tour from village to village preaching non-participation in war on grounds of non-violence.

"(b) Provision shall be made, as set out below, for participation of Indian States in the Constitution-making body.

"(c) His Majesty's Government undertake to accept and implement forthwith the Constitution so framed subject only to :—

"(i) The right of any Province of British India that is not prepared to accept the new Constitution to retain its present constitutional position, provision being made for its subsequent accession if it so decides.

"With such non-acceding Provinces, should they so desire, His Majesty's Government will be prepared to agree upon a new Constitution giving them the same full status as the Indian Union and arrived at by a procedure analogous to that here laid down.

"(ii) The signing of a Treaty which shall be negotiated between His Majesty's Government and the Constitution-making body. This Treaty will cover all necessary matters arising out of the complete transfer of responsibility from British to Indian hands; it will make provision, in accordance with undertakings given by His Majesty's Government, for the protection of racial and religious minorities; but will not impose any restriction on the power of the Indian Union to decide in future its relationship to other Member States of the British Commonwealth.

"Whether or not an Indian State elects to adhere to the Constitution it will be necessary to negotiate a revision of its Treaty arrangements so far as this may be required in the new situation.

"(d) The Constitution-making body shall be composed as follows unless the leaders of Indian opinion in the principal communities agree upon some other form before the end of hostilities :—

"Immediately upon the result being known of Provincial Elections which will be necessary at the end of hostilities, the entire membership of the Lower Houses of Provincial Legislatures shall as a single electoral college proceed to the election of the Constitution-making body by the system of proportional representation. This new body shall be in number about 1/10th of the number of the electoral college.

"Indian States shall be invited to appoint representatives in the same proportion to their total population as in the case of representatives of British India as a whole and with the same powers as British Indian members.

"(e) During the critical period which now faces India and until the new Constitution can be framed His Majesty's Government must inevitably bear the responsibility for, and retain the control and direction of, the defence of India as part of their world war effort, but the task of organising to the full the military moral and material resources of India must be the responsibility of the Government of India with the co-operation of the peoples of India. His Majesty's Government desire and invite the immediate and effective participation of the leaders of the principal sections of the Indian people in the counsels of their country, of the Commonwealth and of the united nations. Thus they will be enabled

to give their active and constructive help in the discharge of a task which is vital and essential for the future freedom of India."

In announcing the scheme, Sir Stafford made it clear that it was only a proposal submitted to the leaders of Indian opinion by the War Cabinet and that its publication was not the publication of a declaration by His Majesty's Government but only a declaration which they would be prepared to make if it met with sufficiently general and favourable acceptance from the various sections of Indian people.

After protracted negotiations, in which representatives of the principal Indian organisations met, in addition to Sir Stafford, the Commander-in-Chief and Col. Louis Johnson, the personal representative in India of President Roosevelt, the Congress rejected the scheme. The Hindu Mahasabha had already rejected it (see chapter on Hindu Mahasabha) and the Muslim League followed suit (see chapter on Muslim League), while other organisations expressed disapproval in more or less strong language (see chapter on the Indian National Liberal Federation).

The Congress Working Committee, which held what was perhaps the longest session in its history, passed a resolution (for full text see last year's issue) of which the following is a summary :—

"The British War Cabinet's new proposals relate principally to the future upon the cessation of hostilities.

"The Committee, while recognising that self-determination for the people of India is accepted in principle in that uncertain future, regret that this is fettered and circumscribed and certain provisions have been introduced which gravely imperil the development of a free and united nation and the establishment of a democratic state. Even the constitution-making body is so constituted that the people's right to self-determination is vitiated by the introduction of non-representative elements. The Committee recognise that future independence may be implicit in the proposals, but the accompanying provisions and restrictions are such that real freedom may well become an illusion.

"The complete ignoring of the ninety millions of the people of the Indian States and their treatment as commodities at the disposal of their rulers is a negation of both democracy and self-determination. Such States may in many ways become barriers to the growth of Indian freedom, enclaves where foreign authority still prevails and where the possibility of maintaining foreign armed forces has been stated to be a likely contingency, and a perpetual menace to the freedom of the people of the States as well of the rest of India.

"The acceptance beforehand of the novel principle of non-accession for a province is also a severe blow to the conception of Indian unity and an apple of discord likely to generate growing trouble in the provinces, which may well lead to further difficulties in the way of the Indian States merging themselves in the Indian Union. The Congress has been wedded to Indian freedom and unity and any break in

that unity, especially in the modern world when people's minds inevitably think in terms of ever larger federations, would be injurious to all concerned and exceedingly painful to contemplate.

"Nevertheless the Committee cannot think in terms of compelling the people in any territorial unit to remain in an Indian Union against their declared and established will. While recognising this principle, the Committee feel that every effort should be made to create conditions which would help the different units in developing a common and co-operative national life.

"The acceptance of the principle inevitably involves that no changes should be made which result in fresh problems being created and compulsion being exercised on other substantial groups within that area. Each territorial unit should have the fullest possible autonomy within the Union, consistently with a strong national state. The proposal now made on the part of the British War Cabinet encourages and will lead to attempts at separation at the very inception of a union and thus create friction just when the utmost co-operation and goodwill are most needed. This proposal has been presumably made to meet a communal demand, but it will have other consequences also and lead politically reactionary and obscurantist groups among different communities to create trouble and divert public attention from the vital issues before the country.

"Any proposal concerning the future of India must demand attention and scrutiny, but in today's grave crisis, it is the present that counts, and even proposals for the future are important in so far as they affect the present. The Committee have necessarily attached the greatest importance to this aspect of the question, and on this ultimately depends what advice they should give to those who look to them for guidance. For this present the British War Cabinet's proposals are vague and altogether incomplete, and it would appear that no vital changes in the present structure are contemplated.

"It has been made clear that the defence of India will in any event remain under British control. At any time defence is a vital subject: during war time it is all important and covers almost every sphere of life and administration. To take away defence from the sphere of responsibility at this stage is to reduce that responsibility to a farce and a nullity and to make it perfectly clear that India is not going to be free in any way and her Government is not going to function as a free and independent Government during the pendency of the war.

"The Committee would repeat that an essential and fundamental prerequisite for the assumption of responsibility by the Indian people in the present is their realisation as a fact that they are free and are in charge of maintaining and defending their freedom. What is most wanted is the enthusiastic response of the people which cannot be evoked without the fullest trust in them and the devolution of responsibility on

them in the matter of defence. It is only thus that even at this grave eleventh hour it may be possible to galvanise the people of India to rise to the height of the occasion.

"It is manifest that the present Government of India, as well as its provincial agencies are lacking in competence, and are incapable of shouldering the burden of India's defence. It is only the people of India through their popular representatives who may shoulder this burden worthily. But that can only be done by present freedom, and full responsibility being cast upon them.

"The Committee, therefore, is unable to accept the proposals put forward on behalf of the British War Cabinet."

Sir Stafford Cripps then announced that the draft declaration of the British Government had been withdrawn and that the position reverted to what it was before he came out to India, "though not quite perhaps to that position."

In spite of the failure of the effort of Sir Stafford Cripps and the bitter tone of the final remarks in the controversy, responsible Indian leaders reiterated their determination to defend the country against aggression.

**Madras Surprise.**—Just at this time, on the eve of the meeting of the All-India Congress Committee, called at Allahabad at the end of April 1942, the Madras Congress Legislature Party, under the guidance of Mr. Rajagopalachari, passed a resolution recommending to the A.-I. C.C. to "acknowledge the Muslim League's claim for separation should the same be persisted in when the time comes for framing the future constitution of India" and to "invite the Muslim League for consultation for the purpose of arriving at an agreement and securing the installation of a National Government to meet the present emergency."

The meeting also passed a resolution voicing "the general feeling in this part of the country that there should be at this critical juncture a popular Government in this province doing its utmost to secure the requisite conditions for the people to play their part. The party is of the opinion further that to facilitate united and effective action in this regard by such a popular Government, the Muslim League should be invited to participate in it."

The party requested the A.-I. C.C. to permit it to take steps to this end, notwithstanding the general all-India policy followed by the Congress.

These resolutions met with a storm of protest from Congress leaders outside Madras, but were welcomed by some moderate leaders and by Muslim League circles.

The Madras resolution acknowledging the Muslim League's claim to separation came up for consideration before a meeting of the A.-I. C.C. at Allahabad in April 1942, but was defeated by 120 votes against 15, while a counter-resolution, moved by Pandit Jagat Narain, opposing any proposal to disintegrate India, was carried by 92 votes to 17. The latter resolution ran:

"The A.I.C.C. is of opinion that any proposal to disintegrate India by giving liberty to any component State or territorial unit to secede from the Indian Union or Federation will be highly detrimental to the best interests of the people of the different States and Provinces and the country as a whole and the Congress therefore cannot agree to any such proposal."

When the bold line suggested by him proved unacceptable to the bulk of Congressmen Mr. Rajagopalachari had to resign his membership of the Congress Working Committee and his leadership of the Madras Legislature Congress party.

**Evolution of "Quit India".**—The weeks that followed the Allahabad meeting of the All-India Congress Committee witnessed a plethora of writings by Mr. Gandhi in his weekly organ, *Harigan*, advocating the policies outlined in the resolutions adopted at Allahabad and resisting Mr. Rajagopalachari's propaganda to settle with the Muslim League on the basis of dividing India. The South Indian leader, for his part, carried on a raging tearing campaign in favour of making peace with Mr. Jinnah and thereby facilitating the establishment of a National Government, which, he affirmed, was essential not only for the well-being of India but also for the object of effectively defending the country against Japanese aggression.

It became apparent from Mr. Gandhi's writings and utterances that he was growing more and more restless and bitter towards Britain for the latter's refusal to concede the Congress demand. Towards the end of April Mr. Gandhi conceived an idea which later crystallised into what has come to be known as the "Quit India" demand. He urged the withdrawal of the British from India not only in India's interest but also for the sake of Britain. He wrote in *Harigan*: "I see no Indian freedom peeping through all this preparation for the so-called Defence of India. It is a preparation pure and simple for the defence of the British Empire. If the British left India to her fate as they had to leave Singapore, non-violent India would not lose anything. Probably the Japanese would leave India alone ..... Her (India's) real safety, and Britain's, too, lie in orderly and timely British withdrawal from India". Later he said: "Hitherto the rulers have said, 'we would gladly retire if we know to whom we should hand over the reins'. My answer now is, 'leave India to God; if that is too much, then leave her to anarchy'."

As time rolled on Mr. Gandhi appeared to abandon the policy of non-embarrassment to Britain's war effort in India. He also hinted that his views on the moral basis of Britain's war had undergone a change. In an interview to the press in Bombay in the middle of May he stated: "I used to say that my moral support was entirely with Great Britain. I am very sorry to have to confess today that my mind refuses to give that moral support". He added: "It is from the frustration of every effort made to bring about unity by me that has arisen the logical step that not until British power is wholly withdrawn from India can there be any real unity because all parties

will be looking to a foreign power..... I am convinced that we are living today in a state of ordered anarchy. It is a misnomer to call such rule as is established in India a rule which promotes the welfare of India. Therefore, this ordered, disciplined anarchy should go, and if there is complete lawlessness in India as a result, I would risk it, for I believe that 22 years of continuous effort at educating India along the lines of non-violence will not have gone in vain and people will evolve real popular order out of chaos."

Mr. Gandhi took care to avoid giving the impression that his demand for the withdrawal of Britain was the outcome of pro-Japanese sentiment. He wrote: "Of course, the people must not, on any account lean on the Japanese to get rid of the British power. That were a remedy worse than the disease. But in this struggle every risk has to be run in order to cure ourselves of the biggest disease, a disease which has sapped our manhood and almost made us feel as if we must for ever be slaves. It is an insufferable thing. The cost of the cure, I know, will be heavy. No price is too heavy to pay for the deliverance. It is true that the solution I have presented is a heroic solution beyond the ken of Englishmen. But being a true friend of Britain and China and Russia, I must not suppress the solution which I believe to be eminently practical and probably the only one in order to save the situation and in order to convert the war into a power for good instead of being what it is, a peril to humanity. .... I am more interested than the British in keeping the Japanese out. For Britain's defeat in Indian waters may mean only the loss of India, but if Japan wins, India loses everything..... It is an unwarranted claim Britain and America are making, the claim of saving democracy and freedom. It is a wrong thing to make that claim when there is this terrible tragedy of holding a whole nation in bondage.

"My proposal is one-sided, i.e., for the British Government to act upon, wholly irrespective of what Indians would do or would not do. I have even assumed temporary chaos on their withdrawal. But if the withdrawal takes place in an orderly manner, it is likely that on their withdrawal a provisional Government will be set up by, and from, among the present leaders. I should hope that with the complete, final and honest withdrawal of the British power, the wise leaders will realise their responsibility, forget their differences for the moment and set up a provisional Government out of the material left by the British power.

"Assuming that the national Government is formed and if it answers my expectations, its first act would be to enter into a treaty with the United Nations for defensive operations against aggressive powers, it being common cause that India will have nothing to do with any of the Fascist powers and India would be morally bound to help the United Nations.

"If I have any hand in guiding the imagined national Government, there would be no further assistance save the toleration of the United Nations on the Indian soil under well-defined conditions. Naturally there will be no prohibition against any Indian giving his own personal

help by way of being a recruit or/and of giving financial aid. It should be understood that the Indian army has been disbanded with the withdrawal of British power. Again if I have any say in the councils of the national Government, all its power, prestige and resources would be used towards bringing about world peace. But of course after the formation of the national Government my voice may be a voice in the wilderness and nationalist India may go war-mad."

Answering the criticism that the withdrawal of Britain might lead to Japanese occupation of India Mr. Gandhi wrote: "Abrupt withdrawal of the Allied troops might result in Japan's occupation of India and China's sure fall. I had not the remotest idea of any such catastrophe resulting from my action. Therefore I feel that if in spite of the acceptance of my proposal, it is deemed necessary by the Allies to remain in India to prevent Japanese occupation, they should do so, subject to such conditions as may be prescribed by the national Government that may be set up after the British withdrawal. I am unable to state that the non-violent effort will make India proof against Japanese or any other aggression. I am not able even to claim that the whole of India is non-violent in the sense required. In the circumstances it would be hypocritical on my part to insist on the immediate withdrawal of the Allied troops as an indispensable part of my proposal. It is sufficient for me to declare that so far as India is concerned, she does not need troops to defend herself, having no quarrel with Japan. But India must not by any act of hers short of national suicide let China down or put the Allied powers in jeopardy. So long therefore as India lacks faith in the capacity of non-violence to protect her against aggression from without, the demand for the withdrawal of the Allied troops during the pendency of the war would itself be an act of violence, if the controllers of the troops hold it to be necessary for their defence to keep them in India for that purpose and that alone."

Implications of his proposal were early in July:—

1. India free of all financial obligation to Britain;
2. The annual drain to Great Britain stops automatically;
3. All taxation ceases except what the replacing Government imposes or retains;
4. The deadweight of an all-powerful authority keeping under subjection the tallest in the land is lifted at once;
5. In short, India begins a new chapter in her national life, as I shall hope will affect the fortunes of the war with non-violence as her predominant sanction. This non-violence will no longer take the shape of non-co-operation and the like. It will express itself in her ambassadors going to the Axis powers not to beg for peace but to show them the futility of war for achieving an honourable end. This can only be done if and when Britain sheds the gains of perhaps the most organized and successful violence the world has seen.

"All this may not come to pass," he continued. "I do not mind. It is worth fighting for, it is worth staking all that the nation has."

**July Resolution.**—With the country thus prepared, the Working Committee of the Congress met at Wardha in the middle of July and passed a lengthy resolution embodying Mr. Gandhi's ideas. The resolution ran:—

"Events happening from day to day, and the experience that the people of India are passing through, confirm the opinion of Congressmen that British rule in India must end immediately, not merely because foreign domination, even at its best, is an evil in itself and a continuing injury to the subject people, but because India in bondage can play no effective part in defending herself and in affecting the fortunes of the war that is decimating humanity. The freedom of India is thus necessary not only in the interest of India but also for the safety of the world and for the ending of Nazism, Fascism, militarism and other forms of Imperialism, and the aggression of one nation over another.

"Ever since the outbreak of the world war, the Congress has studiously pursued a policy of non-embarrassment. Even at the risk of making its *satyagraha* ineffective, it deliberately gave it a symbolic character, in the hope that this policy of non-embarrassment, carried to its logical extreme, would be duly appreciated and that real power would be transferred to popular representatives, so as to enable the nation to make its fullest contribution towards the realisation of human freedom throughout the world, which is in danger of being crushed. It had also hoped that negatively nothing would be done which was calculated to tighten Britain's strangle-hold on India.

"These hopes, have, however, been dashed to pieces. The abortive Cripps proposals showed in the clearest possible manner that there was no change in the British Government's attitude towards India and that the British hold on India was in no way to be relaxed. In the negotiations with Sir Stafford Cripps, Congress representatives tried their utmost to achieve a minimum, consistent with the national demand, but to no avail. This frustration has resulted in a rapid and widespread increase of ill-will against Britain and a growing satisfaction at the success of Japanese arms. The Working Committee view this development with grave apprehension as this, unless checked, will inevitably lead to a passive acceptance of aggression. The Committee hold that all aggression must be resisted, for any submission to it must mean the degradation of the Indian people and the continuation of their subjection. The Congress is anxious to avoid the experience of Malaya, Singapore, and Burma and desires to build up resistance to any aggression on, or invasion of, India by the Japanese or any foreign power.

"The Congress would change the present ill-will against Britain into good-will and make India a willing partner in a joint enterprise of securing freedom for the nations and peoples of the world and in the trials and tribulations which accompany it. This is only possible if India feels the glow of freedom.

"The Congress representatives have tried their utmost to bring about a solution of the communal tangle. But this has been made impossible by the presence of the Foreign Power whose long record has been to pursue relentlessly the policy of divide and rule. Only after the ending of foreign domination and intervention, can the present unreality give place to reality, and the people of India, belonging to all groups and parties, face India's problems and solve them on a mutually agreed basis. The present political parties, formed chiefly with a view to attract the attention of, and influence, the British Power, will then probably cease to function. For the first time in India's history, realisation will come home that princes, jagirdars, zamindars, and propertied and monied classes, derive their wealth and property from the workers in the fields and factories and elsewhere, to whom essentially power and authority must belong. On the withdrawal of British Rule in India, responsible men and women of the country will come together to form a Provisional Government, representative of all important sections of the people of India, which will later evolve a scheme whereby a Constituent Assembly can be convened in order to prepare a constitution for the government of India acceptable to all sections of the people. Representatives of Free India and representatives of Great Britain will confer together for the adjustment of future relations and for the co-operation of the two countries as allies in the common task of meeting aggression. It is the earnest desire of the Congress to enable India to resist aggression effectively with the people's united will and strength behind it.

"In making the proposal for the withdrawal of British Rule from India, the Congress has no desire whatsoever to embarrass Great Britain or the Allied Powers in their prosecution of the war, or in any way to encourage aggression on India or increased pressure on China by the Japanese or any other Power associated with the Axis group. Nor does the Congress intend to jeopardise the defensive capacity of the Allied Powers. The Congress is therefore agreeable to the stationing of the armed forces of the Allies in India, should they so desire, in order to ward off and resist Japanese or other aggression, and to protect and help China.

"The proposal of withdrawal of the British Power from India was never intended to mean the physical withdrawal of all Britishers from India, and certainly not of those who would, make India their home and live there as citizens and as equals with the others. If such withdrawal takes place with good-will, it would result in establishing a stable Provisional Government of India and co-operation between this Government and the United Nations in resisting aggression and helping China.

"The Congress realises that there may be risks involved in such a course. Such risks, however, have to be faced by any country in order to achieve freedom and, more especially at the present critical juncture, in order to save the country and the larger cause of freedom the world over from far greater risks and perils.

"While, therefore, the Congress is impatient to achieve the national purpose, it wishes to take no hasty step and would like to avoid, in

so far as is possible, any course of action that might embarrass the United Nations. The Congress would plead with the British Power to accept the very reasonable and just proposal herein made, not only in the interest of India but also that of Britain and of the cause of freedom to which the United Nations proclaim their adherence.

"Should however this appeal fails, the Congress cannot view without the gravest apprehension the continuation of the present state of affairs, involving a progressive deterioration in the situation and weakening of India's will and power to resist aggression. The Congress will then be reluctantly compelled to utilise all the non-violent strength it might have gathered since 1920, when it adopted non-violence as part of its policy for the vindication of political rights and liberty. Such a widespread struggle would inevitably be under the leadership of Gandhiji.

"As the issues raised are of the most vital and far-reaching importance to the people of India as well as to the peoples of the United Nations, the Working Committee refer them to the All-India Congress Committee for final decision. For this purpose the A.I.C.C. will meet in Bombay on the 7th August, 1942."

**Mr. Gandhi's Commentary.**—Commenting on the resolution, Mr. Gandhi said: "it will be a mass movement of a strictly non-violent character. It will include all that a mass movement can include. I do not want rioting as a direct result. If, in spite of all precautions, rioting does take place it cannot be helped.....I am not going to court imprisonment. The struggle does not involve courting imprisonment. It is too soft a thing. We had, no doubt, made it a business to court imprisonment up to now, but there will be no such thing this time. My intention is to make the thing as short and swift as possible. But if I am dragged into jail, it is difficult to say what I may do. But I can fast, as I have fasted before now, though I should try to avoid such an extreme step so far as possible." Discussing the possibility of negotiations, he said: "There is no room left for negotiations in the proposal for withdrawal. Either they recognise independence or they don't. After that recognition many things can follow. After all it is an open rebellion". Declaring that free India would start functioning immediately after its recognition, he said: "If its withdrawal takes place in perfect good-will, the change will be effected without the slightest disturbance. People would have to come into their own without disturbance. Wise people from among the responsible sections will come together and will evolve a Provisional Government. Then there will be no anarchy, no interruption, and a crowning glory."

In rebuttal of the charge that this projected movement was conceived with a view to helping Japan, Mr. Gandhi wrote in the last week of July an article addressed "To Every Japanese," in which he said he deeply grieved the unprovoked attack against China and the "merciless devastation of that great and ancient land. We are in the unique position of having to resist an imperialism that we detest no less than

yours and Nazism. Our resistance to it does not mean harm to the British people. We seek to convert them. Ours is an unarmed revolt against British rule. An important party in the country is engaged in a deadly but friendly quarrel with the foreign rulers. But in this they need no aid from foreign Powers. You have been gravely misinformed, as I know you are, that we have chosen this particular moment to embrace the Allies when your attack against India is imminent. If we wanted to turn Britain's difficulty into our opportunity we should have done it as soon as the War broke out nearly three years ago.

"Our movement demanding the withdrawal of the British Power from India should in no way be misunderstood. In fact, if we are to believe your reported anxiety for the Independence of India, a recognition of that Independence by Britain, should leave you no excuse for any attack on India. Moreover the reported profession starts ill with your ruthless aggression against China. I would ask you to make no mistake about the fact that you will be sadly disillusioned if you believe that you will receive a willing welcome from India. The end and aim of the movement for British withdrawal is to prepare India, by making her free for resisting all militarist and imperialist ambition, whether it is called British Imperialism, German Nazism or your pattern. Our appeal to Britain is coupled with the offer of Free India's willingness to let the Allies retain their troops in India. The offer is made in order to prove that we do not in any way mean to harm the Allied cause, and in order to prevent you from being misled into feeling that you have but to step into the country that Britain has vacated. Needless to repeat that if you cherish any such idea and will carry it out, we will not fail in resisting you with all the might that our country can muster."

In the period between the adoption by the Working Committee of its July resolution and the meeting of the A.-I.C.C. in August Mr. Gandhi indicated that he was prepared to meet the Viceroy and discuss his demand with him and that he would call off the movement if he were convinced by anyone that in the midst of war the British Government could not declare India free without jeopardising the war effort. "My complaint is that critics talk at me, swear at me but never condescend to talk to me", he said. He wished to guard against "a sudden outburst of anarchy or a state of things which may be calculated to invite Japan". . . . . he would not hesitate to . . . . . limit if he found that no impression was produced on the British Government or the Allied powers.

**Reply to Foreign Criticism.**—Publication of the Working Committee's July resolution aroused much hostile comment abroad in reply to which Mr. Gandhi wrote: "Indian public men should be forgiven if they doubt the sincerity of the fierce opposition which is being organised with ominous unanimity. The latter can only stiffen India's suspicion and resistance". He continued: "the Justice of the demand for the ending of British Power has never been questioned; the

moment chosen for enforcing it is the target of attack. It is clear as crystal in the Working Committee resolution why this moment is chosen. Let me paraphrase it. India is not playing any effective part in the war. Some of us feel ashamed that it is so and, what is more, we feel that if we were free from the foreign yoke, we should play a worthy, nay, a decisive part in the world war which has yet to reach its climax. We know, that if India does not become free now, the hidden discontent will burst forth into a welcome to the Japanese, should they effect a landing. We feel that such an event would be a calamity of the first magnitude. We can avoid it if India gains her freedom. To distrust this simple, natural and honest declaration is to court disaster.

"But the critics say, 'To whom are the British rulers to hand the keys on their withdrawal?' It is a good question. Here is what Maulana Abul Kalam Azad, the Congress President, has said: 'The Congress always stands, firstly for sympathy towards democratic countries, secondly, never desires to embarrass Britain and her war effort, and, thirdly it stands for opposition to the Japanese aggression. The Congress does not desire to take power for itself but for all. If real power is handed over to the Congress, surely it will approach other parties and will persuade them to join'. The Congress President added that he 'had no objection to Britain handing over power to the Muslim League or any other party provided it was real independence. That party will have to approach other parties as no single party can function properly without the co-operation of other parties'. The only thing needful is to hand over complete control without reservation save that during the war period the Allied troops will operate to stem Japanese or Axis attack. But they will have no power of interference with the affairs of India which will be as free as Great Britain herself."

Apart from Indo-British relationship Mr. Gandhi made an important change in his policy in the summer of 1942 when he gave up his old belief that internal unity must precede political emancipation and declared instead that communal unity could only follow the removal of the third party. Writing in *Narajan* in June, he said: "Time is a merciless enemy, if it is also a merciful friend and healer. I claim to be amongst the oldest lovers of Hindu-Muslim unity, and I remain one even today. I have been asking myself why every whole-hearted attempt, made by all including myself to reach unity has failed, and failed so completely that I have entirely fallen from grace and am described by some Muslim papers as the greatest enemy of Islam in India. It is a phenomenon I can only account for by the fact that the third power, even without deliberately wishing it, will not allow real unity to take place. Therefore, I have come to the reluctant conclusion that the two communities will come together almost immediately after the British Power comes to a final end in India. If independence is the immediate goal of the Congress and the League, then, without needing to come to any terms, all will fight together to be free from bondage. When the bondage is done with, not merely the two organisations but all parties will find it to their interest to come together

and make the fullest use of the liberty in order to evolve a national Government suited to the genius of India."

Throughout this controversy over the proposal of Mr. Gandhi, Pandit Jawaharlal Nehru steadfastly advocated that nothing should be said or done which would render India vulnerable to Japanese attack. During the July meeting of the Congress Working Committee the question was put to him whether any political movement in India would not in the ultimate analysis amount to an invitation to Japan to invade India. He answered that whereas India had no wish to injure the cause of China or the defence of India, "it has become highly important to raise the spirit of resistance in order ultimately to be able to resist the Japanese; by passively submitting to things in India today that spirit of resistance will be crushed." He recognised that any step that the Congress might take against the British Government might be full of perils but on the other hand "not taking any step is still more perilous—we have to choose the lesser danger". According to Pandit Jawaharlal Nehru, "the fundamental way to look at it is how ultimately to increase the strength of the Indian people to meet invasion. If I am convinced that I might weaken India I will not take that step".

For a time, there seemed to be some difference of opinion among the front rank Congress leaders on the wisdom of launching a political movement when the enemy was at the country's gates; but eventually unanimity was reached and a resolution was passed (see above) declaring that the withdrawal of British from India was necessary both for Indian independence and for effective resistance to the Axis and that if the British refuse to yield, the Congress had no alternative but to launch a campaign of civil disobedience.

**August Resolution.**—On the eve of the meeting of the A.-I.C.C. in Bombay, the Working Committee of the Congress met and drafted the following resolution for submission to the A.-I.C.C. :—

"The All-India Congress Committee has given the most careful consideration to the reference made to it by the Working Committee in their resolution dated July 14, 1942, and to subsequent events, including the development of the war situation, the utterances of responsible spokesmen of the British Government, and the comments and criticisms made in India and abroad. The Committee approves of and endorses that resolution and is of opinion that events subsequent to it have given it further justification, and have made it clear that the immediate ending of British rule in India is an urgent necessity, both for the sake of India and for the success of the cause of the United Nations. The continuation of that rule is degrading and enfeebling India and making her progressively less capable of defending herself and of contributing to the cause of world freedom.

"The Committee has viewed with dismay the deterioration of the situation on the Russian and Chinese fronts and conveys to the Russian and Chinese peoples its high appreciation of their heroism in defence of their freedom. This increasing peril makes it incumbent on all those who strive for freedom and who sympathise with

the victims of aggression, to examine the foundations of the policy so far pursued by the Allied Nations, which had led to repeated and disastrous failure. It is not by adhering to such aims and policies and methods that failure can be converted into success, for past experience has shown that failure is inherent in them. These policies have been based not on freedom so much as on the domination of subject and colonial countries, and the continuation of the imperialist tradition and method. The possession of empire, instead of adding to the strength of the ruling Power, has become a burden and a curse. India, the classic land of modern imperialism, has become the crux of the question, for by the freedom of India will Britain and the United Nations be judged, and the peoples of Asia and Africa be filled with hope and enthusiasm. The ending of British rule in this country is thus a vital and immediate issue on which depend the future of the war and the success of freedom and democracy. A free India will assure this success by throwing all her great resources in the struggle for freedom and against the aggression of Nazism, Fascism and Imperialism. This will not only affect materially the fortunes of the war, but will bring all subject and oppressed humanity on the side of the United Nations, and give these Nations, whose ally India would be, the moral and spiritual leadership of the world. India in bondage will continue to be the symbol of British imperialism and the taint of that imperialism will affect the fortunes of all the United Nations.

"The peril of today, therefore, necessitates the independence of India and the ending of British domination. No future promises or guarantees can affect the present situation or meet that peril. They cannot produce the needed psychological effect on the mind of the masses. Only the glow of freedom now can release that energy and enthusiasm of millions of people which will immediately transform the nature of the war.

"The A.-I.C.C. therefore repeats with all emphasis the demand for the withdrawal of the British Power from India. On the declaration of India's independence, a Provisional Government will be formed and Free India will become an ally of the United Nations, sharing with them in the trials and tribulations of the joint enterprise of the struggle for freedom. The Provisional Government can only be formed by the co-operation of the principal parties and groups in the country. It will thus be a composite Government, representative of all important sections of the people of India. Its primary functions must be to defend India and resist aggression with all the armed as well as the non-violent forces at its command, together with its Allied powers, and to promote the well-being and progress of the workers in the fields and factories and elsewhere, to whom essentially all power and authority must belong. The Provisional Government will evolve a scheme for a Constituent Assembly which will prepare a constitution for the Government of India acceptable to all sections of the people. This constitution, according to the Congress view, should be a federal one, with the largest measure of autonomy for the federating units, and with the residuary powers vesting in these units. The future relations between India and the Allied Nations will be

friend of theirs now, as they are in trouble. I have always believed that they would never lose."

Six amendments were moved, three of which stressed the need for a communal settlement as a condition precedent to the starting of any mass movement. After Pandit Jawaharlal Nehru, the mover of the resolution, had replied to the debate, the President, Maulana Abul Kalam Azad, appealed to the movers of the amendments to withdraw them and save time. Three amendments were then withdrawn, and the remaining three were rejected. The resolution was carried, 13 members voting against it. The total number of members present was nearly 240.

**Mr. Gandhi's Appeal.**—On the declaration of the result of the resolution, Mr. Gandhi spoke for nearly 70 minutes in Hindi and for 20 minutes in English.

Mr. Gandhi observed that he had no objection to the transfer of power to Muslims. The Muslims would then have a body to administer the affairs of the country. That body would command the allegiance not only of Muslims but of Hindus and other communities as well.

Continuing Mr. Gandhi said that he would write to the Viceroy intimating to him the contents of the resolution and the implications thereof. It would not be very long before the Viceroy's reaction was known. Meanwhile he would advise the members and through them other Indians to feel that very day that they had shaken off the bonds of slavery and that they were free men and women.

In his English speech, Mr. Gandhi remarked that he had the privilege of friendship and trust of many of his friends in India and abroad. Some of them doubted his wisdom and even his honesty. His wisdom was not such a treasure, but honesty was a precious treasure to him. He claimed friendship between the present Viceroy and himself. He wanted Englishmen and the United Nations to examine their hearts and search their hearts. What crime, he asked, had the Congress Committee committed in demanding independence? He hoped that the President of the United States would not distrust the Congress because of its demand. The United Nations and Britain had the opportunity now of a lifetime to declare India free and prove their real intentions. Such an opportunity would never come twice in the same generation, and history would say that they did not discharge their overdue debt to India. He asked for the blessings of the whole world and for the active assistance of the United Nations.

Mr. Gandhi concluded: "Every man is free to go to the fullest length under *ahimsa* (non-violence), by complete deadlock, strikes and other non-violent means. Satyagrahis should go out to die and not to live. It is only when individuals go out to seek and face death that the nation will survive. *Karenge ya Mareenge* (We shall do or die)."

**Last-minute Peace Effort.**—It was reported that on the eve of the A.-I.C.C. meeting and during this session vigorous efforts were made by Congress leaders to contact Mr. Jinnah with a view to arriving at an agreement with the Muslim League.

Just as the Congress was eager to arrive at a settlement with the Muslim League, similarly

there was evidence that the Congress would have accepted any genuine gesture from the Government and cheerfully submit to negotiations in respect of details. The view was widely held at the time that subsequent events would have taken a different course if a week or fortnight had been allowed to elapse after the adoption of the A.-I.C.C. resolution. "We stand to lose more than the Government as the result of a struggle" said a prominent Congress leader; "we have to face fines, imprisonment and shooting. We will face it all, if necessary; but we certainly wish to avoid it, if possible."

Government, however, took a different view of the situation. They were convinced that the Congress had no genuine desire to negotiate a settlement but that with peace on their lips they were secretly planning a widespread subversive movement. Government claimed to have in their possession evidence of dangerous preparations which the Congress and its leaders had made to organise a show-down throughout the country including acts of violence and sabotage which, with imminent Japanese invasion, would have spelt disaster both for India and the cause of the Allied Nations. At all events, it was contended that, in face of Mr. Gandhi's unequivocal declaration that there would be no negotiation on the issue of independence, no useful purpose would be served by discussing a settlement with him. They could not parley with one who had a pistol in one hand and the olive branch in the other. It was felt that to allow more time to the Congress in the hope of reaching a settlement by negotiations would be to give it a much needed chance to perfect the preparations for a bloody revolution. The Government, therefore, decided to act firmly, and they acted quickly.

**Government's Reaction.**—Within a few hours of the adoption of the "Quit India" resolution by the A.-I.C.C. and the termination of its proceedings, Mr. Gandhi and the other Congress leaders were rounded up under the Defence of India Rules and kept under detention, completely isolated from the outside world. Strict measures were taken to prevent the movement from spreading or taking root. In a resolution of the Governor-General-in-Council published on the morrow of the A.-I.C.C. meeting Government expressed regret at the Congress resolution and affirmed their determination to meet the challenge contained in it. The resolution ran:—

"The A.-I.C.C. have ratified the resolution passed by the working Committee of the Indian National Congress on August 5. That resolution demands the immediate withdrawal of British Power from India, and sanctions the starting of a mass struggle on non-violent lines on the widest possible scale.

"The Governor-General-in-Council has been aware, too, for some days past of dangerous preparations by the Congress Party for unlawful, and in some cases violent activities, directed among other things, to the interruption of communications and public utility services, the organisation of strikes, tampering with the loyalty of Government servants, and interference with defence measures, including recruitment.

"India has today a Government stronger and more representative than ever in the past, a Government predominantly Indian and non-official, a Government determined to prosecute the war and no less determined to lead India onto her political goal.

"There is nothing that the Government of India regret more than this challenge at so critical a juncture. But on them there lies the task of defending India, of maintaining India's capacity to wage war, of safeguarding India's interests, of holding the balance between the different sections of her people without fear or favour. That task the Government of India will discharge in face of the challenge now thrown down by the Congress Party with clear determination, but with an anxiety that action shall be preventive of the interruption of the war effort and the other dangers to which they have referred rather than punitive, and with a full consciousness of the responsibility to India and to the cause of the Allies and of civilisation. Their duty is plain and they have to discharge it, profoundly as they must deplore the situation which they have been called upon to face. They urge the people of India to unite with them in resistance to the present challenge of a party. They appeal to them to lay aside all political differences, and for the period of the war place before all other considerations the defence of their country and the achievement of those common aims on which depends the future not only of India but of all the freedom-loving peoples of the world."

**Leaders Arrested.**—On the morning of August 9, Mr. Gandhi and other Congress leaders were arrested in Bombay and simultaneously throughout the country a round-up of important Congressmen took place. The total number of arrests on that day amounted to a few hundreds. In the words of an official publication, the first reactions to the arrests were surprisingly mild. On August 9 there were disturbances in Bombay, Ahmedabad and Poona, but the rest of the country remained quiet. On August 10 disturbances occurred also in Delhi and a few towns in the United Provinces; but still no serious repercussions were reported from elsewhere. It was from August 11 that the situation began to deteriorate rapidly. From then onwards, apart from the *hartals*, protest meetings and similar demonstrations that were to be expected, concerted outbreaks of mob violence, arson, murder and sabotage took place; and in almost all cases these were directed either against communications of all kinds (including railways, posts and telegraphs) or against the Police. Moreover, these outbreaks started almost simultaneously in widely separated areas in the provinces of Madras, Bombay and Bihar and also in the Central and United Provinces. The damage done was so extensive as to make it incredible that it could have been perpetrated on the spur of the moment without special implements and previous preparation; and in many instances the manner in which it was done displayed a great deal of technical knowledge. Block instruments and control rooms in railway stations were singled out for destruction; and the same technical skill appeared over and over again both in the selection of objects for attack—on the railways, in Post and Telegraph offices

and lines, and on electric power lines and installations—and also in the manner in which the damage was carried out. On the other hand, industrial plant and machinery, even where it was fully employed on Government work, escaped any serious injury.

(Copious extracts from the official publication on the disturbances were included in past issues of *The Indian Year Book*.)

In the course of a debate in the Assembly, Sir Reginald Maxwell disclosed that till the middle of November 1942; 49 fatal and 1,363 non-fatal cases amongst the police force were reported from mob violence. Mob violence was responsible for destroying or badly damaging 192 police stations and posts, 494 Government buildings, 318 railway stations and 309 post and telegraph offices. There were 103 cases of serious damage to railway track and 11,285 cases of serious damage or destruction of telegraph and telephone lines and installations. There were three cases in which military property and installations were destroyed or damaged. There were 14 fatal cases and 70 non-fatal cases amongst the military from mob violence. These figures would indicate the seriousness of the rebellion Government had to face in this country.

"A rebellion, an attempted internal revolution" was the description applied to the disturbances by the Home Member. He claimed that the rebellion had been quelled and that Government had come through the ordeal unscathed through the loyalty of the Government servants and the steadiness of the country. Sir Reginald was emphatic that it was not a peoples' movement. Labour wishes to get on with work, and the Muslims and Scheduled Classes had kept entirely aloof. The responsibility for the disorders was of the Congress.

Muslims as a community kept out of the disturbances; so did the followers of Dr. Ambedkar. Except for cessation of work for a few weeks in the Ahmedabad textile industry, the industrial population was generally unaffected by the movement. The public services, the police, the post and telegraphs, the railways and urban utility services stuck to their work. Students were enthusiastic for a few months, but later their zeal flagged.

Most of the moderate leaders condemned the violence in unmistakable terms. Mr. C. Rajagopalachari was among the foremost of the critics of the movement and of the form which it took. Many of them, however, disputed the Government's contention that the movement was initiated and inspired by the Congress, contending that it was more the expression of the peoples' frustration and disappointment at Britain's attitude towards Indian aspirations and an expression of the people's resentment over the arrest of Mr. Gandhi and the Congress leaders. They were anxious that something must be done to put a stop to the movement and to restore normal political life. They suggested that negotiations be undertaken with Mr. Gandhi both for a settlement for the Indo-British question and the inter-party disputes within the country.

In pursuance of this desire, Dr. Shyamaprasad Mookerjee, right-wing Hindu Mahasabha leader, requested the Viceroy to permit him to meet Mr. Gandhi with a view to exploring the possibilities of a Congress-League settlement. This was turned down. Mr. Rajagopalachari made a similar attempt a few weeks later, but he too met with the same fate.

**Mr. Gandhi's Fast.**—There was complete frustration in the Indian political world. There seemed no way out of the deadlock, both Indo-British and internal. At this juncture, on the 8th of February 1943, exactly six months after his arrest, Mr. Gandhi announced his intention to undertake a fast for 21 days. He had earlier written to the Viceroy reiterating his faith in non-violence, abhorring the violence both of the Indian masses and of the Government in the shape of repression, protesting against the charge that he and the Congress were responsible for all that had taken place in the country, demanding an opportunity to rebut that charge, and asking for facilities to go over the whole question, in consultation with the members of the Congress Working Committee, with a view to an examination of the political situation *de novo*. His letters to the Viceroy and the latter's replies were published in *extenso* in past issues of *The Indian Year Book*.

**Plea for Release.**—There was widespread demand for the release of Mr. Gandhi or at least for facilities to enable him to consult the members of the Working Committee. The Opposition in the Indian Legislature raised the question of Mr. Gandhi's fast through an adjournment motion and avoiding controversial issues, demanded the release of Mr. Gandhi both on personal grounds and on wide political considerations. They uttered a warning that "if Mr. Gandhi dies in jail, the Indian people will never forget it and forgive the British people." The Government spokesman was most outspoken. The Congress, he said, had passed the resolution hoping to win Jap favour at a time when invasion seemed imminent. Now that the Congress movement has been decisively defeated and the Jap threat had receded, the Congress leader was trying to rehabilitate the party's credit. Mr. Gandhi's demand that he should be convinced of his guilt was like the United Nations asking Hitler to judge the responsibility for the present war. The Home Member described Mr. Gandhi as a rebel and declared that, so long as his rebellious resolution was not cancelled, Mr. Gandhi could not claim the rights of a citizen. As for the moral virtue of the fast, Sir Reginald declared that it was repugnant to the western idea of decency to exploit an opponents' feeling of humanity, chivalry or mercy. The motion was talked out.

A couple of days later an All-parties conference was held at Delhi to voice a joined demand that in the interest of the future of India and of international good-will Mr. Gandhi should be released immediately and unconditionally. To this the Viceroy replied that no change had occurred in the situation since February 10, when the Government decided to let Mr. Gandhi fast in detention, and that the Government could not surrender to coercion. The conference later made an appeal to the Premier of Great Britain and obtained a similar answer.

In this connection it is noteworthy that the Hindu Mahasabha expressed anxiety over Mr. Gandhi's life and said that, in the event of the strain of the fast endangering his health seriously, Government must release him to save his precious life. At the same time the Mahasabha declared that fasting as a political weapon was bound to be futile, detrimental and suicidal.

Similarly, Mr. Jinnah refused to be associated with the conference on the ground that the Viceroy-Gandhi correspondence showed no change on the part of Mr. Gandhi in the attitude towards the Muslim League except the reiteration of his oft-repeated political demand having for its sanction a threat to resort to mass civil disobedience. "Now he has undertaken this dangerous fast with a view to enforcing that demand which, if conceded or agreed to under such coercive method, it is obvious, will destroy the Muslim demand and involve complete sacrifice of the vital and paramount interests of Muslim India. Moreover, mere political issues and the complex political problems of this sub-continent, involving the destinies of millions, cannot be settled or solved by means and methods of fasting adopted by Mr. Gandhi. I do, however, hope that your efforts may lead to the path of reason and peace and then there would come an opportunity for friendly negotiations which might, I trust, result in a settlement satisfactory not only to the two major nations—Hindus and Muslims—but to all other interests and minorities concerned."

During the controversy over Mr. Gandhi's fast a mild sensation was caused by the resignation of three members of the Viceroy's expanded Executive Council, namely, Sir H. P. Mody, Mr. M. S. Aney and Mr. N. R. Sarker. Explaining the reasons for their resignations they said that "certain differences arose on what we regarded as a fundamental issue (the action to be taken on Mahatma's fast) and we felt we could no longer retain our offices."

Meanwhile, Mr. Gandhi successfully survived the 21-day foodless ordeal, although on two occasions his condition caused anxiety. On the conclusion of the fast the commotion which had prevailed between February 10 and March 4 gradually subsided.

Nevertheless, the situation created by the fast was further considered by the non-party leaders who again met, this time in Bombay, and issued the following resolution:—

"We are of the opinion that the deplorable events of the last few months require a reconsideration of their policy both by Government and the Congress. The recent talks which some of us have had with Mr. Gandhi lead us to believe that a move for reconciliation at the present juncture will bear fruit.

"It is our conviction that if Mr. Gandhi is set at liberty he would do his best to give guidance and assistance in the solution of the internal deadlock and that there need be no fear that there would be any danger to the successful prosecution of the war.

"The Viceroy may be approached on our behalf to permit a few representatives to meet Mr. Gandhi authoritatively to ascertain his reactions to recent events and to explore with him avenues for a reconciliation."

In pursuance of this resolution representations were made to the Viceroy to let some of the non-party leaders meet Mr. Gandhi. Declining to give the facilities sought, the Viceroy said that if Mr. Gandhi was prepared fully to repudiate the Congress resolution of August 1942, to condemn the incitements to violence represented by his reference to "open rebellion," etc., and if he and the Congress party were prepared to give assurances for the future, acceptable to the Government, then the matter could be considered further.

**Silence and Inactivity.**—The months that followed the termination of Mr. Gandhi's fast were marked by comparative silence and inactivity. The disturbances, which broke out in August 1942 and continued with varying intensity for six months, virtually ceased in the spring of 1943. This was undoubtedly due to the stern measures taken by Government; but it was also due to the atmosphere of anxiety and sorrow created by Mr. Gandhi's fast in February 1943. In particular, the disapproval of violence in any form voiced by Mr. Gandhi in his letters to the Viceroy, published in the first half of February 1943, served to damp the ardour of those Indians who had imagined that either the Congress or Mr. Gandhi had sanctioned acts of violence. The cumulative effect of these factors was the virtual cessation of sabotage, arson and other acts of mob violence and mischief which had marked the latter half of 1942.

The apparent determination of Government to face the situation in the country should Mr. Gandhi's fast prove fatal rather than give an "unrepentant rebel" facilities for normal political life, coupled with their refusal to encourage non-Gandhite Congressmen and non-Congress leaders to explore possibilities of an internal settlement in consultation with Mr. Gandhi, produced a stifling stillness in the political atmosphere.

Congress activity in 1943-44 therefore was next to nothing. Such political life as prevailed in the country was confined to Liberals and non-party leaders (see chapter on Liberal Federation) and the Muslim League (see chapter on Muslim League). The only activity directly concerning the Congress or emanating from Congressmen was Mr. Gandhi's letter to Mr. Jinnah in the summer of 1943 and an occasional move by released Congressmen to meet together and evolve an agreed policy in the absence of official Congress leadership.

In response to an appeal made by Mr. Jinnah in the Delhi session of the Muslim League inviting Mr. Gandhi to write to him, the latter addressed a letter to the League leader offering to meet him. Not only were the contents of the letter not published, but Government refused to forward it to Mr. Jinnah.

The twelve-month period from the summer of 1943 to that of 1944 was one of depression and inactivity. A feeble attempt made by right wing Congressmen released from jail to whip up some kind of political activity in the country was effectively scotched by Mrs. Sarojini Naidu.

Throughout this period there was no authoritative and comprehensive statement of Government's policy towards the Congress, although there were occasional announcements on specific issues. Lord Linlithgow, in his farewell address to the Central Legislature in the autumn of 1943, adopted an attitude of studied silence in respect of the Congress. People thought that it was done in order not to anticipate any new policy which his successor might unfold. This belief was re-inforced by broad hints thrown by the Viceroy-designate, Lord Wavell, on the eve of his assumption of office.

Much was, therefore, expected from Lord Wavell who assumed office in the autumn of 1943. Within a few days of his being sworn in, however, he turned his attention to the famine situation in Bengal and naturally devoted all his energies to that problem in preference to the political question.

This period witnessed a sad event, namely, the passing away of Mrs. Gandhi. She died in detention in the Aga Khan's Palace, a victim of heart attacks. There were repeated demands from the public for her release, but Government seemed to be of the view that she would be more happy where she was, especially when adequate medical help was made available to her. This was the second bereavement of Mr. Gandhi since his arrest and detention, the first being the death of Mr. Mahadev Desai, his secretary and confidante, in August 1942. As during the fast in the spring of 1943, friends and relatives of the Gandhi family were allowed to enter the Aga Khan's Palace to visit Mrs. Gandhi during the latter part of her prolonged illness and later to attend her funeral.

**Letter to Mr. Jinnah.**—One of the first acts of Mr. Gandhi after his release in May 1944 was to release the text of his letter to Mr. Jinnah which was written from detention about a year previously and which was withheld by Government. Here is the text of the letter: "Dear Quaid-e-Azam, When some-time after my incarceration, Government asked me for a list of newspapers I would like to have, I included *Dawn* in my list. I have been receiving it with more or less regularity. Whenever it comes to me I read it carefully. I have followed the proceedings of the League, as reported in the *Dawn* columns. I noted your invitation to me to write to you. Hence this letter. I welcome your invitation. I suggest our meeting face to face rather than talking through correspondence. But I am in your hands. I hope this letter will be sent to you and, if you agree to my proposal, that the Government will let you visit me. One thing I had better mention. There seems to be an 'if' about your invitation. Do you say I should write only if I have changed my heart? God alone knows men's hearts. I would like you to take me as I am. Why should not both you and I approach the great question of communal unity as men determined on finding a common solution, and work together to make our solution acceptable to all who are concerned with it or are interested in it?" The publication of this letter had no effect on Mr. Jinnah.

In the weeks immediately following his release Mr. Gandhi concentrated on the collection of facts and opinions regarding what had happened during his detention and on efforts to gauge the feeling in the country as he emerged out of his detention. Typical of his reaction immediately after his release was his letter to the Rt. Hon. M. R. Jayakar in which he said: "The country expects much from me. I do not know how you feel about this release. I am not at all happy. I feel even ashamed. I should not have fallen ill. I tried not to, but failed. I feel that they will imprison me as soon as I am declared free from the present weakness. And if they do not arrest me, what can I do? I cannot withdraw the August resolution. As you have very properly said, it is innocuous. You may differ about the sanction. It is the breath of life for me."

**Wavell-Gandhi Correspondence.**—About this time the correspondence which passed between Mr. Gandhi while was a detainee in the Aga Khan's Palace and Lord Wavell, the Viceroy saw the light of day. The starting point of these letters was a notice served on Mr. Gandhi on behalf of the Government of India giving reasons for his detention. . . . the right of making a . . . He suggested that Lord . . . upon Ahmednagar and the Aga Khan's Palace in order to probe the hearts of your captives," adding that if, as His Excellency believed, the Congress leaders were high-minded persons, they should be treated as such and their interpretation of their formula should be accepted. Mr. Gandhi also assured Lord Wavell that he and the other Congress leaders were all friends of the British, however much they might criticise the British Government and system in India. If they could but be trusted, they would be found to be the greatest helpers in the fight against Nazism and the like.

Lord Wavell, writing to Mr. Gandhi, urged that the greatest contribution that the Congress Party could make towards India's welfare was to abandon the policy of non-co-operation and join wholeheartedly with other parties and the British in helping India's economic and political progress. He assured Mr. Gandhi that he was only seeking the best means to implement the Cripps Offer without delivering India to confusion and turmoil. Wisdom and a spirit of goodwill and compromise would be required to arrive at the right solution; but with good leadership he was sure a solution could be found.

In the letters which Mr. Gandhi exchanged with Lord Wavell he argued in effect that the "Quit India" demand had no sinister significance but only gave vivid expression to the people's desire for real political freedom, if only to render India's war effort real and wholehearted; that civil disobedience was not actually launched by the August resolution but was embodied in it as a contingent sanction; that it was never his intention, nor that of the Congress, that the movement should depart from non-violence; and that, above all, the Congress would give genuine and complete help in resisting Nazism, etc., if its co-operation were sought in earnest. Lord Wavell contended

that the resolution was ill-timed and unfriendly and that the Congress could not escape responsibility for the tragic events which followed although he exonerated the Congress and Mr. Gandhi of any wish deliberately to aid the Japanese.

About this time, light was also thrown on the correspondence between Mr. Gandhi in detention and the authorities in connection with Government's charge fastening the blame for the disturbances on the Congress. (See last year's issue of *The Indian Year Book*.)

**Letter to Lord Wavell.**—These letters belong, however, to the pre-release era. His expressed views after the release are more in accord with those contained in his letters to Lord Wavell rather than in those addressed to Lord Linlithgow. In the middle of June 1944, Mr. Gandhi wrote to the Viceroy: "Though there is little cause for it, the whole country and even many from outside expect me to make some decisive contribution to the general good. I am sorry to say my convalescence threatens to be fairly long. Even if I was quite well, I could do little or nothing unless I knew the mind of the Working Committee of the Congress. I pleaded as a prisoner for permission to see them. I plead now as a free man for such permission. If you will see me before deciding, I shall gladly go wherever you want me to, as soon as I am allowed by my medical advisers to undertake long-distance travelling."

To this His Excellency replied: "In consideration of the radical difference in our points of view which appeared in our recent correspondence, I feel that a meeting between us at present could have no value and could only raise hopes which would be disappointed. I am afraid that similar considerations apply to your request to see the Working Committee. You have recently made public your adherence to the 'Quit India' resolution, which I am afraid I do not regard as a reasonable or practical policy for the immediate future. If after your convalescence and on further reflection, you have a definite and constructive policy to propose for the furtherance of India's welfare, I shall be glad to consider."

**Advice to Congressmen.**—Within a week of the receipt of the Viceroy's reply, Mr. Gandhi made his first public utterance since his release. Addressing the Congressmen of Maharashtra, he said there was no cause to feel frustrated because "we have not achieved our goal within a given period." Speaking for himself, he said he had never for one moment felt that sense of frustration. What was needed was "unshakeable faith in ourselves." Referring to the communal tangle, the political deadlock and the food situation, Mr. Gandhi said: "I have an answer for all these, but I may not attempt it at this meeting." The only solution of India's sufferings, he added, was a real National Government. It was essential that India should be free. He reaffirmed his unbounded faith in truth, non-violence and non-violent non-co-operation with what he considered to be evil. Mr. Gandhi said that his authority as representative of the Congress had lapsed with his imprisonment.

**C. R. Formula.**—The next stage arrived shortly after. Mr. C. Rajagopalachari, who had spent a few days with Mr. Gandhi while the latter was recuperating at Panchgani, announced in July that, on behalf of Mr. Gandhi, he had carried on negotiations with Mr. Jinnah for a settlement on the basis of virtual agreement on the principle of Pakistan. Mr. Jinnah declined to express an opinion on the proposals, but said he would submit the scheme to the League Working Committee if it was forwarded to him by Mr. Gandhi himself. Mr. Rajagopalachari felt that it was futile to allow Mr. Jinnah, if he could not himself wholeheartedly back it, to put the proposals before the League Working Committee. The personal negotiations, therefore came to an end and Mr. Rajagopalachari released the correspondence between himself and Mr. Jinnah as he wished to take the public into confidence. "My efforts to secure Mr. Jinnah's powerful help in pushing through an honourable settlement of the communal question have reached a stage when the public have to be taken into confidence," Mr. Rajagopalachari said in his statement. "The public will note from the correspondence now published that I had secured Gandhiji's personal approval even during his fast in February-March last year for the formula that I am now releasing. All parties may judge the formula on its merits. I felt that it was futile to allow Mr. Jinnah, if he could not himself wholeheartedly back it, to put my proposal before the Muslim League. Let the League and all who are interested in the solution of the problem apply their minds to the question dispassionately and in the interests of the whole country. Needless to say I am taking the public into confidence with Gandhiji's approval. Both he and I have approached the question in no bargaining spirit. The formula may now be regarded as our joint contribution to the solution of the communal problem and dealt with as such."

The correspondence on this subject between Mr. Jinnah and Mr. Rajagopalachari was published in last year's issue of *The Indian Year Book*.

Close on the heels of the publication of the Gandhi-cum-C.R. offer to Mr. Jinnah, Mr. Gandhi made another gesture, this time to British authority. According to a British journalist, who had had a series of interviews with Mr. Gandhi, the latter "is prepared to accept and to advise the Congress to participate in a war-time National Government in full control of the civil administration, leaving the Viceroy and the Commander-in-Chief in full control of the British and Indian armies. It would be expected that the establishment of such a Government would be accompanied now by a guarantee of Indian independence after the war. Mr. Gandhi has also approved the proposal submitted to Mr. Jinnah by Mr. C. Rajagopalachari. Mr. Gandhi pointed out that he had no authority to speak in the name of the Congress without consulting the Working Committee, but there is no doubt whatever that his views and the Hindu-Muslim proposals as endorsed by him would be accepted by them without hesitation. (For details see last year's issue of *The Indian Year Book*.)

**Request to Viceroy.**—Mr. Gandhi followed this up by writing direct to the Viceroy. The following is the text of the correspondence:—

Mr. Gandhi's letter to Viceroy:—15th July, 1944: "You have no doubt seen the authentic copies, now published in the Indian Press of the statements given by me to Mr. Gelder. As I have said to the Press, they were meant primarily to be shown to you. Mr. Gelder, no doubt with the best of motives gave the interview premature publicity. I am sorry. The publication will nevertheless be a blessing in disguise, if the interview enables you to grant at least one of my request contained in my letter of 17th June 1944."

Viceroy's Reply:—22nd July 1944: "Thank you for your letter of 15th July. I have seen the statements you made to Mr. Gelder, and your subsequent explanation of them. I do not think I can usefully comment at present, except to repeat what I said in my last letter that if you will submit to me a definite and constructive policy, I shall be glad to consider it."

Mr. Gandhi's proposals to Viceroy:—27th July 1944: "I must admit my disappointment over your letter of the 22nd instant. But I am used to work in the face of disappointment. Here is my concrete proposal. I am prepared to advise the Working Committee to declare that in view of the changed conditions, mass Civil Disobedience envisaged by the resolution of August 1942 cannot be offered and that full co-operation in the war effort should be given by the Congress if a declaration of immediate Indian Independence is made and a National Government responsible to the Central Assembly be formed subject to the proviso, that, during the pendency of the war, the military operations should continue as at present but without involving any financial burden on India. If there is a desire on the part of the British Government for a settlement, friendly talks should take the place of correspondence. But I am in your hands. I shall continue to knock so long as there is the least hope of an honourable settlement. After the foregoing was written, I saw Lord Munster's speech in the House of Lords. The summary given by him in the House of Lords fairly represents my proposal. This summary may serve as a basis for mutual friendly discussion."

Viceroy's reply:—15th August, 1944: "Thank you for your letter of 27th July. Your proposals are:—

"That you should undertake to advise the Working Committee (a) that in view of changed conditions mass Civil Disobedience envisaged by the resolution of August, 1942 cannot be offered, and (b) that full co-operation in the war effort should be given by Congress, provided that His Majesty's Government (a) declare immediate Indian independence, and (b) form a 'National Government' responsible to the Central Assembly, subject to the proviso that, during the pendency of the war, the military operations should continue as at present but without involving any financial burden on India."

"His Majesty's Government remain most anxious that a settlement of the Indian problem should be reached. But proposals such as

those put forward by you are quite unacceptable to His Majesty's Government as a basis for discussion, and you must realise this if you have read Mr. Amery's statement in the House of Commons on July 28th last. They are indeed very similar to the proposals made by Maulana Abul Kalam Azad to Sir Stafford Cripps in April 1942 and His Majesty's Government's reasons for rejecting them are the same as they were then.

"Without recapitulating all these reasons in detail, I should remind you that His Majesty's Government at that time made it clear: (a) That their offer of unqualified freedom after the cessation of hostilities was made conditional upon the framing of a constitution agreed by the main elements of India's national life and the negotiation of the necessary treaty arrangements with His Majesty's Government; (b) That it is impossible during the period of hostilities to bring about any change in the constitution, by which means alone a "National Government," such as you suggest, could be made responsible to the Central Assembly. The object of these conditions was to ensure the fulfilment to their duty to safeguard the interests of the racial and religious minorities and of the Depressed Classes, and their treaty obligations to the Indian States.

"It was upon the above conditions that His Majesty's Government invited Indian leaders to take part in an interim government which would operate under the existing constitution. I must make it quite clear that until the war is over, responsibility for defence and military operations cannot be divided from the other responsibilities of Government and that until hostilities cease and the new constitution is in operation, His Majesty's Government and the Governor-General must retain their responsibility over the entire field.

"So far as the question of India's share of the cost of the war is concerned, this is essentially a matter for settlement between His Majesty's Government on the one hand and the Government of India on the other, and existing financial arrangements can only be reopened at the instance of one or the other.

"It is clear, in these circumstances, that no purpose would be served by discussion on the basis which you suggest. If, however, the leaders of the Hindus, the Muslims and the important minorities were willing to co-operate in a transitional Government established and working within the present constitution, I believe good progress might be made. For such a transitional government to succeed there must, before it is formed, be agreement in principle between Hindus and Muslims and all important elements as to the method by which the new constitution should be framed. This agreement is a matter for Indians themselves. Until Indian leaders have come closer together than they are now, I doubt if I myself can do anything to help. Let me remind you too that minority problems are not easy. They are real and can be solved only by mutual compromise and tolerance.

"The period after the termination of hostilities for which the transitional Government would last would depend on the speed with which the new constitution could be framed. I see no reason why preliminary work on that constitu-

tion should not begin as soon as the Indian leaders are prepared to co-operate to that end. If they can arrive at a genuine agreement as to the method of framing the constitution no unnecessary time need be spent after the war in reaching final conclusions and in agreeing on treaty arrangements with His Majesty's Government. There again, the primary responsibility rests on the Indian leaders."

**Mr. Gandhi's reaction.**—Commenting on the Viceroy's reply, Mr. Gandhi said: "the Viceroy's proposition means that unless all the main parties agree as to the constitution of the future, and there is agreement between the British Government and the main parties there is to be no change in the constitutional position, and the Government of India as at present is to be carried on. The names of the parties given in the Government reply are illustrative only. I have no doubt that, on due occasions, more will be exhibited as from a conjurer's bag and who knows how and when the British Government will agree to surrender control. It is clear as crystal that the British Government do not propose to give up the power they possess over the 400 millions, unless the latter develop strength enough to wrest it from them. I shall never lose hope that India will do so by purely moral means."

Political circles in India generally welcomed Mr. Gandhi's double gesture to the Viceroy and Mr. Jinnah although some Liberal leaders questioned the wisdom of the acceptance of the Pakistan principle, while a Hindu Mahasabha spokesman derisively referred to it as "from 'Quit India' to 'Split India.'" A fierce controversy raged for weeks. As for Mr. Gandhi he said: "I myself feel firmly that Mr. Jinnah does not block the way, but the British Government do not want a just settlement of the Indian claim for independence which is overdue, and they are using Mr. Jinnah as a cloak in denying freedom to India." He denied the interpretation put in certain quarters that the 1942 August Congress resolution had lapsed. On the other hand the resolution, he said, could not be altered except by the Congress Working Committee, but his authority under that resolution had lapsed. "Let me make it clear," he observed, "that the lapsing of my authority has nothing to do with the normal activities of Congressmen."

"What no one can do in the name of the Congress is mass civil disobedience which was never started and which, as I have said, I cannot at the present moment, even in my personal capacity start. The 'Quit India' resolution, I hold to be absolutely innocuous." Dealing with the Cripps Offer, Mr. Gandhi said the proposals were not acceptable to him "for the simple reason that they contemplate the perpetual vivisection of India and they work as an effective barrier against Indian Independence." His own proposals covered the whole of India, British India as well as Indian (Princes) India. "I shall never be a party to a sale of the rights of the people of the States for the sake of freedom of the people of British India."

The doings in India produced little impression on Whitehall whose reaction was restricted to a reiteration of the Cripps Offer. Mr. Amery

said: "Britain stands by the promises of independence after the war made to India two years ago. The Government stands by those proposals in all their generous amplitude. We shall stand by them in our victory, as we did in the days of adversity." Mr. Amery added that Mr. Gandhi had expressed his views on the immediate situation and, so long as that was the basis of his proposals, they did not afford even a starting point for a profitable discussion with the Viceroy or with the interned Congress Party leaders. The proposals were in no sense in response to Lord Wavell's invitation to produce constructive proposals."

If Mr. Gandhi was cold-shouldered by Whitehall, he met with poor response from Mr. Jinnah who in his address to the Lahore session of the League Council was highly critical of the manner in which the Gandhi-C.R. offer was handled from Panchgani. Thereupon Mr. Gandhi sent a communication to Mr. Jinnah conveying to the latter the C.R. formula. This was the basis of a meeting between Mr. Gandhi and Mr. Jinnah which took place in September 1944. (For details see chapter on "The Muslim League.".)

**Constructive Work.**—Meanwhile, Mr. Gandhi gave further evidence of his disapproval of violence by advising underground Congress workers to give themselves up to authority on the ground that sabotage and all that it meant, including the destruction of property, was in itself violence. He said: "the question most discussed with me by visitors is whether I approve of underground activities. These include sabotage, the publication of unauthorized sheets, etc. It has been suggested to me that without some workers going underground they could have done nothing. Some have contended that destruction of property, including dislocation of communications provided that safety of human life could be insured should surely be counted as non-violence. Examples of other nations having not hesitated to do all these things and much worse have been cited. My reply is that no nation has, so far as I know, deliberately used Truth and Non-violence as exclusive means for the attainment of freedom. Judged by that standard, I say unhesitatingly that underground activities, even though utterly innocent in themselves, should have no place in the technique of non-violence. Sabotage and all it means, including destruction of property, is in itself violence. Though these activities may be shown to have touched the imagination of some people and roused their enthusiasm, I have no doubt that they have harmed the movement as a whole.

"I swear by the constructive programme. Let me recount the items of that programme:—

(1) Communal unity, (2) Removal of untouchability, (3) Prohibition, (4) Khadi, (5) Other village industries, (6) Village sanitation, (7) New or basic education, (8) Adult education, (9) Uplift of women, (10) Service of the so-called aboriginals, (11) Education in health and hygiene, (12) Propaganda of *rashtra bhasha*, (13) Love of one's own language, and (14) Working for economic equality.

"Unfortunately the workers have not developed in that programme the living faith which I have. I can but re-emphasize the

importance of that programme. And if the whole of India could be converted to take to that programme we should reach our goal in the quickest manner possible. To the workers who are still underground, I advise: If you share my conviction that underground activity is not conducive to the growth of the spirit of active non-violence, you will discover yourselves and take the risk of being imprisoned believing that imprisonment thus undergone itself helps the freedom movement."

Mr. Gandhi also seemed to contemplate a new drive among India's 700,000 villages evidently as a counter-blast to the many post-war reconstruction plans being adumbrated by Government and non-official agencies.

In addition to the disbursement of the Kasturba Memorial Fund (started to commemorate Mrs. Gandhi), which had crossed the one-crore limit and the bulk of which is proposed to be spent among the village folk, it was suggested that the resources and man-power of the principal Gandhian institutions (whose personnel includes highly trained and disciplined field-workers) should be deployed throughout rural India. This new force is calculated to win over the masses to the Gandhi cult and through it to the Congress.

**Desai-Liaquat Talks.**—In the winter of 1944-45 an interesting development occurred which at least provided an opening for big political changes in the summer of 1945. Mr. Bhulabhai J. Desai, Leader of the Congress Party in the Assembly, initiated negotiations with Nawabzada Liaquat Ali Khan, Deputy Leader of the Muslim League Party in the Assembly. These led up to a proposal by the former which met with a measure of encouragement from the latter. At one time it was believed to have resulted in a pact between the two in their individual capacity, it being assumed that neither would have continued in their efforts without the tacit approval of their respective principals, namely, Mr. Gandhi and Mr. Jinnah. The facts, (as revealed by Nawabzada Liaquat Ali Khan in September 1945) showed that Mr. Desai had suggested a formula for an interim agreement between the Congress and the League. It is known that Mr. Desai discussed this formula with Lord Wavell and that, although its main provisions were varied, it provided the basis for the proposal made by the Viceroy in June 1945 and in a sense for the Simla Conference (see later).—Here is the Nawabzada's version, which is the only authoritative statement on the subject:

"Mr. Desai met me after the last autumn session of the Central Legislative Assembly and we informally discussed the prevailing distressing condition in the country, economic and otherwise.... It was recognised all round that the Government of India, with its present composition, was incapable of dealing effectively with the various problems which had arisen and were bound to arise in the future.

"Mr. Desai, during the course of the conversation, asked me about the attitude of the Muslim League with regard to some interim arrangement at the Centre and a temporary reconstitution of the Governor-General's Executive Council in a manner which would

secure for it the confidence of all the peoples so that it may be able to help them in their present plight and deal more effectively than what had been done in the past with the serious situation that was bound to arise in the future on account of the prolongation of the war.

"I explained to him the position in the light of the resolutions that were passed from time to time by the Muslim League in this connection, and told him that my personal view was that, if any proposals were made to ease the situation, the Muslim League was bound to give its very careful consideration to them, as it had always done in the past, because the Muslim League had always been anxious to come to the rescue of the people and assist them in their sad plight and help the country in tiding over the difficult period ahead.

"Mr. Desai saw me again in Delhi in the beginning of January this year just as I was leaving on a tour of the Madras Presidency and showed me some proposals which had been drafted for the formation of an interim Government at the Centre. A copy of which he was good enough to give me and which was to be treated as strictly private and confidential, and on the basis of which he told me he was going to make an effort to bring about a change in the composition of the Government of India.

"He told me his plan was to meet the Viceroy and Mr. Jinnah in this connection. I told him that in my personal opinion the proposals were such that they could be made a basis for discussion, but I did not see any prospect of his making any headway unless he could either get Mr. Gandhi to move in the matter personally or get his definite approval and open support for the move that he was making, as Mr. Gandhi was the only person who could deliver the goods on behalf of the Congress in the absence of the Working Committee.

"During my talks with Mr. Desai, which were purely of a personal nature, I made it absolutely clear to him that whatever I had said was my individual view and I was not speaking either on behalf of the Muslim League or anyone else. If and when Mr. Desai felt that he could speak with authority on behalf of the Congress he would have to approach the President of the All-India Muslim League, who was the proper authority to entertain any proposals on behalf of the Muslim League. This is the history of these proposals, which have been described in the press by various names such as the Desai-Liaquat Formula, the Desai-Liaquat Pact and so on.

"I have scrupulously respected the wishes of Mr. Desai and have treated the draft proposals as strictly private and confidential and have not shown them to anyone, but in view of the statement of Mr. Desai—(to the press of Bombay that the Pact could not be published as I desired that it should remain confidential)—and the confusion that is being created, I feel that these proposals should be published; hence I am releasing them to the press.

#### TEXT OF PACT.

"The following is the Desai-Liaquat Pact:—  
"The Congress and the League agree that they will join in forming an interim Government

in the Centre. The composition of such Government will be on the following lines:—

(a) An equal number of persons nominated by the Congress and the League in the Central Executive (the persons nominated need not be members of the Central Legislature);

(b) Representatives of minorities (in particular the Scheduled Castes and the Sikhs);

(c) The Commander-in-Chief.

"The Government will be formed and function within the framework of the existing Government of India Act. It is, however, understood that, if the Cabinet cannot get a particular measure passed by the Legislative Assembly, they will not enforce the same by resort to any of the reserve powers of the Governor-General or the Viceroy. This will make them sufficiently independent of the Governor-General.

"It is agreed between the Congress and the League that, if such interim Government is formed, their first step would be to release the Working Committee members of the Congress.

"The steps by which efforts would be made to achieve this end are at present indicated to take the following course:

"On the basis of the above understanding, some way should be found to get the Governor-General to make a proposal or a suggestion that he desires an interim Government to be formed in the Centre on the agreement between the Congress and the League and when the Governor-General invites Mr. Jinnah and Mr. Desai either jointly or separately, the above proposals would be made declaring that they are prepared to join in forming the Government.

"The next step would be to get the withdrawal of Section 93 in the provinces and to form, as soon as possible, provincial Governments on the lines of a coalition."

**Wavell Plan.**—In the summer of 1945 Lord Wavell paid a visit to Great Britain and had prolonged consultations with members of the British Cabinet. On his return in June His Excellency unfolded the proposals of His Majesty's Government to ease the Indian political situation. He said in a broadcast to the people of India: "I have been authorised by His Majesty's Government to place before Indian political leaders proposals designed to ease the present political situation and to advance India towards her goal of full self-government. These proposals are at the present moment being explained to Parliament by the Secretary of State for India. My intention in this broadcast is to explain to you the proposals, the ideas underlying them, and the method by which I hope to put them into effect.

"This is not an attempt to obtain or impulse a constitutional settlement.

"His Majesty's Government had hoped that the leaders of the Indian parties would agree amongst themselves on a settlement of the communal issue, which is the main stumbling-block, but this hope has not been fulfilled.

"In the meantime, India has great opportunities to be taken and great problems to be solved, which require a common effort

by the leading men of all parties. I, therefore, propose, with the full support of His Majesty's Government, to invite Indian leaders both of central and provincial politics to take counsel with me with a view to the formation of a new Executive Council more representative of organised political opinion.

"The proposed new Council would represent the main communities and would include equal proportions of caste Hindus and Muslims. It would work, if formed under the existing constitution. But it would be an entirely Indian council, except for the Viceroy and the Commander-in-Chief, who would retain his position as War Member.

"It is also proposed that the portfolio of External Affairs, which has hitherto been held by the Viceroy, should be placed in charge of an Indian member of the Council, so far as the interests of British India are concerned.

"A further step proposed by His Majesty's Government is the appointment of a British High Commissioner in India, as in the Dominions, to represent Great Britain's commercial and other such interests in India.

"Such a new Executive Council will, you realise, represent a definite advance on the road to self-government. It will be almost entirely Indian, and the Finance and Home Members will, for the first time, be Indians, while an Indian will also be charged with the management of India's foreign affairs, moreover the members will now be selected by the Governor-General after consultation with political leaders; though their appointment will of course be subject to the approval of His Majesty the King-Emperor.

"The Council will work within the framework of the present constitution and there can be no question of the Governor-General agreeing not to exercise his constitutional power of control; but it will of course not be exercised unreasonably.

"I should make it clear that the formation of this interim Government will in no way prejudice the final constitutional settlement.

The main tasks for this new Executive Council would be:—

(1) to prosecute the war against Japan with the utmost energy till Japan is utterly defeated;

(2) to carry on the Government of British India, with all the manifold tasks of post-war development in front of it, until a new permanent constitution can be agreed upon and comes into force; and

(3) to consider when the members of the Government think it possible, the means by which such agreement can be achieved. The third task is the most important. I want to make it quite clear that neither I nor His Majesty's Government have lost sight of the need for a long-term solution, and that the present proposals are intended to make a long-term solution easier.

"I have considered the best means of forming such a Council; and have decided to invite the following to Viceregal Lodge to advise me:—

Those now holding office as Premier in a provincial Government; or, for provinces now under Section 93 Government, those who last held the office of Premier;

The leader of the Congress Party and the Deputy Leader of the Muslim League in the Central Assembly; the leaders of the Congress Party and the Muslim League in the Council of State; also the leaders of the Nationalist Party and the European Group in the Assembly;

Mr. Gandhi and Mr. Jinnah as the recognised leaders of the two main political parties;

Rao Bahadur N. Siva Raj to represent the Scheduled Classes; and

Master Tara Singh to represent the Sikhs.

"Invitations to these gentlemen are being handed to them today, and it is proposed to assemble the conference on June 25 at Simla, where we shall be cooler than at Delhi.

"I trust that all those invited will attend the conference and give me their help. On me and on them will lie a heavy responsibility in this fresh attempt to make progress towards a final settlement of India's future.

"If the meeting is successful, I hope that we shall be able to agree on the formation of the new Executive Council at the Centre.

"I also hope that it will be possible for ministries to re-assume office and again undertake the tasks of Government in the provinces now administered under Section 93 of the Constitution Act and that these ministries will be coalitions.

"If the meeting should unfortunately fail, we must carry on as at present until the parties are ready to come together. The existing Executive Council which has done such valuable work for India, will continue if other arrangements cannot be agreed to.

"But I have every hope that the meeting will succeed, if the party leaders will approach the problem with the sincere intention of working with me and with each other.

"I can assure them that there is behind the proposal a most genuine desire on the part of all responsible leaders in the United Kingdom and of the British people as a whole to help India towards the goal. I believe that this is more than a step towards the goal, it is a considerable stride forward, and a stride on the right path.

"I should make it clear that these proposals affect British India only and do not make any alteration in the relations of the Princes with the Crown Representative.

"With the approval of His Majesty's Government, and after consultation with my Council, orders have been given for the immediate release of the members of the Working Committee of the Congress who are still in detention, I propose to leave the final decision about the others still under detention as the result of the 1942 disturbances to the new Central Government, if formed, and to the provincial Governments.

The appropriate time for fresh elections for the central and provincial legislatures will be discussed at the conference.

"Finally, I would ask you all to help in creating the atmosphere of goodwill and mutual confidence that is essential if we are to make progress. The destiny of this great country and of the many millions who live in it depend

The political centre of gravity then shifted to Simla. Messrs. Gandhi, Azad and Jinnah met the Viceroy on the day previous to the opening of the Conference and it was revealed that, in pursuance of the emphasis laid by Mr. Gandhi on his individual capacity, he would not attend the meetings of the Conference, though he would stay on in Simla. The Conference opened at the Viceregal Lodge on June 25, under the Presidentship of the Viceroy, to discuss the proposals of His Majesty's Government which were designed "to ease the present political situation and to advance India towards her goal of full self-government."

In his opening speech, Lord Wavell said :

"Before we begin on the agenda of this Conference, the outcome of which will have a momentous influence on the destiny of India, I feel there are a few words I should say to you. First, I welcome you all as men who by character and ability have risen to leadership in your provinces and parties. I have called you together from all parts of India, at this critical moment in her history, to advise and help me in advancing India towards prosperity, political freedom and greatness. I ask you to give me that help in a spirit of broad co-operation towards the good of India as a whole. It is not a constitutional settlement, it is not a final solution of India's complex problems that is proposed. Nor does the plan in any way prejudice or prejudice the final issue. But if it succeeds, I am sure it will pave the way towards a settlement; and will bring it nearer.

"The statesmanship, wisdom and goodwill of all of us is here on trial, not merely in the eyes of India but before the world. I said in my broadcast that on all sides there was something to forgive and forget. We have got to rise above the level of old prejudices and enmities, and of party and sectional advantage; and think of the good of India, the good of 400 million people; and how we can best combine to implement these new proposals made by His Majesty's Government for the advancement of India, now and in the future. It will not be easy, and unless we can place our deliberations at a high common level, we shall not succeed.

"You must accept my leadership for the present. Until there is some agreed change in the Constitution I am responsible to His Majesty's Government for the good government and tranquillity of India. I will endeavour to guide the discussions of this Conference in what I believe to be the best interests of this country.

"On the column which stands in front of the Viceroy's House crowned by the Star of India, are engraved these words: 'In Thought Faith, In Word Wisdom, In Deed Courage, In Life Service, so may India be great.' They will make a good guide for our Conference."

A press note issued at the end of the first days' Session said :

"The Conference assembled at Viceregal Lodge, Simla, at 11 a.m. Their Excellencies met and talked to the delegates on the lawn outside the Conference Room. At 11-20 the delegates moved into the Conference Room,

and the proceedings began with the Viceroy in the chair. His Excellency made a short opening speech. He then made a statement on the procedure he proposed for the conference and announced that he had appointed Sir Evan Jenkins, his Private Secretary, and Rao Bahadur V. P. Menon, the Reforms Commissioner to act as Secretaries to the Conference.

"The Conference then took up the discussion of the general principles of His Majesty's Government's proposals. The discussions continued until 5 p.m., when the Conference adjourned until tomorrow."

On the following day the Conference re-assembled in the morning but dispersed before lunch as it had reached "certain provisional conclusions" and the delegates expressed a wish to confer amongst themselves. There were two further postponements, the last one for a period of a fortnight.

For correspondence exchanged by Lord Wavell and Mr. Jinnah during this period see last year's issue of *The Indian Year Book*.

When the Conference reassembled on July 14, the Viceroy announced the failure of his efforts and said :

"As you know, my original intention was that the conference should agree upon the strength and composition of the Executive Council, and that thereafter the parties should send me lists of names. To these lists I would, if necessary, have added names of my own, and attempted to form on paper an Executive Council which might be acceptable to His Majesty's Government, myself, and the conference, I intended to discuss selections with the leaders, and finally to put them to the conference.

"Unfortunately, the conference was unable to agree about the strength and composition of the Executive Council, and on the 29th June I undertook, with the approval of the conference, to endeavour to produce a solution not based on any formula agreed in advance. I asked the parties to let me have lists of names and said I would do what I could to produce a solution acceptable to the leaders and to the conference.

"I received lists from all parties represented here except from the European Group, who decided not to send a list, and the Muslim League. I was, however, determined that the conference should not fail until I had made every possible effort to bring it to a successful ending. I therefore made my provisional selections, including certain Muslim League names, and I have every reason to believe that if these selections had been acceptable here they would have been acceptable to His Majesty's Government.

"My selections would, I think, have given a balanced and efficient Executive Council whose composition would have been reasonably fair to all parties. I did not find it possible, however, to accept the claims of any party in full. When I explained my solution to Mr. Jinnah he told me that it was not acceptable to the Muslim League and he was so decided that I felt it would be useless to continue the discussion. In the circumstances, I did not show my selections

activity, including what is known as the parliamentary programme, is subservient to and designed to promote the constructive activities as explained by Mr. Gandhi.

"The Working Committee is of the opinion that civil disobedience, mass or any other, meant for the attainment of freedom is inconceivable without the adoption of the constructive programme on the widest scale possible by the masses of India."

An event of considerable importance to the internal organization of the Congress occurred in the latter half of 1945 when it was decided that Communists should be expelled from the All-Indian Congress Committee as a punishment for their opposition and obstruction to the policy and programme of the Congress for a considerable time.

Learning a lesson from the Simla breakdown and wishing to make yet another effort at a communal settlement, Maulana Abul Kalam Azad, who was resting in Kashmir, proposed that the Congress should clarify its attitude to the Muslims in order to reassure them that their interests would be safe in any future constitutional reconstruction. His suggestion, on the details of which it is not necessary now to dwell, was hotly discussed for a few weeks until the matter came up before the Congress executive in September 1945. In an effort to clarify the Congress attitude to the separation demand and to remove the confusion arising from the apparently conflicting 1942 resolutions on the subject, the Congress Working Committee adopted a new resolution. It contained no new offer in the shape of an approach to the League view-point; nor did it make any reference to the "C.R." formula or Mr. Gandhi's offer to Mr. Jinnah. It was just a reiteration of Congress policy with the emphasis on unity subject to the proviso that no territorial unit inhabited by a homogeneous people would be forced to stay in against its will.

Apart from this, the Congress Working Committee which in September 1945 held its first business session after August 1942, had a heavy agenda before it. The formation of a Labour Government in Britain, the end of the Japanese war, a fresh consideration of the Indian question in the light of the changed situation, Lord Wavell's second visit to Britain and the announcement of general elections in India—these were all post-Simla developments. After taking into account the altered circumstances and the rapidly changing situation, the Working Committee decided that the Congress should contest the general elections "on the issue of immediate transfer of power" and "to demonstrate the will of the people." Paradoxically enough, the arguments leading up to this decision explain why the Congress objected to participation, but the resolution ended with "Nevertheless...." This announcement came at the tail-end of a two-thousand, word statement split up into three resolutions drafted for the All-India Congress Committee. The first of these reaffirmed the August Resolution of 1942. The second reviewed the various policies pursued by the Congress during the past sixty years and declared that the Congress policy would be "negotiation and settlement when possible and non-co-operation

direct action if necessary." All the three resolutions were evidently framed on the one hand, to emphasize the revolutionary ideology of the Congress and, on the other, to leave the door open for the pursuit of practical politics in the event of the British Government announcing any new approach. There was no regret over the decision arrived at in August 1942 on the contrary, it was sought to be justified by "the urgency of the situation and the perils that confronted India" at the time. Similarly, the disturbances that followed were only partially deplored to the extent that "in some places the people forgot, and fell away from, the Congress method of peaceful and non-violent action," and the authorities were accused of provocative action and "brutal and ruthless repression", which "goaded them to rise spontaneously to resist the armed might of an alien, imperialist power".

The Congress review of the events of the months immediately preceding was full of disappointment and resentment over the British Government's determination "to hold on to its authoritarian power and to exercise it arbitrarily autocratically;" yet there was no desire to allow frustration and pessimism to express themselves through any form of direct action. For the moment, Congress policy was one of negotiation and conciliation but the method of non-co-operation was doubtless held in reserve. This was evidently a continuation of the spirit which informed the Congress attitude at Simla.

The same spirit of working with available implements, however imperfect they might be, seemed to have actuated the Working Committee's decision in regard to the forthcoming elections. Vigorous protests were made against the manner and circumstances in which the authorities proposed to hold elections to the legislatures, but eventually the resolution on the subject recommended the Congress participation in the elections.

Between then and the meeting of the All-India Congress Committee the Viceroy had returned from London. His Excellency made a broadcast embodying the conclusions of His Majesty's Government.

These were that H. M. G. were determined to do their utmost to promote, in conjunction with the leaders of Indian opinion, the early realisation of Self-Government in India. It was their intention to convene as soon as possible a Constitution-making Body, and as a preliminary step, they had authorized him to undertake, immediately after the elections, discussions with representatives of the Legislative Assemblies in the Provinces, to ascertain whether the proposals contained in the 1942 declaration were acceptable or whether some alternative or modified scheme was preferable. Discussions would also be undertaken with representative of Indian States with a view to ascertaining in what way they could best take part in the Constitution-making Body. Further H. M. G. were proceeding to the consideration of the content of a treaty which would require to be concluded between Great Britain and India. His Majesty's Government had authorized His Excellency, as soon as the results of the

provincial elections were published, to take steps to bring into being an Executive Council which would have the support of the main Indian parties. His Excellency concluded that the Government and all sections of the British people were anxious to help India in these matters and it remained for Indians to show that they had the wisdom and courage to determine in what way they could best reconcile their differences and how their country could be governed by Indians for Indians.

**Congress Reaction.**—The All-India Congress Committee which met towards the end of September 1945 adopted its Executive's recommendation to contest the general elections.

Two of the three political resolutions submitted by the executive were endorsed almost unanimously by the A.I.C.C. The first reiterated the "Quit India" resolution passed on August 8, 1942, while the second declared that the Congress policy was one of negotiation when possible and direct action when necessary. Amendments calculated to "stiffen" the Congress attitude were negatived. One of these suggested that the Congress should abandon the "humiliating" path of negotiation; another sought not to "regret" but simply to "admit" acts of violence during the disturbances that followed the adoption of the "Quit India" resolution. Others wanted to denounce Communist "traitors" who had "allied themselves with the alien Government in sabotaging the people's struggle for independence."

The speakers, including Pandit Nehru, Sardar Vallabhbhai Patel and Mr. J. B. Kripalani, felt no regrets for what had happened but, on the contrary, expressed pleasure at the people's spirit of resistance to Government's "repression of their urge for freedom." Sardar Patel was inclined to replace "Quit India" by "Quit Asia" demand, for the world could have no freedom without a free India. Whereas the resolutions were couched in more or less moderate language, the speeches both of the leaders and the rank and file were keyed to a high pitch; they seemed to ask, "How can we forget and forgive?"

The resolution on the Wavell proposals, moved by Sardar Vallabhbhai Patel, stated: "The A.-I.C.C. has carefully considered Lord Wavell's and the British Prime Minister's broadcasts on the steps proposed to be taken by British authority in India. These proposals repeat, with unimportant variations, the offer made in March, 1942 by Sir Stafford Cripps on behalf of the British Government, an offer which was not accepted by the Congress. Neither the end of the war nor the change of Government in Great Britain appears to have resulted in any real change in British policy towards India which seems to be based on delaying every advance and attempting to create new problems and fresh complications. It is significant that there is no mention in these broadcasts of the independence of India. Nothing short of independence can be acceptable to the Congress and the country. The proposals now made are, in the opinion of the A.-I.C.C., vague, inadequate and unsatisfactory."

"The announcement that general elections will be held for the Central and Provincial Assemblies has been made in a manner and in circumstances which arouse suspicion. The sudden dissolution of the legislatures in some provinces has emphasised the hostility of the present governmental authorities to even the possibility of popular government in the meantime, and is totally indefensible. The Central Assembly is still governed by the Act of 1919. To continue such an impotent and undemocratic Central legislature, constituted on a franchise of less than one per cent. of the population, can have no justification in the context of Indian freedom. If elections for the Central Legislature are to be held they must at least be on a properly revised register, even though this might involve some little delay. In spite of assurances, the electoral rolls for the Central and Provincial Assemblies are not being properly revised."

"Further, free and fair elections are hardly possible when several organisations, like the Congress Socialist Party, the Forward Bloc, and Kisan organisations are still under ban; when thousands are still held in detention without trial, or are undergoing sentences of imprisonment in connection with political activities; when in many places public meetings cannot be held without previous permission of the authorities; and when many persons are labouring under disqualifications arising out of their conviction for political offences."

"It has become notorious that the present Government in India are responsible for the widespread corruption that prevails in the country, for the gross mismanagement of the food and cloth problems and for the supreme tragedy of the Bengal famine. Yet it is declared that, pending elections, and for many months at least, this incompetent and corrupt administration shall continue its misrule. The proposals of the British Government, become, in this context, still more significant indications of their desire to hold on to power in India as long as they possibly can and with all the means and methods at their disposal."

"In spite of the handicaps that the Congress will labour under, as related above, and in order to demonstrate the will of the people, especially on the issue of the immediate transfer of power, the A.-I.C.C. resolves that the forthcoming elections be contested, and directs the Working Committee to take all necessary steps in this behalf. The Committee is confident not only that the people will respond to the call of the Congress on this vital and urgent issue, but will also, with the added strength and assurance that the past years have given them, carry the struggle for the independence of India to a successful issue in the near future."

This resolution was the *piece de resistance* of the session, not only because of the expression of opinion on the latest British proposals and the decision to contest the elections, but also because the Opposition pegged its criticism on it. The decision of the Working Committee not to submit to the A.-I.C.C. its resolution on the partition demand deprived its critics of the opportunity to stage a public opposition to the executive's policy in this behalf. They brought up the subject, however, through the

back door—by means of amendments to what was clearly a political resolution. As one speaker pointed out, the amendments were, strictly speaking, irrelevant, but the President admitted them: evidently he desired to let them blow of steam. They did, but, to change the metaphor, they caught a tartar. Pandit Nehru and Sardar Vallabhbhai Patel gave spirited replies to the effect that, whereas the Congress was prepared to go all out to meet the Muslim masses, it would no more approach the League or Mr. Jinnah unless the latter apologised to the Congress President for the gratuitous insult offered to him. The large majority of the members of the A.-I.C.C. supported the executive and threw out the amendments, which were supported by only half a dozen in a house of 225.

Sardar Vallabhbhai Patel, regretted that there was no change of heart on the part of the British Government. He cited the Simla Conference, the tardy measures adopted by the authorities in lifting the ban on Congress organisations and releasing politicals, and the acts of commission and omission which resulted in imposing restrictions on free elections. He also referred to the disinclination of the authorities to allow popular ministries to return the office. In spite of these discouraging factors, the Congress wished to participate in the elections for two reasons: first, to demonstrate that the country was behind them in demanding the immediate transfer of power and, secondly, not to allow the legislative bodies to be captured by "reactionaries, toadies and fifth columnists". Sardar Patel assured the A.-I.C.C. that the Congress approach to the elections would be in conformity with its ideal and that the future policy would be determined after the elections. The Congress, he added, would choose the best candidates and appealed to those left out not to take it to their heart.

Pandit Govind Ballabh Pant, who seconded, complained that the British plan made no reference to a "constituent assembly" and that the time limit for calling such a body had also disappeared. Similarly, there was no mention of "independence" but only "self-government". The British went on creating fresh problems and asked them to solve them: it was like asking a school boy to make ice in a scorching sun.

Then came the bombshell in the shape of an amendment by a Muslim Communist who wished the elections to be fought on the issue of "an agreed people's plan of convening a constituent assembly... which will have the support of the major parties and all communities". In order to secure Hindu-Muslim unity he wanted to assure the Muslims that "the elected representatives of areas in which Muslims are in a majority will be free to constitute themselves into a constituent assembly and to decide for themselves whether to join the Indian Union or not." He was frequently interrupted by the House, which had a marked grouse against Communists and against those who demanded further measures to placate the League.

Mian Iftikhar-ud-Din, ex-President of the Punjab Provincial Congress Committee, known to be a keen advocate of a Congress-League

settlement, declared through an amendment that "the creation of an independent and democratic India must be such as will win the backing of all major sections of our people, especially the Muslims."

Pandit Nehru, who spoke next, and Sardar Patel, who replied to the debate, said that the Communists always found fault with them, whatever they did. The Congress had gone to the fullest extent possible, consistent with its nationalistic ideal, to meet Muslim fears—communal electorates, weightages, safeguards and recently, parity—and had nearly reduced itself to the position of a purely Hindu body; they could go no farther. If the Congress attitude was regarded as unreasonable, the whole question might be referred to an international tribunal for arbitration. The resolution passed unanimously.

**Election Manifesto.**—The Congress election manifesto, issued a fortnight later, stated:

"For 60 years the National Congress has laboured for the freedom of India. During this long span of years its history has been the history of the Indian people, straining at the least that has held them in bondage, ever trying to unloose themselves from it. From small beginnings it has progressively grown and spread in this vast country, carrying the message of freedom to the masses of our people in the towns as well as the remotest villages. From these masses it has gained power and strength and developed into a mighty organisation, the living and vibrant symbol of India's will to freedom and independence. From generation to generation it has dedicated itself to this sacred cause, and in its name and under its banner innumerable countrymen and countrywomen of ours have laid down their lives and undergone suffering in order to redeem the pledge they had taken. By service and sacrifice it has enshrined itself in the hearts of our people; by its refusal to submit to any dishonour to our nation it has built up a powerful movement of resistance to foreign rule.

"The career of the Congress has been one of both constructive effort for the good of the people and unceasing struggle to gain freedom. In this struggle it has faced numerous crises and come repeatedly into direct conflict with the armed might of a great empire. Following peaceful methods, it has not only survived these conflicts, but has gained new strength from them. After the recent three years of an unprecedented mass upheaval and its cruel and ruthless suppression, the Congress has risen stronger than ever and more loved by the people by whom it has stood through storm and stress.

"The Congress has stood for equal rights and opportunities for every citizen of India, man or woman. It has stood for the unity of all communities and religious groups and for tolerance and goodwill between them. It has stood for full opportunities for the people as a whole to grow and develop according to their own wishes and genius. It has also stood for the freedom of each group and territorial area within the nation to develop its own life and culture within the larger framework, and

The Congress election campaign was conducted on the assumption that the Congress could secure easy victories in general constituencies and that it should concentrate instead on Muslim seats. In many cases the Hindu Mahasabha candidates withdrew in favour of the Congress, either with a view to giving the Congress a free hand in the light of its unequivocal declaration of hostility to partition or because the Mahasabha realized that it had no chance in face of the strong wave of pro-Congress feeling that was sweeping over the country.

**Election Results.**—The elections fulfilled Congress expectations as far as general seats were concerned. Such Hindu Mahasabhaitees as dared to oppose the Congress nominees were badly defeated. Moderates and Independents had no chance at all. In Sikh constituencies in the Punjab, the Congress captured one-third the number of seats, although in terms of votes recorded nearly half the electorate supported it.

It was different, however, in the case of Muslim seats. In all the Hindu-majority provinces the Congress suffered a heavy defeat except in the United Provinces and to a smaller extent in Assam. Of the four Muslim majority provinces the Congress emerged successfully in the Frontier, though even there the League did much better than in the general elections held ten years previously. In the Punjab and Bengal, the League secured signal triumphs. In Sind, the League captured the majority of the Muslim seats, while a rebel-section of the League and a pro-Congress group of Muslims secured sufficient number of seats to form a coalition with the Congress and thereby threaten the solidarity of the League there.

All this while, the Congress was waiting events, expecting His Majesty's Government to implement the policy outlined by the Viceroy in his broadcast in September 1945.

Then came Premier Attlee's statement in Parliament in March 1946 followed by the British Cabinet Mission's visit to India to settle the basis of the country's future constitution. (This subject is dealt with in a separate chapter entitled "British Cabinet Delegation".)

On the eve of the Mission's return to England, the Congress announced its acceptance of the long-term project but turned down the specific proposals for an Interim Government. This decision was endorsed by the All-India Congress Committee which met in Bombay early in July 1946. It was an easy victory for the Congress executive.

Shortly after the A.-I.C.C. meeting, various provincial assemblies elected their representatives to the Constituent Assembly. Most of the "general" seats were filled by Congress nominees, who included representatives of the various cross-sections of Indian life, vertical and horizontal, communal and economic.

Certain statements made by the new Congress President—Pandit Nehru was declared elected in place of Maulana Abul Kalam Azad, who relinquished his office as Congress President after a period of six years—regarding the status and powers of the Constituent Assembly and

the Congress intentions in that behalf alienated the Muslim League, which was already labouring under a sense of grievance. For instance, he said that the Constituent Assembly would be a sovereign body with complete freedom to mould the future India. This was interpreted by the League to mean that decisions in the Assembly would be taken by a majority vote, leaving the Muslims helpless. Similarly he said that the Congress was committed to nothing except to enter the Constituent Assembly, which raised a grave doubt in the League mind that the Congress did not accept the framework and procedure laid down in the State Paper of May 16, 1946. These impressions were corrected by the Congress Working Committee early in August, 1946, but the mischief had already been done: for, late in July, the League decided altogether to withdraw its co-operation from the Mission's plan. The August 1946 resolution of the Congress Working Committee said:—

The Working Committee regretted to note that the Council of the All-India Muslim League, reversing their previous decision, had decided not to participate in the Constituent Assembly. In this period of rapid transition from dependence on a foreign power to full independence, when vast and intricate political and economic problems had to be faced and solved, the largest measure of co-operation among the people of India and their representatives was called for, so that the change-over should be smooth and to the advantage of all concerned. The Committee realised that there were differences in the outlook and objectives of the Congress and the Muslim League. Nevertheless, in the larger interests of the country as a whole and of the freedom of the people of India, the Committee appealed for the co-operation of all those who sought the freedom and the good of the country, in the hope that co-operation in common tasks might lead to the solution of many of India's problems.

The Committee had noted that criticisms had been advanced on behalf of the Muslim League to the effect that the Congress acceptance of the proposals contained in the Statement of May 16th was conditional. The Committee wished to make it clear that while they did not approve of all the proposals contained in this statement, they accepted the scheme in its entirety. They interpreted it so as to resolve the inconsistencies contained in it and fill the omissions in accordance with the principles laid down in that Statement. They held that provincial autonomy was a basic provision and each province had the right to decide whether to form or join a group or not. Questions of interpretation would be decided by the procedure laid down in the Statement itself, and the Congress would advise its representatives in the Constituent Assembly to function accordingly.

The Committee had emphasized the sovereign character of the Constituent Assembly, that is, its right to function and draw up a constitution for India without the interference of any external power or authority. But the Assembly would naturally function within the internal limitations which were inherent in its task, and would therefore seek the largest measure

"My letter to you was not sent to the press. I made a brief statement to the press, however, in view of repeated questions put to me by newspapermen and in order to prevent misconceptions, if you so desire you can release all this correspondence to the press. Yours sincerely, Jawaharlal Nehru."

Letter from Mr. Jinnah, dated August 15:—

"Dear Pandit Jawaharlal Nehru, I am in receipt of your letter of August 15 delivered to me at about 3-30 p.m. and I thank you for it.

"I have already made my position clear in my letter dated August 15 sent to you this morning. But as you have given certain explanations, with some of which I must not be taken to agree, and as you desire to meet, I shall be glad to see you today at 6 p.m.

"I agree with you that in order to prevent misconception in the mind of the public, our correspondence should be published and accordingly I am releasing it to the press. Yours sincerely, M. A. Jinnah.—A.P.I.

**Formation of Interim Government.**—Pandit Nehru then proceeded to Delhi and submitted to the Viceroy the names of twelve persons constituting the Interim Government. These included six top-ranking Congress leaders, namely Pandit Nehru, Sardar Vallabhbhai Patel, Dr. Rajendra Prasad, Mr. C. Rajagopalachari, Mr. Sarat Chandra Bose and Mr. Asaf Ali. This was on the basis of a Cabinet of fourteen. Two seats were to be filled later. Of the 12, three were Muslims, five caste Hindus and one representative each of the scheduled castes, Indian Christians, Sikhs and Parsis. The Congress also suggested the name of an Anglo-Indian as an additional member, but the Viceroy was apparently reluctant to increase the strength of the Cabinet.

On August 24, 1946, His Excellency the Viceroy announced the formation of the Interim Government. In a broadcast, he said:

"You will have heard the announcement of the names of the members of the new Interim Government which will come into office very shortly. You will, I am sure, all realise that a very momentous step forward has been taken on India's road to freedom. Some of you who listen to me may feel, however, that the step should not have been taken in this way or at this time. It is to these that I want principally to address myself tonight.

"You who are opposed to the formation of the new Government are not, I assume, opposed to the main policy of His Majesty's Government, namely, to fulfil their pledges by making India free to follow her own destiny. You will also, I think, all agree that we need at once a Government of Indians as representative as possible of political opinion in the country. This is what I set out to secure: but though 5 seats out of 14 were offered to the Muslim League, though assurances were given that the scheme of constitution-making would be worked in accordance with the procedure laid down, and though the new Interim Government is to operate under the existing constitution, it has not been possible at present to secure a coalition. No one could be sorrier about

the failure than I am. No one could be more sure that it is a coalition Government in which both the main parties are represented that is needed at this moment in the interests of all parties and communities in India. This is a view which I know that the President of the Congress, Pandit Jawaharlal Nehru, and his colleagues hold as strongly as I do. His efforts like mine will still be directed to persuading the League to join the Government.

"Let me state clearly the offer which has been made and is still open to the Muslim League. They can propose to me five names for places in a Government of 14, of which 6 will be nominees of Congress and three will be representatives of the Minorities. Provided these names are acceptable to me and approved by His Majesty, they will be included in the Government, which will at once be reformed. The Muslim League need have no fear of being out-voted on any essential issue; a Coalition Government can only exist and function on the condition that both main parties to it are satisfied. I will see that the most important portfolios are equitably shared. I sincerely trust that the League will reconsider their policy and decide to participate in the Government.

"Meanwhile, however, the administration of India has to go on, and there are large issues which must be decided. I am glad that the representatives of a very large body of political opinion in the country will be my colleagues in carrying on the government. I welcome them to my Council. I am also glad that the Sikhs have now decided to participate in the Constituent Assembly and in the Interim Government. I have no doubt that their decision is a wise one.

"As I have already made clear, I shall implement full His Majesty's Government's policy of giving the new Government the maximum freedom in the day to day administration of the country. In the field of provincial autonomy, of course, the Provincial Governments have a very wide sphere of authority in which the Central Government cannot intervene. My new Government will not have any power or indeed any desire to trespass on the field of provincial administration.

"The recent terrible occurrences in Calcutta have been a sobering reminder that a much greater measure of toleration is essential if India is to survive the transition to freedom. I appeal most earnestly not only to sober citizens but to the young and to the discontented to recognise that no conceivable good either to themselves or to their community or to India can come either from violent words or from violent deeds. It is essential that in all Provinces law and order is maintained, that the protection of the ordinary peaceable citizen is assured with a firm but impartial hand, and that no community is oppressed.

"The War Member in the new Government will be an Indian, and this is a change which both the Commander-in-Chief and I warmly welcome. But the constitutional position of the Armed Forces is in no way changed. They still owe allegiance, in accordance with their oath, to the King-Emperor, to whom and to Parliament I am still responsible.

"We propose, as far as possible, to keep away from the power politics of groups, aligned against one another, which have led in the past to world wars and which may again lead to disasters on an even vaster scale. We believe that peace and freedom are indivisible and the denial of freedom anywhere must endanger freedom elsewhere and lead to conflict and war. We are particularly interested in the emancipation of colonial and dependent countries and peoples, and in the recognition in theory and practice of equal opportunities for all races. We repudiate utterly the Nazi doctrine of racialism, wheresoever and in whatever form it may be practised. We seek no dominion over others and we claim no privileged position over other peoples. But we do claim equal and honourable treatment for our people wherever they may go, and we cannot accept any discrimination against them.

"The world, in spite of its rivalries and hatreds and inner conflicts, moves inevitably towards closer co-operation and the building up of a world commonwealth. It is for this One World that free India will work, a world in which there is the free co-operation of free peoples and no class or group exploits another.

"In spite of our past history of conflict, we hope that an independent India will have friendly and co-operative relations with England and the countries of the British Commonwealth. But it is well to remember what is happening in one part of the Commonwealth to-day. In South Africa racialism is the State doctrine and our people are putting up a heroic struggle against the tyranny of a racial minority. If this racial doctrine is going to be tolerated it must inevitably lead to vast conflicts and world disaster.

"We send our greetings to the people of the United States of America to whom destiny has given a major role in international affairs. We trust that this tremendous responsibility will be utilised for the furtherance of peace and human freedom everywhere. To that other great nation of the modern world, the Soviet Union, which also carries a vast responsibility for shaping world events, we send greeting. They are our neighbours in Asia and inevitably we shall have to undertake many common tasks and have much to do with each other.

We are of Asia and the peoples of Asia are nearer and closer to us than others. India is so situated that she is the pivot of western, southern and south-east Asia. In the past her culture flowed to all these countries and they came to her in many ways. Those contacts are being renewed and future is bound to see a closer union between India and south-east Asia on the one side, and Afghanistan, Iran and the Arab world on the West. To the furtherance of that close association of free countries we must devote ourselves. India has followed with anxious interest the struggle of the Indonesians for freedom and to them we send our good wishes.

"China, that mighty country, with a mighty past, our neighbour has been our friend through the ages and that friendship will endure and grow. We earnestly hope that her present

troubles will end soon and a united and democratic China will emerge, playing a great part in the furtherance of world peace and progress.

"I have not said anything about our domestic policy, nor at this stage do I wish to do so. But that policy will inevitably have to be governed by the principles by which we have stood all these years. We shall look to the common and forgotten man in India and seek to bring him relief and raise his standards of living. We shall continue our fight against the curse of untouchability and other forms of enforced inequality, and shall especially try to help those who are economically or otherwise backward. Today millions lack food and clothing and houses and many are on the verge of starvation. To meet this immediate need is an urgent and difficult task and we hope other countries will help us by sending food grains.

"An equally urgent and vital task for us is to conquer the spirit of discord that is abroad in India. Out of mutual conflict we shall never build the house of India's freedom of which we have dreamt so long. All of us in this land have to live and work together, whatever political developments might take place. Hatred and violence will not alter this basic fact, nor will they stop the changes that are taking place in India.

"There has been much heated argument about sections and groupings in the Constituent Assembly. We are perfectly prepared to accept and have accepted, the position of sitting in sections, which will consider the question of formation of groups. I should like to make it clear, on behalf of my colleagues and myself, that we do not look upon the Constituent Assembly as an arena for conflict or for the forcible imposition of one view-point over another. That would not be the way to build up a contented and united India. We seek agreed and integrated solutions with the largest measure of goodwill behind them. We shall go to the Constituent Assembly with the fixed determination of finding a common basis for agreement on all controversial issues. And so, in spite of all that has happened and the hard words that have been said, we have kept the path of co-operation open, and we invite even those who differ from us to enter the Constituent Assembly as equals and partners with us with no binding commitments. It may well be that when we meet and face common tasks our present difficulties will fade away.

"India is on the move and the old order passes. Too long have we been passive spectators of events, the playthings of others. The initiative comes to our people now and we shall make the history of our choice. Let us all join in this mighty task and make of India, the pride of our heart, great among nations, foremost in the arts of peace and progress. The door is open and destiny beckons to all. There is no question of who wins and who loses, for we have to go forward and together as comrades and either all of us win or we all go down together. But there is going to be no failure. We go forward to success, to independence and to the freedom and well-being of the four hundred millions of India. JAI HIND!"

**A.-I.C.C. ON CALCUTTA DISTURBANCE.**—Meanwhile, the Congress Working Committee met in Delhi and passed a resolution on the Calcutta carnage. It ran :

"The Working Committee have read with deep sorrow reports about the recent happenings in Calcutta in connection with the observance by the Muslim League of Direct Action Day on August 16 and subsequent days. They deplore the serious loss of life and property and condemn in particular the acts of brutality committed against defenceless persons, especially women and children.

The Committee offer their sympathy to the innocent sufferers of whatever community and party and call upon them to meet the situation with courage, forbearance and fortitude.

On July 29 the Council of the All-India Muslim League passed a resolution deciding upon Direct Action. In support of the resolution inflammatory speeches were made and subsequently speeches and statements and pamphlets by responsible members of the League and Ministers, and articles in some League newspapers have served to inflame a large section of the Muslim masses.

"The Government of Bengal declared August 16 as a public holiday in spite of protest and thereby gave an impression that the observance of August 16 was enjoined by the Government and persons not joining in the observance could claim or get no protection from the Government.

"It appears that processionists carried big bamboo sticks, swords, spears, daggers, axes which they brandished when ordering people to shut their shops from the early morning of August 16 and mercilessly assaulted anybody who declined or hesitated to close his shop.

"Stabbing and looting started early in the day and guns are said to have been used by hooligans in many places. Murders in most brutal circumstances, looting and burning of houses on a large scale followed and lasted for three or four days resulting in the death of several thousand persons and looting and burning of property worth crores of rupees.

There was practically no police, nor even traffic police, to be seen on August 16 and even the precaution of sending foot and mounted police to accompany processions, as is done with the Moharram and other processions was not taken. Even when police were available they rendered no help to peaceful citizens, and frantic appeals for help to officers in charge of police stations were not heeded and the people were told to save themselves as best they could.

"The curfew order was not enforced even after it was proclaimed, for the first two nights. Although no transport was available to the public, hooligans used motor lorries. Petrol was freely used for committing arson. Houses and furniture and other articles were smashed or burnt and whatever could be removed was carried away. Dead bodies littered the streets and many dead and dying persons were thrust into manholes of underground sewers or thrown into the river.

"The military were not called till long after the havoc had commenced. In some places even the police participated in the looting. After the initial orgy of murders, loot and arson the Hindus and others retaliated and indulged in reprisals wherever they could and a large number of Muslims were killed.

"It is satisfactory to note, however, that in the midst of this mutual slaughter and inhuman barbarities there were cases where Hindus gave shelter to Muslims in distress and Muslims gave protection to Hindus in difficulty.

"The Committee are concerned to note that communal tension in other places has increased and conflicts resulting in murders have arisen. There is a general apprehension that this may extend and unless checked in time may become very widespread.

"It is the primary duty of every citizen to prevent this and of every Government to maintain peace and ensure protection to its peaceful citizens.

"In view of the very serious nature of the riots, the like of which has never before happened in any part of the country, it is essential in the opinion of the Working Committee that a thorough inquiry be held by an impartial tribunal which can command the confidence of the public, into the circumstances preceding August 16 and incidents of August 16 and the following days and the steps taken by the Government both before and during, the riots to meet the situation.

"Working Committee place on record their opinion that the Government of Bengal utterly failed to maintain peace and give protection of life and property to peaceful citizens.

"The Committee realize that the wounds inflicted not only on the bodies but the spirit and self-respect of the people will take long to heal. Nevertheless they appeal to them to forget and forgive and to utilize this terrible experience for re-establishing goodwill and friendly relations between the different communities which have been so rudely disturbed during recent times.

"The Working Committee are of opinion that the communal problem cannot be solved by intimidation and violence but by mutual understanding, friendly discussion and, if necessary, by agreed arbitration."

Another meeting of the All-India Congress Committee was held in Delhi in the autumn which ratified the decision to accept office at the Centre. Pandit Nehru announced his intention to resign the Congress Presidentship because of his membership of the Interim Government. The delegates elected Mr. J. B. Kripalani in his place to preside over the Meerut Session of the Congress, the first to be held since April 1940.

A few weeks after the formation of the Interim Government, the Viceroy invited Mr. Jinnah for a personal discussion with a view to securing the participation of the League in the Interim Government and its co-operation in the Constituent Assembly. As a result of these negotiations the League decided to enter the Interim Government (See Chapter on Muslim League).

## The Hindu Mahasabha.

The Hindu Mahasabha, which in recent years has claimed a growing share of public attention in India, is an organisation of comparatively recent origin. Its beginnings can be traced to the first years of the current century, almost simultaneous with the awakening of Muslim consciousness in 1906 and in vigour equal but opposite to that of the Muslim Communal organisation.

During the first twenty-five years of its life, the Hindu organisation had to struggle for its existence, what with the proverbial indifference of the Hindu masses, the inherent inability of majorities the world over to organise, and the better response which the Congress with its wider nationalistic appeal evoked among the Hindus. All this time, however, the causes which hampered the growth of the Hindu organisation were gradually, if imperceptibly, neutralised.

For instance, the Hindu community's indifference began to give place to communal consciousness as a result of a number of Hindu-Muslim riots in which the majority community came out second best. The waves of conversion from the Hindu fold, partly due to the discontent of the outcastes and partly because of the proselytising nature of the Islamic and Christian religions, opened the eyes of Hindu leaders to the growing decrease in the number of people owing allegiance to the Hindu faith.

In addition to the reasons stated above, the political gains secured by the Muslim community under the Minto-Morley and Montagu-Chelmsford Reforms Schemes taught the Hindu community to come together and set up an organisation to voice its claims in future adjustment.

Even the wider platform of national emancipation and Hindu-Muslim unity from which the Congress appealed to the Hindu mind has latterly given signs of weakness, because Hindu-Muslim concord, far from coming within reach, threatens to go beyond grasp.

It is however, wrong to assume that the Hindu organisation is anywhere near as powerful as the Congress, or even the Muslim League of the past six or seven years. The Hindu Mahasabha undoubtedly consolidated its position in recent years; most Hindus, not excluding Congressmen professing nationalistic ideals, have a sneaking sympathy for the Mahasabha, but when it came to a question of elections to representative institutions, the Mahasabha failed to make an appeal to the Hindu electorate to the exclusion of the Congress.

Just as the Muslim League, in spite of its not very flattering success at the polls in 1937, became a mighty organisation among the Muslims of India, similarly the Hindu Mahasabha gave proofs of considerable following among the Hindus and even of a certain amount of power—as evidenced by the importance bestowed on it by His Excellency the Viceroy. In 1940, for the first time in its history, the Mahasabha was recognised as an organisation influential enough in the country to be reckoned with for purposes of representation in the Central Government.

This was, however, neutralised subsequently as far as official recognition was concerned; at the Simla Conference, for example, not only was the Hindu Mahasabha denied representation but its demands found no place.

Speaking for the present, however, it is highly doubtful whether the status attained by the Mahasabha will continue. It was only recently that the Mahasabha struck out a path of its own, to the point of hostility to the Congress, having in the first twenty or twenty-five years of its existence contented itself with occupying a status subordinate to that of the Congress and seeking only to emphasise the communal claims of the Hindu as distinct from their national claims.

Such importance as the Mahasabha enjoyed in recent years as the opposite number of the growingly aggressive Muslim League has almost disappeared with the return of the Congress to active political and parliamentary life. When the Congress set its face squarely against the League, the Mahasabha lost its *raison d'être*. In the result the Mahasabha fared badly at the general elections of 1945-46—it was routed—and today, like the Liberal Federation, it has ceased to be a force to be reckoned with.

During the war years, the Mahasabha figured prominently—advocating, from the communal point of view, more aggressive opposition to the Muslim claims than the Congress and, from the political stand-point, a less militant programme and policy than the Congress. Even in respect of the latter the Mahasabha became less and less "soft." For instance, at the last session of the All-India Committee of the Mahasabha, some of its leaders, including a Knight, renounced their titles as a protest against the British policy towards Hindus in general and the Mahasabha in particular. Broad hints were thrown at the prospect of a movement to be launched by the Mahasabha for "national liberation and the vindication of Hindu rights." When the Congress went into the wilderness in August 1942, the Hindu Mahasabha came into the lime-light as it was the only organisation to which the Hindus could look up both for urging the Hindu cause as against the militant communalism of the Muslim League and generally to propagate nationalism which, so to say, went by default as the result of the then Congress policy. When the Congress returned to public life the Mahasabha had no place.

Those who first urged the community to organise were actuated by a fear lest the numerical strength of the community should be adversely affected by the proselytising activities of the champions of other faiths. A Hindu leader, for instance, remarked: "Political power in democracies hinges more and more on the population strength of a community which in the case of the Hindus must depend in the main on the proportion in which the Hindus succeed in stopping the dreadful conversion activities of alien faiths and in accelerating the reclamation of the alienated numbers back to the Hindu fold.

In a country like India where a religious unit tends inevitably to grow into a cultural and national unit, the *Suddhi* (reconversion to Hinduism) movement ceases to be merely theological or dogmatic, but assumes the wider significance of a political and national movement. If the Muslims increase in population, the centre of political power is bound to be shifted in their favour."

Another Hindu leader said: "A community which does not know itself, does not feel its individual pulse, does not pride in its past and believe in its future, is, to all intents and purposes, a dead and self-effaced community. In order to exist at all and exist in the midst of a struggle where the universal law is encroachment and survival of the fittest, the very first and most preliminary need is to realise individual existence."

For these reasons, the early years of the Hindu Mahasabha were more or less associated with the activities of the Arya-samaj, an allied organisation which worked for the reclamation to Hinduism of those who had been converted to other faiths.

Apart from the denominational aspect of its activities, the Hindu Mahasabha claims that India belongs to the Hindus—the term 'Hindus' being interpreted as meaning people belonging to the Hindu race, irrespective of their denominational affiliations. It has been argued that "the minority problem of Europe is pre-eminently a racial one and not religious because there is only one religion, Christianity, which is common to all. The minority problem of India, on the other hand, is, if anything, pre-eminently religious and not racial at all."

For the early history of the Hindu Mahasabha see past issues of *The Indian Year Book*.

**Modern History**—Just as the history of the All-India Muslim League as we know it today dates from 1937 or more generally speaking from the inauguration of the present constitution, similarly the modern history of the Hindu Mahasabha dates from the start of the present constitution. The Communal Award, which formed the basis of elections to the legislatures under the existing constitution, and the attitude of neutrality observed by the Congress towards it provided the *raison d'être* for the agitation of the Mahasabha since 1934-35.

About this time there descended on the Mahasabha platform Mr. V. D. Savarkar, the ex-revolutionary who had just been released after long years of incarceration with a virile programme for the regeneration of the Hindu Community. The cleavage between the Congress and the Hindu Mahasabha was further accentuated. Mr. Savarkar's attitude of hostility towards Congress may be illustrated by the following words. "The Hindu Sangatanists had to face the apathy on the part of crores of the unawakened masses of their co-religionists on the one hand and on the other the treacherous attitude of the pseudo-nationalist Hindus who are friends of every other community in the world but their own and who are ever ready to betray even the just interests of the Hindus and to placate the Muslims even in the most anti-national demands on their part—just to prove that the Indian patri-

otism of the Congress is a mere disguise. The Congress, which was above suspicion, then, unaided and betrayed at home, the Hindu Mahasabha had to face outside the organised opposition of the Christian missionaries on the one hand and the fanatical mobs, hoodlums, agents and assassinations by the Muslim fanatics on the other, while the British Government, out of its political hostility to the Hindus was sworn never to take the side of the Hindus whenever Hindu interests clashed with the interests of the traditional 'favoured wife' of the British."

Bhal Parmanand said: "The best way to bring about Hindu-Mahomedan unity is to strengthen the communalist... Let the Hindus cease to be Hindus, but the Mahomedans shall be Mahomedans for all times to come. The negation of Hinduism on the part of the Hindus does not mean the negation of Islam on the part of the followers of the latter. The best security, for bringing about a desirable national evolution is to preserve the communal strength. It will then be to the interest of the Mahomedans to consent to the obliteration of all religious distinctions for political purposes... Subconsciously, the Hindus have, perhaps, felt that the Congress, the bestower of the priceless gift of liberty, must have been right in paying Hindu independence, culture and prosperity in exchange for an elusive Moslem support. In fact the emotion that has accompanied Congress activity in the last twenty years has destroyed in the Hindus the love of their heritage. They have been too willing to offer themselves as sacrifices at the altar of a Godless which has surreptitiously given back Hindu offerings to Muslims. ... If the Congress had not engineered the theory that liberty can only follow Hindu-Muslim unity, liberty today would not be hampered and confined as it is."

Referring to the latest phase of the Hindu-Muslim relationship, Bhal Parmanand said, "The situation has got only two solutions. One is the partition of the country into two, and the other to allow a Muslim state to grow within the State. That is sure to take us to a period of trial of strength, and in that case the Hindu Mahasabha alone and not the Congress can offer the right solution. I am convinced that if the Congress had not thought of Hindu-Muslim unity, if Mr. Gandhi had not made his ill-fated pact with the All Brothers, it could have made a significant contribution to the achievement of freedom. It would then not have nurtured an enemy to its ideals within its own territories."

Dr. Moonje remarked that "during the last 18 years the Congress has developed a tendency that may aptly be called a pro-Muslim mentality at the cost of Hindu interests with the ultimate object of placating and winning them over to merge in the Congress.... The Muslim scheme of emancipation is essentially and fundamentally based on the essentially communal ambition of winning a domineering position for Islam in this hazy land of the Hindus.... The Muslims have no idea of patriotism, or nationalism, if shorn of Muslim communalism; nor do they care for Swaraj in India, if Swaraj does not offer to them a domineering status in the administration of the

country. Their one point, on which they have concentrated, for the present, all their energy and intellect and staked everything that counts in life, is how to 'win' a position for Islam in India, even if it be at the cost of others. Does this, in any sense, mean the need for minority protection? What is the cure for such a mentality? It has now reached its culminating point; it is no mere bluff. It has now begun to demand division of India into Muslim India and Hindu India." Dr. Moonje claims that "in any country it is always the right of the majority community to establish Swaraj and to create its own nationalism, to maintain internal law and order and to defend the *swaraj* from external aggression."

For a period of six or seven years since 1937, Mr. Savarkar was Hindu-India's No. 1, until, owing to his ill-health, his place was taken by the Bengali leader Dr. Syama Prasad Mookerjee. In 1937 the Mahasabha declared as its goal the attainment of complete independence by all legitimate and peaceful means. In 1945 some prominent Mahasabha leaders gave up their titles as a token sacrifice for their ideals.

**In the Limelight.**—The declaration of war in September 1939, followed as it was by numerous efforts by His Excellency the Viceroy to get leaders of Indian opinion to agree on the political and constitutional issues with a view to unifying and intensifying India's war effort, brought the Hindu Mahasabha very much into the limelight. It was in 1939-40 that the Mahasabha secured for the first time official recognition at the hands of the Government of India, a fact which was appreciated by the annual session of the Mahasabha in 1940. When His Excellency the Viceroy summoned leaders of different communities and interests for consultation on the political question, the Hindu Mahasabha insisted that it alone had the right to speak in the name of the Hindu community. The resolution passed by the Mahasabha welcomed "the recognition by the Viceroy and the Secretary of State that the political situation in the country cannot be satisfactorily solved without the co-operation of the Hindu Mahasabha, which is the most outstanding body representing the Hindu community's interests."

In the middle of 1940 when the Viceroy was considering the best method of associating representative Indian opinion with the governance of India by means of an expanded Central Executive Council, the Hindu Mahasabha strongly advocated the claims of the Hindu community for adequate representation thereon, and stoutly resisted the claims of Mr. Jinnah that the Muslim League should have a majority in the Central Executive Council if the Congress abstained from participation.

This status of equality with the Muslim League, in the eyes of authority, the Mahasabha has lost, witness the neglect it suffered at the time of the Simla Conference.

**Mahasabha and Indian States.**—A somewhat recent development in the outlook of the Hindu Mahasabha is its attitude towards Indian States. Presumably as a result of Muslim agitation in certain Hindu States, the Hindu Mahasabha leadership took the side

of the Princes. It is also conceivable that Hindu leaders tried to emulate the example of League leadership in regard to the authority and prestige of some Muslim Princes whose administration was criticised by their Hindu subjects. An example of this new trend in Mahasabha thought is to be found in a strong plea made by Mr. Savarkar to maintain Hindu States and strengthen them in all possible ways. Hindu Princes and Hindu States, he said, were the centre of Hindu power with organised machinery and trained armies. Hindu Princes, he added, would always safeguard Hindu rights and privileges. If the establishment of democracy meant subversion of Hindu States he did not want such democracy. The Indian Princes were not foreigners, he said, and as such their people should back them up in all their attempts to preserve their individuality. Mr. Savarkar envisaged a bright future for the Indian Princes who, he thought, would be required to play a great part in laying the foundations of a united and free India.

**Opposition to Pakistan.**—During 1939-40 the Hindu Mahasabha was considerably exercised over the demands of the Muslim League for the division of the country into Muslim and Hindu Indias. Anxiety was also expressed over the statements made by the Secretary of State for India on this subject, which were interpreted by the Mahasabha as conceding too much to the Muslims. The Working Committee of the Mahasabha claimed that India should be granted Dominion Status within a definite time limit and expressed the opinion that the statements made by the Viceroy and Mr. L. S. Amery as highly "unsatisfactory and disappointing" in that they contained no reference to India's right to independence, which was the declared goal of the Mahasabha, and that the reference made to the grant of Dominion Status as an immediate step in constitutional advance was vague and uncertain. The Statement to the effect that the British Government would not agree to hand over the administration of the country to a system of Government which would not be acceptable to large and powerful elements of Indian life, the Committee thought, required clarification as it was capable of the interpretation that if the Muslim League, the Princes or other vested interests opposed the recognition of the legitimate rights of the majority in India the further constitutional advance would be held up, or the rights of the majority would be surrendered to them. This would mean negation of the principle of democracy and an incitement to the minorities to obstruct and revolt.

**Direct Action Threat.**—The annual session of the Mahasabha met at Madura in South India in December, 1940, and passed a resolution appreciating the recognition by the Viceroy and the Secretary of State that the political situation in the country could not be satisfactorily solved without the co-operation of the Hindu Mahasabha.

The resolution added that while reiterating faith in the goal of complete independence, the Hindu Mahasabha is prepared to accept Dominion Status of the Westminster type as the immediate step.

The resolution also called upon the Government to recruit Hindus for the army and the navy, make military training compulsory for Indians, and to promote the establishment of war industries in India. The resolution concluded: "In case the Government fails to make a satisfactory response to the demands embodied herein before March 31, 1941, the Mahasabha will start a movement of direct action." A committee was appointed to devise ways and means for starting and conducting the campaign of direct action after the lapse of the period mentioned above.

Nothing happened, however, on the expiry of the ultimatum. The All-India Committee of the Mahasabha which met in the summer of 1941 resolved to postpone the direct action contemplated at Madura. The resolution on this subject referred to the correspondence that had passed between Mr. Savarkar and H.E. the Viceroy in pursuance of the Madura resolution, and to the pronouncements made from time to time by the Secretary of State for India in connection with the political situation in India. It noted that the Viceroy had turned down "some of the fantastic communal demands" put forward with regard to the extension of the Viceroy's Executive Council and also that the Secretary of State for India had, under pressure of public opinion created by the Hindu Mahasabha, criticised adversely the so-called Pakistan proposal.

**"Akhand Hindusthan".**—About this time communal rioting broke out in several places, including Ahmedabad, Dacca, Bombay, Cawnpore and Bihar Shariff. Hindu Mahasabha circles were unanimous in ascribing the riots to a design on the part of some Muslim leaders to force the issue of Pakistan. Mr. K. M. Munshi, a well-known Congress leader and former Home Minister of the Government of Bombay, left the Congress on the issue of a non-violent approach to the communal rioting. He started an Akhand Hindusthan (Indivisible India) campaign which was very popular in Hindu circles.

**Cripps Scheme Opposed.**—When the Cripps proposals (see the chapter on The Indian National Congress) were announced, the Hindu Mahasabha was one of the earliest to reject it on the ground of the unity of India. This did not, however, mean that the Mahasabha refused to co-operate in any case. In fact, Mr. Savarkar agreed to join in a Government at the centre, in spite of the Mahasabha's opposition to the other parts of the Cripps formula.

The months that immediately followed the Cripps visit witnessed a strong denunciation by Hindu Mahasabha leaders of the demand for Pakistan, rendered more fierce by the proposal of leaders like Mr. C. Rajagopalachariar to settle with Mr. Jinnah and the Muslim League on the basis of Pakistan. When Mr. Rajagopalachariar's move was condemned even by the bulk of Congressmen (see chapter on the Indian National Congress) it is easy to understand the opposition of the Mahasabha leaders.

When disturbances broke out in the country after the arrest of the Congress leaders on August 9, 1942, the Mahasabha President appealed to his followers not to extend any

active support to the Congress move, as the Congress resolution was bound to prove detrimental to Hindu interests and to the integrity and strength of India as a nation and State. At the same time he urged Government to appease Indian discontent by an unequivocal Parliamentary declaration giving India the status of a completely free and equal partner in the Indo-British Commonwealth, equal to that of Great Britain herself, and by investing India with actual political power.

The position of the Hindu Mahasabha was indeed unenviable. It could not unduly condemn the Congress which had now given up the cry of "No swaraj without communal unity" and had instead gone all out to win freedom for the country irrespective of what the Muslims said or did. Thus one of the major grievances of the Hindu Mahasabha against the Congress had been removed. At the same time the policy of the Congress, was opposed to that of the Hindu Mahasabha which was one of responsive co-operation. The Mahasabha would very much like the Congress demand for India's political emancipation being conceded without delay, but would not at the same time support the Congress methods.

The period when the Congress was behind prison bars witnessed the growth of certain new elements within the Hindu Mahasabha. A right wing came into being—rather the right wing forces which were already there came to the fore. This comprised leaders like Dr. Syama Prasad Mookerjee who were, in comparison, for example, with Mr. Savarkar, less communally minded, and more politically conscious.

For a time there was a tussle between the old and the new forces, and the official policy of the Mahasabha fluctuated in consequence. In August 1942 the Working Committee of the Mahasabha demanded immediate declaration of India's independent status and negotiation by Britain with the principal parties in India to solve the political deadlock and establish an Indian National Government. The relevant resolution stated that if the British Government did not respond to the demand the Mahasabha would be compelled to revise its programme and devise ways and means whereby Britain and her Allies "will realise that India as a self-respecting nation can no longer be suppressed." In pursuance of this resolution Dr. Mookerjee sought permission to meet Mr. Gandhi, but the Viceroy declined to give it.

This tendency to move away from the communal basis of the Mahasabha was checked when, in December 1942 the Viceroy, speaking at Calcutta, referred to the geographical unity of India and advised Indians to preserve Indian unity. This was naturally interpreted as disapproval of Pakistan and any proposal to divide the country. The extremists in the Mahasabha were jubilant and the advocates of compromise thought it expedient to take the Viceroy's hint and abandon all efforts to settle with the Muslim League on the basis of Pakistan. The prospects of a rapprochement between the Hindu Mahasabha and the Muslim League, such as they were, were rendered more remote as the result of the Viceroy's Calcutta speech.

forces and gave birth to the Pan-Islamic movement, the Swaraj-Pakistan movement could result in strengthening the Pakistan forces." He added that this offer had completely justified the policy of the Mahasabha to refrain "from being duped into the movement of 'Quit India,' which has now ended in such a miserable fiasco."

"It is really unjust," observed Mr. Savarkar, "to look upon Mr. Rajagopalachari as the villain of this tragedy. The fact is that a Muslim *Raj* in India has always been looked upon by Gandhiji and a large number of Congressmen as cent per cent. Swaraj." He contended that neither Mr. Gandhi nor Mr. Rajagopalachari had the authority to make a gift of any of the Indian provinces. He appealed to the Sanatanists to defend the geographical integrity of the country and urged other Hindus affiliated to other organisations, including the Congress, to join hands with the Sanatanists in their efforts to organise the anti-Pakistan front.

He made an appeal to all Hindus to save the land from danger of being vivisectioned, since "It is almost certain that no part or service submission to Government on the part of the Congress can bring about any constitutional change in India as long as the war lasts."

Mahasabha suspicions were accentuated by the prospect of Gandhi-Jinnah negotiations. Mahasabha leaders were so much disturbed by the fear of fresh concessions to Mr. Jinnah that Dr. Mookerjee sought clarification from Mr. Gandhi on the latter's intentions.

Outlining his impressions of his talk with Mr. Gandhi, Dr. Mookerjee made three points. The first was that Mahatma Gandhi's mind was still open to conviction and if he felt satisfied that what he had done was injurious to India as a whole or to a particular province, or even to a particular community, he would not hesitate to retrace his step. Secondly, Mahatma Gandhi's personal views on the question of partition of India were still the same as they were two years ago. In the third place, Mahatma Gandhi was most anxious that all people, including Congressmen, should, without reserve, express their opinion on the C.R. formula so that Mahatma Gandhi might correctly appreciate the country's reaction.

Dr. Mookerjee said that the real solutions for settling Hindu-Muslim differences was to find out from the spokesmen of the respective communities in what manner minority rights required protection in provincial spheres and the Centre. Mr. Jinnah had verbally given the assurance that he would give every protection to the minorities living in Pakistan. "Let us demand from him a clear and full analysis of the nature of the protection that he proposes to give and the manner in which such protection will be guaranteed under the constitution. It should not be difficult for the Hindus to offer exactly similar protection to Muslim minorities in the rest of India. Similarly, let the spokesmen of the minority communities themselves indicate how their rights are to be safeguarded under the Central administration and let the parties representing the majority community decide how far they can be accommodated."

It was clear, continued Dr. Mookerjee, that Mr. Jinnah's settlement with Mr. Gandhi could be only on the basis of Pakistan. He had not even stated what his Pakistan was, though he had emphatically indicated that the C.R. formula did not give him the Pakistan he wanted. Mr. Jinnah's demands would now increase, of which indications had already been given. He would demand that there should be no plebiscite for settling the issue. He might perhaps compromise on a Muslim plebiscite alone. He wanted Pakistan territory to be increased so that from economic, military and other standpoints it might be a strong and self-supporting sovereign state. He might well demand a corridor to join his eastern and western Pakistan. Above all, he must have 50-50 representation in the interim national cabinet.

"The trap laid for Gandhiji is clear" added Dr. Mookerjee. "If he fails to satisfy Mr. Jinnah, it is a mistake to suppose that the latter will stand exposed. He will not, for he will then say that although the principle of Pakistan was accepted by Gandhiji, he was not prepared to give it in a form that Muslims wanted so as fully to exercise their right of self-determination. Britain would also say that Hindu-Muslim differences being a real obstacle in the path of India's future freedom and the two great leaders having failed to agree, she must continue her perpetual trusteeship."

Even after it was known that the Gandhi-Jinnah pourparlers had broken down the Working Committee of the Mahasabha passed a resolution condemning the Rajagopalachari Formula and Gandhiji's Scheme "as being destructive of the integrity of India and being detrimental to the interests of the Hindus as well as of the country as a whole," and reaffirming that "no communal settlement will be binding on the Hindus unless arrived at with the consent of the Hindu Mahasabha."

In a second resolution, the Committee said: "In view of the impending termination of hostilities and in view of the war aims proclaimed and embodied in the Four Freedoms as announced by President Roosevelt and the Atlantic Charter and in view of the important part which India will be called upon to play in the maintenance of peace and order in the east and in the world, holding as it does a strategically vital position in the geography of the world, and in view of the fact that thousands of vallant Indians have shed their life blood on the various battle-fronts and India had economically bled itself white for the cause of the Allies in fighting Fascism, the Working Committee of the All-India Hindu Mahasabha hereby reaffirms that India is one and indivisible nation and calls upon the United Nations to make an unequivocal declaration recognising the right of India as such a nation."

"The Working Committee further resolves that, in the event of failure on the part of Britain to satisfy the fair and just demand made by India, the other Allied Nations should not permit Britain to delay any longer the removal of India's bondage on the pretext of communal, sectional or other differences, mostly created

by the policy of divide, and rule and sedulously fostered with the object of continued exploitation of the Indian people.

"In the opinion of the Working Committee, the Allies will be judged by the attitude taken by them in respect of India and her continued bondage will expose the Allied Nations to the charge of insincerity in the actual application of their professed war aims and would confirm the opinion that the war was being fought by rival imperialists struggling for world domination.

"The Working Committee is further of the opinion that continuance of the present undemocratic Government, not at all responsible to the people of India, has resulted in the estrangement between India and Britain which will not fail to be a menace to world peace and world order."

The Working Committee authorised the President to cable the resolution to President Roosevelt, Premier Churchill, Marshal Stalin and General Chiang-Kai-shek.

**Bilaspur Session.**—The annual session of the Mahasabha was held at Bilaspur on Christmas Eve in 1944. Dr. Syama Prasad Mookerjee presided.

The proceedings of the session were signalised by the adoption of a draft constitution for the future free India embodying the principles for which the Mahasabha stands. The draft said: "Hindusthan shall be a free State and her constitution shall be styled 'The constitution of the Hindusthan Free State.' Historically, politically, ethnologically and culturally, Hindusthan is one whole and indivisible, and so shall she remain. The form of Government shall be democratic and federal. The federal legislature shall be bicameral in structure. Elections to the legislature, whether federal or provincial, shall be on the basis of adult franchise and of 'one man one vote.' The federal government shall be distributed between the central and provincial legislatures in a manner so as to give an adequate measure of autonomy to the provinces, with residuary powers at the centre. The power of the Government, whether federal or provincial, shall be divided into legislative, executive and judicial, with the executive responsible to the legislature and both responsible to the people and with the judiciary independent of the executive. Distinctions between martial and non-martial races shall no longer exist, and the military strength of the Hindusthan Free State shall, as far as possible, be equilibrated amongst its various provinces, consistently with its standard of discipline and efficiency. The States should be brought into the federation of Hindusthan. Responsible government should be introduced, on the principles stated above."

It was laid down that "the fundamental rights of a free state, namely, that all citizens domiciled in Hindusthan shall, in general, enjoy rights and privileges and, in particular, the obligations of citizenship and shall, in particular, enjoy fundamental rights as under:—

"Citizens shall be equal before the law and shall enjoy equal civic rights. There shall be no law of a discriminatory nature.

"All citizens shall enjoy the fruits of their toil and shall be entitled to the necessities of life without exploitation of man by man.

"The State shall make suitable laws for maintenance of health and fitness for work of all citizens for securing a living wage for every worker, protection of the motherland, welfare of children and economic consequences of old age, infirmity and unemployment.

"All citizens shall have the right of free elementary education.

"All citizens shall have the right to keep and bear arms in accordance with the regulations made.

"No citizen shall, by reason of colour, caste or creed, be prejudiced in any way in regard to public employment, office of power or honour or exercise of any profession, sequestered or confiscated save in accordance with the law.

"No citizen shall be deprived of his or her liberty of person except in due process of the law.

"All citizens shall enjoy the right of free expression of opinion as also the right of assembly peacefully and to form associations or unions for purposes not opposed to public order or to public morality.

"All citizens shall, subject to public order or morality, enjoy freedom of conscience and free profession and practice of religion and protection of culture and language, and no law shall be made either directly or indirectly to injure any religion or prohibit or restrict free exercise thereof.

"The provinces of Hindusthan may, where necessary, be redistributed on a linguistic basis. The religion, language and culture of minorities shall be respected and guaranteed.

"The press shall be free and no measures shall be taken to hinder the publication, sale, and distribution of any writing or newspaper subject to the rules of morality and public order."

The principal resolution of the session expressed the opinion that an agreed scheme of reforms which would solve her political problems and a united front were the pretexts which were being put forward by British politicians to enable Britain to defeat Hindusthan's claim to freedom. The resolution declared that "a major surgical operation like Pakistan" was not in the best interests of Hindusthan. Without prejudice to the Mahasabha's demands for complete independence and the right to frame its constitution, the resolution called upon the British Government to prove their *bona fides* by taking immediate steps to implement the Cripps scheme, shorn of clauses giving power of secession to provinces, and to dissolve the legislatures as the first step with a view to forming a constituent assembly elected not on the basis of the Communal Award but on the basis of a joint electorate with reservation of seats where necessary.

**Wavell Plan.**—When Lord Wavell broadcast his plan for an Interim Central Government, the working Committee of the Mahasabha registered its strong protest against the proposal

The principal political resolutions ran as follows: "On the termination of the world war causing untold misery and sufferings to millions of people in India and the other countries both in the east and the west, we call upon His Majesty's Government to redeem the pledge of liberation of oppressed humanity from both political and economic fetters. Hindustan was bled white and made great sacrifices both in men and materials in fighting the forces of aggression and sacrificed millions of her sons due to famine and pestilence caused by the conditions created by the war. In view of the glorious part played by the Indian Army in achieving victory in theatres of war, and particularly by the Hindus, who formed about 70 per cent. of the combatant forces and won as many as 27 Victoria Crosses out of 31 won by Indian soldiers, the United Nations should stand by India's demand for justice, fairplay and see that no injustice is done to the Hindus in this crisis. If Democracy has any meaning, no power on earth can deny with impunity the united demand of the vast majority of the Indian masses for independence. By the independence of India and other countries in bondage will the United Nations now be judged.

"To make agreement between political parties and communities a condition precedent to the freedom of India is a pretext for imperialism to cling to power. The present constitution is based on the so-called communal award which is a negation of democracy and makes impossible the real verdict of the Indian people to be expressed constitutionally. We call upon the British Government immediately to repeal the communal award, which is unfair, undemocratic and anti-national. The Hindu Mahasabha has all along rejected the communal award. We are of the opinion that the election should be based on the genuine democratic principle of one man, one vote. A constituent assembly returned on communal electorates based on the communal award can never reflect the true mind of India and will merely create artificial issues which will disrupt Indian unity and help imperialism to continue its domination. The Mahasabha insists that any constituent assembly or any body entrusted with the work of drafting India's new constitution should proceed on the basis that India is and shall remain one and indivisible and further, that any majority community shall not be reduced to a minority or equality.

"A genuine national election based on democratic franchise will pave the way for the formation of a true constituent assembly for framing the constitution of free Hindustan for the uplift of the masses, the economic prosperity of the people, the uprooting of the present corrupt official regime for tackling the problem of hunger and unemployment and for preventing the exploitation of the impoverished masses.

"The Hindu Mahasabha is opposed to the pernicious principle of parity between Hindus and Muslims. It is inherently unjust to reduce a majority of three-fourths to the same position as a minority of one-fourth. This unfair reduction of 25 crores to the same level as that occupied by a minority of 8½

crores is undemocratic and will not solve the communal problem. The British Government has made impossible any agreement between communities and parties because it has conferred practically a veto in the hand of the communalist who has been given unfair weightage and excessive representation. The Hindu Mahasabha is of the opinion that the Wavell Plan, which envisaged no real transfer of power to Indian hands, was fore-doomed to failure because it was based on inherently unjust proposals of parity and the denial of representation to the Hindus as such while conceding recognition to the Muslim League.

"His Majesty's Government can call for the co-operation of all nationalist elements, Hindus and Muslim, who are willing to shoulder responsibility for tackling the triple issues of the integrity of India, opposition to parity and the demand for complete independence without a weakening or crippling of the Hindus. On these three issues His Majesty's Government should make an unequivocal declaration and the Hindu Mahasabha confidently calls upon the people to create sanctions for the effective enforcement of their just demands."

As remarked earlier, the Mahasabha receded into the background with growing political activity on the part of the Congress. Such influence as it had over the Hindu mind suffered as the result of a new declaration of Congress policy towards Pakistan and the proposed partition of India. The Working Committee of the Congress in the Autumn of 1945 adopted a resolution on the subject which set its face squarely against the division of the country (See Chapter on the Indian National Congress). Then followed months of electioneering activity in which the Congress successfully eclipsed the Mahasabha. It was only in very few constituencies that the Mahasabha could put up its own candidates, but hardly any could come on top. Most of the Mahasabha nominees forfeited their deposits. The Hindu electorate solidly voted Congress.

When, therefore, the British Cabinet Mission arrived in India in the spring of 1945 and carried on negotiations with the Indian political parties, the Mahasabha was not much in evidence. Mr. L. B. Bhopatkar, Acting President of the Mahasabha, met the Mission and submitted a ten-point memorandum. The points made out were: (1) immediate declaration of independence of India; (2) formation of an interim government with complete transfer of all power and authority of Government of India to this Government; (3) recognition of India's integrity and indivisibility; (4) opposition to territorial self-determination; (5) India's constitution to be of the federal type with (6) provisions for the grant of the utmost measure of autonomy to the federating units, the provinces and the States, but with residue of powers vested in the centre; (7) the governing principle of the constitution to be democracy, which means the rule of the majority; (8) representation in legislatures on the principle of adult franchise; (9) no division of India into British India and the Indian States; and (10) the setting up of a sovereign constituent assembly.

# The Hindu Mahasabha.

Federation the Sikh community would be a drop in the ocean, they would not be a negligible factor in Pakistan not only because of their proportion in the population of the Punjab, but also by virtue of statutory guarantees offered to them by the Muslim League leader. Eventually, however, Mr. Jinnah's overtures were turned down because the bulk of the Sikh community was opposed to Pakistan.

At the same time there began to grow up in the Sikh community a tendency at exclusivism and self-reliance. This was due, on the one hand, to the growingly militant Muslim League campaign for Pakistan and, on the other, a feeling that Hindu leadership might not hesitate to sacrifice the Sikhs for a settlement with League on the all-India plane.

The advent of the War and the supply by the martial race of Sikhs of a large number of recruits for the Allied armed forces invested this community with added importance in the eyes of British authority. Thus, for instance, a Sikh leader found a place in the expanded Executive Council of the Governor-General, and, later still, the community was given representation in the Simla Conference called by Lord Wavell to consider his proposals for the establishment of an Interim Government at the Centre. Now a Sikh leader holds the Defence portfolio in the Interim Government.

Whereas the bulk of Sikh opinion continued to be hostile to the idea of partitioning India into Hindustan and Pakistan, there is a small section of opinion which suspects the possibility of the Congress compromising with the Muslim League in its Pakistan demand. This section tends to take the destinies of the community in its own hands and forestall a possible division of the country by entering into advance arrangements with the League in the event of the creation of Pakistan.

The latter school tended to form the Sikh community into a water-tight entity apart not only from the Muslims but also from the Hindus, with whom they still have close social and inter-marital relations. The fear that, in its anxiety to reach an all-India political settlement, the Congress might sacrifice the interests of the Sikhs was exploited by the Akali Group in the Sikh community, which was thus divided into two strong groups, one owing allegiance to the Congress and the other being hostile to that institution. In the general elections held in April 1946, the Akalis captured two-thirds of the number of seats reserved for them in the Punjab legislature, while the Congress got the remaining one-third, although an analysis of the voting figures revealed that the Congress candidates secured the support of nearly half the electorate.

**Cabinet Mission and the Sikhs.**—In the British Cabinet Mission's proposals the Sikhs were recognized as an important minority like the Muslims but unlike Indian Christians, Anglo-Indians or even Scheduled Castes, who all came under the term "General"; yet the Sikhs were not given the communal veto which was accorded to the Muslims in determining the future constitution. This constituted a

sore point with the community whose spokesman wrote to the Secretary of State for India as follows:

"Since the British Cabinet Mission's recommendations for the future constitution of India have been published, a wave of rejection, resentment and indignation has run throughout the Sikh community. The reasons are quite obvious.

"The Sikhs have been entirely thrown at the mercy of the Muslims. Group B comprises the Punjab, the N.-W. F. P., Sind and Baluchistan, and the representation given to each community will be Muslims 23, Hindus nine and Sikhs four. Can anybody expect from this assembly, constituted as it is, any consideration or justice for the Sikhs? The Cabinet Mission recognises 'the very genuine and acute anxiety among the Sikhs lest they should find themselves subjected to a perpetual Muslim majority rule.' If the British Government are not aware of the Sikh feelings, the Sikhs will have to resort to some measures in order to convince everybody concerned of the Sikh anxiety, in case they are subjected to a perpetual Muslim domination. The Cabinet Mission has not only put under Muslim domination the non-Muslim areas of the Punjab and Bengal but the whole province of Assam where the non-Muslims are in overwhelming majority. This is evidently done to placate the Muslims. If the first consideration of the Cabinet Mission's recommendation is to give protection to the Muslims, why should the same consideration be not shown for Sikhs? But it appears that the Sikhs have been studiously debarred from having any effective influence in the province, a group or general Union. I refer to section 15 (ii) and section 19 (vii) in which it has been definitely provided that the majority of both the Hindus and Muslims is necessary for certain purposes. The Sikhs are entirely ignored, though they are as much concerned as the other communities.

"This is how I read the recommendations of the Cabinet Mission. But as the issues are very grave and momentous, the Sikh representatives, assembled here today to consider the situation created, have advised me to seek clarification from you and find out if there is any hope of such amendments as may save the Sikhs from perpetual domination.

So I put three questions:

"(1) What is the significance of recognising the Sikhs as one of the main communities?

"(2) Suppose the majority of Section B frames a constitution under section 19 (v) but the Sikh members do not agree does it mean deadlock or does the opposition of the Sikh members mean simply disassociation?

"(3) Is there any hope of obtaining for the Sikhs the same right as is given to the Muslims and the Hindus under section 15 (ii) and 19 (vii)?"

The Secretary of State replied:—

"The anxieties of the Sikhs were kept prominently in mind when we were drafting the Cabinet Mission's statement, and I can certainly

claim that of the various alternatives open to us the best one from the Sikh point of view was chosen. You will, I am sure, admit that, if India had been divided into two sovereign States, or if the Punjab had been partitioned, either of these decisions would have been far less acceptable to the Sikhs than the one which was actually reached.

"I have considered carefully the detailed points you raise at the end of your letter. I fear the Mission cannot issue any addition to, or interpretation of, the statement. There is, however, no intention whatever to prejudice the position of the Sikhs in the Punjab or in the North-West Group, nor do I think their position has been prejudiced, for, it is inconceivable that either the Constituent Assembly or any future Government of the Punjab will overlook the special place in the province of the Sikhs. The estimate of the importance of your community would never depend on the number of seats that you held in the Constituent Assembly. The Viceroy has told me that he will be glad, in view of the anxieties you have expressed on behalf of your community, to discuss the position of the Sikhs specially with the leaders of the main parties when the Constituent Assembly has been formed. He hopes he may be able to persuade them, if persuasion is needed, that the interests of the Sikhs should on no account be overlooked.

"If you and Sardar Baldev Singh would care to see the Cabinet Mission and the Viceroy in the first week of June, we shall be glad to see you."

Sikh hostility to the Mission's proposals and the fear that they might be placed at the mercy of the Muslims in their own home-land unified the community, with the result that even Congressmen among them had to submit to the will of the majority. Although the Congress, towards the end of June, accepted the long-term proposals of the Mission, the Sikh community, under the leadership of the newly-formed Panthic Board (representative of all Sikh interests) decided not to participate in the proposed Constituent Assembly. The decision was reversed in response to the appeal made by Pandit Nehru to the Congress Sikhs, but was again reversed owing to a misunderstanding caused by Pandit Nehru's instructions. Then followed a series of negotiations between Sikh leaders on the one hand and the Congress and the League on the other. Eventually, the Sikh community decided to withdraw its rejection and to take part in the constitution-making effort on the understanding that the Congress would do everything in its power to safeguard the rights of the Sikhs. As a result of this decision, Sardar Baldev Singh, a leader of the community, was taken on as a member of the Interim Government formed in the Autumn of 1946.

# The National Liberal Federation— History of Moderate Politics.

A definite breach between the moderate and extremist elements in the Congress at its special session in Bombay in August 1918 (vide 1919 edition of this book) witnessed the birth of the National Liberal Federation of Indian moderate other day was the platform of Indian moderate leaders. Today liberalism in India is as good as dead. The country has become almost exclusively Congress minded, so that this Chapter has only historical value.

The National Liberal Federation held its first session in Bombay in 1918. Sir Surendranath Banerjee presiding. The Federation adopted for its creed the old Congress formula which was set aside by the Nagpur Congress. The Liberal Party in India has always been the rallying point of moderately progressive opinion. It has consistently stood for a pure type of nationalism and orderly progress through peaceful and constitutional means, as opposed to the revolutionary creed and policy of the Congress. During the first five or six years of its existence, the party played a useful and valuable part in politics and exerted a wholesome influence on public life. The death of the Rt. Hon. E. S. Montagu was a serious blow to the Indian Liberal Party whose influence on Indian affairs steadily waned since then. The Indian Round Table Conference brought it again to the forefront, but its influence again suffered partly as the result of the "reactionary provisions" of the Government of India Act of 1935 and partly as the result of the growing strength of the Congress organisation. The return of the Congress to the constitutional path ousted it from Indian politics. At the time of writing the Liberal Party exists only in name, there being no place for a middle group in Indian affairs of the present day. Latterly scope has arisen for activity in between extremist groups, rather as mediators than as principals. This function of mediation has been filled by a group of leaders consisting mostly of retired administrators and others who own no party affiliations or have severed party allegiance. Quite a few Liberal Party members have joined in the deliberations of this group in their individual capacity. Formed under the title of Non-Party Leaders' Conference, this group has itself crystallised into a centre party, throwing the Liberal Federation further into the background. Indeed, it was felt necessary to enter a special session of the Liberal Federation a special plea for the continuance of the Liberal Party in reply to suggestions that the party be wound up.

The general elections for the provincial legislatures under the Government of India Act of 1935 confirmed the exit of Liberals from active political life in India. Few Liberal candidates contested the elections, but hardly any was successful. During the past two or three years the Liberal Party existed only in name. Its leaders, however, made their existence felt by occasional contributions to the discussion of public questions. They also played a valuable

part in offering sober and constructive criticism of the policies and actions of the majority party, the Congress. Such criticism was all the more useful owing to the absence of an opposition in most of the provincial legislatures in which the Congress was in power.

The elections of 1946 completed the rout of the Liberals who have ceased to be an effective factor in the country's political life. Their place has more or less been taken by the right wing of the Congress which in its turn is the result of the development of extremism within the Congress itself.

Although the Liberals hold no less progressive views than Congressmen, there is a fundamental difference between the two: the former have fixed Dominion Status within the Empire as their ambition, while the latter have set "complete independence" as their goal; similarly in the matter of method, the Liberals are opposed to direct action and are wedded to constitutional forms of agitation to accelerate the pace of the country's political advance.

There is another direction in which the Liberal Party's sentiments may be said to be different from those of the Congress. Having an abiding faith in the British connection and being convinced of the potentialities for good of the British Empire, the Liberal Party constantly wishes well by the Empire and what it stands for. For this reason no member of the Party wished anything but success for the Empire in the struggle against aggression. Many of them gave public expression to their convictions in this India should render full and undoubted desire that India should render full support to Britain in her war.

Latterly, however, the bulk of the Liberals have shown signs of impatience over the deadlock in the country. While they were ready to realise that the attitude of the Congress was not a little responsible for the political impasse, they were by no means happy over the bureaucratic form of administration both at the centre and in the majority of the provinces. They wished that the authorities should make an effort to end the political inactivity. Towards this end they made repeated appeals to the British authorities.

Not all of these were made in the name of the Liberal Federation. Indeed the most influential and well known exponents of the view-point of the Liberal Federation do not belong to that organisation. Take for instance, the Non-Party Leaders' Conference whose proceedings figured largely in Indian politics during the past two or three years. The President and more than one leading light of this Conference are not members of the Liberal Federation. It is nevertheless true that the views of both are identical on many subjects. It may therefore be appropriate to deal with the activities of these leaders in this Chapter.

**A Dual Policy**—The activities of the Liberals and other moderate leaders during the past couple of years, till the summer of 1946

have followed a dual policy. On the one hand, they were never slow to denounce any attempt to hamper the country's war effort, and, on the other, their demands were little different from those of the Congress.

The period when the Congress was in the wilderness, especially since the adoption of the August resolution till the release of the Congress in June, 1945, may perhaps be described as the moderates' era in Indian politics. Not that they regained their lost influence, nor that the masses abandoned their extremist tendencies which they had acquired from the Congress propaganda. If anything, extremism, feeding on itself, became more extremist. Nevertheless, it was a moderates' period in the sense that the moderate leaders occupied the public stage. The Congress exit into wilderness was partly responsible for this development. When the satyagraha movement was in progress, there was hardly any politics worth the name except the activities of the Liberals and other moderate leaders. Another reason for public attention being directed towards moderate politics was the effort made by the British Government to meet the demands of moderate leaders. It cannot be said that the authorities did anything substantial to enhance the reputation, and strengthen the position, of the sober element in the Indian political world; on the contrary, the point was frequently made that the way in which the Liberals were ignored gave additional impetus to extremism. But such action as was taken was the result of the outspoken representations made by the moderate leaders. The year 1944-45 was marked by the jubilee session of the Liberal Federation which completed 25 years of public service. Another remarkable activity was the evolution by Sir Tej Bahadur Sapru and a Committee of non-party leaders of a compromise formula relating to India's future constitution. This was drawn up following the failure of the Gandhi-Jinnah negotiations in the autumn of 1944.

**Activities in 1943-44.**—During the year 1943-44 the activities of the Liberals and the peace efforts of moderate politicians generally were of a limited character. This was due partly to the stagnant nature of the attitude of both sides to the dispute, namely, Government and Mr. Gandhi. Whereas the Government of India refused to move from the decision not to reopen the question unless Mr. Gandhi abrogated the "Quit India" resolution of August 1942 and forswore the policy underlying it, Mr. Gandhi, for his part, gave no indication to respond in terms of the Government demand. Notwithstanding the hopes and speculations of those who variously claimed to know Mr. Gandhi's mind, his own attitude seemed hardly to have varied from the sentiments expressed by him in his letter to Lord Linlithgow and the Government of India published on the eve of his fast in February 1943. Thus there was available to the intermediaries no common factor which they could exploit to bring about an understanding between the two opposite view-points.

Even so, efforts, though of a sporadic nature, continued to be made by unattached leaders to secure a change in the official policy towards the Congress or at least to induce Government to

release the leaders so as to enable them to consider the altered situation. Unrestrained by their failure to move the Government, following Mr. Gandhi's fast, the moderate leaders urged the appointment of an impartial tribunal to investigate the charges made against Congress under detention or, in the alternative, the release of these leaders so as to enable them to review the situation and attempt a solution of the deadlock. To this, however, the Secretary of State replied in the House of Commons, saying that the Government of India had no intention of "staging a trial" of Mr. Gandhi and other detained Congress leaders—(see last year's issue).

In the winter of 1942-43 the annual session of the National Liberal Federation met in Bombay under the presidency of Kuntwar Sir Maharaj Singh. The Session was remarkable for the diametrically opposite view points expounded by the President and the Chairman of the Reception Committee (Sir Cowasji Jehangir).

While deploring the August resolution of the Congress, Sir Maharaj Singh criticised Government for failure to announce a complete change of policy at the commencement of the war, adding that "If Sir Stafford Cripps had not come to India with his proposals in 1940 or early in 1941, instead of 1942, there would have been an excellent prospect of their acceptance." Under present conditions, he deplored, "we are face to face with a divided India, with the hands of our fellow-countrymen, including many prominent and popular leaders, in prison, the retention by European officials of the key departments of Finance, Defence and Home in the Government of India, a complete absence of popular government in large portions of India, swollen prices, general distress and famine in large and densely populated areas." Sir Maharaj complained that the advice of moderate leaders had been brushed aside by Government.

Sir Cowasji Jehangir took a different view of the problem. He blamed the Congress for the failure of the Cripps Mission and affirmed that it broke down owing to the eleven-hour raising of the issue of the Viceroy's veto. He cited Mr. Jinnah's opinion in support of the contention that the formation of a national Government on the lines of the Congress demand would have been totally opposed by the minorities in general and the Muslims in particular.

After drawing attention to the events that followed the August resolution, Sir Cowasji declared that if any progress was to be made it was essential that the Congress should not only withdraw the August resolution but also give an assurance to the British public and to the peoples of the Allied Nations that all people in India were behind this war and that they would unconditionally and enthusiastically help the war effort.

**Resolutions.**—The unconditional release of Congress leaders, the treatment by the Congress leaders of the "Quit India" resolution of August 1942 as a dead letter, a conference of political parties and the formation of national composite governments at the Centre and in the provinces—these suggestions were embodied

in a resolution, passed by the session. The conference also passed resolutions dealing with the war, India's position at the peace conference, Government's food policy and the Bengal famine.

Early in the summer of 1944, a session of the Non-party Leaders' Conference met at Lucknow under the presidency of Sir Tej Bahadur Sapru. (See last year's issue)

**Two-fold Appeal.**—In June 1944 the Council of the National Liberal Federation met in Poona and made a two-fold appeal one to the Government unconditionally to release the Congressmen not found guilty of violence and the other to the Congress to treat the August resolution as a dead letter, to put it aside and take measures to arrive at a working arrangement with other political parties for the formation of a provisional Government.

**Liberal Federation and Pakistan.**—The next meeting of the Council was held at Allahabad in October and expressed the opinion that the two-nations theory advanced by Mr. Jinnah was opposed to facts while his insistence on a plebiscite confined to Muslims was unfair to other communities and incompatible with democratic concepts. The Council also declared that the division of the country into two or more separate sovereign states was not a right solution for the Hindu-Muslim question.

**Conciliation Committee.**—Soon after the failure of the Gandhi-Jinnah talks in Bombay Sir Tej Bahadur Sapru, President of the Non-Party Conference, announced his intention to set up a committee (Called the Conciliation Committee), comprising eminent public men with no marked political affiliations, to examine the Indian communal question from a political and constitutional point of view. This was the outcome of a resolution passed by the Standing Committee of the Non-Party Conference which said: "The Standing Committee of the Non-Party Conference, having considered the present situation in view of the breakdown of the Gandhi-Jinnah talks on the communal issue, hereby resolves to appoint a committee which will examine the whole communal and minorities question from a constitutional and political point of view, put itself in touch with different parties and their leaders, including the minorities interested in the question, and present a solution within two months to the Standing Committee of the Non-Party Conference. The Standing Committee will take all reasonable steps to get that solution accepted by all parties concerned. The Standing Committee authorises Sir Tej Bahadur Sapru to appoint members of the committee and announce their names in due course."

Sir Tej Bahadur Sapru explained that he had placed before Mr. Gandhi the idea of a committee of the kind now decided upon and Mr. Gandhi had said:—"I shall unreservedly co-operate with it. You can call me whenever you like and put me any questions you like and ask me for any assistance you like."

Sir Tej Bahadur added that it was his intention that there should be on the committee no one who was a partisan or one who had expressed himself violently on political issues of the country. It

was also the idea that there should be one or two retired judges who would bring a judicial mind to bear on the country's problems.

The basic conception of the committee was that the discussion of the communal and political problem should be lifted from the partisan level to the scientific and judicial level.

The effort of the committee would be to understand the views of each party, act as a sort of conciliation board by establishing contact with all parties and recommend some solution that they thought good on their own responsibility. "It would be open to each party to accept it wholly or partially or to reject it" said Sir Tej Bahadur. "There is no question of failure or success. When the committee has done its work, it will be for the leaders of different parties to consider whether at that stage they should not call a bigger conference—either an all parties conference or a convention."

"Explaining the function of the proposed committee, Sir Tej Bahadur stated that it would approach various political leaders "very politely and very courteously", and invite them to explain their points of view. It was possible that some might refuse their co-operation and rebuff the committee, but that would not deter them.

The personnel of the Committee was completed towards the end of the year. It included eminent leaders from different communities, most of whom fulfilled Sir Tej Bahadur's qualifications, in particular that they should be experts, eminent and experienced and non-partisan in outlook. They included the Metropolitan of India, Sir S. Radhakrishnan, Sir Maharaj Singh, Sir Jagdish Prasad, Sir N. Gopalaswami Iyengar, Mr. Tushar Kanti Ghosh, Mr. N. M. Joshi, Mr. P. R. Das, Sardar Sant Singh, Sardar Harnam Singh, Mr. K. B. Nahi Bux Hussain, Sir H. P. Mody, Dr. John Mathai, Dr. P. K. Sen, Mr. Frank Anthony and Mr. B. L. Rallia Ram.

**Committee's Aim and Scope.**—The Committee began its work on December 29, 1944, with an opening address by the President, Sir Tej Bahadur Sapru, defining the exact scope and functions of the Committee "Our essential duty", he said, "is to apply our minds to the basis of the constitution, not to detailed provisions of the constitution."

"We are approaching our task in a true spirit of humility. The sincerity of our motives may be attacked; we may be supposed to carry on a diabolical conspiracy against others; but we have nothing to conceal; we have nothing of which we need feel ashamed. We only claim the common right of the citizens of this country to form and express our opinions for what they are worth."

The object of the Committee, Sir Tej Bahadur made it clear, was not to frame a detailed constitution. That must be left to some other body and he hoped that that body would come into existence. No one relished the idea that this country should continue to be in its present state "If", he said, "we fail to come to an agreement, somebody else must discharge his duty in this matter. That somebody else must be the British Government."

"Let me assure you", said Sir Tej Bahadur, "I have got some very encouraging letters and memoranda, even from Muslims". Sir Tej Bahadur mentioned that as many as nine memoranda were from Muslims; one valuable memorandum had come from a very distinguished Muslim, who had approached the problem from an entirely independent point of view.

Sir Tej Bahadur had also received similar encouraging letters from quarters from which he did not expect any encouragement. He had received letters and telegrams from England.

"I have tried to approach Mr. Jinnah. He does not want to recognise the Non-Party Conference or this Committee. I have no quarrel with him. He may not recognise us. But we recognise ourselves. That is my answer. This Committee will go on. This Committee must discharge its duty."

He had tried to approach the Sikh leaders and had received an encouraging reply from Master Tara Singh. He had approached Dr. Bhanu Prasad Mookerjee and Mr. Bavarkar. They had agreed to see him.

This Committee, Sir Tej Bahadur pointed out, was not established on the basis of representation of each caste or community; but he left it to the Committee to decide for itself on this question. He was anxious to get representation of the Scheduled Classes. At one stage Dr. Ambedkar seemed agreeable to help the Committee in this matter, but, later, he said he did not approve of some of the Committee's members—Sir Tej Bahadur did not know who were the sinners.

However, the amount of literature available about the Depressed Classes was enormous and there were men in this Committee to whom the interests of the Scheduled Classes were as dear as to any leader of those classes.

**Mr. Gandhi's Views.**—The material on which the Committee based its discussions included memoranda which the committee had received from various organisations and individuals. Sir Tej Bahadur Sapru, sent to Mr. Gandhi the committee's questionnaire for a reply, but the latter wrote back saying that he would prefer to reply to any specific questions that may be put to him with reference to his talks with Mr. Jinnah.

The following are some of the questions put to Mr. Gandhi and the replies received from him:—

**Question:**—In his letter of September 17, Mr. Jinnah says that "the word (Pakistan) has now become synonymous with the Lahore resolution". Did you ask him whether in accordance with the Lahore resolution of the All-India Muslim League a scheme of constitution in accordance with the basic principles providing for the assumption finally by the respective regions of all powers such as defence, external affairs, communications, customs and such other matters as may be necessary, had been prepared? Was your attention drawn to any such scheme by Mr. Jinnah?

**Answer:**—"No, Qaid-e-Azam's position unfortunately was that while he could come as far as seeing me and trying to convince me of his

position, he, the President of the League, could not discuss details with me, a mere individual. But so far as I could gather from our conversations, he had no prepared scheme. As the correspondence shows, he had referred me to two books, both of which I read, but neither of which could help me to understand his exact position. One thing he insisted upon was that if I first accepted the Pakistan of his conception, he could then discuss other things with me, even though I was but an individual."

Asked if it was true that the real breakdown between him and Mr. Jinnah came about on the question of central authority or Government, Mr. Gandhi replied: "It can be said that the breakdown took place because we could not come to an agreement on the two-nation theory of Qaid-e-Azam. As the correspondence will show, I wanted to avoid a central Government. I suggested an authority acceptable to both the parties, but he would insist first on complete partition as between two nations and then an agreement between them as on foreign affairs, etc. He would not agree to anything simultaneous."

Mr. Gandhi's attention was drawn to a passage in his letter to Mr. Jinnah dated September 28, 1941, in which he said:—"That if it means utterly independent sovereignty so that there is to be nothing in common between the two, I hold that it is an impossible proposition. That means war to the knife" and was asked what he meant by "war to the knife."

Mr. Gandhi replied: "War to the knife is a simple English idiom. I have never known it used in the literal sense. It simply means a determined quarrel between parties. I hold that if there is nothing in common between the two or nothing which does not come in conflict with each other's culture, there can be no friendly mutual agreement."

To another question Mr. Gandhi replied "Although I could not agree to the two-nation theory, I agreed on the basis of members of a family desiring severance of the family tie in matters of conflict but not in all matters so as to become enemies one of the other as if there was nothing common between the two except enmity."

**C.R.'s. Support.**—Mr. C. Rajagopalachari wrote to the Committee:—

"I have your circular letter of Dec. 3 about the Conciliation Committee. I need hardly say how warmly I wish you every success.

"As regards my views of which you have asked for a memorandum, they are contained in the 'C. R. Formula' which formed the subject matter of the Gandhi-Jinnah talks. I am unable to improve the terms of that formula.

"I may clarify a point which has been deliberately misrepresented by certain advocates of the Muslim League. It is only for fixing the Pakistan area of Punjab and Bengal that I have in my formula asked for examination of population statistics district by district. Once the area is thus delimited, my formula leaves the verdict on the issue of separation to the people inhabiting the delimited area as a whole. It is not the intention of the formula to take the plebiscite district by district. Plebiscite by districts would involve the possibility

of the contiguity of the area being lost if one district votes one way and another district in a different way. This is therefore avoided. The clause as to the right of districts on the border is a safeguard to ensure the prevailing of popular opinion where the contiguity would not thereby be disturbed.

"My position after the failure of the Gandhi-Jinnah talks is set out in the introduction to the Gandhi-Jinnah talks published by the 'Hindustan Times'. I need add nothing to what I have stated therein about the communal issue. I wish, however, to add one other point for the consideration of the Committee. It is not psychologically possible to create an atmosphere of reasonableness unless Self-Government on democratic lines in some shape or other is a settled fact, and such form of Government as is functioning and threatens to continue is replaced by an agreed constitution. I therefore appreciate the stand taken by the Non-Party Conference. The federal part of the Government of India Act of 1935 should with suitable modifications, be introduced at once with or without fresh Provincial elections according to the convenience of the British Government. I would prefer fresh basic Provincial elections, so that if the federal part of the Government of India Act of 1935 cannot be brought into force at once during interim period, an 'ad hoc' control executive may be constituted out of the Provincial Governments of the 11 Provinces which should all be restored in replacement of the Section 93 regimes. This 'ad hoc' Central Executive should replace the present Viceroy's Council. This can be done with very little parliamentary legislation and may be statutorily vested with a fixed term of tenure. If either of these things is done and a Central Executive is constituted on a popular basis, there will be a sanction of conciliation. An agreed constitution on the basis of the declaration of His Majesty's Government of April 11, 1942, will replace the interim arrangement. Parties will feel that unless they come to an agreement the interim arrangement will continue."

**Cable to Lord Wavell.**—While the Committee was still in session and before the formulation of its conclusions, Sir Tej Bahadur sent a cable to Lord Wavell, who was then in London discussing with His Majesty's Government proposals for a solution of the Indian political deadlock, communicating the following resolution unanimously adopted by the Committee:—

"In view of the internal situation particularly relating to the economic life of the people and in view of the rapid pace at which international events are marching, and in view of the necessity of India being represented in her own right and by her own representatives at all international conferences and peace conferences, if any, this committee strongly recommends that the following steps be taken at once:

"(1) All political prisoners and detenus be released immediately;

"(2) India should, by a royal proclamation, be declared an independent state and treated as a dominion equal and in no way inferior to any other dominion of the British Commonwealth of Nations, even though, pending the

framing and coming into force of a new constitution, the Government of India may have to be conducted in conformity with the provisions of the Act of 1935 subject to minimum necessary modifications;

"(3) (a) The proclamations issued in several provinces under section 93 of the Act should be withdrawn forthwith and the legislatures allowed to resume their normal activities; (b) Popular Ministries should be re-established in those provinces and allowed to function under the provisions of the Act; (c) In the formation of such Ministries the Prime Minister representing the largest single party in the legislature should be required as far as possible to include in the Ministry persons commanding the confidence of other parties in the legislature.

"(4) In addition to the restoration of autonomy in all the provinces of British India a National Government should replace the present Executive Council at the centre.

"For this purpose the committee would recommend for consideration the following two alternatives:

#### FIRST ALTERNATIVE.

"(a) Section five of the Government of India Act, 1935 should be so amended as to provide for the issue of a proclamation by His Majesty bringing into being forthwith a federation of India without insisting on the entry of Indian States as a condition precedent as provided in sub-section (2) of the said section, Indian States being at liberty to accede to the federation in accordance with the terms of section 6 of the Act.

"(b) Part 11 of the Government of India Act, 1935 with the proposed amendments should be brought into force and steps taken immediately to hold elections to the two houses of the federation legislature and to appoint a Council of Ministers in accordance with the provisions contained in that part.

Provided, however, that in the formation of such a ministry, the prime Minister representing the largest single party in the Legislature shall as far as possible, include in the ministry persons commanding the confidence of other important parties in the Legislature.

#### SECOND ALTERNATIVE.

Schedule IX of the Act may be continued in force but should be so amended as to provide for altering the constitution and functioning of the Governor-General-in-Council on the following lines:

(A) Except for the Commander-in-Chief who may continue to be ex-officio member of the Executive Council in charge of war operations and matters ancillary thereto the entire Executive Council should consist of Indians commanding the confidence of the parties in the Central Legislature: the provision in sub-section (3) of section 36 which requires that three at least of the members should be persons who have been in the service of the Crown in India for a period of at least ten years being repealed.

(B) No officials belonging to the permanent services shall be nominated to either House of the Central Legislature. The nominated block

of all Provincial Legislatures, under the system of proportional representation, that the Committee has decided to recommend that, in spite of the disparity in the population strengths between Muslims and Hindus other than the Scheduled Castes, the Hindu community should, in the interests of promoting communal unity, agree that the representation of the Muslim community on the constitution-making body shall be on a par with that given to the Hindus, other than the Scheduled Castes.

(3) No decision shall be valid unless it is supported by three-fourths of the members present and voting.

(4) His Majesty's Government shall enact the constitution on the basis of the valid decisions of the constitution-making body, supplemented wherever necessary by its own awards on matters in which the requisite majority for decision was not forthcoming.

**Division of India.**—The Committee, having considered carefully the resolution of the Muslim League passed at Lahore in 1940, the various other resolutions of the League and the published version of the talks between Mr. Jinnah and Mahatma Gandhi, and having also considered the "C. R." and Gandhi proposals, is emphatically of the opinion that any division of India into two or more separate independent sovereign States is unjustified, and will endanger the peace and orderly progress of the whole country without any compensating advantage to any community, and that the political unity of India should therefore, be maintained.

**Indian States.**—Provisions should be made in the constitution for the accession from time to time of Indian States as units of the Union, on such terms as may be agreed upon. The establishment of the Union should not, however, be made contingent on the accession of any Indian State or of any minimum number of Indian States. The Union should be brought into being and should commence to function at the earliest possible date, even if no Indian State has acceded to it as a unit by then.

**Non-Accession and Secession.**—No province of British India may elect not to accede to the Union, nor may any unit—whether a Province or a State, which has acceded—be entitled to secede therefrom.

**Provincial Boundaries.**—While it is not desirable that the new constitution should be delayed by the realignment of provincial boundaries on linguistic or cultural considerations, the Constitution Act shall indicate the machinery and prescribe the procedure for such realignment of the old Provinces and for the creation of new Provinces after it has come into force, and on such realignment or creation of Provinces all consequential amendments may be made, in the constitution.

The Committee submits the accompanying suggestions for the consideration of the constitution-making body. They have been placed before the Committee by one of its members, who has great experience of the administration of Indian States and of the working of the Government of Indian Act (1935) in relation to them. As the Indian States are not represented on this Committee, and as the suggestions are of a very vital and far-reaching character,

the Committee has thought it desirable to express no opinion on the merits of the several alternatives suggested beyond stating that a clear definition of "a Head of the State" is necessary as the several resolutions adopted by the Committee assume the existence of a Head of the State and the exercise by him of certain powers and functions. The member responsible for these suggestions agrees that they, or any variant of them, involving the participation of the Indian States, cannot be finally adopted except with the consent of the Indian States.

(1) There shall be a Head of the State (that is, Union) in India, who shall be the repository of (a) all such powers and duties as may be conferred or imposed on him by or under the Constitution Act; and (b) such other powers as are now vested in His Majesty the King of England, including powers connected with the exercise of the functions of the Crown in its relations with Indian States, provided that in relation to his powers, the Head of the State shall conform to the traditions, usages and conventions which are binding on the constitutional head of any State.

(2) The office of Head of the State shall have a tenure of five years, and ordinarily no person may hold the office for more than one term.

**First Alternative.**—The head of the State shall be elected by an electoral college composed of the members of the two Houses of the Union Legislature, either without any restriction as to their choice, or subject to their choice being confined to the Rulers of Indian States having a minimum population, or revenue, or both, to be named in a schedule to the Constitution Act.

**Second Alternative.**—(3) The Head of the State shall be elected by the Rulers of the Indian States referred to above from amongst themselves.

**Third Alternative.**—The Head of the State shall be appointed by His Majesty the King of England, on the advice of the Union Cabinet, either without any restriction as to his choice, or subject to his choice being confined to the Rulers of the Indian States referred to above.

(4) In case the third alternative is adopted, and a link with the British Crown is maintained, the Secretary of State for India, together with all the control that he or the British Cabinet exercises over Indian administration, should, in any case, be abolished.

(5) The head of a unit, other than an Indian State, shall be appointed by the Head of the State on the advice of the Union Cabinet.

**Union Legislature.**—(a) The Union Legislature shall consist of the Head of the State and two Chambers—the Union Assembly and the Council of State.

(b) The strength of the Union Assembly shall be so fixed that there shall be on the average one member for every 1,000,000 of the population.

(c) Ten per cent. of the total strength shall be reserved for the representation of the following

special interests: Landholders; commerce and industry; labour; women.

(d) The remaining seats shall be distributed among the following communities: (1) Hindus, other than Scheduled Castes; (2) Muslims; (3) Sikhs; (4) Indian Christians; (5) Anglo-Indians; (6) other communities.

(e) (i) in case the Muslim community agrees to the substitution throughout of joint electorates with reservation of seats for separate, communal electorates, in that case only this Committee would recommend that, in the interests of promoting national unity, the Hindu community should agree that in the strength of the Central Assembly, excluding the seats allotted to special interests, such as commerce and industry, landholders, labour, etc., Muslim representation from British India shall be on a par with the representation given to the Hindus (other than Scheduled Castes), in spite of the great disparity in their respective population strengths.

The Committee desire to emphasise their view that if this recommendation is not to be implemented in its entirety, the Hindu community should be at liberty not merely not to agree to the claim for parity of representation, but to ask for a revision of the Communal Award.

(ii) The Committee considers that the representation given to the Sikhs and Scheduled Castes in the Government of India Act is manifestly inadequate and unjust and should be substantially raised. The quantum of increased representation to be given to them should be left to the constitution-making body.

(f) For the Union Assembly there shall be adult franchise, for seats other than those reserved for special interests.

(g) For the special interest, there shall be special constituencies. There shall be direct election to the Union Assembly. As for election to the Council of State, the question shall be decided by the constitution-making body.

Lists of the matters in respect of which the power of making laws for peace, order and good Government, and the functions pertaining to the administration of those laws, shall fall within the sphere, respectively, of the Centre and the units, shall be embodied in the Constitution Act. The detailed drawing up of these lists should be left to the constitution-making body. The Committee, however, would recommend that the following principles, among others, should guide the constitution-making body in the distribution of powers and functions between the Centre and the units:—

(A) The powers and functions assigned to the Centre should be as small in number as possible, provided that they shall in any case include (i) matters of common interest to India, as a whole, such as foreign affairs, defence, relations with Indian States, inter-unit communications, commerce, customs, currency, posts and telegraphs; (ii) settlement of inter-unit disputes; (iii) co-ordination where necessary of the legislation and administration of different units; and (iv) such other matters or action as may be required for ensuring the safety and

tranquillity of India or any part thereof, or for the maintenance of the political integrity and economic unity of India, or for dealing with any emergencies.

(B) While all matters not assigned to the Centre exclusively or concurrently must be declared to fall within the sphere of the units a list of these should, for greater certainty, be given in the Constitution Act, with the rider that all residuary powers—those not included in either of the two lists shall vest in the units.

(C) All customs barriers between one unit and another shall be abolished, and there shall be free trade within the Union, provided that, where the abolition of existing customs barriers affects prejudicially the finances of a unit, it shall be entitled to adequate compensation out of the revenues of the Union Executive.

(A) Subject to the provisions of Clause (B), the Executive of the Union shall be a composite Cabinet in the sense that the following communities shall be represented on it: (i) Hindus, other than Scheduled Castes; (ii) Muslims; (iii) Scheduled Castes; (iv) Sikhs; (v) Indian Christians; (vi) Anglo-Indians.

(B) The representation of these communities in the Executive shall be, as far as possible, a reflection of their strength in the Legislature.

(C) The Cabinet shall be deemed to be duly constituted, notwithstanding the absence from it temporarily of representatives of any of the communities mentioned in Clause (A). Where, on account of a whole community refusing to join or remain in a Cabinet that community goes, without representation therein, the vacancies may, pending the availability of members of that community, be filled by the appointment of members of other communities, and the Cabinet may commence or continue to function, provided it commands a majority in the Legislature.

(D) The Cabinet shall be collectively responsible to the Legislature.

(E) The Cabinet shall be led, guided and held together by a Prime Minister, who shall ordinarily be the leader of a party, which by itself, or in combination with other parties, is able to command a stable majority in the Legislature. A convention should be created that the offices of the Prime Minister and the Deputy Prime Minister should not be monopolised by any one community.

(F) The other members of the Cabinet shall be appointed on the advice of the Prime Minister.

(G) One of these Ministers shall be designated Deputy Prime Minister, and it shall be a standing rule that the Deputy Prime Minister shall not belong to the same community as the Prime Minister.

**Alternative.**—(A) Subject to the provisions of Clause (B), the Executive of the Union shall be a composite Cabinet in the sense that the following communities shall be represented on it: (i) Hindus, other than Scheduled Castes; (ii) Muslims; (iii) Scheduled Castes; (iv) Sikhs; (v) Indian Christians and (vi) Anglo-Indians

(B) The representation of these communities in the Executive shall be, as far as possible, a reflection of their strength in the Legislature.

(C) The Cabinet shall be deemed to be duly constituted notwithstanding the absence from it temporarily of representatives of any of the communities mentioned in Clause (A) where, on account of a whole community refusing to join or remain in a Cabinet that community goes without representation therein, the vacancies may, pending the availability of members of that community, be filled by the appointment of members of other communities, and the Cabinet commence or continue to function, provided it commands a majority in the Legislature.

(D) The Cabinet shall be elected by the Central Legislature in a joint session by the system of the single transferable vote. The elected Ministers shall hold office for the duration of the Legislature. The Legislature shall elect from among the Ministers a President and a Deputy President who shall not both belong to the same community.

**Minister for Indian States.**—There shall be a Minister in charge of the functions in relation to Indian States, and with him shall be associated a body of persons, not less than three and not more than five in number, who shall be called Indian States' advisers, and who shall be chosen in the manner agreed upon with the Indian States. The Minister shall consult the Indian State advisers in all important matters, and shall obtain their concurrence in respect of certain matters to be specified in the Constitution Act.

**Judiciary.**—(1) There shall be a Supreme Court for the Union and a High Court in each of the units.

(2) The strength of Judges in each of these courts at the inception of the Union, as well as the salaries to be paid to them, shall be fixed in the Constitution Act and no modification in either shall be made except on the recommendation of the High Court, the Government concerned and the Supreme Court, and with the sanction of the Head of the State (a Governor-General or President as the case may be), provided, however, that the salary of no Judge shall be varied to his disadvantage during his term of office.

(3) (A) The Chief Justice of India shall be appointed by the Head of the State and the other Judges of the Supreme Court shall be appointed by the Head of the State in consultation with the Chief Justice of India.

(B) The Chief Justice of a High Court shall be appointed by the Head of the State in consultation with the head of the unit and the Chief Justice of India.

(C) Other Judges of a High Court shall be appointed by the Head of the State in consultation with the head of the unit, the Chief Justice of the High Court concerned and the Chief Justice of India.

(4) A Judge or a High Court of a Supreme Court shall be appointed for life, subject to an age-limit prescribed by the Constitution Act, but he may by resignation addressed to the Head of the State resign his office.

(5) (A) A Judge of the High Court may be removed from office by the Head of the State on the ground of misbehaviour or of infirmity of mind or body, if on reference being made to it by the Head of the State, the Supreme Court reports that the Judge ought on any such grounds to be removed.

(B) The Judge of the Supreme Court may be removed from office by the Head of the State on the ground of misbehaviour or of infirmity of mind or body, if on reference being made to it by the Head of the State, a special tribunal appointed for the purpose by him reports that the Judge ought on any such grounds to be removed.

(6) As regards other matters connected with the appointment and function of the Judiciary, the provisions embodied in Part 6 of the Government of India Act of 1935 seem suitable, with such modifications as may be required for being fitted into the framework of the new constitution.

**Defence.**—The Committee strongly recommends that under the new constitution there should be a Portfolio of Defence which should be held by a Minister responsible to the Legislature, and that the actual control and discipline of the Army should be placed in the hands of a Commander-in-Chief under the new Government.

The Committee further recommends that a National Army should be created and developed as rapidly as possible. It is unable to suggest at this stage what the strength of this army should be, as this will depend, apart from the vital question of finance, on a number of other factors; such as the nature of the post-war world settlement and the efficacy of the international organisation for the maintenance of world peace. Among the measures which should be adopted for the creation of such an army, the Committee recommends the following:—

(1) (A) Such British units as temporarily may be required for the efficient defence of India, and such officers as may be needed for officering the National Army until an adequate number of Indian officers becomes available, shall be obtained by a treaty or agreement entered into by the Union Government and His Majesty's Government, specifying, among other things, the terms and conditions of their re-employment by the Union.

(B) As soon as the war is over, all direct recruitment of British officers to the Indian forces should cease. Such British officers as do not belong to the Indian Army and are not required for specific appointments should be reverted to the British Army Establishment.

(2) An institution should be established for the training in sufficient numbers of officers of all the three arms—air, land and sea—and all defects existing in the present system which prevent rapid Indianisation or the creation of Indian officers capable of assuming leadership should be forthwith removed.

(3) If it is found that the present educational system does not produce a sufficient number of young men suitable in every respect for a military career, steps should be taken at once to remove this defect.

(4) University Officers Training Corps should be established where they do not exist and largely expanded, and measures taken not only for ensuring the supply of officers to fill vacancies in peace-time, but for the rapid expansion of the cadre in the event of a military threat to India. Such measures should aim at creating a reserve of young men with service training who can be rapidly absorbed as officers when expansion takes place.

(5) The Committee would emphasise that the maintenance of law and order is essentially the responsibility of the Unit Governments, and they should, if necessary, by increasing the strength of their police forces, equip themselves adequately for the discharge of this responsibility. The Committee would, however, make it clear that the services of troops on the Union Army Establishment should be available for being requisitioned only when the civil power finds itself unable to cope with any particular situation.

The Committee further recommends that a balance should be maintained between the respective arms and that special attention should be paid to the Navy, Air Force, mechanised units and such other branches as may from time to time be developed.

The Committee recommends that steps should be taken, even before the coming into being of the new constitution, to adopt and give effect to the measures as far as practicable.

in

(E) The functions of the commission shall be:—(i) To keep a constant watch over the interests of minority communities in the area; (ii) without attempting to deal with stray administrative acts or individual grievances to call for such information as the Commission may consider necessary for discharging its functions; (iii) to review periodically—for example once every six months—the policy pursued in legislation and administration by the Legislature and the executive in regard to the implementing of non-justifiable fundamental rights assured by the constitution to minority communities, and to submit a report to the Prime Minister.

(F) The recommendations of the the Cabinet and the Prime Minister Commission shall be considered by small, as soon as possible, place the report of the Commission before the Legislature with a full statement of the action taken or proposed to be taken in pursuance of the recommendations of the Commission. In case any of the recommendations are not accepted wholly or in part, the statement should also contain full explanations of the decisions taken by the Government. Facilities shall be provided to the Legislature for a discussion of the report and the decisions of the Government thereon.

The Committee while strongly recommending to all communities and parties to accept the proposals says that in the event of their being unacceptable to the various communities and parties and their failure to reach an agreement on any other basis, His Majesty's Government should set up an Interim Government in India and proceed to establish machinery for drafting the new constitution generally on the basis of the principles underlying these proposals, enact it in Parliament and put it into operation at the earliest possible date.

**Silver Jubilee Session.**—The Silver Jubilee Session of the National Liberal Federation was held in Lahore in March 1945 under the presidency of Mr. T. P. Venkatrama Sastri of Madras. He made a demand for an immediate declaration by the British Government granting Dominion Status to India and urged the release of political prisoners and Congress detainees including the members of the Congress Working Committee.

Mr. Sastri said: "The Government must declare immediately that India shall have the status of a Dominion at the end of the war. Her millions have fought on the battle-field for the cause of the United Nations. The Cripps' Offer contained that declaration and the answers of Sir Stafford Cripps to the questions put to him made clear that the status of India shall be the same as that of the other Dominions, and that India shall have the same right either to remain within the Commonwealth or to go out of it.

"That declaration must be made forthwith and implemented, so far as it may be, by the British Government. While they are devising measures for the reconstruction of Italy, Poland, Greece, they can have no legitimate excuse for postponing the freedom of India. The intricacy of the problems in the countries mentioned above did not bar them from taking steps even when the war is on, and the Indian

problem presents no features more difficult to resolve than the problems they are solving now elsewhere.

"I should say that the Governor-General should have released the political prisoners and the Congress detenus long ago. Neither the public peace nor the safety of the State any longer requires the detention of these persons; and the continuance of their detention is wholly unjustified. They should be immediately released. Even for a solution of the present deadlock, mutual consultation between the members of the Working Committee of the Congress is necessary and their continuance in jail and the refusal of the Government to allow mutual consultation between them only adds to the difficulties in the way of finding a solution."

Mr. Sastri dealt at length with the problem of minorities and said: "Pakistan is no solution for the problem of the minorities. The creation of separate foreign states does not really get rid of the minority problem altogether. There will be a large proportion of non-Muslims in the Muslim areas so separated and comparatively a small proportion of Muslims in the Hindu areas. Definite and satisfactory safeguards for the non-Muslims in the Muslim areas are offered. If such an offer is just and fair to minorities of over 40 per cent, in those provinces, would it be impossible to devise safeguards for the protection of the essential cultural features of all groups, including the Muslims, within a united India?"

"What, again, of the expense of defence which each independent state will have to maintain? and would the defence organised by the separate states be adequate in the event of aggression? will the four states in the North-West agree to join and belong to one state? Will the Punjab agree to look after their financial needs and requirements? Will the non-Muslim areas in the Punjab desire to remain in an independent Muslim State or claim to form a separate state of their own? if separate independent states are formed and they have their own armies will joint action invariably result when emergencies arise? may they not be turned against each other in a fratricidal war?"

"The Muslim League appeals to the principle of self-determination. This principle is a much misunderstood one. It is a case of secession from an existing state to which that principle does not apply and should not be applied. It has been recognised that it is impossible to grant independence to a section of the population unless they had a territory capable of sustaining the economic and political framework of a nation.

"Whether Mr. Jinnah, who has, so far, made the concession of Pakistan a condition of any discussion, constitutional or other, can now bring himself to put aside Pakistan and discuss the terms of a federal constitution is more than anyone can say. It might be a vain hope still, I see no harm in saying that Mr. Jinnah, who has demonstrated his power to hold up, must now demonstrate his power to solve the Indian problem. The problem of Indian unity was posed first in this province and it must here receive its final solution.

"In the recent Dumbarton Oaks Conference, a formula was evolved for the solution of international conflicts by negotiation, mediation, conciliation, arbitration, judicial settlement or other peaceful means to be chosen by the parties to the conflict. Failing that, the conflict will be referred to the Security Council. Though this formula deals only with international conflict, its principle may be applied for resolving the Indian deadlock.

Mr. Sastri then touched upon the problem of Indian States. He said: "The time has come now when the States should have representative governments, and the people of the States should be given their due share in a popular government. In the Federal Legislature, not only the rulers of the States, but also the subjects of the States should be represented."

Referring to the industrialisation of India, Mr. Sastri remarked: "There have been many plans drawn up or in the process of being drawn up. I will not attempt to assess their exact value. The plans involve expenditure in astronomical figures: How they can be worked out is a matter for the experts to consider. But all seem to agree that without a National Government it will be impossible to put into effect any large-scale plan of economic policy.

"Here again the conclusion is forced on us that for the industrialisation of India, for the relief of poverty, disease and unemployment among the masses and for many other large-scale programmes like sanitation, transport, etc., it is necessary that there should be a united India, pooling her intelligence and her resources in one concerted attempt to raise the standard of her people."

Mr. Sastri referred to the plight of Indians overseas. He said: "The plight of Indians in the colonies and especially in South Africa deserve our active sympathy and help. It is a tragic irony that while the U.S.A. is willing to admit Indians on a quota system and give them rights of citizenship, South Africa should deny that right to the Indians settled there. The Government of India should take such steps as might be necessary to protect them, and the British Government should see to it that this grave injustice is remedied and further embitterment averted."

On the subject of Indianisation, the President said: "Recruitment in the services just now has an alarming aspect and needs our close attention. It is regrettable that the process of Indianisation in the services has not been accelerated. The recruitment in the officers' cadre in the Army is still disappointing.

"The Foreign and Political Departments are still largely kept a close preserve of the British. A large number of Europeans who have been recruited in the key services during the last six years' lead Indians to suspect that the foundation is being laid for decades of domination. No change in the composition of the services till a new constitution is agreed to is spurious and untenable as an explanation."

Mr. Sastri concluded: "There will be no place so long as imperialism lasts. As for Britain's attitude to the future of India, words

promise, but action denies. Words uttered in adversity are forgotten on the turn of the wheel of fortune. Conduct seems to reinforce the assertion 'what we have we hold.' But some leaders of thought in England have deplored this attitude and have urged the need for giving independence to India. An independent India will be an asset even in the present war against Japan. Everything plainly indicates the need for unity and the united effort of all parties in India. None but the willfully blind can fail to see it."

**Resolutions.**—Resolutions urging the British Government to form a National Government at the Centre and deploring the continuance of the political deadlock in India and asking the Government of India to release the members of the Congress Working Committee and the other Congress leaders were adopted.

The resolution on the formation of a National Government said :

"(a) While adhering to its opposition to any division of India into Hindustan and Pakistan, the federation is of the opinion that without prejudice to the different viewpoints on controversial issues relating to the ultimate form of the future Indian constitution, the Congress, the Muslim League, the Hindu Mahasabha and other important political parties and interests should, during the period of the war, unite and co-operate with a view to the formation of National Government both at the Centre and the provinces and urges on the British Government the necessity of forming such a Government at the Centre and creating it on the same footing as a Dominion Government.

"The Federation is convinced that the formation of such a Government would help to clear away misunderstandings and promote mutual confidence and lead to the solution of many urgent and important domestic problems pertaining to the national economy of the country.

"(b) The Federation deprecates the policy of the British Government in assuming the role of passive spectators and urges them actively to participate in the solution of the present political deadlock and take constructive steps to promote the establishment of a national government, both at the Centre and in the provinces, composed of important political parties and interests.

"(c) The Federation urges the British Government to announce without delay that they would be prepared to implement their promises to India on the basis of an agreement between the various political parties and interests or, in the absence of such agreement, if necessary, by themselves enacture a Dominion constitution for India within one year of the cessation of hostilities."

The Federation also passed a resolution demanding for Indians in South Africa full citizenship rights.

Deploring the failure of the Government of the Union of South Africa to abolish the Pegging Act, the resolution stated in part: "In view of the uncompromising attitude of the Government of South Africa towards this

legitimate demand of India, this Federation feels that it was a mistake on the part of the Government of India to have sent the High Commissioner to South Africa and it urges the Government of India to recall the High Commissioner forthwith and to adopt all fiscal and commercial sanctions against South Africa until the Pegging Act is abolished."

Another resolution expressed deep regret and concern at the "misuse of the Defence of India Act and Rules on numerous occasions". The resolution stated that the civil liberties were being invaded without adequate justification and for political ends.

The Federation also deplored racial prejudice existing between the white and non-white peoples of the world and suggested that "unless a determined effort is made on a world scale against the course of race prejudice, the non-white peoples of the world who are now fully conscious of their rights, are bound to revolt against the tyranny of the whites and imperil the cause of world peace."

The Federation pressed upon the Rulers of Indian States to declare full responsible government as their policy as rapidly as possible and assured the people of the States of its full support in their constitutional methods for securing reforms and the redress of their grievances.

The Federation expressed concern over the continued recruitment of the Indian services from outside India and strongly urged upon the Government the necessity for stopping all future recruitment to these services from outside India.

The Federation, in another resolution, expressed profound concern at the food situation in the country "which, though somewhat improved is still far from satisfactory." It urged the Government to evolve a more satisfactory policy and administer it efficiently so as to save the people from all avoidable hardships and distress.

The Federation unanimously passed a resolution demanding that in the Imperial and International conferences India should be represented largely, if not wholly by non-official public men commanding the confidence of the people "until such time as a National Government can appoint its own proper accredited representatives."

Demanding complete nationalisation of India's Defence services within a short period, the Federation also urged that India's status as envisaged in the post-war world and her future role as a bulwark of peace in Asia required a radical change in regard to her defence policy. The Federation suggested that the Defence portfolio should be entrusted to an Indian Member commanding the confidence of the public and that a policy of Indianisation in all grades of the army, navy and air force be expedited. It further suggested that Indian emergency commissioned officers should not be demobilised after the war and that the army should be recruited from all provinces and classes to a much greater extent than at present.

The President, Mr. T. R. Venkatarama Sastri, winding up the session, expressed gratification at the formation of a Ministry by the Congress in the Frontier Province and expressed the hope that this will be followed by the assumption of office by the Congress in those other Provinces where Section 93 rule continued.

"The Viceroy should declare forthwith that the future steps for the formation of a Central Government and for the framing of a constitution will go forward notwithstanding the dissent of any party," said a resolution passed by the Council of the National Liberal Federation of India held in Bombay in the winter of 1945."

The resolution further said :—

"The Council of the National Liberal Federation of India notes that the proposals now adumbrated in the broadcasts of the Prime Minister and the Viceroy are incomplete and must wait

for the elections and consultations with the elected representatives to take their final shape.

"The Council is of the opinion that so long as agreement among all parties is insisted on as a condition precedent to any proposals going forward, no solution will be possible. The Council therefore urges that the Viceroy should declare forthwith that the future steps for the formation of a Central Government and for the framing of a constitution will go forward notwithstanding the dissent of my party. Such a declaration will itself help to bring about an understanding between the parties concerned.

"Immediately after the elections, a Central Government should be formed consisting of the representatives of the major political parties with provision for representation of minority interests and no refusal of co-operation by any party should hold up the formation of such representative government."

## THE MUSLIM LEAGUE.

The awakening of political consciousness among Muslims in India as a separate entity dates back to 1906 when the All-India Muslim League was formed. It worked up its influence steadily, so that when it was hardly ten years old it became sufficiently important to enter into an agreement—known since as the Lucknow Pact—with the powerful Indian National Congress. The League fell on evil days in the 'twenties, and differences set in among its members. When enhanced powers were conferred on India by the Montford Reforms, Muslims became more and more politically minded and began to aspire for a greater share in the control of the administration of the country and in Government posts. This feeling gave rise to the formation of a new body whose promoters concentrated on aggressive presentation of Muslim demands. With the prospect of still further constitutional reforms at the end of the first ten years of the working of the Montford Scheme, these leaders strove to organise Muslims into an influential body which would safeguard their interests more effectively than the League. The result was the All-Parties Muslim Conference in 1928. The publication of the Communal Award and its inclusion in the White Paper Scheme of Reforms in 1933 helped this process of consolidation. An attempt was made early in 1934 to consolidate the community by healing the split within the Muslim League and, if possible, bringing the League and the Conference together to work as a united body. The latter failed, but the former object was largely successful and the League marched from strength to strength until it emerged as a powerful organisation of the Muslim community on the eve of the first elections to the provincial legislatures under the Government of India Act of 1935. For the first time in the political history of Muslims their representative institution functioned as a vigorous and active all-India organisation with results which flattered Mr. Jinnah, and his co-workers, although the success of League nominees was not very striking. Doubtless Mr. Jinnah, who was the guiding spirit behind this new activity, was handicapped by fissiparous tendencies and reactionary forces in distant provinces beyond the sphere of his direct influence. This was soon rectified by the growing influence of Mr. Jinnah and the League among the Muslims.

Mr. Jinnah's influence among the Muslims increased rapidly in the years following the advent of the 1935 constitution. The Muslim League grew into a powerful organisation with branches all over the country. At Lucknow in 1937 its creed was lightened up; at Lahore three years later it adopted a resolution demanding the partition of the country into Hindu and Muslim India; and in 1941, the creed was again changed into what amounts to a demand for secession.

The Muslim League gathered strength as the years rolled by, especially during the war when the Congress was in jail and there was no effective opposition to the League. An attempt was made by Lord Wavell in the summer of 1945 to form a coalition government including

the Congress and the League as a temporary measure without prejudice to the claims and aspirations of the two organizations. This move failed and elections were ordered through the country. The League came on top at the polls, and immediately thereafter the British Government sent a Cabinet Delegation to settle the Indian problem once and for all. The Delegation, after elaborate investigation and personal discussion, came to the conclusion that Pakistan was impracticable and inadvisable. It decided to set up a constituent assembly to frame a three-tier constitution, comprising a limited union centre, three groups of contiguous provinces (one in the north-west, the second in the centre and the third in the east), and 11 provincial constitutions. It also decided to set up an interim government, pending the evolution of a future constitution. The League at first accepted the British Cabinet Mission's proposals, but later went back on its decision and resolved upon direct action. In the late autumn of 1946, the League again decided to co-operate and sent its nominees to the Interim Government at the centre formed earlier by the Congress.

Shortly after the 1936 elections, Mr. Jinnah explained the position of the League members of provincial legislatures *vis-a-vis* other groups and said: "The constitution and policy of the League do not prevent us from co-operation with others. On the contrary, it is part and parcel of our basic principle that we are free and ready to co-operate with any group or party from the very inception, or inside the legislature, if the basic principles are determined by common consent."

These words engendered a hope that the League might be induced to co-operate with the Congress in its extremist programme and negotiations were started, but it soon became apparent that the two could not come together. The situation was rendered more difficult by the attitude of stiffness adopted by the Congress and its President, Pandit Jawaharlal Nehru. Mr. Jinnah refused to convert the League into "an understudy of the Congress" and firmly upheld the position of the Muslim community. The Congress, for its part, found as the result of the elections that it did not have the support of the Muslim community. Very few Congress Muslims were put up as candidates for the elections, and even they failed. The Congress therefore set about roping in the Muslims by an appeal to their economic conscience, explaining that the Congress was out to alleviate the sufferings of the masses, Muslims as well as Hindus, and to uplift the nation as a whole. In this process the League and its leaders came in for a great deal of violent criticism at the hands of the Congress managers. On behalf of the League Mr. Jinnah retorted: "The Congress have not the monopoly, nor are they the sole custodians of Indian nationalism. As I have always maintained, the Muslim League is prepared to join hands with any progressive party in the fight for the country's freedom, but to achieve this the question of minorities must be settled satisfactorily. Here I am not talking of only Muslims but all minorities. Further, we are

not prepared to merge ourselves into any organisation, however great it may be, and however advanced its programme and policy may be unless it is determined by common consent."

Paying little heed to these words of warning, the Congress leaders went their own way. Puffed with the success at the polls, they affected to ignore the claims of League leaders. In what may be described as non-Muslim provinces—that is, those in which the Muslims are in a minority—the Congress formed Ministries without consulting and securing the co-operation of the Muslim League. No doubt attempts were made to arrive at an understanding with the Muslim League, but they failed mainly on account of the Congress demand that wherever such an understanding was reached the Muslim League should cease to be a separate parliamentary body and merge itself into the resultant Congress-League Party. The League, for its part, was willing to co-operate but not on the terms imposed by the Congress. In the result the negotiations failed, and the League remained in the Opposition. Although the bulk of the Muslim representatives returned to the provincial legislatures by the electorate were in opposition to the Congress the latter proceeded to constitute Governments with Muslim Ministers who did not represent Muslim opinion in the legislature. Nowhere in any of the so-called Congress provinces did the Muslim Ministers have the support of the majority or even a decent number of Muslim legislators. Thus these Muslim Ministers in the Congress provinces were the objects of repeated displays of Muslim hostility.

Having failed to reach an agreement with the League and its leaders, the Congress tried to crush the League and its leaders by making a direct approach to the Muslim masses through an economic and national programme. For a time this appeared to succeed, but eventually failed to achieve its object. The League leaders counteracted the Congress propaganda by pointing out to the Muslim masses that their true interests lay in their organisation under the banner of the League which alone could serve them truly. The League's counter-drive succeeded in a large measure aided by allegations that in provinces where the Congress was running the Government the Muslim minorities were not treated well. The widening gulf between the Congress and the League gave an additional stimulus to the consolidation of the Muslim forces under the League which found fruition at the Lucknow session of the League in the autumn of 1937.

**Lucknow Session.**—The session was unique in several respects. For the first time in the history of the Muslim organisational movement, complete unity was achieved, and every section of Muslim opinion, including those which till then had been opposed to the League or outside it, rallied round the League. There was no discordant note and Muslim political unity was complete. The Muslim League emerged the only strong and influential political organisation of the Muslim community.

The session changed the creed of the League to "the establishment in India of full independence in the form of a federation of free democratic states in which the rights and interests of

the Muslim and other minorities are adequately and effectively safeguarded in the constitution." (For details of the proceedings of this session, see *Indian Year Book*, 1938-39.)

The foundations of Muslim solidarity laid at the Lucknow session of the League in the autumn of 1937 proved very strong indeed. The League grew from strength to strength in the two succeeding years and today it is admittedly the most powerful organisation of the community. The League's spokesmen claim that it is the only mouthpiece of the Muslims, and one may be inclined to recognise that claim but for the existence of other organisations in the community with more or less following and influence, not excluding a large number of Muslims who are members of the Congress. There may be two opinions about the claim that the League is the only organisation of the community, but no one can question that it is the most powerful and the most influential.

With the outbreak of the war and the change it wrought in Indian politics, the League found itself in an extremely advantageous position. A perusal of the chapter on the Indian National Congress will show how the Congress withdrew its ministries from the provinces where it had held sway for nearly two and a half years. As a result of this the League came to be on a par with the Congress in that both were now out of office and without the power and influence which went with it. Whereas the Congress lost through the resignation of its ministries such bargaining power as it had while in office, the League acquired some indirect power through the international complications that resulted from the war. Again, whereas the Congress had alienated the sympathies of the Indian Princes by sponsoring and encouraging agitation for responsible government for the States people, the League earned the friendship of the Princely order by condemning such activities and upholding the rights and privileges of the Indian Princes in any revision of the Indian Constitution. In yet another direction the League manoeuvred itself into a comfortable position; whereas, the Congress categorically withheld its co-operation from the war, the League abstained from taking any such attitude and merely insisted on the satisfaction of its claims prior to making up its mind. Even this was only the official attitude of the League as an organisation. Most of its individual members were in favour of wholeheartedly aiding in the prosecution of the war. And the League winked at this.

A fortnight after the declaration of the war, the Working Committee of the League passed a resolution which illustrates the tact and firmness with which the League steered the Muslim ship. The League Committee stated that "If full, effective and honourable co-operation of the Mussalmans is desired by the British Government in the grave crisis which is facing the world today and if it is desired to bring it to a successful termination it must create a sense of security and satisfaction among the Mussalmans and take into their confidence the Muslim League, which is the only organisation that can speak on behalf of Muslim India."

**Attack on Congress Ministries.**—Side by side with the demand for the redress of Muslim grievances and the assertion that their full and free consent should be obtained

before any change in the Constitution was attempted, the League continued its campaign against the Congress ministries, to which a reference has been made in past issues of the *Indian Year Book*. Apart from the "atrocities" which, the League affirmed, had been perpetrated on the Muslim minorities in the provinces administered by the Congress, the League made a fresh point which was soon to become the nucleus of a serious development in Indian politics.

In a resolution passed in September 1939, the Working Committee of the League said: "The developments that have taken place, especially since the inauguration of the provincial constitution based on the so-called democratic parliamentary system of government and the recent experiences of over two years, have established beyond any doubt that it has resulted wholly in a permanent communal majority and the domination by the Hindus over the Muslim minorities, whose life and liberty, property and honour are in danger, and even their religious rights and culture are being assailed and annihilated every day under the Congress Governments in various provinces.

"While Muslim India stands against exploitation of the people of India and has repeatedly declared in favour of 'a free India,' it is equally opposed to domination by the Hindu majority over the Mussalmans and other minorities and vassalisation of Muslim India, and is irrevocably opposed to any federal objective which must necessarily result in a majority community rule under the guise of democracy and parliamentary system of government. Such a constitution is totally unsuited to the genius of the peoples of the country, which is composed of various nationalities and does not constitute a national state."

This attack on provincial autonomy and on majority rule was an altogether new line which was struck almost for the first time by the League. Till then the Muslim demand had always been for effective safeguards for the protection of the Muslim community's religious, cultural and other rights; now the Muslims began to question the very basis of democracy and declared that the western democracy in the sense of rule by majority was unsuitable. This was developed in the summer of 1940 into a demand for the separation of Muslims on the ground that they constituted an integral nation and not a minority in the Indian population.

In the succeeding weeks numerous attempts were made to ascertain the grievances of the Muslims and to find out whether they were justified—in other words, whether the Congress ministries had been guilty of oppressing them or even neglecting them. But all these ended in smoke.

**Political Discussions.**—Meanwhile, discussions on the political field continued and early in October 1939 the Viceroy called into consultation leaders of all sections of opinion in India with a view to ascertaining their wishes in the matter of constitutional reform. On the conclusion of these consultations, the Viceroy issued an exhaustive statement on Britain's War aims *vis-a-vis* India.

It gave the Muslim community the requisite assurance concerning its status in future adjustments. This is evident from the resolution passed by the Working Committee of the League which met in Delhi towards the end of October 1939. The Committee hailed the Viceroy's statement as a new charter of hope for the minorities and as a recognition of the League's right to full say in the future constitutional arrangements. From this resolution one can infer that the League found in the Viceregal declaration an acknowledgment of the League's status as an essential factor in any political development on an all-India basis. (See past issues of the *Indian Year Book*.)

**Lahore Session.**—To return to the Muslim League. As already stated the idea of Muslims being a nation gathered strength during 1939-40 in which period a number of schemes for the formation of a Muslim *bloc* of autonomous states were mooted. For a time they were not regarded seriously; but from the proceedings of the annual session of the League held in April 1940 it became clear that the Muslim League was serious about this partition business. At Lahore, the Muslim community, as represented by the Muslim League, declared for Muslim independence.

The principal resolution of the session, which was carried unanimously, ran:—

"While approving and endorsing the action taken by the Council and the Working Committee of the All-India Muslim League, as indicated in their resolutions dated the 27th of August, the 17th and 18th of September and 22nd of October, 1939, and the 3rd of February, 1940, on the constitutional issue, this session of the All-India Muslim League emphatically reiterates that the scheme of Federation embodied in the Government of India Act, 1935 is totally unsuited to and unworkable in the peculiar conditions of this country and is altogether unacceptable to Muslim India.

"It further records its emphatic view that, while the declaration dated the 18th of October, 1939, made by the Viceroy on behalf of His Majesty's Government is reassuring in so far as it declares that the policy and plan on which the Government of India Act, 1935, is based will be reconsidered in consultation with the various parties, interests and communities in India, Muslim India will not be satisfied unless the whole constitutional plan is reconsidered *de novo* and that no revised plan will be acceptable to the Muslims unless it is framed with their approval and consent.

"Resolved that it is the considered view of this session of the All-India Muslim League that no constitutional plan would be workable in this country or acceptable to the Muslims, unless it is designed on the following basic principles, namely, that geographically contiguous units are demarcated into regions which should be so constituted, with such territorial readjustments as may be necessary, that the areas in which the Muslims are numerically in a majority, as in the north-western and eastern zones of India, should be grouped to constitute "Independent States" in which the constituent units shall be autonomous and sovereign and that adequate, effective

and mandatory safeguards should be specifically provided in the constitution for minorities in the units and in the regions for the protection of their religious, cultural, economic, political, administrative and other rights and interests in consultation with them, and, in other parts of India where the Mussalmans are in a minority adequate, effective and mandatory safeguards shall be specifically provided in the Constitution for them and other minorities for the protection of their religious, cultural, economic, political, administrative and other rights and interests in consultation with them.

"This session further authorises the Working Committee to frame a scheme of Constitution in accordance with these basic principles, providing for the assumption finally by the respective regions of all powers such as Defence, External Affairs, Communications, Customs and such other matters as may be necessary."

This created a stir in the country, among nationalists and Hindus alike and also among some Muslims. True the novelty of the thing caught the Muslim imagination, but even among Muslims there were many who questioned the wisdom of the step suggested in the Lahore resolution. Apart from destroying Indian unity which had been built up after years of strenuous effort, it was argued by many, the Lahore scheme would place the Muslim minorities in Hindu provinces in a very unenviable position.

The evolution of Muslim League thought in 1940-41 followed the lines laid down in April 1940 when the Pakistan resolution was adopted at Lahore. Percentages and weightages, proportion of representation and share in services, guarantees and safeguards— notions which had held the political field for decades—were clean swept aside. Mr. Jinnah was not thinking in terms of these trifles, outworn gadgets of a democracy held to be unsuitable to an oriental people and totally inapplicable to the peculiar conditions of India. All these devices presupposed the continuance of Muslims as members of a State, more or less secured and safeguarded, enjoying greater or less share of power, but scarcely likely as a community ever to occupy a dominant position. Mr. Jinnah refused to think of an arrangement which would not give the Muslims equal power and authority with the majority community. He would not be party to making the Muslims subordinate to the Hindus. Being a numerical minority they as a community would perforce be the junior partner in any composite State.

As in a composite State the Muslims could not in the nature of democracy expect to be reckoned as equals with the majority community, much less as the dominant force, Mr. Jinnah went away from the idea of a composite State and proposed that India should be divided into two spheres, Muslim and Hindu. Each was to be autonomous internally and for purposes of a Central Government with minimum powers, the two should collaborate as equals.

The Pakistan ideal began to exercise the Muslim mind. It provided the League and Mr. Jinnah with a new plank, gave the Muslim community a new goal, a new vista free from what was described as "the danger of Hindu Raj." Every development affecting the future of India in any way was viewed against the back-

ground of Pakistan; how will more power for the future Indian State affect the Muslims? Therefore the League claimed the right to approve or reject every proposal calculated to affect the country and its population. The threat was put forth that "any move by the Congress to widen political power in India without the League's approval will meet with the League's resistance."

**Madras Session.**—The annual session of the League was held in Madras amidst scenes of great enthusiasm in the middle of April 1941. Mr. Jinnah, who presided, urged the British Government to give up their policy of appeasement towards those who were bent upon frustrating the war efforts and to get on with those who wanted to get on with them.

The most important resolution of the Madras session was that which changed the creed of the League.

"(1) The establishment of completely independent States formed by demarcating geographically contiguous units into regions which shall be so constituted with such territorial readjustments as may be necessary that the areas in which the Muslims are numerically in a majority as in the north-western and eastern zones of India shall be grouped together to constitute independent States as Muslim free national homelands in which the constituent units shall be autonomous and sovereign:

(2) That adequate, effective and mandatory safeguards shall be specifically provided in the constitution for minorities in the above mentioned units and regions for the protection of their religious, cultural, economic, political, administrative and other rights and interests in consultation with them:

(3) That in other parts of India where the Muslims are in a minority, adequate, effective and mandatory safeguards shall be specifically provided in the constitution for them and other minorities for the protection of their religious, cultural, economic, political, administrative and other rights and interests in consultation with them."

**Internal Troubles.**—Encouraged by the successes achieved through the Lucknow, Lahore and Madras sessions of the League, Mr. Jinnah was engaged in 1941-42 in further consolidating the influence of the League among the Muslim masses and propagating the new policy of the League. In this task he achieved a large measure of success, although it must be admitted that he met with one or two reverses.

These notwithstanding, Mr. Jinnah and the Muslim League continued to grow in stature, as evidenced by the recognition accorded by the British Government to the influence and representative character of that organisation as far as the Muslims of India are concerned. Mr. Jinnah never showed any slackening of his demand for Pakistan, although he expressed willingness not to raise that question in a pointed form while the war was in progress, provided, however, that in any transitional arrangements for the transfer of power from British to Indian hands steps were taken to ensure that the League got a fair share.

Perhaps the highest marks scored by the League so far are to be found in the British War Cabinet's formula brought by Sir Stafford Cripps in the spring of 1942, in which the British Government offered to give to Indian provinces the right to choose whether they would join any union that might be decided to be formed at the end of hostilities or would stay out and form their own State, separately or in collaboration with other provinces similarly willing to stay out. This was an unprecedented concession to the League demand, which was stoutly opposed by the Hindu element of the population and by nationalistic forces, although Mr. Jinnah himself would have liked the concession to be more specific and categorical.

**Cripps Scheme Rejected.**—The proposals of the British War Cabinet were examined carefully by the Muslim League Working Committee which, whilst rejecting the scheme, expressed gratification that the possibility of Pakistan was recognised by implication by providing for the establishment of two or more independent unions in India. It regretted that the proposals of His Majesty's Government embodying the fundamentals were not open to any modification and therefore no alternative proposals were invited, and passed the following resolutions:—

"In view of the rigidity of the attitude of His Majesty's Government with regard to the fundamentals not being open to any modifications, the Committee have no alternative but to say that the proposals in their present form are unacceptable.

"(1) The Mussalmans, after 25 years of genuine efforts for the reconciliation of the two major communities and the bitter experience of the failure of such efforts, are convinced that it is neither just nor possible, in the interest of peace and happiness of the two peoples, to compel them to constitute one Indian Union, composed of the two principal nations—Hindus and Muslims—which appears to be the main object of His Majesty's Government, as adumbrated in the preamble of the draft declaration, the creation of more than one union being relegated only to the realm of remote possibility and is purely illusory.

"(2) In the Draft Declaration a constitution-making body has been proposed with the primary object of creating one Indian Union. So far as the Muslim League is concerned, it has finally decided that the only solution of India's constitutional problem is the partition of India into independent zones: and it will, therefore, be unfair to the Mussalmans to compel them to enter such a constitution-making body, whose main object is the creation of a new Indian Union. With conditions as they are, it will be not only futile but on the contrary may exacerbate bitterness and animosity amongst the various elements in the country.

"Besides, the machinery which has been proposed for the creation of the constitution-making body, namely that it will consist of members elected by the newly elected lower houses of the eleven provinces, upon the cessation of hostilities, as a single electoral college by the system of proportional representation, is a fundamental departure from the right of the

Mussalmans, hitherto enjoyed by them, to elect their representatives by means of separate electorates, which is the only sure way in which true representatives of the Mussalmans can be chosen.

"The constitution-making body will take decisions by a bare majority on all questions of most vital and paramount character involved in the framing of the constitution, which is a departure from the fundamental principles of justice and contrary to constitutional practice so far followed in the various countries and dominions: and the Mussalmans, by agreeing to this will, instead of exercising their right and judgment as a constituent factor, be at the entire mercy of the constitution-making body in which they will be a minority of about 25 per cent.

"The right of non-accession to the Union as contemplated in the draft declaration has been conceded presumably in response to the insistent demands by the Mussalmans for the partition of India but the method of procedure laid down is such as to negate the professed object, for in the draft proposals the right of non-accession has been given to the existing provinces which have been formed from time to time for administrative convenience and on no logical basis.

"The Mussalmans cannot be satisfied with such a declaration on a vital question affecting their future destiny and demand a clear and precise pronouncement on the subject. Any attempt to solve the future problem of India by a process of evading the real issues is to court disaster.

"(3) In the draft proposals no procedure has been laid down as to how the verdict of the province is to be obtained in favour of or against accession to the one union: but in the letter dated 2nd of April from the Secretary of Sir Stafford Cripps, addressed to the President of the All-India Muslim League, it is stated that "a province should reach the decision whether or not to stand out of the Union by a vote in the Legislative Assembly on a resolution to stand in.

"If the majority for accession to the Union is less than 60 per cent, the minority will have the right to demand a plebiscite of the adult male population." In this connection it must be emphasised that in the case of the major provinces of Bengal and the Punjab they (the Muslims) are in a minority in the Legislative Assemblies, and in the Assemblies of Sind and the North-West Frontier Province, the total number, namely, 60 and 50 respectively, is so small and the weightage given to the non-Muslims so heavy that it can be easily manipulated and a decision under such conditions cannot be the true criterion of ascertaining the real opinion of the Mussalmans of those provinces.

"As regards the suggested plebiscite in the provinces in which the Muslims are in a majority, in the event of the requisite majority not being available in the Legislative Assemblies, the procedure laid down is that reference shall be made to the whole adult population of the provinces and not to the Mussalmans alone, which is to deny them the inherent right, to self-determination.

"(4) With regard to the Indian States, it is the considered opinion of the Committee that it is a matter for them to decide whether to join or not to join or form a union.

"(5) With regard to the treaties to be negotiated between the Crown and the Indian Union or Unions, the proposals do not indicate as to what would happen in case of disagreement on the terms between the contracting parties nor is there any provision made as to what would be the procedure when there is a difference of opinion in negotiating a revision of treaty arrangements with the Indian States in the new situation.

"(6) With regard to the Interim arrangement, there is no definite proposal except the bare statement that His Majesty's Government desire and invite the effective and immediate participation of the leaders of the principal sections of the Indian people in the councils of their country, of the Commonwealth and of the United Nations. The Committee are, therefore, unable to express their opinion until a complete picture is available.

"Another reason why the Committee are unable to express their opinion on the Interim arrangements for participation in the council of the country, is that Sir Stafford Cripps has made it clear that the scheme goes through as a whole or is rejected as a whole and that it would not be possible to retain only the part relating to the immediate arrangements at the Centre and discard the rest of the draft scheme and as the Committee has come to the conclusion that the proposals for the future are unacceptable it will serve no useful purpose to deal further with the question of the immediate arrangements.

"In conclusion, the Committee wish to point out that the position of the Muslim League has been and is that unless the principle of Pakistan scheme, as embodied in the Lahore Resolution of March 1940, which is now the creed of the All-India Muslim League is unequivocally accepted and the right of the Mussalmans to self-determination is conceded by means of a machinery which will reflect the true verdict of Muslim India it is not possible for the Muslim League to accept any proposal or scheme regarding the future."

**Attitude to Congress.**—During 1942-43 the policy of the Muslim League was somewhat negative in character. It made no specific contribution towards the settlement either of the Indo-British question or of the Hindu-Muslim problem. The resolutions of the League and the utterances of its leaders have been in the nature of comments on the actions of other people and response—rather the lack of it—to others' moves.

When Mr. Gandhi on behalf of the Congress evolved the "Quit India" slogan and developed it up to the stage of the A.I.C.C. resolution, Mr. Jinnah made a series of public statements repudiating Mr. Gandhi and the Congress and warning his community against the dangers of playing into the hands of the latter.

(See last year's issue.)

Commenting on the A.I.C.C. resolution of August 8, 1942, the League leader said it was substantially the same as the resolution of the Congress Working Committee passed in September 1939.

"In the resolution that was passed in September, 1939," he says, "the demand was for a declaration of immediate independence and freedom for India, with a provisional National Government transferring all power of the Government

of India, and secondly, the right of the people to frame their own constitution through a constituent assembly to be elected by means of adult franchise. The only difference, therefore, between the two resolutions is that in the first resolution what was implied by the declaration that was sought is now covered under a different language by the adoption of the slogan 'Quit India'.

"Muslim India, as I have repeatedly said, stand for complete independence of all the peoples of India. But we turned down the proposal of the Congress because the demand for a National Government to be set up immediately would have meant Hindu *raj* or a Hindu majority Government.

"As to the second item, namely, the right of the people to frame their own constitution, the constituent assembly would have been one of overwhelming majority of Hindus and if it were to be elected on the basis of adult franchise the Musalmans would have not secured even 25 per cent. of its strength and it is a foregone conclusion as to what decision such a body would arrive at.

"Not only this, but the fundamental principle was also laid down in September, 1939, that the constitution should be on the basis of an All-India Federal Government with units as autonomous as possible. This clearly meant that even those zones which are the homelands of the Musalmans and where they are in a majority would have been entirely under the Central Government with a Hindu majority in all vital matters.

"This position the Musalmans could not accept as it clearly meant ruling out of order their demand for Pakistan and would have implied their submission to Hindu *raj* as a national sub-group, instead of this being a nation in fact, as they are, even in those parts of India where they are in a majority of more than 75 per cent. as in the North-West zones and more than 70 per cent. in the eastern zones. In these two zones they are not less than 70 millions of Musalmans as a compact body and exist as a nation by any definition of a nation. But having ignored these one hundred millions of Musalmans and other minorities and interests the Congress have adopted the programme of mass civil disobedience if their fantastic demand is not conceded by the British at once under the slogan of 'Quit India'."

When the disturbances broke out he advised the Muslims to keep aloof from the Congress movement. He regretted that "the Congress" has finally declared war and has launched a most dangerous mass movement in spite of numerous warnings and advices from various individuals, parties and organisations in this country.

**Reaction to Disturbances.**—About a week after the commencement of the disturbances the Working Committee of the League met in Bombay and passed a resolution calling upon the British Government to guarantee to the Muslims the right of self-determination and assure them, without delay, that they would abide by the verdict of a plebiscite of the Muslims in favour of Pakistan and expressing the willingness of the Muslim League to negotiate

with any party for the setting up of a provisional government in order to mobilise the resources of India for the defence of the country and the successful prosecution of the war, conditional on the grant of the Muslim demands.

In the winter of 1942 Mr. Rajagopalachari had prolonged talks with Mr. Jinnah at Delhi and, presumably in pursuance of some tentative understanding with the League leader, sought the Viceroy's permission to meet Mr. Gandhi with a view to eliciting the latter's reactions to his proposals for a Hindu-Muslim settlement. When permission was refused there was widespread criticism of the Government's attitude, and Mr. Jinnah too evidently thought that there was no use pursuing that line. He, therefore, turned his attention to securing power for the Muslims in general and the League in particular irrespective of the Congress. Thus almost for the first time in recent years, he called upon the British authorities to start a provisional Government with Muslim support. He had all the while pleaded for the continuance of the *status quo* in the absence of a settlement on the basis of Pakistan, but now he made the demand that, settlement or no settlement, the Muslims should not be kept out of power on the plea that the Congress was in prison.

**Delhi Session.**—A session of the Muslim League was held at Delhi late in the spring of 1943. Mr. Jinnah, who presided, made a three-hour speech in the course of which he said:—"Nobody will welcome it more than myself, if Mr. Gandhi is now really willing to come to a settlement with the Moslem League. Let me tell you that will be the greatest day, both for the Hindus and the Muslims. If that is Mr. Gandhi's desire, what is there to prevent him from writing direct to me? Who is there that can prevent him from doing so? (Renewed Cheers). What is the use of going to the Viceroy? Strong as this Government may be in this country, I cannot believe that they will have the daring to stop such a letter, if it is sent to me. It will be a very serious thing indeed, if such a letter were stopped. Mr. Gandhi gets all the information and knows what is going on. If there is any change of heart on his part, he has only to drop a few lines to me. Then the Muslim League will not fail, whatever may have been our controversy before."

"When we passed the Lahore resolution, we did not use the word Pakistan at all," Mr. Jinnah continued.

"Who gave us this word? (shouts of 'Hindus'). Let me tell you this is their folly. They started damning this on the ground that it was Pakistan. They folsted this word upon us, and they talked of Pan-Islamism. We ourselves went on for a long time using the phrase 'the Lahore resolution popularly known as Pakistan.' But how long are we to have this long phrase? I say to Hindu and British friends, we thank you for giving us one word."

Deprecating talk of some sort of loose Federation, Mr. Jinnah declared. "There is no such thing as a loose Federation. When a Central Federal Government is established, it will tighten and tighten until the units are pulverised in the matter of real power and are reduced to the same status as Indian States at present.

"We are opposed to any such scheme. It is bound in the long run to lead to certain emasculation of the entire Muslim nation, socially, educationally, culturally, economically and politically and to the establishment of a Hindu majority Raj in this sub-continent. Therefore, dismiss from your mind any idea of this kind that might lure you."

After charging Mr. Gandhi and other Congress leaders with systematic and deliberate attempt to establish Hindu rule in India, Mr. Jinnah said "let us close that chapter. Even nations that have killed millions of each other—we have not done so yet—even they who were the bitterest enemies yesterday have to-day become friends. That is politics.

I make this appeal to the Hindu public. If your leaders are on this path, as I say they are, and if you do not approve of it, it is your responsibility. The responsibility of the Hindu public, to come forward and say 'stop this internecine war. Declare a truce. Let us sit as two equals, and come to a settlement.' That is now the problem of problems. I ask how can you keep on saying that it is the British who keep us apart. Of course, I grant the British take advantage of our folly. But we have devices of our own which are better than any devices that the British Government can fashion to keep us disunited (Cheers). Why should not the country say: 'Unite and drive the British out?' It is no use appealing to other nations of the world."

The principal resolution of the session ran:—

"This session of the All-India Muslim League views with concern and grave apprehension the failure of the British Government to make an explicit declaration asked for in the resolution passed by the Working Committee of the All-India Muslim League in Bombay on August 20, 1942.

"Since that resolution was passed, the speeches and statements made by responsible British statesmen, both in England and in India, lead to the conviction that not only the declaration such as was asked for, will not be forthcoming but that some kind of federal constitution, not necessary on the model embodied in the Act of 1935, is under contemplation. This session, therefore, warns the British Government in all earnestness that the imposition of such a federal constitution will be resisted by Muslim India with all its might, which will inevitably result in strife, bloodshed and misery, the responsibility of which will rest on the British Government alone.

"This session of the All-India Muslim League is convinced that the attainment of the cherished goal of Pakistan is possible by the untiring effort, willing sacrifices and grim determination of the Muslims, and they should therefore do their utmost to acquire the strength requisite for such an undertaking."

**Mr. Gandhi's Gesture.**—In response to Mr. Jinnah's appeal at the annual session of the League, Mr. Gandhi a few weeks later wrote a letter to the League leader expressing his willingness to meet him; presumably to discuss with him the Congress-League relationship and Hindu-Muslim question generally. The contents of the letter are not known publicly. The

**Gandhi-Jinnah Talks.**—The Gandhi-Jinnah talks which were scheduled to take place in August had to be put off owing to Mr. Jinnah's ill-health. They actually began in September.

The negotiations lasted full three weeks at the end of which Mr. Jinnah made the following statement, at the same time releasing for publication the voluminous correspondence that had passed between him and Mr. Gandhi during that period.

"Mr. Gandhi from the very commencement of our talks made it clear that he had approached me in his individual capacity and that he represented no one but himself. However, he assured me that he was really open to conviction and conversion to the Muslim League Lahore Resolution of March 1940."

"Without prejudice to my objection that in order to reach any settlement, negotiations can only be carried on properly when the other side is also fully represented and vested with authority. In deference to Mr. Gandhi's wishes I agreed to the task of persuading and converting him to the fundamentals of the Lahore Resolution."

"I have placed before him everything and every aspect of the Muslim point of view in the course of our prolonged talks and correspondence, and we discussed all the pros and cons generally, and I regret to say that I have failed in my task of converting Mr. Gandhi."

"We have, therefore, decided to release to the Press the correspondence that has passed between us."

"Nevertheless, we hope that the public will not feel embittered, and we trust that this is not the final end of our effort."

For the full text of the Gandhi-Jinnah correspondence see last year's issue of the *Indian Year Book*.

Commenting on the failure, Mr. Gandhi said at a press conference that it was a matter of deep regret that he and Mr. Jinnah could not reach an agreement but there was no cause for disappointment. "The breakdown is only so-called; it is an adjournment *sine die*," he said. "Each one of us must now talk to the public and put our view-points before them. If we do so dispassionately, and if the public co-operate, we may reach a solution of the seemingly insoluble at an early date."

"My experience of the precious three weeks confirms me in the view that the presence of the third Power hinders the solution. A mind enslaved cannot act as if it was free. I need not impute base motives to the rulers to prove what seems to me to be an axiomatic truth. Nevertheless, I am going to continue to work for the solution as I have done during these weeks."

To this, Mr. Jinnah replied: It is a pity that he thinks that the presence of a third party hinders a solution, and it was very painful to me when he said, "a mind enslaved cannot act as if it was free." No power can enslave the mind and soul of man, and I am sure Mr. Gandhi is the last person to allow his mind to be enslaved. I do hope that he will get

over this depression from which he is perpetually suffering. We have to reach an agreement of our own and find a solution in spite of that third party.

**Desai-Liaquat talks.**—Things drifted for the next few months until the publication of press reports relating to certain secret negotiations between Mr. Bhulabhai Desai leader of the Congress in the Central Assembly, and Nawabzada Liaquat Ali Khan, Deputy leader of the Muslim League Party in the Central Assembly.

Pending the publication of authoritative information on the subject (see chapter on the Indian National Congress), both Mr. Jinnah and Nawabzada denied the existence of any understanding between the Congress leader and the League.

**Simla Conference.**—The next phase of Muslim activity was in connection with the Wavell proposals in the Simla Conference. This, together with the part played by the Muslim League and its leader, were exhaustively dealt with in the chapter on "The Indian National Congress in last year's issue of *The Indian Year Book*."

After the breakdown of the Simla Conference the Working Committee of the Muslim League passed a resolution emphasising the urgent need for fresh elections to the Central and Provincial legislatures. The League Committee invited the attention of the Government to the resolution unanimously adopted at the annual session of the All-India Muslim League held in Karachi in December 1943 demanding fresh elections to the Central and provincial legislatures on the ground that these legislatures were getting out of touch with public opinion and could no longer be said to be representative of the true needs and sentiments of the people. The committee stressed the urgent necessity of giving effect to the terms of that resolution. The Working Committee was convinced that fresh elections to the central and provincial legislatures should no longer be delayed because important questions awaited solution which could only be properly dealt with by representatives in touch with public opinion and the sentiments of the people.

The Muslim League and its leader then carried on a campaign demanding early general elections throughout the country. In August 1945, the Government announced that general elections would be held in the winter of 1945-46 and the spring of 1946.

The Muslim League plunged into the elections heart and soul. In one of his first electioneering speeches Mr. Jinnah said: "This is a war that can be fought only with silver bullets", and, after the fashion of Mr. Churchill, "give me those silver bullets and I will finish the job." He added, "We are determined not to submit to any scheme of an All-India Union, interim or otherwise, and we will resist any attempt to impose such a union upon us. The just and only solution of India's constitutional problem lies in the establishment of Pakistan and Hindustan."

As the elections drew near, Mr. Jinnah said that the deadlock in this country was not so much between India and Britain as between

the "Hindu Congress" and the Muslim League. The British Government were putting the cart before the horse in proposing an all-India constitution-making-body before a settlement of the Pakistan issue. The League leader also revealed his intention to include Assam in the eastern zone of Pakistan.

The elections to the Central Assembly were a hundred per cent success to the League. Applauding the electors, Mr. Jinnah said that the Congress had adopted a cowardly policy and had run away. It didn't dare to put up any Muslim candidate on the Congress ticket, knowing full well that the fate of those candidates would be the same as that of the Nationalist Muslims.

Like the central elections, the elections to the provincial Assemblies were fought on the issue of Pakistan. Mr. Jinnah said: "If the Muslims stand united, with a grim resolve to sacrifice everything for Pakistan, then we shall surely achieve it. We must realize the success for which we were fighting. This is a question of life and death for Muslims. Failure to achieve Pakistan would mean our national extinction."

Except in the Frontier Province and in a few isolated cases in other provinces, the Muslim League scored a signal triumph in the provincial elections as well. In Madras, Bombay, the C.P. and Orissa it secured cent per cent success. In Bihar, Assam and the United Provinces, especially in the last-named, a few non-League Muslims were returned, but the large majority were leaguers. In Bengal, the heart of what is called the eastern Pakistan, only a couple of non-leaguers could come in; all the other Muslim seats were captured by the League. At the other end, in the heart of "Western Pakistan", namely the Punjab, the League annexed all the seats except about a dozen which went to supporters of the Unionist Party, which had held sway in the province for about ten years. In Sind, out of a total of 35 Muslim seats, as many as 27 went to the League; of the remaining eight, four went to pro-Congress Muslims and the other four to a group which had cut itself away from the official League. In the Frontier Province, however, the League's hopes failed, for the majority of the Muslim seats went to the Congress. Even here, the League put up a better show than in the previous elections held ten years ago. Thus the League was able to establish its claim to represent the vast majority of the Muslims of India.

In terms of Ministries, however, the League did not fare so well. Bengal was the only province in which a League Ministry could be formed without its supporters having to depend on the votes of other groups. In the Frontier, of course, the Congress formed the Ministry with the League as the main Opposition party. In the Punjab again, in spite of the fact that the League formed a solid group of 75 in a House of 175, it had to remain in the Opposition, a Government having been formed with the aid of a coalition of a dozen non-League Muslims, 30 odd Sikhs and a large number of Hindus. In Sind, a League Ministry was formed by the Governor, but it had a precarious existence, faced as it was by an opposition of

nearly equal strength. Thus, out of the four Muslim majority provinces, there were League Ministries in two, a Congress Ministry in the third and a pro-Congress coalition Ministry in the fourth.

This the League did not mind because it had already stated it did not think in terms of Ministries. As Mr. Jinnah observed on the morrow of the elections, "We have secured a thumbing verdict throughout India, the elections showing a clear result of not less than 90 per cent. of the Muslim votes cast in favour of Pakistan." The claim was more or less right insofar it related to the proportion of successful Leaguers returned at the polls. An analysis of the voting figures showed, however, that the pro-League percentage was much lower.

The months following the Simla Conference of 1945 were devoted to electioneering. There is no doubt that during this period there was an accession of strength to the League throughout the country. The resignation of the Punjab Provincial Congress Committee's President and his subsequent enrolment as a member of the Muslim League was an illustration of the change that was coming over the minds of many Muslims. This obviously accounted for the success of the League at the polls.

Early in 1946 there was an indication of a big move on the part of Britain finally to settle the Indian political and constitutional question. The British Premier, in March 1946, made the famous declaration announcing the Labour Government's policy and the despatch of a Cabinet Delegation to settle the Indian question on the spot. (See the Chapter "British Cabinet Delegation"). Commenting on this Mr. Jinnah said: "The Congress is threatening the British that it will not work the constitution but will use it for the purpose of preparing the people for a final struggle if the British Government did not surrender to the Congress demand for immediate formation of an all-India federal constitution to be framed by a constituent assembly, with an overwhelming Congress majority and the formation of an immediate interim national government at the centre. The British are threatened that, if they want trade facilities, they must surrender to the Congress and make a compromise with its patrons, the capitalists. If they did not surrender, the consequence will be bloodshed and ruination of British trade. If the Pakistan demand is favoured, all the weapons that they are keeping in their armoury will be let loose. To prevent bloodshed a bribe is offered to the British of a flourishing trade in India, in common with the Indian capitalists, if they make peace with the Congress. This is a dream, for they fail to take into account that there are one hundred million Muslims and that there is a powerful mass organization, the All-India Muslim League, which cannot remain a spectator. So far as trade is concerned, it is not realized that the largest consumers of British goods are Muslims. They can also play a big part in paralyzing British trade if they were resolved to do so.

The weeks that followed the arrival of the British Cabinet Mission was a period in which Mr. Jinnah went all out to sustain his Pakistan

claim. He went to the extent of telling the Sikhs that they as a nation were entitled to a state of their own and that he was not opposed to it as such provided they showed where it could be created.

Mr. Jinnah saw no room for the Muslims to compromise on the issue of Pakistan, which, he said, was the question of their very existence. Asked by an interviewer if this statement inferred a loyalty to the community before loyalty to the country, Mr. Jinnah replied: "There is no country in that sense. I do not regard myself as an Indian. India is a state of nationalities, including two major nations, and all we claim is a distinct sovereign state for our nation, Pakistan." He admitted that 25 million Muslims would be excluded from Pakistan as minorities in Hindustan, but he thought that they could not help that in any case. Under Pakistan, they would be better off, because it was fortunate that there would be a corresponding minority of 25 million Hindus in Pakistan. Mr. Jinnah was not worried about the expenditure necessary to defend the frontiers. "Russia means trouble as far as I can judge, and I think the sooner Britain agrees to Pakistan the better it will be for her and Indian Muslims." He would tell the Congress: "Divide. I do not want to live jointly with you. If you talk in any other terms, it is only camouflage. There cannot be any equal share between two nations thrown together, one in an overwhelming majority of three to one. It is unnatural and artificial. Why does Britain want us to keep together? We refuse. If she wants to force us, she will need to keep her bayonets sharp to maintain the Congress Raj in this sub-continent."

**Muslim League Convention.**—Early in April, while the British Cabinet Mission was sojourning in Delhi, Mr. Jinnah convened an All-India Muslim Legislators' Convention, attended by about 300 members of the various provincial legislatures. Addressing the Convention, the League President said: "We are prepared to sacrifice anything and everything, but we shall not submit to any government formed without our consent. This convention is going to lay down once for all, in unequivocal terms, what we stand for. We stand unanimously for Pakistan. We shall fight and die for it, if necessary: achieve it we must, or we perish." An inflexible, uncompromising tone was evident throughout his speech. He repudiated the suggestion of an "undiluted Pakistan" under the suzerainty of a strong central government. He declared that a government established by handing over the country's civil and military administration to the Congress, "would not hold for 48 hours." Because it implied proceeding on the basis of a united India, a single constitution-making body, asserted Mr. Jinnah, was unacceptable to the Muslim League. He explained that, while matters like defence and external affairs might be the subjects of common arrangement, this should be effected not through a central co-ordinating agency, but by treaties entered into by a completely sovereign Pakistan and Hindustan. "Nothing derogatory to the full sovereignty of Pakistan is acceptable," he affirmed. Mr. Jinnah accused Mr. Gandhi

of promising preferences to British goods and hoped that "the commercial tendencies of Britain" would not lead that country to accept the Congress' "illusory hopes and promises." The League leader declared that the Congress forgot that the consumers who were largely Muslims had also "a say" in these matters. Referring to the Congress suggestion of grave trouble if that party's demands were not met, Mr. Jinnah stated: "If unfortunately the British are stampeded by the threat of bloodshed, which is mere bluff, the Muslim League this time is not going to remain passive or neutral."

Commending the resolution to the Convention, Mr. H. S. Suhrawardy, Premier of Bengal, made a speech which was evidently meant for the ears of the British Cabinet Mission. He said: "Britain was ready to part with power and was seeking to whom she might hand over power, and the presence of the Cabinet Mission was proof of her earnestness and sincerity. 'The Congress', he said, 'was stating: 'Hand over power to us. We shall sweep all opposition. We shall suppress the Muslims. We shall bring the scheduled castes to the heel and we shall annihilate the Adilshah. Give us the police, your army and arms and we shall reproduce an armageddon in the name of a united India.' This I call insanity induced by the lust for power. The Cabinet Mission is not so blind as to trust the destinies of India to this gang. Is Pakistan our last demand?" he asked, and replied: "I will not attempt to give an answer. But that is our latest demand. I would like the Congress to recall that we in the past asked for much less and we were prepared to accept the superior number of Hindus in a democratic constitution, but they turned down everyone of our modest demands. Now there is nothing left for us except to demand separation. This is a fair and legitimate demand of ours." Hundred million of Muslims, Mr. Suhrawardy said, were today united behind the League and they would resist all attempts to deny them their rights. Muslims were not a dead nation and the resistance would not be by mere words. If the Hindus wished to live in honour and peace, the Congress should concede Pakistan, he added. The Muslims did not desire to start a civil war, but they must have their rights, so that they would be able to hold up their heads and say: "We are a nation and we believe we have something to contribute to the civilization of the world."

Khan Abdul Qayyum Khan (N.W.F.P.) said that if "Quit India" meant that the British should quit here and now and leave the Hindus and Muslims to decide the question among themselves, then on behalf of 100 million Muslims he would ask the British to quit. But what puzzled him was that the Congress wanted the British to stay for a sufficiently long period so that they could consolidate their position with British bayonets. "It cannot happen" he said, adding: "Thank God, we have one flag, one leader, one platform and one ideal—Pakistan—to fight for. We are only waiting for the final order to do whatever is considered necessary for the attainment of Pakistan." Concluding he said: "We are not

indulging in any threats against the Congress or the Hindus. But if the British force the Muslims by the setting up of a Government of the Akhand Hindustan type and if they decide there should be one Constituent Assembly, then the Muslims will have no other alternative but to take out the sword and rebel against it."

Mr Shaukat Hyat Khan (Punjab) claimed that he represented the martial class in the Punjab and that they were eager to join the struggle for Pakistan. "You only give us a chance," he said, "and we shall give a rehearsal now when the British army is still here. You will see the reactionary government which is there in the Punjab with the help of the Hindus and the Muslim quislings thrown overboard."

Sir Firoz Khan Noon declared: "If the Hindus give us Pakistan they will be our best friends. If the British give us Pakistan, then they will be our friends. But if neither give us Pakistan, then Russia will give it to us." He added: "We want our freedom and we shall have it. Freedom is a thing which is more valuable than anything else in the world. We wish to see that our children shall never be slaves of Akhand Hindustan."

Winding up the Convention session, Mr. Jinnah said that the august and historic Convention of the Muslim nation had declared itself for Pakistan. "While we hope for the best," he said, "we are prepared for the worst." They were prepared to make any and every sacrifice for the attainment of Pakistan. Pakistan, Mr. Jinnah went on, was not going to be a theocratic State. Religion, of course, played an important part in a nation's life. But there were other aspects, which were vital for a nation's existence. Social, economic and political life were the main pillars which would enable them to live according to their faith; with their social life demoralized and economy ruined and with no political power they would not be able to defend their faith.

The following resolution was unanimously adopted by the Convention:—

"Whereas in this vast sub-continent of India hundred million Muslims are the adherents of a faith which regulates every department of their life (educational, social, economic and political), whose code is not confined merely to spiritual doctrines and tenets or rituals and ceremonies, and which stands in sharp contrast to the exclusive nature of Hindu Dharma and philosophy, which has fostered and maintained for thousands of years a rigid caste system resulting in the degradation of 60 million human beings to the position of untouchables, creation of unnatural barriers between man and man and superimposition of social and economic inequalities on a large body of the people of this country, and which threatens to reduce Muslims, Christians and other minorities to the status of irredeemable helots, socially and economically;

"Whereas the Hindu caste system is a direct negation of nationalism, equality, democracy and all the noble ideals that Islam stands for;

## TWO DISTINCT NATIONS

Whereas different historical backgrounds, traditions, cultures, social and economic orders of the Hindus and Muslims have made impossible the evolution of a single Indian nation, inspired by common aspirations and ideals; and whereas after centuries they still remain two distinct major nations;

"Whereas soon after the introduction by the British of the policy of setting up political institutions in India on the lines of Western democracies based on majority rule, which meant that the majority of one nation or society could impose its will on the majority of the other nation or society in spite of their opposition, as was amply demonstrated during the two and a half years' regime of Congress Governments in the Hindu majority provinces under the Government of India Act, 1935, when the Muslims were subjected to untold harassment and oppression as a result of which they were convinced of the futility and ineffectiveness of the so-called safeguards provided in the constitution and in the Instrument of Instructions to the Governors and were driven to the irresistible conclusion that in a United Indian Federation, if established, the Muslims even in majority provinces would meet with no better fate, and their rights and interests could never be adequately protected against the perpetual Hindu majority at the Centre;

"Whereas the Muslims are convinced that with a view to saving Muslim India from the domination of the Hindus, and in order to afford them full scope to develop themselves according to their genius, it is necessary to constitute a sovereign independent State comprising Bengal and Assam in the north-east zone and the Punjab, the North-West Frontier Province, Sind and Baluchistan in the north-west zone;

"This convention of the Muslim League legislators of India, Central and Provincial, after careful consideration hereby declares that the Muslim nation will never submit to any constitution for a united India and will never participate in any single constitution-making machinery set up for the purpose, and that any formula devised by the British Government for transferring power from the British to the peoples of India, which does not conform to the following just, equitable principles calculated to maintain internal peace and tranquillity in the country, will not contribute to the solution of the Indian problem:—

## PAKISTAN ZONES

"First that the zones comprising Bengal and Assam in the north-east and the Punjab, the North-West Frontier Province, Sind and Baluchistan in the north-west of India, namely, Pakistan zones where the Muslims are a dominant majority, be constituted into a sovereign independent State and that an unequivocal undertaking be given to implement the establishment of Pakistan without delay.

"Second, that two separate constitution-making bodies be set up by peoples of Pakistan and Hindustan for the purpose of framing their respective constitutions.

"Third, that the minorities in Pakistan and Hindustan be provided with safeguards on the lines of the All-India Muslim League resolution passed on March 23, 1940, at Lahore.

"Fourth, that the acceptance of the Muslim League demand of Pakistan and its implementation without delay are the *sine qua non* for the Muslim League co-operation and participation in the formation of an interim Government at the Centre.

"This convention further emphatically declares that any attempt to impose a constitution on a united India basis or to force any interim arrangement at the Centre contrary to the Muslim League demand will leave the Muslims no alternative but to resist such imposition by all possible means for their survival and national existence.

All the participants in the Convention took the following pledge: -

"I do hereby solemnly declare my firm conviction that the safety and security, and the salvation and destiny of the Muslim nation inhabiting the sub-continent of India lie only in the achievement of Pakistan, which is the one equitable, honourable and just solution of the constitutional problem and which will bring peace, freedom and prosperity to the various nationalities and communities of this great sub-continent. I most solemnly affirm that I shall willingly and unflinchingly carry out all the directions and instructions which may be issued by the All-India Muslim League in pursuance of any movement launched by it for the attainment of the cherished national goal of Pakistan, and, believing as I do in the

rightness and the justice of my cause, I pledge myself to undergo any danger, trial or sacrifice which may be demanded of me."

The Muslim League's negotiations with the Cabinet Mission are dealt with in the Chapter "British Cabinet Delegation", which relates to the period from April to October 1946.

### OTHER MUSLIM ORGANISATIONS

Organisations of Muslims other than the League suffered a progressive decline in status and influence since the League ascendancy to power following the withdrawal of Congress Ministries in 1939. When the Congress was outlawed in August 1942 and its leaders put in prison, the non-League Muslims tried to get together to counteract the influence and claims of the Muslim League. It was a slow process, and not very successful, because the League not only maintained its hold on the bulk of the Muslim community but also steadily increased its influence among them. At any rate, officialdom seemed disinclined to recognise the claim to representative character of non-League Muslim organisations. The activities of the latter were further stimulated at the time of the Simla Conference in the summer of 1945 when they felt the call to repudiate the claims of Mr. Jinnah exclusively to represent the Muslim community. Their latest attempt was to create a common platform for those Muslims who did not see eye to eye with the Muslim League.

In the weeks immediately preceding the elections pro-Congress and other non-League Muslims tried to get together in an effort to defeat the League candidates. In this they failed miserably.

# The Indian Legislature.

The coming constitutional shake-up overshadowed the Budget Session of the newly elected Central Legislative Assembly. It was a changed Assembly. The Nationalist Party of the old Assembly had disappeared from the Assembly, so also the unattached members. The Party alignments had become clearer and well-defined. The Congress was the largest party in the Assembly, having as many as sixty members. The Muslim League, having captured all the Muslim seats, formed the second large group. The Europeans retained their position and formed the third party in the House. The three Sikhs sat separately as unattached members along with a couple of landlords. Barring the Muslim League, the leadership of the Parties had also changed. Mr. Sarat Chandra Bose had replaced the late Mr. Bhulabhai Desai as the Leader of the Opposition, Mr. P. J. Griffiths had succeeded Sir Harry Richardson as the Leader of the European Group and Sir Edward Benthall and subsequently Sir Ramaswamy Mudaliar had replaced Sir Sultan Ahmed as the Leader of the House. Mr. M. A. Jinnah alone retained his leadership of the Muslim League Party.

Barring the Scheduled Caste Representative, Dewan Bahadur N. Shivraj, the Indian Christian Representative Dr. J. C. Chatterji and the Anglo-Indian Representative Mr. Frank Anthony the entire nominated bloc had been changed. The Labour representation had been increased from one to three, including a woman. Shia Mussalman had been given separate representation in Raja Sahib of Salempur. And yet the whole setup was unreal. The Government members were polite but not firm. They could not be otherwise. They knew that they were going out. The Opposition was unnecessarily aggressive. It had the majority and could and did defeat the Government on many issues, so long as the Congress and the Muslim League could combine. There was neither a Unity nor a Coalition. There was only a combination to defeat the Government because both were opposed to it, though from different standpoint.

Looking back on the three months' session one could say that there was plenty of talent amongst the Congress members but it was hardly mobilised. There was little application and no division of work.

The Muslim League Party was a disappointment, as far as the attendance of its members was concerned. Half the members were invariably absent. It possessed well-known personalities including five Members of the League's Highest Executive. Thus the Party possessed talent, which mostly remained dormant.

The European Group maintained its reputation for industry and application. Mr. G. W. Tyson was always listened to with attention particularly on financial subjects. Mr. P. J. Griffiths is a brilliant speaker and made some valuable contributions to the debates on the I. N. A. and R. I. N.

The Government side was definitely poor. For the first time, several non-official Nominated Members voted against the Government and many of them stayed away from the House for the most part of the Session. Here again, the Back Benchers, the War Secretary Mr. P. Mason and the Commonwealth Secretary Mr. Banerji made their mark. Mr. Mason came out as a first rank parliamentarian. The Food Secretary Mr. B. R. Sen had a difficult job but he did it well. The Foreign Secretary, Mr. Weightman is in a class by himself. He was firm when firmness was needed.

The Session had a record number of adjournment motions and short notice questions. In fact, adjournment motions became the order of the day, through which discussions were raised on many and varied subjects. The Sterling Balances, the Brettonwoods Agreement, the Pegging Act of South Africa, the I. N. A. Prisoners and Labour unrest among Railwaymen and Postal Employees, the Defence Services, wages and food dominated the Session. The Government, as far as it was possible, was responsive and accommodating and met the Opposition in a large number of cases. This was largely due to the present policy of Lord Wavell, who, for instance, declined to restore the cuts relating to railroad co-ordination and the Information Department.

The Session had a very heavy legislative programme; as many as thirty-two official bills were brought up for disposal. There being no November Session, it was in reality a two-Sessions work, which the Central Assembly had been called upon to do in one Session.

Labour legislation topped the list, Dr. Ambedkar having as many as seven Bills some of which were crowded out on the last day. These included the Electricity Bill, the Minimum Wages Bill and the Trade Union Recognition Bill, the last of which was put down for a Select Committee.

Sufficient indications were given during the Session by Dr. Ambedkar to bring forward legislation to provide for Health Insurance of both Industrial workers and seamen, to overhaul the Indian Factories Act and to amend the Trade Disputes Act. Indications were also given for a revision of the Indian Companies Act.

The Session, however, passed some important pieces of legislation such as the Mica Labour Welfare Fund Bill and the 48 hours a Week Bill.

The Finance Member, Sir A. Rowlands proved a great tactician and was able to steer through his Finance Bill successfully this year. His work is only half done as yet, for he was unable to bring up legislation in relation to the National Investment Board, Capital Control and the Amendment of the Reserve Bank Act.

One of the out-standing achievements of the Session was Dr. Deshmukh's Bill to give Hindu women the right to separate residence and maintenance.

All the five Bills were subsequently circulated by an Executive Order and along with the two other Bills namely Indian Coinage Bill and the Pharmacy Bill, they will be ready for disposal through Select Committee Stage by the November Session of the Central Legislative Assembly.

### GOVERNOR-GENERAL'S ORDINANCES :

Fortyeight Ordinances, of which 21 were original and 27 amending Ordinances were issued in 1945. Fourteen Ordinances of which 6 were original were issued till the end of March 1946.

The most important of the Ordinances issued during 1945 were :

**Indian Income-tax (Amendment) Ordinance, 1945 :** It amended the Indian Income-tax Act, to give relief to the tax-payer, *inter alia*, by giving exemption in respect of earned income.

**The Provincial Debt Laws (Temporary Validation) Ordinance :** It temporarily validated certain provincial laws in so far as they related to promissory notes.

**Refugee Camps Ordinance :** It provided for and regularised the accommodation in refugee camps of refugees entering British India from certain war areas and the maintenance of essential discipline in such camps.

**War Gratuities (Income-tax Exemption) Ordinance :** It exempted certain war gratuities from liability to income-tax.

**Bengal Textiles Association Ordinance :** It incorporated and regulated a trading Corporation in the Province of Bengal for the purpose of improving the procurement and wholesale distribution of piecegoods in that Province.

**Limitation (War Conditions) Ordinance :** It provided that the period of limitation prescribed by law for suits shall not run in the period during which persons instituting suits have been detained in enemy territory by circumstances attributable to war.

**Bills of Exchange Ordinance :** It made provision in respect of Bills of Exchange lost owing to war conditions.

**Army (Forfeiture of emoluments) Ordinance :** The Ordinance Provided for the forfeiture in certain cases not provided for by the Army Act of pay and allowances of certain persons subject to that Act.

**International Monetary Fund and Bank Ordinance :** It implemented the International Monetary Fund and Bank Agreements.

The most important of the Ordinances issued till the end of March 1946 are :—

**Termination of War (Definition) Ordinance :** It provided for the determination of the date on which World War II was officially considered to have ended.

**Allied Forces (China) Ordinance :** It implemented the Agreement between the Government of India and the Republic of China relating to Jurisdiction over members of the forces of the two Governments.

**Bank Notes (Declaration of Holdings) Ordinance :** This Ordinance required banks and Government Treasuries to furnish information in the prescribed manner concerning certain

bank notes held by them and provided for penalties in event of any bank failing to give information or gives false information.

**High Denomination Bank Notes (Demonetisation) Ordinance :** It provided for the demonetisation of certain high denomination bank notes.

### THE CENTRAL BUDGET, 1946-47.

The Central Budget for the year 1946-47 was presented to the Legislature on the 28th February, 1946. It disclosed a revenue deficit of Rs. 144.95 crores in the Revised Estimates of 1945-46 and Rs. 44.06 crores in the Budget Estimates for 1946-47.

The Revised Estimates for 1945-46 put revenue receipts at Rs. 360.68 crores, or a decrease of Rs. 1.68 crores over the budget estimates. While Customs revenue was expected to improve by Rs. 9½ crores, a short fall of Rs. 2 crores was anticipated under Central Excises. Under Taxes on Income including E.P.T., as against an estimated collection of Rs. 190.5 crores, the revenue was now placed at Rs. 189 crores, the short-fall of Rs. 1½ crores occurring under ordinary income-tax. The divisible pool of income-tax was estimated to amount to Rs. 55.94 crores, and the share of the provinces, together with a carry-over of Rs. 5.28 crores from the previous year to Rs. 28.75 crores. The Revised estimates for Defence expenditure was placed at Rs. 376.42 crores as against the original estimate of Rs. 394.23 crores. The explanation for this comparatively small decrease despite the end of the war in the middle of the year lay very largely in the heavy costs of war gratuities, Special leave and other terminal benefits granted to personnel on discharge in addition to their pay and allowances and other maintenance expenses while awaiting discharge in India.

**Demobilisation of Indian Armed Forces.—** Plans for the demobilisation of the personnel of the Indian armed forces had been under active consideration for a considerable time before the V.J. day and it was found possible to put these into operation at the beginning of October. The number of such personnel to be demobilised is well over a million and a half and no effort has been spared to speed up the rate of releases. The work of rehabilitation and development connected with the process of demobilisation was also proceeding apace. This included the making of arrangements for the welfare of soldiers awaiting discharge and their education and preparation for civilian life, cancellation or reduction of Defence demands for stores of all kinds, the closing or the slowing down of munitions manufacture, the declaration of surplus stores and the disposal of fixed assets no longer required by the Defence Services. The complementary schemes and measures to ensure that the personnel and industrial resources are utilised for the recuperation and expansion of India's civil economy have also received attention.

With effect from V. J. day, all Lend-lease arrangements and Reciprocal aid came to an end. As a matter of administrative convenience, however, it was agreed that supply and Services through mutual aid should continue for a short time to be rendered on both sides on a cash repay-

sterling area arrangements. Under such an arrangement, Empire and other countries found it convenient to settle their transactions on international account in sterling. With the restricted ability of the Commonwealth to earn foreign exchange as a result of the war and with imports necessary for war being high, the different countries in the Commonwealth pooled their resources and met their essential requirements of hard currencies from the Pool. India had free access to the Pool to finance her essential current imports, and a sum of \$20 million had been specially earmarked to 'pay for capital equipment for India's post-war development. As regards the question of withdrawal from the Pool, he said that in his view it would be unprofitable to do so, as the balance of trade with U.S.A. had begun unfavourable to India for many months. Giving some figures relating to the excess of India's contribution to the Pool over her drawings, he explained that owing to the number and complexity of the transactions, it was difficult to arrive at completely accurate figures but, with the help of the Reserve Bank, it had been deduced that between Sept. 1939 and March 1945 India had earned hard currency assets to the amount of Rs. 364.33 crores against which (excluding the \$20 million referred to above) India had utilised Rs. 265.02 crores. Adding the net import, amounting to Rs. 50.08 crores, of gold from U.K. during this period (gold being equivalent to hard currency) the balance in India's favour was Rs. 49.23 crores as at March 1945. In his opinion the most that could be claimed was a *pro rata* share of the existing pool assets. Even if the full amount could be established it will be much less than what India will obtain by way of free exchange from the pending negotiations between India and U.K. on the subject of sterling balances.

**Central and Provincial Planning.**—Indicating the progress of Central and Provincial planning, the Finance Member said that provincial five year plans would be finalised shortly and would involve an expenditure of the order of Rs. 900 crores. In addition to these, Central plans in respect of Railways, roads, Civil Aviation, etc., would amount to a considerable sum. As an incentive to urgent action, the Central Government has undertaken to provide provincial Government schemes which provide a high proportion of employment relative to their cost. In approved schemes this assistance will take the form of loans while for others advance grants will be made to cover the full cost which will not be recoverable but will be adjusted against whatever scheme of Central grants is finally decided upon.

The budget included a lump sum of Rs. 35 crores for such advance payments and Rs. 15 crores for loans to Provinces. For Central development schemes (excluding Railways) a total provision of Rs. 27 crores had been made in the budget. Expenditure on Railway items was expected to amount to approximately another Rs. 22 crores.

It was expected that Provincial Govts. between them will have by the end of 1945-46 balances of the order of Rs. 70 crores and will acquire during the next six years surpluses totalling some Rs. 100 crores. Their plans were

based on the broad assumption that apart from borrowing, either from the Centre or from the market, they will receive Central grants during the first five year period amounting to Rs. 250 crores distributed roughly on a population basis. In the distribution of this grant the Finance Member said he would prefer a Scheme on the Australian model for the distributing Federal grants. A senior officer would be deputed to study the Australian system and report on the feasibility of adopting it to Indian conditions.

**Industrial Finance Corporation.**—In the Industrial field the Finance Member mentioned that an advance stage of preparation had been reached in respect of the establishment of the Industrial Finance Corporation, to ensure the availability of medium and long term credits to Industrial enterprises in India. He also mentioned that pending the consideration of the Board, the existing control over capital issue must necessarily be continued. He also announced that a Taxation Enquiry Committee which he hoped would be predominately non-official in composition, would be set up in the near future to consider what modifications would be required in the taxation system of the country to produce a properly balanced and scientific tax structure.

**New taxation proposals.**—Turning to the new taxation proposals, the Finance Member observed that fiscal policy was not an end itself and that it should subserve the ends of national policy. Its purpose should be not merely to raise a given revenue but so to raise it as to obtain the maximum social and economic advantage and distribute the burden between the various classes of tax-payers in an equitable manner. He said that in the years immediately ahead, the largest single source of revenue will have to be the profits of Industry, and that the main problem was how to lay it under a heavy contribution and at the same time encourage it to expand.

**Taxation Relief.**—As his contribution to the solution of this problem, he announced that E.P.T. will be discontinued after the 31st March 1946. He described E.P.T. as a bad tax, rough and ready in its operation, unfair in its incidence and, beyond a certain point, offering a direct inducement to inefficiency. The discontinuance of the tax will not of itself effect the revenue for 1946-47 since it will be payable in respect of all E.P.T. earned up to the 31st March 1946. The scheme of compulsory deposits will also remain upto the end of the E.P.T. period. E.P.T. deposits will be sanctioned in advance of the date for which the law provides on condition that they are not distributed as dividends but are used for building plant or machinery. Industry was to get further relief by the grant of special initial depreciation allowance of 10 per cent on new buildings or 20 per cent on new Plant and machinery, by the widening of the scope of obsolescence allowance and by allowing for income-tax purposes expenditure on scientific research.

It was also proposed to relieve from Customs duty raw materials imported for industry, without injury to the Indian manufacturer of similar goods, to reduce the rates on such imported plant and machinery as are now dutiable.

Turning to the direct taxation field, he announced the amalgamation of the surcharges on income-tax and supertax with the basic rates, a proposal which affected not only all classes of tax payers but also Central and Provincial revenue. This proposal was estimated to raise the provincial share of income-tax by Rs. 12.75 crores at the expense of the Centre.

He also proposed to reduce the present rates of income-tax and super-tax on a company from 72 annas to 6 annas by reducing the supertax by 2 annas and by adding  $\frac{1}{2}$  anna to the income-tax. Dealing with the present provision imposing an extra tax, at the rate of 1 anna of all sums distributed as dividends, the Finance Member thought that there was no longer any justification for imposing a uniform extra rate of tax on all sums distributed as dividends. It was therefore proposed that excluding dividends payable at a fixed rate sums equal to 5 per cent. on the Capital of the Company including reserves and equal to 30 per cent of the total income may be distributed without attracting more than 1 anna rate of supertax. Dividends above that datum line were to become liable to supertax at steepening rates.

A further concession was also proposed in connection with building programmes, which were to be encouraged as on anti-deflationary activity. For residential buildings a two year's income-tax exemption was proposed and for buildings used for the purposes of the business profession or vocation the initial depreciation was raised from 10 per cent to 15 per cent.

Two reliefs were proposed for the non-company direct tax payer, viz., a reduction in the rate of tax in the lower ranges and an increase in the earned income allowance. The rate on the second slab of Rs. 3,500 was proposed to be reduced from 15 pies to 12 pies and the rate on the third slab of Rs. 5,000 from 2 annas 1 pie to 2 annas. The earned income relief was to be raised to one-fifth, subject to a maximum of Rs. 4,000 on terms of income.

The differentiation of treatment between unearned and earned income was to be carried into the supertax range, and the number of slabs in incomes subject to supertax increased. The differentiation in favour of earned income is one anna in the rupee between Rs. 25,000 and upto Rs. 2 lakhs and half an anna between Rs. 2 lakhs and five lakhs. On the balance above Rs. 5 lakhs there is no differentiation.

As a partial offset to the loss of revenue involved by the changes and also on merits it was proposed to increase the rate of income tax on the balance of income above Rs. 15,000 from 4 annas nine pies to 5 annas. Other minor changes announced were (a) reduction of rate on Life Insurance Companies from 5 annas 3 pies to 5 annas and (b) the discontinuance of the provision for funding a portion of the tax in the case of incomes upto Rs. 6,000.

In the field of indirect taxation a number of changes were also announced. The duty on Kerosene was reduced from 4 annas 6 pies to 3 annas 9 pies per imperial gallon. A small change was made in the duty on wines. The duty on Cinematograph films was converted into a specific duty charged in footage. The duty on

Imported betelnut was raised to  $5\frac{1}{2}$  annas a pound in the interest of the indigenous grower with a preference of 6 pies per pound for British Colonies. The additional import duty on cotton imposed by the Cotton Fund Ordinance of 1942 was amalgamated with the ordinary duty. The duty on motor spirit was reduced from 15 annas to 12 annas per gallon. A specific duty of Rs. 25 per tola was levied on gold bullion and the duty on silver stepped upto 8 annas an oz. from 3 as. 7  $\frac{1}{5}$  pies an ounce.

Summing up the financial effects of his proposals, the Finance Member pointed out that his income tax proposals will cost the Centre Rs. 21.5 crores while the changes under Customs and Excises are expected to yield Rs. 5 lakhs. This will increase the gap between revenue and expenditure to Rs. 70.10 crores. To bridge a part of this proposed to transfer to revenue Rs. 20.10 crores being the estimated balances in the two war Risks Insurance Funds.

In his peroration, the Finance Member said that he had aimed at keeping the revenue at the level necessary to sustain and advance India's economy by distributing burdens and reliefs evenly. He wound up by paying a tribute to his staff by saying that his successor "Can search the world in vain for a more able, a more loyal or a more devoted body of public servants."

The new taxation measures include:—

1. An increase in the rate of Income Tax on the balance of income above Rs. 15,000 from 4 annas 9 pies to 5 annas. .. .. . 3.25 crores. Estimated yield. Rs.
2. An increase in the number of slabs subject to Super Tax, resulting in a more gradual steepening of the rates, which will be more severe on the largest incomes than at present .. .. . 75 lakhs.
3. Additional Super Tax at steepening rates on dividends (other than dividends payable at a fixed rate) in excess of 5 per cent of the capital of a company (other than a private company) including reserves or thirty percent of the total income, whichever is higher, this measure being intended to keep the distribution of dividends within reasonable limits and encourage the ploughing back of profits into industry .. .. . 1.50 lakhs.
4. The raising of the surcharge on wines from one-fifth to one-half of the amount of Customs duty .. .. . 5 lakhs.
5. The conversion of the *ad valorem* duty on un-exposed cinematograph films into a specific duty of 6 pies per linear foot and of 4 annas per linear foot of exposed films .. .. . 45 lakhs.

6. An increase in the duty on imported betel-nuts to a standard rate of  $5\frac{1}{2}$  annas per pound (without surcharge) with a preference of 6 pies per pound for British colonies .. .. 1.55 lakhs.
7. The amalgamation of the Customs duty on cotton of 1 anna per pound under the Tariff Act and the duty of 1 anna per pound under the Cotton Fund Ordinance of 1942 into a consolidated duty of 2 annas per pound (without any surcharge) wholly leviable under the Indian Tariff Act. .. ..
8. The imposition of a specific duty (without surcharge) on imported gold bullion and coin at the rate of Rs. 25 per tola of 180 grains fine and the raising of the existing duty on silver from 3 annas  $7\frac{1}{2}$  pies (including surcharge) to 8 annas an ounce (without any surcharge) .. ..

The following further concessions estimated to cost Rs. 5.12 crores to the Central Exchequer were announced by the Finance Member during the course of discussion on the Budget: (1) reduction in the duty on kerosene by an anna and half instead of any nine pies as was originally proposed, (2) reduction in the excise duty on betel-nuts from 2 annas to 1 anna per pound, (3) reduction by 6 pies of the increase in the Customs duty on betel-nuts originally proposed in the Budget and (4) reduction in the duty on cinematograph films (not exposed) from 6 pies per linear foot as originally proposed to 3 pies.

Other concessions announced were a reduction in the price of a match-box from 9 pies to 6 pies and a similar reduction in the prices of a post-card from 9 pies to 6 pies to come into force respectively from the 1st of August and 1st of July 1946.

Reductions in expenditure arising from the cuts by the Legislative Assembly amount to Rs. 93.34 lakhs on revenue account and Rs. 3.46 crores under capital disbursements. In consequence of changes in taxation and expenditure, the expected deficit of Rs. 44.06 crores for 1946-47 will move up by Rs. 4.19 crores to Rs. 48.25 crores with revenue at Rs. 341.87 crores and expenditure at Rs. 390.12 crores.

### RAILWAY BUDGET.

The Railway estimates presented by Sir Edward Benthall in the Central Legislative Assembly on February 18, 1946, disclosed a surplus of 32.07 for 1945-46, which was 4.44 crores less than the Original estimates. This is made up of a surplus of 33.75 crores on commercial lines, off set by a deficit of 1.68 crores on strategic lines. The Government decided that they should not set aside a sum of Rs. 2 crores in 1945-46, as originally intended, to cover arrears of maintenance. According to the arrangements made last year, it was decided that General Revenues should receive 32 crores net.

The net result of the year 1946-47 is a surplus of 12.22 crores, which is the result of a gain of 14.24 crores on commercial lines and a loss of 2.02 crores on strategic lines. Out of this it is proposed to contribute 7.36 crores to General Revenues representing 1% of the capital at charge of commercial lines less the loss on strategic lines plus half of the balance left over after appropriating 3 crores to the Betterment Fund which has been instituted this year to meet the large unremunerative expenditure on amenities to the public, particularly third class passengers, operating improvements designed to make travel faster, safer and more comfortable, amenities to staff like canteens, recreation centres and institutes, child welfare centres and hospitals and water-borne sanitation.

The table below summarises the principal figures of the budget estimate and compares them with the revised estimate for 1945-46 and the actual results of 1944-45.

(In lakhs of rupees)

	Accounts 1944-45.	Revised Estimate 1945-46.	Budget Estimate 1946-47.
<i>Traffic Receipts.</i>			
Gross Traffic receipts .. .. .	2,16,88	2,25,00	1,77,00
<i>Working Expenses.</i>			
Ordinary working expenses .. .. .	1,23,34	1,49,91	1,25,73
Appropriation to depreciation fund .. .. .	17,01	17,05	13,22
Payments to worked lines .. .. .	1,93	2,34	1,73
Total working expenses .. .. .	1,42,28	1,69,30	1,40,68
A.—Net traffic receipts .. .. .	74,10	55,70	36,32
<i>Miscellaneous Transactions.</i>			
Receipts .. .. .	5,03	4,96	4,39
Expenditure .. .. .	1,79	1,23	1,25
B.—Net miscellaneous receipts .. .. .	3,24	3,73	3,14
Net Railway revenues (A & B) .. .. .	77,34	59,43	39,46
Interest charges .. .. .	27,45	27,36	27,24
Net gain .. .. .	49,89	32,07	12,22

the revised system of rating which would eliminate the short-comings of previous practice in unhealthy competition, between railways, and would reduce very drastically the difference between Railway Risk and Owners' Risk rates and would eliminate anomalies and simplify procedure.

**Revision of Railwaymen's Pay.**—Sir Edward Benthall pointed out the difficulties of a revision of scales of pay at the present time, for going into which Government have decided to set up a predominantly non-official commission, but gave the assurance that in the meantime the present rates of relief which railway servants "are enjoying will not be reduced as long as there is no material reduction in the cost of living." The Railway Board are also giving the welfare of railway servants a prominent position in their post-war programme.

**Railway Finance.**—Sir Edward Benthall also reviewed the position of railway finance. He stated that there was no question, that the Indian Government railways had prospered financially in many ways as the result of the war. On April 1st 1939 the Railways had accumulated unpaid contributions to General Revenues of 35.41 crores, in spite of borrowings of over 30 crores from the Depreciation Fund which stood at 25.09 crores. The Railway Reserve Fund contained the exiguous figure of 48 lakhs only. At the end of 1945-46 it was calculated that after contributing during the war 158.43 crores to General Revenues including the arrears of contribution, Depreciation Fund would stand at 100.61 crores and Reserve Fund before any transfer to the Betterment Fund, at 29.05 crores. Loss on strategic lines to the extent of 6.01 crores were also met.

In spite of these improvements calculations submitted to the Convention Committee showed that the Depreciation Fund was by no means excessive, if indeed it was adequate to meet the increased level of replacements. The Reserve Fund at the end of 1945-46 would represent only some 3.82 per cent of the capital at charge or only a little over one year's interest charges. It covered only a fraction of the large programme of amenities and improvements, many of them financially unremunerative, which the Government had in view. Satisfaction must, therefore, be tempered with great caution especially since the danger lay in the inability effectively to balance the budget in the future.

After making a review of the position of Railway Finance at the end of the war Sir Edward Benthall sounded a clear warning. He pointed out that the satisfactory results in the past years were largely due to war conditions and only to a limited degree to increased rates and fares, that he had already budgeted next year on a fall of 48 crores in receipts and that the future tendencies were more likely to be downwards than upwards. Consequently, he said that "Government and the House may well have to give serious consideration to the linked problems of the levels of rates and fares, the price of coal and the level of wages. These are knotty problems which are to be faced courageously and with a broad outlook, if post-war plans are to be brought to fruition, for once budget becomes unbalanced and reserves are eaten up—and under unwise management they can disappear almost overnight—it will not be an easy matter to rebuild them or to find the money for extensions, improvements, staff benefits and amenities to passengers."

In conclusion, Sir Edward Benthall pointed out that India had in her Railways a valuable asset which had been maintained without disastrous loss of efficiency owing to war usage and which was, in many ways much better equipped technically than before the war. Rehabilitation is in hand and resources exist to effect it without undue strain. Financially the position is far sounder than it has been at any stage in the history of the Indian Railways, and bears no relation to the situation revealed after the last war. The railways should soon be able to meet the demand for goods traffic and will expand to meet further industrial and agricultural production. "The one great potential danger which has to be faced is the wartime legacy of a high level of operating costs and of post-war commitments for amenities, together with a level of rates and fares out of tune with the general level of prices. Forewarned is forearmed. India has a great asset which must be carefully nursed and firmly administered."

Rail-road co-ordination came up for a good deal of discussion during the budget session. On a cut motion by the Muslim League Party, the assembly threw out a demand for Rs. 3.48 crores in respect of investment in road-rail Companies.

## The Indian Tariff Board.

The Indian Tariff Board is an *ad hoc* body constituted from time to time as necessity arises to investigate the claims made by any Indian industry to protection. It generally consists of a President and two members, one of whom is normally a Government official. It has, subject to the approval of the Government of India, power to co-opt other members for particular enquiries. It tours over the industrial centres in India where the industry referred to it is located and if satisfied after detailed enquiries that the claim for protection is justified, it makes its recommendations to the Government of India. The last Tariff Board became *functus officio* early in 1939 after completing an enquiry into the question of extending protection to the Indian sericulture industry.

## Indians Overseas.

**Numbers.**—The total Indian population overseas, according to the latest available estimates, is as follows:—

Name of country.	Indian population.	Date of estimates.
<i>Dominions.</i>		
1. Australia .. .. .	4,544	1933
2. Canada .. .. .	1,500	1941
3. New Zealand .. .. .	1,200	1942
4. South Africa—Cape .. .. .	10,901 (Asiatics)	1946
Transvaal .. .. .	37,505 ( " )	1946
Natal .. .. .	225,110 ( " )	1946
Orange Free State .. .. .	14 ( " )	1946
5. Southern Rhodesia .. .. .	2,547	1941
<i>Colonies and Protectorates.</i>		
6. Ceylon .. .. .	750,000	1943
7. British Malaya* .. .. .	748,829	1940
8. Hongkong .. .. .	4,745	1931

**General.**—The recognition of the importance attached by public opinion in this country to the problems of Indians residing in other parts of the Empire led to the creation of the Department of Indians Overseas under the portfolio of a separate Member of His Excellency the Viceroy's Executive Council in October 1941 to deal with this increasingly complex matter. With the extension of war in the East and Far East and the occupation of Allied territories by the Japanese, the problems of the evacuation of Indians from these territories and of the welfare of those stranded in these areas, are also being dealt with in this Department. In March, 1944, consequent upon the decision of the Government of India to accept the proposal of the Australian Government to appoint High Commissioners in India and Australia on a reciprocal basis, the work connected with the conduct of India's political relations with the Dominions was entrusted to this Department and its name was changed to that of the Department of Commonwealth Relations.

**Origin of Indian Emigration.**—Emigration is prohibited by the Hindu Shastras, and there is little evidence of any settlement of Indians overseas in early times except in Sumatra, Java and Ceylon. Emigration for purpose of labour dates from the beginning of the 19th century. From 1800 A.D. onwards Indians crossed the Bay to the Straits Settlements to work on the sugar, spice, tapioca, and coconut plantations of Penang, and this intercourse was allowed to continue for long without regulation. The first officially recorded instance of genuine recruitment for labour emigration occurred in 1830, when a French merchant, named Joseph Argand, carried some 150 artisans to Bourbon. The abolition of slavery in British colonies in 1834 gave the first great impetus to the movement. The sugar planters of Mauritius at once turned to India as their best recruiting ground, and between 1834 and 1837 obtained at least 7,000 recruits from Calcutta. The Government of

India at a very early stage realised the necessity of bringing such emigration under regulation. The Law Commission was asked to investigate the case and to make recommendations for securing the well-being of emigrants. They advised that no legislation was required except in order to prevent undue advantage being taken of the simplicity and ignorance of emigrants by providing that a magistrate should satisfy himself that all contracts were entered into freely and understood by them and in order to secure that sufficient provision was made for their accommodation and sustenance during the voyage. A copy of every engagement was also to be transmitted to the Government under which the emigrants were to live. These recommendations were embodied in the first Emigration Act (V of 1837), which also provided that contracts should be determinable after 5 years.

**History of Emigration.**—Under the above Act emigration during 1837 was permitted to Mauritius, British Guiana and Australia (89 men, the first and last direct emigrants to Australia). In 1838 emigration was suspended owing to agitation in England regarding the abuses to which the system was liable, and a committee of enquiry reported in 1840 that emigrants were being entrapped by force or fraud, robbed of their wages and treated with brutality. In consequence, emigration was prohibited (Act XV of 1842) except to Mauritius and there control was tightened. In Act XXI of 1844 emigration under still stricter regulation was allowed to Jamaica, British Guiana and Trinidad. Act XIII of 1847 removed the restrictions on emigration to Ceylon. The emancipation of slaves in the French colonies in 1849 gave rise to a system of emigration from French Indian ports to Réunion and Bourbon which was largely based on crimping in British territory. This practice was checked by Act XXIV of 1852. In 1853 emigration was opened to St. Lucia, and in 1860 to St. Vincent, Natal and St. Kitts. In the latter

year a more elaborate Act, based on a convention with the French Government was passed legalising and regulating emigration to Réunion, Martinique, Guadeloupe, and French Guiana. Act XIII of 1864 marks an important stage in the history of emigration, since it elaborated and consolidated the whole system of control. It was itself amended in 1869 and 1870 in important respects with the object of preventing epidemics on emigrant vessels and improving sanitary conditions in settlements. In 1869 emigration was permitted to Grenada, and in 1872 to Surinam. Owing to the removal of the Straits Settlements from the control of the Government of India in 1867, emigration to that colony came under all the restrictions imposed by the Emigration Act and was only permitted from the port of Negapatam. Owing to the injury caused to the agricultural industries of the colony, these restrictions were removed in 1872, subject only to magisterial control of recruitment in India. In 1870 complaints reached the Government of India of gross abuses in the treatment of emigrants in British Guiana. A commission of enquiry was appointed, and their report led to important legislation in the Colony for the protection of Indian immigrants, which was subsequently extended to Trinidad. Owing to similar complaints from Natal and Mauritius, commissions of enquiry were also instituted in both these colonies, and their reports in 1872 brought to light a number of points requiring amendment.

**Legislation.**—In 1871 a fresh consolidating Act was passed (Act VII of 1871) by which the Acts regulating emigration to the French Colonies and two amending Acts to Act XIII of 1864 were incorporated in the general law. The question of revision of the law again came up for consideration in 1882, when several cases of kidnapping and other objectionable practices were reported to the Government of India. The opportunity was taken to depute two officials (Major Pitcher and Mr. Grierson) to ascertain, in the N.-W. P. and in Bengal respectively, the way in which the system of recruitment actually worked, the respects in which it was open to improvement, and the attitude of the people towards emigration. Their reports were reviewed by the Government of India, and finally in 1883 the law was again recast and consolidated by Act XXI of that year. This Act specified the countries to which emigration was lawful, but empowered the Governor-General in Council to add to the list by notification, and also to prohibit emigration to any of the countries in the list on the ground of epidemic disease and/or excessive mortality among emigrants in such country, or on the ground that proper measures had not been taken for the protection of emigrants, or that the agreements made with them in India were not duly enforced. This Act with certain amendments of no importance to the system of indentured emigration remained in force until 1908, when a fresh revision of the law was undertaken.

Under the Act of 1903 (XVII of 1908) the countries to which emigration was lawful were the British Colonies of Mauritius, Jamaica, British Guiana, Trinidad, St. Lucia, Grenada,

St. Vincent, Natal, St. Kitts, Nevis, Fiji, the Seychelles, the Netherlands Colony of Dutch Guiana and the Danish Colony of St. Croix. Emigration to St. Lucia, Grenada, St. Vincent, St. Kitts, Nevis, the Seychelles and St. Croix ceased soon after the passing of the Act, the demand for fresh labour having died out. Emigration to Natal was discontinued from the 1st July 1911 as the Government of India were satisfied that it was undesirable to continue to send Indian labour to that country. Emigration to the French Colonies of Réunion, Martinique and Guadeloupe had been suspended prior to the passing of the Act of 1903 on account of repeated complaints of the inadequate precautions taken for the proper treatment and repatriation of the immigrants.

The labour laws of the several Colonies provide for the protection and welfare of resident Indian labourers. The Government of India also occasionally depute to the Colonies their officers to report on the condition of Indian labourers. Deputations from India visited Fiji and British Guiana in 1921. In spite of all precautions certain social and moral evils had grown up in connection with the indentured system of emigration and Indian public opinion became strongly opposed to it. The whole system was exhaustively examined by the Government of India in 1915 in the light of the report received from Messrs. McNeill and Chimanlal, and they arrived at the conclusion that the time had come when contract labour should be abolished. The Secretary of State for India accepted this policy and authorised the Government of India to announce the abolition of the indentured system and the announcement to this effect was made in 1916.

In 1922 a further step forward was taken in Act VII of 1922 which prohibited indentured emigration and all unskilled emigration, except to countries specially approved by the Legislature. Emigration to Ceylon and Malaya was brought under control, and the definition of "Emigrant" was extended to cover all persons "assisted" to depart from India.

Another development was the appointment of a Standing Emigration Committee, composed of 12 members of the Central Legislature, to advise the Government of India on all major emigration questions, and more particularly with regard to the terms and conditions on which the emigration of unskilled labour should be allowed. The terms and conditions on which emigration of unskilled labour has been permitted to Ceylon and Malaya since March, 1923, are those which the committee approved, after meeting deputations sent by the two countries.

The Committee, though originally constituted to advise on emigration questions only, always advised the Government on all important matters concerning Indians Overseas. In April, 1945, its name was changed to that of 'Standing Committee on Commonwealth Relations' and its membership was increased to 14. Its functions now are to advise the Commonwealth Relations Department on all matters with which it is concerned excepting the pilgrimage to Hedjaz.

It was found that the lack of power to regulate the total flow of emigration for unskilled work, whether assisted or voluntary and whether under contract or not, may operate to the detriment of Indian communities overseas, particularly in times of economic depression. The Indian Emigration Act was suitably amended in 1938 and the Government of India took power to prohibit, when necessary, even unassisted emigration for the purpose of unskilled work. This amendment was promulgated on December 14, 1939.

The Indian Emigration Act, 1922, also contains certain provisions to safeguard the interests of persons emigrating for the purpose of skilled work. It was found that illicit emigration in some volume was taking place particularly in Bombay with the connivance of some dishonest passage brokers and rules were promulgated under the Act on the 14th Dec. 1939, providing for the licensing of passage brokers and requiring that a passage broker should not be a party to any arrangement to recover from the emigrant the 'cost of recruitment.' These rules have so far been made applicable to the provinces of Bombay and Sind.

During 1939-40 two minor defects in the Indian Emigration Act, 1922, were remedied. Now the Protectors of Emigrants can exercise the powers of detention, search, etc., for the prevention of offences under the Act and by making the offence under Section 30 of the Act cognizable, removes an anomaly between Sections 35 and 30A of the Act.

**Present Position.**—Indian emigration questions have recently taken on a wider aspect. The status of Indians in the Empire generally is one in which the Indian public now take keen interest. It is no longer possible to deal with the treatment of Indian labour apart from other classes of Indian emigrants and travellers. In several Colonies and Dominions considerable Indian communities have sprung up, which although composed largely of the descendants of indentured labourers, are themselves free and lawfully domiciled citizens of the countries in which they are settled, but have not yet been placed on a footing of legal, social, political and economic equality with the rest of the population. The issues round which public interest at present centres are three:—

(a) Control of emigration.

(b) Rights of Indians to admission to other parts of the Empire.

(c) Rights and disabilities of Indians domiciled overseas.

These questions may be considered separately.

**Control of Emigration.**—So far as unskilled labour is concerned, the Government of India have assumed absolute powers of control in accordance with powers conferred on them by the Emigration Act of 1922. The functions of the Government of India were previously performed by the Provincial Governments by virtue of powers delegated to them under Section 124 (1) of the Government of India Act, 1935. With a view to dealing directly with all emigration problems in the post-war

period on a uniform all-India basis, the Government of India resumed the administration of those functions with effect from 1st October, 1944, and appointed a Controller General of Emigration in the Commonwealth Relations Dept. for that purpose. (See earlier issues of the Year Book for details.)

**Admission of Indians to Empire Countries.**—On the motion of the Government of India this question was discussed at the Imperial War Conferences, 1917, and 1918, and the policy accepted by the self-governing Dominions and the British Government was embodied in the following resolutions:—

"(1) It is an inherent function of the Governments of the several communities of the British Commonwealth including India, that each should enjoy complete control of the composition of its own population by means of restriction on immigration from any of the other communities.

"(2) British citizens domiciled in any British country, including India, should be admitted into any other British country for visits, for the purpose of pleasure or commerce, including temporary residence for the purpose of education; such right shall not extend to a visit or temporary residence for labour purpose or to permanent settlement.

"(3) Indians already permanently domiciled in the other British countries should be allowed to bring in their wives and minor children on condition: (a) That not more than one wife and her children shall be admitted for each such Indian; and (b) that each individual so admitted shall be certified by the Government of India as being the lawful wife or child of such Indian."

The first paragraph of this resolution has regularized the various restrictions on immigration which the self-governing dominions have, from time to time, adopted and which, without expressly differentiating against Indians are in practice used in order to check Indian immigration, the objections to which are stated to be not racial or political but economic. Australia prohibits the entry of any person who fails to pass a dictation test of not less than 50 words in any prescribed language. New Zealand prohibits the entry of any person who has not received in advance a permit from the Dominion Government which is refused to any person regarded as unsuitable to settle in the country. South Africa prohibits the entry of any person deemed by the Minister of the Interior on economic grounds, or on account of his standard or habits of life, to be unsuitable to the requirements of the Union. Canada prohibited the landing of any person who had come to the Dominion otherwise than by continuous journey from the country of which he was a native and unless he possessed in his own right 250 dollars. Since 1930, Canada has restricted the immigration of Indians to the wife or unmarried child under 18 years of age, of any Canadian citizen legally admitted to and resident in Canada, who is in a position to receive and care for his dependents. Newfoundland and the Irish Free State impose no restrictions. All the self-governing Dominions have adopted special exemptions in favour

## Indians Overseas:

of students, tourists and merchants visiting the countries for the temporary purposes of commerce, pleasure, or education. India on its side assumed power to regulate the admission of immigrants from any other part of the Empire or foreign countries, by means of passports. By the Immigration into India Act, 1924, the Government of India was empowered to make rules "for the purpose of securing that persons not being of Indian origin, domiciled in any British possession, shall have no greater rights and privileges as regards entry into and residence in British India, than are accorded by the law and administration of such possession to persons of Indian domicile." That Act was repealed in 1943 by the Reciprocity Act, 1942, which enables the Government of India to impose such disabilities in respect of entry into, or travel, residence, etc., upon subjects of any British possession which subjects persons of Indian origin to like disabilities. With regard to the Indian and protectorates, the attitude of the Indian Government is that there is no justification for placing any restrictions on the immigration of British Indians, which are not placed on other classes of British subjects, and this principle has in practice been observed by the Colonial Office except in the case of Kenya Colony where, as stated hereafter, the British Government has reserved to itself the right to impose restrictions on the immigration of classes of people whose entry into the Colony may have an adverse effect on the economic evolution, of the indigenous population.

**Rights and Disabilities of Indians Lawfully Domiciled Overseas.**—The policy of the Empire is summed up in the resolution of the Imperial Conference, 1921, which was recorded in the following terms:—

"This Conference reaffirms that each Community of the British Commonwealth should enjoy complete control over the composition of its own population by restricting immigration from any of the other communities, but recognized that there is incongruity between the position of India, as an equal member of the Empire, and the existence of disabilities upon British Indians lawfully domiciled in some parts of the Empire, and this Conference, therefore, is of opinion that in the interests of the solidarity of the Commonwealth it is desirable that the rights of such Indians to citizenship should be recognized."

The representatives of South Africa regretted their inability to accept this resolution in view of the exceptional circumstances of the greater part of the Union. The representatives of India while appreciating the acceptance of this resolution, nevertheless felt bound to record their profound concern at the position of Indians in South Africa and hoped that by negotiations between India and South Africa a way could soon be found to reach a more satisfactory position.

**Summary of Present Position.**—The present position is as follows:—

**Australia.**—The majority of Indians in Australia are engaged in retail trade or agricultural operations. The Commonwealth franchise was granted to British Indians domiciled in

Australia in 1925. In the States of New South Wales, Victoria, South Australia, Queensland and Tasmania, Indians are not disqualified on racial grounds for the State franchise. The disability which existed in this respect in Queensland until December 1930 and in Western Australia until the end of 1934 was removed as a result of informal representation made by the representatives of India on various occasions, including the one made by the late Sir Muhammad Shafi at the 1930 Imperial Conference. The Constitution and Electoral Acts in Western Australia disqualify an aboriginal native of Australia, Asia or Africa from being registered as an elector for the Assembly; but he may be enrolled as a voter for the Legislative Council (which is the Upper House) in each province in which he holds freehold property of at least £50 capital value.

Indians born in British India were admitted to the benefits of the Invalid and Old Age Pensions Act of 1926. They were also made eligible for maternity allowances. Indians in Australia still suffer from certain minor disabilities (administrative and legal) relating to Crown lands, mining, certain occupations and employment. Under the Mining Act of 1904, in Western Australia the approval of the Minister to Asiatics requires the approval of the Minister in charge of Mines. Under the South Australia Irrigation and Reclaimed Lands Act, 1914, Indians are not eligible to obtain licences of land. In Western Australia wherever licences are prescribed, for example, for cutting sandalwood, for employment under Government contractors, and for employment in European factories, Indians find it difficult under the present administrative practice to get the authorities to exercise discretion in their favour.

An exchange of High Commissioners took place between India and Australia in 1944 when the Government of Australia appointed I. T. Gen. Sir Iven G. Mackay as the first Australian High Commissioner in India and the Government of India appointed Sir Raghunath Purushottam Paranjpye as the first High Commissioner for India in Australia. Both the High Commissioners are striving to establish closer relations between the two countries.

A delegation consisting of six Indian industrialists visited Australia in 1945 to study trade condition there.

**Canada.**—Indian residents of Canada are mostly farmers, gardeners, farm workers, managers of retail stores, hawkers, and unskilled labourers. While in the other eight provinces of Canada, Indian residents are not subject to any political or legal disabilities, Indians in British Columbia numbering about 1,300 are denied the municipal, provincial and federal franchise, as a result of which they cannot serve as trustees in any municipal or rural school district, hold any municipal office or serve as jurors; they are debarred from employment by contractors for the Public Works Department and for the sale of Governments timber and also from holding a foreshore lease or Engineers' certificate under the Boiler Inspection Act.

In October, 1945 a Canadian Citizenship Bill was moved in the Canadian House of Commons which provided for the status of Canadian

Citizenship' which can be acquired by persons (i) who were/are born in Canada or on Canadian ship (ii) whose parents at the time of their births were/are British subjects of Canadian domicile or are Canadian citizens (iii) who have resided in Canada and make an application of their intention to become Canadian citizens. It also introduced an entirely new system for determining who are British subjects, thus involving fundamental change from the present system for determining the common status of British subjects throughout the Commonwealth. It was passed in 1946 and would come in force with effect from 1-1-47. It would bestow 'Canadian Citizenship' on all Indians born in Canada and would also enable Indians born outside Canada to acquire citizenship rights under certain circumstances. It would not, however, have the effect of conferring franchise on the 1300 Indians resident in the province of British Columbia who are denied the same under the existing Provincial laws.

**New Zealand.**—Indians domiciled in New Zealand are generally not subject to any disability and enjoy equal citizenship rights including franchise with the other British subjects.

**South Africa.**—The main grievances of Indians, which led to a passive resistance movement headed by Mr. Gandhi, were settled by the compromise embodied in the Indians Relief Act, 1914 and by the guarantee known as the Smuts-Gandhi agreement. (See earlier editions of the *Year Book* for details.)

In 1920 an Asiatic Enquiry Commission was appointed to investigate the grievances of Indians regarding their rights to trade and hold land in the Union. Their main recommendations were published in earlier editions of the *Year Book*.

#### CAPE TOWN AGREEMENT, 1927.

It was announced in April 1926 that the Government of India and the Government of the Union of South Africa had agreed to hold a Round Table Conference to explore all possible methods of settling the Indian question in the Union in a manner which would safeguard the maintenance of western standards of life in South Africa by just and legitimate means. The Conference assembled at Cape Town on December 17th and its session finished on January 12th. There was, in these meetings, a full and frank exchange of views which resulted in a truer appreciation of mutual difficulties and a united understanding to co-operate in the solution of a common problem in a spirit of friendliness and good-will. The terms of the Cape Town Agreement were on the following lines:—

"Both Governments re-affirm their recognition of the right of South Africa to use all just and legitimate means for the maintenance of western standards of life.

The Union Government recognises that Indians domiciled in the Union who are prepared to conform to western standards of life, should be enabled to do so.

For those Indians in the Union who may desire to avail themselves of it, the Union Government will organise a scheme of assisted emigration to India or other countries where western standards are not required. Union

domicile will be lost after 3 years' continuous absence from the Union in agreement with the proposed revision of the law relating to domicile which will be of general application. Emigrants under the assisted emigration scheme who desire to return to the Union within the 3 years will only be allowed to do so on refund to the Union Government of the cost of the assistance received by them.

The Government of India recognise their obligation to look after such emigrants on their arrival in India.

The admission into the Union of the wives and minor children of Indians permanently domiciled in the Union will be regulated by paragraph 3 of Resolution XXI of the Imperial Conference of 1918.

In the expectation that the difficulties with which the Union has been confronted will be materially lessened by the agreement now happily reached between the two Governments, and in order that the agreement may come into operation under the most favourable auspices and have a fair trial, the Government of the Union of South Africa have decided not to proceed further with the Areas Reservation and Immigration and Registration (Further Provision) Bill.

The two Governments have agreed to watch the working of the agreement now reached and to exchange views from time to time as to any changes that experience may suggest.

The Government of the Union of South Africa have requested the Government of India to appoint an agent in order to secure continuous and effective co-operation between the two Governments."

**Agent of the Government of India.**—The Government of India selected the Rt. Hon'ble V. S. Srinivasa Sastri as their first Agent. He reached the Union on the 28th June, 1927. The designation of the Agent was changed to that of 'Agent-General' in 1935.

**Change of Status.**—Following the appointment of a High Commissioner in the Union of South Africa by the Dominion Government of Canada, the Government of India considered that the status of their representative should not be lower than that of any of the sister Dominions and an announcement was made that from 1st January, 1941, the status of the Agent General would be raised to that of High Commissioner for India in the Union of South Africa. The announcement was accompanied by a message from General Smuts to His Excellency the Viceroy. While the High Commissioner will be the sole channel of communication between the Governments of India and the Union of South Africa and in official representations and correspondence his views will be those of the Government of India only, he will still be available for giving advice to the Indian community and for making any representations on their behalf.

India's representatives in the Union since 1927 have been—

Rt. Hon'ble V. S. Srinivasa Sastri ..	1927-1929
Sir K. V. Reddi ..	1929-1932
Kunwar Sir Maharaj Singh, I.C.S. ..	1932-1935
Sir Syed Raza Ali ..	1935-1938
Sir B. Rama Rau, I.O.S. ..	1938-1941
Sir Shafa'at Ahmad Khan ..	1941-1945
Mr. R. M. Deshmukh..	1945-1946

would be less attractive if their present disabilities were diminished. It was also suggested that a separate law should be enacted to govern the validation of the marriages between coloured persons only, coloured persons including all non-Europeans. In the minority report it was stated that legislation was no solution of the problem and it was suggested that the simple laws of heredity should be taught and also that to overcome the disparity between the European male and female population immigration into South Africa of young European women should be encouraged. In January, 1940, Dr. Malan moved a resolution in the House of Assembly urging introduction of legislation to give effect to the recommendations of the Commission. In the course of the discussion on the resolution the Minister of the Interior stated that as the country was in a state of war, Government did not propose to embark upon contentious legislation touching difficult social conditions, sentiments and racial pride.

**Murray Land Commission.**—This Commission which was appointed early in 1938, was presided over by Mr. Justice Murray of the Supreme Court of South Africa (Transvaal Provincial Division) and had the following terms of reference:—

"To inquire into and report whether, and if so to what extent, the letter or spirit of any law restricting or prohibiting the ownership, use or occupation by Asiatics of land is being evaded and to make any recommendations it may think fit in regard thereto.

The foregoing terms of reference shall not apply to proclaimed land under the Precious and Base Metals Act, 1908 (Transvaal), as amended from time to time, to the extent to which it has been dealt with by the Feetham Report."

Both the Transvaal Indian Congress and the Agent General in the Union gave evidence before the Commission in October, 1938, and its report was published on the 22nd March, 1939. The recommendations of the Commission, which were published in the Press, were generally considered to be satisfactory from the Indian point of view. No action has so far been taken by the Government of the Union on the report.

In spite of repeated representations from the local Indian community and the Government of India, the Union Government passed the Asiatic (Transvaal Land and Trading) Act, 1939, which came into force on June 16, 1939. The Act restricts three important rights of the Indian community in the Transvaal: (a) the right to occupy land not subject to Gold Law restrictions; (b) the right to trade anywhere in the Transvaal; and (c) the right of Indians holding trading licences in May 1919 to transfer their business premises in the same township. The main provisions of the Act are as follows: (1) Further protection for two years was granted to such illegal occupation of land by Asiatics in the area under the Gold Law as had been protected since May, 1930. (2) The issue of trading licenses except with the permission of the Minister was prohibited unless it was proved that the applicant and the person in control of the business were not Asiatics. (3) The hiring or occupation by

Asiatics of any land or premises was prohibited if such land or premises were not occupied by Asiatics or coloured persons on April 30, 1939. (4) The Minister was empowered to issue permits of exemption. In April 1941 an amending Act was passed to keep alive the provisions of the Act of 1939 for a further period of two years, i.e., till May 1943.

The international situation in September, 1939, and the consequent change of Ministry in the Union with General (now Field Marshal) Smuts coming into power altered the position slightly so far as the Indian community was concerned. It was officially announced that the Government of the Union intended to appoint a commission to ascertain whether penetration had in fact taken place. The Union Government also declared that no fresh statutory measures involving segregation would be introduced during the war.

**First Broome Commission.**—Though the Asiatic (Transvaal Land and Trading) Act, 1939, had been brought into force in June, 1939 as a result of further representations, the Union Government declared that no fresh statutory measures involving segregation would be introduced during the war. In January, 1940, the Minister of the Interior also announced the intention of the Union Government to appoint a judicial Commission to ascertain the extent, if any, of Asiatic penetration of predominantly European areas, and the Commission was actually appointed in May with the Hon'ble Mr. Justice F. N. Broome as Chairman and the following terms of reference:—

"To enquire into and report whether, and if so, to what extent Indians have since 1st January, 1927, commenced occupation of or acquired sites for trading or for residential purposes in predominantly European areas in the Provinces of Natal and the Transvaal (excluding land proclaimed under the Precious and Base Metals Act, 1908, as amended, of the Transvaal), and the reasons for such occupation or acquisition."

An attempt made by the Indian community to get the Commission discharged on account of the critical war position in Europe proved futile. The Commission concluded the recording of evidence in the Transvaal in November and enquiries in Natal were in progress during the first half of 1941. A summary of the findings of the Commission was published on October 11th. The two main findings were that in the Transvaal the extent of penetration since 1927 did not appear to be alarming or even surprising and in Natal the extent of penetration into European areas was little more than a trickle. As regards the cases of penetration as had been found, it was stated that the main reason for penetration by acquisition was attributable to the desire to obtain good investments (and this was also held to account for some of the acquisitions with occupation), while the most important reason for acquisition with occupation was given as the "lack of housing and civic amenities in predominantly Indian areas." The Commission also recorded that "it is the Commission's considered opinion that the Indian opposition to compulsory segregation will never be overcome, but that *de facto* segregation may some day be achieved by voluntary mutual co-operation."

**Second Broome Commission.**—Towards the end of 1942, the Durban City Council represented to the Minister of the Interior that since October 1940 Indian penetration in predominantly European areas in Durban had been taking place on an accelerated scale. As a result of this representation, Mr. Justice F. N. Broome was once again appointed to enquire into and report whether, and if so to what extent, Indians (including Companies with predominantly Indian directorates) had, since 30th September, 1940, in the Municipal area of Durban, acquired sites in those areas which the previous Commission found to be predominantly European on 1st January, 1927. According to the findings of this Commission, the sites acquired by Indians in 1942 were 2½ times greater than the highest previous yearly total and the amount paid for these sites during the 29 months covered by the Commission did not fall short of the total amount so paid during the 13 years which were covered by the previous Commission.

As a result of this finding and in order to check further acquisition of property by Indians, the Union Government passed an Act called "the Trading and Occupation of Land (Transvaal and Natal) Restriction Act, 1943," generally called as the Pegging Act. This Act provides for the continuance in the Transvaal of the provisions of the Asiatic (Transvaal Land and Trading) Act 1939 for a further period of 3 years and extends similar provisions prohibiting transfer of properties between Europeans and Indians in Natal for a period of 3 years i.e., up to March 31, 1946. The Government of India through their High Commissioner in the Union protested against the measure and brought to the notice of the Union Government the declaration that the latter had made to the effect that no fresh statutory measures involving segregation of Indians would be introduced during the war. They also made various other alternative suggestions in order to achieve the object desired by the Union Government without having recourse to legislative action, but all these suggestions were in vain.

Indian public opinion in Africa and India was greatly agitated over the new legislation and suggested reciprocal action against the Union of South Africa. These suggestions received the attention of the Government of India.

They formulated their plans to take action against the Union. In the meanwhile, however, it became clear that the general elections in the Union had played a large part in the enactment of Pegging Legislation—Indian penetration having been used as a convenient election issue for securing votes of anti-Indian Europeans. The Government of India, therefore, waited for the excitement aroused by the elections to subside in the hope that the Union Government would make a conciliatory move after the atmosphere in the country had returned to normal. Indian public opinion, however, continued to be disturbed both in India and S. Africa and constantly urged upon the Government of India to adopt retaliatory measures.

**Pretoria Agreement.**—On 18th April, 1944, as a result of an agreement, known as "Pretoria Agreement", between the Union Prime

Minister and the Minister of the Interior on the one hand and a deputation from Natal including members of the Natal Indian Congress on the other, a decision was taken according to which the Pegging Act was to be replaced by an Ordinance to be passed by the Natal Provincial Council. It was agreed by both the parties that the main problem was the occupation of property for residential purposes in urban areas where the question arose of Indians living in close proximity to Europeans. The Ordinance was to provide for the creation of a licensing board with two Europeans and two Indian members and a third European with legal training as chairman. The Board was to control occupation of dwellings in Durban by licensing. The Pegging Act was to be withdrawn by proclamation after the Ordinance was passed. The Agreement on the whole, met with satisfactory reception among the majority of Indians in South Africa. The Government of India also decided to give it a chance although they did not think it an ideal solution. A draft Ordinance embodying major points of the Agreement, which was approved by the Natal Indian Congress, was introduced in the Natal Provincial Council and it was referred to the Select Committee after first reading. On October 17th, 1944, the draft Residential Property Regulation Ordinance with the Report of the Select Committee was placed on the table of the Provincial Council. The amended draft Ordinance departed from the Pretoria Agreement in many aspects; in particular it restricted the right of Indians to acquire property. That Ordinance, with two other Ordinances, viz. Natal Housing Ordinance and Provincial and Local Authorities Expropriation Ordinance, was passed on 3rd November 1944. Indians in South Africa were greatly agitated over this legislation. It also aroused great resentment among the Indian public in India. It was apprehended that these Ordinances would enable the Provincial Administration to carry out racial zoning.

The Government of India represented to the Union Government that the new measure was unwarranted and urged for its withdrawal and implementation of the Pretoria Agreement. As the representations met with failure, the Government of India enforced the Reciprocity Act against South Africa, and persons of South African domicile were declared prohibited immigrants in India. They were debarred from acquiring or occupying any property without a permit and were also deprived of the local franchise. The Indian Legislature urged the Government of India to recall their High Commissioner from South Africa and to enforce economic sanctions against her.

On 28th November 1944, during his interview with the Natal Indian Congress Delegation, Field Marshall Smuts admitted that the Residential Property Regulation Ordinance was inconsistent with the Pretoria Agreement. Later on the three Ordinances were declared *ultra vires* of the powers of the Provincial Council. In March 1945 Field Marshall Smuts stated in Parliament that the Union Government proposed to bring about legislation to grant powers for expropriation of property, so that what the Provincial Council found impossible to do could be done by the Union Government. The

## Indians Overseas.

Indian community took a grave view of the contemplated legislation.

**Housing (Emergency Powers) Act and Natal Housing Ordinance, 1945.**—The proposed legislation was not however proceeded with, but instead the Housing (Emergency Powers) Act was passed in June 1945. It enabled the Government to frame Regulations relating to acquisition and expropriation of property by the local authorities, the Natal Housing Board and the National Housing and Planning Commission of the Union Government. The power of expropriation was to remain in the hands of the Provincial Minister. It also empowered the Provincial Councils to institute Housing Boards through Provincial legislation. Accordingly a draft Ordinance entitled "Natal Housing Ordinance" was published in the Natal Gazette of the 23rd August 1945 and was passed by the Provincial Council in September. The Natal Indian Congress feared that the provision which enabled the proposed Housing Board to expropriate and acquire immovable property and letting racial servitudes at the time of segregation of the land, would lead to the segregation of Indians. The Ordinance remained for some time the subject of discussion between the Union Ministers and the representatives of the Indian community. The Union Government however decided to give assent to the Ordinance but at the same time, in order to minimise the fears of the Indian community proposed to promulgate regulations under the Housing (Emergency Power) Act. Under these regulations the Housing Board would be able to acquire land only for the purpose of constructing dwellings or carrying out housing schemes. The proposed regulations also made the application of the powers of imposing racial servitudes conditional on the specific approval of the Minister of Health. The Ordinance received assent on the 6th December 1945 and became law from that date. The regulations under the Housing (Emergency Powers) Act, were also issued the same day. The Prime Minister also issued a statement on the same date giving an assurance that the safeguards regarding Ministerial consent and approval would be used to ensure that the powers in question were exercised in a reasonable, equitable and impartial manner. The Natal Indian Congress however considered that the assurance of the Prime Minister had not the force of law and that segregation might be achieved by other means.

**Third Broome Commission.**—On 17th March, 1944, the appointment of a Commission by the Union Prime Minister, foreshadowed in the Assembly speech on 22nd March 1943, of Mr. Lawrence, then Minister of the Interior, with the following terms of reference was gazetted:—

"To enquire into and report upon matters affecting the Indian community of the Province of Natal, with special reference to housing and health needs, civic amenities, civic status and provision of adequate residential, educational, religious and recreational facilities, and to make recommendations generally, as to what steps are necessary further to implement the uplift of the Cape Town Agreement of 1927.

and as to all matters affecting the well-being and advancement of the permanent Indian population of Natal."

The Commission included two Indians and commenced work in May, 1944. The introduction of the Residential Property Regulation Ordinance and other Ordinances mentioned in the foregoing paras brought about a crisis. In December 1944, the two Indian members resigned the membership of the Commission saying that, as the Ordinances and the Reports of the Natal Post-War Reconstruction Commission had anticipated the work of the Commission and forestalled its recommendations, the usefulness of the Commission was stultified. The Commission, however, continued its work. In the 2nd week of June 1945, the Interim Report of the Commission was published. The main and only important recommendation of the Commission is that the Union Government should invite the Government of India to send to the Union a delegation, composed substantially of Indians for the purpose of discussing with the Union Government, and with such representatives as the Union Government may appoint, and with such other persons as the delegation may invite, all matters affecting Indians in South Africa.

**The Asiatic Land Tenure and Indian Representation Act, 1946.**—One of the most important events in the history of Indians in South Africa is the passing of the Asiatic Land Tenure and Indian Representation Act. This event has raised the Indian question in South Africa to international plane.

On January 21st 1946, the Prime Minister announced in the Union Parliament, his intention to introduce a Bill for the purpose of prohibiting the occupation and acquisition of property by Indians in Natal, except in certain exempted areas. This roused consternation among the Indian community in South Africa and the public in India. According to the statement made by the Government Spokesman in the Central Legislature on the 12th March the Government of India urged upon the Union Government to convene, as recommended by the Third Broome Commission, a Round Table Conference of representatives of both the countries to discuss Indian question before passing this legislation. The Bill was introduced and rejected this request. The Bill was introduced in the Union House of Assembly on 15th March and passing through all stages became law on 3rd June 1946. The Government of India was strongly urged by the Indian public and the Indian community in South Africa to recall their High Commissioner and enforce trade sanctions against that country. The Government of India informed the Union Government, that in view of the attitude of that Government, the Government of India considered themselves free to take counter-measures. Accordingly they gave notice of the termination of the Agreement with the Union Government on the 25th March 1946 and banned all exports to and imports from South Africa with effect from the 17th July. The High Commissioner for India in the Union has been recalled. The Government of India was also urged by the Indian legislature to raise the Indian question in South Africa before the

- (c) oppose the grant of responsible government to Kenya or of any institutions leading up to it;
- (d) oppose the establishment of a Central Council on the lines proposed by Sir Samuel Wilson;
- (e) demand, in case of the establishment of some such body that the unofficial representatives from each province should include an adequate number of Indians;
- (f) advocate the continuance of the official majority in the Legislative Council of Kenya;
- (g) demand that the representation of natives in the Kenya Legislative Council should be by natives or by Europeans and Indians in equal proportions.

Thereafter meetings of the Standing Emigration Committee were held and the decision arrived at by the Government of India was communicated to His Majesty's Government.

The report of Sir Samuel Wilson was published on the 5th October 1929. Another meeting of the Standing Emigration Committee was held soon thereafter to consider the report and a further communication was addressed to His Majesty's Government on the subject.

The conclusions of His Majesty's Government as regards closer union in East Africa were published in June, 1930, in the form of a White Paper and it was announced that they would be submitted to a Joint Committee of the two Houses of Parliament. In accordance with this decision a Select Committee was set up in November, 1930. The Government of India communicated their views in a despatch to the Secretary of State for India on the scheme set out in the White Paper in so far as it affected the Indian population in East Africa. With the permission of the Joint Select Committee of Parliament they also deputed the Right Honourable V. S. Srinivasa Sastri, P.C., C.H., as their representative to present their case and elucidate in the course of oral examination such questions as the Committee might consider necessary to refer to him. The Select Committee examined Mr. Sastri in July, 1931.

The report of the Committee was published simultaneously in England, East Africa and India on the 2nd November, 1931, and the decisions of His Majesty's Government on the recommendations of the Committee together with certain correspondence arising from the report of the Committee were also similarly published on the 24th August, 1932.

As regards the question of *Closer Union*, His Majesty's Government accepted the view of the Joint Committee that apart from considerations arising out of the Mandatory position of the Tanganyika Territory, the time had not arrived for taking any far-reaching step in the direction of the formal Union of the several East African Dependencies.

There was no important development in regard to this question until 1935 when certain sections in Kenya attempted to revive the proposal for *Closer Union*. Early that year an unofficial conference of Europeans, held at Arusha, was reported to have expressed the view

that since 1931 circumstances had changed so rapidly as to justify a reversal of the Joint Committee's decision and that immediate steps should be taken towards the *Closer Union* of East Africa. A "Memorandum on Union" was also forwarded to the Secretary of State for the Colonies by the European Elected Members' Organisation of the Kenya Legislative Council. His Majesty's Government did not, however, consider that there were adequate grounds for reopening an enquiry into the matters which had been so carefully investigated by the Joint Select Committee as recently as 1931. This decision is contained in Malcolm Mac Donald's despatch, dated the 12th October, 1935, to His Excellency the Governor of Kenya which was published in all the countries concerned.

**Inter-territorial Organisation in East Africa.**—In December 1945 the Colonial Office published proposals for the future management of the inter-territorial services in East Africa. At present the inter-territorial functions are administered by the East African Governors' Conference which was set up in 1926. The new proposals envisage a constitution for the common services as follows:—

- (a) An East African High Commission, consisting of the Governors of Kenya, Uganda and Tanganyika.
- (b) A central legislature (to be called Legislative Assembly).
- (c) An executive organisation supported in appropriate cases by advisory boards.

The High Commission would exercise the usual powers of a Colonial Government in respect of certain common services that may be entrusted to it. The Governor of Kenya would be the Standing Chairman of the High Commission. The Legislative Assembly will have power to enact ordinances for Kenya, Uganda and Tanganyika. Unofficial members would have no powers to initiate legislation; and over-riding power of certification would be included, to be exercised if necessary by the direction of the Secretary of State. The Legislative Assembly would consist of the following:—

- 12 official members; and
- 24 non-official members, consisting of:—
  - 6 European members elected by the territorial legislative councils;
  - 6 Indian members elected by the territorial legislative councils;
  - 6 Members, as many as possible of whom would be Africans, nominated by the High Commission as trustees of African interests, two from each colony;
  - 2 members nominated by the High Commission to represent Arab interests;
  - 4 other members nominated by the High Commission.

The territories would retain their existing constitutions and the territorial Governments would remain responsible for the basic services of administration viz. police, health, education and agriculture etc. The Europeans have criticised the proposals of parity of representation between Indians and Europeans on the

proposed Legislative Assembly. Indians have expressed satisfaction that closer political union is not proposed and have reiterated their opposition to any form of closer union or fusion of the East African colonies. They have asked for safeguards as given below :—

(i) Principle of equality of representation should be extended to the various advisory bodies.

(ii) All African seats should be occupied by Africans.

(iii) The Chairmanship of the High Commission should be filled by the Governors of Kenya, Uganda and Tanganyika in rotation.

The Africans also consider the proposals to be fair and have asked that all members appointed to be Trustees of their interests should be exclusively Africans. The proposals have not yet been implemented.

**Re-organisation of the Administration of Kenya.**—Another matter which led to much controversy in 1945 was the re-organisation of the administration of Kenya. The Government of Kenya proposed to expand the Executive Council of the Governor. Under the proposals the official members of the executive council were to be made the members of the Executive Council in charge of Departments and the non-officials were to be allowed to hold portfolios in respects of two of the Departments, viz., Agriculture and Natural Resources and Local Government portfolios. The Indian community opposed these proposals on the ground that the appointment of non-officials who would invariably be Europeans as members in charge of Departments would be detrimental to Indians' interest. They suggested that if Government were keen to utilise the experience of non-officials it should be done by means of advisory bodies and that Indians should also be given a share in the Government. The proposals were debated in the Legislative Council of Kenya and were adopted in spite of the opposition from all non-European members. A non-official European has been given the charge of the new Department of Agriculture and Natural Resources.

**Pan-African Movement.**—For some time past there have been indications of a growing move for a Pan-African Federation which stands for "closer relationship, better co-operation and larger collaboration" between South, East and Central African territories. In May 1943 the Southern Rhodesian Legislative Assembly passed a motion in favour of a Pan-African Conference. Early in January 1945, a resolution, sponsored by the elected European members, was passed by the Kenya Legislature, calling on the British Government to invite the Prime Minister of South Africa to arrange immediately a conference to plan and co-ordinate the development of British territories in South, Central and East Africa. The Indian members opposed the resolution on the ground that in view of the anti-Asiatic policy of the Union of South Africa any affiliation with her would be harmful to the interests of Indians elsewhere also. The Arab member and the African Member also opposed the resolution which was carried by 11 to 7 votes.

**Franchise.**—As regards franchise, His Majesty's Government stated in the White Paper of 1930 that "His Majesty's Government are of the opinion that the establishment of a common roll is the object to be aimed at and attained, with an equal franchise of a civilization or education character open to all races." In 1931 the question of franchise was also referred to the Joint Select Committee of Parliament which was appointed to consider the question of Closer Union. After discussing the arguments that had been brought forward for and against a common electoral roll, the Select Committee stated in para. 100 of their report that it was impracticable under the prevailing conditions to advocate the adoption of the system of common roll representation in preference to the existing system of election. The Secretary of State for the Colonies accepted the recommendations of the Joint Select Committee in the matter.

**Highlands.**—The Joint Select Committee of Parliament, which was appointed to consider the question of Closer Union in East Africa, had recommended that "in view of the nervousness among the native population as regards the land question, a full and authoritative inquiry should be undertaken immediately into the needs of the native population, present and prospective, with respect to land within or without the reserve held either on tribal or on individual tenure." In April, 1932, a Commission was accordingly appointed by His Majesty's Government and the terms of reference of the Commission included the following:

'To define the area known as the Highlands within which persons of European descent are to have a privileged position in accordance with the White Paper of 1923.'

The Commission in their report, which was published in May, 1934, recommended that the boundaries of the European Highlands should be safeguarded by Order-in-Council so that the European community might have the same measure of security in regard to land as the Commission had recommended for the natives. His Majesty's Government announced that they accepted this recommendation of the Land commission. The Indian community was perturbed by this announcement as the proposed Order-in-Council would give statutory effect to restrictions which were originally considered necessary on grounds of administrative convenience and representations were made to His Majesty's Government both by the Government of India and the local Indian community. No Order-in-Council had been promulgated till the end of 1937, but the position as it affected Indians would be seen from the following extracts from the speech of the Secretary of State for the Colonies made on the 9th July, 1936 :—

'(a) What is contemplated, arising out of the recommendations of the (Morris-Carter) Commission, is the issue of two Orders-in-Council. There are, of course, many other things arising out of those recommendations, but the points which have been raised are chiefly concerned with these Orders-in-Council. One of them is to define the boundaries of those parts of the Highlands which are to be set aside for non-native occupation, and (b) I want to make it clear that there is to be nothing in either Order

imposing any legal disability against Indians or against any persons on the ground of race, colour, creed or anything else. Equally I want to make it clear that the existing administrative practice, which was first laid down by Lord Elgin is to be continued. I wish that to be understood clearly both in India and elsewhere. The existing administrative practice of the Kenya Government which has been followed since 1908 will continue. In the area demarcated as the European area not by law, not by anything in the Order-in-Council, but as a matter of administration that practice will continue in the future as in the past. There will be no legal colour bar.

In spite of protests from the Government of India and the local Indian community, the Order-in-Council contemplated in the above announcement was issued in February, 1939. Though the Order did not contain a definition of the 'privileged position' which persons of European descent were to have within the territorial limits to be included in the Highlands, His Majesty's Government made it clear that there was no intention of changing the administrative practice which had been followed for many years with regard to alienation and transfer of land in the Highlands. This decision caused profound disappointment to all sections of Indian opinion both in Kenya and in India, in particular because of the preference which it accorded even to non-British subjects of European race.

In 1944 another important development took place. In the middle of the year the Kenya Legislature passed two Ordinances, namely (a) the Land Control Ordinance, 1944, and (b) the Crown Lands (Amendment) Ordinance 1944. The objects of the Land Control Ordinance were stated to be (i) putting land to the most beneficial use, (ii) empowering the Crown to acquire land for settlement purposes, and (iii) prevention of speculation in land to the prejudice of post-war settlement. Under this Ordinance a Board called the Land Control Board has been established. The Board is to have, subject to any special or general direction of the Governor, absolute control over all transactions in land in the Highlands. It consists of three official members and 4 other persons appointed by a majority of the European elected members of the Legislative Council of Kenya. One of the objects of the second Ordinance is to make the provisions of the Crown Lands Ordinance 1915 more effective by giving a power of veto to the Governor, in exercise of which he can disallow inter-racial transfers of shares in a landowning company, as is being done in the case of inter-racial transfers of land. Both the Ordinances have been strongly denounced by the Indian community and the Indian members of the Legislature, who have always been opposed to the practice of reservation of the Highlands to the Europeans. The Government of India also made suitable representations against this legislation.

**Lowlands.**—Subsequent to the announcement made in the House of Commons in 1924, in connection with the 'Lowlands,' the question of deputing an officer to examine these areas was considered by the Government of India but they thought it inadvisable to proceed any further with the idea.

Apart from the major problems outlined above, other questions have also been causing concern to the Indian community in the colony. The most important of these are (i) the Ordinance to control and regulate the marketing of native Produce and (ii) the Transport Control Ordinance. The former Bill sought to regulate the selling and buying of native produce by such methods as limiting the number of licences and confining sales to specified localities so as to ensure control over quality. As a number of Indian traders were affected, representations were made to His Majesty's Government by the Government of India and the Bill was revised in certain respects and became law in 1935. It was brought into force from the 1st January, 1936.

The Kenya Transport Control Bill, passed in 1937, was intended to give effect to the recommendations of the Kenya Transport Co-ordination Committee which was appointed in 1935 to investigate and consider the desirability of co-ordinating and regulating all forms of transport in the colony. The Indian members of the Kenya Legislative Council objected to the principle of the Bill. They felt that in the attempt to prevent wasteful competition between the railways and other forms of transports in Kenya, the considerable interests of Indians in the transport industry would be affected adversely. The other main objections were directed against the composition of the Transport Licensing Board and the provision relating to the grant of exclusive licences. The Bill, however, became law and an Indian was also appointed to the Transport Licensing Board.

In the latter half of 1938 and the beginning of 1939, the Kenya Indians were interested in (1) the Immigration of Jewish refugees, (2) the Kenya Immigration Restriction Ordinance and (3) the representation of the Indian community on the Kenya Immigration Board. All these three questions were connected with one another in some form. His Majesty's Government had under consideration a scheme for the settlement of a small number of Jews in the Kenya Highlands. The main objection of the Indian community was that it would accord to foreign subjects within a British Colony privileges which are denied to British Indian subjects. As His Majesty's Government were committed to a policy of settling Jewish refugees from Central Europe, it was not possible to meet the objections of the Indian community in the matter. To prevent an influx of destitute and undesirable foreigners into the Colony as a result of the international situation in Europe, an Immigration Advisory Board was, however, established in October, 1938. The Board was to advise the Commissioner of Police on such matters as might be referred to that in connection with immigration into Kenya but it was not intended that the Board should consider or advise upon any aspect of Indian immigration. Nevertheless it was felt that the Indian community which was vitally interested in the composition of the population and the economic development of the Colony should be represented on the Board. Representations were made to His Majesty's Government in the matter. The objections to the Kenya Immigration Restriction Bill centred round two provisions of the Bill:—(i) the provision authorising the Immigration Officer to require any intending immigrant, who was without any visible

such time as they were able to find work and settle down in India. The deputation from India left Fiji on the 3rd April, 1922, and submitted its report to the Government of India. It has not been published.

In February, 1929, Letters Patent under which the constitution of the Fiji Legislative Council was revised were issued. Provision was made, *inter alia*, for the election of three Indian members on a communal basis. On the 5th November, 1929, one of the Indian members moved a resolution recommending the adoption of a common electoral roll in place of the existing communal one. The resolution was supported by the three Indian members and opposed by the rest of the Council including the elected European and nominated Fijian members. As a protest against this vote, all three Indian members resigned their seats and, no Indian having subsequently offered himself for election, the seats remained unfilled throughout the life of the Council. A fresh election was held during 1932 and as a result two Indian constituencies returned their representatives to the Council, but no candidate offered himself for election from the third constituency.

In 1935, the elected Indian members of the Legislative Council advocated a system of nomination in place of the system of election and the proposal was opposed by the local Indian Association. European opinion was divided. The Government of India supported the principle of election and made representations to His Majesty's Government. The decision of His Majesty's Government is contained in the despatch, dated the 20th July 1936, addressed by the Secretary of State for the Colonies to the Government of Fiji. The main points of the decision were:—

(a) the Fijian representatives should be selected as heretofore, viz., by the Governor from a panel submitted by the Great Council of Native Chiefs;

(b) some of the European and Indian members should be elected and the others nominated;

(c) the circumstances were such as to make it impossible to arrange for representation of the three sections of the population by means of a general franchise. The Legislative Council should consist of the Governor, 16 official members, 5 European members (3 to be elected on a communal franchise and 2 to be nominated), 5 Fijian members (all to be selected as at present) and 5 Indian members (3 to be elected on a communal franchise and 2 to be nominated).

The Legislative Council as newly constituted met in September, 1937. Fresh elections to the reformed Legislative Council took place in 1940.

The most important problem affecting the Indian community in Fiji is that of land tenure. Out of the total Indian population of 94,966 estimated in 1939, a very large majority consists of agriculturist, but alienation of native-owned land is prohibited. More than 80 per cent. of the land in the Colony is held by native owners as tribal land, and the rest is held as Crown grants or as freehold property mainly by the Colonial Sugar Refining Company, Ltd. Indians hold land as lessees from the native owners for the cultivation of rice, sugarcane, etc., and from the Colonial Sugar Refining Co., for cultivation of sugarcane. Practically the whole

problem is one of security of tenure and the encouragement given to Fijians to cultivate their own lands with the most stable and profitable crop, sugarcane, caused some alarm to Indians engaged in agriculture. A number of practical difficulties connected with the leases, which in main related to the procedure for obtaining leases and the administration of the land law, were also brought to the notice of the Government of India.

In September, 1936, the Council of Chiefs of Fiji agreed that all lands (including leases) not required for the maintenance of the Fijian owners should be opened for settlement; that to further this end a Committee should be appointed to inquire into and to determine the amount of land needed for proper development by the Native owners; and that all land (including leases) not so required should be handed over to the Government to lease on behalf of the Fijians. As a result of the examination of the question, the Colonial Government came to the conclusion that the most satisfactory method of procedure would be for Government to take power to deal with *all* the native lands in the Colony, and then to appoint a Commission to determine the lands to be set aside for the exclusive use of the Fijians. These proposals were referred to the Council of Chiefs in October, 1938, and accepted by them. A Bill entitled Native Land Trust Bill was published by the Government of Fiji in the Gazette dated the 17th November, 1939 to give effect to the proposals referred to above. The Government of India made suitable representations on the Bill, and the Bill with certain amendments passed its third reading on the 22nd February, 1940, and was assented to by the Governor.

The Native Land Trust Ordinance, 1940, provides for the formation of a Native Land Trust Board to administer all native land in the Colony on trust. A Fijian Commission has been appointed to conduct enquiries into particulars of land needed for Fijian use and to report to the Board, but with a view to safeguarding the interest of Indians, it has been arranged to depute an Indian Assistant to the District Commissioner to accompany the Commissioner and to place before him any representations made by Indian lessees. The Colonial Government have also agreed that existing occupants of land should not as far as possible be disturbed. Though there is no Indian representation on the Board, provision has been made for such representation on local committees which have been set up to advise the Board in respect of native land in those areas. Regulations have been framed regarding the terms and conditions of leases to be granted by the Board and provide *inter alia* for the grant of agricultural leases up to a term of 99 years.

**Fiji Sugar Dispute, 1943.**—In view of the rising cost of living due to war, the sugarcane farmers in Fiji, who are mostly Indians, demanded, in June, 1943, a higher price for their cane. The Sugar Refining Company, who has the monopoly of sugar production in the Colony, refused any increase in the price of cane until and unless the price of sugar was increased by the Ministry of Food, United Kingdom, to whom the Company was bound to sell all its produce. The farmers thereupon decided not to harvest their crop. They stuck to their decision in spite of

appeals made by the Governor of the Colony. As the crushing season advanced, the feelings amongst the Indians ran high. Some of them even ploughed in their crops. All attempts on the part of Indian leaders to reach an amicable settlement having failed till the end of the crushing season, the major part of the cane crop in the Colony remained unharvested. In March, 1944, the Secretary of State for the Colonies announced in the House of Commons his decision to send an independent expert to the Colony to report upon the matter and further informed the House that Dr. C. Y. Shephard of Trinidad had agreed to conduct the enquiry. Dr. Shephard's report has since been published.

**Labour and Industrial Legislation.** Three important Ordinances bearing on the subject were passed in 1941. These are (1) The Industrial Association Ordinance (No. 18 of 1941), (2) The Industrial Disputes (Conciliation and Arbitration) Ordinance (No. 19 of 1941) and (3) The Labour (Welfare) Ordinance (No. 20 of 1941). No. (1) provides for the formation, registration and regulation of Industrial Associations; No. (2) provides for the investigation and settlement of industrial disputes and No. (3) authorises the appointment of a Commissioner of Labour to safeguard and promote the general welfare of workmen in the Colony.

**Education.**—Education in general, and Indian education in particular, has made considerable progress in the last few years. In 1928 there were only one Government and 23 aided schools out of which one was Indian. The number of Indian schools now is 88 as against 230 European and Fijian Schools. Education in the Colony is under the control of a Board of Education consisting of 8 members of whom 2 are Indians.

On the subject of alleged discrimination in the Fiji Civil Service the Government of India have now been assured by His Majesty's Government that there is no rule preventing the appointment of an Indian as such to any posts in Fiji except those concerned solely with Fijian administration. The Colonial Government had under consideration a proposal to fix a quota for Indian emigrants but the matter has been held over for discussion with the Government of India after the war.

**West Indies British Guiana.**—The Indian population in this colony belong almost entirely to the labouring classes and their grievances are mainly economic. Towards the end of 1919, a deputation consisting of the Hon'ble Dr. J. J. Nunan, Attorney-General, and J. A. Luckhoo, a prominent Indian who was a member of the combined court, visited India to put forward a scheme for the colonisation of British Guiana by means of emigration from India. This was examined by a Committee of the Indian Legislature, which advised that a deputation be sent from India to investigate conditions on the spot. Owing to certain unforeseen circumstances it was not found possible to proceed with the proposal until 1922, when a deputation consisting of Messrs. Pillai, Keatinge and Tivary visited British Guiana. Mr. Keatinge was a former member of the Indian Civil Service who had retired from the post of Director of Agriculture, Bombay; Diwan Bahadur P. Kesava Pillai was an elected member of the Madras Legislative

Council of which he was also Vice-President; and Mr. Tivary was a member of the Servants of India Society who had done considerable amount of Social Welfare Work among the Depressed Classes in the United Provinces. The two reports of the deputation were published on the 21st of January, 1924. Towards the end of the month a deputation from the Colony of British Guiana, consisting of Sir Joseph Nunan, Kt., and the Hon. Mr. J. C. Luckhoo, K.C., arrived in India for further discussions. The Standing Emigration Committee of the Indian Legislature eventually reported that while they would be inclined to view with favour the colonisation scheme put forward by the deputation, they would, before making any definite recommendation, like the Government of India to depute an officer to British Guiana to report on certain matters. Kunwar Maharaj Singh, M.A., C.I.E., Bar-at-Law, was deputed for this purpose. He proceeded to that Colony in September, 1925. His report was received on February 1st, 1926, and published. As a result of the report a notification was issued by the Government of India in March, 1926, with the approval of the Standing Emigration Committee and the Indian Legislature, permitting re-opening of emigration to British Guiana on certain terms. Certain recommendations of Kunwar Maharaj Singh relative to the improvement of the position of the existing Indian population in the Colony were also supported by the Government of India to the Colonial Government who accepted all of them in principle and stated that some of them were already being acted upon. The Colonisation scheme did not, however, eventually materialise; the Roy-Wilson Commission of 1926 recommended that it should not be brought into operation in view of the high cost involved, and in June 1927 the Colonial Government, with the concurrence of the Government of India, decided to postpone the scheme indefinitely.

In March, 1928, following special inquiries by the Colonial Office, reports appeared in the press that a bill had been introduced in the House of Commons empowering His Majesty's Government to alter the constitution of British Guiana by Order in Council. The changes eventually introduced by the British Guiana (Constitution), Order in Council 1928, did not involve any differentiation against Indians and did not in any way infringe the provisions of the special declaratory Ordinance which was passed by the Colonial Government in 1923 and which confers equality of status on all persons of East Indian race resident in the Colony.

Nothing important about the Indian community in that colony was heard till September-October 1935, when there were labour disturbances on certain sugar estates. A Commission was appointed by the Governor to enquire into and report on (a) the causes which led up to the disturbances and (b), *inter alia*, the condition of labour on sugar estates; and to advise on the measures necessary to obviate the recurrence of similar disputes. From the report of the Commission, which was published in December 1936, it would appear that the disturbances were primarily of an economic character and were inspired by grievances and disabilities which the Commission found to be genuine and which were common to both African and Indian labourers

whether resident or non-resident. There is reason to suspect that the position of the Indian labourer has somewhat deteriorated in the last few years. The abolition of the indentured system was no doubt most desirable and constitutes a theoretical advance, but as things are at present the Indian labourer no longer enjoys the measure of security provided by the Immigration Ordinance in regard to pay, hours of work and other benefits and the supervision of the Immigration officers in his relation with the plantation authorities. In order to remedy this state of affairs, the Commission recommended:

- (i) the creation by Government of some authority with such powers as were considered necessary for the efficient safeguarding of the interests of both employed and employer; and
- (ii) the revision of the provision of the Employers and Servants Ordinance in the light of more modern conceptions of the relations between employer and employed.

In 1942, a Labour Ordinance (No. 2 of 1942) was passed. This Ordinance provided for the appointment of a Commissioner of Labour for the regulation of the relations between employers and employees and for the settlement of disputes between them. This brought the labour laws of British Guiana in line with modern conceptions of labour legislation. The Government of India were given an opportunity to comment on the Ordinance at the Bill stage and certain modifications suggested by them were incorporated in it.

**West Indies Royal Commission**—The decision of His Majesty's Government to appoint a Royal Commission to conduct a comprehensive survey of the social and economic problems affecting the group of the West Indian Colonies was announced by the Secretary of State for the Colonies in the House of Commons on the 14th June, 1938, in the course of the debate on the Colonial Office vote during which discussion largely centred around conditions in the West Indies. The actual terms of the Commission (which were announced in the House of Commons on the 28th July) were the following:—

"To investigate social and economic conditions in the Barbados, British Guiana, British Honduras, Jamaica, Leeward Islands, Trinidad and Tobago, and Windward Islands and matters connected therewith and to make recommendations."

In view of the large number of Indians in Jamaica, Trinidad and British Guiana and the importance of the Indian case in these territories being properly presented before the Royal Commission, the question of safeguarding the interests of Indians engaged the attention of the Government of India. As a result of representations made by them, they were able to secure the approval of His Majesty's Government to the designation of an officer to represent their views before the Commission and to assist Indians in the West Indies in the presentation of their case. Mr. J. D. Tyron, C.M.G., I.C.S., who was secretary to the Rt. Honble V. S. Srinivas Sastry, P.C., C.H., when the latter was the first Agent in the Union of South Africa, at that time actually represented the Government of India before the Joint Select Committee in South Africa on the Transvaal Asiatic Land

Tenure Amendment Bill in 1930, was the officer chosen in this connection.

The Commission concluded taking evidence towards the end of March, 1939, and the report was made available to the press in October, 1939. Only a summary of the recommendations of the Commission were available—the report having been published by H.M.G. in June 1945. The Commission recommended that some officer or officers, preferably members of the labour department should specialise in East Indian questions and if suitable candidates were forthcoming should be East Indians. The Commission also recommended that the possibility of the appointment of suitable East Indians to posts in the Government service should be carefully borne in mind by Colonial Governments. They expressed sympathy with the complaints regarding the arrangements for legitimisation and validation of East Indian marriages and recommended that these marriages should so far as the law was concerned be put on exactly the same footing as other marriages.

In effect the commission conceded practically all the demands to which Indians themselves attached importance. The general recommendations which related to matters of education, housing and labour administration appeared satisfactory and were likely to be of benefit to Indians. As an immediate step towards implementing the recommendations of the Commission His Majesty's Government announced their decision to increase the annual allotment to the Colonial Development Fund from £1,000,000 to a maximum of £5,000,000 for ten years and to sanction annually a grant up to £500,000 for the purpose of colonial research. Though the Commission made no recommendation for the appointment of an Agent of the Government of India in the West Indies the matter continues to engage the attention of the Indian Government.

In June 1915, an ordinance to make provision for the solemnization and registration of Hindu marriages in Trinidad and Tobago was enacted. The Ordinance provides for the appointment of Hindu priests as Marriage Officers and the solemnization by them of Hindu marriages. It makes the marriage officers to get the marriages solemnized by them registered with the Registrar of Hindu Marriages appointed for the Colony. Any marriage officer who fails to get registered a marriage solemnized by him, is made liable on summary conviction to a fine, but the marriage itself is not rendered invalid. Parties to any marriage can also apply to a Judge for an order directing the Registrar to register the marriage.

In British Guiana a Hindu Marriage Bill and a Muslim Marriage and Divorce Bill are receiving attention of the Government of the Colony. The Bills provide for the appointment of Marriage Officers and solemnization by them of Hindu and Muslim marriages. The duty for getting marriages registered here also is laid on the marriage officer, and no marriage is rendered invalid by reason only of its non-registration. Marriage solemnized by any person who has not been appointed as marriage officer or whose appointment as such has been cancelled, are deemed invalid and of no effect. The Muslim Marriage and Divorce Bill provides

for Divorce Boards constituted of three marriage officers, each party selecting one and the two officers thus selected co-opting a third one, who would act as Chairman of the Board.

During 1939-40 Major G. Orde Browne was deputed by the Secretary of State for the Colonies to investigate and report on labour conditions in the West Indies. The Government of India took steps to ensure that any measures undertaken to ameliorate the condition of labour as a result of Major Orde Browne's recommendations should reach also the Indian labour population in British Guiana, Trinidad and Jamaica. The Government of India suggested with reference to Indian labour in Trinidad that the Industrial Adviser should also concern himself with the evolution of machinery for collective bargaining among rural labour as in the sugar industry; and in regard to educational institutions in British Guiana, that the Colonial Government should make every endeavour to assume direct responsibility for their management and control.

### CONSTITUTIONAL CHANGES.

Some of the recent developments, since the visit of the West India Royal Commission, in the Colonies of British Guiana, Trinidad and Jamaica which contain considerable numbers of East Indians (as Indians in these parts are referred to) deserve mention. In Jamaica where Indians are less organised and fewer in numbers than in the other two territories, there had been a demand for the revival of the post of the Protector of Immigrants to deal with Indians which was abolished in 1934 as a measure of economy and the revival of the appointment was also recommended by Mr. Tyson in his evidence before the Royal Commission. This claim has since been conceded. It has also been proposed to introduce constitutional reforms in the three Colonies immediately by reducing the proportion of official representation in the local Legislative Councils and increasing the extent of elected representation, while retaining the method of nomination for representation of minority or backward interests. In Jamaica where there is not much likelihood of any Indian securing election to the Council in view of the paucity of Indian voters and they not being numerically strong enough in any electoral district to have their effect felt, the Government of India have suggested that the possibility of nominating a member to safeguard Indian interests should be kept in view. In Trinidad and British Guiana local committees having Indian representatives were appointed to examine franchise questions.
